PROCEEDINGS AND DEBATES OF THE SIXTY-FOURTH CONGRESS, FIRST SESSION.

## SENATE.

WEDNESDAY, *May 3, 1916.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we pray for divine guidance in the discharge of the duties of this day. We would not follow those paths that at last reveal our folly and the necessity of retracing our steps. We would keep pace with the onward progress of mankind. We know the only path that we shall not have to retrace is the path that leads to God, the author of our being, the judge of all men, the governor of the universe, the lover of the souls of men. Do Thou, O God, guide us this day in the paths of righteousness. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

### THE FOREIGN TRADE (S. DOC. NO. 426).

The VICE PRESIDENT laid before the Senate a communication from the chairman of the Federal Trade Commission, transmitting, pursuant to law, a summary of the facts and recommendations embodied in the detailed report of the commission's investigation into trade conditions in and with foreign countries where associations, combinations, or other conditions may affect the foreign trade of the United States, which, with the accompanying paper, was referred to the Committee on Finance and ordered to be printed.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 381) to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those islands, with amendments, in which it requested the concurrence of the Senate; that the House insists upon its amendments, asks a conference with the Senate on the disagreeing votes of the two Houses thereon; and had appointed Mr. JONES, Mr. GARRETT, and Mr. TOWNER managers at the conference on the part of the House.

The message also announced that the House agrees to the amendments of the Senate to the bill (H. R. 759) to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereon.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12207) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1917, and for other purposes.

The message also announced that the House insists upon its amendments to the bill (S. 4856) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, disagreed to by the Senate, agreed to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. RUSSELL of Missouri, Mr. ASHBROOK, and Mr. FULLER managers at the conference on the part of the House.

### ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

H. R. 8067. An act to quiet the title to certain lands in the possession of G. B. Dickson, and for other purposes; and

H. R. 10750. An act permitting the Mondak Bridge Co. to construct, maintain, and operate a bridge across the Missouri River, in the State of Montana.

### PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a petition of the congregation of the Immanuel Lutheran Church, of Rock Island, Ill., praying that the United States remain at peace, which was referred to the Committee on Foreign Relations.

Mr. JOHNSON of South Dakota presented a memorial of sundry citizens of Davis, S. Dak., remonstrating against the severance of diplomatic relations with Germany, which was referred to the Committee on Foreign Relations.

Mr. PHELAN presented memorials of sundry citizens of Bakersfield, Rosamond, San Diego, and Mojave, all in the State of California, remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions of the Outdoor Art League, of San Jose; the Woman's Civic Club of Fortuna; and of the California State Federation of Women's Clubs, all in the State of California, praying for the establishment of a national park service, which were referred to the Committee on Appropriations.

Mr. GALLINGER presented petitions of sundry citizens of New Hampshire, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of Captain Ira Stowell Camp, No. 10, United Spanish War Veterans, of New Port, N. H., praying for the enactment of legislation to grant pensions to widows and orphans of veterans of the Spanish-American War, which was ordered to lie on the table.

He also presented a petition of Mount Prospect Council, No. 16, Junior Order United American Mechanics, of Plymouth, N. H., praying for the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

Mr. THOMPSON presented a petition of sundry citizens of Pittsburg, Kans., praying for the enactment of legislation to grant pensions to employees of the Postal Service, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Pomona Grange, Patrons of Husbandry, of Olathe, Kans., praying for the creation of a tariff commission, which was referred to the Committee on Finance.

He also presented a petition of the Utopian Club, of Gove City, Kans., praying for an investigation into the conditions surrounding the marketing of dairy products, which was referred to the Committee on Agriculture and Forestry.

Mr. PAGE presented memorials of Pomona Grange, Patrons of Husbandry, of Castleton; of Green Mountain Grange, No. 1, Patrons of Husbandry, of St. Johnsbury; of J. S. Morrill Pomona Grange, Patrons of Husbandry, of South Royalton; of Teago Grange, No. 324, Patrons of Husbandry, of South Pomfret; and of Pomona Grange No. 295, Patrons of Husbandry, of Northfield, all in the State of Vermont, remonstrating against any change being made in the parcel-post law, which were referred to the Committee on Post Offices and Post Roads.

Mr. LANE presented memorials of sundry citizens of Oregon, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented memorials of sundry citizens of Oregon, remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

Mr. WEEKS presented petitions of the Fidelia Musical and Educational Corporation, of West Roxbury; of 250 residents of Clinton; of the Schiller Verein Corps, of Clinton; of Boylston Schul Verein, of Jamaica Plain; of the Turn Verein Corps, of Clinton; of 30 citizens of Lynn; of 85 citizens of North Attleboro; of the Harugar Association, of Lawrence; of German-American Alliance of Turners Falls; of German-American Building Association of Lynn; of John Devoy Branch, Friends of Irish Freedom, of Boston; of 600 citizens of Webster and Dudley; of Lyra Singing Society, of Lawrence; of the Brohsinn Singing Society, of North Attleboro; of Celtic Association of Lowell; of Socialist Club of Holyoke; and of sundry citizens of Watertown and Cambridge, all in the State of Massachusetts, praying that the United States remain at peace, which were referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Brookline, Mass., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of the Retail Grocers and Marketmen's Association of Fall River, Mass., praying for the enactment of legislation to fix a standard price for patented and trade-marked articles, which was referred to the Committee on Education and Labor.

He also presented a memorial of the Jamaica Plain (Mass.) Indian Association, remonstrating against the enactment of legislation to change the methods of administering Indian affairs, which was referred to the Committee on Indian Affairs.

Mr. CLAPP presented memorials of sundry citizens of Becker County, Minn., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented a memorial of sundry citizens of Montevideo, Minn., remonstrating against making appropriations for sectarian purposes, which was ordered to lie on the table.

Mr. WARREN presented a petition of the Wyoming Stock Growers' Association, praying for the restoration of live-stock products to the dutiable list, which was referred to the Committee on Finance.

He also presented a petition of the Wyoming Stock Growers' Association, praying for the continuance of the work of destruction of predatory wild animals on forest reserves and public lands, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a petition of the Wyoming Stock Growers' Association, praying for the classification and disposal of the remaining public lands, which was referred to the Committee on Public Lands.

Mr. THOMAS presented memorials of sundry citizens of Colorado, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

Mr. KENYON presented petitions of sundry citizens of Iowa, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Radcliffe, Iowa, remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry citizens of Parkersburg, Iowa, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

He also presented a memorial of sundry citizens of Hawkeye, Iowa, remonstrating against making appropriations for sectarian purposes, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Oskaloosa, Iowa, praying that the United States remain at peace and remonstrating against an increase in armaments, which was referred to the Committee on Foreign Relations.

Mr. POINDEXTER presented a petition of the congregation of the Presbyterian Madrona Church, of Seattle, Wash., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

Mr. SHEPPARD presented a memorial of the American Embargo Conference of Yoakum, Tex., remonstrating against the severance of diplomatic relations with Germany, which was referred to the Committee on Foreign Relations.

Mr. SMITH of Maryland presented petitions of sundry citizens of Maryland, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a telegram, in the nature of a memorial, from J. C. Nicholson, president, and W. M. Hoffman, secretary, of the Baltimore Preachers' Meeting, of Baltimore, Md., remonstrating against making appropriations for sectarian purposes, which was ordered to lie on the table.

Mr. LEA of Tennessee presented petitions of sundry citizens of Tennessee, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Robertson and Sumner Counties, in the State of Tennessee, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented memorials of sundry citizens of Robertson and Sumner Counties, in the State of Tennessee, remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of Benton County, Tenn., praying for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented a petition of the Trades and Labor Council of Nashville, Tenn., praying for the printing of the report of the Commission on Industrial Relations, which was ordered to lie on the table.

### REPORTS OF COMMITTEES.

Mr. SWANSON, from the Committee on Naval Affairs, to which was referred the bill (S. 4054) to reorganize and increase the efficiency of the personnel of the Hospital Corps of the United States Navy, and for other purposes, reported it without amendment and submitted a report (No. 410) thereon.

He also, from the same committee, to which was referred the bill (S. 4307) to prevent the disclosure of national-defense secrets, reported it with an amendment and submitted a report (No. 411) thereon.

He also, from the same committee, to which was referred the bill (S. 3521) to establish a United States naval reserve, reported it with amendments and submitted a report (No. 412) thereon.

Mr. MYERS, from the Committee on Public Lands, to which were referred the following bills, reported them severally without amendments and submitted reports thereon:

S. 4761. A bill providing for the classification, appraisal, and disposal of certain lands within the former Fort Peck Indian Reservation, Mont. (Rept. No. 413);

H. R. 7817. An act to validate the homestead entry of George S. Clark (Rept. No. 414); and

H. R. 228. An act to amend the United States homestead law in its application to Alaska, and for other purposes (Rept. No. 417).

Mr. THOMAS, from the Committee on Public Lands, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

H. R. 2744. An act to correct title to certain lands in Colorado (Rept. No. 415); and

H. R. 8654. An act to amend an act entitled "An act to provide for an enlarged homestead," approved February 19, 1909, by adding a new section to be known as section 7 (Rept. No. 416).

Mr. CHILTON, from the Committee on the Census, to which was referred the bill (H. R. 4767) authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products, reported it with amendments and submitted a report (No. 418) thereon.

He also, from the same committee, to which was referred the joint resolution (S. J. Res. 107) authorizing and directing the Director of the Census to collect and publish statistics of marriage and divorce, reported it with amendments and submitted a report (No. 419) thereon.

### THE METROPOLITAN POLICE.

Mr. JAMES. From the Committee on the District of Columbia I report back favorably without amendment the bill (S. 5802) to amend an act approved June 8, 1906, entitled "An act to amend section 1 of an act entitled 'An act relating to the Metropolitan police of the District of Columbia,' approved February 28, 1901," and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole, and it was read, as follows:

*Be it enacted, etc.*, That section 3 of an act entitled "An act relating to the Metropolitan police of the District of Columbia," approved February 28, 1901, and all acts or parts of acts amendatory thereof, be, and the same is hereby, amended to read as follows:

"SEC. 3. That the Commissioners of the District of Columbia are hereby authorized, empowered, and directed to maintain a force of detectives, to consist of 24 men, who shall have the rank of lieutenant, and who shall be promoted to the detective force from the present detective sergeants of the Metropolitan police of the District of Columbia, and such 24 lieutenants shall receive an annual salary of $1,600; that no member of the detective force shall be removed therefrom except on written charges and after an opportunity for defense on the part of the detective against whom charges are made: *Provided*, That the Commissioners of the District of Columbia may assign any member of the detective force to the uniform rank of the Metropolitan police of the District of Columbia, with rank and pay of a lieutenant in the uniform branch of the service, and the Commissioners of the District of Columbia are further authorized and empowered to detail to the detective force such number of privates as may, in the judgment of the commissioners, be necessary and proper for special service in the detection and prevention of crime, and while serving in such capacity they shall have the rank of acting lieutenants in the detective force."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. REED:

A bill (S. 5832) for the relief of Washington Irving Chambers, captain on the retired list of the United States Navy; to the Committee on Naval Affairs.

By Mr. OLIVER:

A bill (S. 5833) for the relief of the Bethlehem & Nazareth Passenger Railway Co.; to the Committee on Claims.

By Mr. OLIVER (for Mr. PENROSE):

A bill (S. 5834) granting a pension to Annie Murray (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

A bill (S. 5835) granting an increase of pension to Lucy C. Smith (with accompanying papers); to the Committee on Pensions.

By Mr. GRONNA:

A bill (S. 5836) granting an increase of pension to Henry J. Porter (with accompanying papers); to the Committee on Pensions.

By Mr. CLAPP:

A bill (S. 5837) granting a pension to John H. Dorsey; and

A bill (S. 5838) granting an increase of pension to Alonzo Rose; to the Committee on Pensions.

By Mr. POINDEXTER:

A bill (S. 5839) to repeal paragraph 4 of section 21 of the public-buildings act, approved March 4, 1913, providing for the construction of a national archives building; to the Committee on Public Buildings and Grounds.

By Mr. CHILTON:

A bill (S. 5840) to retire Dr. Charles Lee Baker on pay; to the Committee on Military Affairs.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. SHAFROTH submitted an amendment providing that there be granted to each of the States in which forest reserves are situate unappropriated nonmineral public lands in amount equal to one-tenth of the total area of the forest reserves in that State to aid in the construction and maintenance of public roads, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. WEEKS submitted an amendment intended to be proposed by him to the river and harbor appropriation bill (H. R. 12193), which was referred to the Committee on Commerce and ordered to be printed.

Mr. SMITH of Michigan submitted an amendment intended to be proposed by him to the river and harbor appropriation bill (H. R. 12193), which was referred to the Committee on Commerce and ordered to be printed.

GOOD ROADS.

Mr. WORKS submitted three amendments intended to be proposed by him to the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter, which were ordered to lie on the table and be printed.

THE RESTORATION OF PEACE IN EUROPE.

Mr. NEWLANDS. I offer a substitute for Senate resolution 172 for reference to the Committee on Foreign Relations. I ask that it be read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read the resolution.

The resolution was read and referred to the Committee on Foreign Relations, as follows:

Substitute for Senate resolution 172 submitted by Mr. NEWLANDS.

*Resolved*, That the people of the United States of America consisting for the most part of the children by birth or descent of the warring nations in Europe, view with profound distress the continuance of a war, calamitous to all and beneficial to none.

From the small beginning of a movement made by a Teutonic State to punish a Slav State for an alleged conspiracy against its national life, resulting in the assassination of its Crown Prince, the most destructive and frightful war in history has resulted.

The distinguishing characteristics of this war include on the part of each participant the disclaimer of responsibility for its commencement or continuance, the assurance that it is not animated by a desire for conquest, the declaration that it is fighting for its national life, and mutual protests against dominant individual militarism either on land or sea.

The frightfulness of the past two years has surpassed the predictions of the most sinister imagination. The warring nations are dimly conscious of the terrors of the future, through the experiences of the past, but interlocked in the deadly but indeterminate struggle of the trenches, can not stop to deliberate. The continuance of the war means loss to all and gain to none. The only hope of peace lies apparently in the exhaustion of all, accompanied perhaps by a barren victory for the power whose exhaustion is least complete. Victory so attained will be at a stupendous cost, far exceeding its value, and thus the only result of continued warfare will be the common deterioration of race and impoverishment of condition.

The Senate of the United States, conscious that this Government owes a duty to posterity in the maintenance of the long-established principles of civilized warfare as applied to neutral rights, and fearful lest it be drawn into the vortex, seizes this opportunity when its relations with one of the warring powers are in the balance, to urge the combatants who are now conducting the world's tragedy to express in some concrete form without acrimony, taunts, or threats, what proposals can be made the basis of a desired peace, and to suggest to the Teutonic Powers, that having accomplished the declared purpose of the war, the punishment of Servia, they may, without imputation of weakness, make such reasonable proposals regarding the restoration of the status quo, the gradual reduction of military burdens, and the substitution of reason for force in the adjustment of international disputes, as to command the favor and impress the judgment of the people of the neutral and warring nations.

CONDITIONS OF RAILROAD EMPLOYEES.

Mr. NEWLANDS. I ask immediate consideration of a resolution, which I send to the desk, calling upon the United States Board of Mediation and Conciliation for certain information regarding strikes that is very necessary to have. It is a short resolution.

The resolution (S. Res. 181) was read, considered by unanimous consent, and agreed to, as follows:

*Resolved*, That the United States Board of Mediation and Conciliation be, and is hereby, directed to furnish for the use of the Senate a report upon wages and working conditions of railroad employees as affected by arbitrations under the act of Congress approved June 1, 1898, entitled "An act concerning carriers engaged in interstate commerce and their employees," and the act of Congress approved July 15, 1913, entitled "An act providing for mediation, conciliation, and arbitration in controversies between certain employers and their employees."

THE FEDERAL RESERVE LAW.

Mr. OWEN. Mr. President, the Comptroller of the Currency has had occasion to answer various attacks on the Federal reserve act and upon the administration of his office, and I desire to ask permission to have his answer put in the RECORD for the information of the country.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

OFFICE OF THE COMPTROLLER OF THE CURRENCY,
*Washington, April 19, 1916.*

The Wall Street Journal, in its news columns on April 7 and in its editorial columns on April 8, contained articles attacking the Comptroller of the Currency and his administrative acts and criticizing features of the Federal reserve law and the national-bank system, and incidentally the Federal Reserve System.

In a letter to the Wall Street Journal, under date of April 19, the comptroller emphatically denies each charge or criticism, dissects and corrects the newspaper errors, and supports his denials with verbatim extracts from court decisions and official figures.

The following is a copy of the comptroller's letter referred to:

WASHINGTON, *April 19, 1916.*

EDITOR WALL STREET JOURNAL,
*New York City.*

SIR: Every public official with reasonably good sense and clear conscience welcomes criticism of his official conduct and opportunity to compare his own judgment with that of impartial or hostile observers. I assume that every newspaper of the high character and real importance of the Wall Street Journal is glad to have its errors corrected, and to be told the facts of any question it discusses.

In your issue of April 8 you say, editorially, under the heading "Watch Mr. Williams," meaning me, that I am "being watched" to determine my fitness for my position as Comptroller of the Currency "by the legal trial arising out of Mr. Williams's activities, animosities, and persecution of the Riggs National Bank in Washington."

This vigilance is slightly belated. The legal trial supposed to involve my "activities, animosities, and persecution" of the Riggs Bank was determined 11 months ago, when Justice McCoy, of the Supreme Court of the District of Columbia, after hearing evidence intended to support the charge that the Secretary of the Treasury, the Treasurer of the United States, and myself had conspired to injure the Riggs Bank, declared from the bench on May 21, 1915, that the charge was not sustained and dismissed it.

The court, in denying the prayer of the Riggs officials, plainly suggested, so far from there having been any "animosity and persecution" on the part of any Government official, as alleged in your editorial, that "the malice was the other way"; and that "if there was any bad blood," "there is nothing here to show that the two defendants," the Secretary of the Treasury and the Comptroller of the Currency, "were the aggressors in the matter."

Let me also call attention to a further excerpt from the aforesaid decision of May 21, 1915:

"It seems to me, on the record that is made here before me now, that the Government officials would have been remiss if they had consented to permit the bank (Riggs) to act as agent for a new applicant bank, because, I think, for the purposes of this motion, always—now, I am not passing on the ultimate merits of the case—there is evidence here of persistent violations of the law, and that they began not with Mr. Williams's incumbency of the office (and that has another bearing, perhaps, on the question of what animated Mr. Williams), but they began before he came there, and there is evidence that they are continuing until this day; and even if the comptroller is wrong about what kind of a bank ought to have Government deposits (namely, a so-called commercial bank or stock-exchange bank), even if those features were not in there, the other features of violations of the law are in there; and

I should say that he was quite right in determining to take out those deposits or at least to say that there should not be any further selection of this bank as a reserve agent."

The two questions now pending in that case are, Whether the court has the right to review the acts of an administrative officer; and if it has such right, whether the fine of $5,000 imposed on the Riggs Bank by me for failure to comply with the law, as I understand it, shall be enforced or set aside. These are the issues at this writing pending in the civil suit.

In the criminal court the pending issue is whether the chief executive officers of that bank—its president, C. C. Glover; one of its vice presidents, W. J. Flather; and its cashier, H. H. Flather (who resigned the day the indictments were handed down)—committed perjury in their sworn denial of the charge that the bank had been engaged in the business of buying and selling stocks. These officers were indicted by the grand jury for "felonious, willful, malicious, and corrupt" false swearing. With this criminal case I am not concerned; it is with the Department of Justice. Its results can not affect me in any way.

Neither case can be tried or determined in the newspapers or decided on ex parte statements.

It is a little difficult to imagine the foundation for your statement that the Senate had not "opportunity to form their judgment of his (my) fitness for office by a thorough investigation." The Senate committee did investigate all charges, aspersions, and criticisms presented, and found in each and every case that they were without the least justification. After several days spent in examination the committee made a favorable report, and my nomination was confirmed by the United States Senate, in which at that time there were nearly as many Republicans as there were Democrats, with but one dissenting vote, and the one Senator voting adversely subsequently stated that his opposition was based on economic and not on personal reasons. The hearings before the Senate committee were printed and were made a public document.

There was no pledge or promise beyond the usual oath of office. Therefore your intimation that there was a "promise that he (I) would not be swayed by prejudice or engendered animosities" also is without foundation in fact.

You said that, apparently, I am "not concerned whether a bank makes any money or not"; that it is my business to "increase expenses, fine the directors, and adjust the bank accounts according to his own ideas."

Along this same line you published on April 7 as a news article the assertion that under the new system bank examination is being found much more expensive by the national banks, and that "in most cases the banks are being assessed from three to four times what they were under the national-bank act."

Further, in your editorial of April 8 you intimate that my alleged harshness toward the national banks is causing them to "slip their circulation and United States bonds, take out State charters," and quit the Federal Reserve System.

The official records clearly contradict your editorial and news assertions and intimations.

Let us take a look at the facts. First we will take up the cost of national-bank examinations. Under the old system national banks in reserve and central reserve cities, with assets of $1,000,000 or less, paid a fee for examinations ranging from $56 to $70, according to the amount of their capital stock and resources.

Under the operations of the Federal reserve act the same banks are paying a fee ranging from $36.50 to $44.50.

Banks with resources of $1,500,000 to $10,000,000 in reserve and central reserve cities paid for their examinations under the old system a fee ranging from $75 to $230.

Since the passage of the act the fee for banks of this size has been reduced, and ranges from $54.50 to $224.50.

As only 38 per cent of the national banks in reserve and central reserve cities have resources in excess of $10,000,000, it is thus seen that 62 per cent of the banks in reserve and central reserve cities are now paying for their examinations less than they paid under the old plan, though the examinations are far more thorough and efficient than they ever were before.

A bank with assets of $25,000,000 and capital in proportion in reserve and central reserve cities formerly paid a fee of $410.

The fee now paid by such a bank is $524.50, an increase of 28 per cent, which is fully warranted by the additional time consumed by the examiners and the greater thoroughness of their examination.

A bank in reserve and central reserve cities with resources of $50,000,000 and capital in proportion paid a fee of $710. Under the new arrangement such a bank paid $1,024.50, an increase of 44 per cent; but probably no one will contend that $1,024.50 is an excessive fee to charge for the character of examinations which is now being given by this department to a $50,000,000 bank.

The cost of examining banks with assets in excess of $50,000,000 is also greater under the present plan than formerly. But of the 7,600 national banks in the United States only 32 banks, or less than one-half of 1 per cent of the total banks, at the time of the December 31, 1915, call, had assets in excess of $50,000,000. Of these 32 banks 31 were located in reserve and central reserve cities.

Let us now consider the changes made in the cost of examining country banks, or banks outside of reserve and central reserve cities. Under the old system the fees for the examination of country banks with assets of less than $3,000,000 and capital in proportion ranged from $20 to $75.

Under the present system the fees range from $26 to $84.50, the increase being from $6 per bank for the smaller banks to $9.50 per bank for banks with resources of $3,000,000 and a capital in proportion. Under the old system the statutory fee was in many cases wholly inadequate to compensate the examiner for the time employed by himself and in some cases several assistants in making an examination.

The banks to whom these rates apply embrace 6,939 banks, or 96 per cent, of the total of 7,238 country banks.

The country banks, however, with resources in excess of $3,000,000 and capital in proportion, constituting about 4 per cent of all country banks, which under the old system were charged a regular fee of $75, irrespective of resources, are now being charged a compensation in proportion to the resources of the bank, so that a country bank with, say, $5,000,000 of resources, which formerly paid $75, now pays $124.50, and a bank with $10,000,000 of resources pays $224.50; that is an increase of $149.50. But will you seriously contend that a fee of $224.50 for a thorough examination of a bank with $10,000,000 of assets is excessive? Do you think that such a bank could really be properly examined at a cost not exceeding the old fee of $75? On December 31, 1915, there were only 23 country banks in the United States having resources in excess of $10,000,000. These country banks are charged for the examinations a regular fee of $25 plus 2 cents per $1,000 of assets in excess of $25,000.

It must be remembered that under the fee system examiners were required to pay traveling and other expenses from the statutory fee received. The fee system to a very large extent was conducive of superficiality in examinations, the earnings of the examiner being dependent upon the number of examinations made. The tendency of the old plan was to speed up the work of examination at the expense of thoroughness.

This temptation is removed under the present method of compensation, and now an examiner can be depended upon to devote as much time to each bank as is necessary to make a thorough and efficient examination.

When it is thus shown that 62 per cent of all national banks in reserve and central reserve cities are now paying for their examinations less than they paid under the old system, and that 96 per cent of all country banks are only paying increases ranging from $6 per bank (30 per cent increase) to $9.50 per bank (13 per cent increase), will you not admit the gross injustice and inaccuracy of your statement that "in most cases the banks are being assessed from three to four times what they were (paying) under the national-bank act"?

The Federal Reserve Bulletin for March printed a table showing the cost of national-bank examinations before and since the passage of the Federal reserve act. This table, a copy of which I inclose, shows the cost of such examinations, both in central reserve and reserve cities and also in country banks.

The increases under the new system are in some cases really less than those shown in the above-mentioned table of standard costs, because under the old system a fee slightly above the regular rates was charged for bank examinations in certain Western States. The difference between the new and old plans because of these exceptional cases is thus further reduced.

This table was doubtless received at your office; and it so completely disproves the allegations of your editor that it is to be regretted that it was not consulted before he made his sweeping and inaccurate statement that "in most cases the banks are being assessed from three to four times what they were under the national-bank act."

In your article of April 7 you say:

"It is understood that the new schedule fixed by the comptroller is a charge of $25 for the first $25,000 of a bank's assets and 3 cents for each additional $1,000 of assets."

Permit me to call your attention to your error in adding about 50 per cent to the fee really being charged. The charge is not 3 cents for each additional thousand, but 2 cents for each additional thousand over $25,000 plus the minimum charge of $25; and the charge for each additional thousand dollars of assets has been 2 cents since November 16, 1914, except that for the first examination of each bank made after November 16, 1914, a 3-cent charge was made.

As an instance of your exaggeration let me point out that the fee charged national banks, in addition to the minimum charge of $25 per bank, would amount, for two examinations a year, on the present basis of resources, at 2 cents per thousand, to $545,000, whereas you say you "understand" that the fee is "3 cents" per thousand, which would amount, on the present resources, to $818,000 per annum for the same number of examinations. You then proceed to criticize such excessive cost, which, of course, has no existence except in the columns of your paper.

The president of a large national bank, paying practically the maximum percentage of increase paid by any bank in the country, expressed to me a few days since his unqualified approval of the new system, and declared that the examinations which are now being made by national-bank examiners were about as thorough and efficient as it was possible to make them; and that, in view of these thorough and complete examinations, his bank had given up its established custom of having examinations made by certified public accountants, and had thus been relieved of considerable expense.

I know of no foundation for the statement in your article of April 7 that—

"In the cases of banks in the central reserve cities the comptroller had devised an elaborate system whereby the banks were assessed according to their average net deposits for the previous five reports."

Apparently some one has imposed upon you. Your statement is entirely incorrect.

You also say:

"A number of instances are reported of national-bank officials refusing to pay the examination charge when sent in."

That statement is also without foundation. No bank in the United States, so far as I am informed, has refused to pay any of the bills for examination rendered by this office.

You remark that "at present the national banking system is a minority in the banking power of the country." It may not be out of order for me to point out that the resources of the national banks of this country are now three times as great as the aggregate resources of the 14,598 State banks at the time of the last available report on State banks, June 23, 1915; that the resources of these national banks are also more than three times as great as the aggregate of all the great mutual savings banks of the country as of the same date.

Your attention is also called to the fact that the resources of the national banks are more than twice as great as the aggregate resources of the 2,700 trust companies, loan companies, and private banks at the time of their June, 1915, report. Furthermore, in response to your suggestion as to the "minority" position of national banks, let me observe that the increase in resources of national banks in the past 12 months not only exceeds in the aggregate the increase reported in the three-year period from 1912 to 1915 by all State banks, trust companies, savings banks, private banks, and loan companies of the United States, but the ratio of increase in national-bank resources in the past 12 months was about five times as great as the average ratio of increase in all State banks and trust companies and savings banks for the three-year period named.

Your further suggestion that the national banks may "begin to fall away" and that "self-preservation might induce a stampede" is met and demolished, I think, by the official figures, which show that during the period of a little over two years that I have had the honor of holding office as Comptroller of the Currency the resources of the national banks have not only shown the greatest increase ever shown in any like period, but this increase in these two years and two months has been practically as great as the greatest increase ever before shown in any five-year period since the beginning of the national banking system.

My nomination was confirmed by the Senate January 19, 1914. The resources of the national banks on the call of January 13, 1914, were $11,296,000,000. Their resources March 7, 1916, were $13,832,000,000. The number of banks reporting on the call of January 13, 1914, which happens to be the day my nomination as comptroller was sent to the Senate, was 7,493. The number in operation January 19, 1916, exactly two years after my confirmation by the Senate, was 7,622. The increase in capital and surplus profits from January 13, 1914, to March 7, 1916, was $50,000,000; increase in deposits same period, $2,397,000,000.

While it is not suggested for a moment that "Mr. Williams's activity" was responsible for the tremendous progress, growth, and development of the national banking system which has been coincident with my term of office, these figures seem to demonstrate that my administrative acts have not in any way weakened or diminished the prestige and power of the system over which the law has given me certain supervisory powers.

Of 50,000 directors of national banks I never have fined one in my two years and two months in office as comptroller. I have called on banks to bring suit against their directors in certain cases where banks, acting through directors contrary to the instructions of this office and without authority of law, have engaged in stock speculations which have involved heavy losses to the innocent shareholders of these banks, and for which losses the United States Supreme Court has clearly and unequivocally decided that directors are liable. In certain of these cases directors, rather than stand suit, have paid back personally to the injured banks large sums of money on account of such losses. I assume that if these directors had not realized that they had been guilty of unlawful acts for which their banks had suffered and for which they were liable they would not have paid from their own pockets these large sums.

Should I go outside of or beyond the law the banks could appeal to the law to protect them and to call me down and punish me. When I fail to enforce the law or knowingly allow any bank to transgress it, I fail in my duty and can and should be punished by the Government and the courts. I can require nothing of the banks that is not justified by the law. Banks are operated by intelligent men, advised of their legal rights, and courts are open to them for redress whenever they have any reasonable grounds for suspecting that they are being persecuted or that unfair exactions are being imposed on them. It is inconceivable that such men would submit meekly to illegal and harsh or injurious treatment and content themselves with anonymous complaints to newspapers.

I can not imagine that they emulate the more violent and reckless Socialists and labor agitators by claiming that they can not trust the courts and the laws to protect their rights and give them justice. Certainly I am not a czar with power to disregard the law, and the national bankers are not serfs debarred from invoking the law's protection.

I can not present a single requirement without authority under the statutes enacted by Congress. I can do nothing I am not commanded to do by law or expected to do under my oath of office and by consideration for the welfare of the banks and of their stockholders and depositors and the general public. It is no pleasure to provoke anger and bitter criticism by responsible citizens, and no sane man will go out of his way without reason to invite maledictions.

Permit me to add just a few words apart from the record and direct reply. I understand clearly that I am censured severely and continually by men whose good opinion I would enjoy personally and officially. Also, having an individual sense of humor, I get some unofficial amusement from complaints against the administration and abominations of the comptroller's office, based on strange misunderstandings and misstatements and exaggerations. I am comfortably certain that when the banking community of the United States realizes the facts as they are and becomes used to the new conditions, it will accommodate itself to these conditions and concede that strict enforcement of the law is best for everybody. The order against overdrafts is an illustration of why I am optimistic. Many bankers complained against it bitterly. Now most of them understand that the overdraft business was dangerous and a growing menace. Some of them write or come to thank me for "playing goat" and allowing them to point their customers to the ruling and orders of my office as unanswerable excuse for declining to indulge them.

Probably many honest bankers had fallen into the habit of using their own discretion as to when the law should be twisted, evaded, or shaved a little for their own convenience or that of their customers. Conscious of their own good intentions they are impatient of restraint and rigid regulations and enforcement of the law. The obvious danger is that if men of prudence and character are permitted to stretch or ignore any part of the law, men who are imprudent and of less character will do likewise with results injurious to everybody. As the law itself may not discriminate, so officers of the law are forbidden to discriminate. When they undertake to be strict here and lax there, they betray their trusts and take serious chances of doing vast harm. It is like sanitary regulations in a city. They are useless unless applied universally. A best citizen permitted to disregard it and intending no harm may infect his entire neighborhood and community.

As an instance of what I have said of misunderstandings and misstatements and exaggerations, I invite the attention of the Wall Street Journal and its readers to its news article of April 7 and editorial of April 8, already cited, and to the contrasts between the statements and deductions contained in those articles and the facts as shown by the records.

Respectfully,

JNO. SKELTON WILLIAMS,
*Comptroller of the Currency.*

CALLING OF THE ROLL.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Curtis | Jones | Newlands |
| Bankhead | Dillingham | Kenyon | Norris |
| Beckham | du Pont | Kern | Oliver |
| Borah | Gallinger | Lea, Tenn. | Owen |
| Brady | Gronna | Lippitt | Page |
| Broussard | Hollis | Lodge | Phelan |
| Chamberlain | James | Martin, Va. | Pittman |
| Clapp | Johnson, Me. | Martine, N. J. | Poindexter |
| Clarke, Ark. | Johnson, S. Dak. | Myers | Pomerene |
| Ransdell | Smith, Md. | Thomas | Wadsworth |
| Reed | Smith, Mich. | Thompson | Warren |
| Saulsbury | Smoot | Tillman | Williams |
| Shafroth | Sterling | Townsend | |
| Sheppard | Swanson | Underwood | |
| Simmons | Taggart | Vardaman | |

Mr. KERN. I wish to announce the unavoidable absence of the senior Senator from Florida [Mr. FLETCHER], who is detained from the Senate on account of official business. I wish also to announce the unavoidable absence of the junior Senator from Illinois [Mr. LEWIS], who is detained from the Senate on account of illness. These announcements may stand for the day.

Mr. CURTIS. I desire to announce the absence of the Senator from Maine [Mr. BURLEIGH], on account of illness in his family. He is paired with the Senator from Nebraska [Mr. HITCHCOCK]. This announcement may stand for the day.

The VICE PRESIDENT. Fifty-seven Senators have answered to the roll call. There is a quorum present.

COMMUNICATION FROM REAR ADMIRAL FISKE.

Mr. TILLMAN. Mr. President, I send to the desk the communication received yesterday by yourself and referred to the Committee on Naval Affairs, which I ask to have printed in the RECORD after I have finished what I have to say.

Mr. President, it would be easy to show from official records how unreasonable and unjustifiable, too, Rear Admiral Bradley A. Fiske's utterances and attitude are. Those Senators who are curious to learn the cause and progress of this unseemly controversy between a high naval officer and his superior, the Secretary, can find all the facts in the hearings of the House Committee on Naval Affairs on pages 3825 to 3832, inclusive, and a very illuminating and instructive passage between Mr. OLIVER and Mr. BRITTEN is to be found on pages 3834–3836 of the hearings.

But Admiral Fiske will retire some time soon, and as a matter of pity to him I forbear to place all of this evidence in the RECORD. Yesterday, when the Vice President notified the Senate that he had received this communication from the admiral, I felt that it ought to go to the Committee on Naval Affairs to be examined before being read and given publicity. Following the same tactics he has before followed, Admiral Fiske had sent a copy of his communication to the Vice President, to one of his friends on the Naval Committee, and a garbled and incorrect report of what it contained appeared in yesterday evening's Times.

The Secretary of the Navy has nothing to conceal, and courts an investigation if one is demanded. Neither he nor his friends here like this kind of sniping or guerrilla warfare. Therefore, I content myself with asking that Admiral Fiske's letter to the Vice President be published in the RECORD, so that all may judge how little there really is to his utterances except malice and wounded vanity. Disappointed ambition, too, has had much to do with his conduct. He has brooded over what he supposes to be his wrongs until he seems to be obsessed, and I really feel sorry for him.

The VICE PRESIDENT. The communication will be printed in the RECORD.

Mr. LODGE. May I ask the Senator if he sent in the letter?

Mr. TILLMAN. The letter is at the desk.

The VICE PRESIDENT. The letter has already been ordered printed in the RECORD.

The communication is as follows:

UNITED STATES NAVAL WAR COLLEGE,
*Newport, R. I., April 29, 1916.*

SIR: 1. In a communication to the Senate, dated April 21, 1916, transmitting a copy of a letter dated November 9, 1914, to the Navy Department from me as aid for operations, the Secretary of the Navy makes the following statement:

"This communication was not furnished me and I did not know of its existence until long after it was written. I find upon inquiry that it was filed with the chief clerk without my knowledge that it had been written. Although Rear Admiral Fiske was in my office daily, he did not tell me that he had placed the communication on file. His article was written after the estimates for the Navy, as required by law, had been submitted, and I was left in ignorance of its existence, while Congress was considering legislation for the increase of the Navy and actually enacting legislation which has secured the best organization the Navy Department has enjoyed in its history. I was greatly surprised when I learned that a communication, deemed important enough now to be the subject of a Senate resolution, was not considered by its author of sufficient importance for him to present in person to me instead of depositing it, without acquainting me of his action, in the files of the Navy Department."

2. This statement constituted an accusation against me of a grave breach of official propriety—in fact, of actual underhandedness, of an attempt to conceal an important letter from the Secretary; while, as a matter of fact, I was always scrupulously careful never to permit him to receive or to remain under any mistaken impression or to be in ignorance of any important matter if I could prevent it.

3. The statement appeared in the New York Herald and in many other papers on April 23, 1916, and injured my reputation for fair dealing.

4. For this reason, I respectfully request permission to appear before such persons as you may designate and state facts which I and other officers remember very clearly and which are noted in my diary showing that there has been a lapse of memory on the part of the Secretary. In particular I wish to show the two following entires that appear in my diary:

"November 5 * * * I showed the Secretary a paper I had written to him stating Navy is unprepared and needs more men, more training, and a general staff. He made almost no comment on my paper, though he read it carefully. During conversation the Secretary referred to the time in early April, 1913," etc.

"November 10 * * * I showed the Assistant Secretary a copy of my letter to the Secretary on 'Unpreparedness of the Navy,' lack of training, lack of general staff, etc. He said it was bully, and he would keep it," etc.

5. Attention is invited to the fact that although the copy of the letter sent to the Senate was dated November 9, while the entry in my diary was November 5; yet nevertheless my diary shows that the contents of the letter was the same as the contents of the letter of November 9. My recollection is that I kept the letter on my desk a few days, intending to take up the matter again with the Secretary, but finally decided not to do so, but merely to file it; and that a fresh copy was made. The date was probably changed on this by inadvertence but no change was made in the letter beyond possibly some verbal alterations. Certainly no change was made in the character or purport of the letter.

6. I should also like to prove by my dairy that this letter was merely the concentrated essence of a great many oral conversations carried on frequently after the war began, in which I repeatedly urged on the Secretary the peril of the country and the need for more men, a general staff, and more progressive training.

7. In case you do not deem it wise to grant this request, I then ask you, as a matter of justice, to give this letter as much publicity as was given to the letter of the Secretary.

Very respectfully, BRADLEY A. FISKE,
*Rear Admiral, United States Navy.*

To the PRESIDENT OF THE SENATE.

Mr. LODGE subsequently said: Mr. President, when the Senator from South Carolina [Mr. TILLMAN] presented a letter from Admiral Fiske, there was so much confusion in the Chamber—which I may say still exists—that it was impossible for me to hear all that the Senator said. Upon looking at the RECORD I find that I think he did some injustice to Admiral Fiske. The Secretary of the Navy has seen fit on one or two occasions to attack the veracity of Admiral Fiske. It was done before the House committee, and he did it again quite gratuitously, as it seemed to me, when he sent in the letter which was forwarded to the Senate in answer to my resolution.

Admiral Fiske is an officer of the highest rank, who has had an unblemished career in the Navy. He is engaged in no sniping, guerrilla warfare, but he has the desire that every honorable man has to protect his own reputation for truthfulness. That, I think, he has a complete right to do. The facts can easily be determined when they are all laid before the Senate.

I only wish to say this word, for I did not wish injustice done to a distinguished and patriotic officer.

## AMERICAN INTERNATIONAL SHIPPING CORPORATION.

Mr. MARTINE of New Jersey. Mr. President, it seems to me on this bright and glorious May morning it would be a fitting time to bring some pleasant news to the Senate. Our Republican friends have had forebodings of disaster and ruin that would befall this country in consequence of Democratic legislation. I came across this news to-day, that I thought ought to be presented to the Senate. Our Republican friends told us when the banking bill was on that it spelled ruin. When the parcel-post measure was up, they told us it would be an absolute failure. They admit that one of the blessings of the land is the Postal Savings Bank System, which has proved a very great blessing and benefit. Lastly, the shipping bill, they said, was to drive everything off the ocean and spell ruin to the country, from one end to the other.

I find in to-day's New York Times that the Pacific Mail Steamship Co. plans quadrupling its stock; that the new capitalization is to consist of 20,000 preferred shares at $100 and 400,000 shares of common at $5; and that much of the money to be raised will be devoted to building new ships and buying others.

It goes on to say that the new preferred stock will be entitled to dividends at the rate of 7 per cent, which does not look much like ruin.

The old Pacific Mail Steamship Co. was in the process of liquidation when the seaman's law was passed and when the Southern Pacific's controlling interests were acquired by the American International Corporation and W. R. Grace & Co. The five largest vessels had already been sold to the International Mercantile Marine Co., but seven coastwise vessels, the largest of 7,800 tons displacement, were transferred to the new interests.

It goes on further to state that for the 12 months ending with February the total earnings of the Pacific Mail were $1,664,936 and the profits $371,488, against $271,264 the year before, showing a very general resuscitation and improvement. I submit it to my friends. Take good cheer and bless your hearts that the country has not gone to ruin; neither has the shipping interest on the Pacific coast.

I ask, Mr. President, that this article may be incorporated in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

PACIFIC MAIL PLANS QUADRUPLING STOCK—NEW CAPITALIZATION TO CONSIST OF 20,000 PREFERRED SHARES, AT $100, AND 400,000 COMMON, AT $5—COMPANY MEETING MAY 16—MUCH OF MONEY TO BE RAISED WILL BE DEVOTED TO PAYING FOR NEW SHIPS AND BUYING OTHERS.

A step preliminary to important developments in the resuscitated Pacific Mail Steamship Co. was announced by the management yesterday, when a call was issued for a special meeting of stockholders to be held May 16. At this meeting an increase in the capital stock will be authorized, making the amount $4,000,000 instead of $1,000,000. New money is to be provided at this time to pay for three vessels recently purchased.

The enlarged capitalization will be equally divided into 20,000 shares of preferred stock, with a par value of $100, and 400,000 shares of common, with a par value of $5. There will be sold for cash immediately 17,000 shares of preferred for $1,700,000, and 30,000 shares of common at twice the par value, or $300,000, making a total of $2,000,000. This will leave in the treasury 3,000 shares of preferred and 170,000 shares of common, 200,000 shares of common being outstanding now.

The new preferred stock will be entitled to cumulative dividends at the rate of 7 per cent, and nothing can be paid on the common until a balance sufficient for three years' preferred dividends has been earned. Each stockholder will be allowed to subscribe pro rata to both classes of the new stock, on the basis of 0.085 of a share of the preferred, together with 0.15 of a share of common for each share of the old common stock held. The offer has been underwritten, without a commission, by the American International Corporation and W. R. Grace & Co., so that the full $2,000,000 of new capital is assured.

The old Pacific Mail Steamship Co. was in the process of liquidation, following the enactment of the La Follette seamen's law, when the Southern Pacific's controlling interest was acquired by the American International Corporation and W. R. Grace & Co.

The five largest vessels had already been sold to the International Mercantile Marine Co., but seven coastwise vessels, the largest of 7,800 tons displacement, were transferred to the new interests. They own much Pacific Mail stock, bought in the open market after the reduction in capitalization from $20,000,000 to $1,000,000, and are understood to own now about 75 per cent of the stock. Three new vessels, the *Venezuela, Colombia,* and *Ecuador,* built in Holland last year, have recently been purchased from the Royal Dutch West India Mail Line, to be put into service on the Pacific, running from San Francisco to Japan, China, and the Philippines, thus restoring the American flag to trans-Pacific service.

For the 12 months ended with February total earnings of the Pacific Mail were $1,664,936, and profits $371,488, against $271,264 earned last year. G. J. Baldwin, president, says revenues from the Panama line during the ensuing 12 months should exceed the earnings of last year and that the net revenue from the three new steamers should exceed the total net revenue from the balance of the fleet in the current fiscal year.

The American International Corporation is thought to own what amounts to a controlling interest in the International Mercantile Marine, having acquired, according to report, 30 per cent of the stock in the open market in the last few weeks.

Mr. GALLINGER. Mr. President, if there is such prosperity on the part of the private shipping establishments of the country, what is the need of the Government shipping bill, with which we are threatened?

Mr. MARTINE of New Jersey. That does not matter to me at all. I am in favor of Government ownership of the great public utilities of the country, whether they are prosperous or whether they are otherwise, as individual interests. I do say, however, that is no argument against my proposition. I say that the charge of eternal prostration, the wiping off the seas of the shipping interest, is too extravagant, and the facts do not warrant the assertions of our Republican friends on the other side.

Mr. GALLINGER. Mr. President, this is not the first time the Senator from New Jersey has said that he is in favor of the Government going into private business.

Mr. MARTINE of New Jersey. No; it is not the first time, and if I am spared, it shall not be the last time.

Mr. GALLINGER. If the Senator will permit me to conclude my sentence, I wish to say that I know the Senator's impetuosity, and we all appreciate it. We understand that the Senator is in favor of not only Government ownership, but of Government operation, of pretty much everything in this country; but the Senator knows as well as I do that a great deal of the so-called Democratic prosperity is nothing but battle-field prosperity, and that it is due to the European war, and nothing else.

Mr. MARTINE of New Jersey. I will answer that by saying that to some degree, unfortunately, much of it comes from the strife and carnage on the other side of the water, and I would sacrifice every farthing of it rather than have the strife and carnage continue; but, aside from that, there is a very general and healthful prosperity in this land. Outside of the branches of business stimulated by the European war, I say again, as I said a few days ago, great prosperity prevails in many industries, and amongst them I may mention the sewing-machine industry and the jewelry industry, which the Senator laughed at and ridiculed—such jewelry, he said, as is made in New Jersey, though when he stops to think he must know that practically all of the jewelry of the great marts of trade is

made in Newark. Only last Saturday I had occasion to go back to New Jersey, and I passed, being hauled along on the Baltimore & Ohio Railroad, 10 superb locomotives, and stopping at a station I asked if they were for shipment abroad or where were they going. The agent in charge there replied that they were not for shipment abroad, but were made at the Baldwin Locomotive Works and one other works, whose name I can not now recall, for the use of the railroads in this country. He said, "We are clogged with business and we have to multiply methods of transportation." That is my answer to the Senator from New Hampshire.

It is just as easy to say "good times" as it is to say "bad times," and it will be so much more truthful and you will be so much happier.

Mr. GALLINGER. Mr. President, we all rejoice in the Senator's good feeling over the prosperous times that exist in this country to-day; and I would be the last man in the world to take from the Senator from New Jersey any enjoyment that he gets out of these newspaper clippings which he inserts in the RECORD; but I will make the suggestion to the Senator that the answer to all this will be made at the polls in November next, and I refer the Senator to that time that is coming.

Mr. MARTINE of New Jersey. Mr. President, the Senator from New Hampshire refers to my newspaper clipping. I think it was only two days ago—I think it was on Monday last—that the distinguished and delightful Senator from New Hampshire introduced something of a newspaper clipping, or at least a clipping from somebody else, upon the tariff question. I want to ask with what authority can the Senator from New Hampshire arrogate to himself more truth in his clippings than there is in mine? My clipping was not a Democratic clipping. I took this clipping from the New York Times; and we do not think that the New York Times preaches the gospel of Democracy.

Mr. LANE. Mr. President, I should like to ask the Senator from New Jersey if he really does not think he is taking a rather unfair advantage of the Senate at this time during the absence of the senior Senator from Pennsylvania [Mr. PENROSE]?

Mr. MARTINE of New Jersey. But the junior Senator from Pennsylvania [Mr. OLIVER] is here, and God knows he has profited richly and he will stand up and defend all their profits and all their schemes of legislation. I would not for the world take advantage of the Senator from Pennsylvania [Mr. PENROSE].

## GOOD ROADS.

Mr. BANKHEAD. Mr. President, has morning business closed?

The VICE PRESIDENT. Morning business has closed.

Mr. BANKHEAD. I move that the Senate proceed to the consideration of House bill 7617, commonly known as the good-roads bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter.

The VICE PRESIDENT. The Secretary will state the pending amendment.

The SECRETARY. The pending amendment is the amendment offered by the Senator from Montana [Mr. WALSH].

Mr. JONES. Mr. President, I want to reply to the suggestion of the Senator from New Jersey [Mr. MARTINE] a moment ago and shall occupy just a minute. I did not exactly get the character of the article which the Senator asked to have put into the RECORD; but as I understood it, it was a statement to the effect that a company was going into the shipbuilding business to place ships upon the Pacific Ocean.

Mr. MARTINE of New Jersey. That they had bought many ships and were organizing to buy still more.

Mr. JONES. I hope that that is true. We need the ships over there, but I am always a little bit dubious about such statements in the newspapers.

I remember that last fall, along about September or October, the statement was made in the papers by Mr. Manson—I think Mr. Peter Manson, or, at least, a gentleman whose communications were used very largely to press the shipping bill here a few years ago—that he was going within six months to put a line of steamers on the Pacific Ocean. I have heard nothing more of that since. I do not know whether he is one of these men or not.

Mr. MARTINE of New Jersey. I do not know; I do not recall the name.

Mr. JONES. I did not have very much hope of these ships going on at the time, but I do hope that the ships to which the Senator from New Jersey has referred will be put on.

The Senator also suggested that, despite the predictions made with reference to the effect of the La Follette seamen's bill, shipping was developing. I am not opposed to the La Follette seamen's bill, but I do want to call attention to the actual situation as it is on the Pacific coast, and especially at Puget Sound, with reference to the operation of our ships under the law as it now is. I have here a telegram from the Chamber of Commerce of Seattle, dated April 6, and reading as follows:

SEATTLE, WASH., *April 6, 1916.*

WESLEY L. JONES,
*United States Senate, Washington, D. C.:*

Have just telegraphed Secretary Redfield the following: "Shipping from Puget Sound greatly hampered by inability to secure sailors under seamen law. Thirteen loaded vessels detained from 3 to 11 days. This, in face of prevailing scarcity of tonnage, is producing commercial crisis. When honest effort to secure crew demonstrates that certified seamen are not available, is it not possible to permit clearance of vessels with such crews as they can secure? Owners already refusing to send ships to Sound because of situation. When vessels in such demand as to-day, then are compelled, after loading, to lie idly by, and when additional vessels that could otherwise be brought here refuse to come, condition becomes desperate." Please cooperate with other members of Washington delegation.

SEATTLE CHAMBER OF COMMERCE,
J. E. CHILBERG,
*Chairman Foreign Trade Committee.*

The telegram was confused a little in transmission, but I have an office copy of it here, and I think its meaning is plain. I have also a copy of a telegram sent to Secretary Redfield by the Merchants' Exchange of Seattle, under the date of March 27, and reading as follows:

SEATTLE, *March 27, 1916.*

Hon. WILLIAM C. REDFIELD,
*Secretary of Commerce, Washington, D. C.:*

Due entirely to section 13 of seamen's bill, eight sailing vessels loaded with lumber for foreign trade have been delayed a total of 53 days owing to inability to secure certified seamen. Some have been permitted to clear without full compliance with law. Two vessels are now waiting for crews not obtainable owing to seamen's bill. This is detrimental to our commerce and principal industry. There has been no delay in clearing Japanese vessels or vessels from British Columbia, our competitors. We earnestly request suspension of the section until Government can offer relief by better legislation.

MERCHANTS' EXCHANGE OF SEATTLE.

Mr. President, when I received these telegrams I wrote a letter to the Secretary of Commerce asking whether or not the department had any official information that the facts stated in these telegrams were correctly stated, what action the department had taken, and whether, if it found the facts to be as set out, it was disposed to suggest any remedy or legislation to Congress. In reply I received this letter from the Acting Secretary of Commerce:

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
*Washington, April 11, 1916.*

MY DEAR SENATOR: In the absence of Secretary Redfield, your letter of April 7, 1916, inclosing copy of telegram dated April 6, 1916, sent you by the Seattle Chamber of Commerce, J. E. Chilberg, chairman foreign trade committee, has been referred to me. In your letter you state that you have received other telegrams to the same effect and have also seen statements in the papers that vessels have been delayed many days and have finally been permitted to sail without complying with the law. You then ask what official information the department has with reference to this state of affairs and what steps are being taken to remedy the situation, also what are the prospects of success. Further, "If the department does not have ample authority under the law to meet the situation, does it contemplate submitting any suggestions to Congress?"

A telegram from the Seattle Chamber of Commerce was received by the department late in the evening of April 6, 1916, and on April 7, 1916, the following telegraphic reply was sent:

"APRIL 7, 1916.

"SEATTLE CHAMBER OF COMMERCE,
*"Seattle, Wash.:*

"The law is explicit. Department has no power to suspend or annul it. Congress alone can alter the law. Department must enforce law to fullest extent of its power. Due consideration will be given facts in each case when officially ascertained.

"_____ _____,
*"Acting Secretary."*

On the same day, or the following one, Congressman HUMPHREY of Washington sent a copy of a similar telegram received by him from the Seattle Chamber of Commerce, and requested information in regard to the matter and the attitude of the department, which was given him over the telephone by Mr. Thurman, the Solicitor of the department. During the last month a number of telegrams were received by the department from masters of vessels, principally at Seattle and Portland, stating that, owing to the shortage of men, they were unable to procure the number of able seamen required under the seamen's act, and requesting permission to sail without such compliance with the law.

While you are, of course, aware that the department has no power whatever either to suspend or modify any of the provisions of the law, the following procedure was adopted by Secretary Redfield in the matter of these requests:

On the receipt of each one the substance of it was immediately telegraphed to the collector of customs at the port and also to the board of local inspectors of the Steamboat-Inspection Service, with instructions to investigate and report to the department immediately. At the same time a copy of the request was forwarded to the Department of Labor, with the request that it cause an investigation to be made by its inspector of immigration and a report submitted. If these reports corroborated that of the master, and it appeared evident that the master was unable to procure the required number of seamen, the vessel was then allowed to clear, the department taking the position that while it had no right or power to suspend or modify the provisions of the law, still, the latter were not to be considered as requiring the impossible. The situation in Portland and Seattle was found, in, I think, all of the instances, to be as reported, and the vessels were allowed to clear.

I do not believe that Secretary Redfield contemplates submitting any suggestions to Congress in regard to the seamen's act, believing, as he does, that any changes in the law should originate there.

If there is anything further in this matter you desire, please advise me.

Very truly, yours,

E. F. SWEET,
*Acting Secretary.*

Hon. WESLEY L. JONES,
*United States Senate, Washington, D. C.*

Mr. President, that shows the condition of the ships which desire to sail from Puget Sound with reference to compliance with the seamen's law.

The Secretary states that he does not think that the law requires the impossible, and yet, according to the statement here, the law is not being complied with; the law is not being enforced. I am not saying that the Secretary is not doing what is right, so far as that is concerned. It seems that the law can not be complied with; but it does seem to me that under such circumstances it is the duty of the department to suggest the situation to Congress for its consideration. Congress does not know whether the law is being complied with or not unless we get some such report as this.

The situation appears to be that the law is not being complied with; and, according to the department, it is impossible to comply with it. It appears to me, therefore, that the subject ought to have some consideration. I am not prepared to say that section 13 of the law should be repealed. I voted for the seaman's law. I had some doubts about the benefits that would come under section 13, and I had some fears about the difficulties that would arise, apparently just as they have arisen; but it does seem to me that we ought to give the matter some consideration. It can be seen how it is vitally affecting the shipping of Puget Sound.

I have here a letter from the Chamber of Commerce of Seattle, setting out quite fully the situation there and giving the names of vessels, the delays occurring, and so forth. I shall read just an extract from that letter. It is as follows:

Eleven American sailing craft have during the past three weeks been delayed in departure by from 3 to 12 days. In like manner, four vessels under other flags have been detained from 7 to 21 days.

The letter gives facts concerning other vessels, which I will not take time to read; but it does disclose a situation and a condition which ought to have some attention, it seems to me, and some consideration, not only by the department but by Congress. I ask, Mr. President, to insert in full the letter from the chamber of commerce with reference to the situation.

The VICE PRESIDENT. In the absence of objection, permission is granted.

The letter referred to is as follows:

NEW SEATTLE CHAMBER OF COMMERCE,
*Seattle, Wash., April 17, 1916.*

Hon. WESLEY L. JONES,
*United States Senate, Washington, D. C.*

DEAR SIR: Your attention is respectfully called to the attached copy of a letter to Chairman ALEXANDER, of the House Committee on the Merchant Marine and Fisheries, from the chairman of the foreign-commerce department of the Seattle Chamber of Commerce. This communication is written as a result of the replies received from the Department of Commerce direct and through members of the delegation, to the effect that the seaman's law is mandatory and permits no modification of terms in its administration.

Yours, very truly,

C. B. YANDELL,
*Executive Secretary.*

—

NEW SEATTLE CHAMBER OF COMMERCE,
*Seattle, Wash., April 17, 1916.*

Hon. JOSHUA W. ALEXANDER,
*Chairman Committee on the Merchant Marine and Fisheries, House of Representatives, Washington, D. C.*

DEAR SIR: While Congress is asked to pass on the question of Government ownership and operation of merchant ships, Puget Sound is confronted with the problem of moving vessels now in existence, loaded with cargo ready for sea.

Eleven American sailing craft have, during the past three weeks, been delayed in departure by from 3 to 12 days. In like manner four vessels under other flags have been detained from 7 to 21 days. The list includes:

| Name of vessel. | Nationality. | Number of days delayed for crew only. |
|---|---|---|
| Star of Holland | American bark | 5 |
| Xona | American schooner | 6 |
| H. K. Hall | do | 6 |
| Geneva | American brigantine | 7 |
| Jane L. Stanford | American barkentine | 11 |
| Irene | American schooner | 3 |
| E. R. Sterling | American barkentine | 12 |
| Blakeley | American schooner | 10 |
| A. J. Fuller | American ship | 8 |
| Mather Turner | American schooner | 5 |
| W. J. Patterson | do | 7 |
| Mario | Peruvian bark | 11 |
| Quatro Hermanos | do | 11 |
| Celticburn | British ship | [1] |
| Algoa Bay | Peruvian bark | 7 |

[1] About 3 weeks.

(Above list has been furnished by the Merchants' Exchange of Seattle, representing shipping interests.)

Here it appears less a question of additional ships and more one of the privilege of operating those we now have. These delays are also preventing owners from sending other vessels to Puget Sound because of the fear of similar tie-up.

Shipping men blame the seamen's law. It is difficult to attract sailors of any kind when forbidden to pay them an advance on wages, as had always heretofore been the custom. It is impossible in most cases to find the requisite number of certified men. It is impracticable for some of the foreigners, such as the Peruvian captains, to sign a crew qualified under the language test. It is annoying, after spending days in an honest effort to comply with the law, to be compelled to apply to Washington for permission to clear, and to deposit $500 to cover whatever fine may be assessed for violation of the requirements.

The shipper, on the other hand, is exasperated. The rates he has to pay and the difficulty of obtaining bottoms impress him with the necessity of keeping all available ships under way except while actually loading or discharging. When he sees loaded vessels lying idly by in the face of the clamor for more space to carry our products, he inquires as to the cause. Then he learns that the owners of other boats have refused to send them to Puget Sound on this account, and that still more are likely to refuse to come for freight that is ready.

An American steamship of one company, attracted from the coastwise trade by the prevailing high trans-Pacific rates, began loading at San Francisco for the Orient and was intending to come to Puget Sound for cargo awaiting her here, but did not do so because the company had learned of the delays experienced by vessels at this port, and was afraid to invite such a risk. Another vessel of the same company will soon be sent from this coast across the Pacific, but will not, we fear, come to Puget Sound for freight, unless some very definite assurances can be given of freedom from annoyance.

Another American steamship of still another company, carrying a nonunion crew, was deserted by most of its sailors at San Francisco upon arriving there a short time ago. The owners attribute these desertions to the influence of representatives of the unions. The ship proceeded to Puget Sound with only four deck men when it should have had eight, and with but one of these men a certified seaman. It made an earnest effort to secure a crew on the Sound, seeking nonunion men, as all of its ships are operated in that manner. Failing to find them, it reported to the collector of customs that it could not obtain certified sailors. Meanwhile the office of the collector had been advised that the unions could furnish certified men. With the knowledge that there were certified men to be had, the collector was unable to permit clearance. The company then faced the dilemma of either signing on a full union crew (as would be required by the unions) and discharging the men who had stood by the ship, or by holding up sailing until it would become possible to find nonunion men, such as have always been employed. The experience is causing the company in question to give serious consideration to the curtailment in its service to this port.

The six-mast American barkentine *E. R. Sterling*, owned in Seattle, cleared a few days ago with a cargo of lumber for Australia with but one certified man in its crew. It was unable to sail for fully 12 days after completing its cargo. The captain and owner undertook, long before the loading was finished, to obtain sailors. They found this practically impossible in the absence of authority to make an advance on wages. Capt. Sterling, in a statement to the collector of customs under date of March 20, said: "I have endeavored to secure crew without advances by offering increase in wages, but without success, the seamen claiming they require clothing and want to pay their board bill."

These delays do not come to the official knowledge of the collector of customs. This is for the reason that a ship master does not, as a rule, apply for clearance until he has a crew with which he is willing to go to sea. When applications have been made here, the collector of customs has promptly recommended by wire to Washington that they be granted. This has been done in every case upon receiving the deposit of $500 to cover fine. But the delay arises nevertheless from the fact that the commander of the vessel must first satisfy himself by diligent effort that he can not find the certified men required by law. Having done so, he next undertakes to sign on whatever crew he can get.

Our investigations convince us that there are not enough certified seamen to handle available ships. The arrival of additional men is contingent largely on desertion from incoming foreign vessels and from other sources abroad. The number thus supplied is exceedingly small. As a result, shipping must either suspend or proceed openly and continuously to violate the law, except in the case of Japanese vessels plying across the Pacific, which have no difficulty in complying with the terms of the seamen's measure. But the Japanese can not help to relieve the coastwise situation and the demand in other directions.

Meanwhile our own laws, if not violated, prevent American citizens owning American ships from moving American commerce. Will Congress not endeavor to remedy this situation?

SEATTLE CHAMBER OF COMMERCE,
———, *Chairman Bureau of Insular and Foreign Commerce.*

Mr. MARTINE of New Jersey. Mr. President——

Mr. JONES. I yield to the Senator from New Jersey.

Mr. MARTINE of New Jersey. Mr. President, in response to the telegram read by the Senator from Washington, I wish to say that I have no doubt that the gentlemen on Puget Sound have telegraphed the conditions as they saw them; but I think it is shown pretty conclusively by the article which I have read in relation to the organization of great shipping interests at San Francisco and New York that the conditions are not as dire as the gentlemen who signed the telegram to the Senator would indicate.

There is no doubt that there may be some difficulty in making the new law operative; but I should like to ask, in the light of the experience we have had and in the light of the general knowledge we have had with reference to the shipping interests, whether the Senator from Washington would be willing to vote for a repeal of the La Follette law?

Mr. JONES. Mr. President, I stated a moment ago that I was not in favor of a repeal of the law. I would not vote for a repeal of the law in its entirety, and, as I said a moment ago, I am not prepared to say that I would vote for a repeal of section 13; but it seems to me there ought to be some modification of it.

Mr. MARTINE of New Jersey. I will not argue that modifications might not be made with good effect. No human law ever passed is perfect, and there is no law that might not be improved, perhaps, by amendment and modification. But my whole charge was in answer to the general direful tale that was told us by the gentlemen opposing this legislation. I am very happy to know that the Senator from Washington is one who voted for it, however. The general direful tale was not verified. When men put in two or three or four or five million dollars and buy ships, as they are buying them in San Francisco and other points in that vicinity, there is a brighter and a happier prospect than our friends on the other side would have us believe.

Mr. JONES. Mr. President, I simply wanted to express the hope that the promise made in this article would be fulfilled.

Mr. MARTINE of New Jersey. I have not a doubt of it.

Mr. JONES. A promise was made last fall that has never been realized; but I did especially want to call attention to the actual situation that exists on Puget Sound, and it does occur to me that if we do not propose to change that provision we ought to give the Secretary of Commerce some power and some discretion, so that in order to accomplish what ought to be done he will not have to violate the law to do it, because he is permitting these vessels to sail in absolute violation of the law. We ought to vest in him some discretion under which he can take these conditions into account, and not violate the law by allowing these ships to sail without the proper crews.

Mr. MARTINE of New Jersey. I certainly shall be most happy to cooperate with the Senator in regard to anything that will improve the law, but that will not mutilate or destroy it.

Mr. VARDAMAN. Mr. President, what is the question before the Senate?

The VICE PRESIDENT. The pending question is the amendment of the Senator from Montana [Mr. WALSH].

Mr. VARDAMAN. I wish we could consider that bill this morning. It is a matter in which we are all very much interested. I think it should be put through without taking up time in the discussion of irrelevant matters.

The VICE PRESIDENT. All in favor of the amendment——

Mr. JONES. Mr. President, is this the amendment of the Senator from Montana?

The VICE PRESIDENT. That has been pending now for 20 minutes.

Mr. JONES. Mr. President, I want to say a few words about that amendment. I think it ought to be adopted. I have not the amendment before me; but, as I understand, it is an amendment that appropriates a million dollars a year for 10 years to be expended in the construction of roads within forest reserves.

Mr. BANKHEAD. Roads and trails.

Mr. JONES. The building of roads and of trails. I am especially interested in the road proposition. If there should be special objection to the proposition with reference to trails, I must say that I do not insist upon that very strongly myself. I do not know just how the Senator from Montana feels with reference to that; but what I wanted to say a few words about was especially the proposal to advance this money for the purpose of using it in the construction of roads within forest reserves in the Western States, and its reimbursement from the proceeds of sales of timber from these forest reserves.

Mr. President, I doubt if the Senators from the East fully appreciate the situation with reference to these forest reserves. Take my own State, for instance. About 12,000,000 acres of the territory of our State is included within forest reserves. My recollection now is that we have a strip of forest-reserve lands extending clear across our State from north to south, with a width of a great many miles; I do not know just how many. In that territory we need roads. We need roads through the territory. In some sections, in the valleys, there has been considerable settlement, and schoolhouses have been built, and little towns, and farming communities, and all that sort of thing, but they lack roads; and there is but very little chance of getting these roads, because the lands can not be taxed. If these settlers have been able to get patents to their lands, of course their lands will be subject to taxation; but that is all. All the surrounding territory is not taxable, because it is owned by the United States and reserved by the United States.

Mr. VARDAMAN. Mr. President, may I ask the Senator from Washington a question?

Mr. JONES. Certainly.

Mr. VARDAMAN. What States would be materially affected by the amendment offered by the Senator from Montana?

Mr. JONES. I suppose Washington, Montana, Oregon, Idaho, Colorado, and possibly Wyoming and Utah; nearly all the Western States.

Mr. VARDAMAN. Is there any opposition to the amendment from those States?

Mr. JONES. I do not know of any. Of course, the amendment was just submitted to the Senate yesterday, but I do not know of any opposition to it. I can not see why there should be any opposition from any of those States, but I can see many reasons why they should be in favor of it, because, as I said, these lands are not subject to taxation, and the only way in which money can be raised for improvement inside the forest reserves is for the few people in there to bear all the burden. That is practically impossible; and we can not get access to these communities—people can not get in or get out—unless there is some help of some kind. The development of the forest resources of these forest reserves is greatly delayed and hindered and prevented because of the failure of communication of any kind, and if we could have something of this sort it would not only assist the people in the forest reserves but it would materially assist the Government in disposing of some of these great resources from which it hopes to realize a great deal.

The timber resources in my State are very great—probably greater than those of any other State in the Union—and, as I said, we have large forest reserves; but these forests can not be disposed of to very great advantage without communication. The Forest Service is not able to dispose of the forests that ought to be disposed of, very largely by reason of the lack of communication and because they can not, by reason of the conditions there, secure proper terms under which the forests can be harvested. There are many places where the timber is what we call merchantable timber, where it is ripened and matured, and yet there is no way to get it in or out, and so it dies instead of growing; it is decreasing instead of increasing, simply because we have not access to it.

Mr. GALLINGER. Mr. President, I was not present when the amendment was submitted yesterday, and I am not familiar with its details. Is this money to be paid entirely from the Federal Treasury?

Mr. JONES. It is to be advanced by the Federal Treasury and repaid out of the proceeds derived from the sale of the timber in the forest reserves.

Mr. GALLINGER. That is what I wanted to ascertain.

Mr. JONES. So, as a matter of fact, this will not cost the Government anything, and I think that statement will be demonstrated to be absolutely correct.

It may be said that we have made lots of reimbursable appropriations with reference to Indian reservations that have never been paid back, or at least not as yet. That is true; but that is not conclusive evidence that these moneys will not be paid back even from the Indian lands, because I know the conditions in a good many of the Indian reservations in the West, and I am satisfied that eventually these lands will pay back every dollar that the National Government has advanced; certainly if the Indian Office looks after them properly, as I have no doubt it will. But the resources behind this loan, if you want to call it such, are so stupendous and so great compared to the amounts advanced, that if these forests are handled judiciously at all they will be paid back without any doubt whatever. It is true that they may not come back so quickly as we might expect,

because the sale of this timber, in a way that makes its handling economical, and so on, is rather slow; but as I said awhile ago, this is largely because of the lack of communication, the lack of facilities for getting the timber out, getting at it and taking care of it. So I do not think there is any doubt about the repayment of this money eventually to the Treasury.

We get a small percentage of these receipts now for the building of roads. I understand the Senator from Alabama shakes his head at that.

Mr. BANKHEAD. I will show the Senator directly.

Mr. JONES. My recollection is that under the Agricultural bill a certain amount of the proceeds of the sale of this timber goes to the States for the construction of roads—10 per cent. If I am mistaken in that, I should like to be corrected, but I think it is absolutely correct. This 10 per cent is very small, and it amounts to very little. We can not do much with it. It is largely wasted. The Senator from Utah [Mr. SMOOT] says that the 10 per cent of the sale of forest timber amounts to about $250,000 a year. That amount, distributed among the various forest reserves, accomplishes very little. It will do something in the way of trails, and those are very necessary in the administration of the forest reserves; but so far as road building is concerned, it does not amount to very much. If we can get a substantial amount, under which they will have available a sufficient sum to do something, we will get better roads, we will get more for the money that is actually expended, and we will get access to the timber; and eventually this sum will all be reimbursed to the Treasury from the sale of these forest lands.

I am not going to take any further time. I do hope this proposition will meet with the approval of the Senate. It will not only benefit the different localities but it will also benefit the Government itself, because it will be largely used in the improvement of the Government property, and making available the resources of the Government.

Mr. BORAH. Mr. President, do I understand that the Senator who has the bill in charge thinks this amendment is an unwise one, and is opposed to it?

Mr. BANKHEAD. I think it is a very unwise proposition. I do not think there is any justification for it; and I hope to be able to show that when the Senators get through with their discussion.

Mr. BORAH. I will wait, then, until I hear the Senator's reasons. No reasons have yet been assigned why the amendment should not be adopted, and I should like to hear them.

Mr. WALSH. Mr. President, before the Senator from Alabama proceeds, I should like to answer the inquiry of the Senator from Mississippi as to the States which will be affected by this amendment. Every State in which there are forest reserves will, of course, be affected by the legislation. Those are the following: Arizona, Arkansas, California, Colorado, Florida, Idaho, Kansas, Michigan, Minnesota, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, Porto Rico, South Dakota, Utah, Washington, and Wyoming.

I will say further to the Senator from Mississippi that I have canvassed the matter with most of the Senators from the States affected, and I have been unable to understand that there is any opposition to the amendment. Indeed, there is a very general demand from those States, as represented here in this body, for the legislation to be passed.

Mr. BANKHEAD. Mr. President, I am greatly grieved that I am compelled to resist the adoption of this amendment. My good friends the Senators from the West know exactly how kindly I feel toward them, and how much I sympathize with them in their unfortunate situation so far as Government reservations are concerned. I appreciate all that, and I hope very soon to be permitted to vote for a bill that will absolutely turn over all of these public lands to the States where they are situated—properly guarded, of course, as to their disposition—and let them apply the proceeds to the building of roads, to education, or to any other purpose the State may think wise and just.

I say, I hope I will be permitted to do that; but, Mr. President, this is a very different proposition. Here is a bill which contemplates the building of post roads—roads over which the United States mails are to be carried; and the bill provides how the amount thus appropriated shall be expended, and how it shall be divided among the several States. The committee were greatly troubled, in the consideration of this bill, to devise some plan by which the Western States to which I have alluded may have a just share of this appropriation; and we went beyond that and provided a scheme by which they will get more than their just share under any sort of considerations that can be presented here. We provide that population, road mileage, and area shall be the basis; and from the fact that these States are all large in area—we thought giving them that provision, as well as other States, of course—would certainly put them on an equality with every other State, if not give them an advantage over every other State.

Now, what are the facts?

Mr. WILLIAMS. And, Mr. President, in counting their area, you have counted forest reservations and all other reservations as a part of their area?

Mr. BANKHEAD. Of course.

Mr. WILLIAMS. So that they get part of the appropriation on account of the existence of these very things?

Mr. BANKHEAD. Of course.

Mr. President, under the provisions of this bill and the arrangement for the distribution of this fund there are 26 States in the Union that get less money than does the State of Montana. The State of Montana, Mr. President—and I instance Montana because my good friend the Senator from that State has introduced this amendment—has a total road mileage of 23,000 miles in round numbers. Of surfaced roads it has 100 miles. It has 146,000 square miles of area, nearly four times the size of the State of Alabama or Virginia or a number of other States that I could enumerate. All these miles include every forest reserve, and every other mile or acre of land within the State is included in this distribution.

Mr. BORAH. Mr. President——

Mr. BANKHEAD. In one minute. They have a population of 376,000, five times less than the State of Alabama or Virginia.

Mr. WALSH. Mr. President——

Mr. BANKHEAD. In one minute. Still the State of Montana, under the provisions of this bill, gets practically the same amount of money that Alabama or Virginia gets. There is a difference of only a few thousand dollars. Now I yield to the Senator.

Mr. WALSH. I merely desire to say in this connection that the Senator ought to double that amount for Montana at the present time.

Mr. BANKHEAD. Double what?

Mr. WALSH. The Senator is quoting from the census of 1910.

Mr. BANKHEAD. I do not know how much these States have increased in population, as far as that is concerned. This is the latest available authority. I yield to the Senator from Idaho.

Mr. BORAH. The Senator says he allows for the area covered by the forest reserves in our State?

Mr. BANKHEAD? Yes.

Mr. BORAH. Certainly the Senator would not think it fair to do anything else in view of the great extent of these reserves.

Mr. BANKHEAD. I think that is entirely fair.

Mr. BORAH. But we must have roads through those forests. The area is not without its need for roads simply because they are forest reserves.

Mr. BANKHEAD. You do not need any postal roads.

Mr. BORAH. When you come to postal roads, of course, the bill is not for that purpose. That is a constitutional peg upon which to hang the legislation. But the forest reserves need roads not alone for the convenience of the people who live in the State, but it is essential that they shall be there for the purpose of protecting the vast possessions of the Government itself.

Mr. BANKHEAD. Does not the Senator think it would be fair for the Government itself to build roads that are to be for the special benefit of the Government?

Mr. BORAH. But this is a step in that direction.

Mr. WORKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from California?

Mr. BANKHEAD. I do.

Mr. WORKS. If this is a question of the construction of rural roads, as the Senator contends, what difference does it make how much each of the States may get out of it? Is it really a question as to how much they get or is it in good faith a proposition to improve rural roads?

Mr. BANKHEAD. Mr. President, I think both are absolutely right. The amount they get is one factor and the amount they need is another, as far as that is concerned.

Now, Mr. President, there are 26 States in this Union that have reservations of some kind, some of them large and others small. There are reservations in the States of Arizona, California, Colorado, Idaho, Minnesota, Montana, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Utah, Washington, and Wyoming. I do not mean to say that all these States have large areas, but they all have more or less. Some of them have an area that is extensive. I understand that, and I sym-

pathize with the situation as fully as any man on this floor. But these States get 27 per cent of this total appropriation, and they get it largely because of the area that they have that is in forest reserves. They get it by reason of their general area, of course, including the whole of the State.

Mr. JONES. Mr. President——

Mr. BANKHEAD. I yield to the Senator from Washington.

Mr. JONES. I wish to suggest to the Senator that we get some credit for the area included in the forest reserves. Yet we do not get and never will get very much credit for the roads in that neighborhood, because they will not be constructed, as the other States get credit for the roads throughout all their area. The roads in the other States are constructed because it is possible to do it by reason of their ability to tax.

Mr. BANKHEAD. Mr. President, that statement does not enter into this at all. It is not considered.

Mr. JONES. A good many local roads are built by local taxation.

Mr. BANKHEAD. That is true; but that is voluntary.

Mr. JONES. That is all true enough, but you get credit for those roads in the apportionment of this fund. Roads in the forest reserves can not be constructed by local taxation, because there is no property subject to taxation, or there is a comparatively small amount.

Mr. BANKHEAD. I can hardly understand the Senator from Washington. The roads get credit certainly under the provisions of the bill.

Mr. JONES. There is an apportionment on the mileage of the road.

Mr. BANKHEAD. Do you not get credit for roads constructed all over the territory?

Mr. JONES. We do as to the amount.

Mr. BANKHEAD. Do you not get credit for the area?

Mr. JONES. Of course, we have the area, but where you have a large reservation equal to the area of some of our States you get credit for the full area; you get credit for roads built all over that area, whereas no roads are ever built unless some assistance is rendered.

Mr. BANKHEAD. That perhaps is true, but that situation exists in almost every State in the Union, as far as that is concerned. There are sections in every State of the Union where no road will be built under the provisions of this bill, but there will be a large area covered by it.

Mr. JONES. That does not grow out of the fact that the Government has reserved the land.

Mr. BANKHEAD. A good many States I have mentioned have small reservations. The White Mountain Reservation has millions of acres of land. A large portion of it is in Virginia and some in North Carolina. Nobody is contemplating building post roads under a situation like that.

Mr. President, I maintain that our good friends from the West ought to be satisfied with the provisions of this bill and the liberal consideration they have had in its preparation. It is not fair for them to come in here and say, "We want you to give us a million dollars a year or $10,000,000 as a total to build trails through these reservations or to build a few roads in these reservations over which we can bring out lumber and timber." That is not fair.

I understand the situation, Mr. President, about as well as anybody else. I can not find it in my heart to blame these Senators for wanting something for nothing and for wanting all they can get. That is human nature. But that proposition has no place in this bill.

The Senator from Montana and the Senator from Washington seriously contend that this is a loan; that sooner or later, some time or other in the great future they will pay it back by the proceeds of the sale of timber and for the rentals on these reservations, which at this time amount, they say, to $250,000 a year. Mr. President, I can not find it possible for me to believe that out of the $250,000, if they are to continue to collect it, any part of this loan will ever be paid with it. We have had a great deal of experience in this Government with loaning money to the States and in other places. I remember, a good many years ago, when the Treasury was plethoric, when it had a surplus, a law was passed authorizing and directing the Secretary of the Treasury to deposit that money with the States pro rata according to population, taxable values, and so forth. That was done, to the amount of $28,000,000 or $30,000,000. Has a cent of it ever been returned? Does anyone believe that a cent of it ever will be returned?

Mr. SMITH of Arizona. If it had been loaned to one State it might have been returned.

Mr. BANKHEAD. My friend suggests that if loaned to any one State it might have been returned, and I presume he has reference to his own great State. It would, of course, be able to pay it back.

Mr. SMITH of Arizona. They would make us pay it back.

Mr. BANKHEAD. They have not made anybody pay it back, and nobody has expected it. We passed two bills in Congress and finally directed the Secretary of the Treasury to charge it off, declaring by act of Congress that nobody expects that it ever will be returned to the Treasury.

Now, our good friends from the West have nothing to complain about here. They have nothing to complain about in the general treatment that Congress has accorded them during the 28 years that I have been a Member of Congress. I think they have been most liberally dealt with, except in the matter of the reservations that have been set apart in their States; and I agree with them that that is an outrage which ought to be corrected in some way or somehow.

Mr. BORAH. Mr. President, the Senator will agree with me that there is very little hope of its being corrected.

Mr. BANKHEAD. No; I do not. I agree with the Senator that there is no hope of its being done as long as these great and powerful Senators sit here and make no effort to do it. I ask the Senator if he has ever made any effort to do it?

Mr. BORAH. Yes. I have been trying to get even the agricultural lands excepted from the forest reserves for eight years. I have not made any effort to get the forest lands restored to the States; I simply endeavored to get the agricultural lands, the farm land, eliminated from the forest reserves. We can not do that. I would have no hope whatever of accomplishing more when it has been impossible to accomplish so sane and just a thing as to eliminate the agricultural lands. There are millions of acres in these reserves splendidly fit for farms.

Mr. BANKHEAD. You have been trying to do that through the Agricultural Department. Why do you not come here, where you always come when you want things?

Mr. BORAH. I have had bills pending here for four or five years on the subject, but I can not get any considerable support. I have no doubt I have the sympathy of the Senator from Alabama.

Mr. BANKHEAD. Yes; and the support.

Mr. BORAH. But if the Senator will look up the record a little more closely and observe what has been attempted here, he will find that the Senators from the West have been unable to even eliminate the agricultural land. We have introduced bills and amendments, but without success.

Mr. BANKHEAD. I understand. Have you a bill pending here in Congress for that purpose?

Mr. BORAH. I have had. I have offered it as an amendment two or three times.

Mr. BANKHEAD. I will make this proposition to the Senator: If he will prepare such a bill as they will agree upon, and if no Member of the Senate from that section will introduce it, I will do it and press it just as hard as I can.

Mr. BORAH. I am glad to have the influence of the Senator. Nevertheless, if the Senator had been up against the influence which kills all legislation looking even to a partial accomplishment of what the Senator suggests, he would not fail to appreciate the grim humor of his suggestion.

Mr. SMOOT. I wish to say to the Senator that most of the Senators from the West have been using every power at their command to stop further withdrawals on the part of the Government.

Mr. BANKHEAD. But where do you go? You go to the Agricultural Department and to the Interior Department, which have no authority.

Mr. SMOOT. No; we fight in committees and on the floor of the Senate against these further reservations and restrictions, and I want to say now to the Senator that I appreciate his friendship toward the West, and his vote is generally for the West.

Mr. BANKHEAD. In all cases.

Mr. SMOOT. We are simply trying to prevent the tying up of the balance of the lands in the Western States that is not already withdrawn from entry of any kind.

Mr. BORAH. I was not at all criticizing the attitude of the Senator from Alabama.

Mr. BANKHEAD. I am sure of that.

Mr. BORAH. I know the Senator from Alabama and a great many Senators upon the other side have always been friendly to the proposition of turning the public lands over to the States in which they are, respectively, located. There is a great deal more sentiment upon the other side, so far as that question is concerned, than upon this side, but there is not enough sentiment upon both sides to put it through this body.

Mr. BANKHEAD. Mr. President, the Senator from Idaho never can tell until he tries.

Mr. BORAH. The Senator from Idaho has tried.

Mr. BANKHEAD. I have no recollection of it.

Now, Mr. President, I make this reference to that situation out in the West. The State of Alabama claims great credit—which she is entitled to not through me, but through my distinguished colleague—when the irrigation system, or the reclamation system, or whatever you call it, out there was before Congress in the other House. The committee was equally divided on reporting the bill out, and my colleague cast the deciding vote, and the bill was reported out. Therefore I think my State is entitled to some credit for that great work. I really do not think that our friends from the West ought to try to embarrass this situation by insisting upon putting an amendment like this on the bill. It seems to me that they ought to be satisfied with the justice that has been meted out to them in the preparation of the bill.

The State of Montana gets as much money as the State of Alabama or the State of Virginia under the provisions of the bill. The State of California gets nearly twice as much as the State of Alabama or the State of Virginia. The State of Minnesota gets nearly twice as much—she gets $2,190,000—and the State of Minnesota has very little of reserves there. The State of Oklahoma gets more than Alabama or Virginia or any one of almost 30 other States in the Union. The State of Washington gets $1,098,000, almost as much as Alabama, with our large population of 2,500,000 and our great number of miles of road. But they make it all up when you come to consider their area, which in all these States is very large, and that is entitled to be considered in any proposition like this. Wyoming gets $956,000; Arizona gets $1,076,000, with only a population in 1910 of 204,000 people.

Mr. SMITH of Arizona. Eleven hundred thousand and some at present.

Mr. BANKHEAD. This, of course, is taken from the census of 1910—the latest. The population in your State has increased, but here are the basic facts, Mr. President.

I want to repeat that in the preparation of this bill the committee gave this very question consideration. The Senator from Utah is going to offer a substitute for the bill which makes the distribution on population, road mileage, and taxable value, and it is my recollection that it eliminates area. Of course, I do not think the Senate will entertain that seriously, and I do not care to say anything more on the question at this time. If the occasion should arise a little later, and I should feel that it is necessary for me to say something further with reference to this amendment, of course I shall have to avail myself of the opportunity.

Mr. WORKS. Mr. President, the remarks of the Senator from Alabama prove conclusively the vice of this bill. It shows that the claim that the bill is intended for the purpose of improving the rural roads for the benefit of the Government is a mere pretense. The calculation and comparison of the amounts that are to be received by the different States shows that it is simply a question of how much the States can get out of the National Treasury. It is for that reason that I have found myself compelled to oppose the bill as a matter of principle and upon the ground that it is a distinct violation of the duty and obligation of the Government and of the spirit if not the letter of the Constitution.

The amendment offered by the Senator from Montana commends itself to me because it is a proposal to appropriate money for the benefit of the Government and to improve its own property. To that there should be no objection if this is in other respects a proper appropriation to be made at this time. I doubt that, Mr. President. This Government is looking about now for some means of raising the necessary revenue to run the Government. We are involved now in direct taxation for that purpose, and those taxes will inevitably have to be increased. The idea that the farmers of this country are getting benefits out of legislation of this kind that they themselves will not at some time have to meet is a delusion. The farmers are going to pay their full share of the $75,000,000 that are proposed to be appropriated by this bill; there is no way of escaping it. The appeal is made to Congress—and it is generally successfully made—that this is a bill for the benefit of the farmers; and the bill gets its support largely by reason of that fact.

Mr. BANKHEAD. Mr. President——

Mr. WORKS. I yield to the Senator.

Mr. BANKHEAD. I simply desire to ask the Senator from California to answer me this question: He says that the farmers will eventually pay their full share of the money that is to be employed in building these roads. We all concede that. Now, I should like to ask the Senator if he does not also think that the farmers will get back more than their full share by reason of the benefits that will come to them?

Mr. WORKS. Yes; I think that is quite possible; that is just exactly why this bill is being urged, because the farmers are going to get something out of it and not because the Government needs that the roads shall be improved. That is just the thing that I have been contending all along. We may just as well be frank and honest about this matter and admit that that is the purpose and object of the legislation; and it should be tested by that rule, as to whether the Government of the United States should be expending $75,000,000 upon any such principle or for any such purpose.

I was about to say that there is a question in my mind whether at this time the Government ought to appropriate $10,000,000 for the purpose mentioned in the amendment offered by the Senator from Montana, because of the financial condition of the Government that we can not overlook as a necessity that rests upon us to raise additional revenue by imposing additional taxes. In all other respects the amendment is entirely legitimate for the reason I have mentioned, that it is for the purpose of improving the property of the Government itself.

It frequently occurs—as I know it has occurred in my State—that the local authorities construct roads up to a certain point, where they strike Government property. They must either stop there or pay for the extension of the road over property owned by the Government, and which would be benefited by that portion, at least, of the improvement. Under those conditions it is perfectly fair and just that the Government should contribute its share toward the construction of the road. There could be no legal objection to it, nor any moral objection that I can see; and it is for that very reason, as I have said, that the amendment commends itself to me as being a proper and just amendment to the bill.

Mr. BORAH. Mr. President, the Senator from Alabama [Mr. BANKHEAD] pleads against this amendment upon the theory that it is inequitable, unfair, and unjust, and that finally it has no place upon this particular bill. Let me read again to the Senate the amendment, and we can perhaps better arrive at a conclusion as to whether it is inequitable or unfair. The amendment is as follows:

That there is hereby appropriated and made available until expended, out of any moneys in the National Treasury not otherwise appropriated, the sum of $1,000,000 for the fiscal year ending June 30, 1917, and each fiscal year thereafter up to and including the fiscal year ending June 30, 1926, in all $10,000,000, to be available until expended under the supervision of the Secretary of Agriculture, upon request from the proper officers of the State, Territory, or county for the survey, construction, and maintenance of roads and trails within or only partly within the national forests, when necessary for the use and development of resources upon which communities within and adjacent to the national forests are dependent: *Provided*, That the State, Territory, or county shall enter into a cooperative agreement with the Secretary of Agriculture for the survey, construction, and maintenance of such roads or trails upon a basis equitable to both the State, Territory, or county and the United States: *And provided also*, That the aggregate expenditures in any State, Territory, or county shall not exceed 10 per cent of the value, as determined by the Secretary of Agriculture, of the timber and forage resources which are or will be available for income upon the national forest lands within the respective county or counties wherein the roads or trails will be constructed; and the Secretary of Agriculture shall make annual report to Congress of the amounts expended hereunder.

That immediately upon the execution of any cooperative agreement hereunder the Secretary of Agriculture shall notify the Secretary of the Treasury of the amount to be expended by the United States within or adjacent to any national forest thereunder, and beginning with the next fiscal year and each fiscal year thereafter the Secretary of the Treasury shall apply from any and all revenues from such forest 10 per cent thereof to reimburse the United States for expenditures made under such agreement until the whole amount advanced under such agreement shall have been returned from the receipts from such national forest.

This, as was stated by the Senator from Montana [Mr. WALSH] on yesterday, is really simply an advance—the Senator from Alabama smiles upon the theory that it will never be repaid; I know that is what the Senator thinks. Well, Mr. President, what is the situation in the West? The Government has withdrawn from public entry and consecrated to nonuse a territory as large as the original thirteen Colonies all combined. Growing upon this territory are the only virgin forests left in the world, and of incalculable wealth. All of this land has been withdrawn, it is said, for the purpose of protecting the natural resources of the country, particularly the great forests upon those lands.

What is the condition with reference to the question of preservation? Year after year, and even now, vast stretches of this timber is being burned and consumed, utterly to the extent of millions of dollars. If you will examine the reports of the Forestry Bureau and of those who have studied this question, you will find that this destruction, to a large extent,

is by reason of the fact that the Government does not furnish the means by which to protect the property; that it does not construct roads and trails into these great forests for that purpose. The result is that we have this vast holding of the Government, of incalculable value, and growing of greater value each and every year, without sufficient protection; and one of the most essential elements of protection is that of roads and trails.

We must expect, Mr. President, if the next year shall bring us such a misfortune as the year preceding brought us and the year before that and the year before that, that not only will there be $10,000,000 worth of property destroyed, but there will be a large amount in excess of this appropriation even for one year destroyed.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER (Mr. OVERMAN in the chair). Does the Senator from Idaho yield to the Senator from New Hampshire.

Mr. BORAH. I yield to the Senator.

Mr. GALLINGER. Mr. President, I have not familiarized myself with the administration of the national forests, and I will ask the Senator precisely what disposition is made of the funds that come from the sale of timber in those forests, and other matters that are disposed of, if there are any? Are they placed in the Federal Treasury?

Mr. BORAH. I am not able to state how the different funds are disposed of. I am not sufficiently familiar with that branch of the proposition to give figures.

Mr. WALSH. Mr. President, I think I can inform the Senator.

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Montana?

Mr. BORAH. I yield to the Senator from Montana.

Mr. WALSH. Each Agricultural appropriation bill contains a provision to the effect that all avails are appropriated to carry out the general purposes of the forest reserves. So that everything that comes in is by that provision set aside and goes, so far as it may, to meet the general expenditures of the Forestry Service.

Mr. GALLINGER. And the funds are all exhausted, then, in work of that kind?

Mr. WALSH. Exactly.

Mr. GALLINGER. My thought was, that, if that were not so, it would be a very good idea to appropriate these funds to the very purpose that this amendment proposes, namely, the building of trails and roads through the forests; but if the funds are used in other directions and for the benefit of the Government, of course, I have no suggestion to make.

Mr. WALSH. Mr. President, I ought to say, further, in explanation that the act also sets aside 10 per cent of the fund to the specific purpose of constructing roads and trails. Of course the other provisions that it is all set aside for general purposes is subject to this specific appropriation.

Mr. GALLINGER. I was familiar with the fact that there was a 10 per cent allowance for some such purpose as this, but the thought in my mind was that we ought to provide that it all could be used for this very purpose.

Mr. LANE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Oregon?

Mr. BORAH. I yield.

Mr. LANE. If the Senator will permit me, I will say that in the section of the country in which I live the timbered lands are mountainous and rough, and for the lack of roads and accessibility to the timber there is difficulty encountered by the Government in selling it. If they had roads which would enable them to get the lumber to market, they could sell the timber, but under present conditions they can not sell the timber for lack of roads, and because they can not sell the timber they can not secure money to build roads. That is about the situation.

Mr. BANKHEAD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Alabama?

Mr. BORAH. In just a moment. Mr. President, I misunderstood the question of the Senator from New Hampshire [Mr. GALLINGER]. I knew that the fund as a whole was being drawn back and utilized in different ways to take care of what is called the conservation program, but I did not know the different subdivisions—that is to say, how much of it was used here and how much of it was used there—and so I was glad to have the suggestion of the Senator from Montana [Mr. WALSH].

Mr. BANKHEAD. Mr. President, I want to suggest to the Senator from New Hampshire, in connection with the question propounded by him, that, as I understand, the present receipts from the Forestry Service are $250,000 annually. It is proposed by the amendment of the Senator from Montana to appropriate $1,000,000 a year for 10 years for the purpose of constructing roads and trails in forest reserves, that amount to be reimbursed to the Treasury by the payment of 10 per cent of the revenues of the forest. Ten per cent of the $250,000 of receipts would amount to $25,000 a year to pay back an expenditure of $1,000,000 a year. That is the proposition. And I can not quite understand how it is hoped to pay it back, although it is insisted that it will be paid back.

Mr. BORAH. Mr. President, there is supposed to be security there of vast worth. It is not the presumption of those who are the advocates of conservation that this timber will all be ultimately burned and destroyed in different ways. The presumption is that it is of great value; and if we get roads and trails constructed we not only can protect the timber against fire, but we can finally utilize it in the market and secure a great revenue to the Government. That is their view.

Mr. FALL. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from New Mexico?

Mr. BORAH. In just a moment I will yield. Mr. President, if the view held by the Senator from Alabama and others who advance the proposition that this vast amount of timber will not pay $10,000,000 be correct, certainly we ought to discontinue the conservation program now without any further controversy or debate. The fact is——

Mr. BANKHEAD. I do not presume that the Government is going in to cut down the forests; the fact is they do not cut anything, as I understand, but the dead timber; and they do not put any other kind of timber on the market. They do not cut down the forests for commercial purposes, as I understand.

Mr. BORAH. They sell large portions of the forest to different buyers or purchasers; and the reason why they can not sell it to any better advantage or can not utilize it to any greater advantage to the Government is by reason of the fact that we are pursuing a penny-wise and pound-foolish policy, and not preparing ourselves to deal with the subject matter in an intelligent and effective way. You can not sell large bodies of timber when there are no means of getting the timber out. This would be a wise business proposition from any view.

Mr. FALL. Mr. President——

Mr. BORAH. I yield to the Senator from New Mexico.

Mr. FALL. I simply desire to suggest that the Secretary's report for this year shows a deficit in the administration of the forest reserves, over and above all receipts, of something more than $2,000,000, for which Congress must appropriate.

I think the Senator from Alabama misunderstands the policy pursued in selling the timber, as has been indicated by the Senator from Idaho who now has the floor. Not only are they selling matured timber in competition with the owners of timber on private land, but they are charged in some of the States—I think in the State of Washington, for instance—with selling timber only 6 inches in diameter; and not only do they meet competition, but actually it is charged that in some instances they sell timber at lower rates than the market price. As the Senator from Idaho has said, however, if they do not have roads in the forest, they can not develop the great timber resources, and naturally they can never arrive at the point where their income will equal their expenditure.

Mr. BORAH. Mr. President, the Senator from Alabama said he hoped at some time to have an opportunity to vote for a bill which would relieve the Western States of the situation in which they find themselves.

Mr. BANKHEAD. I am going to suggest to the Senator that, if he will prepare a separate bill containing the provisions of this amendment, I shall not object to voting for it; and if he will do that and have the bill referred to the Committee on Post Offices and Post Roads, I think I can promise him a report without any delay.

Mr. BORAH. Well, Mr. President, of course this amendment is an amendment offered by the distinguished Senator from Montana [Mr. WALSH].

Mr. BANKHEAD. Very well; I make him the same proposition.

Mr. BORAH. But the Senator from Montana doubtless feels that the best way for us to get what we are entitled to have is while somebody else is getting what he wants; and for that reason it is offered as an amendment to this bill, because this bill has a tremendous influence back of it which will likely put it through Congress. As a separate bill we would experience the same fate as other measures of relief for these few Western States.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Montana?

Mr. BORAH. I yield.

Mr. WALSH. Mr. President, I rise to advise the Senator from Alabama that some time ago I introduced a bill embodying the same idea, and it went to a committee, but I have not yet been able to get any favorable action upon it.

Mr. BANKHEAD. To which committee did it go?

Mr. WALSH. It went to the Committee on Agriculture, I presume, which is the proper committee to consider matters relating to the Forestry Service.

Mr. BANKHEAD. I am not a member of the Committee on Agriculture, and of course I do not know what action the Committee on Agriculture would take.

Mr. SMITH of Arizona. Such a bill would naturally go to the Agricultural Committee.

Mr. BORAH. If the matter is such as to command the support of the Senator from Alabama and meets his judgment and approval, and if he thinks it a wise and proper thing to do, I really do not see why it should not go on this bill.

Mr. BANKHEAD. I have not said that I thought it was a wise and proper thing to do, by any means. I said if the Senator introduced a bill, I thought I could get it reported back, and then he could take his chances on its passing.

Mr. BORAH. If I do not have the support of the Senator from Alabama in putting it through the Senate I am afraid his proposition would not be a very advantageous one. I would rather have his support now, if he feels the proposal is just and proper; but, of course, if he does not feel so, he will have to oppose it when it comes to the Senate floor.

Mr. BANKHEAD. Mr. President, the Senator from Idaho knows how I feel about this road situation and he knows how my heart goes out for him and his constituents in their unfortunate situation, but I can not consent to put this provision on this bill, because I do not think it is proper; I do not think it is equitable; I do not think it is just, after the liberal provision which has been made for the purpose contemplated in the appropriation bill.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Mississippi?

Mr. BORAH. I yield.

Mr. VARDAMAN. The Senator from Idaho is usually accurate in his calculations, and I have always found him very sane and patriotic. I want to ask him this question: Has the Senator an idea or an opinion as to the length of time that it would require, by using the 10 per cent of the revenues derived from the forest reserves, to reimburse the United States for this appropriation?

Mr. BORAH. No, I have not; but if the Senator asks that question upon the theory that it would take an interminable length of time, or that it would not be done at all, I do not believe that that is a correct conclusion to draw. Of course, I do not know how long it would take, but I ask the Senator, in return, for his candid opinion of this situation: Suppose the Senator had a vast forest, such as Uncle Sam has at this time in many of the Western States, and it was necessary to build roads and trails through that forest in order to preserve and protect it?

Mr. VARDAMAN. I should unhesitatingly build the roads just as I voted to build a railroad in Alaska in order that we might realize upon the resources of that wonderful country.

Mr. BORAH. I know the Senator voted for that, and I believe if he will analyze this he will vote for this amendment; but——

Mr. BANKHEAD. Mr. President——

Mr. BORAH. Just a moment. The truth is, if I may say so to the Senator from Mississippi, that this is nothing more in its last analysis than a proposition for the National Government to make a reasonable appropriation toward the preservation of its own property. At the same time it benefits those who are in the States, but vitally and substantially it is for the benefit of the National Government. It is an appropriation to take care of its own property, to build roads upon its own property for the preservation of its own property.

Mr. VARDAMAN. Will the Senator give me some information as to the extent of those reserves? I know they cover several States, but I should like to know the extent of the reserves, the area, and the probable value of the property.

Mr. BORAH. I can not give the Senator the acreage accurately, and I would not want to undertake it without having the figures before me.

Mr. VARDAMAN. I only want a general idea.

Mr. BORAH. But it is a tremendous territory. I have not the actual acreage in my mind now, but it is a tremendous amount of timber or timberland, supposedly, that is reserved, much larger than several of the Eastern States combined in area.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Montana?

Mr. BORAH. I do.

Mr. WALSH. I have the figures here, if the Senator would like them.

Mr. BORAH. I should be glad to have them.

Mr. WALSH. In the State of Arizona there are 13,318,600 acres, in California 26,000,000 acres, in Colorado 14,000,000 acres, in Idaho 19,000,000 acres, in Montana 18,000,000 acres, in Nevada 5,000,000 acres, in New Mexico 9,000,000 acres, in Oregon 15,000,000 acres, in Washington 11,000,000 acres in Wyoming 8,000,000 acres, or a total of 185,321,202 acres.

Mr. VARDAMAN. It occurs to me that with this immense area this small appropriation would go a very short way in building roads over it.

Mr. BORAH. It undoubtedly would not build the roads that will finally have to be built, but it is a step in the right direction, and a very important one. The Senator must bear in mind that these respective States are building costly roads which will, in effect, connect up these roads built through the forest reserves. In addition to that we have been building roads in the forest reserves for the last several years. But, Mr. President, as the Senator from Washington says, when you take into consideration the amount of roads which must be built in the United States, the amount which is appropriated in this bill is infinitesimal compared to what will finally be appropriated for that purpose. It is simply a step in the right direction. But in view of the figures which the Senator from Montana has given the Senate as to the amount which is involved and the vast estate which is at stake, can it be possible that it is unwise or improvident to appropriate this amount of money? Or does anyone believe, unless we are engaged in a most foolish proposition in an attempt to preserve this timber, that the time will not come when every cent of this money will be paid back?

Mr. BANKHEAD. Does the Senator address his remarks to me?

Mr. BORAH. I address my remarks to the Senate, and particularly to the Senator from Alabama, because I know he wants to answer them.

Mr. BANKHEAD. Mr. President, the Senator from Mississippi asked the Senator from Idaho how long he thought it would take for the proceeds from the timber to pay back this loan. I think I can answer that question in part by telling the Senate and the Senator from Mississippi that the proceeds from the sale of timber in the national reserves last year, the whole of it, amounted to $206,000. That is what they got for the timber they sold.

Mr. WALSH. Mr. President, will the Senator from Idaho yield to me?

Mr. BORAH. I yield.

Mr. WALSH. I am sure the Senator from Alabama does not mean to give the Senate any inaccurate or incorrect information about this. I have the last report of the Forester before me, and I read as follows:

> During the past fiscal year the national forests' cash receipts were $2,481,469.35, from the following sources: Timber $1,175,133; grazing, $1,130,495; and special uses, $175,840.

Mr. BANKHEAD. Mr. President, I may be mistaken. It is not my mistake, however. I was reading from the World Almanac.

Mr. WILLIAMS. There were some expenses connected with that.

Mr. BANKHEAD. Well, that is what the Government got.

Mr. TOWNSEND. Perhaps one was net and the other gross.

Mr. BANKHEAD. So the Senator can tell how long it would take to pay it back.

Mr. BORAH. I think the Senator from Alabama will agree that the estate is large enough to make the return, and it simply will be a question of disposition whether we will do it or not.

Mr. BANKHEAD. I think we have the territory. There is no question about that.

Mr. BORAH. We have the timber also.

Mr. BANKHEAD. Yes; I think you have the timber, too. I do not think it is the policy of the United States Government, however.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Mississippi?

Mr. BORAH. I yield.

Mr. VARDAMAN. Do I understand that the money to be used to reimburse the Government for this outlay is derived

solely from the sale of timber? Are there any other sources of revenue there that the Government has?

Mr. BORAH. There are other sources of revenue; yes.

Mr. VARDAMAN. But this amendment confines it to the moneys received from the sale of timber, does it not?

Mr. BORAH. Exactly. The Senator understands that at the present time we appropriate about $250,000 annually out of the funds received from these natural resources for the purpose of building roads. This amendment is simply a scheme to draw from that amount in advance; in other words, to appropriate $10,000,000, and let this amount which we appropriate annually go to the repayment of that $10,000,000.

Mr. VARDAMAN. I confess that I see a good deal of merit in the Senator's proposition.

Mr. BORAH. If the Senator resided in one of these western States, where we have about 70 per cent or 75 per cent of the area withdrawn from public entry, he would be absolutely convinced of its merit. Just imagine the great State of Mississippi with only 25 per cent of its area subject to taxation for the keeping up of its Commonwealth, the building of its eleemosynary institutions, its courts, and its colleges, and so forth, or any other State. There would be an open rebellion here; no such thing could happen if it were not confined to seven or eight States in the Union. So long as it is confined to seven or eight States in the Union, we have not the power to overcome, I will say, the inertia of the other States; and the result is that we are there taxing ourselves on 25 or 30 per cent of our area to maintain our entire State institutions. We are simply asking now nothing more than that the National Government shall take care of its own property in accordance with the rules of good husbandry; and if it does not do that, it is not only a waste to the Government but it is a menace to the balance of the State.

These great forest fires not only mean the destruction of the forests of the National Government, but they mean the destruction of cities and towns and villages and homes near or in connection with the forests. The State of Idaho has suffered not only by the loss of the timber upon Government lands, but by the loss of the timber upon private lands. It has had its villages burned and its towns threatened; and we are simply asking that the National Government make a step in the right direction of protecting its property. I can not see why this amendment should not go in this bill, because it is asking the National Government to do nothing but to preserve its own.

Mr. LANE. Mr. President, I should like to say, for the information of the Senator from Mississippi, that this condition exists in the State from which I come: There are large bodies of timber. Much of this timber is overripe. It has acquired its maturity and is now dying; but it is in the mountains, far removed from roadways, with no means of access to it; and for the reason that we have no roadways, and for the reason that we have no means of getting that timber out of the country and to a market, it has no great market value. The Government can not sell it, and it remains there to die and to decay and go to waste—millions upon millions of dollars worth of it; thousands upon thousands of acres of it. At the same time the people who are separated by these forest areas—one part of them living, say, in a valley to the east; the other in a valley to the west—are marooned. They can not get through this belt of timber to market their farm products—those things which they raise—their fruit and grain, their butter, their eggs. They are marooned, and they are in a pitiable condition. They live, perhaps, in a valley which is rich, and would be prosperous if they had an outlet; but, from lack of roadways through these forest reserves, they are unable to prosper or even to do fairly well. There is an injustice done those people.

The people of the county and the State build good roads up to these forest reserves, but they are not allowed to build a roadway through the forest without the consent of the department here, and they are also financially unable to do so; so there is a wrong committed. The Government loses on the value of the timber. It is unable to market it for lack of means of transportation. If it had roadways into the country, so that spurs of narrow-gauge road could go into the timber and it could be cut, the value of the timber would increase immensely and would build the roads over and over again; but, because of the fact that they are so isolated that they can not get out to a market, they remain valueless. The Agricultural Department is unable to sell enough timber at a price sufficient to build the roads. The roads must be built first.

No matter how much produce you raise inside of a harbor—say, up the Mississippi River, or in the interior, on the Columbia River—unless you have an outlet for that commerce to the ocean, to the channels of traffic, it is worth nothing except for local consumption. That is the condition in the State which I represent in part; and that is a condition, I think, which exists also in Washington and in Idaho in respect to the timber reserves.

There is also the additional obligation on the Government to protect its property from loss by fire. A fire will break out in the mountains from a stroke of lightning—I have seen that happen—and it may burn and waste thousands of acres of land. For lack of means of access to it, for men to get in there to fight it, for lack even of a trail by which to reach it, it destroys hundreds of thousands of dollars' worth of property; whereas if you had roads leading to or skirting strategic points that would control the country, you could get in there with men and catch the fire early and put it out. A fire will start from many causes, seemingly unaccountable causes—the knocking out of the uncooled embers from a pipe, for instance. A fire has been known to start from the action of the sun in shining through a globule of pitch, which acted like a sunglass, concentrating the rays of sunlight onto tindered wood, and caused a fire. Unless you have means of access in order to fight these fires, and fight them promptly, they do a tremendous amount of damage.

I do not know whether the Senator ever saw a forest fire in full blast or not—a forest fire sweeping the country, lifting and scattering embers a quarter of a mile at a jump, and burning up every living thing within the inner bounds—deer, grouse, the rabbits, and everything; yourself, too, if you do not back track quickly and cross the line of danger. I have worked my way out of them. Such a forest fire is one of the most dreadful and terrifying sights that a man ever witnessed. I do not think a battle is so awe inspiring. There is no thunderstorm or electric storm that ever I saw in my life that equals it. It is a most dreadful thing, and the noise of it is like the noise of a hurricane. It sweeps from the top of one dead tree to another, traveling faster than a race horse can run.

Mr. VARDAMAN. Mr. President, there is no question about the necessity for this improvement, is there?

Mr. LANE. Not a bit. It is the most valuable item in this bill, and will do more good to people who need it than any other item in it, in my belief.

Mr. VARDAMAN. I can not see that it is going to hurt anything to tax the American people for this purpose.

Mr. BANKHEAD, Mr. TOWNSEND and Mr. SMITH of Arizona addressed the Chair.

The PRESIDING OFFICER. To whom does the Senator from Oregon yield?

Mr. LANE. I yield the floor.

Mr. BANKHEAD. I should like to ask the Senator from Oregon a question.

Mr. LANE. I will answer the question.

Mr. BANKHEAD. The Senator has made a very eloquent appeal here for logging roads to haul these logs.

Mr. LANE. No; farmers' roads.

Mr. BANKHEAD. Well, I know. I have understood that there were a great many farmers in the forests of Oregon on the reserves. Of course, I understand that, as everybody else does.

Mr. LANE. Mr. President, that is not fair. I said these roads were needed by the farmers separated by these forest areas, people who want to go through them to get out to a market.

Mr. BANKHEAD. That is all right; but did not the Senator make some remarks about the necessity of having roads to bring these logs out of the forests?

Mr. LANE. Yes; that is true.

Mr. BANKHEAD. Very well. Now, what I want to ask is this: I presume the Senator has had some practical experience in logging.

Mr. LANE. I have.

Mr. BANKHEAD. I have, too. I know something about it; and I know, as the Senator knows, that the very best kind of a road is required for logging purposes. Is that the kind of a road the Senator would propose to build—a hard-surfaced road?

Mr. LANE. No.

Mr. BANKHEAD. Then, you have not a logging road, and everybody knows it.

Mr. LANE. No, Mr. President; evidently I did not make myself clear. It is to tap into the forests to a point where you can branch off with logging roads to reach the timber, to cut it with sawmills, and afterwards to transport it out over the road to the market—no; not logging roads.

Mr. TOWNSEND. Mr. President, do I understand that the Senator from New Hampshire purposes to take up the rural credits bill at 2 o'clock?

Mr. HOLLIS. Yes.

Mr. TOWNSEND. Then, as we have only three or four minutes left, I do not care to occupy the floor.

Mr. OWEN. Mr. President, several years ago, when this question of good roads was before the Senate, I made an argument which I thought had elements of value in it. The time is too short for me to repeat the matter fully; but I think this debate is of value in creating sentiment throughout the United States with regard to the reasons for developing our roads; and I should be glad to have permission to put that address in the RECORD, printing it in the ordinary type, so as to make it available for those who are interested in this question. I ask that authority.

The PRESIDING OFFICER. Is there any objection?

Mr. BORAH. I did not understand the request.

Mr. OWEN. I asked permission to put in the RECORD an argument which I had previously delivered on the floor on the good-roads question.

The PRESIDING OFFICER. The Chair hears no objection, and it will be so ordered.

The matter referred to is as follows:

REMARKS OF HON. ROBERT L. OWEN.

"Mr. OWEN said:

"This bill provides for the appropriation of public funds annually for the construction, maintenance, and improvement of post roads and rural delivery routes through the cooperation and joint action of the National Government and the several States in which such roads may be established, the Nation and State contributing equally to the cost. The value of this proposal is that *the Federal Government would at once take the initiative* and make available to every State the expert knowledge gathered together by the Federal Government on the construction and maintenance of good roads.

"This initiative is of supreme importance. No great public enterprise will receive proper attention unless some one is charged with the direct duty of attending to that business.

"Experience has shown that the private individual will not take the initiative in building good roads, because the task is too great for him, and in like manner the county, except for the laws passed by the State, would not initiate good roads except in special instances. But with the Federal Government taking the initiative, inviting the State cooperation, every State would be strongly stimulated to improve the roads. This feature of this bill is of great value.

"The good-roads department under this bill would speedily formulate and submit to the various States a method of cooperation which would result in coordinating the State and Federal activities in road building upon a uniform and judicious basis. I am sure that the people of my own State of Oklahoma would be glad to cooperate with the Federal Government in improving the highways and rural routes. In the constitution of Oklahoma we established a department of highways, and the head of this department is actively organizing public opinion in support of this the next great step in the national development of the Republic.

"Mr. President, nothing that I shall say will be either original or novel, but the facts and the reasons should be emphasized on the attention of the country. The improvement of the public roads of the United States is urgently necessary for a variety of reasons.

"The national growth and prosperity must depend on good roads.

"The development of the suburban schools, churches, mail delivery, the intelligence and social intercourse of the country people, the attractiveness, the value, the financial returns, and the physical productiveness of the farm depend upon good roads. Cheaper food products and cheaper manufactured products both depend upon good roads.

"Inaccessible and muddy roads cost the Nation a thousand millions annually.

"Justice to the farmer, who pays 60 per cent of the taxes and gets but little in return, demands it. The value of the public school, the press, the pulpit, the platform, and all the advantages of civilized life depend upon access, and access upon good roads. The extension of trade, the improvement of the opportunities to the citizen, the relief of the congestion of population in the cities depend upon good roads.

"Good roads are absolutely necessary in peace and in war. They are the chief agency of a great industrial people for the free interchange of the products of labor.

THE CONSTITUTIONALITY OF FEDERAL AID TO GOOD ROADS.

"It has been said that the United States has no constitutional right to contribute to the building of good roads. I emphatically deny it.

"Under section 8, Article I, of the Constitution, Congress is expressly authorized *to establish post roads*, and is given power 'to collect taxes,' 'to provide *for the common defense and general welfare* of the United States.'

"The perfection of the postal highways and of the Rural Free Delivery Service will extend post roads over every important road in the United States upon which any national attention need be given, and the right of the United States to provide for the common defense carries with it the right to establish national highways, as Rome did, for the movement of our national troops in time of war and for the 'general welfare' and the movement of interstate commerce and transportation in time of peace.

"The right to provide for the general welfare of the United States sufficiently covers national aid in establishing highways of stone as well as of steel rails throughout the United States.

"Why, Mr. President, Congress authorized the Cumberland Road at the headwaters of the Potomac in 1811 at a cost of $7,000,000, and in 11 years about this period 14 great highways were authorized to be built by Congress.

"It was the generally acknowledged doctrine of our forefathers that the Government had this right, and from 1850 the Government granted aid to highways with steel rails from the Mississippi to the Pacific coast and subsidized the Union Pacific, the Central Pacific, the Northern Pacific, the Southern Pacific, and gave away 200,000,000 acres of the public domain in support of national highways.

"These contributions would be worth approximately $2,000,000,000, which went to private persons and private corporations, for the building of national highways.

"There is no merit in the contention that the National Government may not contribute to the support of post roads within the States.

"Down to the most recent days, since the War with Spain, there has been expended from our National Treasury for road building in—

| | |
|---|---|
| Alaska | $1,925,000 |
| Porto Rico | 2,000,000 |
| The Philippines | 3,000,000 |
| The Canal Zone | 1,459,073 |
| Total | 8,384,073 |

THE URGENT NECESSITY FOR NATIONAL AID.

"Mr. President, we have the biggest country, the finest land, the richest people—and possibly some of the poorest roads on earth. There is a reason for this, and the reason is that our road-building system is based on the old localized English system in the days of the American Colonies, and has never been adequately improved to meet the advancing knowledge of civilization.

"In many of our States we still keep up the destructive and wasteful system of financing road building by taxing adjoining property and administering the construction and maintenance by utterly uskilled, intensely localized management, which is very often too incompetent to merit consideration or defense. It is grossly unjust to tax the farmer to build and sustain the road which passes through his farm, when that road, in fact, is a highway used by tens of thousands who ought to contribute their proportionate part to the construction of the highway.

"The National Government, which raises revenue by taxing every man, and the State government, which raises its revenues by taxing all the people, should cooperate with these taxes levied on all the people to construct these highways which are used by all the people just in proportion to the use of the roads. To compel the construction and maintenance of the main highways by the local citizen who has had no opportunity of being instructed in the construction or maintenance of roads is necessarily to place the highways under an administration not equipped to do this work under the safeguard of thoroughly scientific knowledge, which is essential to proper results. Millions have been squandered by this obsolete method, and the roads remain to-day as an overwhelming witness of the incompetence of past management. For example, under the present laws of Texas, in a State which spends more than $8,000,000 annually on road improvement, the county judge is the one absolute authority on road matters. Such a thing as a county engineer, except by special act of the legislature, seems to be unthought of.

"In France, where they have the best roads in the world, at the head of the road system there is a magnificent technical school of roads and bridges, maintained at the expense of the National Government, from which graduates are chosen as highway engineers to build and maintain the roads of France. There is an immediate cooperation between the Republic, the departments, and the communes as completely as an organized army, directed by the most intelligent head possible to obtain.

"At the head of the administrative organization is a director general of bridges and highways, under whom are the chief engineers, ordinary engineers, and subordinate engineers, the latter being equivalent in rank to noncommissioned officers in the army. The subdivisions are under the direction of principal conductors and ordinary conductors. Next in line come the foremen of construction gangs, the clerks employed at headquarters, and, finally, the patrolmen, each having from 4 to 7 kilometers of highway under his immediate supervision.

"The great administrative machine working in complete harmony, with definite lines of responsibility clearly established, accomplishes results with military precision and regularity. In this great army of workers not the least important unit is the patrolman, who has charge of a single section of the road. He keeps the ditches open, carefully fills holes and ruts with broken stone, removes dust and deposits of sand and earth after heavy rains, removes the trees, shrubs, and bushes, and when ordinary work is impossible breaks stone and transports it to the point where it is likely to be needed. He brings all matters requiring attention to the notice of his chief.

"Every detail requiring attention is carefully noted and reported to the central authorities, so that at any time the exact condition of every foot of road throughout France may be ascertained.

"Here is a system, the best in the world, over which magnificent highways vast volumes of farm products find their way at a cost of from 7 cents to 11 cents a ton per mile. Over these roads motor cars can travel 50 miles an hour without danger. They are beautiful. They are lined on either side by ornamental and fruit trees. They are of great commercial value. They lower the cost of living, both to the town and the country, by furnishing the city with cheap food and furnishing the country with cheap freight in transporting their products to town and their materials back to the farm.

"In France at the present time there are 23,656 miles of national routes, which cost $303,975,000 to build. There are 316,898 miles of local highways, built at a cost of $308,800,000, of which the State furnished $81,060,000 and the interested localities $227,740,000. The roads of France are classified into five different divisions:

"First. The national routes, traversing the various departments and connecting important centers of population.

"Second. The department routes, connecting the important centers of a single department and bisecting the national routes.

"Third. Highways of general communication, little less important than the previous class.

"Fourth. Highways of public interest, traversing a single canton and connecting remote villages with more important roads.

"Fifth. Private roads.

"In the German Empire a similar system prevails, and these great nations, including the other nations of Europe, for that matter, set an example to the people of the United States which they would do well to follow.

"In England they have a much more localized system, and in consequence there is in England the most striking example of lack of uniformity of road work and of excessive expenditure in proportion to mileage.

"The most perfect road system, however, is that of France, which has the *most highly centralized* management of all the road systems.

"It is not my purpose, Mr. President, to go into detail with regard to the best methods of construction, but only to point out the extreme importance of *centralized initiative* and *centralized knowledge proceeding with efficiency upon a fixed basis.*

"I do not regard Senate bill 2935, which I advocate, as necessarily an absolutely perfect bill, but I do regard it as a step of very great importance, and I do believe that out of this measure, if it be enacted into a law, we would enter upon a proper system.

"I believe we should have *a legislative reference bureau* (for which I have heretofore contended), for the convenience of Congress in digesting and arranging data and making preliminary drafts of bills and which in this case might thoroughly work out a perfected plan suitable to the use of the United States under our particular form of government, providing a system for the most perfect cooperation between the National and State Governments for the development of good roads in this country.

THE COMMERCIAL VALUE OF GOOD ROADS.

"Mr. Halbert P. Gillette, an engineer of ability, has with great pains estimated the cost of hauling agricultural products to and from the farm. (S. Doc. No. 204, 60th Cong., 2d sess., p. 56.)

"The average haul in the United States is 12 miles of 2,000 pounds, at a cost of 25 cents a ton, on an average of $3 a ton for delivering farm products from the farm to the railway.

"In France the cost of hauling a ton a mile is 7 cents and in Germany and England from 9 cents to 12 cents. The direct loss on the tonnage actually hauled in the United States is perfectly enormous. The Interstate Commerce Commission reports show that the railroads handle upward of 900,000,000 tons of freight, of which 32 per cent, or approximately 275,000,000 tons, are the products of forest, field, and miscellany.

"Estimating only 200,000,000 tons at a cost of $3 a ton, we have $600,000,000 in this item, of which over $400,000,000 is a flat loss, due to bad roads; but these figures are only a fraction of the haul. To this must be added the enormous tonnage hauled from farm to farm, from farm to village, from farm to town, from farm to canals, wharves, and docks for shipment by water. The unemployed land, the defectively developed land, the wasted products not hauled because of the expense and of impassable roads, the lack of intensive farming at any distance from cities because of the expensive hauling are grave factors of the huge loss due to bad roads. The loss by bad roads upon any reasonable basis would probably exceed $1,000,000,000 per annum, or the cost of conducting our National Government.

"We have bad roads standing as a barrier, preventing the hauling of products from the farm, because the cost of hauling is too high and products are wasted on the farm.

"Lands distant from market are not cultivated at all and farms reasonably near to the markets are not put into crops *which would be productive of large bulk*, because of the ruinous expense of hauling such products, and for this reason there are huge areas uncultivated in the United States, estimated by the Department of Agriculture at over 400,000,000 acres. Improved roads would develop this vast domain and make *food products cheaper*. It would lead to intensive and more extended farming. Where the average value is $8.72 per acre of wheat, $7.03 an acre of corn, the value of vegetables in 1899 was $42 an acre and of small fruits $80 an acre.

"The commercial value of good roads, therefore, would mean a saving of a thousand million dollars annually. It would mean bringing into cultivation vast areas of land now uncultivated. It would bring intensive farming on the lands which are now cultivated. It would mean very much cheaper food products. It would mean the improved financial, social, religious, and educational condition of the farmers.

"It would mean a vast increase in the farming population drawn from the congested cities for the benefit of city and country alike.

IT WOULD INCREASE THE VALUE OF FARM LAND.

"We have about 850,000,000 acres of farm land improved and unimproved in the United States.

"The good roads will exercise a tremendous influence over increasing the value of farm lands accessible to good roads.

"By 'accessible' it must not be understood as being immediately on a perfected highway. It is an important fact that a team of horses *for two hours out of a day* can *exert about four times* their average tractive force without injury. For this reason they may pull a heavy load for 3 or 4 miles over a dirt road to a perfect highway without injury, and then carry the heavy load easily to market a long distance without harm, so that the farmers within 3 or 4 miles on either side of a good highway would be directly benefited by it; and with the King drag road leading off 4 or 5 miles on either side of a perfected highway all of the farmers of the country could be brought in touch with good roads at a minimum expense to the great increase of their farm-land values.

BAD ROADS MEAN LOSS OF POPULATION.

"The sections of country *which have lost in population* by the last census are conspicuous for impassable roads. In 25 counties, for example, selected at random by the United States Office of Public Roads, the population between 1890 and 1900 fell away over 3,000 persons in each county where the roads showed an average of only 1½ per cent of improved roads, while in another 25 counties, in which there was an average of 40 per cent of improved roads, the population in each county had increased over 31,000.

"*It is density of population and accessibility of lands which increase the value of land.*

GOOD ROADS MEAN BETTER SCHOOLS AND CHURCHES.

"Improved roads mean improved schools and churches. Where the roads are very bad the children can not easily attend school, nor can the people easily attend the churches, but with good roads they could do so. In the States of Massachusetts, Rhode Island, Connecticut, Ohio, and Indiana, in which, in 1904, about 35 per cent of the roads were improved, 77 out of each 100 pupils enrolled attended the schools regularly; but in the five States of Alabama, Mississippi, Arkansas, Georgia, and South

Dakota, which had, in 1904, only 1.5 per cent of good roads, only 59 out of each 100 pupils enrolled could attend public schools regularly. Thus good roads enable 30 per cent more children to attend school.

THE PRESENT CONDITION OF THE PUBLIC ROADS.

"We have to-day 2,155,000 miles of public roads within the United States. Less than 180,000 miles are macadamized or improved with hard surfacing.

"More than nine-tenths of the public roads and highways of the United States in the rainy season are almost unfit for use, and a large part in a very rainy season are utterly unfit for use and impassable, to the grave injury of the farmer and the *equal injury of the town people who depend upon him for regular supplies of food.*

"In some of the States improved State methods are being put into force, but the department of good roads of the United States Government should be stimulated in the highest degree, so as to furnish the people of the United States with full information upon the important commercial, financial, educational, and social aspects of this great national problem. The department should be put in a position where it can stimulate public attention and bring all of the States into harmony with this great scientific problem. Road building and road maintenance is a great *science.* It has taken generations of men to learn the best methods of road building and maintenance, and the highest knowledge in the world in scientific road building should be placed at the disposal of the humblest citizen of this Republic so that he could be a direct beneficiary of the advancement of human knowledge in this respect.

THE RELATION OF PUBLIC ROADS TO THE FARMER.

"Farm life should be made more attractive. No matter how fertile the land or how favorable the climate, if the farmer is imprisoned by bad roads, he can not enjoy fully farm life. He can not conveniently reach the school, the church, the town, or his friendly neighbors if the roads are very bad.

"We can not expect the greatest social, moral, mental, and material development of the farmer if the roads are bad.

"Only 8.2 per cent of the total road mileage of the United States is improved at the present time, yet we expended approximately $79,000,000 in work on roads in 1904. The expenditure has been entirely out of proportion to the results accomplished. The reason for this I have pointed out. It is due to the extreme localization, bad road laws, bad administration, and lack of coordination. We have little skilled supervision, with but few men with a knowledge of road building or of any profound interest in it. The laws must be changed, and they can only be changed and greatly improved by instructing the public mind and public men.

"*The profit of the farmer* is represented by the difference between the cost of production and transportation and the selling price. If he can cut the transportation in half, he will materially benefit himself financially; and if the cost of transportation could be reduced $600,000,000, the farmer would easily be benefited to the extent of one half of this saving, granting that the city inhabitants would benefit by the other half of the saving. We complain of the high cost of living, and do not sufficiently analyze the reasons for the high cost. Lower transportation means lower cost of living, both to the farmer and city resident.

"We should perfect the national waterways likewise and control the railways to lower the cost of transportation.

"The mean cost of carrying wheat from New York to Liverpool—*by water 3,100 miles*—is only 3.8 cents per bushel, while it costs the farmer on an average more than that to haul his wheat to the railway station.

"The consular reports show that hauling in Germany, France, and England is frequently as low as 7 and 8 cents a ton a mile, and rarely higher than 13 cents.

"The cost on fair earth roads is 25 cents a ton per mile; on earth roads containing ruts, 39 cents; on sandy roads when wet, 32 cents; on sandy roads when dry, 64 cents; on black gumbo when thoroughly wet passing is impossible. Steep grades on the roads is another serious tax on transportation, because 'the chain is no stronger than the weakest link.'

"If the farmer has good roads, he can take to the town two or three times as much in a load as he does now. He could haul to town from a distance two or three times as great as he does now. He could haul to town products which now are prohibited by the expense of hauling. He could raise a larger variety of products suitable for marketing. He would be directly benefited by making the town, the people, and the school more accessible.

"He would be benefited by making his neighbors easier of access, and in that way his social pleasure and personal happiness would be increased.

"He would be able to deliver his farm products to the town every day in the year, and therefore would have a steady market throughout the year for his products, whereas he may be by muddy roads excluded for two and three months at a time from his market, and the town people in like manner may be deprived of vegetables, fowl, eggs, milk, and other farm products which are essential to their comfort.

"In Bradley County, Tenn., bonds were issued for 160 miles of excellent macadam roads, and lands that were valueless before these roads were built now find ready purchasers at from $15 to $30 per acre.

EFFECT OF ROAD IMPROVEMENT ON TRAFFIC.

"If the roads were improved, *traffic would not be congested* at one season and very limited at another season, because the transportation of the crops could be made at convenience and uniformly, without the interruptions of bad weather. The railroads could, therefore, maintain a more regular service with a smaller equipment, fewer employees, and less cost of operation. This means cheaper freight rate for all the people and lower cost of living.

"I have not taken into account the wear and tear on teams due to bad roads, the destruction of wagons and vehicles, the danger to life and limb from bad roads.

THE RELATION OF GOOD ROADS TO THE PUBLIC HEALTH.

"If the roads are perfectly good, the physician or surgeon can with the modern motor car go to the aid of one in danger of death almost immediately, but when the roads are impassible death might ensue before relief could be obtained. If the roads are wet and bad and children march to school with wet and muddy feet, their vitality is lowered and loss of life must ensue.

THE DIFFERENCE BETWEEN THE CITY AND THE COUNTRY.

"Many men complain that there has been a steady movement from country to city. The reason is plain. The city is more attractive to live in because *it has perfect roads* of asphalt, macadam, and Belgian block, and concrete sidewalks. No person need to have his feet muddy in going from one point to another. In the city is concentrated many of the things that human beings desire, but if the country had good roads it would be a more desirable place to live in than the city. The countryman has good air, free from dust and smoke. He is away from the roaring noise of the city and the everlasting grind of the wheels of the street car. In the country he has his own fresh food, prepared by nature, at his hand; poultry, eggs, fresh milk, cream, butter, fresh vegetables of all kinds, and fresh fruits—peace, young animal life to interest and please him, and nature smiling back in his face and giving him 10,000 per cent for every seed he plants. With good roads he can come to the city when he likes and go back to his peaceful, pleasant home, satisfied.

"City life enervates and weakens human beings, as a rule, because of the nervous strain of city life, while in the country a man grows strong, with steady nerves, good lungs, and brawny limbs. The conditions of country life should be made more attractive. The social intercourse and pleasure of country people, proper school facilities, and church advantages should be made available with good roads. From the country has sprung the greatest men of genius and patriotism. Nearly half of all of our people are engaged in agriculture, and they furnish half of the taxes and produce three-fourths of the wealth of the Nation. I am in favor, for their sakes, of stimulating the building of good roads; but let us remember that the building of good roads is just as important to the city man, who lives on the produce of the country, as it is to the countryman, who raises that food supply. It is of equal importance and value to both the residents of the city and of the country. It is of equal importance to the professional man and to the laborer, to the farmer and the city merchant, to the producer and the consumer. It means lower cost of living to all. It means great commercial and financial advantage to all. It means greater pleasure and enjoyment of life to all.

"Many of our Government expenditures are made without return, but here is a magnificent investment, which, if it were based upon the credit system, would pay 15 per cent on every dollar judiciously invested and would add to our national wealth more rapidly than any other national investment into which we could invest our national credit or our national energies. The experience of other States has shown the importance of the State taking the initiative and guiding the activities of the counties, and in this way getting greater results. This has

been fully explained by the Senator from Virginia as the experience in that State.

AN AVENUE TO EMPLOY THE UNEMPLOYED.

"If we had this system established, we could give employment to the unemployed at rates that would not attract men already engaged, but would attract men out of work and in need. There are hundreds of thousands of men of this class available.

"Mr. President, this bill ought to be immediately reported and passed. I remind Republicans that public sentiment has so far crystallized that in their national platform of 1908 they cordially indorsed aid to good roads in the following language:

"We recognize the social and economic advantages of good country roads, maintained more and more largely at public expense and less and less at the expense of the abutting property owner. In this work we commend the growing practice of the National Agricultural Department, by experiment and otherwise, to make clear to the public the best methods of road construction.

"And I remind my brother Democrats that in our national platform eight years ago we had the following plank:

POST ROADS.

"We favor Federal aid to State and local authorities in the construction and maintenance of post roads.

"Let us fulfill in good faith our party pledges.

THE VALUE OF INTENSIVE FARMING—"BACK TO THE LAND."

"In 40 years we shall have over 200,000,000 people, and this estimate does not fully take into account the geometric progression which immigration makes probable under the enormous growth of seagoing vessels of mammoth size.

"Our breadstuff exports in 25 years has decreased 24 per cent, notwithstanding large areas of new lands producing wheat and corn.

"Our home demand for wheat in a quarter of a century has grown 80 per cent more than the supply of wheat.

"The object contemplated by the good-roads bill is to develop farm lands, encourage home building on the farm, increase the productiveness of our farm land, make our farms more accessible by the building of good roads and improved national and local highways, and make our farms a potential factor in promoting the wealth, the health, the beauty, and happiness of the Nation. Nothing could be of greater national importance.

"With these objects I find myself deeply in sympathy. One of my earliest recollections was of the intensive farming of a piece of land in Lynchburg, Va., of about 2½ acres, surrounded by a high brick wall; the inclosed land was divided up into a dozen or more plats of ground, with graveled walks lined in certain parts of the garden with dwarf box and with flowers.

"Some of the squares were used for vegetables, Irish and sweet potatoes, beets, parsnips, salsify, okra, radishes, onions, lettuce, cabbage, mustard, asparagus, tomatoes, several kinds of sweet corn, the watermelon, cantaloupe, and sweet pumpkin for cooking, rhubarb, and other succulents. Other beds against the brick wall had strawberries, raspberries, blackberries, currants, gooseberries, and various vines.

"Even in the winter this land furnished the table with vegetables stored in sand pits, and with fruits preserved and canned, and with pickles, marmalades, and other things edible.

"I remember sweet herbs in this garden—of thyme, sage, etc. I recall with affection certain arbors devoted to the grape, which, in their season, had a special charm for me. Around the edge of these squares were many beautiful varieties of fruit—of peaches, of pears, the sweet Sickle, the Royal Bartlett, the damson, the plum, the cherry, the apple. The yellow June apples in that garden were sweet enough to tempt, and often did tempt, a small boy about my size to risk an appearance before the Throne of Grace without any other preparation than an incredible number of June apples eaten in reckless disregard of consequences.

"I have never seen anywhere a more beautiful variety of hyacinths and tulips than grew in this garden, with all the old-fashioned English flowers—the jonquil, the narcissus, the crocus, the lilies of the valley, the phlox, the snapdragon, and many others; the Easter lily, the tiger lily, and a great variety of roses.

"I remember the yellow and red honeysuckle, covering a trellised summerhouse, mingling its fragrance with the pleasant odors of the climbing rose which helped to cover it.

"As I used to enter this charming spot of land from the dining-room door, I recall passing between two trees of crepe myrtle and, a few steps farther on, by two large shrubs of the euonymus. There were several large box trees in the garden, whose thick cover afforded a hiding place for many birds, whose twilight repose I used to disturb for my amusement by shaking the trees.

"There was in this garden a large clump of cane which furnished the boys of the place with convenient fishing rods, and everywhere throughout this 2 acres was manifest the highest intelligence, the finest taste, and unceasing industry.

"The guardian spirit of this garden was my mother, under whose hand everything which grew out of the ground always flourished. I have always thought that the ministering angels who supervise the growth of plants must have specially loved the gracious spirit of my mother, for her plants lived, no matter what happened to the gardens of other people. I shall never be satisfied until I am able to own and to enjoy such a garden as she had, and with which she made my boyhood days happy. Adjacent to the garden was a big smokehouse where we put up our own meat, and a yard where the chickens and ducks flourished and helped to feed the family.

"I may be forgiven these personal reminiscences when I point to the fact that this two acres and a half of land furnished a very large household with the greatest abundance of food in the form of vegetables, fruits, berries, grapes, throughout the year, as well as with an abundance of beautiful flowers. It was intensive farming. Every foot of the ground was kept thoroughly manured, the plants were transplanted from time to time where their nature required it, and the life habits of every plant were studied and thoroughly understood.

"In contrast to the productive power of this 2½ acres I have seen in the great West a poor farmer trying to cultivate enormous areas of land with a single team, and with the invariable result that his crop was so poor as to afford him and his family not even the necessaries of life, much less its convenience or the luxury of fruits and flowers. Such a farmer, with bad and muddy roads to travel, is practically isolated from the market, from the school, from the church, and from other conveniences and pleasures of civilized life, and can not conveniently or cheaply deliver to market even those things which he does raise.

"The man who works more land than he can cultivate thoroughly well wastes his time; he does more: He makes life unhappy for himself, for the faithful woman who loves him, and for the little children who look to him for guidance. He is not as useful nor as happy a citizen as he would be if he concentrated himself on 40 acres, cultivated a garden, kept a few cows for milk and butter, raised chickens and other fowls and domestic animals out of which the profits of the farm arise.

COMPARISON WITH ENGLAND, GERMANY, AND FRANCE.

"In England, Germany, France, Belgium, and Holland the people obtain much higher results than in the United States. The average wheat production of Great Britain is over 32 bushels to the acre, and in the United States only a little over 13 bushels to the acre.

"I recently spent a summer in Germany and France, and there I saw that every foot of the ground was thoroughly cultivated. It was divided up into very small tracts, and off at a distance would look like strips of carpet laid upon the rolling fields. There was constant rotation of crops; they were busily engaged in fertilizing with manures, making the ground richer. The farm roads were in splendid condition, and thousands of miles of surveyed, carefully leveled and graded turnpikes afforded the farmer cheap transportation, so that a single team might move 4 or 5 tons with less difficulty than half a ton could be moved by the same team on some of the terrible roads in the United States. What an object lesson to the people of the United States are these splendid roads, which increase the value of the farm, bring the farmer nearer to every convenience of civilized life, make his products more valuable, and make the conditions of life much more attractive.

"Along these roads I observed miles of fruit trees, the cherry, the apple, the pear, and every one of them marked with a number indicating ownership.

"I think I never saw a house so poor that it did not have its vegetable garden and its garden of flowers.

"Throughout our many cities the back lots of the American homes are often very shabby and unkempt, are absolutely distressing to those who have positive views in regard to making land either useful or beautiful.

"Every such back lot in Germany and France and England or Belgium or Holland would be a valuable vegetable garden ornamented with flowers. We can be engaged in no better business than in leading our people back to the use, and the perfect use, of our most precious heritage—the land. Let us get back to the land.

THE VALUE OF THE FARM AS A NATIONAL RESOURCE.

"Our farms produced last year eight thousand millions of created wealth. Our cotton crop alone furnished enough export cotton to give us a balance of trade in our favor. The output of the American farm, by proper cultivation, could, however, be immediately doubled, and by reclaiming waste places with proper cultivation, could easily produce over twenty billions of

wealth per annum—a sum nearly equal to the total accumulation of a century in the banking resources in all of our 25,000 banks.

"The work of such men as Luther Burbank, of Santa Rosa, Cal., in improving plant life has a value of which our people generally have had an adequate conception.

"In Oklahoma a new plant has been developed from the common seeding Bermuda, called the "Hardy Bermuda," which has great national value. It has been developed by careful selection of plants which have withstood severe freezing. The plant has as good nutritive quality as timothy; it comes up early in the spring; it has a root over a foot deep; it grows almost as thick as the hair on the head; it grows luxuriantly in the face of dry weather; will successfully stand the most extreme drouth; is not killed by many days of overflow; will grow on alkali spots and in the sand. It will produce a very large amount of food to the acre, and is an excellent grazing grass. It is impossible to exaggerate the value of a plant of this character, which will convert land heretofore unproductive into productive areas of great value. Our people must have food, and this plant will produce great food supplies from land heretofore producing nothing. We must emphasize making our lands more productive by using proper suitable plant life and concentrating labor on the land.

IMPROVEMENT OF THE NATIONAL HEALTH.

"The annual death rate of New Zealand is nine to a thousand, and of the various Australian States, ten to a thousand. In the United States it is over sixteen to a thousand—60 per cent more than in Australia. If our people can be led back to the farm, where they can get plenty of fresh air, fresh vegetables, milk and butter, and chickens, we will save these lives which now amount to over a half million beings per annum in excess of what it ought to be.

"The tables of mortality show that this high death rate is very largely due to the bad housing, bad foods, and bad sanitary conditions of the very poor in our congested cities.

"In the fight on tuberculosis abundant fresh air has been demonstrated to be essential to a recovery. Abundant fresh air is essential to keep people well who are not now sick, and is all the more important when they become afflicted with the extremely dangerous tubercle bacillus. Let us encourage our people to get back to the land, and we shall greatly improve the national health.

IMPROVEMENT IN SELF-RELIANCE AND OTHER MORAL QUALITIES.

"In cultivating the land, all of the moral qualities are stimulated, independence, self-reliance, initiative, courage, honesty of mind. In working on the land, a man is able to provide his own comfort; he can build his own house with his own hands; he can supply every article of food he needs, and create a surplus sufficient to buy other things. He receives nothing for which he does not give an equivalent; he promotes his own comfort, his own self-respect, and his own dignity. The greatest men of the Nation have come from the farm. The man on the farm, who is cultivating a small piece of land of his own, need have no fear of being suddenly discharged by his employer and left with a family on his hands to feed, and no means to buy food or pay rent until he finds another job. On the farm there is no danger in losing his job.

"This gives a man courage, self-reliance, and those moral qualities which go to make up good citizenship. Without the private virtue of the individual citizen our Republic can not rise to its great and honorable destiny. Let us get back to the land. Let us improve the roads that lead to the farm and from the farm and give the farm greater attractiveness because of its accessibility to the towns and cities.

THE VALUE OF SMALL HOLDINGS.

"The French Revolution was due to the abuse of the unrestricted land holdings of the nobility, from which vast incomes were derived, thus leading to a great extravagance of the landholding class in the face of the extreme poverty and misery of the unemployed landless masses. The landholders were so rich they did not need to use the land in full, but devoted very large areas to game preserves, while the poorer French people, who had also been brought into the world by the hand of the Omnipotent, were denied access to the land by the landlords, who preferred to see their estates used in large part for purposes of amusement, as hunting parks. The French law, of course, sustained the French landlord until the corrupt extravagance of the landholding class and the abject hunger and misery of the multitudes led to the overthrow of the laws which permitted this condition, and the bloody French Revolution followed.

"The Revolution resulted in the subdivision of France into small landholdings, which, under the laws of inheritance, was still further subdivided.

"The result of this subdivision has been intensive cultivation and great agricultural wealth from the soil of France, making it one of the richest nations in the world. The reverse of this policy is seen in Spain and Mexico, where huge estates have been permitted to exist, with the unavoidable result that the productive capacity of the land has not been developed, and where the extremes of great wealth and abject poverty are in more marked contrast than in any other civilized country.

"The United States should pursue a policy of small landholdings, and the State of Oklahoma has led the way by passing laws imposing a progressive tax on large holdings of land, for the purpose of stimulating actual home building, of promoting the greatest productive capacity of the land, and for the abatement of the nuisance and danger of large landed monopoly.

"The smaller subdivision of land will lead, therefore, directly to its intensive cultivation, and just in degree as the lands are thoroughly well cultivated, just in that degree will the value of farm lands increase, and with the increase in the value of farm lands, and the growth of their productions, just in that degree will city property and suburban property increase in value.

"Likewise, this will lead to the building of good roads, and to the increase of the liberty, of the independence, and of the personal happiness of all of our people, both on the farm and in the cities. Our cities are sadly congested and millions of people could be led to the farm, both to their own welfare and to the advantage of the Nation. The pimp, the cadet, the white woman slave would be more useful and happier as an honest plowman, gardener, and milkmaid.

THERE IS A CHARM ABOUT THE FARM.

"Under proper conditions nothing can be more beautiful or more attractive than the farm life. In times past with bad roads and muddy weather, and fields too big for the farmer to cultivate successfully, men have often worked themselves down, have grown weary, have made themselves poor, by ill-directed effort, and have made themselves, their wives, and children sorrowful and miserable in consequence. Under such conditions the farm has often been like a prison instead of being a place of liberty, prosperity, and happiness. The boys and girls have too often been glad to leave the farm to get away from its dull routine and solitude. But the time has come when there should be a complete reversal of all this. We have learned how to avoid these things and the valuable lesson should be universally taught and made a common heritage.

"Let the man—if he have too much land—sow his excess in grass, in hardy Bermuda; let him confine himself to what he can thoroughly cultivate; use only plant life suitable to the seasons, as kafir corn and milo maize for dry weather, and learn how to do the work well; let him surround himself with a beautiful garden; let the women and children be taught to love these things and the farm will become a lovely home.

"It's a good thing to keep the children on the farm, away from the temptations and evil suggestions that surround them on every hand in the city. In the light of modern invention, with our wonderful modern transportation, with electric railroads running everywhere, with rural mail delivery, with cheap power, heat, and light, with improving values in farm products, with cheapening goods of every description, every family man should have a piece of land, if it is only 10 acres, or 1 acre, upon which he might surround himself with the fragrance and the blossom and the fruit of plant life, where he might raise healthy, happy children. What can be more beautiful, or more valuable than a well-kept vegetable garden, filled with all kinds of foods of every flavor—filled with berries and grapes, and trees bearing fruits and nuts, and ornamented with the endless procession of flowers each advancing season affords?

"What more attractive than to be surrounded by the young and cheerful life of the farm—young chickens, ducks, turkeys, calves, lambs, pigs, colts, and last but not least, the opportunity to have a few good dogs, whose love and companionship is not the least of the attractions of the farm.

"'Back to the farm' should be the bugle call to the youth of our land.

"Back to the farm, where peace and quiet and sound, refreshing sleep follows happy labor, where we can hear the birds, singing their songs of thanksgiving in the early morning among blossoming trees, where homely joys can give a life of happiness, where men and women grow sound of heart and strong of limb and nerve.

"I should like to see an agricultural school of practical instruction and of plant and seed distribution in every agricultural county in the United States, where the care of cattle and horses and sheep and swine and domestic fowl and the economies of farm life and its productive capacity should be properly taught; where the great lesson might be taught and emphasized by the Government—both National and State—that

there is *no* profession more honorable than farming, and that no occupation is of such *vital importance* to the wealth and health of the Nation.

"Congress should emphasize the great importance of good roads to and from the farms of the country. It should encourage State and National aid to good roads, so as to bring to the expenditure on road building the greatest degree of intelligence and efficiency and concentrated effort. This is, perhaps, the most important factor of all in making the farm more desirable to the people, in making the farm more attractive, in making it more remunerative, and giving to it those elements which are necessary and essential to peace of mind and to the prosperity and happiness of the farmer."

RURAL CREDITS.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which is Senate bill 2986.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create Government depositaries and financial agents for the United States, and for other purposes.

The PRESIDING OFFICER. The pending amendment is the amendment offered by the Senator from Iowa [Mr. CUMMINS] to strike out section 29.

Mr. TOWNSEND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested, and the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Bankhead | Hollis | Norris | Sterling |
| Beckham | Husting | O'Gorman | Williams |
| Brady | Johnson, Me. | Oliver | Sutherland |
| Brandegee | Johnson, S. Dak. | Overman | Taggart |
| Chilton | Jones | Page | Thomas |
| Clapp | Kenyon | Phelan | Thompson |
| Clark, Wyo. | Kern | Pittman | Tillman |
| Clarke, Ark. | Lane | Poindexter | Townsend |
| Culberson | Lea, Tenn. | Shafroth | Underwood |
| Cummins | Lee, Md. | Sheppard | Vardaman |
| Curtis | Lippitt | Simmons | Warren |
| Dillingham | Lodge | Smith, Ariz. | Weeks |
| du Pont | Martin, Va. | Smith, Ga. | Works |
| Fall | Myers | Smith, S. C. | |
| Gronna | Newlands | Smoot | |

Mr. CHILTON. I wish to announce for the day the absence of my colleague [Mr. GOFF], on account of illness.

Mr. HOLLIS. I desire to announce the absence on official business of the junior Senator from Arkansas [Mr. ROBINSON] and the junior Senator from Delaware [Mr. SAULSBURY].

The PRESIDING OFFICER. Fifty-eight Senators have answered to their names. A quorum is present. The question is on the amendment offered by the Senator from Iowa [Mr. CUMMINS].

Mr. CUMMINS. Mr. President, the outline sketched yesterday afternoon indicates my apprehension with respect to the feature of the bill toward which my amendment is directed. I think that every Senator and every citizen who is interested in the preservation of the authority of Congress to regulate commerce among the States should clearly understand the effect of the principle asserted in the bill as now proposed. I repeat what I said yesterday to this extent—that in my judgment the effective regulation of commerce among the States and with foreign nations will ultimately be found to involve the incorporation of the agencies or instrumentalities of such commerce under an act of Congress; and when Congress, in exercising the unquestioned power to incorporate an association for the business I have indicated, if all the property which these corporations may create or of which they may become the owners is exempt from taxation by the States, there will be an insuperable obstacle in the way of progress in that direction.

I assert, and I do not fear that it will be successfully contradicted, that if the property of the Federal land bank proposed to be created under this bill can be exempted from State taxation, then all the property of every corporation which we may create in order to carry out other governmental functions in part will also be exempt from State taxation; and if such property is exempt from State taxation because it is owned by a corporation authorized by Congress in the exercise of its constitutional power, we will never create such corporations or permit their creation, for if we were to do so we would withdraw from taxation throughout the country so large a proportion of its real wealth that the suggestion becomes intolerable; it would not be considered for a single moment.

I intend that those who are here shall see before we advance to a vote upon section 29 in the bill that the thing proposed, if it be within our power, leads inevitably to the result which I have suggested.

I do not intend, Mr. President, to organize a kindergarten in international or constitutional law, for I recognize that the Senators who hear me are just as familiar, some of them vastly more familiar, with the learning in that field and upon those subjects than am I; but I do intend to recall to the attention of the Senate certain underlying principles of constitutional law which everybody will recognize and accept the very moment I have stated them.

First, the Constitution of the United States in terms confers upon Congress unlimited power of taxation. The Congress can tax under the authority of the Constitution everything and everybody in order to carry into effect the powers of the Federal Government. This power has two restrictions. That is hardly accurate. They are not restrictions so much as they are directions respecting the manner of the exercise of the power. First, if the tax be a direct tax, it must be apportioned according to the population of the several States. We have recently made one change in that direction, namely, the one relating to the income tax, although, in my opinion, that is not a change, because, in my judgment—and it was the judgment of the Supreme Court for more than a hundred years, and from the learning of those opinions I took my own—an income tax is not a direct tax.

Second, indirect taxes must be uniform. I shall not stop to suggest the meaning of the word "uniform," because that has been declared so often by the Supreme Court that it is unnecessary for me to say one word about it.

But notwithstanding these two modes of taxation, the power of the Federal Government to tax every kind of property and every person is unlimited. On the other hand, the States have inherently the right to tax everything and everybody within their respective jurisdiction save as they may be restricted or limited by their own constitutions.

Here are two powers extending over the same persons and over the same property within any given State. But it is admitted, of course, on all hands that while there is no constitutional inhibition in express terms resting upon Congress not to tax the instrumentalities through which a State is carried on, yet in the very nature of things, fundamentally, the relation which the Constitution establishes between a State and the Federal Government prohibits the Federal Government from taxing the instrumentalities or the property of a State.

Just what are instrumentalities of a State is the subject of many judicial decisions. Reciprocally the State has no power, no right, although there is no prohibition in the Constitution to that effect, to tax the instrumentalities or the property of the General Government, because to do so is to give the State the power to destroy the General Government, to arrest or impede or obstruct the processes of the General Government.

Now, all these things are fundamental law and will not be disputed. I ask now, wherein in what phrase or clause of the Constitution do we find authority given to Congress to exempt property within a State from taxation by the State? There is no such authority in the Constitution. There is no pretense of any such authority in the Constitution. It is neither a power expressly given to Congress nor can it be implied from any power given to Congress.

Mark you, I said originally that the inhibition upon the State arises out of the relation which the State assumed by virtue of its adhesion to the Constitution and not through any act of Congress or any power given to Congress to declare specific property exempt from taxation.

I said yesterday, and I repeat to-day, that Congress has never, in all the years of its existence, attempted to declare that any property within a State is or should be exempt from taxation within the State. When I made that declaration, which I intended to apply, of course, to the case before us, the Senator from Colorado [Mr. THOMAS] suggested the provisions contained in the constitutions of the several States or in the acts of Congress which admitted certain States to the Union as exceptions from the rule I announced or at least were not in harmony with my statement. I said in response that, when I reached the stage of the argument I have now reached, I intended to give attention to that claimed exception. It is not an exception.

Let me say that the constitutions or the acts of Congress relating to the admission of the thirteen original Colonies contained no such provision, nor do the constitutions or the acts of Congress pertaining to the admission of the States which were originally a part of the thirteen Colonies contain any such provision; that is to say, the admission of the State of Vermont is silent with regard to the manner, and of Kentucky, created as

it was out of the State of Virginia. But when the States that were created out of what is known as the Northwest Territory and the territory acquired known as the Louisiana Purchase began to come in, then the question arose; and I think it is true that in every compact between the States created out of the territory I have last described and the Union there was or is a provision that the Federal Government should not tax the property of the United States—mark you, it is limited to the property of the United States—lying within their respective domains.

That would have been the effect, Mr. President, if there had been no such compact. Like a great many other declarations contained in agreements and in instruments of that sort, the provision to which I have referred was simply declaratory of a universally recognized law.

I would be possibly criticized if I made that assertion upon my own authority. I want the Senate to agree with me fully upon that subject, and therefore I invite its attention very briefly to the case of Van Brocklin against the State of Tennessee, in 117 United States Reports. I am going to give special attention to page 657, but before I do so I feel that it is necessary to state the character of the case.

Senators will remember that in 1862 Congress levied a direct tax. It being near the beginning of the war and needing revenue it levied a direct tax upon land throughout the United States. It of course levied it upon the system or plan of apportionment. Among others it levied a tax upon certain property in Tennessee. The owner of the property failed to pay the tax, and thereupon the property was sold for the Federal tax, just as it would be sold for a State tax unpaid, and at the sale the Government became the purchaser.

Now, mark the situation. The Government became the purchaser of the land sold at tax sale, not in order to carry on any governmental functions with it but simply in order to enforce payment of the tax which had been levied upon it. It became the owner, and in that way it was removed of course from the rule which controls Government property obtained for post offices and for arsenals and for other governmental functions of that kind. It was simply the owner of property bought at a tax sale.

The State of Tennessee attempted to tax the property while the Government was so the owner, and the validity of the tax levied by the State came before the Supreme Court in the opinion to which I have referred. The opinion in this case is, taking it altogether, the most illuminating respecting the power of the Federal Government to tax and the State government to tax that can be found in the reports of the Supreme Court of the United States, save and except that of McCulloch against Maryland.

It is a very long opinion and it reviews the compacts between every State in the Union at that time and the Federal Government. Among other things it refers to the argument made in the Senate at the time of the admission or proposed admission of the State of California to the Union. I assume it is referred to because of the eminent abilities and station of those who engaged in the debate. I read just a few words:

> In the debate in the Senate in June, 1850, on the act for the admission of California a motion to amend the act by requiring California before her admission to pass in convention an ordnance providing, among other things, "that she relinqushes all title or claim to tax, dispose of, or in any way to interfere with the primary disposal by the United States of the public domain within her limits"—

The last clause is quoted from the act itself—

> was opposed by Mr. Douglas and Mr. Webster as unnecessary, and was defeated by a vote of 36 to 19. In the course of the debate Mr. Douglas, after showing that the United States acquired title to the public lands, not by virtue of their sovereignty, but by deeds of cession from the old States, or by treaty of cessions from France, Spain, or Mexico, and referring to the provision of the Constitution authorizing Congress "to dispose of and make all needful rules and regulations concerning the territory or other property of the United States," said: "This provision authorizes the United States to be and become a landowner, and prescribes the mode in which the lands may be disposed of and the title conveyed to the purchaser. Congress is to make the needful rules and regulations upon this subject. The title of the United States can be divested by no other power, by no other means, in no other mode than that which Congress shall sanction and prescribe. It can not be done by the action of the people or legislature of a Territory or State." And he supported this conclusion by a review of all the acts of Congress under which States had theretofore been admitted.
>
> Mr. Webster said that those precedents demonstrated that "the general idea has been, in the creation of a State, that its admission as a State has no effect at all on the property of the United States lying within its limits," and that it was settled by the judgment of this court, in Pollard v. Hagan (3 How., 212, 224), "that the authority of the United States does so far extend as, by force of itself, proprio vigore, to exempt the public lands from taxation when new States are created in the Territory in which the lands lie."

After this very exhaustive review of the conditions upon which every State had been admitted into the Union prior to the rendering of the decision, the court finally said:

> It can not be doubted that the provisions which speak of the exemption of property of the United States from taxation, in the various acts of Congress admitting States into the Union, are equivalent to each other, and that, like the other provision which often accompanies them, "the State shall not interfere with the primary disposal of the soil by the United States," they are but declaratory, and confer no new right or power upon the United States.

I think it can not be questioned that this case settles once and for all that the property of the United States situated within a State is exempt from taxation, for reasons that are set forth at very great length in this opinion, and which are simply unanswerable. The court proceeds to apply this rule—not the rule of the compact between the States and the Union when they entered the Union, but the rule which arises out of the relation between the two Governments by the Constitution of the United States—and holds that property so acquired by the Government is not subject to State taxation.

I have pursued this at greater length than necessary, possibly, because I wanted to make it perfectly clear that Congress, as a legislative body, has never in its history, so far as I am familiar with its history, attempted to settle the judicial question with respect to the taxable status of property owned by a corporation or growing out of a corporation which had been incorporated under a law of the United States.

I insist again that the Congress is wholly without any authority upon the matter. It is without authority, first, because it is a judicial question, and not a legislative one; and we can no more usurp the jurisdiction of the court to determine whether certain property in a State is so related to the Government of the United States that it can not be taxed than we could successfully attempt to judge any other legal issue which might arise between a State and the United States or between any suable bodies in the United States.

This section is, therefore, absolutely nugatory. It proceeds upon a false interpretation of the power of Congress. The several States have never suggested even in any way, directly or indirectly, that they would give to Congress the right to exempt from taxation property lying within their jurisdiction. The States have assumed a certain relation to the Federal Government through the adoption of the Constitution. That relation does exempt certain property which lies within the States, and which would otherwise be subject to State taxation, from the power of the State; but whether it is so exempted or not must be determined by a court to which the question is appealed. It can not be determined by the Congress.

I emphasize again that never before in the history of the country has Congress endeavored to invade in this manner the prerogatives and the domain of the judicial branch or department of the Government. If there were no other reason than the one I have just given, the section ought to be eliminated; but my concern in the subject is much deeper than the forum in which the question is to be decided.

I am in favor of the establishment of land banks for the accomplishment of the purpose which is provided for in the bill before us; but if I believed that in so establishing banks, in so giving them the authority to acquire certain property and to issue certain obligations, I was helping to exempt that property from taxation or helping to deprive the States of their rightful authority to tax the property I would be compelled, by reason of this higher and more important consideration, to give my vote against the bill.

I believe in Federal incorporation in many instances. I believe, as I have more than once said, that we shall find it desirable, if not necessary, before long to allow, if not to require, common carriers to organize under a law of the United States, so that we may better control their capitalization, as well as their operation. I believe that it will be discovered before many years that the most efficient way to regulate the great corporations engaged in interstate commerce will be through Federal incorporation, permissible, if not imperative, in order to better regulate and control their affairs and in order to better protect the people of the country from undue exactions; but if it is true that in authorizing the organization of such corporations and in authorizing them to perform, or to help perform, a certain governmental function, we are giving Congress power, or if Congress has the power, to declare that all their property is to be exempt from taxation, or if it follows under the Constitution that their property is all exempt from State taxation, then the course that I have suggested is altogether impossible; for, in order to secure this more efficient remedy, we would be compelled to withdraw from the taxable authorities of the country substantially all the property through which business is carried on.

Passing, then, the question of the authority of Congress itself to segregate the property of the land bank and to declare that no taxes shall be levied upon any part of it, except its real estate—a question with which I have dealt sufficiently—I now pass to the other question, namely, Does the relation between

the State and the Federal Government exempt the property of such instrumentalities from taxation? It will be remembered that the law upon this subject really began with McCulloch against Maryland, in which it was held by the Supreme Court, with a richness of reasoning and a plenitude of learning never before equaled and never since surpassed, that the State of Maryland could not levy a tax upon the notes of the United States Bank, a bank that had been created under an act of Congress and for purposes which are so well established historically that I need not enter upon the subject at all.

Remember, as we pass on, that Congress, in creating the United States Bank, had not attempted to declare whether its property should be or should not be exempt from State taxation. The men who passed the act which incorporated the United States Bank were familiar with the adoption of the Constitution; they were still under the inspiration of those eventful days, and yet it never occurred to the Members of Congress of that day that Congress could declare what property of the United States Bank should be exempt or should not be exempt.

Mr. THOMPSON. Mr. President——

The PRESIDING OFFICER (Mr. OVERMAN in the chair). Does the Senator from Iowa yield to the Senator from Kansas?

Mr. CUMMINS. I yield.

Mr. THOMPSON. Congress did, however, afterwards by statute declare what property of the national banks the State might tax within the State.

Mr. CUMMINS. I can not assent to that proposition. If the Senator means the act of Congress of 1862——

Mr. THOMPSON. I refer especially to the Revised Statutes, section 5219.

Mr. CUMMINS. Section 5219, passed in 1862?

Mr. THOMPSON. It commences: "Nothing herein shall prevent all the shares"——

Mr. CUMMINS. Of course the Senator will recall the fact that that occurred something like half a century later. I will reach it presently in the course of my argument and refer to it. I intend to refer to the act which deals with the question of taxation relative to the national banks.

Mr. THOMPSON. But I say Congress did declare just what property of the national banks might be taxed within the States, and the Supreme Court has held——

Mr. CUMMINS. I beg pardon; Congress has not so declared, as I understand.

Mr. THOMPSON. Will the Senator permit me to read this section?

Mr. CUMMINS. If the Senator will interrupt me at the proper time, I will be very glad to yield and have him read what he has before him into the RECORD.

Mr. THOMPSON. Very well.

Mr. CUMMINS. What I am saying now is that in the creation of the United States Bank—and that was involved in the case of McCulloch against Maryland—Congress did not attempt to declare that its property or any part of its property should be exempt from State taxation, and yet certain of its property was exempt from State taxation. Why? The answer is given in the opinion of Chief Justice Marshall in such a luminous and persuasive way that no man can misunderstand it. He said that a State can not levy or lay a tax upon the circulating notes of the United States Bank because in so doing it was violating the fundamental relation which had been established by the Constitution between the Federal Government and the States and in so doing was impeding, obstructing, and preventing the exercise of the governmental function which Congress had authorized the bank to perform, and so the tax was declared to be invalid.

Then came the case of Osborn against The Bank. I ought to beg pardon for reviewing these authorities again, because they are familiar to every student of the subject, but in the Osborn case the State of Ohio attempted to levy a tax upon the franchise of the bank—that is, upon its right to do business as a corporation. Now, both United States banks, if I may speak of the two systems successively organized, were corporations for pecuniary profit; they were corporations in which there were private stockholders who expected to receive a fair and just reward upon the capital which they contributed to the enterprise. In the Ohio case the State attempted to lay a tax upon the right of the people who were doing business under the name of the United States Bank and in some respects exercising a governmental function, but the Supreme Court again said, without any action of Congress or without any declaration of Congress, that the tax could not be levied.

Why? Because to admit that right upon the part of the State was to admit the right of the State to destroy the corporation and to prevent it doing the very thing which it was organized to do.

I am instancing these things now just to show you how the questions of exemption from taxation have arisen. They have never arisen upon an act of Congress; they have always arisen, and they always will arise, upon exemption under the Constitution itself.

I said yesterday that I had some doubt—and I still hold it—whether Congress could give its assent to the taxation of property by the States which, under the Constitution, is exempt; but I do not want Senators to reach their conclusions upon the point I am presenting on account of any doubt with regard to that question. I do not believe that Congress could assent to the invasion of a constitutional exemption; but whether Congress can be considered as so far representing the United States as the owner of property to assent to the exercise of a power upon the part of the States which constitutionally the States do not possess, I do not say; but I do say that Congress can not exempt property from taxation which, under the Constitution, the States have a right to tax. The mere statement of that question ought to be sufficient argument.

Mr. BRANDEGEE. Mr. President, I should like to ask the Senator a question.

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Connecticut?

Mr. CUMMINS. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. I want to ask the Senator to develop at some period in his argument a thought which he suggested. If this is not the proper time, do not let me divert the Senator from his present subject; but he suggested when he was discussing the question of the compulsory incorporation of interstate-commerce carriers that if the theory which he is now attacking were upheld there would be danger of the property of the carriers located in the several States being exempt from taxation within the States. Supposing the Federal incorporation of interstate carriers were made compulsory and supposing Congress did not attempt to exempt their property in the several States from taxation in those States, wherein does the Senator have apprehension that by any relation between the Government and the States the property might be in danger of being held to be exempt? I do not follow the Senator on that particular point.

Mr. CUMMINS. Mr. President, I do not want to draw into this debate the very difficult and doubtful question of whether the United States can or should compel the common carriers to organize under the laws of the United States as a condition of doing an interstate transportation business. I am not in favor of it myself at this time, and I doubt very much our constitutional power to require it. I am in favor, however, of a permissive national incorporation act. I am in favor of passing a law which will permit not only interstate carriers, but those engaged in interstate commerce, to organize under a law of Congress, because I think the regulation which we desire to impose upon such business can be much more efficiently carried out if they are so organized. If we should pass a statute of that sort—which, I think, marks the real advance upon this great subject—then, if under the Constitution the property of the Federal land bank proposed to be created under this bill is exempt from taxation, or could be exempted from taxation by an act of Congress, all the property of the carriers or the manufacturing establishments or distributing establishments, under such a law of Congress as I have described, would be likewise exempt from State taxation.

Mr. BRANDEGEE. That is the point—why are they exempt in the absence of a statute of Congress declaring them to be exempt?

Mr. CUMMINS. I have just been arguing that Congress has no authority to declare any property exempt; I have been insisting that property which is exempt is exempt because of the constitutional relation between the State and the Federal Government. Now, if that constitutional relation exempts the property of a corporation organized to loan money to a certain class of our citizens, and incidentally to receive now and then deposits from the Federal Government, and act in that way as fiscal agent of the Federal Government, so a corporation organized for the purpose of carrying on interstate transportation and to assist the Government in its official or governmental functions of regulating interstate commerce would also be exempt from all taxation on the part of the State.

Mr. BRANDEGEE. I follow the Senator now. The Senator has answered the question.

Mr. SMITH of Georgia. Mr. President, will the Senator from Iowa permit me to ask him a question?

Mr. CUMMINS. I yield to the Senator from Georgia.

Mr. SMITH of Georgia. I have not been able to hear all of the Senator's argument; but I wish to ask if the line of his thought is not this, that if an exemption exists from State taxation it grows out of the sovereign relation of the United States

to the property, and if there is not a constitutional exemption already existing it can not be created by act of Congress?

Mr. CUMMINS. That is the argument up to this time, and I hope I have established it in the minds of Senators; but I am now considering a still more vital and fundamental question, namely, Is the property exempt under the Constitution? I am now looking at the relation which the Constitution establishes between the State and the Federal Government, entirely removed from any attempt on the part of Congress to declare what property is or what property is not exempt from taxation. I have referred to the beginning of all this train of cases—namely, the decision in McCulloch against Maryland—wherein the Supreme Court of the United States held that the bank notes of the United States Bank were exempt; and I am not going to read again the reasons given in the opinion for that holding. I have just referred to the fact that it was made without any act of Congress. Congress did not think of trying to exempt those notes, because Congress knew, in those days at least, that what was exempt was exempt under the Constitution and not under any construction of the Constitution that it might give in a legislative act. I have also referred to the case of Osborn against The Bank, for that proceeded upon exactly the same theory.

These two cases, followed by many others, established in this country beyond any controversy the proposition that a State can not impede or obstruct or impair or destroy an instrumentality which the Federal Government selects to carry out one of the governmental functions. The way in which my friend from New Hampshire applies that principle to the present bill is that because the Supreme Court, in these cases to which I have referred and many others that are of the same import, held that a State could not tax the circulating notes of the United States Bank, nor could a State tax the franchise, nor the corporation itself that had been organized under Federal law, therefore the State can not tax anything belonging to a corporation created under Federal law any property that it may acquire, no matter what its relation may be to the governmental functions given to it by the act of Congress. It was at this point that I was impressing the Senators with the idea that if that is true, then one great avenue which I hope we will use in the future for the regulation of commerce among the States is absolutely closed to the Federal Government—closed because no one would think for a moment of regulating interstate commerce in that way if it followed that all the property of the agency or the agent was exempted from taxation.

I have instanced two of the cases in which the Supreme Court has held that the State governments can not tax certain instrumentalities or agencies of the Federal Government. There ought to be clearly in the minds of Senators at this point just what it is proposed to exempt from taxation in the bill. The Federal land bank is a corporation organized for pecuniary profit. It is organized to carry on what has hitherto been known as a private business. It is organized to do a business that is just as private in its character as the business carried on by national banks, and a little bit more so, because the governmental functions given to a national bank are broader and more numerous than those given to this bank, probably. I suppose the bill embodies the view of the Senator from New Hampshire with regard to constitutional exemptions—partially, at least. It is claimed that it exempts what I am about to read. I am assuming, of course, that this exemption would follow under the Constitution, if Congress has the power to make it, because I assume that the source of all congressional action is the power conferred in the Constitution.

That every Federal land bank and every national farm-loan association, including the capital stock and reserve or surplus therein and the income derived therefrom, shall be exempt from Federal, State, municipal, and local taxation, except taxes upon real estate held, purchased, or taken by said bank or association under the provisions of section 11 and section 13 of this act.

And the Senator from New Hampshire very candidly and, I think, very fairly stated a day of two ago, in answer to an inquiry of mine, that in his opinion Congress could exempt the real estate just as completely and as effectively as it can exempt the personal property.

I proceed:

First mortgages executed to Federal land banks, or to joint-stock land banks—

That is, all mortgages that are executed to any of these banks are exempt from State taxation—

and farm-loan bonds issued under the provisions of this act—

They are also exempt. That is to say, if this system attains the full growth which its friends believe it will attain, or hope it will attain, there will come a time, I assume, and it will come before long, when there will be outstanding anywhere from five to ten billion of farm-loan bonds, and they are all exempt from taxation.

I proceed further:

And farm-loan bonds issued under the provisions of this act, shall be deemed and held to be instrumentalities of the Government of the United States—

All that I have said with regard to the attempt on the part of Congress to act judicially, instead of legislatively, applies with emphasis and increased force to that phrase. I can not understand the reasoning which clothes the Congress of the United States with the power to declare a given thing an instrumentality of the Government of the United States if it is not an instrumentality. It is a question of fact. It is a question of the office which the farm-loan bonds perform. It is a question of the function which they discharge in this system that is to be created.

Congress can no more declare that they shall be held and deemed instrumentalities, unless Congress has so related them to other operations of the country and of the bank as to make them instrumentalities, than it could declare that they shall be instrumentalities of the passage of mortal man to the streets of the New Jerusalem. It is utterly impossible and illogical.

But I proceed—

and as such they and the income derived therefrom shall be exempt from Federal, State, municipal, and local taxation.

Thus you see that every particle of property either owned or issued by the farm-loan banks or the farm-loan associations is to be exempted not only from State taxation, but from Federal taxation as well. Now, I say I think it is entirely competent for Congress to fail to levy a tax on anything. If it makes its taxes uniform if they are indirect, and if it apportions them if they are direct, then the Federal Government has power to levy a tax on anything or anybody. But it may and it undoubtedly does have the power for the time being to relieve all this property from Federal taxation, but it has no power, as I have said so many times, to affect the right of the State to tax if under the Constitution the State has the right to tax.

In the discussion of the case the other day by the Senator from Utah [Mr. SUTHERLAND] it was questioned whether the opinion of the Supreme Court in the case of Veazie Bank against Fenno was in any way inconsistent with the case of McCulloch against Maryland, and the Senator from Utah stated, and I think stated correctly in that respect, that the profession had never fully acquiesced in the soundness of the reasoning in the Veazie Bank case. I do not differ from the view taken by the Senator from Utah, but I want to point out where the doubtful question is, because the general principle that I have been attempting to sustain is nowhere questioned or impaired in the opinion.

The Veazie Bank case is an instance, as you all know, of the attempt on the part of the United States to tax an alleged instrumentality of a State government. Those who denied the validity of the tax took refuge behind all that had been said by Chief Justice Marshall in the case of McCulloch against Maryland and in the case of Osborn against The Bank and in others that followed relative to the reciprocal exemption of Government instrumentalities, and insisted that Congress could not levy a tax upon the circulation of State banks, inasmuch as those banks were instrumentalities of the State governments, and, therefore, under the well-accepted rule, Congress must abstain from taxation. As a matter of history, of course, the tax was laid not for the purpose of raising a revenue but for the purpose of retiring the State-bank circulation; and that, among other things, was urged against the validity of the tax.

I call the attention of the Senate again to the case in order to show that there was no modification from the rule that had been announced for years by the Supreme Court as to the reciprocal or mutual exemption of instrumentalities of government; and I call attention to it for the purpose of showing what the Supreme Court held to be, in that particular instance, an instrumentality or agency of the State government. I shall not go over the various grounds of defense or attack, but I want to read what the court says upon the point that I have just attempted to state, namely, if the Federal Government can not tax a State instrumentality, why was it permitted to tax the circulation of a State bank?

After a very learned argument upon the question as to whether or not it was a direct tax, and after the conclusion that it was not a direct tax, the court said:

Is it, then, a tax on a franchise granted by a State which Congress, upon any principle exempting the reserved powers of the States from impairment by taxation, must be held to have no authority to lay and collect?

We do not say that there may not be such a tax. It may be admitted that the reserved rights of the States, such as the right to pass laws, to give effect to laws through executive action, to administer justice

through the courts, and to employ all necessary agencies for legitimate purposes of State government, are not proper subjects of the taxing power of Congress.

Reiterating precisely what was said in McCulloch against Maryland in paraphrase. And just here may I ask, Why has not Congress the power to tax State bonds or municipal bonds? The Constitution does not exempt them in terms. It gives no authority to Congress with respect to them; but they are exempt from Federal taxation because they are, and have been held to be, instrumentalities of the State.

I proceed with the quotation from the opinion:

But it can not be admitted that franchises granted by a State are necessarily exempt from taxation, for franchises are property, often very valuable and productive property, and when not conferred for the purpose of giving effect to some reserved power of a State, seem to be as properly objects of taxation as any other property.

But in the case before us the object of taxation is not the franchise of the bank, but property created, or contracts made and issued under the franchise, or power to issue bank bills. A railroad company—

Possibly some Senators may think that the comparison I have drawn between the land bank and the railroad corporation is not accurate and may doubt my view that if the Constitution exempts the property of the one it exempts the property of the other, assuming that both are organized under Federal law; but if so, the Supreme Court has fallen into the same error.

The court says:

A railroad company, in the exercise of its corporate franchises, issues freight receipts, bills of lading, and passenger tickets; and it can not be doubted that the organization of railroads is quite as important to the State as the organization of banks. But it will hardly be questioned that these contracts of the company are objects of taxation within the powers of Congress, and not exempted by any relation to the State which granted the charter of the railroad. And it seems difficult to distinguish the taxation of notes issued for circulation from the taxation of these railroad contracts. Both descriptions of contracts are means of profit to the corporations which issue them; and both, as we think, may properly be made contributory to the public revenue.

That paragraph distinguishes the case of Veazie against Fenno from the case of McCulloch against Maryland. The Constitution of the United States gives to the Federal Government a peculiar authority, an exclusive authority, with respect to money—to the circulating medium, if you like, that is to be used as money—and I can not doubt that it was largely on account of the peculiar office which the bank notes of the United States banks performed with reference to our financial system that the court held that in the case of the United States Bank the power to issue them unimpeded by the action of the States was a governmental instrumentality and could not be taxed by the States, whereas the circulating notes of State banks were not instrumentalities of the State government, and had no more to do with the carrying on of the affairs of the State government than a railroad organized to facilitate transportation among the people.

The Senator from Utah [Mr. SUTHERLAND] a day or two ago read with a good deal of fullness from the case of Union Pacific Railroad Co. against Peniston, in Eighteenth Wallace. In this case the Federal Government had organized a railroad company, or it was organized under a law of the United States; that it performed a governmental function no one will question—a far more important governmental function than will be performed by the land banks to be organized under the pending measure. It is claimed here that Congress can relieve certain property from the State power of taxation. It was not so claimed there. It was claimed, however, that the mere fact of organization under a Federal law, and the mere fact that the railroad company had undertaken to perform certain governmental functions, relieved all its property from taxation at the hands of the States.

Mr. HOLLIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from New Hampshire?

Mr. CUMMINS. With pleasure.

Mr. HOLLIS. Is it not a fact that in the case under discussion that point was not raised, because Congress had failed to act on the subject, and therefore it could not be decided in that case, and no such claim could be made? Here we propose to act.

Mr. CUMMINS. That, Mr. President, is the argument; and I do not treat it lightly at all. It is an argument, however, rather than a statement of fact. It is true that in the case of the Union Pacific Railroad Co. Congress did not attempt to exempt its property from taxation, because Congress seemed to know its business in those days, I am bound to say, better than it appears to know it now. Congress knew that it could not exempt property from State taxation.

Mr. HOLLIS. Mr. President, is it not fair to assume that Congress, even if it thought it had the power, thought it would be poor policy to exempt it? Is not that a fairer argument?

Mr. CUMMINS. That is a very fair suggestion. I agree that even if Congress has the power in such a case to say whether or not property which is created by a corporation organized under Federal law shall be exempt from taxation, it would not be likely to exercise that power. I have no doubt that if the question had ever arisen in the minds of the men who were responsible for that legislation they would have reasoned in that way, because it is so perfectly absurd, when we consider the broad extent of congressional authority with respect to the creation of corporations, to think that as we are taking over, little by little, the private business of the country we ought to exempt from taxation the property which heretofore formed the body of the taxable values of the Nation. I have no doubt that if the question ever did arise in the minds of the men of those days they must have reasoned in the way suggested by the Senator from New Hampshire. But I reiterate that so far as I can ascertain—and I have examined the matter with some degree of care—it was never suggested before that Congress could determine whether given property owned by a private corporation—a quasi-public corporation, if you please, because it has some public characteristics—could be exempted from taxation by the State. But if I have successfully established my initial proposition, which is that if the property is exempt at all it is exempt by reason of the Constitution and the relation which the State bears to the General Government, then all that is said in this case must be considered as applicable.

The justice said:

That the taxing power of a State is one of its attributes of sovereignty; that it exists independently of the Constitution of the United States, and underived from that instrument; and that it may be exercised to an unlimited extent upon all property, trades, business, and avocations existing or carried on within the territorial boundaries of the State, except so far as it has been surrendered to the Federal Government, either expressly or by necessary implication, are propositions that have often been asserted by this court. And in thus acknowledging the extent of the power to tax belonging to the States, we have declared that it is indispensable to their continued existence. No one ever doubted that before the adoption of the Constitution of the United States each of the States possessed unlimited power to tax, either directly or indirectly, all persons and property within their jurisdiction, alike by taxes on polls, or duties on internal production, manufacture, or use, except so far as such taxation was inconsistent with certain treaties which had been made. And the Constitution contains no express restriction of this power, other than a prohibition to lay any duty of tonnage, or any impost or duty on imports or exports, except what may be absolutely necessary for executing the State's inspection laws—

These words must mean something, "the Constitution contains no express restriction of this power," and so forth—

It is, indeed, a concurrent power—concurrent with that of the General Government—and in the case of a tax upon the same subject by both Governments, the claim of the United States as the supreme authority must be preferred; but with this qualification it is absolute.

I need not read further, because I really have, in a very inadequate way, paraphrased in my argument much that is said in the opinion, for I have drawn my conclusions very largely from this opinion. I venture, however, one more paragraph. The court says further:

There are, we admit, certain subjects of taxation which are withdrawn from the power of the States, not by any direct or express provision of the Federal Constitution, but by what may be regarded as its necessary implications.

Implications from what? From the Constitution. Is there anything there which suggests that Congress can add further restrictions, restrictions that are not found in the Constitution, restrictions that are not imposed by the Constitution? I am sure the case is clear on that point.

They grow out of our complex system of government and out of the fact that the authority of the National Government is legitimately exercised within the States. While it is true that Government—

Referring to the Federal Government—

can not exercise its power of taxation so as to destroy the State governments or embarrass their lawful action, it is equally true that the States may not levy taxes the direct effect of which shall be to hinder the exercise of any powers which belong to the National Government. The Constitution contemplates that none of those powers may be restrained by State legislation. But it is often a difficult question whether a tax imposed by a State does in fact invade the domain of the General Government or interfere with its operations to such an extent or in such a manner as to render it unwarranted.

It is, indeed, a difficult question, but who is to determine it? Is Congress to determine it? Is Congress to examine the complicated and delicate relations which certain property may sustain toward the General Government and toward the functions which the General Government is endeavoring to perform in a particular State and say that no tax shall be levied upon this particular property because it impedes or interferes or destroys the exercise of just governmental power in the State?

Says the court, further:

It can not be that a State tax which remotely affects the efficient exercise of a Federal power is for that reason alone inhibited by the Constitution.

Chief Justice Marshall said these things in the case of McCulloch against Maryland. They are rarely quoted, because the opinion is always used, and, naturally, to show the point to

which a State may not go in taxing instrumentalities of the General Government. But this is really a reiteration of what was said in the original opinion.

> To hold that would be to deny to the States all power to tax persons or property. Every tax levied by a State withdraws from the reach of Federal taxation a portion of the property from which it is taken, and to that extent diminishes the subject upon which Federal taxes may be laid. The States are, and they must ever be, coexistent with the National Government. Neither may destroy the other. Hence the Federal Constitution must receive a practical construction. Its limitations and its implied prohibitions must not be extended so far as to destroy the necessary powers of the States or prevent their efficient exercise.

Then the court proceeds at great length to review all the earlier cases, some of which I have already brought to your attention, and it holds that the State can levy a tax upon the property of the Union Pacific Railroad Co., because in so levying the tax upon the property of the company the ability of the company to perform the function which has been intrusted to it by the Federal Government is not destroyed or impaired or seriously impeded; and so the Supreme Court has held over and over again.

I shall not go further with the argument on that phase of the matter, because the Senator from Utah [Mr. SUTHERLAND] set it forth very clearly, and I think conclusively, a few days ago, but I could not resist my inclination to emphasize the propositions laid down by him.

I now want to apply them to this particular instance. We are organizing, or propose to organize, a series of land banks and a series of farm-loan associations. They are organized for pecuniary profit, and they are organized to do a business which hitherto has been carried on by private enterprise. I am in favor of their organization. I think it is a real advance in the science or art of government. What are they to do? They are to take subscriptions to their capital stock; they are to accumulate a capital in that way; they are to loan money, not to the farmers alone but to anyone who may own real property devoted to farming to any extent, limited by one standard alone, as I remember it. Their aggregate loans must not exceed fifteen times the capital and surplus of the land bank. They do all this for the purpose of making 1 per cent upon the aggregate amount of all mortgages which they may take from borrowers. That is their gross profit, and after paying expenses they divide their net earnings among their stockholders, excluding the Government of the United States. Just why the Government is excluded I do not know, nor do I pause to inquire.

These farm-loan banks then issue their obligations known as farm-loan bonds to an amount equal to the aggregate face value of the mortgages which they have taken and which are not already represented by farm-loan bonds, and these securities are offered to the public. The public takes these securities, or is expected to take them, because they furnish a safe and profitable investment. If they bear interest at the rate of 5 per cent or 6 per cent, if they are as stable as the Senator from New Hampshire believes they will be and as I think they can be made, they will be the most profitable and enticing investments offered to investors who do not care to employ their own abilities in the care and increase of their capital.

Such is the province of these banks. All that I have said up to this time contains no element of governmental function. It can not be said that the mere desire to promote the general welfare is a governmental function unless the welfare is promoted through some power and authority given in the Constitution. I have heard it suggested here once or twice that we might pass a law dependent entirely upon the general welfare, but that is not often persisted in.

These banks up to the point I have suggested will not exercise any governmental function, and there would not be a stone of constitutional foundation upon which to build the elaborate structure. But the Secretary of the Treasury is given the authority to deposit some of the public funds in these banks, and they are thereby, as is thought by the distinguished author of the bill, made the fiscal agents of the United States; and I am not disputing that. We all know, however, that is a mere form in order to make the project a constitutional one.

I think there is another slender constitutional hook upon which the great enterprise is hung, but it is as immaterial and as visionary as the one I have already stated. I care nothing about that. I only say that those are the governmental functions. If anyone can satisfy his conscience and judgment that we can exempt all the property of the land bank, the enormous aggregate I have already suggested, because the Secretary of the Treasury may now and then deposit money in the bank, he has an imagination that entitles him to a place not only among legislators but among the poets as well. We all know that our judgment is not convinced by any such reasoning.

I am as well convinced that we have no power as a Congress to exempt any of the property of the Federal land banks from taxation as I am that we have a Constitution at all. I am as well convinced that the property of the land banks used for the purpose of carrying on this business, a laudable and worthy business for the profit of the stockholders and general welfare of the country, is not exempted by the Constitution from taxation on the part of the State as I am that we have a Constitution.

Mr. President, I have just one word more, not upon the legal phases of the section but upon the merits of the section.

Mr. STERLING. If the Senator will excuse me before he passes to the other phase of the discussion, I should like to ask him upon what theory or on what provision of the Constitution he bases the many large appropriations that are made by Congress, as, for example, the appropriations carried by every agricultural appropriation bill affecting particular interests and particular States of the Union?

Mr. CUMMINS. Mr. President, the Congress of the United States has the unlimited power of taxation, and when money comes into the Treasury it can do whatsoever it pleases with it, and there is no one who can question its disposition of the funds in the Treasury. If the question were presented so that rights were involved I think that a great many things that we do are not warranted by the Constitution.

Mr. STERLING. Mr. President, the Senator referred a while ago to the very vague authority conferred by the clause of the Constitution authorizing Congress to provide for the general welfare. I should like to ask the Senator if appropriations such as I have mentioned have not been made under that provision of the Constitution and been held to be justified?

Mr. CUMMINS. I think they have been made under that provision of the Constitution, and I am not criticizing them at all. I am only saying that when we pass a law which affects the rights of the States to tax property within their limits we can not justify the legislation and insist that it is constitutional simply because it is for the general welfare. I am sure the Senator from South Dakota will agree to that proposition.

Mr. STERLING. I might take issue with the Senator from Iowa in the conclusion reached by him in that regard.

Mr. CUMMINS. Possibly so.

I shall now pass to the question of the wisdom or justice, even if Congress has the power to exempt property from State taxation, which I utterly deny. But assuming that it has the power, I now ask Senators whether it is just, fair, and reasonable to exempt this large and growing body of property from the power of the States in the way of taxation? Suppose that the average burden laid upon such property as is here sought to be exempted throughout the country in the way of taxes is 1 per cent. One per cent is perhaps a fair estimate of the average rate of taxation in whatever form it may be imposed throughout the United States. It is proposed by this bill to give the Federal land banks the advantage of 1 per cent not upon the capital but upon the entire value of the property which the banks and associations may own and then upon the entire amount of the obligations which they issue. It is utterly unfair. There is no institution in America occupying the same general field that can withstand competition of that character. One per cent upon the property, the stocks, the bonds that are issued by the farm-loan banks will simply stifle every other loaner of money upon mortgages in the United States. One per cent would be a fair profit, the Senator from New Hampshire says, and I have not yet seen his position answered. I have heard it denied once or twice, but it seems to me he has maintained himself very well. He declares that 1 per cent, representing the difference between the interest upon the mortgages and the interest that the bonds are to bear, will pay all the expenses of the system and return a fair interest or dividend upon all the capital employed. If that is true, I want him to answer this inquiry, if he considers what I have been saying as worthy of an answer, What effect will the 1 per cent upon the entire business, not capital, have upon those who are engaged in a like business?

Mr. HOLLIS. I will be very glad to answer the Senator.

Mr. CUMMINS. I do not ask the Senator to answer now.

Mr. HOLLIS. Otherwise I am afraid that I shall forget it.

Mr. CUMMINS. I am going to sit down in a few moments; I am rather weary; and I would infinitely rather hear the answer when the Senator comes to reply.

Mr. HOLLIS. Very well.

Mr. CUMMINS. I assert that with such advantage there is no rivalry and can be no rivalry with the farm-loan bank. It is an advantage never before given to any class of people in the United States. It is an unjust discrimination that will not be defended by the men in whose behalf I know the Senator from New Hampshire thinks he is so faithfully laboring. If I were compelled to admit, if I could admit in conscience, that the

farmers will get the benefit of the 1 per cent, I still would oppose it.

Mr. SMITH of Georgia. Will the Senator allow me? The farmer puts up his mortgage and that goes as a collateral for the farm loan. If the 1 per cent were charged first on the farmer's loan and then 1 per cent on the bonds issued, that would be 2 per cent. The farmer gets the money; he puts it into the ground, and pays taxes on it there. If you allowed the 1 per cent in both these other places, would you not really be taxing the farmer 3 per cent instead of 1 per cent and would you not have to add that 2 per cent more to the interest?

Mr. CUMMINS. No; that would not be true. There are instances of double taxation in this country; but the farm-land banks would no more have to pay double taxation than any other institutions which do business of the same kind. It may be that in the long run the farmer would receive some benefit from the exemption from taxation. He would receive it only, however, as it was doled out to him by the investors in the farm-loan bonds; and I venture to say that they will take it all. I venture to say that they will never give the farmer any benefit whatsoever of the exemption from taxation. I have never known capital so tenderhearted, so self-sacrificing, and so unselfish as to be willing to pass on a profit if ingenuity could arrest it in the pockets of the capitalists; and there it will be arrested in this particular instance.

Mr. President, when the farmer gives a mortgage upon his farm, in justice he ought not to be compelled to pay taxes upon more than the residue of the value, and the mortgagee should pay the taxes upon that part of the value of the farm represented by the mortgage. That is so in some places. It will be so in every place just as rapidly as justice can take the place of injustice and as intelligence can occupy the seat of ignorance. I am sorry to say that it is not so everywhere. But what is proposed here is that a capitalist of New York City who wants to buy a million dollars of the farm-loan bonds—because with the exemption from taxation we are providing they will be altogether the most attractive investment ever presented to the American people—is not taxed at all; and under any defensible system of taxation, if the City National Bank, of New York, or Kuhn, Loeb & Co., or any other of the great financial institutions desire to invest their capital in this very fascinating and profitable form, ought they not to pay taxes on their wealth? They would not have to return it even in their income accounts. These farm-loan bonds would pay them a million dollars interest a year, and they would exempt it even from their income returns; and thus, whatever may be eventually the aggregate amount of all the farm-loan bonds in the hands of capital, not in the hands of farmers, there will be that capital segregrated from all other capital and exempted from taxation. It is unjust. It will destroy the system just so sure as it remains a part of it.

The only defense that is offered for it is that when these capitalists come to determine upon what rate of interest they will take the farm-loan bonds they will recognize the exemption from taxation and kindly say to the farmer, "We will reduce your interest 1 per cent, because the securities that are now offered are not subject to taxation." If that is the prediction the Senator from New Hampshire makes with regard to the operation of this bill, I hope from the bottom of my heart that his prediction will be fulfilled, because if we are to do this unjust thing, if we are to separate one class of the people of this country from all others and say they shall not be taxed and that all others shall, if the man who gives the mortgage on his home in the city or in the town is compelled to pay his tax and his farmer friend is relieved of his—if that is to be the system installed in this country, it at least has the advantage of conferring a special privilege upon most deserving people.

Mr. President, I have said that I do not think the farmers believe in special privilege. I do not believe they are applicants at the hands of Congress for any advantage over their fellow men. I think they are men who stand on their own feet; men who are able to conduct the affairs of life with as much success and with as much intelligence as are any other people of the country; but I am frank to say that, if my friend from New Hampshire and his associates are determined to batter down the walls of the Constitution, are determined to usurp an authority that Congress has never in its 125 years of existence attempted to assume, I am glad they are doing it under that very attractive name—the agriculturists. The Senator would not dare to do it in any other name; he would not dare to do it in the name of any other class of people in the land. May I tell him that I know vastly more about the farmers than he can know, for I live in a State of real farmers; I live in a State that produces nearly every year a greater agricultural product than does any other State in the Union. As to the farmers of that community, if they are allowed to secure the advantage over their fellow men which this bill proposes, it may silence their scruples and they may pocket the profit, but they nevertheless will feel, and the Senator from New Hampshire will know that they will feel, the injustice which he has inflicted upon the unfortunates who are required to pay the taxes which should be raised upon these bonds owned not by farmers but by bankers.

Mr. HOLLIS obtained the floor.

Mr. STONE. Mr. President, will the Senator from New Hampshire yield to me for a moment?

Mr. HOLLIS. I yield to the Senator from Missouri.

Mr. STONE. Mr. President, I am not sure whether or not it is permissible, under the rules while this bill is pending, to offer a motion on another subject. I will state the motion and the Chair can rule upon it.

On April 29 a bill was introduced by the Senator from Wisconsin [Mr. LA FOLLETTE] entitled "A bill (S. 5796) to authorize the Director of the Bureau of the Census, under certain conditions, to prepare and distribute blank ballots and to receive and count marked ballots and report to Congress the result of an advisory vote. That bill was referred to the Committee on the Census, as neither the Presiding Officer nor the Secretary could tell from the title what the substance and meaning of the bill might be. Clearly it was wrongly referred. I wish now to enter a motion to discharge the Committee on the Census from the further consideration of the bill, being Senate bill 5796, and to refer the bill to the Committee on Foreign Relations.

Mr. SMITH of Georgia (to Mr. STONE). Why can it not be done by unanimous consent?

The VICE PRESIDENT. The motion is in order, but it will be compelled to lie over a day, if there be any objection.

Mr. SMITH of Georgia. I suggest to the Senator from Missouri that he ask unanimous consent.

Mr. STONE. It has been suggested that I ask unanimous consent to have this done, but I hardly think that would be fair. The Senator from Wisconsin especially asked, as I am told, to have this bill referred to the Committee on the Census, and he is not now present. I know that under the rules the motion will lie over until to-morrow, but I wish the motion to be entered at this time.

The VICE PRESIDENT. The motion will lie over until to-morrow, unless it is taken up now by unanimous consent.

Mr. HOLLIS. I ask unanimous consent that that be done, Mr. President.

The VICE PRESIDENT. Is there objection?

Mr. JONES and Mr. CHILTON addressed the Chair.

Mr. OWEN. Let it go over, Mr. President.

Mr. CHILTON. Mr. President, I shall have to object, under the circumstances, the Senator from Wisconsin being absent.

The VICE PRESIDENT. Then the motion goes over until to-morrow.

Mr. HOLLIS. Mr. President, I am tremendously relieved and reassured by the argument of my distinguished friend from Iowa [Mr. CUMMINS]. I know he has gathered together all that can be said against the exemption from taxation features of this bill, both on the ground of policy and on legal grounds. I wish to answer, first, as to the questions of policy.

The Senator from Iowa says I would not dare to propose an exemption in favor of any other class but farmers. I remind the Senator that not only I dare, but he himself dared to make a similar exemption, not only in favor of farmers, but in favor of labor unions, in the Clayton bill, when those unions were exempted from the provisions of the antitrust law. Class legislation does not bother the distinguished Senator from Iowa any more than it bothers me. There is nothing in the Constitution against class legislation; there is nothing in a sound public policy against class legislation. That is a bogy that is conjured up now and then by constitutional lawyers who want to scare somebody. We are passing class legislation all the time. The only question is, Is such legislation sound; is it wise class legislation?

When we find the farmers of the country paying exorbitant rates of interest, we know that they ought to be relieved. We do not give the same exemptions to men who live in cities, because in cities there are ample banking facilities. The men who own homes in the cities get their money at a very low rate of interest. Therefore there is a sound public policy that directs us to relieve the farmers in the present exigency. When there is a similar situation shown as existing among any other class I shall gladly extend to them the benefits of this bill or of any other provision that is needed.

The Senator says that if such mortgages are exempt from taxation it will not have the result of lowering the rate of interest to any substantial extent. The Senator is entirely

wrong about that. In my own State we have made that exemption within a few years, and it has had exactly the result that was anticipated. A few years ago New Hampshire passed a law exempting from taxation all mortgages on New Hampshire real estate where the rate of interest was 5 per cent or less. Previous to that time the prevailing rate of interest in New Hampshire was 6 per cent, but immediately the rate was lowered to 5 per cent, and now the average rate of interest in New Hampshire is 5.3 per cent, even on farm loans. So the farm did get the entire result of that exemption. If all loans made on New Hampshire real estate at 4 per cent or less were exempt from taxation, the rate would drop to 4 per cent. That has been demonstrated time and time again.

Why do we have these mortgages and these Federal land banks and these bonds exempt from taxation? Simply because we want to have a uniform rate so far as that is possible over the United States. In Utah they have had the same experience as we have had in New Hampshire. Formerly they taxed mortgages on real estate, and the taxes were frequently 3 and 4 per cent, but as people wanted to own mortgages on Utah real estate, they transferred the title to some trustee or agent outside of the State. You can not reach mortgages and bonds successfully in that way. About seven-eighths of them usually escape taxation; but when in Utah they are already exempt from taxation, while in some adjoining States they are not, we do not want to extend the benefits of this system to those adjoining States, and give them the advantage of it, and at the same time allow them to tax mortgages. We want to have a broad, national system, and we want the system to be applied under universal conditions.

Another reason is that, as has been pointed out very wisely by the Senator from Georgia, if you allow the farmer to be taxed on his land, then his mortgage to be taxed, and then the bonds to be taxed, you will have a triple taxation on him. It is like an illustration I heard of about the way the protective tariff works. We boys used to go out and recite and sit on a settee in front of the teacher. A big boy at one end of the settee would pinch the boy next to him and tell him to pass it on, then that boy would pinch the next one and tell him to pass it on, until they got to the little fellow at the end of the settee, who got the biggest pinch, and he did not have anyone to pass it on to. [Laughter.] So it would be here. The farmer would get all the taxes and he could not pass them on. Therefore it is necessary to make this exemption.

Another reason for making the exemption is this: We are giving very substantial aid under this bill, and we ought to do so; we have a right to do so. In the first place, we are advancing $6,000,000 to set these banks up in business, and we would be very foolish to permit the State or anyone else to tax the capital that we advance. We are providing that the Treasury may come to the temporary relief of these land banks to the amount of $6,000,000 a year, and we would be very foolish to allow these instrumentalities to be taxed when we extend that aid. We are paying the salaries of the various officers, so that the farmer may get cheap money; and the only way we can guarantee that he will get the benefit of it is to exempt these instrumentalities from taxation.

The private joint-stock banks, which will do a private business just like the existing national banks, do not have their capital stock exempt from taxation. They are treated just like the ordinary national bank. It is true they are in private business, but so is the ordinary national bank. So much for the policy of the exemption.

It would be futile—it would be useless—to pass this law unless we had given these investments a distinct advantage over other investments. They will have it; they ought to have it; and if this bill is passed, they will get it.

Now, a word as to the constitutional features of the bill. The Senator from Iowa bases his whole argument on the proposition that if the property is exempt from taxation it is exempt solely under the Constitution, because it belongs to the United States. I hope the Senator will give me his attention for a moment. The Senator from Iowa says that the reason property of this kind has been exempted from taxation in the past is because the Constitution requires it and not because a statute has been passed that permits it. He says that Congress in the days when they handled these subjects knew something—and he looked at me in rather a striking way. Well, they did know something. They knew enough to exempt these things from taxation, and they have done it. I am very much surprised that so distinguished a lawyer and so careful a stateman as is the Senator from Iowa, should have overlooked these facts that are common knowledge.

What is more the property of the Government than the Treasury notes it issues? But in the bank act passed February 25, 1862, it was provided that—

> All stocks, bonds, Treasury notes, and other obligations of the United States shall be exempt from taxation by or under State or municipal or local authority.

Oh, wise men exempted from taxation by statute the bonds, Treasury notes, stocks, and other obligations of the United States, and the Senator from Iowa knows perfectly well that they did not have to do it, but that the court would have done it for them if they had overlooked it; but they did not overlook it.

Mr. OWEN. Mr. President——

Mr. HOLLIS. I yield to the Senator from Oklahoma.

Mr. OWEN. Who got the benefit of that exemption from taxation?

Mr. HOLLIS. Why, the people who used those instrumentalities, of course; the ones who invested in them; and that was intended to be so, to give them a preference, so that the Government could get money on favorable terms. It was done for that purpose; and the wise Congress of those days, which contained real men—men who knew something; who knew how to draft a law—exempted them from taxation. If the Senator from Iowa had been there he would not have permitted such a foolish thing.

Now, assume that the Senator from Iowa is correct; assume that the property of the United States is exempt from taxation; assume that these are instrumentalities of the United States and would be exempt from taxation without the intervention of any statute or judicial decision, would we not be foolish not to declare our intention, so that when the farmers read this bill they would find out that these instrumentalities were exempt from taxation and so that investors would know from the act itself that they were exempt from taxation, and would not have to write to the Senator from Iowa or the Senator from Utah to find out whether they were exempt or not.

We are continually declaring common-law principles in statutes; we are continually declaring things that are in the Constitution just to put our moral strength and weight back of them; and it will have some effect on the Supreme Court of the United States even if it were not necessary that we should do it in this instance.

I ought to add on the question of policy, that if we do not exempt these instrumentalities from taxation, then the States can tax them out of existence, just exactly as we taxed out of existence the bank notes issued by the State banks. We lay ourselves open to that danger. If there is hostility to this act in Iowa, Iowa may put a 10 per cent tax on the mortgages and bonds and drive the system out. We must have the exemption in order to protect this system. Anybody can see that.

Now, as to the constitutionality of the provision. It would be very delightful to follow the Senator into the questions concerning the Pacific Railroads, the case where the Government acquired some land in Tennessee and owned it and did not have to pay taxes on it, or into the compacts which have been made between recently admitted States and the United States; but it is not necessary to do so. All that is contained in the decisions of the Supreme Court of the United States on exactly similar subjects.

The Senator has referred at some length to McCulloch against State of Maryland. That case was followed by other cases that place this whole matter beyond doubt, and which squarely answer the elaborate argument made by the Senator this afternoon.

First, McCulloch against State of Maryland, Fourth Wheaton, 316, held that the States could not impose a tax on bank notes issued by the United States bank which the Government had established. That was followed by Weston against City Council of Charleston, Second Peters, 449, which held that there was no right of a State to tax the stock of the United States—they called it "stock" in those days instead of "bonds." That was followed by the Bank of Commerce against City of New York, Second Black, 620, where the capital of a bank invested in United States stock was held not taxable by the State. That was followed by Van Allen against The Assessors, Third Wallace, 573, holding that the tax on national banks should not be greater than the tax on State banks. I will return to that case. That was followed by Veazie Bank against Fenno, Eighth Wallace, 533, holding that the United States may tax bank notes not issued under its authority; and then by Farmers' National Bank against Dearing, Ninety-first United States, 29, sustaining the national-bank act on the authority of McCulloch against Maryland.

In the case of Van Allen against The Assessors exactly the same point that was raised by the distinguished Senator from Kansas [Mr. THOMPSON], and to which the Senator from Iowa promised to address himself, but which he overlooked, was squarely raised and squarely decided against the contention of the Senator from Iowa. In the Van Allen case the State of New York undertook to tax shares of stock of national banks when it had not passed laws taxing the shares of State banks. The question of the constitutionality of that provision was squarely raised and the court covered the whole subject. The court first told of the privileges which were conferred upon the national banks, and then proceeded in Third Wallace, page 582, as follows:

> In the granting of chartered rights and privileges by government, especially if of great value to the corporators, certain burdens are usually, if not generally, imposed as conditions of the grant. Accordingly we find them in this charter. They are very few, but distinctly stated.

That is, when the Government of the United States grants a charter to a group of persons to enable them to exercise certain privileges, it may annex to those privileges such conditions and burdens as it pleases, and in the case of the national banks these were the conditions it annexed:

> They are, first, a duty of one-half of 1 per cent each half year upon the average amount of its notes in circulation; second, a duty of one-quarter of 1 per cent each half year upon the average amount of its deposits; third, a duty of one-quarter of 1 per cent each half year on the average amount of its capital stock beyond the amount invested in United States bonds; and, fourth, a State tax upon the shares of the association held by the stockholders, not greater than assessed on other moneyed capital in the State, nor to exceed the rate on shares of stock of State banks.

That is, if a group of persons desired to incorporate a national bank they might do so, and its shares would be exempt from State taxation, unless the State imposed a similar tax on the shares of State banks.

Mr. CUMMINS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Iowa?

Mr. HOLLIS. I yield.

Mr. CUMMINS. I interrupt the Senator from New Hampshire rather to make an apology to the Senator from Kansas [Mr. THOMPSON] than to answer the argument which the Senator from New Hampshire is now making. I ask the Senator from Kansas to believe that I intended to give attention to the act of of Congress of 1862 relative to the taxation of shares of stock in national banks. I had it in my notes, but I omitted it unintentionally, and I owe him an apology for not fulfilling my promise to give my view of that statute. If the Senator from New Hampshire will allow me to do it now, I will do so just in a word, and he need not sit down.

There is no attempt in that statute to declare that the property of the national banks shall not be taxed by the State. There is simply a provision that the shares of stock of national banks shall not be taxed more severely or heavily than other moneyed capital in the State in which the bank is located. The Senator from New Hampshire will remember that a day or two ago I asked him whether the rule established by that statute would not have been the rule even though no statute had been passed upon the subject, and the Senator from New Hampshire very frankly said that, in his opinion, the rule would have been the same; that is to say, that discrimination upon the part of a State in taxing a national bank would be conclusive evidence of an intent to impede or obstruct or destroy this instrumentality of the Federal Government.

I state this view now to fulfill my promise to the Senator from Kansas, for I ought to have given attention to the subject and to the case which the Senator from New Hampshire is now reading while I was before on my feet.

Mr. HOLLIS. Mr. President, if I did the other day agree with the Senator from Iowa in what he has just said, it is quite evident that neither of us agreed with the Supreme Court, as I shall proceed to demonstrate. The cases hold that where property does belong actually to the State, as if it belonged to a private person, the Government can not tax it; and where property does belong to the Government, and is its own particular property, as if it belonged to a private person, the State can not tax it. That sets up State property and Government property; but between the two there lies all the field of property which is held by corporations erected by the State and corporations erected by the Nation. When the Government occupies a field which the Constitution permits it to occupy it may occupy it exclusively of State occupation, or it may occupy it with such conditions as it chooses through its Congress to impose. That is what was decided in the case of Van Allen. Exactly the argument which was made by the distinguished Senator from Iowa was made in the Van Allen case by very distinguished men, but the court, in an opinion by Mr. Justice Nelson, brushed it aside in a paragraph as hardly worthy of consideration, in these words—and this is the argument of the learned Senator:

> It is said that Congress possesses no power to confer upon a State authority to be exercised which has been exclusively delegated to that body by the Constitution.

That is the Senator's argument, that if the Constitution has given Congress the right to handle it, if it has given exemption from taxation, Congress can not touch it. I will repeat that—

> It is said that Congress possesses no power to confer upon a State authority to be exercised which has been exclusively delegated to that body by the Constitution, and, consequently, that it can not confer upon a State the sovereign right of taxation; nor is a State competent to receive a grant of any such power from Congress.

That is, the Senator argues that if we are setting up an instrumentality of the United States in these Federal land banks, if they are actually an instrumentality of the United States, they are exempt from taxation under the Constitution, and we can not permit a State to tax them. That is his proposition. Continuing, the court says:

> We agree to this. But as it respects a subject matter over which Congress and the States may exercise a concurrent power, but from the exercise of which Congress, by reason of its paramount authority, may exclude the States, there is no doubt Congress may withhold the exercise of that authority and leave the States free to act. An example of this relation existing between the Federal and State Governments is found in the pilot laws of the States and the health and quarantine laws.

That is found on page 585.

Therefore if we have a right to establish this instrumentality to help out a proper governmental function, then we have a right to annex to it such conditions of taxation in favor of the States or such exemption from taxation in favor of the instrumentality as Congress, in its discretion, as a matter of policy sees fit to impose. There can not be any escape from that.

The land banks are just like the national banks. What part of the activities of the average national bank is a Government function? There are over 7,500 of them, and there are not, I was going to say, a half dozen out of the lot that ever perform a Government function. Their constitutionality is not rested at all on the right to issue currency. As I pointed out the other day, if it were, then the farm-loan bonds are just as much currency as are the bank notes. Neither is legal tender, and the original bank notes bore interest, just as the farm-loan bonds bear interest. The man who borrows money of a national bank is not performing a Government function; he is not helping the bank to perform such a function, and the bank is not performing one, and so when we are loaning to farmers and issuing sound investments we are not performing a Government function. The only Government function is the right to act as Government depositaries and as fiscal agents, when required, and that is the only Government function that the national banks perform; but if the Government allowed the State to impede and hinder or even destroy this Government instrumentality by taxation, then they would be unfitted and unable to perform Government functions when they were called upon to do so. In order to allow these banks to exist we must pass laws that will allow them to be profitable, so that they can exist, and in order to allow them to be profitable we exempt them from taxation. We have established them to perform a Government function when required to do so, and we have annexed to their charter such conditions as we in Congress as a matter of policy and in the exercise of sound discretion think are proper and wise.

Mr. SUTHERLAND. Mr. President, before the Senator takes his seat, may I ask him a question?

Mr. HOLLIS. Yes.

Mr. SUTHERLAND. Does the Senator from New Hampshire think that whenever Congress has the power to create a corporation, it has the power to exempt from State taxation the property of that corporation?

Mr. HOLLIS. That has not been decided. We do not have to go as far as that. It never yet has been held that Congress can establish a corporation unless it is done to carry out some constitutional purpose. The other day there went through Congress an act establishing the American Society of Arts and Letters, I think. I doubt if that is constitutional, although it may be. But if Congress does, in its wisdom, establish a corporation to carry out one of its constitutional powers, either express or implied, it may annex to it any condition that it chooses in the way of exemption from taxation or other privileges.

That is my answer.

Mr. SUTHERLAND. It may attach any condition it pleases to the corporation; but it does not follow that it can attach any condition it pleases to State action upon the corporation.

Mr. HOLLIS. The Senator asked me my idea. My idea is just that. He entertains another view, as I am well aware.

Mr. SUTHERLAND. The Senator would not say, for example, that if Congress creates a corporation in the District of Columbia—which it has power to do—it could exempt the real estate of that corporation, situated in the States of Illinois, from taxation by the State?

Mr. HOLLIS. Oh, not at all, because that is done under an entirely different idea. We act as a legislature for the District of Columbia; and Congress could exempt that from taxation, I believe, if it chose, just as the Legislature of New Hampshire exempts manufacturing establishments from taxation for a series of years. I think it might; but it would not have any connection with this, because this law is based upon the right to establish Government instrumentalities under an implied or express power of the Constitution; the other is a local legislature, acting for local objects.

Mr. SUTHERLAND. Mr. President, I discussed this question at some length a day or two ago, and I do not desire at this time to go over the argument which I then made; but I want to say a word or two in addition to what I then said, and particularly with reference to the suggestions which were made to-day and the other day by the Senator from New Hampshire [Mr. HOLLIS].

I have no doubt that when Congress creates an agency through which it undertakes to have discharged a governmental function it may exempt from taxation the operations of that agency in so far as they have reference to the discharge of that governmental function, or its property in so far as that property has relation to its governmental function; but I deny utterly that Congress has the power to create an agent or an agency of the Federal Government and to exempt from State taxation the property of that agency which has no connection whatsoever with the governmental function which it is authorized to discharge. I think that is the effect of the decision of the Supreme Court, both in the McCulloch case and in the case of Osborn against The United States Bank.

Mr. HOLLIS. Mr. President, does not the Senator overlook the fact that in neither of those cases did Congress act? They were solely under the Constitution. He has no case in which Congress has acted and where the Supreme Court has held that Congress can not do it. There is no such case.

Mr. SUTHERLAND. No; I have not overlooked that at all. I discussed the question the other day. In the act creating the Bank of the United States it is true that there was no specific provision exempting anything from the operation of State taxation; but the reasoning of the court shows, to my mind, conclusively that it would have made no difference. Congress in creating the United States Bank might have provided that the notes issued by the bank should not be subject to State taxation, and that would not in any manner have altered the rule. That would simply have declared the rule. But I undertake to say that if Congress in that act had provided that the real estate of that institution, the capital stock of that institution held by citizens of the State of Maryland, should be exempted from State taxation, taking the decision of the Supreme Court in the two cases I have referred to, the Supreme Court would not have upheld that legislation.

I read some paragraphs from the decision in the McCulloch case, but I did not at that time have before me the decision in Osborn against the United States Bank. I have it now, and I call attention to what the court says at the very beginning of its discussion of this particular question, at page 859 of Ninth Wheaton, where the decision is found. The court says:

7. Is that law unconstitutional?

This point was argued with great ability, and decided by this court, after mature and deliberate consideration, in the case of McCulloch against the State of Maryland. A revision of that opinion has been requested; and many considerations combine to induce a review of it.

The foundation of the argument in favor of the right of a State to tax the bank is laid in the supposed character of that institution. The argument supposes the corporation to have been originated for the management of an individual concern, to be founded upon contract between individuals, having private trade and private profit for its great end and principal object.

Now, observe; the court says that the argument in favor of the power of the State to tax presupposes that the corporation is organized for the management of an individual concern "having private trade and private profit for its great end and *principal* object."

If these premises were true, the conclusion drawn from them would be inevitable. This mere private corporation, engaged in its own business, with its own views, would certainly be subject to the taxing power of the State, as any individual would be.

They put it upon exactly the same ground. The State would have the same power to tax such a corporation as it would have power to tax an individual.

Mr. HOLLIS. Mr. President, that is because Congress did not exempt it, of course; but we are going to exempt these. The Senator's case does not hit this case.

Mr. SUTHERLAND. I know that the Senator has said that two or three times; but repetition, in my judgment, does not add to the strength of the assertion.

Mr. HOLLIS. But I am obliged to meet repetition with repetition. That is the only way to meet it.

Mr. SUTHERLAND. Mr. President, I was not repeating anything. I was reading the language of the Supreme Court. The Senator seems to think the language of the Supreme Court does not agree with what he has said. I repeat, the language is that of the court.

This mere private corporation, engaged in its own business, with its own views, would certainly be subject to the taxing power of the State, as any individual would be.

Let me pause here long enough to say, with reference to that language, that I think even the Senator from New Hampshire would not claim because an individual was constituted an agency of the General Government—as, for example, the Attorney General, a Justice of the Supreme Court of the United States, or a justice of any other court—that Congress would have the power to exempt from State taxation the real estate of that official lying within the limits of a State; and the Supreme Court of the United States in this decision seemed to put the two things upon exactly the same ground. The court says:

And the casual circumstance—

Now, let me pause to emphasize that—

and the *casual* circumstance of its being employed by the Government in the transaction of its fiscal affairs would no more exempt its private business from the operation of that power than it would exempt the private business of any individual employed in the same manner.

All the way through the court puts the two propositions upon the same ground, and it is difficult for me to see how any distinction can be made between the two cases. Because Congress creates a corporation and provides casually, as it does in this bill, that it may operate to discharge some function of the Federal Government, to say that it may exempt the property of that corporation from taxation is no different in principle, it seems to me, than to say that where it authorizes an individual to discharge some function it may exempt his property from taxation.

Now, taking the test of the case from which I have read, what is the principal purpose for which these Federal land banks are organized? Why, it is to loan money to the farmers. Nobody pretends that there is any other purpose that it is expected will be carried into operation. The language of that provision of the bill which looks to the discharge of Federal functions upon the part of this bank, found in section 6, is:

That all Federal land banks and joint-stock land banks organized under this act, *when designated for that purpose by the Secretary of the Treasury*, shall be depositaries of public money, except receipts from customs—

And so on.

Mr. HOLLIS. Mr. President——

Mr. SUTHERLAND. Just a moment. So in the last analysis it depends upon the will of the Secretary of the Treasury whether this organization shall operate as a governmental agency or not. The law leaves it to the Secretary of the Treasury *casually* in his discretion to say that one particular bank shall discharge the governmental function and another bank shall not.

Mr. HOLLIS. The distinguished Senator is now quarreling with the national-bank act, because there is exactly the same provision in that act, and we have copied this one directly from the national-bank act. If a national bank is a Government depositary and fiscal agent under the Constitution, then this bank will be.

Mr. SUTHERLAND. I am not quarreling with the national-bank act at all. I am quarreling with this act.

Mr. HOLLIS. But that is the provision of the national-bank act on which its constitutionality depends.

Mr. SUTHERLAND. Not alone with reference to that particular feature.

Mr. HOLLIS. Yes.

Mr. SUTHERLAND. But it was, for example, through the instrumentality of the national banks, which are banks of issue, that the Government expected to negotiate and dispose of its bonds.

Mr. HOLLIS. Well, it is the same in this act, too—just the same. It provides for disposing of its bonds.

Mr. SUTHERLAND. But, as the Supreme Court has said in the case I have read, it is not a principal object; it is a casual thing:

Shall be depositaries of public money, except receipts from customs, under such regulations as may be prescribed by said Secretary; and

they may also be employed as financial agents of the Government; and they shall perform all such reasonable duties, as depositaries of public money and financial agents of the Government, as may be required of them.

So it is left entirely to the Secretary of the Treasury.

Mr. HOLLIS. There, again, the Senator wants to get it right. He hurried over the last part. He slurred that. The last part, giving them power to act as fiscal agents for the Government, is not at the discretion of the Secretary of the Treasury. They shall be, when called upon. That is also just like the national-bank act.

Mr. SUTHERLAND. Why, no, Mr. President; the Senator is mistaken about it. I did not slur it over. I will read it:

And they shall perform all such reasonable duties, as depositaries of public money and financial agents of the Government, as may be required of them.

Mr. HOLLIS. Yes; but the other provision, which the Senator did slur over, makes them financial agents.

Mr. SUTHERLAND. Oh, no. I have read every word down to that point.

Mr. President, what has the Senator to say with reference to the national farm-loan association? The property of that association is exempt from taxation, under the terms of the law, the same as the property of the Federal land bank. What function of the Government is it contemplated that that association shall discharge?

Mr. HOLLIS. Why, exactly the same as the cashier or receiving teller acting for the national bank in doing the business of the bank.

Mr. SUTHERLAND. Oh, no, Mr. President.

Mr. HOLLIS. Why, certainly. The Senator can not brush it aside in that way. It is provided that the Federal land banks shall place their funds in and collect their money through the loan association, just as the national banks would do through their cashiers and receiving tellers.

Mr. SUTHERLAND. Mr. President, I hope the Senator from New Hampshire will study his bill a little more closely than he appears to have done when he makes that rejoinder.

Mr. HOLLIS. If the Senator thinks I have not studied this bill tolerably closely, he is very much mistaken. I should be very glad to pass an examination on it.

Mr. SUTHERLAND. I am undertaking to point out one particular, at any rate, in which the Senator is mistaken in his construction of his own bill. This national farm-loan association which is contemplated by the bill is an association organized for the benefit of the farmers. It is an organization which is called into existence to enable them to secure loans from the land banks and, perhaps, from the joint-stock banks as well. I do not remember the exact powers about that.

Mr. HOLLIS. And the officers and agents of any bank are for the purpose of permitting people to get loans through them.

Mr. SUTHERLAND. Mr. President, ordinarily I do not object to the Senator's interruptions, but I should like to complete the statement I am making, and then I have no objection to the Senator asking me questions, if he desires to do so.

As I read this bill, this national farm-loan association is a wholly separate and distinct organization from the Federal land bank. It may hold property of its own separate and distinct from the land bank. It does not discharge, and it is not contemplated that it ever will discharge, any governmental function whatsoever. It acts at most only as an intermediary between the person who desires to make a loan and the bank from which the loan is sought. It is precisely the same as if there should be an organization of a similar character made in a State to-day to facilitate the dealing of a class of persons, like farmers, with the national banks. The authority of Congress would not be needed in order to make that kind of an organization; but if Congress did authorize it, if Congress authorized by legislation now the organization of a national farm-loan association within a State to which the farmers could subscribe stock and through which they could facilitate making loans from the national banks, that would not make it a governmental institution, according to my view of it; but section 29 of this bill proposes to exempt from taxation the property of that loan association, as well as the property of this Federal land bank.

Now, just a word further with reference to the statement made by the Senator the other day in response to the argument which I made.

The Senator, in the course of his argument, on page 7939 of the RECORD, said:

At this juncture let me call attention to another point which has evidently been overlooked by the distinguished Senator. He has discussed the occupation of a field of taxation by a State and its occupation by the United States, and says that where one has acted the other is excluded. In the railroad cases which he cited the Government of the United States did not act on the question of taxation. The Government set up the instrumentalities to conduct commerce between the States and to transport armies and ammunition, but it did not undertake to occupy the field of taxation so far as those instrumentalities were concerned.

In the present bill the distinguished Senator from Utah would not himself undertake to occupy that field of taxation, and, if he did not, undoubtedly the State would be left free to occupy it; but where the Government, acting under a sovereign power, does undertake to occupy a field, it occupies it for all purposes and excludes the States from it.

Mr. President, that is true with reference to some subjects, but it is not true with reference to the subject of taxation. The Government of the United States and the State may occupy exactly the same field. The Government of the United States may tax a particular species of property or a particular activity and the State may tax the same identical property and the same identical activity. The only advantage which the Government of the United States has in that case is that if it has imposed a tax upon a species of property which is also taxed by the State, the claim of the Government of the United States must be satisfied first, and it is only to that extent that it excludes in any way the operation of the State. But the two Governments often tax the same things. We are imposing a tax upon incomes, and many States have imposed, and all States have the power to impose, a tax upon incomes. We may impose a tax upon a particular species of property and the State may impose a tax upon that same property. But because the law of the United States, by the terms of the Constitution itself, is paramount, the claim of the United States must be first satisfied; but the State is not excluded from the field of taxation because Congress has spoken upon it.

Mr. SMITH of Georgia. Mr. President, will the Senator let me ask him a question?

Mr. SUTHERLAND. I yield to the Senator from Georgia.

Mr. SMITH of Georgia. I missed part of his argument the other day, and although I have read it, I may not have gathered exactly his position. Does the Senator concede that Congress can exempt from taxation the property, of every kind, of a national bank?

Mr. SUTHERLAND. No, Mr. President. I do not think Congress can exempt from taxation the property, of every kind, of a national bank. I do not think it could have excluded the property, of every kind, of the United States Bank, although that question did not arise in those cases.

Mr. WALSH. Mr. President, will the Senator kindly indicate what kind of property of a national bank he thinks Congress could not exempt?

Mr. SUTHERLAND. If a national bank acquire personal property—cattle, horses, sheep—the same kind of property owned by citizens of the State and liable to taxation, I think that property would be liable to taxation; and I do not think Congress would have the power to exempt that species of property from taxation.

Mr. WALSH. Does not the Senator believe that that kind of property is exempt now to the national banks? Suppose, for example, a national bank foreclosed a mortgage, and took in some personal property, some cattle. Does the Senator believe that the local State authorities would have the right to list those cattle for taxation, the same as they would mine and his?

Mr. SUTHERLAND. That would be my judgment, Mr. President.

Mr. SMITH of Georgia. Is the real estate of a national bank exempted from taxation now?

Mr. SUTHERLAND. I think not.

Mr. SMITH of Georgia. I do not so understand.

Mr. HOLLIS. I have the national-bank act right here; and the Congress expressly permitted it to be taxed, containing the implication that if they had not permitted it to be taxed it could not have been taxed.

Mr. SUTHERLAND. I do not think it follows at all, Mr. President, because Congress has inserted a provision in the law that a certain species of property shall be subject to State taxation, that if it had not inserted the provision the property would not have been subject to taxation.

Mr. THOMPSON. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Kansas?

Mr. SUTHERLAND. Yes.

Mr. THOMPSON. In that connection will the Senator permit me to call attention to One hundred and seventy-third United States, page 664, where the Supreme Court of the United States expressly decided:

A State is wholly without power to levy any tax, either direct or indirect, upon national banks or their property, their assets or franchises, except when permitted so to do by the legislation of Congress.

Mr. SUTHERLAND. What was the particular property that was sought to be taxed in that case?

Mr. THOMPSON. This was the franchise.

Mr. SUTHERLAND. Yes; the franchise.

Mr. THOMPSON. But they expressly decided what I have stated from the syllabus, and discussed the leading cases which have been referred to by the Senators here to-day, commencing with the McCulloch case and going down to the present time.

Mr. SUTHERLAND. Of course the Senator is familiar with the rule that the language of any decision must be confined to the question which was at issue. The question there was whether or not the franchise of the bank could be taxed; and the Supreme Court very properly held that it could not be taxed, because, as they held in one of the railroad cases as well, that would be to enable them to legislate out of existence something which the Federal Government had created.

Now, Mr. President, I call attention to the distinction which, on a careful reading of the Veazie Bank case, is shown to exist between that case and the one with which we are dealing. I said the other day—and it had been some time since I had read the case, and I did not have it very well in mind—that that was a decision which never had been entirely satisfactory to the profession. The dissenting opinion, rendered by Mr. Justice Nelson, I think is a far more strongly reasoned opinion than the decision of the majority of the court. But, however that may be, the case is readily distinguishable from the one with which we are dealing.

In the McCulloch case the Supreme Court held that the State could not tax the notes which were issued by the bank. Why? Because the Government of the United States was itself in effect issuing, through that agency, this species of currency or money.

Mr. HOLLIS. Mr. President, will the Senator allow me to interrupt him there?

Mr. SUTHERLAND. Yes.

Mr. HOLLIS. There is no language of the kind, there is nothing to support any such statement, in the McCulloch case. The Senator can not find it. It is not there.

Mr. SUTHERLAND. Oh, Mr. President, the Senator is very positive in his statement about that; but the whole case proceeds upon the theory that the Government of the United States is discharging a governmental function through this bank, and the thing that was taxed was the notes, and there was not anything else that was sought to be taxed.

Mr. HOLLIS. I shall be very much obliged to the Senator if he will produce one line in that case to-morrow, after he has had time to read it, that supports his assertion. I know it is not there.

Mr. SUTHERLAND. Mr. President, if the Senator will permit me to proceed, I say—and the Senator will not undertake to dispute that—that the thing which the State was trying to tax was the notes issued by the bank, and they undertook to tax those notes, which were money, currency. They undertook to provide, in substance and effect, by their law, that the notes could not be issued at all by the bank unless, first of all, there was purchased from the State stamped paper upon which the notes were to be printed, the price of which was proportioned to the value of the notes.

Now, it is not required that I should be able to find some precise language in the decision. It is clear that what the Government of the United States did in that case was to perform a governmental function through that instrumentality; and, of course, the Supreme Court was right in holding that the State could not tax the money issued by the bank any more than it could tax money issued by the Federal Government itself. In the Veazie Bank case the Government of the United States, it is true, undertook to tax notes issued by the bank, but it was not a case where the State was exercising the governmental function through its bank of issuing the notes; the issuance of the notes was the private business of the bank.

The difference is that the United States Government has the constitutional power, as decided by the Supreme Court over and over again, to provide currency for the people and that the State has no such constitutional power. It is not one of the governmental functions of the State to provide currency for the people. A bank, in the absence of legislation to the contrary, may issue notes. So when the Supreme Court in the Veazie Bank case upheld the law of Congress undertaking to impose a tax upon these notes it was dealing with the same thing in name as the thing involved in the McCulloch case, but it was a thing utterly different in effect. It was not a function of the State that was being taxed, as in the McGulloch case; it was the function of the National Government, but it was the private operation of the private bank, presenting, as it seems to me, a wholly different proposition.

Mr. President, I have said in the course of my discussion here to-day, as I said the other day, that I could see no distinction between exempting from taxation the property of a corporation which in some casual aspect discharges a governmental function, which property has no connection whatever with the governmental function, and attempting to exempt the property of an individual similarly situated. What difference is there except that one is a natural person and the other is an artificial person? If the Government authorizes an individual, which it may do, to discharge some governmental function and the individual wholly separate and apart from his governmental duty has property, not derived as a part of his salary, not in any way connected with his governmental operations, it certainly can not be contended that the Federal Government can exempt the property of that individual, his real estate, his horses, his wagons, his mortgages, or any other species of property. I can not see upon what theory if we are not able to do that in the case of the individual we may do it in the case of a corporation, when the property is not connected at all with the operations of that corporation in the discharge of any governmental function.

Mr. STERLING. Mr. President, with the last statement of the Senator from Utah and his opinion I must in a way take issue. His whole theory appears to be that the operations of a Federal land bank and a national farm-loan association under this proposed law are remote from the instrumentality itself, and that they have nothing to do really with what he terms a governmental function.

I spoke briefly the other day upon this proposition, and I wish to call attention again to the purpose of the bill as disclosed first in the title of the bill. It is "to provide for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create Government depositaries and financial agents for the United States, and for other purposes."

Mr. President, we may lay aside these latter purposes mentioned in the title, namely, the creation of these instrumentalities as depositaries of United States bonds or as financial agents for the United States, and confine ourselves to the first provisions in the title, namely, "to provide for agricultural development, to create a standard form of investment based upon farm mortgage, and to equalize rates of interest upon farm loans," and stop there. Let the inquiry be as to how these purposes are to be accomplished. They are under this bill to be accomplished by a Federal instrumentality or by different Federal instrumentalities—the farm-loan board, the Federal land bank, and the national farm-loan association. We are creating them by Federal law; they are Federal instrumentalities. Let us see a little further what is the purpose of the bill as disclosed by the text of the bill itself.

Mr. SUTHERLAND. Let me ask the Senator a question, if he will permit me right there.

Mr. STERLING. Certainly.

Mr. SUTHERLAND. Suppose the bill did stop there, and simply provided for the incorporation of banking institutions for the purpose of loaning money to farmers at a less rate than that at which they could obtain the money from other institutions; what Federal governmental function is the United States discharging through such a bill? Under what provision of the Constitution of the United States is it acting when it does such a thing as that?

Mr. STERLING. I will refer in answer to that to the question I asked the Senator from Iowa [Mr. CUMMINS] during his discussion of this question. It will come, as many other things come, from no express provision, except that the Constitution empowers Congress to provide for the general welfare or to enact legislation in the interest of the general welfare.

Mr. SUTHERLAND. Now, let me ask the Senator from South Dakota, does the Senator think that the so-called general-welfare clause, or either of them, because there are two in the Constitution, is a substantive grant of power to the Federal Government? If so, then there is no limit to what the Federal Government can do, as the Supreme Court has repeatedly said.

Mr. STERLING. It must, of course, be for the general welfare. I call the Senator's attention to the fact that much of the legislation of Congress, the appropriations carried in the Agricultural appropriation bill, for example, are legislation and appropriations that affect certain sections of the Union. The Senator, I think, will readily recall what has been done for the cotton industry in one way or another and for various other industries. What is the warrant for legislation of that kind except the general-welfare clause? True it is that legislation of this kind affects a particular section or a particular interest or class; but it is upon the theory that these several interests are interdependent, and what will be in the interest of one will be in the interest of all, and therefore it is for the general welfare.

Mr. SUTHERLAND. May I answer the Senator?

Mr. STERLING. Yes.

Mr. SUTHERLAND. I think that Congress appropriates a great deal of money that it has no constitutional warrant for appropriating at all. We have appropriated money to aid the earthquake sufferers in Italy; we have appropriated money for all sorts of things; and we do it by a sort of common consent, and there is not an opportunity of having the appropriation challenged because it never is presented to a court in any justiciable form. That is the difficulty with it.

Mr. STERLING. The instances the Senator from Utah cites are extreme cases. I grant very readily there is no constitutional authority for an appropriation of that kind, but I will not grant that there is no constitutional authority for appropriations such as I have mentioned.

Mr. SUTHERLAND. I say to the Senator that in the case to which he called attention—that is, the case of making appropriations—in many instances I think there is no constitutional warrant, but still that is very different from the proposition which the Senator now undertakes to justify, namely, the creation of a corporation to engage in the essentially private business of banking, the loaning of money to one class of people, because we think they are in greater need of assistance with reference to their loans than other classes of people. The Senator is aware of the decisions of the court that Congress can only create a corporation for the purpose of carrying out through that corporation some constitutional power. The illustration which has become classic, that given by Mr. Hamilton in the United States Bank case, was this: He said Congress has no independent power to create a corporation, but it has the power to carry on fiscal operations, and it may therefore create a corporation as a means to carry on such operations. He said, however, that Congress has, for example, no power to govern the police force of the city of Philadelphia. Therefore, it could not create a corporation to do that. Congress has no power to engage in the business of loaning money to farmers. Therefore, it can not create a corporation for the purpose of doing it.

Mr. STERLING. Mr. President, assuming that the general-welfare clause of the Constitution authorizes or warrants legislation of this kind, as I believe it does, it authorizes the creation of an instrumentality to work out or through which may be worked out the very purposes of the bill. Considering the nature of the business, the best instrumentality must be a Federal land-bank corporation, as provided in the bill. It is provided by section 29 that the mortgages taken by the land-bank corporation and the bonds issued by it shall be exempt from taxation. What is the warrant for exempting them from taxation? Because they are the operations themselves of this Federal instrumentality which under the general-welfare clause of the Constitution Congress has the right to create.

Mr. CUMMINS. Mr. President——

Mr. STERLING. I yield to the Senator.

Mr. CUMMINS. In order to get a clear issue, so that I may understand just what the Senator from South Dakota contends, I ask him this question. We have now pending on the calendar a bill the chief object of which is to regulate child labor; that is, to prohibit child labor under certain circumstances. Does the Senator from South Dakota think that Congress could pass a law simply stating the condition under which children shall work throughout the United States, if Congress believes it would be for the general welfare that such a regulation should be passed?

Mr. STERLING. Mr. President, I have not thought of that particular proposition. I hesitate to say Congress would have such power. There are other grounds, of course, on which legislation of that kind can be justified.

Mr. CUMMINS. Yes.

Mr. STERLING. The relation of child labor to products that go into interstate commerce is such as to warrant legislation upon the subject.

Mr. CUMMINS. The proposal of the bill on the calendar is substantially that owners of factories and mines and other establishments of that kind which employ children under certain objectionable or forbidden conditions shall not transport or have transported their products in interstate commerce, and it is supposed by those who have constructed the bill and those who believe in the bill that it is necessary to invoke the constitutional authority to regulate commerce in order to have Congress reach the real purpose, namely, the prohibition against child labor under certain circumstances. Now, if the general welfare of the country affords a basis for any legislation which Congress may see fit to adopt I can see no reason why Congress can not legislate for the general welfare in that particular without invoking its power to regulate commerce.

Mr. STERLING. Mr. President, I think the right and the power of the State in a case such as is cited by the Senator from Iowa may more readily find justification than you can find warrant for invoking the right of the State to tax the bonds and mortgages issued by or taken by this Federal instrumentality. It is a great body of our people that this legislation is intended to benefit, the agricultural classes throughout the Nation, and how is it intended to benefit them? By giving them the same opportunity as other business interests in the matter of securing loans for the purchase, equipment, and development of farms and in making their property and their valuable securities that they own available for that purpose. That is the purpose of the bill.

Mr. CUMMINS. May I interrupt the Senator again?

Mr. STERLING. Certainly.

Mr. CUMMINS. With that purpose I am in entire and absolute sympathy, and I am not questioning the constitutionality of the bill. If it were confined, as the Senator from Utah said, solely to the one purpose named by the Senator from Utah, I would have grave doubt about our authority to enact the law, but there are governmental functions that are to be exercised by the Federal land bank, and I do not think a court could ever disassociate those functions from the other one of loaning money to the farmer. I hope the Senator will not think that I believe we have no authority to pass the bill, for I think we have just as much authority to pass it as we had authority to create national banks. I should like to see them stand as a part of the fiscal system of the United States in exactly the same way that national banks stand.

Mr. STERLING. That, I will say, Mr. President, is my understanding of the Senator's view in this regard. He does not question the constitutionality of the bill as a general proposition, but he does attack this particular section relating to exemptions.

However, if the bill itself is constitutional in providing for the creation of the instrumentality, it must be a Federal instrumentality which we should not tax. I do not care to say it is a "governmental function" in the technical sense of that term that is performed by the bank in taking a mortgage from the farmer or issuing bonds upon a great number of mortgages. It may not be a governmental function in the sense that it carries out some of the administrative, legislative, or executive ends or functions of Government, yet it is, notwithstanding, by the very terms of the bill, the constitutionality of which the Senator admits, a Federal instrumentality created for the purpose I have named, and the question is as to whether or not when you tax the mortgages which it takes and the bonds which it issues in the fulfillment of the purpose of enabling farmers to secure money at lower rates of interest and on easier terms as to payment you are not at least taxing the operations of that Federal instrumentality created for this specific purpose and thereby defeating the purpose. If the bonds and mortgages are taxed it will affect the rate of interest. It is contemplated by the bill that through these operations of the bank farmers will secure loans at a lower rate of interest.

Mr. CUMMINS. Mr. President, I do not doubt the constitutional authority of Congress to pass a law for the incorporation of a railway solely to regulate rates; that is a governmental function; and if it is believed that such rates can be regulated better through a national corporation; that is to say, if low or reasonable rates for the general public can be secured in that way more perfectly than through the regulation of State corporations, I have no doubt of the constitutional authority of Congress to incorporate such an association. But if we take one step further, and should propose to do in that instance what it is said can be done in this instance, namely, to exempt all the property of the incorporation from taxation in order that it might render its service to the public at a lower rate, then I would think we would come in direct collision with the Constitution.

Mr. STERLING. Mr. President, I can hardly agree with the Senator from Iowa in that respect. I believe it is within the power of Congress to provide for the exemption from taxation of the Federal instrumentality which is created for the purpose of affecting the public or general welfare, its property, its franchises, and all the operations of that Federal instrumentality. It is peculiarly so in this case. I think that the taxation of bonds and mortgages and capital stock of the Federal farm-land banks will injuriously affect and perhaps prevent the very purposes of the act, because a lower rate of interest under those conditions will be impossible; the mortgages will be taxed, and the bonds will be taxed in the hands of their owners.

The Senator from Iowa this afternoon in his able and exhaustive argument alluded to the fact that it would be unfair

to the rest of the taxpayers of a community or of a State to have the holders of bonds of this kind, and with this security, exempt from taxation; but, Mr. President, while there may be some advantages resulting to the holders of these bonds, yet, after all, that is incidental to the main purpose of the bill, which is to secure loans to farmers at a lower rate of interest, and if somebody does reap some advantage from it, ought not, in my judgment, to be an argument against this section of the bill.

Mr. President, I merely want to quote briefly from the old, often cited case of McCulloch against State of Maryland—just a few words of the great Chief Justice. He says:

We admit, as all must admit, that the powers of the Government are limited, and that its limits are not to be transcended. But we think the sound construction of the Constitution must allow to the National Legislature that discretion, with respect to the means by which the powers it confers are to be carried into execution, which will enable that body to perform the high duties assigned to it, in the manner most beneficial to the people.

Then comes that famous dictum:

Let the end be legitimate, let it be within the scope of the Constitution, and all means which are appropriate, which are plainly adapted to that end, which are not prohibited, but consist with the letter and spirit of the Constitution, are constitutional.

The simple question here under that great authority is as to whether the end we are trying to reach is a legitimate end, and whether these means are appropriate means, and whether they are within the spirit of the Constitution.

The Senator from Iowa, who has raised these technical constitutional objections, admits that the bill is in the main constitutional; that the instrumentalities provided are constitutional. Such being the case in regard to the bill, I do not believe these exemptions which are to aid in effecting the very purpose of the bill should be stricken out.

Mr. THOMPSON. Mr. President, as part of this discussion, I should like to have printed in the RECORD a portion of pages 667, 668, and 669 of the decision of the Supreme Court of the United States in the case of Owensboro National Bank against Owensboro, reported in One hundred and seventy-third United States, delivered by Chief Justice White, wherein the court discussed the principle which was decided in the syllabus to which I called the attention of the Senator from Utah [Mr. SUTHERLAND] a moment ago.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

A State is wholly without power to levy any tax, either direct or indirect, upon national banks, their property, assets, or franchises, except when permitted so to do by the legislation of Congress.

* * * * * * *

Early in the history of this Government, in cases affecting the Bank of the United States, it was held that an agency, such as that bank was adjudged to be, created for carrying into effect national powers granted by the Constitution, was not in its capital, franchises, and operations subject to the taxing powers of a State. (McCulloch *v.* Maryland, 4 Wheat., 316; Osborn *v.* Bank of the United States, 9 Wheat., 738.)

The principles settled by the cases just referred to and subsequent decisions were thus stated by this court in Davis *v.* Elmira Savings Bank (161 U. S., 283):

"National banks are instrumentalities of the Federal Government, created for a public purpose, and as such necessarily subject to the paramount authority of the United States. It follows that an attempt by a State to define their duties or control the conduct of their affairs is absolutely void, wherever such attempted exercise of authority expressly conflicts with the laws of the United States, and either frustrates the purpose of the national legislation or impairs the efficiency of these agencies of the Federal Government to discharge the duties for the performance of which they were created. These principles are axiomatic, and are sanctioned by the repeated adjudications of this court."

It follows, then, necessarily from these conclusions that the respective States would be wholly without power to levy and tax, either direct or indirect, upon the national banks, their property, assets, or franchises, were it not for the permissive legislation of Congress.

The first act providing for the organization of national banks, passed February 25, 1863 (c. 58, 12 Stat., 665), contained no grant of power to the States to tax national banks in any form whatever. Doubtless the far-reaching consequence to arise from depriving the States of the source of revenue which would spring from the taxation of such banks, and the error of not conferring the power to tax early impressed itself upon Congress, for the following year (act of June 3, 1864: c. 106, 13 Stat., 99) power was granted to the States, not to tax the banks, their franchises or property, but to tax the shares of stock in the names of the shareholders. This provision subsequently was amended and supplemented in various particulars (act of Feb. 4, 1868; c. 6, 15 Stat., 34), and the result of this legislation is embodied in section 5219 of the Revised Statutes, which is as follows:

"SEC. 5219. Nothing herein shall prevent all the shares in any association from being included in the valuation of the personal property of the owner or holder of such shares in assessing taxes imposed by authority of the State within which the association is located; but the legislature of each State may determine and direct the manner and place of taxing all the shares of national-banking associations located within the State, subject only to the two restrictions, that the taxation shall not be at a greater rate than is assessed upon other moneyed capital in the hands of individual citizens of such State and that the shares of any national-banking association owned by nonresidents of any State shall be taxed in the city or town where the bank is located and not elsewhere. Nothing herein shall be construed to exempt the real property of associations from either State, county, or municipal taxes to the same extent, according to its value, as other real property is taxed."

This section, then, of the Revised Statutes is the measure of the power of a State to tax national banks, their property, or their franchises. By its unambiguous provisions the power is confined to a taxation of the shares of stock in the names of the shareholders and to an assessment of the real estate of the bank. Any State tax, therefore, which is in excess of and not in conformity to these requirements is void.

So self-evident are these conclusions that the adjudicated cases justify the deduction that they have been accepted from the beginning as axiomatic and unquestioned, since the controversies as to taxation of national banks illustrated in the opinions of this court mainly depend, not upon any attempted exercise of a power to tax the property and franchises of the banks, but involved controversies as to whether, when the shares of the stock in the names of the shareholders had been assessed according to law, the tax could be imposed upon them because of alleged discrimination or other illegalities.

Mr. WALSH obtained the floor.

Mr. HOLLIS. Mr. President, I will say for the information of the Senate that I hope we can get a vote on this bill some time to-morrow. It is my intention now to ask the Senator from Montana to yield, so that I may move a recess, and that will give the Senator from Montana the privilege of the floor at 12 o'clock to-morrow, as I understand.

Mr. WALSH. That is agreeable to me.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes, in which it requested the concurrence of the Senate.

### HOUSE BILL REFERRED.

H. R. 12717. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes, was read twice by its title and referred to the Committee on Agriculture and Forestry.

### RECESS.

Mr. HOLLIS. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 5 o'clock and 25 minutes p. m.) the Senate took a recess until to-morrow, Thursday, May 4, 1916, at 12 o'clock meridian.

---

## HOUSE OF REPRESENTATIVES.

### WEDNESDAY, *May 3, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Infinite Spirit, whose life-giving rays permeate all space, and whose love reaches out to all Thy children, we thank Thee for the strong, intelligent, and ever-growing faith which recognizes Thee as the Father of all men, which enhances, dignifies, and ennobles life, takes away the sting of death, fills the heart with eternal hope, accentuates the sinfulness of sin, and inspires to holy living. Grant, O most merciful Father, that it may continue to grow until all men shall know Thee and worship Thee as such, in the spirit of the Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

### EXTENSION OF REMARKS.

Mr. BENNET. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting some editorials in New York papers commending my Democratic colleagues for their vote against the Clarke amendment.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD by printing editorials commending his Democratic colleagues for voting against the Clarke amendment. Is there objection?

Mr. BRUMBAUGH. I object.

### LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. RAKER, for the day, on account of illness.

To Mr. MCARTHUR, for the day, on account of urgent personal business.

To Mr. FORDNEY (at the request of Mr. SMITH of Michigan), indefinitely, on account of the death of a relative.

### BUREAU OF WAR-RISK INSURANCE.

The SPEAKER. The bill H. R. 13224, to amend an act entitled "An act to authorize the establishment of a bureau of war-risk insurance in the Treasury Department," which was referred to the Committee on the Merchant Marine and Fisheries,

it seems ought to have been referred to the Committee on Interstate and Foreign Commerce, that reported the original act. The chairman of the Committee on the Merchant Marine and Fisheries asks that the change be made, and without objection it will be referred to the Committee on Interstate and Foreign Commerce.

There was no objection.

FLOOD CONTROL.

The SPEAKER. This is Calendar Wednesday, and the Clerk will call the committees.

The Clerk proceeded with the call of committees, and when the Committee on Flood Control was called,

Mr. HUMPHREYS of Mississippi. Mr. Speaker, I call up the bill H. R. 14777, on the Union Calendar.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. What list does the Clerk call these committees from?

The SPEAKER. From the usual printed list.

Mr. MANN. It may be that the rules adopted at this session changed the order, but the order in the Manual is not the order in which the Clerk called the committees. I am not raising any question, except for future information, so that Members who watch the calendar may know what is correct.

The SPEAKER. I understand the Clerk always calls the roll from the printed list.

Mr. MANN. The printed list, then, ought to be corrected, unless there was a change of the rule. In Rule LI is the Committee on Industrial Arts and Expositions.

The SPEAKER. That is the way it is in the printed list, and the Clerk ought to have called the Committee on Industrial Arts and Expositions.

Mr. MANN. The Clerk did call that committee, and the only point I am making is that the list was not called in the order in which it is printed in the rules.

The SPEAKER. The Chair supposes that the gentleman is correct, but the clerks inform the Chair that they have been calling the committees all the time from this printed list.

Mr. MANN. I understand they have, and I had supposed until this morning that the printed list and the list in the rules were the same.

The SPEAKER. The Chair supposed so, too; and they ought to be.

Mr. MOORE of Pennsylvania. Mr. Speaker, I make the point of order that the Committee on Flood Control has exceeded its powers in reporting this bill, and that it is a matter properly for the consideration by the Committee on Rivers and Harbors.

The SPEAKER. The Chair will hear the gentleman from Pennsylvania.

Mr. MOORE of Pennsylvania. Mr. Speaker, the Committee on Flood Control was created by a resolution which was introduced in the House February 1 last, and its jurisdiction extends to "flood control."

Inquiries were made at the time as to how far that jurisdiction went, but they were not answered very clearly. As adopted, the rule creating the committee provided that to this Committee on Flood Control should be referred matters relating to "flood control other than appropriations therefor." The jurisdiction of the Committee on Rivers and Harbors in the existing rules is to consider and dispose of matters pertaining to "improvement of rivers and harbors."

The bill which is reported by the Committee on Flood Control, and which has been called up by the gentleman from Mississippi [Mr. HUMPHREYS], provides in the opening section:

*Be it enacted, etc.*, That for controlling the floods of the Mississippi River and continuing its improvement from the Head of the Passes to the mouth of the Ohio River the Secretary of War is hereby empowered, authorized, and directed to carry on continuously, by hired labor or otherwise, the plans of the Mississippi River Commission heretofore or hereafter adopted.

In that first section it proposes to continue the permanent improvement of the channel of the Mississippi River, which has already been delegated to the Committee on Rivers and Harbors, and for which the Mississippi River Commission, acting under the organic law of 1879, has already spent for this section upward of $87,000,000. Now, by one fell swoop the Committee on Flood Control takes away from the Committee on Rivers and Harbors all the work heretofore assigned to it as coming up from the Mississippi River Commission, upon which up to date $87,000,000 has been expended.

The bill in other sections—on page 2 subsection (a), provides that—

All money appropriated under authority of this section shall be expended under the direction of the Secretary of War in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers, for controlling the floods and for the general improvement of the Mississippi River, and for surveys, including the survey from the Head of the Passes to the headwaters of the river.

Page 3, subsection 2, provides again for this same kind of permanent work. Page 4, dealing with the Sacramento River, carries forward to the direction and jurisdiction of the Committee on Flood Control the work heretofore assigned to the Committee on Rivers and Harbors, and certain reports and documents which were reported by the Committee on Rivers and Harbors are cited which contemplate permanent work for the improvement of the river for navigation purposes and not for the purposes of flood control.

Mr. CARTER of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. CARTER of Oklahoma. Is it the gentleman's contention that jurisdiction of a committee can be questioned after no point was made in the committee as to the jurisdiction?

Mr. MOORE of Pennsylvania. It is my contention that the point can be raised now while we are in the House.

Mr. CARTER of Oklahoma. Even though it was not raised in the committee?

Mr. MOORE of Pennsylvania. This is the only opportunity to raise the point—right here; now.

Mr. CARTER of Oklahoma. It could have been raised in the committee, could it not?

Mr. MOORE of Pennsylvania. I presume it could, but that does not bar me. I am not a member of the committee. That does not bar any other Member of the House from raising it at the proper time when the House is in session.

Mr. CARTER of Oklahoma. What I wanted to understand is this: It has been my understanding that the question of jurisdiction of a committee could not be raised if it were not raised in the committee at the time the bill was reported.

Mr. MOORE of Pennsylvania. I presume the Speaker will rule upon that in due course. I am raising it here as is my right. I had no opportunity to raise it in the committee, and I question whether it could have been successfully raised there.

Mr. ADAMSON. Mr. Speaker, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. ADAMSON. Is it not within the power and is it not the right of any Member of the House to raise the question upon the reference of the bill to the committee at any time before the committee reports the bill, and was not that the way to raise the question?

Mr. MOORE of Pennsylvania. As no one outside of the committee had any information on the subject I do not see how the question could be raised.

Mr. ADAMSON. We publish a paper here every day to show where a bill is.

Mr. MOORE of Pennsylvania. The committee did not go about the House telling the Members of the House what it was going to do, but when it was ready it brought a bill into the House which contains information to all of the Members of the House. That bill provides that we now appropriate more for flood control than we appropriated for rivers and harbors. We are to appropriate by this bill $45,000,000 for the Mississippi River alone, and $5,500,000 for the Sacramento River. The gentleman from Mississippi walks out of the Committee on Rivers and Harbors, which was making appropriations for the Mississippi River, a committee was created, and then the gentleman walks into the House with a flood-control bill proposing to appropriate $50,500,000 in one lump for the improvement of two rivers only.

Mr. CAMPBELL. Mr. Speaker, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. CAMPBELL. Referring to the question of jurisdiction and the time for raising the question, if the gentleman from Pennsylvania will permit a suggestion, I do not think there can be any question but that he is in time in raising the question of jurisdiction in the House. That question has been raised on bills referred to the Committee on Claims, which should have been referred to the Committee on War Claims, and that question has been raised frequently on the floor, and has always been held in order when the bill was called up for consideration.

Mr. MOORE of Pennsylvania. Certainly.

Mr. TILSON. Mr. Speaker, will the gentleman yield to me for a suggestion?

Mr. MOORE of Pennsylvania. Yes.

Mr. TILSON. In fact, would it be possible for the gentleman to know that this bill trenched upon the jurisdiction of the Committee on Rivers and Harbors until the bill was actually reported into the House. The gentleman could not determine

that fact from the title of the bill alone. He would have to know what the committee actually reported.

Mr. MOORE of Pennsylvania. That is true. I should think the House would have no such information, except under the circumstances mentioned by the gentleman from Connecticut. I recall very well, and I think most of the Members of the House do, that when the gentleman from Mississippi [Mr. HUMPHREYS] came in with his proposition for the creation of a committee on flood control, the whole circumstances surrounding the creation of that committee were nebulous. We did not know anything about it. Even the chairman of the Committee on Rivers and Harbors did not know, and so stated in effect on the floor of the House when the rule was brought in.

Mr. MONTAGUE. Mr. Speaker, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

The SPEAKER. The Chair will ask the gentleman from Pennsylvania to state succinctly the point upon which he relies.

Mr. MONTAGUE. I understood the gentleman to yield to me for a question. I beg the Speaker's pardon.

The SPEAKER. The Chair requested the gentleman to state in as few words as possible the points upon which he relied.

Mr. MONTAGUE. It was with that idea in view that I desired to ask a question to see if I could ascertain what his point is.

The SPEAKER. If the gentleman answers the Speaker's question, perhaps he will answer the question of the gentleman from Virginia.

Mr. MONTAGUE. That is true; but I did not know that the Speaker was going to ask that question when I preceded the Speaker.

The SPEAKER. The Chair suggests that the gentleman from Virginia ask his question.

Mr. MONTAGUE. Mr. Speaker, I desire to ask the gentleman if his objection goes not to the reference, but to the excess of jurisdiction under a proper reference. Is that true or not?

Mr. MOORE of Pennsylvania. My objection goes that far.

Mr. MONTAGUE. Is it to the reference itself, or is it only to the excess of jurisdiction under the reference?

Mr. MOORE of Pennsylvania. I have made the point that in reporting this bill in the form in which it is the Committee on Flood Control has exceeded its authority and has usurped the power of the Committee on Rivers and Harbors. That is substantially the point, I think, the Chair and the gentleman from Virginia desired me to respond to.

The SPEAKER. Has the gentleman finished?

Mr. MOORE of Pennsylvania. No; I have not. I wish the Chair to be advised that the point that I have made is practically conceded by the Committee on Flood Control itself, because in the rather voluminous report which it has presented—23 pages on the Mississippi River and upward of 100 pages dedicated to the Sacramento, which is joined to it in the alliance for the passage of the bill—it distinctly states, in almost the first paragraph, that the bill provides not only for controlling the floods of the Mississippi but also for—

> the general improvement of the Mississippi River, and authorizes the Secretary of War to carry on continuously for that purpose the plans of the Mississippi River Commission, the expenditure not to exceed in the aggregate $45,000,000.

Now, this is the committee speaking:

> It was the desire of the committee to confine the bill exclusively to matters relating to flood control, and only after mature consideration and conferences with the Chief of Engineers and his assistants in the War Department and with members of the Mississippi River Commission, was the committee forced to the conclusion that it was necessary under the peculiar conditions existing to include also the general improvement of the river. Appropriations have always been made heretofore in lump sums and the Mississippi River Commission authorized and directed to expend the money so appropriated for the purpose of carrying into effect the provisions of the act creating the commission, to wit, "to correct, permanently locate, and deepen the channel and protect the banks of the Mississippi River, improve and give safety and ease to the navigation thereof, prevent destructive floods, and promote and facilitate commerce, trade, and the Postal Service." Levees are built for the purpose both of preventing destructive floods and serving the interest of navigation, and the revetment of caving banks is likewise done for this dual purpose. It was found to be practically very inadvisable to provide for the single problem of flood control and omit provision for the general improvement of the river.

Mr. Speaker, I call the attention of the Chair to the fact that the rivers and harbors bill just passed by this House made provision for this particular work to the extent of $6,000,000 from the Head of the Passes to the mouth of the Ohio River; now, under the guise of flood control, we are asked to appropriate $45,000,000 more, plus the $87,000,000 already expended by the Mississippi River Commission on the lower Mississippi. Before I close I want to call the attention of the Chair to the organic act creating the Mississippi River Commission, supervision of whose work is now being taken away from the Rivers and Harbors Committee.

The SPEAKER. The Chair thinks this is extraneous to this discussion.

Mr. MOORE of Pennsylvania. If the Chair pleases, the bill provides that the Committee on Flood Control shall take over the work of the Mississippi River Commission, and that provides for navigation.

The SPEAKER. The Chair would like to ask the gentleman from Pennsylvania one question.

Mr. MOORE of Pennsylvania. I want to show what the work of the Mississippi River Commission was and to show that it is a work of navigation.

The SPEAKER. The Chair would like to ask the gentleman one question. Is it not the uniform practice of the House that when public bills are referred to a committee, even if they are erroneously referred, and the committee proceeds to take jurisdiction and the House does not change the reference, does not that give that committee jurisdiction?

Mr. MOORE of Pennsylvania. Mr. Speaker, I do not care so much about the manner in which we have acted upon other questions as I do about the manner in which we get at this one. The point I am making now is the live, up-to-date point, upon which I am perfectly willing——

The SPEAKER. The Chair asked the gentleman a plain question.

Mr. MOORE of Pennsylvania. I will say, Mr. Speaker, I am not now competent to answer that question, but I maintain that the question I have raised is a proper one to raise under the rules and that this is the proper time to raise it.

The SPEAKER. There is no question but what the gentleman had the right to raise the question, but the Chair does not desire to hear anybody. He is ready to rule.

Mr. MOORE of Pennsylvania. Does the Chair decline to permit me to refer to the work under the organic law creating the Mississippi River Commission?

The SPEAKER. The Chair wants to say that the gentleman or any other gentleman who understands the history of this reference business might make a speech five hours long about it——

Mr. MOORE of Pennsylvania. That is correct.

The SPEAKER. There is no question about that; but we have not time to do it.

Mr. MOORE of Pennsylvania. But it is a matter involving $50,000,000 to begin with, Mr. Speaker.

The SPEAKER. The Chair understands that perfectly well, and the Chair is ready to rule. In the first place, the Chair will state again what he has stated frequently, that the reference of bills is the most difficult and delicate question that the Speaker has to decide. The committees frequently lap over into each other's jurisdiction. That is proposition No. 1. Bills are frequently drawn that way on purpose, the Chair thinks; but that is neither here nor there.

Mr. MOORE of Pennsylvania. Will the Speaker yield for one interruption?

The SPEAKER. Yes.

Mr. MOORE of Pennsylvania. I desire to call the attention of the Speaker to the fact that on numerous occasions when canal bills have been introduced here, simply because the word "canal" appears, although they pertained exclusively to waterways and navigation, they have been taken away from the Committee on Rivers and Harbors and referred to another committee. Navigation comes under the jurisdiction of the Committee on Rivers and Harbors——

The SPEAKER. That was because they were put in a privileged bill. The history of this discussion and the rights of everybody are these: This bill was introduced—the Chair does not know who introduced it; but that does not matter. It is a public bill. It was referred to the Committee on Flood Control. If the gentleman or any other gentleman felt aggrieved or thought his rights had been trampled on or the jurisdiction of the Committee on Rivers and Harbors was being usurped, the proper remedy was for the gentleman to come in here and move that it be rereferred.

Mr. MANN. Mr. Speaker—the Speaker will pardon me—but no one can move, except one of the committees, unless by unanimous consent.

The SPEAKER. The gentleman is technically right, that it takes one committee or the other to ask it.

Mr. MANN. Or unanimous consent.

The SPEAKER. Or unanimous consent.

These gentlemen sinned away the day of grace, and the Flood Committee took charge of this bill and worked on it, and it was a matter of public notoriety that they were doing it. It was not done in a corner. They went to work and investigated the matter and made this report here. As to the proposition of the gentleman that it takes a piece out of the jurisdiction of the Committee on Rivers and Harbors, of course

the whole scheme of the Flood Committee did that very thing. That was what it was intended to do, to relieve the Committee on Rivers and Harbors of a part of its work. It was overloaded.

You can not put water into a river and you can not take water out of a river and you can not do anything about controlling the waters of a river that it does not in some way affect the improvement of the river and the navigation thereof. So the point of order is overruled, and the committee automatically resolves itself——

Mr. MOORE of Pennsylvania. Mr. Speaker, I raise the question of consideration.

Mr. MANN. That has to be raised in the committee.

Mr. MOORE of Pennsylvania. I have raised the question.

Mr. MANN. The question of consideration on Calendar Wednesday has to be raised in the committee

The SPEAKER. The Chair has ruled on this proposition at least three times and has no disposition to reverse himself.

Mr. MOORE of Pennsylvania. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. Wait until the Chair states the matter. The Chair says that the gentleman has a right to raise the question of consideration in the Committee of the Whole, and it has been done two or three times.

Mr. MOORE of Pennsylvania. Do I understand that the Chair rules that the question of consideration can be raised in the Committee of the Whole?

The SPEAKER. That is exactly what the Chair holds, and this particular Speaker has ruled that way two or three times, being the only one that has passed upon it, he supposed. The House resolves itself automatically into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 14777; and the gentleman from Colorado [Mr. TAYLOR] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 14777) to provide for the control of the floods of the Mississippi River and of the Sacramento River, Cal., and for other purposes, with Mr. TAYLOR of Colorado in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 14777.

Mr. MOORE of Pennsylvania. Mr. Chairman, I raise the question of consideration.

The CHAIRMAN. Let the Clerk report the bill first.

The Clerk read as follows:

A bill (H. R. 14777) to provide for the control of the floods of the Mississippi River and the Sacramento River, Cal., and for other purposes.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

Mr. STAFFORD. Mr. Chairman, this bill has just been reported, and I think it should be read. It is a short bill.

Mr. MOORE of Pennsylvania. Mr. Chairman, I raise the question of consideration.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] has objected to unanimous consent, and so the bill will be read the first time.

Mr. MOORE of Pennsylvania. Then I would have the privilege of raising the question of consideration of the bill?

The CHAIRMAN. Yes.

Mr. MOORE of Pennsylvania. Mr. Chairman, I raise the question of consideration now.

The CHAIRMAN. The Chair assumes that we might as well dispose of that first as last. The gentleman from Pennsylvania [Mr. MOORE] raises the question of the consideration of the bill. The question, therefore, is whether or not we will now consider this bill.

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. MOORE of Pennsylvania. Division, Mr. Chairman.

The committee divided; and there were—ayes 97, noes 36.

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by inserting the organic law creating the Mississippi River Commission.

Mr. DYER. Mr. Chairman, I make the point of order that the request is out of order at this time before the Chair has announced the vote.

The CHAIRMAN. The Chair understands that the gentleman from Pennsylvania makes the unanimous-consent request. Does the gentleman from Missouri object?

Mr. DYER. I object until the vote is announced.

The CHAIRMAN. The Chair has announced the vote. The ayes have it. Is there objection to the request of the gentleman from Pennsylvania [Mr. MOORE] to extend his remarks in the RECORD as indicated? [After a pause.] The Chair hears none.

The following is the act appointing the Mississippi River Commission, referred to:

*Be it enacted, etc.*, That a commission is hereby created to be called "the Mississippi River Commission," to consist of seven members.

SEC. 2. The President of the United States shall, by and with the advice and consent of the Senate, appoint seven commissioners, three of whom shall be selected from the Engineer Corps of the Army, one from the Coast and Geodetic Survey, and three from civil life, two of whom shall be civil engineers. And any vacancy which may occur in the commission shall in like manner be filled by the President of the United States; and he shall designate one of the commissioners appointed from the Engineer Corps of the Army to be president of the commission. The commissioners appointed from the Engineer Corps of the Army and the Coast and Geodetic Survey shall receive no other pay or compensation than is now allowed them by law, and the other three commissioners shall receive as pay and compensation for the services each the sum of $3,000 per annum; and the commissioners appointed under this act shall remain in office subject to removal by the President of the United States.

SEC. 3. It shall be the duty of said commission to direct and complete such surveys of said river, between the Head of the Passes, near its mouth, to its headwaters, as may now be in progress, and to make such additional surveys, examinations, and investigations—topographical, hydrographical, and hydrometrical—of said river and its tributaries as may be deemed necessary by said commission to carry out the objects of this act. And to enable said commission to complete such surveys, examinations, and investigations, the Secretary of War shall, when requested by said commission, detail from the Engineer Corps of the Army such officers and men as may be necessary, and shall place in the charge and for the use of said commission such vessel or vessels and such machinery and instruments as may be under his control and may be deemed necessary. And the Secretary of the Treasury shall, when requested by said commission, in like manner detail from the Coast and Geodetic Survey such officers and men as may be necessary, and shall place in the charge and for the use of said commission such vessel or vessels and such machinery and instruments as may be under his control and may be deemed necessary. And the said commission may, with the approval of the Secretary of War, employ such additional force and assistants, and provide, by purchase or otherwise, such vessels or boats and such instruments and means as may be deemed necessary.

SEC. 4. It shall be the duty of said commission to take into consideration and mature such plan or plans and estimates as will correct, permanently locate, and deepen the channel and protect the banks of the Mississippi River; improve and give safety and ease to the nagivation thereof; prevent destructive floods; promote and facilitate commerce, trade, and the postal service; and when so prepared and matured, to submit to the Secretary of War a full and detailed report of their proceedings and actions, and of such plans, with estimates of the cost thereof, for the purposes aforesaid, to be by him transmitted to Congress: *Provided*, That the commission shall report in full upon the practicability, feasibility, and probable cost of the various plans known as the jetty system, the levee system, and the outlet system, as well as upon such others as they deem necessary.

SEC. 5. The said commission may, prior to the completion of all of the surveys and examinations contemplated by this act, prepare and submit to the Secretary of War plans, specifications, and estimates of costs for such immediate works as, in the judgment of said commission, may constitute a part of the general system of works herein contemplated, to be by him transmitted to Congress.

SEC. 6. The Secretary of War may detail from the Engineer Corps of the Army of the United States an officer to act as secretary of said commission.

SEC. 7. The Secretary of War is hereby authorized to expend the sum of $175,000, or so much thereof as may be necessary, for the payment of the salaries herein provided for and of the necessary expenses incurred in the completion of such surveys as may now be in progress, and of such additional surveys, examinations, and investigations as may be deemed necessary, reporting the plans and estimates, and the plans, specifications, and estimates contemplated by this act, as herein provided for; and said sum is hereby appropriated for said purposes out of any money in the Treasury not otherwise appropriated.

Approved June 28, 1879.

The CHAIRMAN. The Clerk will report the bill.

The Clerk commenced the reading of the bill.

Mr. GARRETT. Mr. Chairman, I ask unanimous consent that the further reading of the bill be dispensed with.

Mr. STAFFORD. Mr. Chairman, pending that request I would like to inquire if there is any disposition on the part of members of the committee to extend general debate. This is a most important bill. Under the rules, as the gentleman is aware, there is but one hour allowed to those who are in favor of the bill and but one hour allowed to those in opposition. On this side of the House the demands for time, I am informed by the ranking member of the committee, are more than he can allot, not only from those in opposition but those in favor of the bill.

Mr. HUMPHREYS of Mississippi. Under the rules there are two hours of debate.

Mr. STAFFORD. If we would rise and arrange it by unanimous consent and then go back into committee the general debate could be extended.

Mr. GARRETT. This bill, of course, is under consideration under the Calendar Wednesday rule. It is very desirable that the bill be acted upon within the two days. I do not think there would be any objection to an extension of general debate. I do not think there would be any objection, either, to an extension of time under the five-minute rule, provided, of course, we

can have an agreement that we shall vote, or, at least, have the previous question ordered, not later than the conclusion of the next Calendar Wednesday, whenever that may be.

Mr. STAFFORD. If the gentleman will permit, I do not think there is any question but that this bill will be concluded at the conclusion of next Calendar Wednesday. It is a short bill, containing eight pages and only three sections; but it is a new proposition and there is a general disposition to discuss this bill in the committee to ascertain the full scope of it. Of course, that might be done under the five-minute rule or it might be done under general debate. One hour is a very brief time to be allotted for the discussion of this bill on this side to those who favor and those who oppose it.

Mr. MANN. Mr. Chairman, if the gentleman will allow me to make a suggestion, the gentleman from Mississippi [Mr. HUMPHREYS] talked with me in reference to the time for debate on this bill, and I told him I thought there was no reason for extending the time for general debate under the rule if we could have the understanding that under the five-minute rule liberal extensions might be granted for at least a day. As I said to the gentleman, there is no trouble whatever. Whenever the gentleman wants to close down he can do it and force this bill through in one day, because there are only three sections to the bill. I think if we had that understanding gentlemen could have all the time they need to-day practically in general debate, but under the five-minute rule.

Mr. GARRETT. If the gentleman from Mississippi will permit, there is no trouble about that.

Mr. MANN. I think there will not be.

Mr. GARRETT. I am sure of that, but I think we ought to have an understanding if we are going to rise and enter into an agreement about general debate. We ought to have an understanding that a vote shall be reached on the next Calendar Wednesday. Of course the gentleman knows that anybody can come in at any time and throw a monkey wrench into the machinery of the bill.

Mr. MANN. I do not think anybody can come in and throw a monkey wrench into the machinery of a bill only three sections long, and I shall not assist them so far as I am concerned.

Mr. GARRETT. I know the gentleman will not, but there are points of no quorum that can be made and motions to rise and motions to adjourn, and everybody might be worn out. If there is any way of making an agreement, I should like to see it made.

Mr. MANN. There is only one way to do that, and that is for the committee to rise and arrange it.

Mr. GARRETT. The gentleman and I discussed that matter privately before.

Mr. MANN. There would be time enough to do that next Wednesday.

The CHAIRMAN (Mr. CARAWAY). Is there objection to dispensing with the further reading of the bill?

There was no objection.

The CHAIRMAN. The gentleman from Mississippi [Mr. HUMPHREYS] is recognized for one hour.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, viewed from any angle, considered in any aspect, the problem of the Mississippi River is national in its scope, and has been from the beginning. Spain and France and England continuously intrigued and sometimes fought for its control, and in those days the problem was international; but at last, through the sagacity of our own statesmen and the jealousies and fears of the chancelleries of Europe, the great river came, with its blessings and its responsibilities, under the beneficent light of our stars. What shall we do with it is the question which for more than a hundred years has stood at the door of the Nation and knocked, and here it stands to-day.

A great army of adventurous spirits from the older States, reenforced by those who fled from the hardships and oppressions of the Old World, swept over the mountains and into the valley as soon as the Louisiana Purchase was consummated. Another army of immigrants forced its way up the river from the sea, all bent upon the conquest of the wilderness, the founding of a civilization which now promises to eclipse all rivals in the long drama of history. The struggle for the political control of the river from its source to the sea had ended; the right to its free navigation was secure to our people, but the obstructions which nature put across this common highway began to prove even more troublesome than had the vexatious don in the days of the Spanish occupation. In 1809 Nicholas Roosevelt, of New York, made a journey on a flatboat from Pittsburgh to New Orleans. This was the preliminary step, the ultimate purpose being to build steamboats and engage them in the Mississippi River trade. It was currently reported and generally believed that the swift current of the Mississippi River, together with its eddies and shoals, would prevent the river from being navigated by steamboats, and the purpose of this trip of Mr. Roosevelt was to make such observations as would enable him and those associated with him to reach a conclusion in this matter. Upon his return to New York he made a favorable report, and Fulton and Livingston, who were associated with him, agreed to make the experiment. He thereupon took with him a number of ship carpenters, skilled workmen, went over to Pittsburgh, and began the construction of what was to be the first steamboat on the Mississippi River.

In his report to the Senate in 1846 John C. Calhoun said:

> The annual aggregate loss of boats navigating the Mississippi and its waters at the present time is 107 from all causes; the total loss annually, $2,000,000; and in addition the loss of life occasioned by sinking boats is very great.

In 1873 Mr. John A. Scudder, president of the St. Louis & Memphis Packet Co., stated to a Senate committee that there were 5,000 wrecks in the river between St. Louis and Cairo, a distance of 200 miles.

I was saying that the two great armies of civilization were entering the valley from different directions. Both these pioneers, though they came from the opposite ends of the earth, were struggling against the same forces of nature in the common cause of civilization. The one looked upon the river as the great highway upon which to float the products of his farm and his forge out to the markets of the world. The other looked upon the river also, but his thoughts were of its floods, and his brain was taxed to conjure up some scheme whereby they might be controlled and passed in safety into the sea.

It soon became apparent to both, however, that the problem was too big, the expenditure requisite to the task too great for any local agency to cope with.

In 1822, in response to the demands coming from the full length of the valley, Congress ordered the Engineers of the Army to make an investigation with a view to ascertaining if the river could be made safe for navigation. After much study and investigation those engineers reported that if the river was to be kept free of snags and sand bars, which were working such destruction to the steamboats, its waters must be held within its banks at all seasons, for if in times of flood it was permitted to overflow its banks the débris of the forests, tree tops and logs, would surely be floated into the channel and ultimately sink and form the sand bars and snags upon which boats were rushed to their doom. The cost of such an undertaking, however, was so great that nothing came of the report. As the valley continued to be settled, however, and the commerce of the river grew by leaps and bounds, demands upon Congress became all the more insistent. Conventions were held in Chicago, Cincinnati, Memphis, and the other cities of the valley, with the result that Congress enacted what has since been known as the swamp and overflow land grant. Under the terms of this law all the wet lands in the several States of the valley were donated to those States, the proceeds of the sale to be devoted to the construction of "levees and drains." The result of this legislation was that the wet lands of the northern valley were drained into the tributaries of the Mississippi River with such rapidity that it was impossible for the riparian owners lower down, even with the assistance thus rendered, to build their levees fast enough to take care of the augmented floods. The inevitable result was that the floods went higher, more snags accumulated in the river, and the Deltas of the lower valley were all the deeper submerged. The river had now grown in importance until it had become the greatest highway of commerce in all the world. By 1850 New Orleans had outstripped all its rivals and become the third greatest port in the world. Congress was again appealed to and again ordered an investigation of the river by the Engineers, and the notable feature of that report was the declaration of the engineer in charge that—

> The process by which the country above is relieved is the process by which the country below is ruined.

It was thereupon resolved to have the whole subject investigated in all the infinite variety of its detailed and varied aspects. Another commission of engineers were set to work, provided with ample means and facilities, and directed to do the work thoroughly. For 10 years this investigation proceeded, and their report is the most luminous, the most illuminating, the most thorough ever made of any river in all the tide of time. Every man who had any valuable suggestions to contribute, and many who labored under the hallucination that they were so possessed, appeared before the commission and their theories were thoroughly tested. The conclusion of the whole matter was an affirmance of the opinions expressed by the first commission, appointed in 1822, to wit: That the only way to improve the river

for navigation was to keep its flood waters in the channel, and the only way that this could be done was by the construction and maintenance of levees.

This report, known as the report of Humphreys and Abbot, was made in 1860 and accepted by Congress as the final word on the subject. There was but one way to improve the river, either for the purpose of navigation, which was the object sought by the dwellers of the northern valley, or to protect the lower deltas from destructive overflows, which was the additional object of the people of the lower valley, and that was by the construction and maintenance of levees high enough and strong enough to retain the full volume of the flood within the natural channel of the river. Since that day innumerable commissions have been appointed by Congress to investigate the subject. For 35 years the Mississippi River Commission, composed of engineers from the Army, from the Coast and Geodetic Survey, and from civil life have subjected all the phenomena of the river to expert, scientific, critical, and relentless scrutiny, and all have confirmed the judgment and accepted the conclusion announced in the report of 1860. Unfortunately, the greatest disaster that ever befell our country came the next year, when our fathers reversed the biblical injunction and beat their plowshares and their pruning hooks into implements of war.

Let me give you a few figures which show the effect of this frightful calamity on the problem of the Mississippi River, taking the 11 great States which lie in the triangle described by the Ohio River to the east and the Missouri River to the west.

In 1850 farm values as returned by the census for these States aggregated, in round figures, $800,000,000. Under the census of 1880 these same values had risen to $5,000,000,000; in 1910 to the incomprehensible total of $20,000,000,000. With this tremendous industrial development there had gone as one of its prime factors the drainage of their water-soaked areas. Creeks had been straigtened, drainage canals had been dug, ponds and slashes had been drained, farms had been undertiled, with the result inevitable that the surface waters, instead of lagging superfluous, were precipitated into the river in such volume as to practically overwhelm the lower Delta. In 1858 the greatest flood then known since our records began measured 1,475,000 cubic feet per second. In 1882 the next record flood measured 1,800,000 cubic feet per second. In 1912 the greatest flood of them all measured 2,300,000 cubic feet per second. How frightfully was Lieut. Eilet's prophecy being fulfilled:

> The process by which the country above is relieved is the process by which the country below is ruined.

Take now the figures from the States of the lower valley, Arkansas, Louisiana, and Mississippi. Under the census of 1850 their farm values were returned at $200,000,000; in 1860, more than $600,000,000, an increase in 10 years of more than 300 per cent. Then came the war, and in 1870 these values had fallen again to $200,000,000. As a cap to the climax of this chain of destruction, a Federal tax of $15 a bale was levied on their cotton for 1866, 1867, and 1868. As a result of it all, when the next census was taken, in 1880, one-half of the fertile lands of the Delta, which had been valued by Humphreys and Abbot in 1860 at $25 an acre for the wild land and $100 an acre for the cleared land, had been forfeited for taxes and reverted to the jungle.

It will not be possible to relate the story of the struggles out of that slough of despond in the brief time which I can occupy to-day. Let me point to a few results in very general terms.

A hundred years have come and gone since the old pioneers of the valley first came to Congress with their problem, a hundred years big with accomplishments far beyond the wildest imaginings of their most enthusiastic dreamers. Last year their products were valued at $15,000,000,000—think of it! The total annual expenditures of the Federal Government will not attain to such a figure in a decade, even with the additional appropriation for preparedness, which all of us favor. And speaking of preparedness, let me suggest that no amount of guns and ammunition can strengthen the strong Army of this Republic against the encroachment of any possible enemy so effectively as would the reclamation of the 20,000,000 acres of the Mississippi delta and their dedication to the fruitful and productive ends of peace.

Fifteen billion dollars annually produced in that great valley—every pound of it materially affected in its value by the cost of transportation to the sea. But we are reminded that the commerce has practically deserted the river. Five thousand wrecks between St. Louis and Cairo! Was ever such a tax laid upon transportation anywhere else upon the face of this turbulent earth? Can we marvel that the steamboats surrendered to the railroads in the face of such a handicap? But even so, we do, nevertheless, float more tonnage annually on the lower river than it is estimated for American tonnage through the Panama Canal. In a few years the canalization of the Ohio will be completed and Pittsburgh, where more tonnage is created than at any other point on the face of the earth, will be connected through the Mississippi River by an all-water route to the sea.

There is no busier valley than the Ohio, and every year shows an increase in the production of those manufactures which go to make up the total of our exports.

The following table will show the marvelous growth both in population, manufacturers, raw materials, wealth, and so forth:

| | 1890 | 1900 | 1910 | United States, 1910. |
|---|---|---|---|---|
| Population | 15,787,014 | 18,796,509 | 21,626,217 | 91,972,266 |
| Capital invested in manufacturing | $1,195,808,000 | $1,934,199,000 | $4,292,841,000 | $18,428,270,000 |
| Value of products | $2,014,930,000 | $2,925,566,681 | $4,905,133,000 | $20,672,052,000 |
| Value of live stock | $551,118,014 | $594,392,384 | $951,525,457 | $4,925,173,600 |
| Bituminous coal products, tons | 73,658,000 | 200,200,000 | 299,885,000 | 378,975,000 |
| Steel products, tons | 3,823,505 | 9,756,803 | 20,374,342 | 23,523,199 |
| Grain products, bushels | 1,306,963,945 | 1,302,181,246 | 1,034,262,415 | 4,512,564,000 |
| Oil products, barrels | 45,145,000 | 58,052,000 | 58,933,000 | 171,559,394 |
| Hardwood lumber products, feet | | | 2,951,432,000 | 8,100,819,000 |
| Brick and tile products | | | $36,400,000 | $92,776,504 |
| Estimated wealth [1] | $13,612,000,000 | $17,583,000,000 | $36,079,000,000 | $187,739,000,000 |

[1] Does not include any of Pennsylvania, $6,151,000,000.

Kansas City, Minneapolis, and Chicago will follow suit in a few years unless Congress can be clamored by those who are raising the cry of pork barrel into the senseless abandonment of projects now adopted.

Of course, Congress will not complete these projects and provide a 9-foot channel out of these great tributaries into the Mississippi River at Cairo and then abandon the channel from Cairo out to the sea. It costs just twice as much to carry freight on a 4-foot channel as it does on an 8-foot channel and proportionately more than on a channel of 10 feet. The engineers have all agreed—and when I say engineers, I mean not only the engineers of the Army and of the Mississippi River Commission, but all other engineers who have given the matter study—that a 9-foot or deeper channel in the Mississippi River below Cairo can not be maintained by any other means than revetment. This opinion was expressed most emphatically by Mr. Lyman E. Cooley in a statement to the committee during our recent hearings. Since the opening of the Panama Canal the Hawaiian Steamship Co. and others have reduced their freight rates from 20 to 50 per cent lower than the railroad rates across the continent. The railroads refuse to meet this reduction. The enevitable result of this has been and will be that the producers of the Mississippi Valley will be seriously handicapped in their competition for the trade of the Pacific by reason of the fact that those who are engaged in similar enterprises along the Atlantic seaboard can reach the Pacific at very greatly reduced freight rates. Hon. Fred Stevens, of Minnesota, one of the most capable and accurate men who has ever served in this House and who had few rivals in this House in his general knowledge of matters pertaining to transportation, in a speech on the rivers and harbors bill last year stated that 75 per cent of the freight in the intermountain territory originated in the Northern States of the Mississippi Valley and 25 per cent on the Atlantic seaboard; and he gave it as his opinion that without the improvement of the Mississippi River and its tributaries, so as to enable the valley States to have water transportation to the sea, in a few years these figures would be reversed and 75 per cent of this freight would originate on the Atlantic coast and only 25 per cent in the Mississippi Valley. Realizing the importance of water transportation, the shippers throughout the valley are making elaborate and costly preparation for the use of the river. Vast sums are being invested in terminal facilities at the various cities along the river and barge lines are being organized and have already begun to launch self-propelled barges to meet the demands of the commerce which is certain to come in the near future.

The Inland Navigation Co. has just launched one 1,600-ton steel self-propelled barge and has laid the hull for three others, which will shortly be put into commission. Thirty-five such barges are contemplated for the near future. Of the 100,000,000 tons of freight which passes through Pittsburgh annually, a great part of it is of such character and bulk as will certainly find it most economical to use the Ohio River as soon as the present project is completed.

It is frequently stated that the commerce on the lower river has entirely disappeared, and while this is largely true as to through commerce from St. Louis, it is not true otherwise.

Since 1880 through commerce has declined, and practically disappeared about 1900. Up to that time 130,000,000 tons of freight, during the 20 years from 1880 to 1900, were actually floated on the lower river and since that time, during the past 16 years, about 42,000,000.

Those who oppose appropriations for the lower Mississippi, when discussing the question as a flood problem, habitually charge the total expenditures by the Mississippi River Commission to the flood-control project, and when discussing the question from the viewpoint of navigation charge the whole sum to that element of the project. The fact is that levees are mainly for flood protection and revetment works mainly for channel improvement.

Since 1900, $16,916,000 have been spent for levees and $27,495,000 for revetment and other works of channel improvement. In testing the river as a highway of commerce it will be fairer and more accurate to take into consideration, therefore, only the money invested in revetment and similar works. In this connection, then, it will be interesting to compare the Mississippi River as a highway for transportation with the Yazoo & Mississippi Valley Railroad, which parallels the river from Memphis to New Orleans. The amount invested in this railroad is $57,628,676, not including the investment in equipment, which is $3,109,814. The annual maintenance of this road is $1,807,796, which does not include maintenance of equipment, which is $1,679,529. Since 1900 the maintenance of this road, not including maintenance of equipment, has cost $28,924,736. During the same time the Mississippi River Commission has spent for revetment and other purposes, including the maintenance of a 9-foot channel, but not including levees, $27,495,585, and this revetment work is all permanent work.

The Yazoo & Mississippi Valley Railroad, which parallels the river from Memphis to New Orleans, running throughout the delta, has been the great competitor of the river, and the following table will prove interesting as a comparison of the river and railroad as economical means for the transportation of products:

| | Yazoo & Mississippi Valley Railroad. | Mississippi River, Cairo to New Orleans. |
|---|---|---|
| Permanent investment (does not include equipment on railroad) | [1] $57,628,767 | [2] $28,700,000 |
| Maintenance for 16 years (does not include maintenance of equipment on railroad) | [3] $28,924,736 | $7,000,000 |
| Total tonnage hauled on river and on railroad in 16 years | 135,690,000 | 42,000,000 |
| Cost per ton for maintainance ..... cents | 0.21 | 0.17 |
| Average cost per ton-mile ..... mills | 6.81 | 1.51 |

[1] Roadbed and structures.
[2] Revetment.
[3] This does not include interest on the investment.

NOTE.—The Yazoo & Mississippi Valley Railroad system lies wholly in the delta between Memphis and New Orleans, the distance between these two river cities being 422 miles.

In this table the roadbed and structures are charged as being permanent improvements of the railroad. Works of revetment are charged as permanent improvement of the river. As a matter of fact, revetment is more permanent than the roadbed of the railroad—in fact, is as permanent as any human structure. The maintenance of the river has consisted largely of dredging across the bars, but after revetment is completed this item of expense will be eliminated, because the river will then maintain for itself a deeper and wider channel than is now provided by dredging. It will be noted also in this table that no interest is charged against the railroad on its permanent investment, and nothing for equipment or for maintenance of equipment. From this statement it will be apparent that the work of revetment has not only been justified in the past but that the revival of traffic on the river, which is sure to come in the near future, will be more than ever justified. Those who endeavor to show by statistics that the tonnage on the river does not justify the money heretofore spent by the Government charge all appropriations, both for levees, revetments, and channel improvement, against the tonnage of the river, and draw their conclusions from this calculation. The same critics, when opposing the appropriation of money for the protection of the deltas from overflow, universally charge all of these same items against that work. This, of course, is manifestly unfair.

In the above table I have assumed that one-third of the revetment work was in the interest of flood protection, and therefore charged only two-thirds against navigation; and in estimating the amount the Government has expended for flood control I have charged all appropriations which were expended for levees plus one-third of the revetment work against work for flood control. If the figures are divided in this way, it will be found that the Federal Government up to date has contributed $48,000,000 toward flood control, whereas the local interests have contributed $90,000,000.

Under the terms of the bill the Government will contribute $30,000,000 for levees and $15,000,000 for revetment; whereas local interests will contribute not less than $10,000,000 for levees, and, in addition, will furnish rights of way, damages, and so forth, and assume all the burden of maintenance. But even if the commerce had passed from the river never to return, which is untrue and wholly and thoroughly improbable that it will ever be true, the money appropriated will have been well invested. Sixteen million acres of the geological cream of the earth are waiting the magic touch to spring into fields of waving beauty. The people of the lower valley have out of their own pockets spent more than $100,000,000 since the Civil War in the construction of levees. This is more than enough to have built the levees high enough and strong enough to have withstood the greatest flood that ever came down the river had not the States of the northern valley perfected their drainage system. They stand ready to continue their contributions, but they do insist that the Federal Government tote its part of the load. Holland spent $46,000,000 to reclaim 2,000 square miles in the Zuyder Zee. Egypt spent $53,000,000 to reclaim 2,200 square miles in the valley of the Nile. Surely this great Nation can afford to contribute $45,000,000 toward the reclamation of 20,000 square miles, when by the same act more than 1,000 miles of the world's mightiest river will be rendered capable of carrying the commerce of an empire.

Now, Mr. Chairman, I will undertake to discuss the provisions of the bill. The first sentence in the bill, the one to which the the gentleman from Pennsylvania [Mr. MOORE] referred a few moments ago, provides for the control of floods and the general improvement of the Mississippi River.

Now, gentlemen, the bill does provide both for flood control and for the general improvement of the Mississippi River, and it does that, as stated in the report, because it was absolutely necessary to do it.

In 1879 when the Mississippi River Commission was appointed to study this problem they were instructed to devise a plan not only for the control of the floods, but for the general improvement of the river; and they have devoted 35 years to the study of that problem in both branches. After devoting 35 years to the study of it, the commission has unanimously reported that there is but one way to control the floods on the Mississippi River, and that there is but one way to improve the navigation of the Mississippi River, and that the same methods must be employed whether you are to control the floods or whether you are to improve navigation. In other words, it is necessary to revet the banks of the river and prevent them from caving in.

The Committee on Flood Control did not wish to exceed its jurisdiction under the rules. It was our earnest desire to confine this legislation solely to matters of flood control. We called the engineers before us and examined them very carefully and went into this matter, not only with the members of the Mississippi River Commission but with the Chief of Engineers and with the engineers in the Army under the Chief, and we were forced, as stated in the report, to the conclusion that it would be impossible to separate the two activities. The river can not be improved for navigation except by the sole means of reveting the banks and preventing the caving of the vast amount of earth into the river, which would fill it up. There is not any difference of opinion among any of the engineers on that subject, whether they be Army engineers or civilian engineers. It is the one question about which all engineers who have examined into the project unanimously agree. It is not possible to maintain a levee system for the prevention of floods without preventing the banks from caving into the river.

As an illustration of that, in one of the levee districts which comprise my congressional district there were 189 miles of levees. From 1884 to 1904 172 miles of the 189 miles were abandoned on account of caving banks. And this condition obtains along that reach of the river from Cairo down to the mouth of the Red River very generally. So that it was necessary—not a matter of choice but a matter of necessity—that the committee in making the provision should provide for the adoption of the plan of the Mississippi River Commission, and that plan contemplates both flood control and the improvement of navigation. Now, gentlemen, let me say in the outset, that this bill does not, as the gentleman from Pennsylvania [Mr. MOORE] declared that it did, appropriate $45,000,000. It does not appropriate a cent of money. The committee has no authority to appropriate, as the rule stated which the gentleman read immediately after he made that declaration.

The Mississippi River is not a new project. The House is not called on to adopt any new project. The project for the control of the floods of the Mississippi River and for the revetment, which is to be carried on under the provisions of this bill, was adopted by the House in 1881. Ever since that date Congress has been appropriating money to carry on the project. For that purpose many millions of dollars have been spent. Since 1879 some $85,000,000 have been spent by Congress for the two purposes. Twenty-nine million dollars of it have been expended in levees for the purpose of controlling the floods, $43,000,000 have been spent in revetments for the double purpose of controlling the floods and to conserve navigation, and about $10,000,000 have been spent in other works of channel improvement.

It is suggested that I explain what revetment means. Revetment is the process by which the banks are protected from caving. Willow trees are woven together in a long mattress, sometimes 150 or 200 feet wide and as long as 1,000 or sometimes 1,200 feet. After being woven together they are taken at the low-water level of the river and fastened securely, and then stones are thrown on top of the revetment, and it gradually sinks down and conforms to the irregularity of the bank under the water. It is never exposed to the air after that, and becomes a permanent work—as permanent as any other human structure. Recently there have been some discoveries by the engineers in other methods of revetment by which they will do this work with concrete instead of with willow mattresses. If that method is demonstrated to be a success, it will effect a saving of perhaps one-third in the cost of the revetment.

Mr. HICKS. Mr. Chairman, will the gentleman yield for a question?

Mr. HUMPHREYS of Mississippi. I yield to the gentleman.

Mr. HICKS. I understand that the gentleman states that these revetments are as permanent as any human structure can be.

Mr. HUMPHREYS of Mississippi. Yes.

Mr. HICKS. How long have they been in the river at the present time? What is the oldest one?

Mr. HUMPHREYS of Mississippi. About 30 years in the Mississippi River. Similar structures have been in the Nile for many hundred years.

Mr. HICKS. And there is no deterioration in those that have been there for 30 years?

Mr. HUMPHREYS of Mississippi. None whatever.

Mr. Chairman, before I proceed further, I would like to be notified when I have occupied 30 minutes.

Mr. HUDDLESTON. Will the gentleman yield for a question?

Mr. HUMPHREYS of Mississippi. I yield to the gentleman from Alabama.

Mr. HUDDLESTON. I have heard it asserted that the bed of the Mississippi River was constantly rising with reference to the sea level, and I would be glad if the gentleman would state what information the committee has been able to obtain on that subject.

Mr. HUMPHREYS of Mississippi. There is no subject that has been more thoroughly studied than that particular one. It is not true, although it is a very popular misunderstanding, very generally believed. The fact that it is so believed is due to this condition: Before the levees were constructed there the water spread out over a great valley 40, 50, or 80 miles wide. After the levees were constructed, confining that flood within these levees 3 or 4 miles apart, the flood height naturally was elevated, and the common explanation of that phenomenon was that the bed of the river had silted up, and for that reason the flood level was elevated. But that is not true.

When the river is low, nobody is interested in it; nobody observes the river when it is at its low stage. Of course, if the bottom of the river had filled up, the low-water level would have been elevated just as the high-water level, which is not the fact. When the river goes down, the low-water level is just as low now as it ever was before. But because of the fact that this belief was so general the Mississippi River Commission undertook to demonstrate the fact by actual measurements. They established permanent bench marks, to which all the levels could be referred, and they began at Cairo in 1882 and they made soundings along the whole length of the river, three to a mile, 75 feet apart across the river, and for 30 years they have been measuring the river to ascertain whether it was filling up. Along 200 miles of the river in front of my district they have taken 40,000 soundings, and the result of it all demonstrated that the tendency rather has been to depress the bed than to raise it.

Mr. TILSON. Will the gentleman yield just one moment there before he leaves that point? How does the gentleman explain the fact frequently stated that the Atchafalaya Basin is lower than the Mississippi River, and, as I understand, that the Yazoo Valley, too, is lower than the bed of the Mississippi River? Also the fact that few small streams from either side enter the Mississippi River, but run in the opposite direction, toward the Atchafalaya and the Yazoo?

Mr. HUMPHREYS of Mississippi. The facts, of course, are not as the gentleman states them. The Mississippi River is higher than the Atchafalaya Basin, and is higher than the Yazoo Basin when it is in flood, but it is 40 feet lower than those basins when there is no flood. Of course, if the bottom of the river filled up, it would remain higher. It is true of alluvial streams in every country in the world that they flow on top of a ridge, because as they overflow the solid particles held in suspension are precipitated readily, and the result is that the high spot of every alluvial plain is that immediately adjacent to the stream, whether it is a big stream or a little one; but the Yazoo River flows into the Mississippi River. The Atchafalaya is an outlet of the Mississippi; but all that country is very much higher than the Mississippi. It is not true of any river in the world, except a few like those that empty into Lake Bewa, in Japan. It is true of the Feather River, in California, and true of the tributaries of the Sacramento, where they come down out of the mountains on a steep slope, and, of course, for that reason can carry very much more silt than they can when they strike a level plain. As soon as they strike the level plain they begin to precipitate the silt; but it is true of no other rivers in the world.

Mr. TILSON. The water actually runs out of the Mississippi River into the Atchafalaya.

Mr. HUMPHREYS of Mississippi. It runs out of the Mississippi in flood time. The Atchafalaya is an outlet of the Mississippi. It is one of the outlets of the Mississippi River. It goes out into the sea; but if the gentleman will look at the map he will note the geological formation that has taken place in all the years that have gone by, and he can see just how the Mississippi River runs out into the sea and builds its banks up on both sides, but this idea that the river is silted up is erroneous. A French engineer, De Prony, started that story about the Po River some hundred years ago, and Lombardini, a great Italian engineer, devoted a great deal of his time to the investigation of it, and compared the records that had been preserved for more than 200 years and utterly demonstrated the inaccuracy of De Prony's statement. Now, the same statement has been made as to the Yellow River in China. One can get by with almost any statement about something that happens in the center of China. You can say that the cows there shed their horns annually, and nobody will be able to disprove it, because nobody has been there. Nobody knows much about the Yellow River, but it is not true of any other river. Gen. James H. Wilson, of the Engineer Corps of the United States Army, back some twenty-odd years ago, while visiting in China went out into the middle of the Kingdom to examine the Yellow River and ascertain whether it was true. The story was that it had so silted up that the bottom of the river was higher than the adjacent country. As soon as he crossed over the levees, he noticed that they were perhaps a quarter of a mile from the river, and he could not see any river. He rode over to the river, and had to go down the banks of the river into the bed of it, just as he would at any other stream. He studied it as well as he could from the limited amount of data available. His letter is published in the report that I made on the Mississippi River three years ago, and in it he gives it as his opinion that it is not true of the Yellow River.

Mr. McKELLAR. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. McKELLAR. In stating the amount that has been appropriated for the river I think the gentleman said it was $29,000,000 for levees, but the gentleman did not state what the levee districts have appropriated.

Mr. HUMPHREYS of Mississippi. Since 1890, when the Government began to build levees for the purpose of protecting the country from floods, the National Government has appropriated $29,000,000. The people in the levee districts, since 1882 when the commission began work, have expended for the same purpose $91,000,000, or about 3 to 1.

Mr. STAFFORD. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. STAFFORD. What is the proportion that each State has contributed in that amount?

Mr. HUMPHREYS of Mississippi. I can not state the proportion. I might be able to give the gentleman the figures.

Mr. STAFFORD. Can the gentleman state proportionately how much has been contributed by the States?

Mr. HUMPHREYS of Mississippi. Each State has expended its money along its own front. Some levees have been con-

pleted. There is a levee district in my district where there is no contribution by the Federal Government because the levees are completed. There is another levee district in my State that has spent about the same amount of money, but the levees have caved into the river continuously. We have had more than 90 per cent of the levees cave into the river in the last 30 years.

Under the contemplation of this bill the Federal Government will contribute $30,000,000 in the next five years for the construction of levees. Local interests will contribute under the terms of the bill not less than $10,000,000, and in addition they will provide the rights of way and stand for whatever damage is caused by the condemnation of property for the rights of way.

Mr. STAFFORD. Can the gentleman give the amounts by States that have been appropriated for levees?

Mr. HUMPHREYS of Mississippi. The gentleman understands that appropriations were not made by States, but by levee districts, and there are 20 or 25 levee districts. I can not give those details, but I can print them in the RECORD.

Mr. STAFFORD. I was wondering whether some States were alert in protecting the people by building levees in their districts along the Mississippi and other States were negligent.

Mr. HUMPHREYS of Mississippi. I think not. I think that the States have done all that they could do. That has been the report of the Mississippi River Commission—that in the opinion of the commission the people have paid everything they possibly could pay. They have resorted to every species of taxation known. We have an ad valorem tax levied on all property running from 15 to 17½ mills; that is, on real and personal property. In addition, we have an acreage tax, and in addition to that an occupation tax. That is, any man engaging in business for hire must pay for the privilege. Then we have a production tax; every bale of cotton is taxed; every ton of hay is taxed; every barrel of molasses, every barrel of sugar, every bag of rice, every bushel of potatoes, every barrel of oysters is taxed. We put a tax on everything, and in addition to that we have issued bonds. The levee districts have issued about twenty millions of bonds. Those investing in the bonds have never been entirely certain that the Federal Government is going to lend its strong arm to this work, and they were not willing to take the bonds at a low rate of interest, and so the districts had to pay nearly 6 per cent. But after doing that they were enabled to raise $91,000,000. and the commission says that it does not believe that they are able to raise any more annually than they are now contributing.

Mr. SLOAN. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. SLOAN. In relation to the contribution provided for in this bill it says that not less than one-third. What does that really mean, that it shall be one-third, or it may be one-third here and two-thirds there, according to some rule where one community would be required to pay a greater proportion than another?

Mr. HUMPHREYS of Mississippi. There are some levee districts that could contribute more than that. One in my district that I have no doubt if any money were allotted by the commission for the construction of levees in that district would be required to make a much larger contribution than one-third, whereas there is another levee district, also in my district, that could not possibly raise more than one-third because they are now bonded up to the limit, not only to the limit of the law but to the limit that the banks of the country will take their bonds.

Mr. SLOAN. Will the master of the flood give an opinion of whether, if this appropriation is made, it will be operative in controlling the floods of the Mississippi?

Mr. HUMPHREYS of Mississippi. There is no doubt about that in my mind or in the minds of the engineers. If 155,000,000 cubic yards more are added, it will build the levees up to such a height as will successfully withstand any flood that has ever come down, and will put the levees about 4 feet higher than any flood that has ever come down.

Mr. SLOAN. Has the United States ever contributed anything to the fund against the floods of the Mississippi under the name of flood control?

Mr. HUMPHREYS of Mississippi. Not exactly under the name of flood control, although the organic act said flood protection.

Mr. SLOAN. It went in under the head of the improvement of the river for navigation.

Mr. HUMPHREYS of Mississippi: For the first 11 years Congress forbade the commission to build any levees that would protect private property unless the levee in the opinion of the commission was absolutely necessary in the interest of navigation. But in 1890 that proviso in the bill was stricken out, and since then moneys have been expended for the protection and construction of levees, the main purpose of which was to protect the country from flood.

Assuming that it was for that purpose, the Government has contributed $29,000,000.

Mr. SLOAN. And this bill would give positive authority for defending against the floods where it has been implied heretofore.

Mr. HUMPHREYS of Mississippi. Yes; but it would be expended in the way it has been expended ever since 1890.

Mr. CANNON. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. CANNON. I notice, on page 6 of the bill, as to the Sacramento River, that when the work is completed the State of California is to thereafter maintain it. Is there any such provision touching the Mississippi River?

Mr. HUMPHREYS of Mississippi. No; and I will say this about the Mississippi. There will be no objection on the part of the committee at all if an amendment to that effect be offered. It did not occur to the committee, and it did not occur to me, in drafting the bill until after the bill was printed, because the local interests have always maintained them for the last 35 years. It was generally assumed on all sides that they were going to continue to do it.

Mr. CANNON. The committee will then move such an amendment?

Mr. HUMPHREYS of Mississippi. The committee will be perfectly willing to accept that.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. STAFFORD. Has any estimate been made as to the total cost that will be necessary to complete these levees so as to place the banks and all the lands adjacent thereto free from flood damage?

Mr. HUMPHREYS of Mississippi. Yes; $40,000,000.

Mr. STAFFORD. That will complete the work?

Mr. HUMPHREYS of Mississippi. That will absolutely complete the levees so high——

Mr. STAFFORD. So that the National Government will be called upon for no additional improvement so far as the levee improvement of the Mississippi is concerned?

Mr. HUMPHREYS of Mississippi. Absolutely—so high and so strong that there is no reason to suppose any flood will ever breach them. I assume, however, that so long as we have unsinkable ships that hit icebergs, so long as fireproof buildings sometimes burn, it may happen that a levee will break.

Mr. STAFFORD. The $40,000,000 is for a completed project?

Mr. HUMPHREYS of Mississippi. Yes. It is roughly estimated that of that amount the Federal Government will contribute in the neighborhood of $30,000,000 in five years.

Mr. STAFFORD. One other question. Why does the committee place three-fourths of the burden of building these levees, which are not exclusively for the benefit of navigation, upon the Federal Government and only one-fourth upon the local districts, whereas respecting the Sacramento proposition it places one-half of the burden upon the State of California and one-half upon the National Government?

Mr. HUMPHREYS of Mississippi. If the gentleman will just note the figures he will see that after the Federal Government has expended these $30,000,000 it will still have paid very much less than one-half; that the local interests in the Mississippi Valley will have contributed more than one-half.

Mr. STAFFORD. I understood from the gentleman's statement that much of that has been wasted by the washing out of these levees.

Mr. HUMPHREYS of Mississippi. Yes.

Mr. STAFFORD. So that the National Government may contribute more than one-half.

Mr. HUMPHREYS of Mississippi. No. The contribution to the Mississippi River will be less than one-half, even if this bill should pass. It will be still very much short of half.

Mr. STAFFORD. And yet, as to the Sacramento proposition, the State has been expending money there of its own freely, without any support from the National Government, and, arguing correspondingly, the National Government will be contributing less than one-half.

Mr. HUMPHREYS of Mississippi. To show the gentleman where he is mistaken, the reclamation projects in the Sacramento River have been all done by private interests, and the reclamation project in the Sacramento River will be continued to be done by private interests. That is true also in the Mississippi. We have there under construction to-day $39,000,000 worth of reclamation works, to be borne wholly by private interests. There has never been any thought of the Federal Government contributing to that. Nobody has ever asked the Federal Government to contribute anything toward reclamation. We have about $39,000,000 plus of reclamation projects under

way in the Mississippi Delta to-day. We have only three and a half million acres in cultivation out of this possible 16,000,000, and there is another reason that I can give that I should think would satisfy the gentleman. The State of Wisconsin—all of the States above the mouth of the Ohio River—has contributed and will continue to contribute very materially to the distress which has overtaken us in the lower Mississippi, whereas the Federal Government, in that sense, has not contributed anything toward the distress in the Sacramento. That might be given as one reason.

The gentleman, if he has read the report, will remember that Col. Leach stated in his testimony that at least three-fourths of the money which had been expended by the States in the lower valley for the construction of levees would have been saved if the Federal Government had prevented those banks from caving, and those banks are made to cave by this tremendous body of water, which is precipitated upon the lower valley by reason of the reclamation projects in the northern States. I mean drainage projects, undertiling of farms, straightening of creeks, getting the logs out, and so forth. That has hurled this water, which formerly lagged in a thousand or 10,000 natural reservoirs, into the river and it has precipitated itself upon us in gradually and progressively increasing quantities, and the result is that it not only has overtopped the levees and overflowed the country, but has put an additional burden upon the people of making those levees higher. It has eroded the banks and crumbled the friable soil of which the banks are composed and tumbled those levees into the river to such an extent that the Army officers say that three-fourths of the money which the local interests have expended would have been saved but for this caving of the banks.

Now, these are reasons that I am sure will appeal to the gentleman.

Mr. STAFFORD. The gentleman has singled out the State of Wisconsin as contributing to the deluge of waters in the Mississippi. I wish to say, as a Representative from Wisconsin, that I believe that State has done more than any of the Northern States to control the flood waters of that State so as to obviate not only flood conditions of the State but flood conditions of the lower Mississippi.

Mr. HUMPHREYS of Mississippi. Then I will charge it to Ohio, Indiana, and Illinois. I said Wisconsin because the distinguished gentleman is from Wisconsin, and he held my attention above that of gentlemen of Illinois, Indiana, Iowa, or Ohio. Therefore I mentioned Wisconsin for the same reason that I mentioned districts in Mississippi, because I am from that State. I did not wish to say and I did not mean to single out Wisconsin as a particular sinner against us, because she has contributed only a part of it.

Mr. STAFFORD. I want to point out that Wisconsin is singular and not in company with these other States in coming here and asking for Federal contribution for flood control.

Mr. CANNON. The gentleman forgets the Fox—the Wisconsin improvements.

Mr. MANN. They do not use tile drains in Wisconsin, perhaps.

Mr. HUMPHREYS of Mississippi. I do not know whether they are up to date in Wisconsin as in other States that have inaugurated these great drainage districts, that have undertiled their farms, and have drained these great lagoons which acted in former days as reservoirs. I assumed they have done it in the State of Wisconsin; but now, rather than prolong any argument in reference to Wisconsin, I withdraw what I said about it.

Mr. STAFFORD. I feel honored, and I do not wish the gentleman to withdraw it.

Mr. SIMS. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I will.

Mr. SIMS. This contemplated improvement under the gentleman's bill and the further river and harbor improvements contemplated will revet the river banks so they will not wash under?

Mr. HUMPHREYS of Mississippi. Well, in the course of human events, yes; but these revetments will proceed for many years for this reason: If I had known this map was here I would have pointed out on it instead of getting into a controversy with the gentleman from Wisconsin. Here is an answer to the question right here. These revetments must proceed through many years for this reason: That all the banks of the river do not cave at the same time. They will be caving here this year and yonder next year, but it will probably take 20 years, as the engineers state, maybe 25 years, before all the caving banks are finally revetted so there will be no more caving, and this work will have to go, so far as most of us are concerned, on forever. The levees will be completed in five years. The engineers have already estimated to us what the saving would be if we get away from the present plan of caring for these floods of the lower Mississippi and adopt the plan suggested in this bill, to authorize them to make continuous contracts in order to do the work continuously. Col. Townsend, one of the most conservative of them all, says we will save at least $5,000,000 in the five years. Under the river and harbor bill now we appropriate $6,000,000 a year. This bill contemplates increasing that to $9,000,000, adding thereby $3,000,000 to the total appropriation which will be carried for that purpose, and, according to the estimates, the irreducible minimum, will save a million dollars a year, and in addition to that will complete this job, that was undertaken 35 years ago, in five years.

Mr. MANN. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I do.

Mr. MANN. At some time I want to ask the gentleman a question about section 3. I do not wish, however, to interrupt the gentleman.

Mr. HUMPHREYS of Mississippi. I shall be very glad to answer now, although I do not want to consume too much time; but the understanding is under the five-minute rule there will be more or less generosity in debate.

Mr. MANN. Section 3 provides:

> That all money appropriated for works and projects relating to flood control hereafter authorized shall be expended, etc., under the Secretary of War.

These new forests we are creating along the Appalachian and White Mountains were created as a part of the effort to control the flood waters?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. MANN. We have got a lot of projects of that kind. Under the terms of this bill that would be transferred to the War Department.

Mr. HUMPHREYS of Mississippi. It certainly was not contemplated by the committee that the projects authorized by Congress hereafter for the flood control——

Mr. MANN. But it was not contemplated when we provided for the Flood Control Committee that they would provide for appropriations for improvement of the Mississippi River, but they are doing it.

Mr. HUMPHREYS of Mississippi. No; we are not providing any appropriations in this bill.

Mr. MANN. You are authorizing appropriations; that is, providing for appropriations.

Mr. HUMPHREYS of Mississippi. That was contemplated, was it not, when the committee was created?

Mr. MANN. I am not caviling about that. One thing leads to another. If you say all projects relating to flood control will be under the War Department, and then provide for a forest on the sole ground, as a constitutional proposition, that it is to control flood waters that may affect commerce, how are you going to escape transferring that to the War Department?

Mr. HUMPHREYS of Mississippi. It certainly ought not to be transferred to the War Department. I assume there will be no trouble about that. If the gentleman has any suggestion to make there, I will be very glad to consider it.

Mr. MANN. I have a suggestion to make. I think that language ought to be changed. I will not say how.

Mr. HUMPHREYS of Mississippi. Very well. We will be very glad to consider that.

Mr. KEATING. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Certainly.

Mr. KEATING. How many acres of land will be reclaimed?

Mr. HUMPHREYS of Mississippi. Sixteen million acres. By reason of the fact that there are a number of tributaries entering the river, and therefore it is impossible to levee across them, and water backs up into those tributaries, there are 4,000,000 that are not being protected under the provisions of this bill, but there are 16,000,000 acres that will be protected from overflow under the provisions of this bill, and only three and a half million of that already under cultivation. The other is very generally cut-over woodland.

Mr. KEATING. To what extent will the owners contribute?

Mr. HUMPHREYS of Mississippi. They have already contributed $91,000,000, and under this bill will contribute not less than $10,000,000 more, and in addition to that will provide for the raising of money to pay the damages incident to the construction of levees and rights of way and take care of maintenance.

Mr. KEATING. So that when you say $91,000,000 was contributed by the owners of the land—was that money contributed by the State?

Mr. HUMPHREYS of Mississippi. By the owners of the land.

Mr. KEATING. And assessed back in the form of levee taxes?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. SLOAN. Of that 16,000,000 acres, is a large part of it State land and Government land?

Mr. HUMPHREYS of Mississippi. No Government land, practically none of it, but in private ownership.

Mr. SLOAN. I heard a discussion under the river and harbor bill where it spoke of a large tract of land in Missouri and Arkansas——

Mr. HUMPHREYS of Mississippi. The St. Francis Basin, where there are some 50,000 acres of Government land, and, of course, there is other land, but out of the 16,000,000 acres that will be protected the number of acres belonging to the Government is very small. It is not considerable.

Mr. SLOAN. How much would there be of the State land?

Mr. HUMPHREYS of Mississippi. Practically none. Practically all of it is in private ownership.

Mr. CHIPERFIELD. I have not had the privilege of hearing all of the gentleman's statement. Is the scheme for flood control contained in this bill for the building of levees principally?

Mr. HUMPHREYS of Mississippi. Levees and revetting the banks.

Mr. CHIPERFIELD. Do those levees allow any greater area of flow for these floods than heretofore, or is it carrying out the scheme of levee construction that has heretofore been inaugurated for the purpose of preserving and reclaiming land?

Mr. HUMPHREYS of Mississippi. No. It is to proceed under the plans that have been proceeded under heretofore under the Mississippi River Commission. The bill provides "under the plans heretofore or hereafter adopted by the commission." Now, the commission is of the opinion that there is one way by which these floods can be controlled, and there is one way by which navigation in the river can be maintained, and that is the one and the same way of building the levees along the banks and then revetting the banks so that they will not cave into the river. Now, it has been suggested by some of the members of the Mississippi River Commission, and that suggestion is contained in the hearings, that some of these levees that are built will have to be moved, and there is no doubt about that. Some of the levees will have to be relocated for one or another reason. The river has encroached upon some so near that it will be dangerous to let them remain there, and then lines will have to be relocated for other reasons.

Now, when that is done the locality must provide the right of way, and in the State of Mississippi and in the State of Arkansas must pay the damage that is done to the man who is turned out, whose plantation is turned outside, and they must maintain the levee; and, of course, whatever is contributed to prevent the breaking of the levee in times of great flood will not be reckoned as a part of the contribution.

Mr. CHIPERFIELD. Mr. Chairman, will the gentleman yield there for a further question?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. CHIPERFIELD. If the question of flood control is separated from the question of land reclamation, would not the subsequent treatment require that a larger area should be left for the river to occupy? I do not perhaps make myself clear, but I guess, perhaps, the gentleman has caught the thought I have in mind.

Mr. HUMPHREYS of Mississippi. The purpose of flood control is to enable the people to reclaim the overflowed land. They would set the levees as near to the river as they thought it would be safe to set them. I do not know whether I get the gentleman's idea or not.

Mr. CHIPERFIELD. The thought of the land reclamation is to get the levee down to the water, as near as possible to the river, so as to get as much area of land as possible for cultivation, but the necessities of flood control would suggest that you would leave as large an area as possible for the flowing channel as could be done from an engineering standpoint. I wondered what scheme was adopted in this case.

Mr. HUMPHREYS of Mississippi. The gentleman will understand that when so many miles of levee are built up almost high enough it would be uneconomical to attempt to set them back to a considerable degree, so that in the main the levee will be left as it stood, except that it will be strengthened; and in this process of preventing the caving of banks, even if the levee is only two or three hundred feet from the river, it can be made perfectly secure.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I yield to the gentleman.

Mr. WALSH. The gentleman may have stated it before, although I have not noticed it; but will the gentleman state how much his own State, as a State, has contributed toward this condition?

Mr. HUMPHREYS of Mississippi. As a State, nothing at all.

Mr. WALSH. Well, have any of the States contributed as States?

Mr. HUMPHREYS of Mississippi. The State of Louisiana, according to my recollection, contributes a 1-mill tax on the property in the State of Louisiana, I think, and that goes into the levees. But the State of Mississippi and the State of Arkansas have not contributed anything.

Mr. WALSH. The contributions have been confined to the levee districts?

Mr. HUMPHREYS of Mississippi. Yes; they have been confined to the levee districts. The people who live in the deltas have put up all the money themselves.

Mr. REAVIS. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. REAVIS. This bill authorizes an appropriation of $45,000,000, to be expended under the authority of the Mississippi River Commission. Recently we made an appropriation in the river and harbor bill. Will that appropriation be considered as a part of the $45,000,000 authorized by this bill?

Mr. HUMPHREYS of Mississippi. The six millions carried in the river and harbor appropriation bill, which is the usual sum heretofore appropriated by the House, takes care of the Mississippi River for the fiscal year beginning July 1, 1916. Now, whatever is appropriated under the authority of this act, this pending bill, will begin with the fiscal year beginning July 1, 1917. Nothing here will be added to the six millions. This will be for the subsequent year.

Mr. REAVIS. This $6,000,000 that we have appropriated in this river and harbor bill would not, under the gentleman's construction, be included in this $45,000,000 authorized, or will it be $45,000,000 authorized in addition?

Mr. HUMPHREYS of Mississippi. The $45,000,000 will be authorized in addition.

Mr. REAVIS. In addition to the $6,000,000 appropriated in the river and harbor bill?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. SHALLENBERGER. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. SHALLENBERGER. I would like to know if you are prepared to give us some information in regard to the plans for preventing floods by retaining the waters near the sources of the stream, as I understand it has been developed in other countries and is now contemplated to be worked out in Ohio, as I understand, and in other States, in reducing the flow of water by utilizing the waters and storing them higher up in the stream?

Mr. HUMPHREYS of Mississippi. Yes. We have gone very thoroughly into that, so far as the lower Mississippi River is concerned, and it has been the testimony of all the engineers who have examined into it that it could not be done except at an expenditure of a sum so enormous that it would stagger Congress to contemplate it.

The only estimate I have ever seen made by any engineer connected with the Government was by Mr. Leighton, who was at one time a topographer or geographer, or something of that kind, connected with the Geological Survey. In a letter to Senator RANSDELL, which was published in the RECORD some years ago, he said that reservoirs could be constructed in the Ohio Valley that would control the floods of the Ohio River, and therefore the floods of the Mississippi, and that that could be done at a cost of from $500,000,000 to $1,000,000,000; so that the gentleman sees it is no estimate at all, because he could not come within $500,000,000 of the cost of it. Mr. Cooley, a very eminent engineer, was before our committee the other day, and his idea was that the floods of the lower Mississippi could be controlled and kept within the banks by the treatment of the watershed above the mouth of the Ohio. He expressed it this way: He said, "If I were a despot and were not hampered by any limitation of funds, I could do that work. Probably it would take a generation or so to complete it, but it could be done." But we have never had an estimate. He did not undertake to estimate it. We have never had any estimate from any of our engineers of the Army who have examined it, or the Mississippi River Commission. They have all in their investigations said that there was but one way to control those floods, and that was by means of levees and revetments.

Mr. RUCKER. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. RUCKER. As I understand, it is contemplated by the bill under consideration that the States in which these levees are to be built are to furnish the right of way and pay any

damages incident to the establishment and location of the right of way?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. RUCKER. I understood the gentleman to say a moment ago that each State where the levee is built will maintain the levee after it is constructed. Now, the question arises in my mind, What power has the General Government to compel the States to maintain that levee?

Mr. HUMPHREYS of Mississippi. None at all.

Mr. RUCKER. Then, suppose on the west side of the river the levee will run along the Louisiana shores and the Arkansas shores, and suppose the levee should break, a mile wide, or 10 miles wide on the Arkansas shore, thus turning all the water in Arkansas loose, to flow down into the State of Louisiana.

Mr. HUMPHREYS of Mississippi. It does do it; it did this year.

Mr. RUCKER. Would there be a liability on the part of the Federal Government to recoup those citizens who lose their property by reason of the breaking of the levee that the Government itself constructs?

Mr. HUMPHREYS of Mississippi. There would not. There would not be a liability on the part of anybody.

Mr. RUCKER. The Government having constructed the levee and held the water back until it gets up high over the adjacent land——

Mr. HUMPHREYS of Mississippi. That question has been tried out in all the courts.

Mr. RUCKER. But you think there is no way to compel the States?

Mr. HUMPHREYS of Mississippi. No; no way to compel them.

Mr. RUCKER. That being true, I was just curious to know what the gentleman's attitude was.

Mr. HUMPHREYS of Mississippi. There is no way to compel them.

Mr. RUCKER. I was curious to know why the gentleman made that statement in connection with his explanation of the bill.

Mr. HUMPHREYS of Mississippi. It would be left to them to maintain. Of course, they will maintain it. If they do not maintain it, they will be drowned.

Mr. RUCKER. If the Government spends $45,000,000 in building these levees and revetting the banks, and the levee should break for a 10-mile stretch, would not the Government then be compelled to do it, in order to save the money that it had already invested?

Mr. HUMPHREYS of Mississippi. I may answer that by saying that the people there have spent over $100,000,000. We have spent $91,000,000 since 1882. Of course, they would do all they could to prevent any such disaster; but there never has been such a cataclysm as the gentleman suggests, of a 10-mile break in a levee. I assume that if that should happen, the chances are there would be a great cry for Federal aid, because it would be a disaster almost beyond imagination.

Mr. RUCKER. I hope the gentleman does not misunderstand my inquiry.

Mr. HUMPHREYS of Mississippi. I do not.

Mr. RUCKER. The gentleman is presenting his bill. I am not antagonizing it. I wanted an explanation. While the past furnishes no precedent of a 10-mile break, I am inclined to think when you build walls of dirt on each side of the Mississippi River, and do nothing to check the great quantity of water that comes down into that narrow channel, as suggested by the gentleman from New York, there will sometime be a break of more than 10 miles.

Mr. HUMPHREYS of Mississippi. Perhaps so, but that is the way God Almighty provides against floods. He builds great earthen mounds on each side, which we call hills.

Mr. RUCKER. The gentleman is not content with what God Almighty did.

Mr. HUMPHREYS of Mississippi. He did not build any close to the banks of the Mississippi River, and we are trying to build them now. We are going to build earthen mounds, which we hope will be strong enough to hold the river. But that is a great engineering problem; and there is only one way for us to ascertain how to do it, and that is to set the engineers to work. We started in 1822. Since 1822 we have appointed commission after commission. We have had one commission composed of engineers from the Army and engineers from civil life and from the Coast and Geodetic Survey, and they have been unanimous always. There has never been any difference of opinion among them. They have all reached the same conclusion—that the way to do it is to build levees. Now, that being true, the committee must assume that they know what they are talking about.

Mr. RUCKER. Just one moment, if the gentleman will pardon me. I want to make this statement, if the gentleman will allow me——

Mr. HUMPHREYS of Mississippi. I must conclude——

Mr. RUCKER. I do not care how many engineers have said so. I think when you undertake to throw the quantity of water that there is there in between two walls, when it now spreads over 25 miles of territory, you have got to put those walls farther apart than the banks of the river or you will never succeed.

Mr. HUMPHREYS of Mississippi. The gentleman says the engineers have got it all wrong. I think he ought to suggest the right way, so that we can follow the right way, so that we will not make any mistake. We are about to spend a great deal of money, and all the engineers have agreed as to how it ought to be expended. If we are not going to take their advice, the gentleman ought to be able to tell us what to do.

Mr. RUCKER. I am asking the gentleman what to do.

Mr. HUMPHREYS of Mississippi. I say follow the advice of the engineers.

Mr. RUCKER. If the engineers recommend putting the levees on the banks where the levees now are, I am not in favor of it; I do not care how many engineers suggest it.

Mr. HUMPHREYS of Mississippi. The gentleman ought to suggest some other means.

Mr. RUCKER. "The gentleman" does not have to suggest any other means. I do not believe the remedy is sufficient. I do not believe that conclusion is a wise one.

Mr. SLOAN. The gentleman from Missouri and the gentleman from Mississippi have spoken about the States maintaining these levees when they are built.

Mr. HUMPHREYS of Mississippi. Not the States—the levee districts.

Mr. SLOAN. No State, such as Louisiana, Mississippi, or any other State, would be called on or expected to be called on to assume any such burden. It is to be the levee district.

Mr. HUMPHREYS of Mississippi. The levee districts, the people themselves.

Mr. RUCKER. They ought not to expect the levee districts to do it after the Federal Government has undertaken it.

Mr. HUMPHREYS of Mississippi. They either will have to do it or they will be overflowed. You do not have to require a man to keep his house from catching fire. If he does not, it will burn up.

Mr. RUCKER. But if the Government adopts the policy of building houses when they have burned down, there will be a great many more of them burned down.

Mr. HUMPHREYS of Mississippi. If the gentleman can conjure up any scheme by which we can force these people to maintain these levees——

Mr. RUCKER. The gentleman ought not to put me in that attitude. I am not an expert like the gentleman from Mississippi. I think with his vast experience he ought to know more about high water than any other man on earth.

Mr. HUMPHREYS of Mississippi. If that be true, then I want to put my opinion against that of the gentleman, and I believe that the construction of these levees will absolutely prevent floods.

Mr. RUCKER. I hope it will, but I want to say to the gentleman that I do not believe it.

Mr. CROSSER. The gentleman says the engineers are unanimous. He does not mean engineers generally, but only the engineers of the Mississippi River Commission?

Mr. HUMPHREYS of Mississippi. Yes; I mean all the engineers that the Government has ever set to work on this problem.

Mr. CROSSER. They are Army engineers only?

Mr. HUMPHREYS of Mississippi. No; they are not Army engineers only. Maj. Ockerson is not an Army engineer. He is a very distinguished civilian engineer. He has been on the Mississippi River Commission for 30 years—a civilian engineer. He is so distinguished that when the Colorado River broke loose a few years ago and Congress undertook to correct that President Taft employed him to go down and take charge of the work. We had Maj. Harrod, a civilian engineer so distinguished that he was appointed by the President of the United States as one of the original Panama Canal Commissioners to go down and supervise that. Mr. Richardson was a civilian engineer.

Mr. CROSSER. There are a great many who do not agree that this is an effective way.

Mr. HUMPHREYS of Mississippi. I do not think there is any engineer who has ever made two years' study of this river who does not agree to it.

Mr. CROSSER. Mr. Cooley has studied the Mississippi River, and he does not agree.

Mr. HUMPHREYS of Mississippi. Mr. Cooley said that if it were possible to give constitutional treatment, and if he were a despot with unlimited means, he would in the course of a generation or so by treating the source streams control the flood; but he said the patient is sick, the patient demands a palliative, the patient must have a hypodermic to relieve him now, and therefore he said the thing to do now is to build the levees and revet the banks. [Applause.]

Mr. STAFFORD. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. STAFFORD. I would like to have the attention of the chairman of the committee. There are a number on this side who are opposed to the bill and a number who are in favor. I would like to know if it is agreeable to the chairman of the committee that those in opposition shall have as much time to speak under the extension of the five-minute rule as gentlemen who are in favor of the proposal?

Mr. MANN. Why does the gentleman raise that question now?

Mr. STAFFORD. Because I want the statement of the chairman in reference to it.

Mr. HUMPHREYS of Mississippi. What is the gentleman's request?

Mr. STAFFORD. The gentleman from Wisconsin [Mr. FREAR] would like half an hour. He may not be able to obtain it, and he does not want to infringe on the time of the gentleman from Illinois.

Mr. RODENBERG. I will yield to him.

Mr. STAFFORD. And I would like to have 10 or 15 minutes myself.

Mr. RODENBERG. I will yield to the gentleman.

Mr. STAFFORD. Very well, the time has been assured, and there will be no need of an agreement.

Mr. RODENBERG. Mr. Chairman, I do not wish to occupy the attention of the committee for more than four or five minutes. The very clear and comprehensive statement of the distinguished chairman of the committee [Mr. HUMPHREYS of Mississippi] has covered practically every feature of the bill under consideration. I merely rise to emphasize the fact that the question of controlling the flood waters of the Mississippi is in no sense a local question, but it is essentially and distinctly a national problem. That fact was recognized in the platform of principles adopted by the three leading political parties in the campaign of 1912. In every one of these platforms it was clearly and unequivocally set forth that it was the plain duty of the Federal Government to provide the means necessary to protect that part of our common country against disastrous floods and overflows that are periodically visited upon them.

When it is remembered that the protection of approximately 25,000 square miles of fertile territory is involved, the magnitude of this proposition and its national importance must be apparent to every Member of this House. Of that magnificent domain, which is an empire in itself, containing more than 16,000,000 acres of the richest land in the world, less than 4,000,000 acres are to-day capable of successful cultivation because of the devastation of these periodical floods.

I was very much impressed by an editorial this morning in the Washington Post. I believe with the editor that as a practical question of conservation of our natural resources it is the moral duty of this Government to do that which is necessary to reclaim this vast area of fertile and valuable land and to make every acre capable of producing those things which go to sustain human life.

The people living in those alluvial deltas have done their full duty. In fact, I fully believe that they have done more than their duty. They have not tried to shirk any financial responsibility, and they are not trying to do so now. They have already expended more than $90,000,000 in an effort to protect these lands against the floods, and they are prepared to spend still more in the future. They have simply taxed themselves to the very utmost, and they have reached the limit of their ability in that direction. They are now appealing to Congress to assist them in carrying the burden which properly belongs to the Nation and which should be borne in part by the Federal Government. [Applause.]

The committee having charge of this bill has labored long and earnestly. They have held most exhaustive hearings. They have had before them some of the ablest and most distinguished engineers of the United States, and these eminent engineers are unanimously of the opinion that the only way to control the flood waters of the Mississippi is by the construction of levees along the river banks and then to maintain the levees from caving in by revetment work wherever such work may be necessary.

The engineers have filed a comprehensive report, and they tell us that it is the only way in which this question can be successfully handled. This work, prepared by the committee, represents the best thought and intelligence of these eminent experts, who have made a most careful study and a most painstaking investigation of the whole subject matter. The bill presents the only practical solution of one of the most difficult problems that has confronted the American people almost since the foundation of the Government. I believe the bill ought to pass the House by a unanimous vote, and I sincerely hope that it will. [Applause.]

Mr. Chairman, I yield 15 minutes to the gentleman from New York [Mr. HUSTED].

Mr. HUSTED. Mr. Chairman, it seems like presumption upon my part to attempt to enlighten the committee on the Mississippi flood problem after it has listened to the statement of the distinguished chairman of the Committee on Flood Control. I believe that he knows more about the subject than any man in the country to-day. He is not an engineer, but he has lived close to that problem all of his life and he has absorbed and assimilated all the knowledge which the engineers have gathered upon that subject. I consider that in devoting his time to this subject he has devoted himself to a most noble work for the enjoyment of the people of the Delta and for the great and lasting benefit of the people of the United States. [Applause.]

I have the honor to represent a district in the great State of New York. It is located on the Hudson, at the entrance of the Highlands, which I consider the most beautiful spot in the world. Our lordly river passes between high and rock-ribbed hills on to the sea. The channel is from 40 to 50 feet deep. The water is clear. We have no flood problem on our part of the river. They do have a flood problem in Albany and in the upper reaches of the river, but we are fortunate enough not to have one, and at the time I was appointed a member of this committee I knew absolutely nothing about this subject except what I had read in the newspapers from time to time, as these devastating floods occurred, from my boyhood days on and had seen in the illustrations in the newspapers of their disastrous effects.

I did know, however, that the three political parties had committed themselves upon this proposition, that they had declared that the question of the flood control of the lower Mississippi was a national project worthy of Federal aid, and that it should be extended promptly and this work carried to a complete conclusion. I knew that the President of the United States and the two living ex-Presidents of the United States had recommended this project to the favorable consideration of Congress, and I knew that the great State of New York, which I have the honor in part to represent, pays into the United States Treasury a very large amount of the taxes that find their way here. I knew also that this project, if adopted and carried through to completion, would involve the expenditure of a very large amount of money, and that the State of New York would be compelled to pay a very large share of it. Therefore I was deeply interested in finding out, first, whether floods on the Mississippi River could be effectually controlled; and, second, if they could be effectually controlled, then the best and the most economical way of doing it; and, third, what would be the just and fair share which the local interests immediately protected by the improvement should pay toward this cost.

In the early part of the month of February last a majority of the members of the committee visited the Mississippi River and saw that river in one of its most majestic and one of its most fearful moods. They saw the crest of a flood pass down that river as great as ever found its way to the Gulf. We traveled the Mississippi River from Cairo to New Orleans. In the upper Yazoo Delta we passed between 100 miles of levees, which had been completed in accordance with the Government standards. We saw the people there living behind those levees, with the level of the Mississippi River 15 feet above the surrounding country, carrying on their agricultural pursuits in just as much apparent security, with the feeling of security just as great, so far as any danger from floods was concerned, as if they were living upon the tops of mountains. Then we passed down the river where the levees were not up to Government standard, and where the people were exceedingly anxious, watching the water stages with great anxiety, fearing that at any time they might be compelled to take their babies and wives and property and seek the mounds of refuge, or some part of a standing levee, to escape the devastation and death which follow in the wake of one of these terrible crevasses. Then, we went down to Greenville, the home of the distinguished chairman of the committee, and there we found the most highly

developed country. There the levees are up to Government standard, and enterprise has not hesitated to spend its money. We then took automobiles and went into the country and saw magnificent plantations in the highest state of development, where they raise the finest cotton grown in the world, even finer than that grown in the valley of the Nile.

From Greenville we passed through the only section of the river between Cairo and New Orleans which has never been protected by levees. It is only 22 miles long, and we saw what the effect of the backwater was, which worked its way around the end of an uncompleted levee line. On a train we went through a lake that contained 1,000,000 acres of water. That water was not less than 3 feet, and from that up to 52 inches deep. We had a scout engine going ahead of us on the right of way to see that the tracks were there. We had a big motor boat preceding us on the right of way, and we towed two motor boats from our rear platform to carry us to dry land in case the fires in the engine might be put out. We went through 30 miles of water in this way; and wherever we went we saw the plantation houses empty, where the people had escaped to the levees or to towns protected by the levees. And so we came to Vicksburg, where we found that just before we got there the termination of the railroad line had been washed away by the flood, and where we saw the people sacking the old and ineffective levees, trying to keep the water from flooding the lower portion of the city. Below Vicksburg, in Louisiana, we saw a crevasse, a break in an old levee line, where more water than passes down the Niagara River was flooding the surrounding country, doing millions of dollars' worth of damage. From there we went to New Orleans and saw those magnificently strong and effective levees which have been built by the courage, the patriotism, and the industry of the people of New Orleans to protect one of the most progressive, one of the most beautiful, and one of the most important cities on the American Continent. [Applause.]

Mr. Chairman, the Delta of the Mississippi River, which this bill seeks to protect from floods, contains 20,000,000 acres of land, or about 25,000 square miles. The area is somewhat larger than the combined areas of the States of Connecticut, Delaware, Massachusetts, Maryland, and Rhode Island. It is not only the most fertile piece of land in this country, but it is the most fertile piece of land in the world, exceeding in fertility even the famed valley of the Nile.

The depth of the soil, which has been skimmed like cream from the best lands of the Northern and Middle States, is at least 1,500 feet deep, and it is just as fertile at a depth of 1,500 feet as upon the surface, so it is practically inexhaustible; and that territory, if it were reclaimed and put in cultivation, is capable of doubling the cotton crop of the United States. It is capable of producing in value at the present market price of cotton $1,000,000,000 worth of that staple, and you can all imagine what that would do for the prosperity of this country when you know what it has done in the past. Cotton has been one of the staples that has given our country the dominant commercial position which it holds in the world to-day. [Applause.] Now, this is not a new project and it is not an expensive project. It is a money-saving project. This land can be protected. It can be protected by levees and revetments, and it can not be protected in any other way, and we are doing it that way now except we are dribbling out the money in a most unscientific and in a most uneconomical manner. This simply provides that work shall be done continuously, and money furnished to do it, if appropriations are wisely made by Congress, so that the work will not have to stop, so that the work can be done to the best advantage and brought to a complete conclusion within a given time, within five years, and the Army engineers estimated that by doing it in that way——

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. HUSTED. I will.

Mr. MOORE of Pennsylvania. My colleague is aware that work has been going on since 1879?

Mr. HUSTED. Yes; I am aware of it.

Mr. MOORE of Pennsylvania. And on this particular section, between the Head of the Passes and the Ohio River, $87,000,000 has been spent?

Mr. HUSTED. Not exclusively on levees, however; and not for flood protection alone. The Government has expended less than $30,000,000 on levees.

Mr. MOORE of Pennsylvania. In general channel work?

Mr. HUSTED. Yes, sir.

Mr. MOORE of Pennsylvania. And that on the Mississippi, generally, up to date about $166,000,000 has been spent.

Mr. HUSTED. Yes.

Mr. MOORE of Pennsylvania. The gentleman speaks of the continuation of the work. Does the gentleman recall that work on the Troy Dam on the Hudson was stopped last year because of the failure of appropriations?

Mr. HUSTED. I did not know it, sir.

Mr. MOORE of Pennsylvania. While work was still going on in the Mississippi Valley?

Mr. HUSTED. I was not aware of that fact.

Mr. MOORE of Pennsylvania. I will inform the gentleman that the great Troy Dam, where the commercial interests are so involved, was stopped two years ago at a great expense to the Government, at a great loss and waste, simply because we could not get the money to carry on the work.

Mr. HUSTED. I was not aware of the fact, and I may say I deeply regret it; but I can not see that it is any argument why the Government should make a mistake on this proposition.

Mr. MOORE of Pennsylvania. Will the gentleman pardon me for one more question? The point I make is that what is fair for one section of the country is fair for all sections.

Mr. HUSTED. Absolutely; I heartily assent to that.

Mr. MOORE of Pennsylvania. And to continue work on a great project like this means there must be a cutting of the work in other sections of the country, where often there is just as much damage and certainly more business done than on the Mississippi River.

Mr. HUSTED. But I am slightly proud of the fact, notwithstanding I come from the great State of New York, which has not had a very large share in recent years of Government appropriations, that I can be broad enough and big enough at least to support a proposition of this kind, which I believe is for the best interests of the whole country [applause], something which we are morally bound to carry out even though the people in that district may obtain the greater benefit thereof. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. RODENBERG. Mr. Chairman, I now yield 10 minutes to the gentleman from Indiana [Mr. WOOD].

Mr. WOOD of Indiana. Mr. Chairman and gentlemen, that the State of Indiana is in hearty accord with this legislation is evidenced by the fact that in February, 1915, after due deliberation, they adopted a resolution asking the Members of this body and the Members of the Senate from that State to support any measure looking to the flood control of the Mississippi Valley. These resolutions read as follows:

Concurrent resolution adopted by the Legislature of the State of Indiana.

Whereas the frequent floods of the Mississippi River, caused by waters from 31 States, embracing more than 41 per cent of the total area of the United States, result in great loss of human lives in portions of the States of Illinois, Tennessee, Kentucky, Mississippi, Missouri, Arkansas, and Louisiana, and large money losses, not only in such afflicted territory but in other portions of the Nation; and

Whereas it has been declared by every member of the Engineer Corps of the United States Army who has dealt with such floods, by the Mississippi River Commission, and by other commissions appointed by Congress that such floods can be prevented at a reasonable cost; and

Whereas the work of such flood prevention has been going on for many years in the least economical way and over two-thirds of its cost has been borne by the damaged sections, who can no longer cope with this giant problem without effective aid from the National Government; and

Whereas all political parties have declared in their campaign platforms that flood control of the Mississippi River is a national duty: Therefore be it

*Resolved by the Senate of the State of Indiana (the Assembly concurring)*, That the Congress of the United States be, and is hereby, requested to fulfill this national duty at its next session, and to enact such legislation as shall provide a separate and comprehensive plan for the prevention of such floods without delay; b it further

*Resolved*, That copies of tnis resolution be sent to the Speaker of the House of Representatives, to the President of the Senate of the Congress of the United States, and to each Member of the Senate and House of Representatives of this State in Congress.

SAMUEL M. RALSTON, *Governor*.

Passed February, 1915.

The State of Indiana is not only in favor of Federal aid to assist in the control of the flood waters of the Mississippi River but it is likewise in favor of a scheme that has for its purpose Federal legislation looking to the control of the flood waters of the United States.

And if I did not believe that this was the beginning of that character of legislation, I would not be standing here to-day supporting it, for, with my colleague from the State of New York [Mr. HUSTED], I believe that what helps one section of this country also helps every other section of it. I do not believe that we should be so selfish that we can see no good to us even in appropriations that are made to different parts of this country far distant from where we are located, for whatever adds to the material wealth of the great Mississippi Valley adds to the material wealth of the Ohio Valley. Whatever adds to the comfort of the people of that great section down there adds to the comfort and to the glory of all the people in the United States. [Applause.] In the State of Indiana we are in need

of assistance of this character, and I believe it is a part of the duty of the United States Government to assist in affording that relief. The people in the State of Ohio are in need of flood control, and I believe that the people of all the United States should contribute to that end. The people in the State of Pennsylvania are in need of this character of legislation. Our attention has lately been called to the ravages of the floods on the Susquehanna River at Wilkes-Barre and throughout that section of the country. It is a part of this scheme, as fast as it is possible to do it, to relieve these different situations.

Mr. MOORE of Pennsylvania. Will my colleague yield?

Mr. WOOD of Indiana. Certainly.

Mr. MOORE of Pennsylvania. As to the Susquehanna, I wish to say that no money has ever been spent upon it except on one of the upper branches. It was declared nonnavigable for a long while, and it was only recently that it was announced that its navigability had been restored.

Mr. WOOD of Indiana. I understand it did not come in under the old scheme, because of the fact that it was a nonnavigable river.

Mr. MOORE of Pennsylvania. Yes; and that has been changed, however, under Executive order.

Mr. WOOD of Indiana. And it is the purpose of this legislation not only to assist those streams but also to assist in those sections of the country where the streams are not navigable as a matter of fact or as a matter of legislation.

Mr. GORDON. It is a sweeping proposition that you make there, that it makes no difference about the navigation.

Mr. WOOD of Indiana. What is your question?

Mr. GORDON. My question is this: If you are going into that sort of a proposition, why do you not furnish drainage everywhere for everybody in the United States?

Mr. WOOD of Indiana. That is begging the question. I am in favor of internal improvement. I have been in favor of it ever since I have understood what I think it means, and I think one of the best possible ways of making internal improvement is to control the waterways of this country that belong to the people, and in controlling those great waterways it becomes in a measure also necessary to control their tributaries. So if it is necessary to control the waters of the Ohio, and keep them from desolating the country through which that great river runs, it may be necessary to control the tributaries of the Ohio River. If it is necessary to control the waters of the Mississippi River, that is now and has been through the centuries doing so much damage throughout the country, why is it not necessary, differing only in character, to control the tributaries that are contributing to that mighty flood? As a business proposition, I will say it is worth more to the people of the United States to control the flood waters of this country than all the Panama Canals we could build in a lifetime. [Applause.]

Take the lands that are now in the Delta country of the Mississippi River and are absolutely worthless, amounting to 16,000,000 acres, and which will be reclaimed by this flood-control measure, and they will add to the material wealth of this country more in one year than it would cost to make this entire improvement. It is said that there are 16,000,000 acres of this land that will become immediately available for agricultural purposes. Now, a fair rental value for that 16,000,000 acres would at least be $3 per acre, amounting to $48,000,000 in one year. The productive power of that 16,000,000 acres would amount to three times that much, or $192,000,000 in one year—a goodly sum to add to the material wealth of the Nation.

Mr. GORDON. Why should the cost of that improvement not be assessed against that land, then?

Mr. WOOD of Indiana. I will tell you why it should not be assessed against that land. That is not water peculiar to that country; that is not water that fell from the clouds of heaven upon those lands; but that is water that we are contributing from the State of Indiana, contributing from the State of Ohio, contributing from way up here in Montana, contributing from way up here in New York. That stream does not belong to those landowners. They said to us, and well did they say it, "Take care of your water—it is not ours—and we will take care of our land." [Applause.] That is the reason the landowner should not be made to pay all these taxes. They have been taxed and taxed and taxed until it is hardly possible for them to stand it much longer. An objection has been made here because of the fact that millions of dollars have already been spent in an attempt to control these flood waters. That is true. Much of it has been illy spent, much of it wasted, because of the fact that a consistent scheme years ago was not adopted for the purpose of accomplishing this great work. It is now the purpose, if this legislation is enacted, to take this thing up systematically, to take it up and continue the work, and do it in a systematic sort of way, so that anything that is done to-day will not be wasted to-morrow.

It is possible to complete this thing. It is possible, I believe, from the evidence that we have from the engineers, who have been studying this for a lifetime, to take and do all the things that they claim this scheme of legislation will do, and save to the people of the United States this "valley of the Nile" that is worth so much in material consequences.

And why should we not adopt it? As I said before, it is the waters of all this great watershed from Montana clear to New York that is thrown down upon these people, and it is going to increase each year.

You take the farmer in the State of Indiana, in the State of Ohio, in the State of Illinois; when his farm reaches the perfection that he desires it shall reach he will have a construction of tiling every rod through it, and every additional construction of tile that is placed on the farms in all that section adds materially to the increase of floods throughout these great flood districts; and it is increasing each year. We who live in the Wabash Valley know that the frequency with which floods are growing there and the ravages that are being made by them growing each year that the likelihood of those floods is increased. In 1913 there were millions upon millions of dollars' worth of property destroyed along the Wabash and the White Rivers, and in Ohio along the Miami. We thought perhaps it would not again occur for a decade at least, but this last winter if it had not been for the fortunate dropping of the mercury down to zero we would have had a repetition of our experience in 1913.

If the project commenced with this measure is carried out fully, as it is the intention of the committee it should be, the flood waters of the Wabash, White, and Miami Rivers will be controlled, and the awful havoc and destruction committed by them in 1913 will be rendered impossible of repetition. The United States engineers are now studying these rivers, making complete maps of them, together with adjacent territory for the purpose of enabling provision to be made that will solve the flood question along these waterways. All this work can not be done within a year or two years, but it can all be done and effectually done in a reasonable time. The two projects now submitted by this measure are now feasible because the surveys have been made of the Mississippi and the Sacramento Rivers, and the scheme has been adopted which it is believed will reduce to a minimum the possibility of their flooding the country adjacent to them as they have been doing so disastrously in the past. That it is not intended that this public improvement is to be sectional is adequately proven by this initiatory measure, which provides not only for the flood control of the Mississippi River, but for the flood control of the Sacramento River in far-away California, thus demonstrating that the people of the South have joined hands with the people of the West to assist each other for the common good of all their citizens, and as readily will they respond and join hands with the people of the North and the people of the East in giving to them the same measure of relief as soon as the surveys and plans are made that will enable us to solve the flood problem of their sections. We are all interested in the general welfare and prosperity of all the sections of our country; in this there is, and should be, no North, no South, no East, and no West. With this spirit actuating this and subsequent Congresses this mighty piece of constructive legislation to-day beginning will have its complete fruition in the flood control of the United States, and with its completion will have been accomplished one of the greatest services that our Government can render to its citizens.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. HUSTED. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. RODENBERG. Mr. Chairman, I yield the remainder of the time to the gentleman from Wisconsin [Mr. FREAR].

The CHAIRMAN. The gentleman from Wisconsin is recognized.

Mr. FREAR. Mr. Chairman, I am not opposed to reasonable aid to the lower Mississippi River Valley or any other locality for permanent and scientific flood control, but in determining what is reasonable aid for floods as distinguished from land reclamation and what is for scientific flood control, I am not willing to accept the opinions or apportionments fixed by this Flood Committee. I can not believe disinterested members, as a rule, will come to any different conclusion after a brief study of the flood question.

I am opposed to this Flood Committee bill, and I am opposed to the jurisdiction of the Flood Committee and to its weakly expressed purpose. Let me further state that, in my judgment, the present Flood Committee has started out with a program that will make the old-fashioned river and harbor pork barrel bill look like a makeshift and a delusion when compared with the real thing. Never in the history of our Government has Congress been confronted with a more stupendously extravagant program than that outlined by the committee report which accompanies bill 14777 before us.

All promises of party economy, as proposed in several Democratic platforms, are thrown to the winds. All effort at legislative or public economy has been brushed aside through this bill, and by this program, which has the President's approval. Either the President has been deceived by his advisers, who include, according to press reports, members of this committee, and other waterway legislators, or the President has deliberately decided upon a course of public expenditures for private interests that have no limit and invite public scandal far exceeding any wasteful river and harbor legislation ever proposed.

THE PRESIDENT IS QUOTED FOR THIS BILL.

I do not forget that President Wilson has been quoted in Congress in favor of all the three different wasteful river and harbor bills that have been reported in the House during the Sixty-second and Sixty-third Congresses, two of which were defeated by Republican Senators. Some members of the majority party have refused longer to remain chained to a vicious, indefensible system, yet no Democratic leader in Congress has opposed any of the river and harbor bills.

If I have ignored any leader it is unintentional because we have many such, but the acknowledged leader from North Carolina refused to vote against the assumed wishes of the President, but as he did not vote for the bill, I suppose we ought to be grateful. This bill is more objectionable than the river and harbor bills in my judgment, even though it carries the President's O. K., and while predictions made three years ago on the river and harbor bill were lightly regarded, I am rash enough to make a further one at this time. That is to say, the new Flood Committee, if given free rein according to its own plans, will involve this administration in greater extravagancies than anything included in the river and harbor bill, not excepting the notorious Missouri River 500,000-acre reclamation project at Government expense, costing $20,000,000, or the $60,000,000 to $80,000,000 Ohio River engineering travesty.

The President's insistence for the nitrate water-power plant proposal, stricken from the Hay army bill, will be lost to view when compared to the Flood Control Committee's proposed activities. Democratic leaders favor both, but the Muscle Shoals project, with its proposed Government expenditures of many millions, supported as it is by one of the most persistent lobbies in recent years, is not to be compared with the waste of public funds proposed by the Flood Control Committee, or to the hordes of lobbyists who will swoop down on Congress as soon as the Flood Committee gets into action.

UNLIMITED JURISDICTION.

On page 5 of the committee report appears this statement regarding bill 14777 under discussion:

SEC. 3. The Inland Waterways Commission in its report of February 3, 1908, estimated that there were 77,000,000 acres of overflow land in the United States now unproductive, but which with drainage and protection from overflow will have an exceptionally high agricultural value.

Bear in mind the Waterways Commission did not propose the Government should undertake such a program. This is the Flood Committee's suggestion and in order to secure a comprehensive survey of this 77,000,000 acres it has been estimated the Government will have to expend $190,000,000. That is an engineer's estimate, and these estimates usually are under actual cost.

No man can fairly estimate the actual value of such lands when reclaimed, but, judging from the values fixed by engineers on different tracts of reclaimed overflowed land, reaching from $50 to $200 an acre and more, it is fair to estimate the ultimate average value of the 77,000,000 acres at $100 per acre to be $7,700,000,000.

That is the prize. Not that it will be realized in a few years, and probably not for many years to come, but $7,700,000,000 is hung up by the Flood Committee in section 3 of this bill, and by its report is the jurisdiction it expects to cover. Only about 20 per cent of the 77,000,000 acres is affected by bill No. 14177, but the purpose of organizing this committee and its jurisdiction was forcibly and frankly stated by Speaker CLARK at the time the bill was rushed through Congress proposing such extraordinary powers to a committee then unnamed.

The Speaker said:

Now, I do not believe that Congress is ever going to drain the public lands or the private lands either at public expense, but I will tell you what I believe it will do. It will rig up a scheme like the irrigation scheme, except exactly the reverse as to the subject matter, by which those overflowed lands will be drained and the men who own the lands will pay for the drainage.

That is what the Speaker said; but, if Congress is going to drain private lands and save them from the floods in the name of humanity or under the cloak of navigation, as pursued on the Missouri River, it will reclaim private lands and do just what the Speaker said would not be done.

WHAT ARMY ENGINEERS DO.

It was no less a distinguished personage than the present Chief of Engineers, Col. W. H. Black, who bowled over Col. Deakyne and Col. Townsend on the Missouri River project several months ago. These distinguished officers, one of whom is president of the Mississippi River Commission, were agreed that the present Missouri River navigation travesty would no longer stand the light of day, and so both recommended that the $20,000,000 project be abandoned and $14,000,000 remaining unappropriated be saved to the Government Treasury. Anyone who is interested in learning the actual facts regarding the Missouri River 500,000-acre reclamation project will get a full understanding from the Engineer Report, House Document No. 463, Sixty-fourth Congress. It is a marvel of words when Col. Black gets to explaining.

The bill before us, by section 3, gives the Chief of Engineers entire jurisdiction of all reclamation projects referred to in the committee report, even though it eventually reaches 77,000,000 acres. Col. Black is the present Chief of Engineers, and Col. Black was the official who, as chairman of the Board of Engineers, overruled Col. Deakyne and Col. Townsend's proposal to abandon the Missouri river project and recommended a further expenditure of $14,000,000.

Col. Black says on page 7 of that remarkable report:

It has been estimated that with the channel held by revetted banks there would be available for agricultural purposes in the bottom land along the river between Kansas City and St. Louis 500,000 acres, the greater part of which would be less than a mile distant from the river and a considerable portion of which is now necessarily nonproducing.

I digress to say that Col. Townsend and Col. Deakyne in their report said that the Government would spend under this project, apart from the $20,000,000 investment, approximately $1,100,000 annually in order to save Kansas City shippers $10,000 annually, as shown by that report. Col. Black overruled them and continued a $14,000,000 expenditure on the Missouri River to aid in the reclamation of 500,000 acres of land belonging to private parties. This was in addition to some $20,000,000 already spent on this river for "navigation."

THE MISSOURI RIVER RECLAMATION SCHEME.

The Missouri River project did not come through the Flood Committee, but it is a reclamation project, not substantially differing from the Mississippi River project contained in the Flood Committee's bill, as I desire to show, excepting that no contributions come from the Missouri River beneficiaries of 500,000 acres of reclaimed land, as was proposed by the distinguished Speaker in his address. Whereas, with an expenditure of something over $200,000,000 by the Government for reclamation on the lower Mississippi, private owners of 16,000,000 acres of land are expected to pay about $10,000,000. The Government pays all the rest. I believe I can demonstrate beyond reasonable controversy that these two projects do not in any way require "the men who own the lands to pay for the drainage" or for any appreciable part of the expense of reclamation.

In fact, I do not understand how any Representative can fairly say this Government should make either payment from the Public Treasury. The fact that both are to be authorized invites inquiry. What influence caused the Flood Committee to recommend $45,000,000 on the Mississippi project and $5,800,000 on the California project, the only ones contained in the bill, and what influence was able to get the Missouri River project past the Chief of Engineers after it had been recommended for abandonment by those most familiar with actual conditions. Deakyne had been working on the river for some time, and Townsend knows conditions on rivers of the Mississippi Valley better than Col. Black.

Of course, Col. Black has also recommended $18,700,000 for the Alabama Water Power Co.'s Muscle Shoals project, and although that project was stricken from the 1915 bill, Army engineers expended upward of $150,000 in drilling for foundations last year. Col. Black also objects to any congressional restrictions on contracts made by Army engineers with dredgers, and as he is to have charge of this flood-control work is it not

time to inquire just what we may expect from him and from the committee?

I do not question that some agency ought to be empowered to grant emergency relief in case of floods, but this committee is not organized for this purpose.

HOW THE RECLAMATION PORK BARREL WILL WORK.

When it gets into full swing with the 77,000,000-acre reclamation proposal, more pressure than was ever exercised on the Rivers and Harbors Committee will be brought to bear on the Flood Control Committee by private-land reclamation exploiters.

The river and harbor projects largely are matters of local pride, so far as volunteer waterway organizations are concerned, with a few dredgers and contractors in the background. Many associations clamor for their pet improvements, and the famous River and Harbor Congress, a $50,000,000 annual lobby that styles itself "second only to the Congress of the United States," attempts annually to round up all the other lobbyists into a syndicated concern to work for $50,000,000 annually on a pork barrel "policy, not a project." That is a vice in present river and harbor legislation—the influence behind the bill.

Now comes the Flood Control Committee, expected to hand out favors to every land-reclamation exploitation company in the country that has a scheme to advance. Seventy-seven million acres on hundreds of streams, creeks, and rivers are ready to waylay Congress and the Treasury. Every man and every community with a dollar at stake will become interested.

In this bill only $51,000,000 in round numbers is asked, but $170,000,000 more will be needed for the Mississippi before revetment is completed, possibly double that amount, and we have not made a beginning in the waste. These matters are not mentioned in this bill.

What will the Chief of Engineers approve? He approved the Muscle Shoals $18,700,000 water-power project and the $14,000,000 Missouri River reclamation project. What reclamation projects will he recommend? He says $5,800,000 is the proper amount to contribute for the Sacramento reclamation project and nothing at all for the Missouri River reclamation owners. He is the man who will have a direct say in such matters.

GENUINE FLOOD RELIEF HAS LITTLE PROSPECT.

Genuine flood troubles will not have the strong vital financial support equal to that which will bring a horde of reclamation lobbyists down on Washington every session, but those who have great projects to exploit will all be here. After any experience with a river and harbor pork barrel, can anyone doubt that the reclamationists will organize to press their claims through a reclamation congress that will not be "second only to the Congress of the United States"? The tremendous power behind $7,700,000,000 worth of lands to be reclaimed will organize a definite propaganda that will not accept second place to the river and harbor congress or the Federal Congress. That is no idle prophecy. It is a positive danger threatened by the passage of this preliminary bill which is bad in itself and establishes a dangerous precedent that will arise to plague Congress and the country every session. The Democratic Party has certainly unloaded a Sinbad burden onto us with the Flood Committee and its announced plans.

Will this committee have any higher motives than the River and Harbor Committee that has been criticized by many Members on this floor during debates on the last three bills?

I do not question the integrity or intentions of any member of that committee, but I do insist it is fair comment to discuss present standards possessed by the most influential member of that committee. Its chairman, in order to determine what will be the future policy of that committee. Permit me to say that though made the object of occasional witticisms from the gentleman from Mississippi during pork-barrel discussions in the House, I believe no malice occasioned these outbursts. In fact, personally I have a high regard for the gentleman and recognize our differences of opinion are fundamental and not affected by petty prejudices.

On May 23, 1914, the present chairman of the Flood Committee wrote an article for the Saturday Evening Post entitled

THE INSIDE OF THE PORK BARREL.

His contribution to general knowledge on the subject appears in the CONGRESSIONAL RECORD for May 28, 1914, page 9353, where it was inserted by a Senator whose own views on the general subject have been frequently expressed through the rivers and harbor congress.

I have no criticism to offer as to any official action of any Member of Congress. Views expressed through the public press or otherwise, however, are proper to consider when we are endeavoring to ascertain where $7,700,000,000 in private lands or any part of that amount is to be reclaimed by this Government. Every dollar spent by the Government by such river-reclamation acts will come from the States of the Union represented by Members upon this floor, and we owe a duty to our States as well as to the Federal Government we are called upon to serve to see that public moneys are wisely expended.

In this communication to the Saturday Evening Post the present chairman of the Flood Committee ridiculed opposition to the $53,000,000 pork barrel, which was thereafter killed in the Senate. I do not care to quote from his article, but will say the then distinguished member of the River and Harbor Committee could find no fault with that bill in its details or in the general scope of the bill. I am not discussing his personal criticism of Members and Senators who opposed the bill. I am only stating his frame of mind as evidenced by that article. In the goodness of his heart he could see no fault in a bill that smelled to heaven with present and future projects to be started by the bill, some of which were exposed in both House and Senate.

Possibly his criticisms were warranted and possibly Senator Burton, who was so severely assailed in the public article, was a proper object of criticism because of his efforts to defeat that pork barrel. Possibly also criticisms by the present Flood Committee's chairman, concerning the public press and its alleged audacity in striking at the evil, were proper. The American people who pay the taxes are not ready to so concede. They are learning about the outside and inside of the pork barrel as it is, not as it is regarded by the Flood Committee chairman.

That 1914 bill was defeated, notwithstanding the Saturday Evening Post article written by the present chairman of the Flood Committee received wide circulation.

When the 1915 bill was before the House one of its most strenuous advocates was the same distinguished gentleman, the present chairman of the Flood Committee. That bill was also defeated.

When the 1916 bill was before the House less than a month ago the present chairman of the Flood Committee implored the House to pass the bill; otherwise, in his judgment, he stated, no river and harbor bill would ever again be passed under the present legislative system. That plea was effectual and the majority party, ably represented by the Flood Committee chairman, recorded 199 votes for the bill to 133 votes cast in protest against it. In other words, 133 Members are not in accord with the chairman of the Flood Committee on the character of the pork barrel.

I do not desire to offer anything further to show the frame of mind of the distinguished chairman on the subject of pork-barrel methods beyond a suggestion made in the debate on the bill before us by the gentleman from Mississippi [Mr. HUMPHREYS], wherein he said at the outset of his remarks:

> Kansas City, Minneapolis, and Chicago will follow suit (grow) in a few years unless Congress can be clamored by those who are raising the cry of pork barrel into the senseless abandonment of projects now adopted.

It may be needless to say that Minneapolis has more than doubled in population within a quarter of a century without being able to handle one pound of river commerce on its river front and that Kansas City and Chicago will take care of themselves even though Government appropriations are cut off or curtailed on the Trinity, Brazos, Missouri, Coosa, Alabama, Big Sandy, Beaufort-Norfolk Canal, and scores of other questionable projects.

The Flood Committee chairman is opposed to any clamoring about pork barrels or abandonment of projects now adopted, whether good, bad, or indifferent in character.

ARMY ENGINEERS VERSUS THE COMMITTEE CHAIRMAN.

Col. Townsend, chairman of the Mississippi River Commission, that is to administer this $45,000,000 Mississippi proposed levee fund, has advised us, however, that 95 per cent of the Mississippi Valley projects should remain in statu quo until two projects are fairly tested, and yet the Flood Committee chairman does not see anything objectionable in present conditions. In fact, he is, and has been, the river and harbor bills' most gallant defender for many years.

I speak of this only that a fair understanding of the chairman's viewpoint is worth considering, at a time when he is about to embark in land reclamation projects to be financed by the Government that may aggregate billions of dollars, as indicated from the committee report.

I have been discussing section 3 of the bill before considering the two preceding sections, because the whole scope of the scheme is contained in section 3.

With Col. Black, of the Engineers' Department, in the saddle, and the present chairman of the Flood Committee to direct the committee's activities, it may be that Congress can not leave the

subject to take care of itself without further anxiety when this committee proposes to begin the reclamation of private lands.

Before entering into the details of sections 1 and 2 of the bill, I believe one other matter is fair to present to this Committee of the Whole, and in this also I am uninfluenced by personal considerations.

LEGISLATION UNDER WHIP AND SPUR.

Congress was suddenly called upon early in the session to support a Flood Committee project railroaded through Congress under whip and spur. No one had any definite understanding of its purpose and could not consistently oppose the organization of such a committee.

In like manner a bill authorizing $51,000,000 expenditure on two projects is here reported only two or three days before it is called up for discussion. I had not seen the bill or heard of its provisions until I received a copy yesterday through the courtesy of the committee chairman. With the bill was a printed copy of a resolution passed by the Wisconsin Legislature, under suspension of rules, urging the passage of some flood-control relief that had not then been prepared by any standing committee or by any committee in existence until a few weeks ago.

This resolution passed by my State legislature recommends that we bolt down the bill without further ceremony, and in that course it has the approval of the Flood Committee.

Such an astounding proposal calls for the utmost frankness on the part of the committee and of its chairman. Congress ought not to be asked to pass this bill unless all the cards are laid upon the table and a fair statement of facts presented.

Has such a statement been made? I do not allege any intention to deceive, but possibly the chairman of the committee, who alone has discussed the real features of the bill, is troubled with astigmatism in vision that prevents him from regarding pork-barrel propositions and other proposals with the same concern manifested by others Members, who ask to be shown.

In his statement before the House on various occasions when discussing river and harbor bills, the gentleman from Mississippi [Mr. HUMPHREYS] has quoted figures in support of those bills taken from the engineers' reports of commerce carried on rivers. The gentleman has referred to the commerce on the Mississippi River in this debate. It mounts into startling figures. No man who has stood on the banks of a deserted river that once teemed with actual commerce and floated hundreds of steamboats would recognize those figures or that picture in the engineers' commerce statistics.

AGAIN ARMY ENGINEERS VERSUS THE COMMITTEE CHAIRMAN.

Col. Townsend, chairman of the Mississippi River Commission, refuses to longer be a party to the hoax when he estimates the actual commerce on the upper Mississippi at less than one-tenth of the amount reported. He refuses to count logs, wood, and other similar floatable commerce; Government material, ferriage, and other items that have regularly been set forth in the ridiculous tabulations, and only averaged about 30 miles' haul on a 600-mile stretch.

So, too, Col. Deakyne, on the Missouri, refused to count sand hauled 1 mile by owners, and he cut the reports on that river nearer to the actual traffic. Waterway authorities have learned to give all these reports careful scrutiny, but the chairman of the Flood Committee has referred in this discussion to an important traffic on the Mississippi, whereas, after deducting duplications and quadruplications of the same commerce, and eliminating logs and other questionable freight, the commerce is generally understood to have decreased over 90 per cent.

In this connection Anderson, an authority, in "Great Rivers," states that during the fiscal year 1855 to 1856, some 60 years ago, the Mississippi River commerce received at New Orleans reached $80,000,000. That was before the days of railroad competition. After spending $166,000,000 on the Mississippi River from the head to the mouth a present relatively small river "commerce" is carried to New Orleans by a few boats that have diminished in number proportionate to the once large commerce.

I refer to this because Congress is entitled to know what has been accomplished by an enormous expenditure of $166,000,000, and it is entitled to be frankly dealt with where further appropriations are demanded.

STATEMENTS THAT ARE CHALLENGED.

Again, the Flood Committee has not, in my judgment, fairly stated the Mississippi River proposal when we read on page 4:

> It is estimated by the commission that $40,000,000 will complete the levee line to such grade and section as will insure against floods of the future, and it is proposed, therefore, by this bill that the United States contribute $30,000,000 of that amount, and that local interests, in addition to the rights of way, damages, etc., contribute $10,000,000, the whole to be expended in five years.

I do not know that Congress is purposely misled by that statement, but I do say that the total expenditure by this Government in effecting the proposed reclamation of 16,000,000 acres of private lands will cost seven or eight times $30,000,000, according to experts whose judgment will be cited and which we must accept when not disputed. And not one line of warning occurs in the 21 pages given to this part of the committee's report on this important point.

Again, the chairman of the committee failed to say one word on the subject in his remarks before the committee. Why this silence on a vital question affecting this Mississippi River flood and land-reclamation scheme that is to cost the Government not $30,000,000 but over $200,000,000?

Again, the committee report says the Government has only expended $29,000,000 for the construction of levees for flood control. This statement is quoted with approval by the committee, and I again repeat it is no nearer the frankness to which we are entitled than statements regarding pork barrels, actual commerce, or total Government expenditures involved by those who now and may hereafter direct this committee's activities.

Instead of absolute frankness, I believe no important bill in recent years has been presented to Congress under a report containing such doubtful or misleading statements as are found in this report. I will not challenge motives for so doing but repeat that in a matter which rests so exclusively in the knowledge of the committee, only absolute and complete frankness will give confidence to its recommendations. I believe it has been singularly lacking in this report, as I shall endeavor to show when discussing sections 1 and 2.

LOCAL CONTRIBUTION FOR RECLAMATION.

Before so doing I desire to point out one fallacy contained in this whole land reclamation proposition. While Speaker CLARK, some months ago, asserted that a scheme was to be considered whereby landowners would pay for reclamation, this purpose has been entirely absent in the Missouri 500,000-acre reclamation project carried under the river and harbor bill. In the Mississippi River reclamation scheme the bill says the Government is to pay 75 per cent of the cost, whereas I believe it can be demonstrated the Government is to pay 95 per cent of the cost. This failure of promises made when the flood committee was proposed, and the bill was passed, seems in harmony with the entire atmosphere surrounding the bill. It has no counterpart in governmental or municipal appropriations. Instead of supervising or developing any Government improvement, this bill makes Uncle Sam the pack horse to help private owners. It is entirely opposed to the position formerly held by this House and is a complete surrender to the demands of private interests. Let those who would be the beneficiaries now file their demands and support their demands with enough votes to push an annual bill through the committee, because land reclamation and no new or comprehensive scheme for controlling or minimizing the flood evil either on the Mississippi, Ohio, or Cowpasture Creek will ever be proposed if this bill is an index.

If any such proposal can be found in the report that demands $51,000,000 for an initial authorization, it has escaped my notice. No committee of "laymen," as they are styled on page 9, in the brief time given to committee duties during each term of Congress, can present any constructive, well-considered flood preventive plan on different worthy projects, and the present scheme presents only a makeshift on two well-known land reclamation projects.

REVERSING OUR ARID-LAND LEGISLATION.

This bill proposes a reversal of our national policy that was established when the reclamation act was passed in 1902, that lands benefited should bear the burden of the cost of their reclamation when the improvement results from national expenditures.

The reclamation movement in the West, I am informed, started with an appropriation in the river and harbor act of June 3, 1896, as follows:

> For the examination of sites and report upon the practicability and desirability of constructing reservoirs and other hydraulic works necessary for the storage and utilization of water, to prevent floods and overflows, erosion of river banks and breaks of levees, and to reinforce the flow of streams during drought and low-water season, at least one site each in the States of Wyoming and Colorado.

Under this appropriation a report was made, which appears in House Document 141, Fifty-fifth Congress, second session, in which the desirability of reservoirs was shown, but their construction, the report says, could not be justified on the ground of benefit to navigation.

Notwithstanding this conclusion in the report, a very strenuous campaign for appropriations for reservoirs in the river and harbor bill was constantly made by the West.

These appropriations, I am advised, were year after year inserted in the bill by the Senate and as regularly stricken out in the House. The House set its face against any expenditure for irrigation as the primary purpose under the policy of river and harbor improvements.

This controversy culminated at the session of 1900–1901, when the river and harbor bill failed of passage.

The following session there was passed through the House of Representatives the reclamation act, which provided for reservoirs to be built by the Reclamation Service under a system which required the repayment of the cost of the irrigation works by the lands benefited.

A COMPLETE SOMERSAULT IN 14 YEARS.

That act was passed in June, 1902. Now, 14 years afterwards, we are asked to reverse the determined attitude assumed by the House in opposition to reservoirs in the river and harbor bill and adopt a policy of national expenditure for flood control, which is really for the reclamation of overflowed lands, without repayment of the cost of reclamation. It is idle to say that it is enough that the sections where the lands are reclaimed shall pay one-fourth of the cost. If the expenditure is really for the purpose of land reclamation primarily, as stated by the Mississippi and California commissions, and not for the benefit of navigation, then the reclaimed lands should repay all the cost of their protection of floods, just as the arid lands in the West must repay the cost of their reclamation.

Mr. Chairman, if I believed what the different committee members believe who have talked in favor of this bill—and I know they are sincere—I could vote for this bill if it was the end instead of the beginning, as I believe it to be. I have given some little study to the subject during a period of several years, and I find that experts who have made a thorough study of this flood-control question in the Mississippi Valley differ very seriously from the conclusions expressed by gentlemen who have spoken for the bill, not only as to the amount involved but as to the general character of the work and what will be accomplished.

I desire to refer to a few propositions that ought to be important to us and to the House when called upon to appropriate over $50,000,000 in this bill.

TERMS OF THE BILL.

The bill ostensibly provides that $3 shall be contributed by the Government for every $1 contributed by localities on the Mississippi River project, and upon the Sacramento project it divides the expense equally. The gentleman from Pennsylvania [Mr. MOORE] said awhile ago——

Mr. CURRY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from California?

Mr. FREAR. Not just now. Afterwards I will.

The CHAIRMAN. The gentleman declines to yield.

Mr. FREAR. As the gentleman from Pennsylvania [Mr. MOORE] said awhile ago, $166,000,000 has been expended upon the Mississippi River. Of that amount, according to his statement, taken from the report from which he read, $87,000,000 has been expended on the Mississippi River by the Government above the Passes and below the mouth of the Ohio River; and yet we are promised that by an expenditure of $30,000,000 more at this time on the part of the Government—I believe that is the statement made—we are to have complete flood control on the Mississippi River; that hereafter no charge will be against the Government, but maintenance will be carried on by the States or by the people living within the States who own this land.

The report says, page 4:

> It is estimated by the commission that $40,000,000 will complete the levee line as will insure against floods of the future, and it is proposed by this bill that the United States contribute $30,000,000 and that local interests contribute $10,000,000.

If that could be true, I think it would be an easy solution of this question—if we could insure against floods with either thirty or forty million. But from my understanding, not only of the report of the engineers but from people who live along the river and who have contested these views constantly, that statement is not true. Let me say at this time, so far as locality appropriations are concerned, there should be no question on the part of every Member present to make contributions if need be, whether it is to the Mississippi River or any other southern project for relieving actual flood conditions. It is immaterial as to the location. The important question is, Are we starting on the right policy? What is to be the end? The gentleman from Ohio [Mr. GORDON] made a suggestion a few moments ago that is worthy of much consideration. Where are we going to end if we start with this Flood Control Committee and give the power proposed here with respect to this Mississippi River project, which, from the reports of engineers, will amount to over $200,000,000 instead of $30,000,000 or $40,000,000? Where are we going to stop if all the creeks, dry runs, and rivers throughout the country are to receive their proper share of reclamation money from the Government Treasury?

A REMARKABLE COMMITTEE REPORT BY LAYMEN.

Mr. Chairman, it seems very remarkable that, after all the years we have been working on the Mississippi River striving to solve a great problem, a committee with two and one-half months' experience should come in here with a report and propose to give a complete solution of this flood question. Is it true that all the Northern States have contributed to the present condition down on the lower Mississippi, as has been stated repeatedly? In a sense they are part of a watershed that has carried the water into the river, but that condition has existed for centuries prior to the time these levees were built close together, and that narrow river is required to carry a flood that before that time extended and broadened out for a distance in some cases, as stated by the gentleman from Mississippi, to 70 miles in width. Now the river is to be brought within a narrow compass throughout its entire length, and can not escape at great flood times. That is to be done to reclaim 16,000,000 acres of overflowed land for the benefit of private landowners.

What is to be the result? Under this system of improvement by placing levees close together engineers have forced within those narrow confines a tremendous volume of water; and the judgment of men who, as I said, have given much study to this subject is that we will create a continual menace if we carry out the proposition contained in this plan—the Army engineers' plan.

I believe that this bill will be more disastrous in the precedent which it establishes than the river and harbor bill ever was. I am now speaking of waste and extravagance. I may be mistaken, but that is a strong possibility held forth at the present time. Wisely, this Mississippi River item has been taken out of the river and harbor bill—it did not relate to navigation; but we have placed the entire control in the hands of a newly organized committee. The gentleman from New York [Mr. HUSTED] says he has no interest in it. I presume that is strictly true; but as a rule gentlemen selected on these committees do have an interest in these projects. It is true of the River and Harbor Committee largely, and of many other committees, and it is very natural that that is so. The members of these committees are not in a position to be open-minded, in my judgment, upon local propositions; and where is it going to end?

THE PRIZE AT STAKE.

The Mississippi River Valley, we are to-day advised, has 20,000,000 acres of land covered with water, excepting 3,500,000 acres that have been reclaimed. The gentleman [Mr. HUSTED] who last spoke says its wonderfully fertile soil is 1,500 feet deep—and that is deep enough for all practical purposes, as everyone will concede. [Laughter.] That land will be worth hundreds of dollars an acre when reclaimed, and yet the Government of the United States is asked to contribute $3 for every $1 contributed locally in order to turn that fertile land over to private owners. As the gentleman from Mississippi [Mr. HUMPHREYS] well said, and as I understand the fact to be, neither the State of Mississippi nor the State of Louisiana nor the Government of the United States has a particle of interest in those lands. Private disinterested parties say to us, when we complete the plan proposed, which is not for $30,000,000 but for $200,000,000 and over, we will have reclaimed 16,000,000 acres of land belonging to private owners worth possibly hundreds of dollars per acre.

If that statement is true, we may well understand the prize at stake covered by this innocent-appearing bill.

Some question has arisen regarding the value of the lands to be reclaimed. The chairman of the Flood Committee is enthusiastic regarding their wonderful fertility and possibilities, but as soon as the proposal to contribute a fair proportion of the expense is offered, values drop and the conditions, in his judgment, are found to be desperate beyond expression.

VALUE OF LANDS TO BE RECLAIMED.

Quoting from page 11 of the report:

> It is estimated by those who have appeared before the committee at the recent hearings and on whose accuracy and for whose judgment the committee has greatest respect, that if the twelve and one-half million acres now unimproved—later referred to as 16,000,000—were planted to cotton, they could reasonably be depended upon to produce annually some $700,000,000 worth of cotton.

On this conservative estimate of men who are "accurate" we are informed the 12,500,000 acres would be worth something over $100 per acre on the average, and presumably the entire 16,000,000 acres would fairly be worth $1,600,000,000 apart from the increased value given 4,000,000 acres more by better pro-

tection. Let us find further evidence of this value. The chairman, in his address, says:

Sixteen million acres of the geological cream of the earth are awaiting the magic touch to spring into fields of waving beauty.

If that statement is "accurate," and the waiting touch gets active with our Government Treasury, the geological cream of the earth ought to be worth several times $100 per acre.

Members of the Flood Committee, in their enthusiasm and after careful investigation gained from riding down the river, have said to us to-day:

The depth of the soil which has been skimmed like cream from the best lands of the Northern and Middle States is at least 1,500 feet deep, and it is just as fertile at a depth of 1,500 feet as upon the surface, so it is practically inexhaustible; and that territory, if it were reclaimed and put in cultivation, is capable of doubling the cotton crop of the United States.

That certainly is some depth of soil. And we are further informed:

It is capable of producing in value at the present market price of cotton $1,000,000,000 worth of that staple.

All these gentlemen seem to agree that this land to be reclaimed will be worth approximately $1,600,000,000 to $2,000,000,000; and if it can be definitely ascertained that the land is as fertile at a depth of 1,500 feet as it is on the surface, it ought to be worth somewhat more, according to the opinion of agriculturists.

PRIVATE LAND RECLAIMED WILL COST THE GOVERNMENT $12 PER ACRE.

No better or additional information on this reclamation project need be offered, and yet the Government of the United States is asked to contribute over $200,000,000 toward this reclamation project, as I shall presently show, or at the rate of about $12 to $15 per acre, presumably, while the private-land owners are only required by the bill to pay $10,000,000, or less than $1 per acre on land worth $100 per acre. This is the proposal of a committee that we were promised by the Speaker would take up the problem so as to secure a repayment to the Government of the $200,000,000. It is not a loan; it is a donation.

The committee chairman has said repeatedly the owners of these lands ought not to be called upon to advance any large amounts because, whether wisely or not, they have paid somewhere at some time a total of $90,000,000 for levees.

This statement is indefinite in amount and place, and it is only necessary to suggest that while contributions have been made presumably in a small way by private owners that no important part of this 16,000,000 acres presumably was ever reclaimed, and the increased value to new land, made worth $100 per acre, ought to stand a charge of more than 60 cents per acre. In fact, I am sure if the Government advanced the money, that it ought to be reimbursed for every dollar, as in the case of western reclamation projects.

Why not? In view of the tremendous speculative value is it not right to insist that private owners pay the bulk of the burden? Why not offer to have the Government contribute $30,000,000 for all purposes and ask the landowners to contribute the remainder of something like $200,000,000, counting levees and revetment, with promise of maintenance. That would make the eventual land tax reach about $10 in order to secure a return of $100 per acre, and that repayment should be made certain. Could anything be more equitable, not only to these private landowners, but to all the remaining people of the country who have to foot the bills?

SOME LOCAL ESTIMATES.

I hold in my hands a statement from the Manhattan Savings Bank & Trust Co. of Memphis, in which a total bonded debt of $3,535,000 on reclaimed land worth $88,874,000 is disclosed. A further bond issue of $757,000, at 5½ per cent, is to be floated at par. Only a third of the 1,637,089 acres in that district is in cultivation, according to the statement, and the issue of bonds is for the purpose of heightening the present levee system. I quote from the statement:

The United States Government defrays a third of the cost of the work and the plans of the improvement have been approved by Government engineers.

Instead of paying one-third of the improvement, as recommended by Army engineers, the Government is now asked by this Flood Committee to contribute three-fourths of all improvements, as shown by this bill, and, in fact, to contribute 95 per cent of the actual future expenditures for reclamation purposes.

Just why the committee stopped at three-fourths, or 95 per cent, it is hard to say. Why not give to the landowners the entire profits from the speculation?

Is it not a proposal that calls for careful investigation? Yet it was reported to the House only several days before this effort to pass the bill.

I am informed this land is not owned by poor property owners, as suggested. I am informed that large tracts along the Mississippi River are owned by syndicates and corporations.

We have no information on the subject. What are the facts, based on reliable testimony?

The committee comes here with a blanket proposal and demands a huge Government gift without any definite facts to show on what basis it determines the value of lands, the owners thereof, or the reason its recommendations should appeal to ordinary business men dealing with public funds.

To be sure, some little general talk has been furnished by the chairman, but it is hardly to be expected that living as he does in a region directly affected, and with his views on general subjects which I have briefly discussed, we should give $45,000,000, or any other amount, based on loose talk, to this project. Not until we know the facts—know the owners of land and their interest.

If Army engineers only agree to give one-third, it is a public scandal for Congress to overrule the judgment of engineers who appear to be trying to give some little protection to the Federal Treasury.

Why should we change one-third contribution by the Government to three-fourths, and, in fact, why give one-third? We should have full information before voting to authorize one dollar on this proposition.

Take the case of the Sacramento project, in California, which appears in this bill. Four hundred thousand acres of land are to be reclaimed, which engineers estimate are worth $20 an acre to-day. With the proposed improvements and levees these lands are expected to be worth $150 per acre, according to the engineers' statement, or an increase of $52,000,000 by means of this contribution by the United States. I do not know why we should contribute $3 to $1 on the lower Mississippi and contribute only an equal amount on the Sacramento, or possibly why we should contribute in either case to reclamation projects.

Mr. McKELLAR. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Tennessee?

Mr. FREAR. In just a moment. And I do not know why on the Missouri we should give $20,000,000 to private landowners for 500,000 acres of reclaimed land, without a dollar's contribution from the owners, as we do under the terms of the river and harbor bill, which was passed a few days ago.

Who is to determine the rate of contribution? That is one of the things involved in this proposition. The committee says on the lower Mississippi River, $3 shall be contributed by the Government to $1 by the individual. It says out in California an equal amount shall be contributed there by the Government and State.

Mr. CURRY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from California?

Mr. FREAR. In a moment. And on the Missouri River no contribution is required. Now, I will yield for just one question, if you please.

Mr. CURRY. I wanted to correct the gentleman's statement.

Mr. FREAR. I will read from the report. Eleven million dollars, in round numbers, is the proposed appropriation. This bill authorizes $5,200,000 for the Sacramento project, as I remember. Private parties are doing some work there on the levees. But let me say this: It is above Sacramento very largely where the great reclamation projects are desired, not where real navigation of the river exists, and some of the large companies and landholders are very anxious indeed to have the Government make the contribution of $5,200,000 in order to increase the value of their lands.

Mr. CURRY. Will the gentleman yield?

Mr. FREAR. I have yielded to the gentleman.

Mr. CURRY. No; the gentleman has not yielded.

Mr. FREAR. I yield for a question.

Mr. CURRY. Does the gentleman know that in the Sacramento the money contributed by the Government is for broadening, straightening, and deepening the river, and that the reclamation and by-passes and levees are paid for by private interests; that the by-passes are 90 miles long; and the by-passes and levees will cost $30,000,000?

Mr. FREAR. I can not yield longer.

Mr. CURRY. The gentleman can let me finish my statement.

Mr. FREAR. The gentleman has over 140 pages in the committee report on the subject and we have plenty of evidence of the facts. I do not question the gentleman's statement excepting as to any aid to navigation.

Mr. CURRY. The gentleman has not read the record.

Mr. FREAR. I have read the record and the engineers' reports, and I find how far they get from the facts.

Mr. CURRY. Then the gentleman has misstated it.

Mr. FREAR. The Sacramento reclamation was originally a $33,000,000 project, and now it has been reduced to something over $11,000,000. The Government originally was to contribute one-sixth, as I remember, and now it is to contribute one-half, while on the lower Mississippi it contributes $3 out of every $4. Both are land-reclamation projects for private landowners.

It is said that the Mississippi River proposition is not a reclamation project, that it is a flood project. The two are interwoven, but I shall show on the best authority obtainable, this is for reclamation. I find here a statement that is of much interest. It is contained in the committee report, page 2:

The CHAIRMAN. We wanted your opinion as an engineer, of course, primarily in a general way, and then we will probably go into details—if we are to control the floods on the Mississippi River, how shall we proceed?

Maj. MARKHAM. I have more radical opinions about that than I have heard expressed in the last day or two. Assuming it is not objectionable to be radical, I would say that there is no other method that can be devised, within the intelligence of those who have been working on the Mississippi River and thinking about its difficulties, except to build levee structures sufficiently high and to protect them by revetment. That is the sole and only means, in my judgment, of controlling the floods of the lower river, and I state that thus radically, without equivocation, because I believe in it very sincerely.

I think the matter has, perhaps, gotten into a state of confusion for a number of years, due to the fact that both the advocates and the opponents of other methods have merely stated generalities and have never gotten into details, so far as I can see; but I have convinced myself very earnestly that there is no other method of controlling the floods except by levees and revetments.

Maj. Markham says no flood control can be secured excepting by levees and by revetments. In order to reclaim this land the Government must spend $150,000,000 for revetment, in addition to $70,000,000 for levees, according to Government engineers. The committee says $40,000,000 will do the job. Let us see who is right before we start this great land scheme. Turn over to page 4 of the report. It is there stated that when the levees are completed they will have cost $40,000,000. Let us see what the cost is to build the levees and revetments.

I now read from page 30 of the Mississippi River hearings—this was on December 5, 1912. A question was asked of Maj. West, a member of the Mississippi River Commission, who was before the River and Harbor Committee, testifying on the Mississippi River. Mr. Davidson, who, by the way, was a Representative from Wisconsin, asked this question:

Mr. DAVIDSON. Can you give me the figures for that revetment work?

Mr. WEST. Yes; within a very small fraction; in round numbers, the estimate for the complete revetment control of the banks from Cairo down is about $158,000,000; slightly under that.

Mr. DAVIDSON. Now, you estimate that these additions which eventually will have to be made to the levee system will cost about $70,000,000.

Mr. WEST. You will be very fortunate if you get out of the whole thing at $70,000,000.

Mr. DAVIDSON. That would be $228,000,000 extended for the reclamation of 20,000,000 acres of land, would it not?

Mr. WEST. Yes, sir; if you put it in that way, but I had not thought about it in that way, as that would not be the only result.

Mr. DAVIDSON. Well, there are a good many taxpayers who are going to think of it that way.

Mr. Chairman, this hearing was not before a flood committee enjoined to compel property owners to pay for land reclaimed. It was before a Rivers and Harbors Committee that was getting at facts which should have been presented to us by this flood committee, and yet not one word appears in their report on the subject. Maj. West says $228,000,000 will be the cost of reclaiming 20,000,000 acres of land and Mr. Davidson said a good many taxpayers are going "to think." Yes; and think hard, if this bill passes.

Let us see what further occurred. Continuing, Mr. Davidson said:

Mr. WEST. Yes, sir; that is a story that will fall into somebody's hands—those people in those localities or somebody; I do not know who will have that condition to meet.

Mr. DAVIDSON. So that when the Government has started with a proposition of $58,000,000, or from $40,000,000 to $50,000,000, as the President said in his remarks at the Rivers and Harbors Congress the other day, they have only made a scratch on the surface of this levee system, have they not?

Mr. WEST. Well, I think those figures are about as well as I can give them.

That is the testimony of Maj. West, of the Mississippi River Commission. His testimony ought to have some weight with the Flood Committee, when it proposes to reclaim 20,000,000 acres of private lands for $40,000,000. But West suggests the $228,000,000 may also help navigation. Let us see. The Mississippi River Commission, of which West is a member, said in its 1912 report, page 3724:

While the levees have a certain degree of utility in the improvement of the channel and are necessary to promote the interests of commerce by providing landing places for the interchange of traffic in time of flood, * * * their immediate and main value is the protection of the alluvial lands for the benefit of their owners.

That is what West said the same year in the commission's report. I will offer further testimony later on to the same effect that these levees are for reclamation and not navigation.

Mr. DAVIDSON. Well, there are a good many taxpayers who are going to think of it in that way, if you are going to levy on them for the protection of property which, as has already been developed by Col. Townsend, is privately owned property and not public lands of the Government; and as you are going to protect that property by the expenditure of public money amounting to $228,000,000 and thereby giving protection to 20,000,000 acres of land, I was trying to find out what the cost would be per acre to the Government.

Mr. HUMPHREYS. That would depend upon how much of it the Government did.

Mr. DAVIDSON. These are Government estimates. It would, of course, depend upon what was done in that locality. It would probably be $15 an acre to the general taxpayer of the country.

Mr. WEST. And this committee knows that nearly all estimates that are first put up to Congress, as well as estimates for great private corporations, are away under the ultimate cost; and it has sometimes seemed to me that even Congress itself had not realized the magnitude of the undertaking to control for any purpose the lower Mississippi River; and I think that estimate for a control of the lower Mississippi River is a very modest one, and somebody, either you or the States, will spend that or more before the job is completed.

Mr. RANSDELL. When that is done, you will have the navigation of the river in very fine condition, will you not?

Mr. WEST. Undoubtedly; yes.

Mr. DAVIDSON. But you have had good navigation of the river before.

Mr. WEST. Yes; so far as our work of adding embankments and constructing revetments, etc., is concerned. Each piece of work of that kind done adds so much to the improvement of navigation of the river.

Mr. DAVIDSON. Now, in addition to the amount which you have signified as probable extensions to the system—or I would say in connection with them—have you included those levees which will eventually have to be constructed up the streams that flow into the tributaries of the Mississippi River?

Mr. WEST. No, sir; I have not.

Mr. DAVIDSON. Congress had before it this last session two propositions for construction of levees on tributaries of streams flowing into the Mississippi River—like those up in Arkansas—when it was said that the backwater along these districts was responsible for the overflow of the interior sections, which had not theretofore occurred to any remarkable extent, and hence the Government would have to construct levees along those streams. That would have to be taken into consideration, would it not?

Page 61 of the Mississippi River Flood Problem, the beautiful morocco-bound volume furnished by Mr. John Fox, says:

The cost of building this character of revetment varies somewhat, but the average cost is about $30 per linear foot, or about $150,000 to revet a caving bend a mile in length.

In this connection it is interesting to note that the banks constantly shift and change. Maj. West is quoted, in the same morocco-bound book, page 58, as stating to the River and Harbor Committee in 1907—

That his levee line was 189 miles long, and that since 1884, 172 miles of it had to be abandoned and new lines constructed because of caving banks.

Consequently the engineer saved 17 miles of revetment and lost 172 miles between 1884 and 1907 on that stretch of the river.

The cost of revetment, $150,000 per mile for 1,200 miles, or about $180,000,000, is about the same estimated by Maj. West in 1912, and he seems about the only authority quoted.

I have quoted from the hearing in 1912 at some length, because it is of vital importance to a fair understanding of the question. The proposed cost of levee work and revetment necessary for this reclamation project will reach $228,000,000, at a modest estimate, according to Maj. West. These figures will probably fall far short, because floods will wash out levees in the future as they have in the past. And when all the expenditure has been made we have no certainty that the plan will be at all successful. Many people of high standing in the community affected, and throughout the Mississippi Valley, declare we are wasting funds over an impossible task. Impossible because we are now engaged in experimenting on a permanent flood-control project, which this committee has reported after two months of arduous study.

Mr. CLINE. Will the gentleman yield for a short question?

Mr. FREAR. Yes; certainly.

Mr. CLINE. Is it the gentleman's opinion that levees and revetment are the proper methods of controlling floods in the Mississippi River?

Mr. FREAR. We are asked to accept the statement of the gentleman from Mississippi [Mr. HUMPHREYS], who says it is the only way, in his opinion.

Mr. CLINE. But I mean in the gentleman's opinion.

Mr. FREAR. No. I do not understand that it will control it permanently.

Mr. CLINE. The gentleman knows that the reports of all of the engineers on the Mississippi River Commission, to the number of 65, on that portion of the Mississippi we are now discussing relative to flood control have unanimously agreed that that method is the only method of controlling floods?

Mr. FREAR. I will say I assume that the Army engineers are doing their best to study this question, but when they bring a river reaching in floods from 60 to 70 miles in width down to

a narrow space of 2 or 3 miles they are attempting, hopelessly, to control the laws of nature.

THE MISSISSIPPI RIVER PROBLEM.

Mr. Chairman, this problem is of vast importance to the people of the United States, and pursuant to the question and statement by the gentleman from Indiana, I desire at this time, under the privilege accorded, to furnish a small part of testimony in my hands on this subject. I make no pretense of having export knowledge on the subject, either by study or otherwise, but I am trying to perform a duty to the House which is analogous to that assigned to a lawyer in a case when placing evidence before the jury. I do not propose to offer any abstract theories for controlling floods on the Mississippi River or elsewhere, although many proposals have come to my attention. I desire to refer to the one before us that we are asked blindly to adopt.

This is a problem in which an enormous amount of property is involved. More important, if we are making a grave mistake, this Congress and those succeeding will be held responsible for devastation and loss of property and life accompanying a mistaken policy adopted at this time.

Past floods have been small in their destructiveness compared with what may follow when we occasion floods by seeking to confine within narrow borders a mighty stream that never has been harnessed throughout all the ages, and is now undergoing experiments, with the controlling motive behind all these experiments, reclamation of private lands, and not flood control.

Let me repeat that those who live in this great valley, and are familiar with conditions, are protesting vigorously against the present levee-building course, which they term suicidal.

The land-reclamation interests, through their political levee boards, control the situation.

LOUISIANA HOUSE BILL 514, 1914.

Let me digress for a moment. I have a copy of Louisiana house bill 514 of 1914, which provides that every levee board of Louisiana be authorized to tax the people of every district $1,000 "to send delegates to conferences" or to subscribe funds for "developing public sentiment."

In other words, the people of the State are to be taxed by these powerful land-reclamation interests in order to help Mr. John Fox and his propaganda. I quote from a letter written by one of the most prominent men in the lower river valley, whose name I withhold from the RECORD, because authority has not been granted nor withheld. He writes, in transmitting the bill, as follows:

DEAR MR. FREAR: I inclose copy of a bill which has received a favorable report by the house committee of the Louisiana Legislature. This bill was introduced at the suggestion of John A. Fox and referred to the house committee on levees.

Its purpose is to enable the Louisiana politically controlled levee boards to contribute to the support of the Mississippi River Levee Association, and also to permit the levee boards to pay the expenses of its members who attend Ransdell's River and Harbor Congress. Last year the State auditor called a halt on such contributions and expenses. The fact that the John Fox railroad-levee board—levees only—outfit is systematically working along lines which would, if carried out, absolutely destroy the navigability of the Mississippi River seems to make no difference to the Louisiana levee boards. The "system" calls for levees only, and the broader conception of river control never gets under their hides.

Very truly,

---

The following is the remarkable bill Mr. Fox is said in the letter to have had introduced in the Louisiana Legislature:

House bill 514. By Mr. Leopold.

An act authorizing boards of levee commissioners to appropriate funds for the purpose of developing public sentiment favorable to increased appropriations by the National Government for our levee system.

SECTION 1. *Be it enacted by the General Assembly of the State of Louisiana*, That it is hereby declared to be within the powers and duties of the various boards of commissioners for the several levee districts of our State to develop and encourage the growth of public sentiment favoring increased National appropriations for the construction and maintenance of the system of Mississippi River levees, and to this end that they be and are hereby authorized, in the discretion of each individual levee board, to send delegates to conferences held for the above purpose or to subscribe funds to National and interstate organizations created for the purpose of developing such public sentiment: *Provided*, That the annual appropriation of any individual levee board for these purposes shall not exceed the sum of $1,000.

Amendment to House bill 514.

Amendment No. 1.—In section 1, line 7, of original bill, strike out the word "levees" and insert in lieu thereof the word "improvements."

MR. FOX AS A UNIVERSAL LEGISLATOR.

Resolutions passed by State legislatures urging flood control on the lower Mississippi have shown up before the House at this session. One was railroaded through the Wisconsin Legislature under suspension of rules by John Fox, publicity agent and expert lobbyist for the Mississippi Levee Association and also publicity agent for the river congress lobby that asks for $50,000,000 annually. In Indiana and many other States he has been industriously steering flood resolutions since the close of last session.

Mr. Fox is the same lobbyist who collected $40,000 from eight railways, as is more fully set forth on page 11710 of June, 1914, RECORD; money secretly contributed to help finance the levee lobby. Although State legislature resolutions were evidences of shrewd lobby work, financed by secret funds wheedled out of railways and other corporations interested in lands to be reclaimed, they were easily secured from unsuspecting warmhearted men, because the Uriah Heap arguments went. Crocodile tears for the Mississippi flood sufferers are continually shed by land reclamationists, and are especially heavy before national conventions, where the lobby aids in platform making. For millions of years the river ran undisturbed, excepting when Army engineers tried to curb it to narrow limits with disastrous results.

THE GREATEST PROMOTION SCHEME IN THE WORLD.

Then Mr. Fox and his reclamation lobby colleagues conceived the idea of having the Government reclaim from 16,000,000 to 20,000,000 acres of land for the benefit of adjoining landowners. They have succeeded in starting the greatest promotion scheme in the world. It is proposed to bring two or three billions of unearned increment to its promoters and landowners if it succeeds. It would make worthless land increase to hundreds of dollars per acre—if it succeeds—but according to other engineers and many residents along the river it will not succeed further than to bleed the Treasury. A few may reap the golden harvest, but the bubble will burst because of insurmountable conditions. Mr. Fox keeps pulling the heartstrings of his auditors by pictures of poor squatters who are driven out by floods. With full knowledge that the Mississippi is as uncontrollable at flood as ocean tides, a handful of foolish people build on sand and mud bottoms, challenging the laws of nature. Then through the activities of the lobby, Mr. Fox asks Congress to revolutionize nature's laws for their protection. And the lobby, crying lustily for help, fattens its purse at the expense of the taxpayers of the country. Shouting against railroads, the lobby is financed in part by railways owning submerged lands.

A FEW RAILROAD CONTRIBUTIONS.

On June 3, on pages 10591 to 10599 of the RECORD, appear my remarks before the House wherein I pointed out secret efforts to influence Congress on rivers and harbors bills from subscriptions of money to the use of threats against business men. At that time I presented the following subscriptions, running for five years, taken from what purported to be a photographic copy of a typewritten statement made by Col. John A. Fox, secretary and manager of the Mississippi Levee Association:

It has been estimated that a minimum fund of $30,000 per annum is necessary for this organization to do its work in a complete and thorough manner, and already a considerable portion of this sum has been pledged annually for five years (of $150,000 in all). The subscriptions are as follows:

| | |
|---|---|
| Southern Railway Co | $1,000 |
| Mobile & Ohio R. R | 1,000 |
| Frisco R. R | 1,000 |
| Missouri Pacific R. R | 1,000 |
| Chi., R. I. & Pac. R. R | 1,000 |
| St. Louis & So. West. R | 1,000 |
| Illinois Central | 1,000 |
| Y. & M. V | 1,000 |
| Chicago Mill & Lumber Co | 1,000 |
| Caldwell & Smith, Memphis | 1,000 |
| International Harvester Co | 1,000 |

Assurance has been given of other substantial amounts.

This is the missionary work performed by Mr. Fox, the publicity agent of the Mississippi Levee Association.

The suggestion has been made here to-day that the States of the Union are being memorialized in favor of this project. In fact, the first notice I had of this bill was a letter from the gentlemen from Mississippi [Mr. HUMPHREYS], which contained a resolution passed by the legislature of my own State. I made some inquiries at Madison to find out how it was passed, and they said it was done under suspension of the rules, and not a Member with whom I talked could tell anything about the merits of the proposition. They said, "We know nothing about it." But John Fox, publicity agent for the levee association, was present all the time in the city of Madison, the capital, trying to get it through, and John Fox is the man that represents the lobby that raised $150,000 according to the report, including money contributed by eight railroad corporations and the levee districts. Contributed for what? For lobby purposes, not for the improvement of levees, and he spends his time traveling all through these different States to get such resolutions through their legislatures. Resolutions will be put through in the convention at Chicago, in the convention at St. Louis, and elsewhere un-

doubtedly, because there is a great deal of money behind this reclamation project. Think of it, gentlemen——

Mr. HUMPHREYS of Mississippi. Will the gentleman yield?

Mr. FREAR. Yes; certainly.

Mr. HUMPHREYS of Mississippi. Does the gentleman mean to say that money is or will be used to influence corruptly the legislatures to pass resolutions and to influence conventions to pass resolutions?

Mr. FREAR. No; I do not. I will say this, however, that if you have money for a propaganda of that kind you can accomplish many things by placing on the tables of Members, as you have done, books, pamphlets, statements, including morocco covered books which were sent to Members on this very subject, paid for by contributions of these same levee corporations, railroads, and other interests that have made their contributions to send out Mr. Fox. He went to New York in his campaign for contributions—I have some statements in regard to this fact, but will not discuss it further—and so far as I can find he is the best publicity man in the United States. He has been promoting this Mississippi River flood control and reclamation proposition through all the States, and he has done it very successfully.

Mr. HUMPHREYS of Mississippi. Very well indeed, and it has cost a good deal of money.

Mr. FREAR. Unquestionably so.

Mr. HUMPHREYS of Mississippi. Of course not $150,000.

Mr. FREAR. That was the amount proposed to be raised at that time.

Mr. HUMPHREYS of Mississippi. Not one-third of that amount of money. But I just wanted to get the statement of the gentleman in the RECORD that he did not think it was going to be corruptly used.

Mr. FREAR. I would not want to think that. I have not suggested it. I do say that for the purposes of propaganda the Levee Association has had a good deal of money in its hands; and when we are told that this resolution passed the Legislature of Wisconsin, I say it may also have been passed in many States, and it may be put through the national conventions, because the Levee Association will have men there to look after the interests of those whose lands are to be reclaimed.

Mr. HUMPHREYS of Mississippi. We have done all that we could legitimately to arouse public sentiment in the United States in favor of this project.

Mr. FREAR. Mr. Chairman, I have not a single word of criticism to utter against the gentleman from Mississippi. I think he is sincere in his support of his proposition, and the question affects the people of his own State very closely, but the people of Wisconsin, Iowa, Minnesota, and every other State are required to make nearly all the contributions toward reclaiming these 16,000,000 acres of land, and when they are reclaimed they will be worth $2,000,000,000 or thereabouts, providing the levees hold while the people directly interested in the land, who own the lands reclaimed, contribute under this bill only one dollar to three given by the people of the United States. As I have stated, that is the proposition based on a $40,000,000 appropriation, but this work is to cost, if carried to completion, $228,000,000, and of that amount the landowners are only required to contribute $10,000,000.

LEVEE-BOARD POLITICS.

Levee-board politics to-day control the Mississippi Valley. It controls State politics and public sentiment. It controls the action of State legislatures by securing the passage of resolutions in those States through hypocritical arguments.

It controls the insertion of planks in national platforms because of the propaganda it puts forth. It controls the opinions of Presidents who only hear one side of the question. It controls the judgment of many able men who have indorsed the movement, just as thousands of men have been swept off their feet by the enthusiasm of waterway conventions wherein a $50,000,000 annual pork barrel was an agency behind the scenes.

The levee boards represent 20,000,000 acres of land. Owned by men, corporations, and syndicates from Louisiana to New York and from Mississippi to Wisconsin and Minnesota. With a stake of billions of dollars in the balance, the levee boards and land-reclamation interests involved are seeking to restrain a river 70 miles wide down to a limit of 3 miles and less. A river 70 feet deep at Vicksburg and from 50 to 70 miles wide in times of great floods is to be confined in a strait jacket in order to reclaim lands for private interests. Reclamation is a virtue, but when it involves the lives and property of people who are invited to place their dependence on such a weak reed, reclamation interests have not much on the Jew's pound of flesh.

These are not idle fancies nor offered because of any personal opposition to those behind the bill. If I believed a control of floods in the Mississippi Valley would follow this legislation, deceptive and misleading as the bill before us is in character, I would not feel that it was only a gross injustice to the taxpayers of the country who are required to foot bills that ought to be borne by landowners who are the principal beneficiaries. But that is not the vital objection, as I desire to show. The injustice to northern taxpayers is one of pocket, but the injustice to southern people living along the banks of the Mississippi affects the lives and property of helpless mortals who have placed their hopes and confidence in Congress and the judgment of Army engineers. Both will be of little value, in my judgment, and the responsibility of a flood committee of "laymen," as it styles itself in the report, can not be offered by us in defense of our own gross neglect when a final accounting comes, as come it must if the evidence I offer has any value whatsoever.

WHAT HAVE 65 ENGINEERS SAID?

The gentleman from Indiana [Mr. CLINE] asks me if I have any better solution than that offered by Army engineers, and then adds that 65 engineers have agreed to the present plan of reclamation.

I do not know with what knowledge the gentleman speaks as to the opinions of 65 engineers, but for the sake of argument I will accept his statement as a fact, although after reading reports of various hearings I find that nearly every engineer testifies with many qualifications, and the very few who gave approval to the present Mississippi plan of levees do so apparently because they are driven into that position by the desire of land reclamationists to reclaim their lands.

In other words, these engineers voluntarily yield up 65 miles in width of river in places that now furnishes a cushion or reservoir for enormous floods, and in order to do so they pin their faith to levees. I do not believe that 65 or 6 Army engineers could successfully defend their theories of reclamation and flood control on the lower Mississippi if required to face an expert cross-examiner.

Such cross-examinations are generally indulged in with the ordinary affairs of life, but here is a stupendous proposition fraught with many threatening dangers involving an eventual expense on the part of the Government of $200,000,000, or possibly double that amount in addition to $87,000,000 already spent on the lower river, and yet we are asked to place our dependence on a statement that 65 engineers have agreed on this plan. We can not shelve responsibility on their shoulders by saying the Flood Committee confesses itself to be a committee of laymen that in two months of occasional hearings comes to its conclusions, written possibly by the able author of the "Inside of the pork barrel," whose judgment, I submit, is not infallible. Who are the Army engineers, and what specific statements are offered to Congress in support of their theories? Name them, and then let us see what dependence can be placed on their judgment, in view of the facts and well-known laws of nature, that do not require expert knowledge.

DO ARMY ENGINEERS KNOW OR GUESS?

Does the chairman of the Mississippi River Commission, Col. Townsend, say that this levee plan will permanently cure flood conditions? I believe he is well able to discuss the problem. Probably he will be so recognized by the country at large. I believe him to be sincere, for no man of his standing in engineering circles would otherwise reverse the entire policy of Army engineers in making wasteful expenditures on 60 different river projects in the Mississippi Valley.

In the RECORD for December 10 the chairman of the Flood Committee, Mr. HUMPHREYS, extended his remarks by a thoughtful address made by Col. Townsend that was spread like a wet blanket over the River and Harbor Congress lobby a few days before in this city.

One specific recommendation contained was of vital importance to the people of this country. It occurred when Col. Townsend, chairman of the Mississippi River Commission, said:

> Specifically the writer would not abandon any navigable stream in the Mississippi Valley that has been partially improved, but would leave 58 of them in their status quo, confining operations by snagging and maintenance of existing works. * * * If facilities afforded by the Government are utilized (on the Ohio and in a waterway from the Mississippi to the Great Lakes) the upper Mississippi and the Missouri should then receive attention.

That proposal reverses the policy of Army engineers and wisely advises that "if facilities afforded by the Government are utilized," then the Missouri, upper Mississippi, Tennessee, Cumberland, Arkansas, Ouichita, and fifty-odd other projects may then be continued.

With charming inconsistency the chairman of the Flood Committee inserted the remarks of his chief expert in the RECORD, and then after Townsend's advice to stop 58 projects, that carry in the 1916 river and harbor bill from five to ten million dollars

for improvements on those 58 projects, the chairman vehemently urged passage of the wasteful 1916 river and harbor bill.

But the chairman is not now under discussion and without indulging in captious criticism, I desire to discuss the chief authority of the Mississippi Commission. What he determines would be the decision of his brother officers as a rule, because of a recognition of authority that properly goes and carries much weight in Army circles.

EVEN ENGINEERS DIFFER RADICALLY.

For years Col. Townsend has recommended many projects in the Mississippi Valley and elsewhere. Now he advises us to halt operations until we experiment on two and ascertain if they will be utilized. Strange that thought did not occur long ago before rainbow promises were given by engineers' reports in favor of a great majority of the 58 projects that are now to remain in statu quo.

Two river projects are to be at once completed, according to Col. Townsend's judgment. One on the Ohio to Pittsburgh, involving before completion upward of $80,000,000, and the other, a 14-foot project to Chicago, costing no man can say how much. I will not discuss the merits of either proposal beyond saying that the Board of Engineers, as I understand from a reading of its report, has shown the impracticability and utter wastefulness of the "Lakes to the Gulf" proposal, and that not 5 per cent of Lake commerce coming to Chicago is now carried in vessels drawing 14 feet or less that could be accommodated by a proposed 14-foot channel.

The failure of the old Fox River Canal in Wisconsin to carry commerce from the Lakes to the Gulf or of the Hennepin Canal to carry anything either way does not seem to disturb Col. Townsend, who wants us to experiment with enormous Government expenditures on the project in order to see if the plan will "be utilized." Although the channel on the lower Mississippi is deeper and larger than any other inland waterway in the world and yet carries only about 10 per cent of the actual traffic handled on the river before the war and before $166,000,000 had been spent on the Mississippi to aid commerce, still Col. Townsend has hopes that the $80,000,000 we are now putting into the Ohio River and have put there will be utilized. However, his recommendation to stop on 58 projects after years of waste and extravagance has the merit of being timely, even though it reverses the policy of engineers from time immemorial.

Col. Townsend is quoted in favor of the Mississippi flood and reclamation project. I wonder if he would frankly approve the scheme if left to his own judgment. True, his position and an expenditure of $87,000,000 on this project would not permit its abandonment; but where is his specific promise or pledge to show that the $220,000,000 expenditure hereafter to be made by the Government will grant permanent flood protection? Of course, no one, not even the chairman of the Flood Committee, expects a payment of $30,000,000 by the Government—or five times that amount—to do the work, although that impression is given by the committee report; but does Col. Townsend make any such promise? If so, what qualifications or uncertainties accompany his statement?

Even if given explicitly and confidently, are we ready to accept his judgment as sufficient?

Col. Black, present Chief of Engineers, recommended that $18,700,000 be given to help out a water-power company down on the Muscle Shoals, but Congress in its wisdom thought differently. Col. Black thinks that a limitation of 25 per cent profit to dredgers over the amount it cost the Government to perform the same work is a dangerous limitation, but Congress thought differently. Col. Black overruled Col. Townsend, chief of the Mississippi River Commission, when Townsend recommended an abandonment of the Missouri River $20,000,000 project. Black said in his order overruling Townsend that the reclamation of 500,000 acres of land on the Missouri was involved. In that case Black wanted the Missouri River land reclaimed and so overruled Townsend, but now Townsend wants the Mississippi River lands reclaimed, but not those on the Missouri. Army engineers recommended the Arkansas River project, but after many years of fruitless effort and millions of waste Townsend now says it ought to be abandoned.

I do not question Townsend's judgment in the Missouri and Arkansas cases, but I do say, out of all this confusion of judgments by Army engineers, are we prepared to continue an expenditure of $220,000,000, or any other amount, on the lower Mississippi flood and land reclamation scheme until we are better advised as to the probable outcome?

Mr. Chairman, I do not care to further discuss the judgment of any particular Army engineer or of any 65 engineers mentioned by the gentleman from Indiana [Mr. CLINE], because we have no matured judgment from 65 engineers or from any other body of men on which we can rely with any degree of confidence.

Townsend, Taylor, and others hope, and possibly believe, we are doing the right thing, but from the nature of things they do not know, and although land reclamationists with billions of dollars at stake urge us to follow that belief and open wide the doors of the Treasury to this great private land scheme, words of caution and protest come to us from laymen who are vitally interested in the question.

THE WASTEFUL LEVEE SYSTEM.

I am confident the appalling raids on the Federal Treasury in the name of "flood protection" will grow in force and frequency, so that the country will soon ask Congress to investigate what this reclamation scheme comprehends.

However, these are suggestions that are not involved in the proposition I desire briefly to discuss, and that is the incompetency and waste which characterizes the present levee scheme. Last session I asked in a resolution for a competent advisory board; a board of distinguished high-class engineers, who will squarely confront the problem and solve it, if it is to be solved. The judgment of Goethals and men of his size would give confidence that the money spent is not entirely wasted, as is now contended. A million dollars spent in ascertaining the truth would be economy, although no one believes it would cost one-tenth of that amount. The present commission is pursuing its own course, and it will do so until the American people are brought face to face with the fact that the Mississippi River reclamation policy has been a drifting policy and a wasteful piece of growing extravagance.

AUTHORITIES, NOT PERSONAL OPINIONS, OFFERED.

I have no opinion to express as to what plan should be urged. That is a matter for experts to determine. One whose word is of more than ordinary value is Gen. Herman Haupt, known throughout the country as an eminent military and civil engineer, a man who died several years ago. Gen. Haupt left a pamphlet of great value to the country at this particular time. Gen. Haupt was an engineer, author, and inventor of wide experience and high character. The positions he occupied as engineer of railroads and other great corporations, including at one time the city of Philadelphia, entitle his words to more than ordinary weight.

In a remarkable pamphlet issued a few years ago, entitled "The Problem of the Mississippi," he presents a strong, comprehensive arraignment of the present system.

On page 8 he says:

> Charles Ellet, who represented the United States Government in connection with river investigation in 1851, was sufficiently bold to assert that to sustain a flood of the velocity of that of 1851 the levees must be made at least 2 feet higher from Red River to New Orleans, for which assertion he was in 1861 severely criticized by the representatives of Government in charge of river matters. Instead of 2 feet levees are now [at the time he was speaking] 5 feet higher than in 1857. The estimate of the Government engineers in 1861 for complete protection from Cairo to the Gulf, including value of existing levees, was $26,000,000. There have been expended since 1861 in levees still incomplete more than $5,000,000, and the cost of the levee system when completed will not be less than $100,000,000.

Since that day the total has more than doubled in amount. One might imagine this was a chapter from engineers' estimates on the Coosa or the Red or the Black Warrior or the Trinity or a hundred other streams on which Government engineers have increased their estimates. Gen. Haupt, in presenting his case against the present levee system, calls upon the opinion of Mr. L. W. Brown, civil engineer, wherein Mr. Brown asks:

> Has the Mississippi River Commission such knowledge and has it made such investigation as one necessary to determine that the bed of the river is not being lengthened? If they have, why is not this most valuable information made public? If the flood elevations are increased as past experience teaches us they have been, and if they have occasioned a decrease in the slope of the whole river, as is shown to be the case, although not published by the commission, by what hydraulic laws would the deduction be made that the bed is not fouling? If no phenomenon has occurred which was not anticipated by them, the commission is responsible for the losses this country sustained in 1897, amounting to upward of $100,000,000.

Two further brief extracts are quoted. On page 20 Gen. Haupt says:

> It has been shown that before the river was interfered with by the construction of continuous levees the changes in flood elevations were very slow, only 1 foot in 90 years, while the construction of levees has caused a rise as great as 1 foot in 2½ years.

A further extract from page 23 is directly to the point when he says:

> No single plan of improvement can solve the problem of the Mississippi—neither levees, outlets, waste weirs, or diversions will singly be sufficient, but a combination of all, directed by intelligence. Levees are required for local protection, but a system of continuous levees for highest floods from Cairo to the Gulf is the worst that could have been conceived.

CONTINUOUS LEVEES ARE VALUELESS.

Surely the last statement is significant when we are appropriating for the levee system more per year than we did for the whole country a little over a score of years ago.

Prof. Lewis M. Haupt, a son of Gen. Haupt, a civil engineer of high standing, has made a study of conditions on the Mississippi River, and has presented several instructive papers on the subject, which it is impossible to more than refer to briefly.

In an address before the Franklin Institute on "Controlling the floods of the Mississippi River" he says, after discussing the great loss of property through floods:

In behalf of the engineering profession it seems necessary to state the responsibility for these disasters does not rest with it, since Congress has the sole jurisdiction and control of these questions and its attention has frequently been called by engineers and river men to remedial measures which have not been adopted. The real causes may better be ascribed to politics and local interests, as may be illustrated by the following reported interview with one of the most sagacious railroad magnates of the country (Jay Gould), now deceased, who, on being requested to lend his aid to the passage of an act which would have provided earlier relief to the Mississippi Valley, is said to have replied: "I have read all the arguments before Congress. The outlet system is correct and the only way to deepen the Mississippi River. If that was done, what would become of not only my own but all other railroads coming to New York?" They would be ruined, and for that reason he would favor the levee system, for so long as that be kept up there need be no fears of the Mississippi as a competitor.

If Jay Gould were alive to-day his road and every other railway in the Mississippi Valley would join the railways that are now *contributing* to the support of the Mississippi River Levee Association.

Several years ago Prof. Haupt presented a strong comprehensive report on the Mississippi River problem, which reached the same conclusions as those formed by Gen. Haupt, Charles Ellett, and Mr. Brown.

Believing that a personal letter, one of a large number received from Prof. Haupt, may throw additional light on the Mississippi levee system, I quote brief passages:

CYNWYD, PA., *September 28, 1914.*

Hon. JAMES A. FREAR.

MY DEAR SIR: Your favor of the 26th is at hand, and I hasten to comply, feeling that the almost lifelong study I have given the question may not have been in vain when carefully considered by unbiased interests. You have sized up the situation as to levees, and the demand made upon the Government to aid in them under the guise of improving navigation, but, as Senator Berry said, it was a blind, since Congress had no authority to go into reclamation of lands.

One of the best men, thoroughly familiar with the river, is Lyman E. Cooley, civil engineer, of Chicago, also James Sedden, of St. Louis, both of whom were in the service of the United States in early years. Others, now deceased, like Prof. Johnson, Brown, Starling, etc., have left their record. Ockerson and Taylor, who are still on the commission, are very capable and well-informed men, but in the minority.

Sedden's papers and hydrographs indicated a rational system for protection from floods and providing an adequate navigation by lateral reservoirs in the waste lands, but this is only a partial remedy, and it has been vigorously opposed by levee advocates by stating they would be wholly inadequate.

I can not go into details but for all the remedial elements will refer you to the letter I sent Judge Burton extracted from the Transportation Crisis (a copy of which I think I sent you some time ago), vide page 20 in the Great Basin, and page 27, the Great Belt Route—Levees and Navigation.

The letter referred to making inquiries was from Senator Brice, of Ohio, 1887. This was 27 years ago, since when probably over $100,000,000 have been expended and the 9-foot stage has not been secured on either the Ohio or the Mississippi. See the confession made by the commission of 1900 (p. 20): "It is continually making experiments looking to the best use of available material when Congress shall provide for such a systematic improvement."

ENGINEERS, NOT CONGRESS, ARE RESPONSIBLE.

This it seems is not the duty of Congress, as it is an engineering question and has not been satisfactorily solved, since the policy is vacillating and the attempt seems to be made to correct the river locally by patchwork instead of as a whole by applying physical laws to the entire basin.

See V. P. 41 (2) giving a summary of the fifth of this series of papers. I send a blue leaflet, No. 2, giving extracts from Maj. Guin, United States engineer, and the various estimates. Since then many of the natural outlets have been closed in efforts to force all the water through the Passes to scour out the bars, but overlooking the fact that the mud remains to be ejected at the outlets, thus increasing the rate of advance of the bars and the amount of dredging.

While the United States engineers are absolutely independent of politics they are also not amenable to the electorate (the people), hence are virtually unaccountable to anyone for their mistakes, and the officials change their posts so often that they can not even assume the honor or responsibility for results. I say this without criticism, for it is the radical fault of the system.

Continuing, as to interference with the power of the engineers, who control the river and harbor projects of the country, Prof. Haupt says:

They are intrenched behind the Treasury, but as the Missouri Commission was abolished for insufficient results it may be possible to follow the precedent and satisfy the public that their levees and property will be better secured by the use of all remedies available instead of the single one—the levee system—which must ultimately bring disaster and destruction, because there is no escape for the silt.

THE REAL PROJECT.

In conclusion Prof. Haupt makes this cogent statement:

As you have asked for my candid opinion, I have not hesitated to give it, so that perchance it may lead to a change of policy for the public weal. The public at large is not interested, so long as they do not own plantations behind the levees, and those who do demand the protection of private property, which is given without legal sanction and paid for by the Nation. The money is virtually wasted in redoubts and intrenchments—against an invisible foe—which can not escape, but builds its own counterscarps, scales the barriers, and destroys the innocent citizens living under their shelter.

Very respectfully, yours, LEWIS M. HAUPT.

On the day last session following the introduction of a Mississippi River resolution I received personal words of commendation from high authority here in Washington, stating that my premises were right, the present system wasteful and disastrous, and the only protection to the country would be by the appointment of a high-class temporary advisory board, as I proposed, to make an investigation and report without delay. I was assured that such a board would unhesitatingly condemn the present extravagant and wasteful scheme, which is unsound in character, but continues to receive the approval of an ossified policy, as fixed and immovable as the prejudices which governed the persecutors of Columbus.

I do not offer this statement by way of argument, but to show the difficulty surrounding efforts to obtain the truth, when officials and competent authorities feel obliged to write "personal" at the top of their communications for obvious reasons—and I have received many such messages.

ANOTHER ENGINEER'S STATEMENT.

A strong, fearless man, who has frequently pointed out to me the disastrous Mississippi River policy now be undertaken by the Government, is Mr. Carroll L. Riker, of Brooklyn, a man of large experience in waterway work. Mr. Riker believes he has solved the Mississippi River problem, and has presented a bill to that effect. I have no opinion to express as to its merits, nor does Mr. Riker ask for its support until he has convinced Congress that the present system is wrong and, to use his words, "criminally wasteful."

Mr. Riker does not mince words when he says, in a statement made to me:

The plans of the United States Army engineers for the control of the Mississippi River are the greatest engineering blunders which have ever been perpetrated upon a nation. These plans show that they do not understand the underlying and first principle which naturally governs the flow of a river.

If an advisory board of consulting engineers be appointed, who are not graduates of West Point, to investigate these plans, and they used as data only that which is printed and officially indorsed by these Army engineers, they would certainly confirm the above statement after less than 24 hours of actual consideration.

Mr. Riker then engages in a technical but clearly presented discussion of river currents and other related influences, which I will not quote.

EMBALMED FALLACIES OF ENGINEERS.

Referring to authorities that have been the fetish of Mississippi River work, he says:

The embalmed fallacies of Humphreys and Abbot have been blindly followed for more than 50 years by these engineers, who have built dikes, revetments, and levees at the cost of more than a hundred million dollars in their efforts to make this river pursue a crooked and unnatural course, wholly in opposition to all of nature's natural inclinations.

There are engineers of the Army who would not commit themselves to these blunders. The president of the Mississippi River Commission represents those who do and expresses their views on this question in the following paragraph contained in his report bearing date of May 16, 1913, to the Chief of Engineers, United States Army, in reply to the request of the President for information on this subject:

"Cut-offs: By cutting off the bends in a river, its length is diminished and slope increased. This would increase its discharge at a given height. This method of relief can not be applied to the Mississippi River, as it would seriously injure its navigability during low water and increase the caving of its banks, which is now excessive. While it would afford relief in the upper portions of the river thus straightened, it would increase flood heights at the lower end, benefiting one locality at the expense of another." (See Appendix A, p. 11.)

When the engineering profession have had their attention specifically drawn to the facts connected with the present plans of the Army engineers for control of this river it will entail a national engineering disgrace that is unavoidable. Thirty-four annual reports of the Mississippi River Commission, concurred in by the various Chiefs of Engineers, United States Army, then acting, are mute witnesses against them that can never be effaced. There is not one word that can be uttered in extenuation of these blunders which have been perpetrated by these engineers upon the citizens of the United States for a lifetime. They are now preparing a trap for the unconscious confiding settlers in the valley of that river which will terminate in a terrible catastrophe as certain as the sun is to rise unless the present program be radically modified.

Mr. Chairman, it may be said by those who are criticized that personal interest influences the judgment of men who are not Army engineers. It is an argument used at both ends of the Capitol by statesmen of greater or less caliber, who impugn motives of personal interest to every act, and who ascribe disappointment or other unworthy influences to all criticisms.

Such replies will have no weight with those in search of the truth, and I am sure the common-sense criticisms offered by the eminent men I have quoted can not be scoffed out of court much longer.

Read House Report No. 390 of the Sixty-third Congress. It relates to claims for damages against the Government because of improper levee plans on the Mississippi River. Nothing further is required to place a seal of condemnation on the Government's handling of the Mississippi problem. It is an astounding fact that we continue to annually pour millions into the river without any comprehensive plan or permanent results in mind. What is the reason? Who is responsible for this enormous waste of Government funds? Everybody places the burden on the shoulders of some other body. Why not get at the facts by passing my resolution?

WHAT DO THE RIVER PEOPLE SAY?

Those who are familiar with local conditions declare misfortune has been shrewdly capitalized and the Government Treasury is the goal of those who, in the aggregate, have many hundreds of millions of dollars at stake through a reclaimed land scheme. I am not able at this time to discuss the selfish purposes behind the Mississippi River improvement scheme, but I am endeavoring to show that though the Government pours its millions into the river for the benefit of reclamationists the supposed beneficiaries will not receive any anticipated benefit, because the improvements will not be permanent.

The present plan does not deceive many people along the river valley, as I propose to show. Without means of securing all the information I would gladly present, I offer such proof as has accidentally fallen into my hands.

On September 28, 1914, the New Orleans Item printed an editorial which relates to several matters involved in this discussion, all of which may not be strictly pertinent to this particular point, but it clearly shows a leading publication of the great Crescent City is not in sympathy with the Mississippi River Levee Association, the present system of river levee improvements. For all of these reasons the Item is entitled, in my humble judgment, to the thanks of the Mississippi Valley, which looks for permanent improvement of the river, not extravagance, waste, and a blindness to impending danger. I place the editorial in the RECORD because it is relevant to the subject:

[From the New Orleans Item, Sept. 28, 1914.]

THE PORK BARREL, US, AND OUR NEIGHBOR.

The National Rivers and Harbors Congress conducts a national lobby for the pork-barrel bill.

The Mississippi River Levee Association was organized by some railroad interests who do not want genuine and permanent stream control, because it threatens competition by levee-board politicians and levee contractors whose jobs and profits depend upon the perpetuation of the stupid and vicious old system of disjointed levee maintenance under which the people of the valley have been bled and pillaged, both ignorantly and willfully, for the past generation, and left hopelessly exposed to terrible floods at the end of the process. The genii that framed this latter organization also framed a bill, and Mr. RANSDELL and Congressman HUMPHREYS of Mississippi let their names be tacked to it.

The two institutions are ostensibly separate.

The statement that the Item or Mr. Maxwell attacked the Rivers and Harbors Congress is untrue. Our general attitude toward it has been a feeling that if the Federal Treasury is to be looted for the selfish purposes of Congressmen and local interests that have strings on Congressmen, our own part of the country had as well have its share of the loot. * * *

What the Item has done in this matter is to tell its readers the simple truth about the standing of this pork-barrel measure before the people of the country. We have not been ignorant or dishonest about it. We told you a year ago that the feeling of the Nation against the abuses of the pork barrel was approaching a climax so rapidly that it was utterly unsafe to trust to the barrel for any adequate relief from floods. We warned you that the country would not allow many more pork barrels to be opened. * * *

The Item has been the only newspaper in New Orleans to take this course. The result vindicates its stand. We have been bitterly berated for this course by the other three newspapers. Ignorance or untruth alone can account for their behavior. We urge you to be charitable in determining for yourself to which their course is chargeable.

The Item's readers know from its past exposures that the Mississippi Valley Levee Association is built on a foundation of railroad cash. It is a pleasure to note that the Item's photographic proof of this fact was exhibited to the Senate during the recent debate. Everybody ought to know the truth.

We do not accept our good neighbor's well-meant statement of the case, but lest there be any doubt about it, we hasten to assure everybody that we are quite proud of our contribution to the enlightenment of a suffering people, oppressed by log-rolling politicians and benighted by an ignorant and incompetent press, upon the fundamental causes that keep the pall of flood above them.

From Memphis, a city that has suffered through the ill-advised experiments of Army engineers, comes a note of warning in two editorials forwarded to me by a gentleman who appears to understand the Mississippi River problem better than those who are now disbursing Government funds for an impractical levee scheme.

The News Scimitar, of Memphis, on November 26, 1913, gave a clean-cut expression of the views of the people it represents in the second great city of the Mississippi River Valley. It is as follows:

[From the News Scimitar, November 26, 1913.]

ON TO WASHINGTON.

After a Peter the Hermit campaign, carried on by Evangelist John A. Fox, at the expense of the railroads, for several months, in which a purely unreckoning and mechanical sentiment has been worked up in favor of the futile "levees-only" idea, a descent is to be made on Washington in the near future, through which, by a show of numbers, Congress is to be coerced into siphoning out of the Treasury $60,000,000 for a continuation of the mud-pie system of confining the waters of the Mississippi River at flood tide. Anticipation is cloud piercing, and the bird of hope is soaring high without moulting a feather in the ranks of the political levee boards up and down the river, while the absentee Mississippi River Commission fancies it sees before it a new lease of life. In spite of all this, there will be snags encountered in the stream. * * *

It is not unknown in Congress and throughout the country that those cooing turtle doves, the political levee boards, * * * are thoroughly discredited by the property owners, and that they maintain a show of vitality by shaking hands with each other. The "indorsements" so much touted mean nothing more than the price which various organizations that care nothing and know nothing about the question are willing to pay to be let alone. They have all been appealed to, barring the Ladies' Auxiliary of the Hod Carriers' Union with the same result, which meant, "Take it and get away."

For 200 years the levee system has been tried and found wanting, and the more money that is spent on levees the more disastrous do they become.

Valuable lands on the outside of the levees have been rendered worthless by the increased elevation of the flood heights, and no consideration is given these people or their 9,000 square miles of territory in the way of reimbursement. Memphis has suffered sorely as a result of levees, and is now asked to join in the clamor for more levees.

Congress is asked for $60,000,000, while it is admitted that no proper surveys have been made, and under the present pork-barrel system there is no assurance that competent engineers will have the work in charge.

Figures will not yield to clamor. In 1882, with 52 feet of water on the gauge at Cairo, the stage at Memphis was 35 feet, there being no levees on the Arkansas side. Every part of the city was above water. In 1913 Cairo had a stage of 56 feet, while Memphis was submerged and much property destroyed by a stage of 46.5 feet, or an increase of 11.5 feet over the stage of 1882. We are issuing bonds for local protection while being called upon at the same time to ask for more money and more levees, which are making local expenditure for self-preservation necessary.

The old brutal logic that we must "get some of that Yankee money down here" is no longer appealing. The Mississippi River Commission has been discredited by its own reluctant admissions. The political levee boards have been discredited by the people and the logic of events. We must have a new deal and a square deal. We must adopt new and better methods. We must put new and better men in charge, and we must make provision to reimburse those whose property the levee system has destroyed.

The old brutal logic to "get some of that Yankee money down here" is resented by one of the strongest papers in the Mississippi River Valley. That call comes from reclamation interests represented by levee boards, and the land is not all owned in the Mississippi Valley nor in the South.

Listen to the following denunciation from the Memphis Press of September 12, 1914:

THE "PORK BARREL" IS AN ENEMY OF NAVIGATION.

We have told our readers on many occasions that the conscience of the Nation was revolting against the "pork barrel."

We told them that we were crucifying our own chances for permanent relief from floods and from permanent reestablishment of navigation when we continued longer to put our faith in the hodge podge, wasteful, selfish, aimless conglomeration of good, useless, and evil projects annually or biennially labeled the "rivers and harbors bill."

The method of the rivers and harbors bill is indefensible, and the results of that method pursued through generations are its own damnation.

* * * * * * *

The would-be perpetrators of the "pork barrel" are the enemies of the comprehensive program, the enemies of real safety, the enemies of revived navigation.

It is not going too far to say they are, in effect, traitors to the Republic.

Another illuminating editorial on the same general subject criticizes the Army engineers' levees without gloves. It is short and I insert it entire:

[From the Memphis News Scimitar, January 12, 1914.]

FLOOD CONTROL.

* * * * * * *

The consensus of opinion among experts is that the fundamental defect of the Ransdell-Humphreys bill is that, although it professes to be in aid of navigation, it provides for large expenditures for levees, which increase the rapidity and total volume of the caving of the banks into the river. The Chief of Engineers reported to the Secretary of War that until the caving of banks into the Mississippi below St. Louis can be stopped it is practically hopeless to expect any improvement of low-water conditions in the river. In other words, the stream can not be continued navigable.

It is estimated that there are 749 miles of caving banks on the lower Mississippi, from which 9 acres in area by 66 feet deep for each mile is thrown in the stream, which in 50 years would mean half a million acres of land to a depth of 66 feet tumbled in to obstruct navigation.

* * * * * * *

It is claimed by those high in authority that the Ransdell-Humphreys bill should be entitled "A bill to destroy the navigability of the Mississippi River, and to eventually make it impossible to protect the valley from devastation by floods."

This is just what the railroads want, and have been working for so successfully, and this is why they are behind the levees-only people, who are making so much noise, but which is "all cry and little wool."

The more that people investigate the matter the more they see the futility of patchwork and mud pies. Those who have been forced to study the question because it has been brought home to them, like Mayor Reubenstein, of Stockton, Cal., who has had experience in the San Joaquin Valley, know something about flood control. In replying to a communication from Secretary Fox, of the local association, Mayor Reubenstein exposes the fallacies contained in the Ransdell-Humphreys bill, and states: "Fortunately for our country a plan has been submitted that is sufficiently comprehensive to insure an orderly start on this great work, and with ample means for its successful completion."

I would willingly print additional personal letters and opinions regarding the extravagance, waste, and utter uselessness of the present Mississippi River reclamation scheme, but will be able to offer only a few newspaper clippings that have come to my hands and which show beyond cavil that the people of the valley, where free to express their opinion, are opposed to the present levee scheme that is foisted on them by the powerful land reclamation levee association.

Sometimes a few words of common sense from a man who knows whereof he speaks and is among the people gives a clearer insight into conditions than the experiments of scientific advisers.

I offer this communication, clipped from a Memphis paper, and no man can question the logic or intelligence of the writer, who was at the time a member of the Mississippi State Legislature, according to an attached memorandum. He says:

THE LEVEE SYSTEM.

The NEWS SCIMITAR:

It seems to be the opinion of a great many, who ought to know as much about it as anybody, that the levee system will ultimately ruin a large proportion of the Delta lands and destroy the navigation of the Mississippi River. Higher levees mean higher waters; and the inevitable break spreads the pent-up flood over a greater area, destroying more lives and property.

The owners of the Delta lands, even those who favor levees, have discovered that, with all the help they are receiving from the Government, the cost of protecting their lands is greater than they can bear. If the planters alone had to pay for the levees, it would bankrupt them. If so, then the game is not worth the candle.

Of course, if Uncle Sam should dump sixty, eighty, or a hundred millions on the levees it might afford temporary (and only temporary) relief; but wherein is the Government benefited or the "general welfare" promoted by protecting the private property of a few individuals?

I happen to know that many of these Delta planters are sometimes very loud in their denunciation of "paternalism." But their opposition seems to banish entirely when they are the sole beneficiaries.

The only public benefit to be derived from the levees ever urged by anybody is the improvement in navigation and increased taxable value of the protected lands, and it has been some time since a man with any brain has seriously asserted that the navigation has been, or ever will be, improved by the levees.

As to taxable values, the General Government does not levy a tax on lands. The only chance for us "hill billies" to get our money back is through taxation by the State. Again, I happen to know that, as a rule, these Delta planters dodge a just proportion of State tax by assessing their lands at one-fourth to one-seventh of what they are willing to sell them for.

Now, if Uncle Sam is in the farming business at all, he owns a mighty big farm, of which the Mississippi Delta is only a small patch. And he is a very poor farmer when he undertakes to improve a patch when it is already a demonstrated fact that it won't pay expenses. If the protection of the Delta can be made a profitable investment, why should not those who are to get all of the benefits pay the expense bill?

Then, if Uncle Sam would protect his smaller valleys from overflow and his hill lands from erosion, would not that add greatly to their taxable value?

Ridiculous. Well, yes, my friend; I regard the whole proposition as ridiculous in the extreme; too much paternalism for me. But if we undertake Government protection of farm lands, why not go at it on the principal of "equal rights to all, special privileges to none"?

J. H. SIMPSON,
*Member Mississippi Legislature.*

BYHALIA, MISS., *R. 2, May 10, 1913.*

I quote a news item of some time ago appearing in the Memphis Appeal, wherein L. S. Lake, of Memphis, gave reasons why the damming up by leeves of all escape by Mississippi River waters increased the hazard. Mr. Lake appeared before the Flood Committee during its recent hearings. Like the committee members, I assume he is a "layman," but after many years experience with the real thing he tells what he knows, and it is my experience that such men have a better understanding of conditions than laymen who have not.

It may add nothing to his statement to know he is a graduate of a northern university of which President Wilson was once the president, and that he served as a Confederate soldier. However, it is evidence Mr. Lake imbibed democratic wisdom at a recognized fount of learning and is not looking for "Yankee money":

[From the Commercial Appeal, May 10, 1913.]

LAKE FAVORS OUTLETS—HE SAYS THEY WILL REDUCE FLOOD HEIGHT BY 11 FEET.

L. S. Lake last night delivered a lecture at the Goodwyn Institute auditorium to a small but appreciative audience on "The Diversion of Floods and the Rescue of Levees on the Mississippi River from Cairo to the Gulf."

He says that the levees are an open defiance of nature, and that the higher they are built the greater will be the disasters occurring when they break, which, he says, is inevitable in the case of floods like the recent one.

He favors a diversion of the flood waters by means of the natural outlets which have been closed up by the levees. He says that the diversion of the flood waters will reduce the height of the flood by 11½ feet.

He would allow the water from the river in time of flood to flow into the St. Francis River by means of properly constructed outlets or spillways in the levees and into the Coldwater and Yazoo Rivers on the Mississippi side. On the lower river he favors the opening of the levees at certain points so as to let the water flow out through the bayous across the State of Louisiana and into the Gulf without passing New Orleans.

Mr. Lake says that he is not opposed to levees, but that he believes that alone they are ineffectual means of flood control. He says that more and more as they assume the skyscraper proportions they become a greater menace. He says that levee advocates have had 200 years of experimenting on the Mississippi River and have failed, and urges that some other means be tried to supplement the levees. He maintains that levees are a failure because they break before the water reaches the top, owing to the fact that the water reaches the inside through underground channels which can not be guarded against.

He says that the people between the levees have been deprived of the value of their land without due process of law and contrary to the Constitution. His own plantation at Harberts Landing, 77 miles below Memphis on the Mississippi side, lies between the river and the levee.

He was introduced by Dabney Scales, who paid him a very high tribute as a Confederate soldier and as a citizen. He read from a manuscript and his talk was illustrated by charts and diagrams.

TRAINLOADS OF LEVEE BOOSTERS.

To those who care to follow the campaign made by Memphis and its people, as well as others along the river, to get out from under the clutches of the powerful levee association I quote a news article from the Scimitar of a little over a year ago, wherein an appeal was made direct to President Wilson to lend an ear to their appeal.

The articles are especially enlightening, particularly that wherein it is learned that three special trains filled with Mississippi River levee boosters were brought to Washington to help swing through a bill of which the Flood Committee chairman was a champion.

Just how much money the levee association has spent for lobbying and its propaganda can not be estimated when men are sent throughout the country securing resolutions from State legislatures; when books, pamphlets, and magazine articles are sent broadcast throughout the country; and when trainloads of boosters are sent to Washington to show us how to vote. How can any man doubt the enthusiasm inspired by a 20,000,000-acre land-reclamation scheme, which the Government is now about to undertake, practically at Government expense.

The article follows:

[From the News Scimitar, Dec. 2, 1914.]

CAUTION IS URGED IN HANDLING BIG WATERWAYS ISSUE—MEMBERS OF RIPARIAN LANDOWNERS' ASSOCIATION IN WIRES TO WILSON, LANE, AND GARRISON RECOMMEND DELIBERATION—ASK NEW INVESTIGATION AND A BROADER PLAN.

Protesting that advocates of the "levees-only" system of protection against overflows in the Mississippi Valley, as contemplated by the Ransdell-Humphreys levee bill, are seeking to overwhelm Congress by mere numbers rather than by relevant facts, officers and members of the Riparian Landowners' Protective Association Monday sent a message to President Woodrow Wilson; Franklin K. Lane, Secretary of the Interior; and Lindley M. Garrison, Secretary of War.

L. S. Lake, of Memphis, a former Princeton undergraduate and local supporter of a broader defense than levees only, is a signer of the message, as is J. W. Bennett, president of the riparian landowners' organization.

The message to Wilson is as follows:

MEMPHIS, TENN., *December 1, 1913.*

Hon. WOODROW WILSON,
*President of the United States, Washington, D. C.*

HONORED SIR: A large number of delegates are now arriving in Washington to try to influence Congress and the Government in favor of the Ransdell-Humphreys bill, which means "levees only" for the lower Mississippi River. They seem to wish to overwhelm Congress by spectacular methods and carry their point by a whoop, whoop, hurrah!

We earnestly entreat you, Mr. President, not to surrender entirely to their views and not to pledge yourself irrevocably now to their methods or plans. We rely upon your courage and independence of thought to withhold a snap judgment on this great and important question.

The dreadful overflows and failures of the levees of the past two spring seasons should teach caution, as should also the tremendous demands on the purse of the Government. The Nation should unquestionably aid us in this lower valley to fight against the floods now precipitated upon us annually from numerous States above us, but in this progressive age its moneys should no longer be invested on a discredited "levees only" system, which, now in the face of repeated experience and palpable facts, is shown to be nothing but a superannuated superstition and a defiance of common sense.

The political levee boards have long dominated this Mississippi Valley, to its dreadful hurt. Thousands of the plain people—the actual working farmers of the alluvial lands of this valley—know that the levees, on their present unscientific, narrow, sinuous lines, following closely along the immediate banks of the ordinary river channel, can not restrain and hold the waters of unusual floods encurbed between their embankments.

When the flood water began to dive under or break, by filtrating sand boils beneath the natural ground surface, the huge levees above, then the death knell of the present system was sounded. For how restrain the myriads of underground weaknesses along the thousand and more miles of levee fronts? Call a halt, then, and have a new examination

of this whole subject by fresh and different independent and impartial eminent engineers. * * *

Very respectfully,

L. S. LAKE.

I hereby join in and approve the foregoing telegram.

J. W. BENNETT,
*President Riparian Landowners' Protective Association.*

RANSDELL-HUMPHREYS BOOSTERS AT CAPITAL.

WASHINGTON, *December 2.*

The white ribbons of the Mississippi River Levee Association are more frequent than stars and stripes here to-day. Three special trains from Memphis and neighboring cities arrived this morning, and the remainder of the representation will arrive on another special to-morrow. Chief interest now centers in the hearing before the Rivers and Harbors Committee of the House to-morrow. Former Senator Leroy Percy, of Mississippi, has been placed in charge of the hearing, and has called brief conferences of the speakers and other leaders for to-night, when final arguments in favor of the Ransdell-Humphreys bill will be made. Each of the States most interested furnishes one speaker.

The Missouri delegates have not arrived. The Memphis delegates are boosting the Ransdell-Humphreys bill providing for $12,000,000 a year for five years for Mississippi's levees, as against the Newlands bill, which appropriates a much larger sum and covers a greater scope of work. The Newlands bill is strongly urged by New Orleans delegates.

I have many clippings and opinions, but two letters published by a woman of rare force of expression have come to my hands; both were printed in a Memphis paper, one in 1913, the other in 1915. I can not do better than attach both:

PUBLIC DISCUSSION.

[From the News-Scimitar, Apr. 23, 1913.]

A LADY'S VIEW.

EDITOR THE NEWS-SCIMITAR:

The supreme thing confronting the people living along the Mississippi River from Cairo to the Gulf is how to overcome the injury and hardships the St. Francis levee board and Mississippi River Commission have put upon them. Before these autocratic bodies were formed the farmers living upon the banks of the Mississippi River and upon the islands in the river were a happy and contented people, cultivating and marketing their crops with no dread of overflows. Since the manipulation of the river by this levee board they have raised the bed of the river till we are threatened with an overflow with every general rain in the Mississippi Valley. The overflow of 1913 was far greater than 1912, though there was a much smaller rainfall than 1912. Islands which were never overflowed before these levees were built have had the water gradually encroach on them till this last overflow flooded them to the depth of 10 feet on the highest ridges, and would have gone much higher had not the break at Wilson given them relief.

A few years ago the Government took the sounding in an eddy 25 miles above Memphis to the depth of 80 feet and found no bottom; to-day that eddy is a mud bar covered with willows only 10 feet lower than the original bank. In a few years if these levees are persisted in the Mississippi River will be a desolation of sand and mud bars, as it is a proven fact that the beds of all large leveed streams are raised in proportion to the height of the levees. And if they did succeed in holding this vast amount of water, which they will never do, what is to become of the hundreds of people whose farms are on the islands in the Mississippi River, and those outside of the levees? Is it just that they should be ruined and their property desolated to satisfy the greed and graft of this levee board and support royally and sumptuously these sinecures who compose the Mississippi River Commission? Are we freeborn Americans to suffer such injustice from these politicians? Capt. Cowden years ago advocated a policy which, had the Government adopted, would have met these requirements and saved immense waste of the people's money. The Government should take hold of this matter, build reservoirs, open up drainage to the Gulf and Great Lakes, and deepen the channel of the Mississippi River, and give this long-suffering people a rest from the levee boards and these engineers which they graduate from West Point, and who know no more about the requirements of this river than the old negro preacher knew about his text, which was, "Seven sons did Milchal bear to Nahor," and he told his congregation that Nahor was sick and these seven sons went out and kotched a b'ar and they milked that b'ar and brought the milk to Nahor. Gen. McDowell Townsend is right, "The situation is reduced to a mathematical problem, which is, How long before this people shall be pauperized to protect these great syndicates that were formed to buy up the sunk lands of Arkansas and Missouri at 25 cents per acre and drain them at the public expense, and to sell them at an enormous profit? It is for the chief benefit of these syndicates that these levees were built and are being maintained, and for which the people are taxed beyond endurance.

Mrs. O. K. JOPLIN,
*1500 Court Avenue, Memphis, Tenn.*

The letter of transmittal says these letters are from a lady of one of the best families. No one can doubt it. After two years she was again moved to protest against the present levee scheme, and I submit her letter of February 23, 1915, on the same subject:

FROM A LADY OF OUR BEST "OLD FAMILIES"—AGAINST "LEVEES ONLY."

CORONA POST OFFICE,
*Centennial Island, Tenn., February 23, 1915.*

EDITOR THE NEWS SCIMITAR:

Have we people who live on the islands in the Mississippi River and on farms outside the levees become stupefied by our losses and the hardships we have suffered because of these levees that we sit idle and silent while these millionaire planters, with the help of Congress, build their mud banks and pile water over us, that brings ruin to our lands and cattle and homes? If Mr. Fox, who is only a salaried man and has nothing at stake save the money he gets for his talk, for a moneyed consideration can use his eloquence to influence governors to send memorials to Congress to aid in finishing this devilish work of utter desolation they have already wrought, surely the men who see their children and wives reduced to beggars because of these levees should be aroused by their pitiable condition, and urge our Senators and Congressmen of West Tennessee, who have given a sacred oath to care for the interests of their people, to bring this outrage before Congress and use their influence in securing a recompense from the Federal Government for this murderous crime it helped to put upon a helpless people. And the women, who with breaking hearts look upon their desolated homes and ragged children, know that in the highest heavens there sits a Judge whom neither greed nor graft can corrupt, and whose spirit rides upon the face of the waters as when by the word of His power He called order out of chaos, and who in His omnipotence can break these mud-banks and roll these waters out of our homes and off of our lands, and we shall sing, as the children of Israel, "Thou didst blow with Thy wind, the sea covered them; they sank as lead in the mighty waters."

Mrs. O. K. JOPLIN.

PROTESTANTS ENTITLED TO A HEARING.

I offer a communication from V. C. Russell, of Memphis, whose statement is of value in so far as it points out the fault with the "levee-only" scheme. It also serves to show vigorous opposition by thinking men throughout the valley who have learned to know the present land-reclamation scheme is a growing menace and will not meet the hopes of its promoters. I am quite certain the Flood Committee of laymen did not fully understand the deep-seated fear and protest against the present plan which pervades the people of the valley. Admitting, for sake of argument, that they may be wrong, including as they do members of State legislatures, university graduates, ladies of remarkable force of expression, and others in the valley; supported as they are by leading newspapers of New Orleans and Memphis, is it not likely we are moving fast when a bill introduced on one day is sought to be put through Congress within a week after the committee of "laymen" report? In other words, does not it appear like undue haste, even though levee associations are pressing hard to get their land reclaimed? These people quoted are without means to make the fight; but we have a duty to perform.

I quote from a statement of V. C. Russell, of Memphis, Tenn., who has a plan of his own:

FLOODS CAN BE CONTROLLED BY USING FLOOD GATES IN LEVEES AS SAFETY VALVES—HIGHER AND STRONGER LEVEES WILL NOT PREVENT UNDERGROUND BREAKS (SAND BOILS).

* * * Nature's natural ways will soon make this country the richest in the world, automatically replenishing worn farm lands with nature's richest natural fertilizers in flood water, only awaiting a chance to back over and drop its richness without cost where the world's food supply and Nation's wealth is raised; and it being of great importance that lands should be kept productive and protected, especially when it is nature's wheel within a wheel doing the work. And why clog it building "higher and stronger levees only," causing high flood water to climb higher and higher, the past proving that the mighty weight of flood water in the channel has passed the limit of nature's endurance, causing water to be forced through the soft earth under levees, boil up on the other side where there is no weight, undermining and crumbling down levees, resulting in a flood-swept valley, leaving death and destruction in its path. And when and how it will end no one knows.

The underground breaks at Beulah, Miss., Wilson, Ark., and other places are proof enough that nature never intended flood water to be piled high up in a channel gulfward as if it was a reservoir instead of a drainage channel. "Higher and stronger" levees will not prevent underground breaks—"sand boils"; most all breaks occur underground since higher levees are built. The valley farmers pay a high "protection" levee tax and should be protected. Let us imagine ourselves and loved ones living in the valley, money invested, and can not pull up stakes and flee to the hills every time a danger note is sounded, and likely to find a watery grave unless we climb a tree, seeing a lifetime savings washing away. Wouldn't it be far better to have flood water under control as above stated, no loss of life or property, and abundant crops raised as they were before levees were built? The flood-gate plan will solve the Nation's two greatest "problems"—flood control and high cost of living. Nature's natural ways should be considered if permanent protection is wanted.

V. C. RUSSELL, *Memphis, Tenn.*

Mr. Chairman, I have been charged with unnecessarily taking up too many pages of the RECORD with statements heretofore made. I regret that anyone finds fault with the length of the remarks, because it requires some time in preparation, and I fear the remarks are not fully appreciated by such critics. However, until the House decides otherwise, I shall continue as best I can to furnish evidence of waste in the belief that it is a public duty to do so. Those whose ox may be gored have equal right to criticize, but if I have in any way contributed toward the defeat of wasteful bills in the past, surely no one will complain over a few pages of facts collected from Engineers' reports and elsewhere.

In the bill before us an expenditure of probably $200,000,000 is involved, and I have no hesitation in doing all that properly can be done to bring before Congress knowledge of conditions surrounding the bill.

I have found a valuable document along this same line in a brief furnished by Barnette E. Moses, of the Memphis bar. Mr. Moses has been engaged in litigation concerning Mississippi River lands before various courts, including the United States Supreme Court, so his statement is based on much study and investigation.

Quoting from his statement on "The Problem of the Mississippi River," every word of the Moses statement is of vital im-

portance to a full understanding of this bill. I invite its careful perusal:

THE PROBLEM OF THE MISSISSIPPI RIVER.

Bill No. 15405, of the Sixty-third Congress, second session, introduced in the National House of Representatives by Congressman McKELLAR, of Tennessee, should be passed if the Government is to undertake the work of reclaiming the vast alluvial valley from overflow.

This bill provides that the work of improving the Mississippi River shall be under the direct supervision of the President, and that the present Mississippi River Commission shall be abolished. Goethals, or any one of several men now in the Government's service, can solve the problem of the floods if put to the task.

Provision should also be made to alleviate the injuries which necessarily will be caused by a further increase in the height of the levee system.

The destruction of property and loss estimated in the millions in Memphis during the floods of 1912 and 1913 was due to the increased elevations of the flood heights resulting from the confinement of the water by the levee on the opposite side of the river. In 1882, with 52 feet of water on the gauge at Cairo, Ill., and no levees on the Arkansas side of the river, the stage at Memphis was 35 feet, and every part of the city was above the water's reach.

In 1912 Cairo had 54 feet and Memphis 45.2, and in 1913 Cairo had 54.7 feet and Memphis 46.5. This shows an increase in 1913 of 11.5 feet over the stage of 1882 without a proportionate increase in the volume. According to the testimony of Col. C. McD. Townsend before the Rivers and Harbors Committee of the House, in December, 1912, the floods of 1882 and of 1912 were approximately the same in volume. Even more convincing and specific evidence in this regard is found in the report of the Mississippi River Commission for 1910, page 2938, which is as follows:

"The increased elevation of the flood heights is the result of the general confinement of the flood discharge by the levee system as a whole."

It must be borne in mind also that since 1882 levees have been constructed at Cairo, which materially contract the width of the flood, and the "general confinement" at this point may reasonably be assumed to have caused some, if not all, of the increase in the stages of 1912 and 1913 as compared with 1882.

The city of Memphis, which in 1882 was untouched by a stage of 35 feet, in 1897 had 37 feet, with 51.6 at Cairo; in 1903 had 40.1 feet, with 50.6 at Cairo; and in 1907 had 40.3 feet, with 50.4 at Cairo. This gradual encroachment, culminating in the flooding of the northern portion of the city in 1912 and 1913, necessitates the expenditure of several million dollars to protect it from these unnatural flood heights.

DESTRUCTION FROM LEVEES.

North and south of Memphis there are farm lands on the east bank of the river, where there are no levees, because the Mississippi River Commission has found it to be too expensive to build them for the protection of the small basins. These farms, once comparatively high and well cultivated, have been and are being subjected to the same increased elevation of the flood levels that has been so apparent in the city. Some of these lands have been destroyed already, and a very few years of continued activity by the levee builders will complete the destruction of the remainder. These lands and this condition are fully described in Document No. 1010 of the House of Representatives, Sixty-second Congress, third session.

As appears from that document, the Mississippi River Commission, when it inaugurated the present levee system, referred at length to these unprotected lands on the east bank, where levees were not deemed to be practicable, and reported in 1894 in part as follows:

"It is probable that, as far as existing levees are effective to confine overflows, they operate at present to increase the elevation reached by a flood of given volume and will have that effect in increasing degree as the system approaches completion. It must be recognized that the result will be to inflict some and perhaps great hardships upon the owners of the lands in the unprotected areas described. * * * They have always been liable to overflows by the highest floods, and they have always escaped overflows in some years. * * * There may be, however, some floods which, unconfined, would not overflow them, but which, confined, will overflow them, and the injury in such cases would doubtless be of that immediate and proximate character which constitutes recognized grounds of legal redress."

NO LEGAL REDRESS FOR DAMAGES.

That the anticipated injury to these lands did not constitute "recognized grounds of legal redress" was decided by the Supreme Court of the United States on June 16, 1913, in the case of Jackson v. United States, which had been pending 19 years, in which the opinion was rendered by Mr. Chief Justice White.

That injury has been an actual one, however, to the 21,000 people who inhabited those lands in 1894.

A further extract from the report of the Mississippi River Commission for 1910, page 2937, refers to these lands and states:

"Some of the landowners in these areas have brought suits for damages in the Court of Claims, which, though pending for many years, have as yet been unavailing. * * * The immediate cause of the injuries complained of is the increased elevation of the flood heights. That is the result of the general confinement of the flood discharge by the levee system as a whole. Relief in some form ought in justice to come from Congress and the State legislatures in cooperation. But such cooperation would be so difficult to obtain that it is hardly worth the thought. Meanwhile the litigation drags its slow length along, the lives of the landowners are passing away, and hope deferred is making their hearts sick. The situation is pathetic and distressing in the highest degree. That these people should be condemned to perpetual inundation without possibility of relief or redress for the sake of an improvement from which their fellow citizens are enjoying great benefit is intolerable to any man's sense of justice."

Like a beacon light shining in the darkness of false theories, inconsistent statements, impractical methods, unavailing and ineffective works, and an enormous expenditure of public funds, this constant effort on the part of the Mississippi River Commission to secure some assistance for these unfortunates whom it is ruining is the one redeeming feature apparent in the annals of its career.

Any new policy of waterways improvement must regard the injuries to result from its work as well as the benefits to be derived therefrom, and must take into consideration the desolation to be wrought to the lands destroyed in connection with such work.

A provision has been made in the Newlands-Broussard bill whereby the rights and the equities of these people will be protected.

The present Mississippi River Commission and the work done by it stand utterly discredited by its own statements.

So far has the commission departed from the original, sincerely planned effort to aid navigation "by confining the flood waters so as to deepen and scour out the channel" that this theory is generally recognized as the merest pretext and subterfuge under which the work of reclaiming the alluvial basins is being carried on. The truth is shown in the report of the commission for 1912, at page 3724:

"While the levees have a certain degree of utility in the improvement of the channel and are necessary to 'promote the interests of commerce' by providing landing places for the interchange of traffic in times of flood and protecting the lines of railway behind them, their immediate and main value is the protection of the alluvial lands for the benefit of their owners." (The quotation marks are inserted by the commission.)

No clear admission is possible that the commission has abandoned its original plan.

LAND RECLAMATION—CONTROLLING MOTIVE.

This so-called "protection" of the alluvial lands along the Mississippi River is primarily and fundamentally a work of "reclamation," as that term is generally understood. The fact that the large basins of the St. Francis, the Yazoo, and the Tensas were subject, in their natural condition, to the burden of storing the surplus waters of the Mississippi during the spring floods, and were overflowed annually before the levees were built, has been disguised under the appeal for "protection" for so long a time that it is seldom recognized in its true character. The history of the levee system along the Mississippi River is merely a repetition of the fight of mankind from time immemorial to reclaim for cultivation the fertile alluvial plains of the rivers of the world. The futility of the fight under the past method of "levees only" is apparent and real, and has been impressed upon the people of the valley during the floods of the last two years by ruin, starvation, and death, incident to the breaks in the levee system. American engineering skill, if applied intelligently and properly, can accomplish the reclamation of the alluvial regions by supplementing the levees with spillways, outlets, and reservoirs to care for the surplus water above the amount that can be held at the breaking point of the levees.

The Mississippi River Commission, in its report for 1912, page 2732, has given tersely the gist of the real trouble with the "levees only" plan. After stating that of the 17 crevasses that occurred during that year only 3 were caused by overtopping, the commission says:

"Defective foundations may exist far below the base of the levee in strata of sand through which the water percolates, and when the head of water in the river becomes sufficiently great a break through the surface soil occurs and the result is a sand boil, which may cause the levee to collapse with little or no warning."

The flood line is being raised constantly and the "head of water" in the river is increasing annually as the levees are elevated higher and higher. This increase in the pressure upon the strata of sand during each succeeding flood causes a break in the levee line at a point where the head of water during the preceding flood was not quite sufficient to force it through the strata, thus causing a break in the levee at a new and wholly unsuspected point. Outlets, spillways, and reservoirs will reduce this hydrostatic pressure to a point that can be sustained with safety.

The lands and warehouses along the river front have been destroyed by the increased elevation of the flood heights; the people have been driven away from the naturally high lands immediately adjacent to the river channel, whence came the larger part of the traffic upon which steamboat transportation thrived in former years; and they have been forced to move behind the levees, where railroad lines are more accessible than the river carriers.

RAILROADS TO THE RESCUE.

There is much locomotive smoke in back of the agitation for the "levees only" bill. The railroads are economically opposed to any real improvement of the river "in aid of navigation." New Orleans newspapers reported during the "levees only" campaign that eight railroads, with lines paralleling the river, had subscribed $1,000 each per pear for five years to the funds of the Mississippi River Levee Association.

Sincerity on the part of the railroads in furnishing pecuniary aid in the cause of river improvement is hard to believe. Rather would it seem that a constantly "increased cross section," such as appears from the report of the Mississippi River Commission for 1912, page 3724, now to be taking place, and the consequent decrease in the average depth of the water, is a consummation devoutly to be wished by them.

The extreme complacency with which the commission says in that report, "We must go on with levee construction in the way which has justified itself by so many years of successful control of Mississippi floods," can only be equaled by the argument of Col. C. McD. Townsend in his address before the National Drainage Congress, at St. Louis, in April, 1913, that the fact that only 13 miles, or less than 1 per cent, of the levees failed during the flood of 1912 is evidence of the success of the levee system. A chain is no stronger than its weakest link. The 13 miles of levee that failed in 1912 flooded 10,812 square miles, or one-half of the land behind the entire levee system, as appears from the report of the Mississippi River Commission for 1912, page 3723.

Instead of deepening the channel, the result has been to raise the bed of the river in many places.

With wonderful tenacity, born of long habit, the "levees only" advocates contend, however, that the levees have not caused the bed of the river to rise. The most that the Mississippi River Commission will say officially in this regard is, "that there has been no measurable progressive elevation of the bed of the river," as it said in its report for 1912, page 3717. Inadvertently the truth of this much-discussed question has been disclosed.

"Experience in the lower Mississippi would seem to show that such rivers are apt to form a series of pools separated by bars, and that raising the water surface is accompanied perhaps by a deepening of the pools, *but certainly by a building up of the bars, so that increased reading on the gauge by no means implies greater available depth over the bars.*" (Italics ours.)

The foregoing paragraph may not mean that the Mississippi is filling up, but that would seem to be its meaning to anyone except an "eminent engineer." Yet its source is surprising. It comes not from a "pseudoscientist" of the newspapers but is the statement of the most ardent of all the "levees only" advocates, Col. C. McD. Townsend, president of the Mississippi River Commission. This means that there is now no greater depth of water in the river channel for purposes of navigation, with 46.5 feet on the Memphis gauge, than there was in 1882, with a reading of only 35 feet as the maximum.

The subtle insertion of the word "progressive" in the official report showing "no measurable progressive elevation of the bed of the river," as quoted above, furnishes the loophole of escape from the cold, bare fact that the bed of the river is rising. But what matters it to the steamboat captain who runs his craft aground that the rise in the river bed is only on the bars? How is navigation aided by building sand bulwarks across the channel? Yet the only authority of the Mississippi River Commission for the expenditure of public funds is "in aid of navigation."

It may be that the colonel forgot himself and his oft-repeated contention that the levees do not cause the bed of the Mississippi to rise. The statement was not made during a consideration of the levee question, but it is from page 8 of the report made to the War Department on January 21, 1913, by the Army Engineers, in opposition to the reservoir plan submitted by the Pittsburgh Flood Commission. The report was signed by Col. C. McD. Townsend, F. R. Shunk, and H. Jervey, of the Corps of Army Engineers. The plan of the flood commission was to use the reservoirs to store waters during the rainy season and to open the reservoirs during low water and thus increase the depth of the Ohio River for the purpose of aiding navigation "by raising the water surface." "Raising the water surface" in the Mississippi was caused by the levee system. The Mississippi River Commission, in its report for 1910, page 2938, said:

"The increased elevation of the flood height is the result of the general confinement of the flood discharge by the levee system as a whole."

This is only one of numbers of contradictory and fallacious contentions made by the levee builders which have caused intelligent men to lose confidence in them and their work.

Their repeated estimates of cost, constantly growing, their repeated declarations that the levees would hold, followed each year by repeated disasters, gradually have brought the people of the valley to an understanding of their fallibility.

A LITTLE HISTORY OF INTEREST.

In 1860 Capt. A. A. Humphreys and Lieut. H. L. Abbot, Army engineers, reported to Congress that it would take about $17,000,000 "to secure the alluvial region against inundation." (Report of Humphreys and Abbott, p. 420.)

In 1883 the Mississippi River Commission estimated the final cost of the levee system "for protection" at $11,450,000. (Report M. R. C., 1883, p. 28.)

The Mississippi River Commission has never made an estimate of the ultimate height to which the levees would have to be built in order to withstand the greatest known floods. Every estimate has been based "provisionally" upon the stage reached by each succeeding flood as the levee system was extended and the flood heights raised thereby. In 1884 the commission said:

"We therefore conclude that levees, such as have been herein described, are, in connection with an equalization of width and the prevention of caving, an important part of any general and systematic plan for the improvement of navigation and the prevention of destructive floods." (Report M. R. C., 1884, p. 32.)

Col. C. B. Comstock, who was then the president of the Mississippi River Commission, commented upon the report of the majority in no weak terms. He said:

"I am unable to learn through the report exactly, or approximately, what height the levees 'such as have been herein described' are to have." (Report M. R. C., 1884, p. 33.)

The Mississippi River Commission has never dared to make a statement based upon exact data with regard to the height of levees necessary to hold a flood of the greatest known volume. Every estimate made by it has been erroneous in the extreme and has been based on nothing more nor less than guesswork. Col. Townsend, the president of the commission, stated the truth of the matter before the House Committee on Rivers and Harbors, December 5, 1912, when he was asked by Mr. HUMPHREYS:

"Did you figures that $16,000,000 [his estimate before 1912] would put the levees in condition to hold the flood of 1882?"

Col. Townsend answered:

"No, sir; the estimate was to the provisional grade. The Mississippi River Commission, when it adopted the provisional grade, did not claim that that was the grade of the flood of 1882, but they were in this position: There was a good deal of discussion as to how high floods would be. Some people thought that they would not attain any great height, and the commission took a moderate position, holding to what they called a provisional grade, which would practically satisfy all the disputants on the subject, with the idea that if that grade was not high enough they would alter it in places; but the provisional grade has never been adopted as anything more than a trial grade."

Yet Col. Townsend, in his address delivered before the National Drainage Congress, in St. Louis, on April 11, 1913, and published by the Mississippi River Levee Association as part of its literature in support of its "levees only" plan, stated that:

"The height to which levees should be constructed is as susceptible of determination as the strains to be permitted in an office building due to wind pressure or the moving load allowable on a bridge. The city engineer solves a similar problem whenever he constructs a sewer to carry off the storm water from the city streets."

NO DEFINITE PLANS FOR LEVEES.

The Report of the Mississippi River Commission for 1913 fails to throw any additional light upon the ultimate height or grade of the levee system, despite the experience and the knowledge obtainable from the floods of the last two years, but, in the identical language of the report for 1912, says:

"The 'estimated final contents' of the levees given above is based on grades and sections as provisionally established by the commission."

And the quotation marks around the words "estimated final contents" were put there by the commission and not by the writer.

This "provisional" grade is nothing more than "a trial grade," despite Col. Townsend's statement that—

"The height to which the levees should be constructed is as susceptible of determination as the strains to be permitted in an office building due to wind pressure or the moving load allowable on a bridge."

These are the "eminent engineers" whom the public is exhorted to follow blindly, in whom we are told to put our trust, who say "give us $60,000,000 and we will complete the levee system." Yet these "eminent engineers," knowing the volume of water that passed Cairo in 1882; knowing the depth, length, and width of the space between the levees, and knowing the time taken by the flood crest of 1882 to pass from Cairo to the Gulf, have never taken the trouble to figure for themselves the height required by their system and the height to which the confined waters would rise. It has been sufficient heretofore "to satisfy all disputants on the subject." But the public refuses to remain satisfied with fancied platitudes uttered by a commission which states "that one of the greatest floods on a considerable length of the river was that of 1897, during which 38 crevasses occurred," and in the next sentence says:

"The important fact that the flood waters can be permanently controlled by a system of levees that can be constructed within a limit of expense warranted by the advantages to be gained seems to have been fairly demonstrated by the flood of 1897." (Report M. R. C., 1912, p. 3721.)

Thirty-eight crevasses in a levee system may be a "fair demonstration" of its practicability, but, like the commission's comment on the rise of the flood levels, that "it will cease when the levees have been built high enough to contain the greatest floods" (from report, 1912, p. 3716), it seems only to be an expression of inane and childish dogmatism rather to be expected from a boy of 5 attempting to dam a gutter than from men of eminence in the engineering world.

In 1898 the Senate Committee on Commerce, after an investigation consuming months, reported, upon the testimony of Col. Robert S. Taylor, who recently resigned from the Mississippi River Commission, and upon the testimony of Col. G. L. Gillespie, who was then its president, that—

"It is estimated that it would cost to complete the entire levee system, from the head of the St. Francis Basin to the Head of the Passes, at a grade sufficiently high and strong to afford complete protection against floods at the highest possible stage, the sum of $18,000,000 to $20,000,000, and it would take from four to five years to complete the system." (Rept. S. Com. on Com., 1898, p. ix.; testimony Col. R. S. Taylor, p. 245; testimony Col. G. L. Gillespie, p. 390.)

ENGINEERS' ESTIMATES GROW.

Col. Townsend, in December, 1912, stated before the Committee on Rivers and Harbors that it would cost $58,000,000 "to build existing levees to the height that we estimated the flood of 1912 would have attained," and that the estimate for revetment work, in addition to the building of levees, was "about $90,000,000." (Rept. Com. on R. & H., p. 23.)

Capt. Charles H. West, member of the Mississippi River Commission, before the same committee, said:

"You need not expect to get out short of something like $70,000,000 or $75,000,000 ultimately for levee construction. There is another item that was not included in this estimate, and that was the item of loss."

The average loss for the past 25 years has been something over $1,500,000 per year. (Testimony Mr. West, pp. 26, 30.)

"The estimate for the complete revetment control of the banks from Cairo down was about $158,000,000—slightly under that." (Testimony Mr. West, p. 30.)

Mr. West testified that the total cost of the revetment and the levee work would be $228,000,000, and "that nearly all estimates that are first put up to Congress as well as estimates for great private corporations, are away under the ultimate cost, and I think that that estimate for a control of the lower Mississippi River is a very modest one, and somebody, either you or the States, will spend that or more before the job is completed." (Testimony Mr. West, pp. 30, 31.)

Mr. Davidson, a member of the Rivers and Harbors Committee, correctly stated that facts pertaining to any appropriation approximating $60,000,000 when he asked Mr. West the following question:

"So that when the Government has started with a proposition of $48,000,000 they have only made a scratch on the surface of the levee system, have they not?"

Mr. West replied:

"Well, I think those figures ($228,000,000) are about as well as I can give them." (Rept. R. & H. Com., 1912, p. 32.)

Before the flood of 1912 the commission practically considered the work of the Government in the erection of levees to be complete. In its report for 1911, page 3186, the commission said:

"It has been the effort of the commission throughout its history to require from the riparian owners the largest possible amount of self-help as a condition of receiving allotments for the construction and maintenance of levees from the appropriations made by Congress, with a view to the ultimate assumption of the whole burden by them. The time is near by for the realization of that expectation provided the United States will protect the existing levees from undermining by caving."

Such equanimical asseveration of the perfection of their system is hardly tenable now, after the floods of 1912 and 1913, and the commission, cognizant of the absolute failure of its original plan, is still casting about for further funds to be dumped into the Mississippi River.

Senator RANSDELL, in an article published in the Commercial Appeal, of Memphis, May 25, 1913, in support of the Ransdell-Humphreys bill, said:

"All agree with practical unanimity that if the levees are made sufficiently strong and the banks prevented from caving by means of revetment, so that when once constructed the levees will be permanent, the floods of the river can be controlled. The commission estimates that to give sufficient strength to the levees will cost about $57,000,000, which could be prudently and wisely expended within a period of five years."

A FLOOD COMMITTEE ARGUMENT.

The Senator's statement is axiomatic, that "if the levees hold, they will hold," which is about all that his first statement, above quoted, amounts to; but it is to be regretted that Mr. RANSDELL'S authority as to the cost and the required strength can not be relied upon. His estimate is made by the same Mississippi River Commission whose estimate in 1898 was that it would take from $18,000,000 to $20,000,000 and that it would require from 4 to 5 years to complete the system. Meanwhile 15 years have passed and more than forty millions have been spent, and we are further than ever from the goal of complete protection. Mr. RANSDELL was very careful to state that the commission's estimate was "to give sufficient strength to the levees." That was the estimate for the levees alone, without the revetment. But the Ransdell-Humphreys bill supporters propose that amount as sufficient for both purposes.

The secretary of the Mississippi River Levee Association knows that sixty millions will not complete the levee system and make it safe from disaster. The president of that association knows that sixty millions will not be sufficient. Yet the president of that association, in an article published in the Commercial Appeal on May 8, 1913, declared that to be the amount required "to put the levees in an impregnable position and forever prevent overflows." Both officials know of the testimony given in the Rivers and Harbors Committee hearing

in December, 1912, by a member of the Mississippi River Commission, to the effect that—

"If you by some process of magic had to-day on the banks of the Mississippi River a levee system that was up to the ultimate height that we [the commission] estimate it should be, you could not maintain that system against disaster until you have prevented the caving of those banks." (Testimony of Mr. West, p. 27.)

All of the "levees only" advocates know of the estimates by members of the commission that it will take from $90,000,000 to $150,000,000 to do the revetment work alone necessary to prevent the caving of those banks. All of these "levees only" advocates, however, very carefully refrain from calling the attention of the public to the fact that the revetment work is to be by far more costly than the levees. Their motives in concealing the true status of the problem from the people of the valley and from Congress while asking for an appropriation of sixty millions is hard to comprehend when one views them, as they would be considered, in the light of public benefactors, working for no ulterior ends, but looking solely to the benefits to be derived from protection.

PRIMARILY A LAND-RECLAMATION PROJECT.

The Mississippi River Commission has said in its report for 1912 that "their immediate and main value—speaking of the levees—is the protection of the alluvial lands for the benefit of their owners." Such protection constitutes reclamation in its true sense.

Now, in two or three cases the Supreme Court—one in Louisiana and another in Tennessee—says of levee building in general along the river.

In a Tennessee case—Reelfoot Levee District against Dawson—the Supreme Court said:

The paramount idea is a fund to reclaim land from inundation, a large body, some 300,000 acres.

By the way, nearly 300,000 acres were lost in Tennessee through levees. I will say to the gentleman from Tennessee [Mr. MCKELLAR], largely because of the character of levees that have been constructed by Government engineers, as I understand. And that overflowed land, caused by these levees breaking, is valued at something over $4,000,000——

Mr. MCKELLAR. Will the gentleman yield for a question?

Mr. FREAR. I yield to the gentleman.

Mr. MCKELLAR. To what case does the gentleman refer?

Mr. FREAR. The Reelfoot Lake case.

Mr. MCKELLAR. The Government did not have anything to do with that.

Mr. FREAR. I understand that. I am speaking about the purpose of the levees generally. It was to reclaim from inundation a large body of land in the Mississippi Valley, and thereby enhance its value.

Mr. MCKELLAR. That has nothing to do with the question we have here. That is not a Government levee and not on the Mississippi River.

Mr. FREAR. Possibly, then, it is conceded this next case has something to do with it. I hold in my hand a statement of the St. Francis levee district in Arkansas. There they are reclaiming a large body of land. I have not the exact number of acres, but the land has increased in value from $8 an acre, so that the estimated value to the company that is floating the bonds is $88,000,000, and they ask the people to contribute to the bonds.

So far as my investigation goes, there can be no question but what this is a reclamation project, as well as a flood-protection project. The statement says the Government is contributing one-third of the expense. I believe I have here a bill introduced in Congress by the gentleman from Tennessee [Mr. MCKELLAR], a very excellent bill, by the way, so far as I have made an examination of its provisions. That bill proposes to do away with the Mississippi River Commission. I have not the bill before me, but I believe it was proposed to put the river improvement into the hands of some kinds of a board.

Mr. MCKELLAR. Will the gentleman permit me?

Mr. FREAR. Certainly; I yield to the gentleman.

Mr. MCKELLAR. I will say that the reason was because the Government did not furnish the Mississippi River with the necessary funds to build the levee. At the time I introduced that bill the commission was jogging along, not doing much of anything. Since then it has gotten busy, and I believe, if we give them the necessary funds, they will soon give us a completed and satisfactory system of levees.

Mr. FREAR. That may have been one of the reasons.

Mr. MCKELLAR. And it was hoped to have just such a scheme as we have now.

Mr. FREAR. I had supposed it was occasioned by the enormous damage caused to the city of Memphis through Government levees erected by Army engineers. The gentleman believes that all we have to do to be saved is to build levees, but the experience of Memphis, Vicksburg, and many other places along the river has brought many claims against the Government through breaking of Government levees.

The Government is now asked to contribute three dollars out of every four to be spent on levees, notwithstanding the waste and desolation caused by levees that have repeatedly broken, and these levees are for private reclamation purposes.

Mr. MCKELLAR. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes; I yield.

Mr. MCKELLAR. I know the gentleman does not want to get his facts wrong.

Mr. FREAR. Oh, no. Certainly not.

Mr. MCKELLAR. The gentleman does not take into consideration the $90,000,000 that the owners of this land have already contributed to the building of these levees.

Mr. FREAR. But we have had no public statement, though it has been asked for frequently, how that money was expended and by whom or where it was expended. It was expended wastefully, if we are to believe the facts stated in the report, because the same levees were repeatedly washed away. If you go into business in the State of Tennessee and become a bankrupt, or if you make unwise investments, that is your own fault—you can not capitalize foolish investments—but here are reclamation projects all along the lower part of the river, and they have not accomplished much, because, as the gentleman from Mississippi [Mr. HUMPHREYS] well said, they have been washed out. They were put in poorly, or they would have lasted, if the levee policy is correct.

Mr. MCKELLAR. I think the gentleman misunderstands what the gentleman from Mississippi said. He did not say it had all been wasted, but only a portion of the levees had been washed out.

Mr. FREAR. A large portion, as he said; and, as he is present, I call on him to deny my statement if incorrect, because he stated a large part of the washed out levees were in his own district.

Mr. MCKELLAR. But his own [Mr. HUMPHREYS's] district amounts to a very small part of it.

Mr. FREAR. Levees have been washed out along the river, and where they have remained intact they have done enormous damage, as at Memphis, Vicksburg, and other points, in times of flood. Levees serve to narrow the river during floods, and necessarily the water rises higher and higher as the river is narrowed.

THAT NINETY MILLION.

But, for another reason, that $90,000,000, if ever expended, can not be considered. Nothing shows how, when, or where the money was ever expended. If it protected private lands that were reclaimed, the parties putting up money had value received. If the levees were poorly constructed, surely the Government can not be called upon to insure poor construction or damages caused by levees that hold as at Memphis or Vicksburg.

For another reason that mysterious $90,000,000 has no place in the calculations whether put up by corporations, syndicates, or private parties or if ever put up by anyone. This committee report says 16,000,000 acres of land is to be reclaimed—the finest land in the world. It has never been reclaimed before—it is 1,500 feet deep—as good at the bottom as at the top, according to members of the committee. All this being so, what relation has $90,000,000 spent on other land to 16,000,000 acres, said to be worth $1,600,000,000, that is about to be reclaimed? I confess it will be hard, as Mr. Davidson said back in 1912 at the hearing of the Rivers and Harbors Committee, which I have quoted—it will be hard to explain such expenditures to the taxpayers of the country.

SOME FACTS NOT GIVEN BY THE COMMITTEE REPORT.

Mr. Chairman, in the discussion last Wednesday the gentleman from Pennsylvania [Mr. MOORE] pinned the chairman of the Flood Committee down to what had become of $87,077,191 spent on the lower Mississippi and what was done with all over $29,000,000, which, the committee report says, is the only money spent by the Government for levees.

Here is the milk in the coconut when the chairman responds, "Of that amount, the sum of $29,000,000 has been spent for levees; $43,000,000 has been spent for revetments, which the engineer says are absolutely in the interests of navigation."

Not a single word about that $43,000,000 appears in the report. It is a large amount of money. The chairman of the committee hastens to say when prodded on the subject that "$43,000,000 has been spent for revetments which the engineer says." What engineer? Why did not the committee furnish us with the facts?

Listen to page 2 of the committee report, which says:

The CHAIRMAN. Just one other question. I would like to get your opinion on this matter. This committee's jurisdiction, as you know, is limited to matters relating to flood control. The Mississippi River

Commission has jurisdiction south of the Ohio River, from there to the Head of the Passes, both for all matters relating to the river, touching flood and navigation interests. If we should report the bill here for the control of the floods of the lower river, is it your opinion that we ought to include in the work which is to be carried on by the commission the interests of navigation as well, or do you think that ought to be separated?

Col. TOWNSEND. That is, I think, a question of congressional policy rather than a question of engineering.

The CHAIRMAN. It is; that is true. Here is what was in my mind, Colonel: In doing this work the Government wants to do both things. We do not want to undertake the control of floods anywhere in any manner that would injure the interests of navigation or commerce. That being true, would it not necessarily follow that the same agency that does the work for one purpose ought to be charged with doing the work for all other purposes?

Col. TOWNSEND. I think it would be very desirable that it should be done by the same agency. I do not say it would be absolutely necessary, but I should say you would relieve a good deal of friction if you provided that the same agency should do it in both cases.

* * * * * * *

The CHAIRMAN. We wanted your opinion as an engineer, of course, primarily in a general way, and then we will probably go into details—if we are to control the floods on the Mississippi River, how shall we proceed?

Maj. MARKHAM. I have more radical opinions about that than I have heard expressed in the last day or two. Assuming it is not objectionable to be radical, I would say that there is no other method that can be devised, within the intelligence of those who have been working on the Mississippi River and thinking about its difficulties, except to build levee structures sufficiently high and to protect them by revetment. That is the sole and only means, in my judgment, of controlling the floods of the lower river, and I state that thus radically, without equivocation, because I believe in it very sincerely.

I think the matter has perhaps gotten into a state of confusion for a number of years, due to the fact that both the advocates and the opponents of other methods have merely stated generalities and have never gotten into details, so far as I can see; but I have convinced myself very earnestly that there is no other method of controlling the floods except by levees and revetments.

* * * * * * *

It is impossible to extend flood control on the Mississippi without revetment.

Then, why did not the committee advise the House that $43,000,000 had been spent already for revetment, with $228,000,000 more needed for levees and revetment? "Incidental for navigation," but the commission has declared the real purpose is to protect the alluvial lands, Report 1912, page 3724.

Maj. Markham says it is absolutely necessary to build revetment with the levees to protect the land. So, accepting the chairman's own statement, in addition to $29,000,000 spent for levees, $43,000,000 has also been spent for flood control and reclamation, or, according to his own figures, $72,000,000 has been spent by the Government for flood control and reclamation, while possibly $15,000,000 has gone for navigation.

The committee statement is vague and valueless when this important proposition is under consideration, but why does not the committee frankly admit, first of all, that $72,000,000 has been spent for flood control and land reclamation?

Let me at this time quote from J. H. Bernhard, who is an expert cited by the committee as to another proposition:

To-day the Mississippi from St. Louis to its mouth affords a channel which is the best to be found in any stream in the world, * * * and see its emptiness. An 8-foot channel is all that the most efficient service requires. The Government works unremittingly to develop waterways only to see the water-borne traffic grow less as the years go by. (J. H. Bernhard, Asso. M. Am. Soc. C. E., Proceedings A. S. of C. E. August, 1915.)

That is the opinion of a man who believes the channel is sufficient and the finest in the world.

LACK OF FRANKNESS BY COMMITTEE.

If, then, the Mississippi now has the best channel of any river in the world, and abundant evidence can be found to support Bernhard's statement, then, why do we need to spend $228,000,000 more for levees and revetment unless purely for flood control and land reclamation?

It is as plain as day that the statement of the committee that only $29,000,000 has been spent for flood control is not correct and is a positive misstatement of fact, and it is a further misstatement that $40,000,000 has been estimated by the commission to be sufficient to insure against floods. Markham says, on the preceding page of the report, that revetment is necessary to insure flood control. West says $158,000,000 is needed to revet the banks, and he testified about three years ago. West also said $70,000,000 would be needed for levees, or $228,000,000 in all; and yet the Flood Committee says $40,000,000 will do the job, and property owners only ought to contribute $10,000,000.

Why? Why should the Government spend $200,000,000 while the owners of 20,000,000 acres are only contributing $10,000,000? Let us see. Turning to the report, page 4, it says:

Since 1882 the States and levee boards of the lower river have contributed toward the construction of levees approximately $90,000,000.

MORE LACK OF FRANKNESS.

Is that true? If so, where is the statement of contributions? How much did the different States pay? What was the amount paid by Louisiana, Mississippi, and other States, and how was it paid and to whom? How much was paid by the State and how much by private parties?

Congress is entitled to know all these things before authorizing an expenditure of $30,000,000 or $200,000,000, if we adopt this reclamation scheme. But let us understand this proposition; and I hope to see every member of the committee arise and from out of the fullness of his own knowledge and personal investigation give facts regarding these contributions so plausibly set forth in the report, to which all have agreed.

The committee says 16,000,000 acres have never been reclaimed. Then why should $90,000,000, assuming that amount is anywhere near correct, be permitted by the committee to offset the reclamation of 16,000,000 acres that have never been reclaimed and that are valued at from one and one-half to two billion dollars? Have I made a point clear which, as Congressman Davidson said, is liable to trouble the average taxpayer? What relation has that $90,000,000 of money contributed by the States, and largely wasted, to 16,000,000 acres about to be reclaimed?

MISSISSIPPI LEVEES DO NOT HELP NAVIGATION.

I will not attempt to set forth any extended argument under the above head, but I believe it will easily be demonstrated that levees built by the Mississippi River Commission distant from the banks do not help the channel or navigation, and for a self-evident reason. Levees built on the banks of the river would naturally confine the waters in a narrow scope so as to make the levees serve as a barrier against waters leaving the regular channel, if they could be maintained. Of course this is impracticable unless the levees were built a hundred feet high in places and reinforced beyond all possibility of present construction methods. It is, however, the only case where levees are of value, according to men who appear to know as much about the subject as Army engineers. When built away from the banks for a distance of several miles they serve to prevent the river from flooding the adjacent country, if they hold, but are of no service in promoting navigation because of distance from the channel. In other words, levees built for reclamation purposes, built for flood control, are, as the commission well says, used to protect the alluvial lands, and not for navigation.

The Mississippi River Commission is sufficient authority, and Mr. Moses in his excellent paper covers that part of the levee subject fully. I can cite many authorities, but it does not seem necessary to go into details further than to quote from two men, one of whom is an Army engineer:

Extract from "The Port of New Orleans," by Capt. C. O. Sherrill, Corps of Engineers, published in "Professional Memoirs," Corps of Engineers, United States Army and Engineer Department at large, Volume VI, No. 25, January–February, 1914, pages 13, 15, 34, 35, and 36.

Another notable feature of the South Pass improvement since the lateral openings were closed and the jetties built is that there has been a constant tendency for the channel depths throughout the pass to become much more uniform. Near the head of the pass and over the bar the scour has been extensive, while throughout the pass itself there is extensive shoaling in the parts formerly deepest, giving an average depth of about 30 to 40 feet. This is an important fact, leading to the belief that levees improve the average condition of a channel, filling in excessive depths and scouring abnormal shoals. This, of course, would only hold true where the levees follow closely the low-water channel of the river, as is the case below New Orleans, and where the stream bottom is of soft material. At localities where there is no relation between the required channel capacity and the sectional area of high-water flow between levee lines, as is found above Bayou Sara, La., on the Mississippi, there does not appear to be the slightest effect produced on the channel by levees, for they have no influence in holding the current over the low-water thalweg.

An injurious effect of the extension of levee lines on the channel is that by restricting the flow to a small sectional area, higher flood heights are caused and more extensive caving of the banks occur. This has been observed recently at the Head of the Passes, where extensive caving is occurring with danger of permanent injury to the improvement works. Since the three high floods of 1912 and 1913, the bank caving is probably greater than ever before observed. Where local conditions as near New Orleans admit of it waste weir outlets would reduce flood heights and be of resultant great advantage without damaging the channel, due to deposits of silt, as is claimed to be the result of natural outlets, since the waste weirs would automatically cease to operate at the desired elevation chosen for the weir crest slightly above bank full stage.

I quote, however, from a man who has given many years of study to this very subject, Mr. George Maxwell, whose views are in harmony with the foregoing:

LEVEES ARE FOR RECLAMATION.

The levee system as it now exists in the Mississippi Valley is designed primarily for the protection of private lands and railroads from overflow and is not even incidentally beneficial to navigation. On the contrary, it is detrimental to navigation.

The fiction that levees benefit navigation was made the basis for applications for large appropriations for years on the Mississippi River and still prevails in theory, but experience has demonstrated that the

original claim that the levees would scour the channel does not hold good when the levees are built 3 or 4 miles apart, as is the present system in the Mississippi Valley. This is done to prevent the levees from caving into the river. The levees so built do not have any effect to deepen the channel. That result follows only when the levees are built on or near the bank of the river. The statement of Capt. C. O. Sherrill on this point is conclusive.

He says, "This, of course, would only hold true where the levees follow closely the low-water channel of the river." See article entitled "the port of New Orleans," in Professional Memoirs Corps of Engineers, United States Army, January–February, 1914.

Where the levees are built not on the banks of the river, but several miles apart, they hold the water over the banks for weeks at a time, saturating the soil and increasing the caving when the high water recedes.

This caving of the banks is the insuperable obstacle to the restoration of the navigability of the river. The bars are formed by the caving banks. The only way to stop the caving, under present conditions and in view of the fact that the levees actually exist so far from the river, is to revet the banks. The total cavings between Cairo and Donaldsonville every year average 9½ acres, 66 feet deep, for every mile of the river, according to engineers' reports.

THE RESPONSIBILITY OF THE SIXTY-FOURTH CONGRESS.

Mr. Chairman, as I view this bill it is one of tremendous importance to the people of this country, who are to be called upon to pay the fiddler, and I can not doubt that a revolt will occur soon among taxpayers—a protest that has no uncertain sound. Increased taxes for favored private land interests along the lower Mississippi Valley will be a legitimate political issue of large proportions where it involves $200,000,000 and more.

That is not the great question, however, involved wherein our own responsibility must be measured. By the passage of this bill we are saving to hundreds of thousands of people living in the lower valley, "Congress is about to take away a life preserver that nature has provided for the valley during countless centuries of the past." No sane man can ignore the tremendous power of the greatest river in the world, and yet we are about to take a step that will increase its destructiveness manyfold.

Without seeking in any way to restrain this enormous volume of water at its headwaters or along its course, this bill proposes to take away 16,000,000 acres of land that to-day affords escape for the lower valley. That mighty reservoir is to be drained, and a mass of flood water which for ages has been escaping through all these natural reservoirs over the 16,000,000 acres is now to be confined within narrow limits between artificial levees. In order to make enormous profits for landowners along the river the Government is about to take away the greatest natural reservoirs in the world and provide no substitute whatever. This proposition does not require a course of scientific training or the genius of a Goethals to comprehend. It is a matter of common sense and one which has aroused the people of the valley to an understanding of this land reclamation scheme conducted under the guise of "flood control." As the people in the valley well say, we are taking away nature's protection, and in doing so we are creating a menace that grows in volume as we endeavor to reclaim these great reservoirs. This is not my opinion alone, for I am only voicing the conclusions of men from along the valley who have stated in person and by letter just what will occur after Army engineers have completed this $200,000,000 experiment—if ever completed. In other words, in order to benefit comparatively a few powerful syndicates, corporations, and men interested in the land reclamation scheme this Government lends itself to their proposal by law, and then, most absurd of all legislative travesties, we are to reclaim these lands for private interests practically at Government expense, and while so doing increase flood danger to the people of the valley living back of the new levees.

DRAINAGE OF NORTHERN STATES NOT THE CAUSE.

Why talk about the responsibility of Northern States for conditions. Some increased flow in the Mississippi results from drainage of lands along the river, but the chairman of the Flood Committee has said to us that floods in the lower valley are not caused by an increased flow on the upper river, but by floods from the Ohio and Missouri coming at the same time.

LEVEES OR CULTIVATION INCREASE FLOODS—WHICH?

Let me refer to another statement made in the wonderful morocco-covered book by Mr. Fox. On page 19 he says the following:

Flood of 1735: Gayarre states that in this year the waters were so high that many levees were broken and much damage done.

Flood of 1770: A great flood.

Flood of 1782: This year the Mississippi rose to a greater height than was remembered by the oldest inhabitant.

Flood of 1785: A great flood at St. Louis in April said to have been equal to that of 1784.

Flood of 1809: A disastrous flood. It was imagined by the flood sufferers that the northern lakes had found a channel to the river.

Flood of 1815: A very great flood. At the mouth of the Ohio it attained the highest point ever recorded, 2 feet above the high water of 1858.

Mr. Fox rather overdid the subject in his beautifully covered book, because these great floods at an early day, the last at the close of the War of 1812, were long before the North had deforested the country and cultivated the land. It was nature's flood, and the disastrous results of 1735 apparently resulted from breaking away of levees that were used to confine or build against the river. Let us take a further illustration from the same page of the same valuable reclamation document. Here are some gauge readings at Cairo, Ill., for the following years:

| | Feet. |
|---|---|
| 1858 | 49.5 |
| 1859 | 46.5 |
| 1862 | 50.7 |
| 1867 | 50.9 |
| 1874 | 47.4 |
| 1876 | 46.4 |
| 1881 | 45.8 |
| 1882 | 51.8 |
| 1883 | 52.3 |
| 1884 | 51.8 |
| 1886 | 51.0 |
| 1893 | 49.3 |
| 1897 | 51.7 |
| 1898 | 49.8 |
| 1903 | 50.6 |
| 1907 | 50.3 |
| 1912 | 53.0 |
| 1913 | 54.7 |

Again, a test of common sense is of far more value than abstract theories. From 1858 to 1893, for a period of 35 years, the upper Mississippi Valley and the upper-river country had made gigantic strides, and practically all in cultivating land and draining into rivers, and yet during that 35 years the floods from 1858 to 1876 averaged 48.9 feet and from 1881 to 1893, 50.3, or a gain of 1 foot 4 inches in the last 6-year period, during which practically all the farm land tributary to these valleys, excepting in the far West, had been cultivated. The actual flood in 1893 was less than the flood of 1858. It must be remembered that levee building during this period had also begun to have some effect on floods. Abundant testimony of levee effects in raising flood levels can be cited and for obvious reasons.

From 1897 to 1913 levee building was rapidly increasing, although land cultivation in the upper valley had not varied as in the prior period, and yet in that latter period the increase was again 1 foot 4 inches, indicating that levee building and not cultivation or drainage was in large part, if not entirely, responsible for increased flood level. In other words, the beautifully spun theories of the land reclamationists do not stand analysis according to their own elaborate arguments.

Cultivation of land in the north, including drainage and all other agencies that have been constantly presented, have not been the cause of floods and have had little, if any, effect on the lower river. Levee building, on the contrary, has rapidly dammed up the river and where unable to break through the banks, the waters have been held back by a narrowing of the river. This is a simple truth evidenced beyond controversy by the tables submitted. It is in line with the statements of engineers on the effect of levee building, and to sum it up briefly, it is common sense.

It is further to be borne in mind that as the flood height increases the disastrous effect of sand boils and other breaks in the levees also increases in far greater proportion because of the increased pressure and rapid torrent caused by a narrowing of the river through levee construction. Again, this is no high-spun theory but the experience of practical men living on the river, whose opinions are as valuable on this point as the scientific theories of Army engineers, who so frequently disagree among themselves.

Probably any increase through land cultivation is insignificant compared with the natural flow of the river during all the ages, for no floods exist of importance excepting when the Ohio and Missouri are both at flood time. All the $60,000,000 to be spent on Ohio River locks and dams is of no value in staying the flood. Nature will not be governed by the puny works of Army engineers. The flood comes, and all the king's horses and men can not affect it in the slightest degree under this bill, because no effort is put forth to restrain these waters.

They enter the Mississippi at the Missouri and Ohio and flow down the valley as they have always flowed, but now the genius of Army engineers and the cupidity of man have determined that 16,000,000 acres of land which heretofore soaked up and stored the flood waters is to be taken from the river. Its waters for 70 miles wide and 70 feet deep in the channel are now to be confined by levees to a sluiceway 3 miles and less in width, on the average, held by artificial banks that will be undermined, to be swept away just as they have been before under this same fruitless experiment.

Our responsibility goes far beyond the $200,000,000 burden we are about to load onto the taxpayers of the country with this Mississippi Valley scheme; it is now a responsibility to the people of the valley who have been deceived and deluded over

an artificial protection that will not protect, and we are called upon to give legal sanction to the deception. The Government ought to be held liable for future damages and loss of life if caused by our fault. There is no relief, there is no redress, and all the mistakes of Army engineers in levee building have been borne by the people along the river in past years as they will be hereafter.

It is a responsibility not lightly undertaken, and ought not to be determined in a day or a week just because vast private-land reclamation interests are hammering at the doors of Congress.

Let us ascertain from the best obtainable authority, a high-class commission, removed from present influences, just what advance has been made, and instead of plunging blindly in the dark let us show legislative wisdom that befits the responsibility we are called upon to bear and act upon our own judgment and not because of a flimsy report presented on this great problem by a committee of laymen after two months' consideration.

THE CALIFORNIA RECLAMATION PROJECT.

Mr. Chairman, the flood committee's report is unique and one that deserves more than passing mention. Twenty-one pages of the report are given over to a dissertation of the Mississippi River, written presumably by the able chairman of the committee [Mr. HUMPHREYS] who writes of a subject close to his heart and in which he and his constituents have been deeply interested for years.

I call attention to this fact because the report contains 167 pages and all of the balance of the report, covering 146 pages, is written, according to a statement on page 23, by Mr. CURRY, another member of the Flood Committee, and in that report the writer ably and exhaustively covers a subject in his home State of California in which he, too, is deeply interested.

It is rather an unusual proceeding for two members of a committee, and of great influence on that committee, to express the sentiments of the committee in the report on two projects, the only ones contained in the bill, reaching many millions of appropriations. Floods have been brought to public attention all over the country, disastrous floods that filled the streets of cities and created loss of life and property. Floods from North Dakota and Ohio to my own State and Texas. Floods that call for some positive investigation and aid so far as may be permissible under our legislative practices, and yet we find that the only floods that receive attention from the committee are those affecting the Mississippi River, which have challenged the study of engineers and experts for a century or more, only to be decided and disposed of by the committee and its chairman in two months. The other single project is that affecting a land-reclamation proposition in California that has been knocking at the doors of Congress for many years only to be jerked in out of the cold by a Flood Committee which found time during its two months of arduous service, when not studying the Mississippi River problem, to give a few thoughts to the California débris proposition.

Fortunately two very able men, both deeply interested in their respective projects, were serving on that committee and able to render service without the necessity of any exhaustive investigation in either case by committee members. No lives were lost or at stake in the California project, but land reclamationists in the Sacramento Valley were as eager to get their project through as were those from the Mississippi Valley. The Sacramento project would never get through as a separate bill and the Mississippi project might find hard sledding if standing alone, but combined the forces include many veteran defenders, who, incidentally, will support both measures in order to get the one through that lies nearest the heart.

With only two days' notice of the bill, the California project, set forth in the 146-page report, is submitted for our consideration. Not one Member in twenty will be able to read and digest it in the limited time given for its consideration. I do not propose to make any extended statement regarding this project, because time is brief and I can only give one or two suggestions that may be entitled to be considered when it is remembered that $5,200,000 is to be taken out of the Public Treasury for this land-reclamation scheme.

Formerly this project was urged as an adjunct of navigation, but after the Government board said, in House Document No. 81, Sixty-second Congress—

The board reports that the execution of this project is not necessary in the interests of navigation—

a gloom fell upon and over the reclamation project at Washington.

No claim, so far as I know, is urged that lives or property are in danger, but a large tract of land awaits reclamation and the Government is asked to aid the enterprise.

The project extends from Sacramento to many miles above that city and covers different reclamation districts. It also is part of a by-pass project that extends down near the mouth of the river, according to the map. No one will dispute that the Sacramento River has some considerable navigation near the mouth of the river, where different industries are located, and the Government has been reasonably generous with appropriations for that navigation.

No one will dispute that a small traffic extends to Sacramento, although nothing compared to that around the mouth of the river. I say this from personal observation. However, the lower Sacramento River is entitled to the same Government aid given other rivers with equal commercial importance and no one will seriously object.

But, the reclamation plan proposed, covers a project reaching far up the Sacramento and Feather Rivers where nothing larger than a canoe or a little gasoline launch ever goes, I am advised, and I submit that when it comes to either navigation or reclamation, the committee exceeded its powers in giving $5,200,000 to this project.

I shall not discuss its details as shown by documents referred to in the bill but will say it is a project that has been opposed by others in Congress in times past, and the whole subject deserves careful investigation before we accept the Flood Committee's report recommending over $5,200,000 appropriation.

INCURRING THE IRE OF A DÉBRIS OFFICIAL.

In the early part of the session I placed in the RECORD a few remarks on the subject of Government waste in connection with river and harbor bills. In so doing, incidentally, I referred to the Sacramento and Feather River land reclamation proposition and mildly suggested it did not enter into the province of Uncle Sam to help finance the project. Certainly the suggestion was not made with any intention of arousing the ire of Mr. McClatchy, who has something to do with the débris commission out in California, and is also reputed to run the Sacramento Bee, a publication of "wide circulation" and large influence—to quote a usual allegation encountered in musty legal documents relating to abusive press extracts.

Mr. McClatchy did not like my brief comment on his pile of débris, in fact he said some very harsh things, not as chairman of the débris commission, but as editor of the Bee. His remarks were printed in circular form, one copy coming from friends in my own district, who wrote that such knocks were boosts among my constituents.

Another circular was handed me by a friend in the California delegation with the remark that Mr. McClatchy is a "nice" man, but his hobby is in the direction of débris, and who "touches a hair" of the débris, dies, and so forth.

Long since I have avoided controversies with molders of public opinion, whether of the class represented by Representative MOORE's monthly message to a waiting inland-waterway public or to more pretentious publications. It is unsafe to criticise any waterway venture urged by the gentleman from Philadelphia, because, if so, the vials of wrath of the bulletin are thrown and dumped over the critic. That is a possible reason why the last monthly inland waterway molder of opinion does itself great justice in an issue just at hand. Such effusions also serve to boost canal-joke projects, because frequent reference to Shakespeare's jesters indicates its serious arguments are in a joking humor all its own.

I will not criticize Mr. McClatchy's work as chairman of the débris commission, because I do not care to have the Bee buzzing around in angry mood, and, further, because Mr. McClatchy is properly vouched for as a "nice" man. California has many good men, including its splendid body of Representatives, who are diligent, able, and popular, and well able to care for California's interests. California has many other popular men, including Willard, McClatchy, and Goldberg, and from fighting to humor the great State has its full share of celebrities.

I would not knowingly provoke one who possesses both qualities in a marked degree, but, I submit, a public servant like the chairman of the débris commission ought not to take as a personal affront a difference of opinion possessed by Representatives on this floor on how much of the débris this Government ought properly to take over and pay for out of the Federal Treasury.

That is one of the things we are sent here to determine, and while the private-land reclamation interests of the Sacramento Valley have a right to ask for public money with which to feather their Sacramento holdings, we are charged with a public duty to see that they do not break into the Treasury unless entitled to do so.

SOME INFORMATION NOT FOUND IN THE REPORT.

I have had what purported to be facts regarding this reclamation project presented to me by friends of the project, and by dis-

interested people, on the other hand, who denounced it in general terms, claiming that syndicates, including Armour interests and other large interests, are pushing a project which involves 400,000 acres, and further involves an increased value to these lands of something like $50,000,000, as I am further informed. This is a large stake and well worth fighting for, but the taxpayers of the country, who are footing unprecedented bills at the present time, are concerned in knowing just why they are putting up $5,200,000 in this bill for a land-reclamation scheme, and even at the risk of incurring the displeasure of the chairman of the débris commission out in California, I urge a full investigation by Congress before approving this large expenditure.

PROTESTANTS ARE NOT AGREED ON RECLAMATION PLANS.

I hold a printed protest signed by the board of supervisors of Sutter County and the district attorney of that county and others against legislative action by California tending to prejudice the rights and property of the people of that country by hasty and unwise reclamation work. These people are in the section covered by a part of this reclamation project.

Quoting from page 2:

A few months before the said report of the State reclamation board (in 1912) was transmitted to the governor of this State (California) certain capitalists, commonly referred to as the Armour-Greber interests, had obtained options on the bulk of the overflowed lands lying south of the Tisdale weir.

Then follows a discussion of the project which is of interest, on page 3, where it says:

Immediately upon the change being made by the State reclamation board the Armour-Greber interests introduced into the legislature a bill creating reclamation district 1500. * * * Sutter County and its resident taxpayers protested against the passage of this bill, and attempted to point out to the legislature the danger to the valuable high land lying to the north and east by the proposed by-pass.

The protest continues:

Said reclamation district 1500 began immediately after the passage of the bill creating it to build its system of levees, and was rapidly building the north levee of its system, * * * which, if completed, would have extended a distance of 4½ miles across at a right angle to said Sutter Tules over and across high land not "swamp and overflowed," but purchased from the United States Government and never before subjected to inundation from that source, whereby approximately 30,000 acres of valuable lands thickly populated and under high state of cultivation would be destroyed. * * *

Keep in mind that not one shovelful of dirt has ever been moved to build any levee to keep this water off. Miles of public highways would have been covered and rendered impossible.

The report then says suits were pending in December, 1914, in court, and further says:

Think of it! Letting men who have labored for years in building up and improving their holdings to dig up $2,000,000 to build a levee to keep water from their premises that reclamtaion district 1500 is diverting from its natural course and throwing onto their land never before flooded from that source.

That is what the Government is now engaged in doing along the lower Mississippi near Memphis and elsewhere.

Mr. Chairman, this protest is from property owners and men of standing in their community. I do not know the exact status of proceedings in California concerning their rights, but I do believe from past experience we are entitled to know all the facts and details from the parties who are protesting against acts of reclamation district No. 1500, which, according to the map attached to the committee report, includes a large part of Sutter County. I do not know the parties—either the Armour-Gerber interests or any of those who protest against the reclamation project proposed by district No. 1500. I am not interested in the controversy, but I believe enough has been shown to invite a full statement of present conditions, not only a statement from the Flood Committee, but from the protestants.

Mr. Chairman, I will not take further time, but submit that we ought not to pass this bill precipitately. Both proposals submitted by the Flood Committee are of deep concern to the people of the respective localities, and even if satisfied that no private rights are jeopardized Congress ought not to appropriate public money excepting to aid in the performance of a permanent public work that is in the interest of the general public.

I attach hereto a resolution I have again introduced at this session, and also a proposed bill I have introduced at this session, both of which have a bearing on the matter under discussion:

[House concurrent resolution 37. Sixty-fourth Congress, first session. In the House of Representatives.]

Mr. FREAR submitted the following concurrent resolution, which was referred to the Committee on Flood Control and ordered to be printed:

Whereas about $200,000,000 have been expended in attempts to control the Mississippi River below Cairo, principally by the use of levees and revetments, which as a means for that purpose are deemed by many to be impracticable and futile; and

Whereas by the present flood-control bill further great sums of money are proposed to be appropriated to continue this questionable attempt by the same means: Therefore be it

*Resolved by the House of Representatives (the Senate concurring)*, That no appropriation made by the present bill shall be available for use upon the Mississippi River below Cairo until the feasibility and advisability of plans which depend upon levees and revetments for control of the Mississippi River below Cairo have been approved or other plans substituted by an advisory board of consulting engineers in accordance with the provisions of H. R. 18169 of the Sixty-third Congress, second session.

*Resolved further*, That the members of such advisory board of consulting engineers, appointed by the President in conformity with the provisions of said bill, shall be confirmed by the Senate.

IN THE HOUSE OF REPRESENTATIVES,
*January 4, 1916.*

Mr. FREAR introduced the following bill; which was referred to the Committee on Rivers and Harbors and ordered to be printed.

A bill (H. R. 6821) creating a national waterway commission.

*Be it enacted, etc.*, That a commission is hereby created and established, to be known as the national waterway commission, hereafter referred to as the commission, which shall be composed of five commissioners, who shall be appointed by the President, by and with the advice and consent of the Senate. Not more than three of the commissioners shall be members of the same political party. The first commissioners appointed shall continue in office for terms of three, four, five, six, and seven years, respectively, from the date of the taking effect of this act, the term of each to be designated by the President, but their successors shall be appointed for terms of seven years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the commissioner whom he shall succeed. The commission shall choose a chairman from its own membership. No commissioner shall engage in any other business, vocation, or employment. Any commissioner may be removed by the President for inefficiency, neglect of duty, or malfeasance in office. A vacancy in the commission shall not impair the right of the remaining commissioners to exercise all the powers of the commission.

SEC. 2. That each commissioner shall receive an annual salary of $10,000, payable in the same manner as the judges of the courts of the United States. The commission shall appoint a secretary, who shall receive an annual salary of $5,000, payable in like manner. The commission shall have the authority to employ and fix the compensation of civil engineers, clerks, and other employees as it may from time to time find necessary for the proper performance of its duties and as may be from time to time appropriated by Congress, and in making appointments for continuous service the commission, so far as practicable, shall select its employees from the classified service.

All property of the United States in the hands or under the control of Army engineers or other officials or of private individuals or public contractors, including dredges, steamboats, barges, yards, and other property used in the improvement of public waterways, shall be placed under the jurisdiction and authority of the commission.

SEC. 3. That the Secretary of War may, if practicable, detail such Army engineers as are requested by the commission to assist in organizing and establishing a comprehensive system of waterway improvement, providing that such details of engineers shall not be made to the detriment of their military duties.

SEC. 4. That the commission shall have the authority and it shall be its duty to make an investigation of all waterway projects now constructed in whole or in part by Federal aid. The commission shall prepare a complete and succinct statement, by years, of the amount heretofore appropriated for each project, the estimated amount required to complete such project, a report of the commerce now served and to be served, the character of such commerce given by separate items so far as can be furnished, the source of information, the interests to be served, the kind of water craft used, and such other information as may be useful in determining the public use and value of the project. The commission shall also furnish Congress, at the earliest practicable date, information concerning all harbors and waterways now improved or being improved in whole or in part by Government aid, showing the amount of commerce, character of terminals or landings, ownership thereof, and, so far as practicable, ownership of regular lines of craft used thereon; and the commission shall also report its recommendations for the finishing of the projects now being constructed or modification of existing plans or abandonment of work on any project, together with findings upon which such recommendations are based.

The commission shall further ascertain and report what projects are now being improved for purposes other than navigation, and if for power developments, a full statement of interests concerned, officers and stockholders, public use to be served, if any, private or public contribution toward expense of construction, and the commission's recommendations thereon. Said commission shall further ascertain and report what projects are now being carried on in whole or in part for land-reclamation purposes, the character of such project, amount of lands to be recovered, estimated value of such lands, ownership thereof, and contributions now being made by beneficiaries toward such expenditures, together with the commission's recommendations.

The commission shall make a full investigation into all work now being performed by the Mississippi River Commission, the amount of money heretofore expended on such river, character and permanency of work performed, and reclamation interests now being served if there be any, a full statement of contributions by public or private interests toward said work, together with a comprehensive and intelligible report of the probable cost of the present plans of levee construction or other river improvement now being undertaken, the percentage of project completed, and this commission's recommendation thereon. Such Mississippi River report shall be separate and distinct from reports on other projects now under improvement by the Federal Government.

All of such data and all other available information of a pertinent character affecting particular projects or entire waterway improvements now being conducted by the Federal Government shall be collected in convenient form and presented to Congress in installments at the earliest practicable date.

When the commission shall have reason to believe at any time that the proposed project is not for general use of the public or will not warrant further expenditures, or if contributions shall be required to be furnished before further appropriations are made or further expenditures authorized, such commission shall immediately report to Congress, with a preliminary recommendation thereon, and shall furnish a copy thereof to the United States Treasurer. That thereupon, when so recommended, the Treasurer shall withhold all funds heretofore appropriated not specifically obligated under existing contracts and shall refuse further payments until subsequent and specific action shall be had thereon by Congress.

SEC. 5. That prior to the presentation of any new waterway project appropriations the commission shall cause a careful survey of the proposed improvement, and if it shall appear such project is to serve a public use and is feasible, the commission shall thereupon collate data showing the estimated cost thereof, commerce to be served, water craft to be used, public terminals furnished, and contributions recommended to be made by public or private interests, together with such additional data as has heretofore been specifically required to be furnished on existing projects. The commission shall thereupon transmit to the Committee on Appropriations of the House of Representatives a full report concerning such new project or projects, its recommendations thereon, and, if requested so to do, all other and further information that may be required by the Committee on Appropriations.

Whenever the commission shall determine that any waterway project is primarily for power or land-reclamation purposes or to serve special interests, the commission may recommend Government aid for such project, notwithstanding the special interests to be served, and shall prepare data showing the proportionate amount of Federal aid recommended, together with suitable restrictions as to audit and payment of funds from the Public Treasury. Such recommendation shall be presented as a proposed separate bill to the Committee on Appropriations of the House and shall not be embodied in any general waterway appropriation bill by such committee.

Whenever any new survey shall be proposed for any waterway project the commission, prior to such survey, may require data to be furnished showing the public use and prospective commerce to be served and such other information as may be desired, and a brief synopsis of such information shall be furnished to Congress by the commission to accompany any recommendations made for new surveys.

All existing waterways, new projects, and new surveys shall be classified, so far as practicable, prior to each regular session of Congress, together with estimates of appropriations required for maintenance and improvement for the ensuing two-year period, and a brief report as to each project considered shall be separately prepared and, with the commission's recommendation thereon, shall be placed in the hands of the Committee on Appropriations of the House at the beginning of each session.

Whenever the Appropriations Committee so requires, the commission shall furnish additional data concerning any project, and shall further aid the Committee on Appropriations when requested so to do in the preparation of the regular river and harbor bill which shall be prepared and presented by the Committee on Appropriations of the House.

The commission shall further compile and cause to be published at the earliest practicable date for the use of Congress an intelligible, concise statement of past waterway expenditures by the Government and of amounts needed to complete all continuing projects, and shall further give estimates of future obligations to be incurred by new projects recommended for construction. The commission shall give preference in its recommendations to Congress of appropriations needed to complete the more important projects, and, so far as practicable, shall enter upon a program looking toward the early completion of such projects.

The commission shall make a thorough investigation of reasons for loss of river traffic and shall make recommendations for the reestablishment of such traffic. It shall ascertain and determine the most available craft for river use, and, as soon as practicable, shall prepare plans and build experimental craft for such purpose.

Whenever reason therefor shall appear the commission may fix reasonable freight rates on all interstate water-borne traffic by common carrier and upon all such traffic on navigable waters wholly within the State, subject, however, to the jurisdiction now conferred by law on the Interstate Commerce Commission to fix maximum joint rates between and over rail and water lines.

The commission shall determine the reasonableness of wharfage or water terminal charges, whether such terminals are owned by private persons or municipalities, and all river and harbor improvements, including terminal facilities, shall be under the supervision and control of the commission.

Whenever the commission shall determine that unprofitable railway freight tariffs are maintained in any given case in order to prevent waterway competition, it shall be the duty of the commission to make a report thereon in duplicate to the Interstate Commerce Commission and to Congress, with recommendations that Congress give power, if need be, to the Interstate Commerce Commission for fixing minimum railway rates.

The commission shall at the earliest practicable date adopt an intelligent system of natural waterway improvement and shall perform such other and further duties as may present themselves from time to time.

Whenever it shall be desirable to secure sworn testimony from any witness or witnesses relating to any project or to navigation generally, or whenever the commission shall have reason to believe that private interests are secretly or improperly seeking to influence the commission or to force the passage of any private or public waterway measure through Congress, the commission may cause a hearing or summary investigation to be held, and for that purpose may issue summons, subpœnas, or other writs in the same manner and under the same procedure as is more specifically set forth in the act to regulate commerce approved February 4, 1887, and the amendments thereto, which portions of such act relating to procedure, so far as applicable, are made a part of this act, and may bring before such commission all parties believed to be informed concerning the facts or interested in the passage of such measure. A complete record shall be preserved of the testimony taken at such hearing and a certified transcript thereof shall be transmitted immediately to the Committee on Appropriations.

SEC. 6. That all unexpended balances to the credit of any project not specifically obligated under existing contracts shall from the date of the passage of this act be transferred by the Treasurer to the general fund, and all vouchers thereafter paid by the Treasurer shall be upon order of the National Waterway Commission.

SEC. 7. That the sum of $500,000, or so much thereof as may be necessary, be, and the same hereby is, appropriated, out of any money in the Treasury, to carry out the provisions of this act.

Mr. STAFFORD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. STAFFORD. I would like to have the attention of the chairman of the committee. This is rather a short bill. Will it be agreeable to the chairman of the committee to have the bill considered by paragraphs rather than by sections? I think it would be better order, and we could get along as rapidly.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I would not care to make any agreement on the subject. There is no desire to cut off debate.

Mr. STAFFORD. We are up to that proposition now. We understood the gentleman was going to be liberal in allowing debate. The way to be liberal is to have the bill considered by paragraphs.

Mr. HUMPHREYS of Mississippi. The gentleman does desire to be liberal, and has no desire to force any vote at all. We will give gentlemen what time they desire as far as we can. It is not our desire to crowd the matter, but there is no reason why we can not consider the bill under the rule just as well as any other way.

Mr. STAFFORD. Mr. Chairman, a parliamentary inquiry. In the consideration of this bill will the bill, under the five-minute rule, be considered by paragraphs or by sections?

The CHAIRMAN. It will be considered by sections. The rule is to that effect, except in the consideration of appropriation bills.

Mr. STAFFORD. Then I understand the chairman is not willing to grant that concession?

Mr. HUMPHREYS of Mississippi. I can not see the gentleman's point. What difference does it make to the gentleman?

Mr. STAFFORD. It improves the consideration of the bill. In the first section it is divided into four different subheads, (a), (b), (c), and (d).

Mr. HUMPHREYS of Mississippi. The river and harbor bill consists of one section which covers 30 pages, and every paragraph is subject to amendment. It will be considered by paragraphs under the rule, as I understand it.

Mr. STAFFORD. That is all I ask. Has the gentleman any objection to considering it in that way.

Mr. HUMPHREYS of Mississippi. Not a bit.

Mr. STAFFORD. Then, Mr. Chairman, with the assent of the chairman of the committee, I ask unanimous consent that the bill be considered under the five-minute rule by paragraphs.

The CHAIRMAN. Is there objection?

Mr. HEFLIN. Mr. Chairman, reserving the right to object, I desire to ask the chairman of the committee if he thinks we can get through with this bill to-day?

Mr. HUMPHREYS of Mississippi. I do not.

Mr. HEFLIN. Does the gentleman think that we can get through with it in another day?

Mr. HUMPHREYS of Mississippi. Undoubtedly. I think we can get through with it in two days.

Mr. HEFLIN. The gentleman has no objection to considering it paragraph by paragraph?

Mr. HUMPHREYS of Mississippi. None.

Mr. STAFFORD. There are only about 12 paragraphs altogether.

Mr. HUMPHREYS of Mississippi. I think we can get through in two days. I have had assurances from gentleman on the other side that they would not attempt to prevent a vote.

The Clerk read as follows:

*Be it enacted, etc.*, That for controlling the floods of the Mississippi River and continuing its improvement from the Head of the Passes to the mouth of the Ohio River the Secretary of War is hereby empowered, authorized, and directed to carry on continuously, by hired labor or otherwise, the plans of the Mississippi River Commission heretofore or hereafter adopted, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $45,000,000: *Provided*, That not more than $10,000,000 shall be expended therefor during any one fiscal year.

Mr. McKELLAR. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I want to say to the committee that my State is not itself at present at all events directly interested in this measure, inasmuch as none of the appropriations will likely be expended for levees in the State of Tennessee. However, I am heartily and earnestly in favor of this bill because I think it is the only feasible method, so far as we are now advised, of dealing with this great question of flood control in the Mississippi River. Other plans have been suggested, but none of them has made an impression on the public mind generally. Now, we have had to deal with it in Tennessee without any Government aid at all. The city of Memphis, from which I come, has but recently spent a million and a half dollars of its own money for the purpose of building a levee to keep the waters of the Mississippi River out of that city, and Congress declined to contribute a dollar to the work. Why did we have to spend this large sum? Simply because the levees have been built on the other side, which raised the water higher, and thereby brought it into Memphis, and because the flood waters above us are constantly increasing in volume. Now, we have done what we thought was right and——

Mr. FREAR. Will the gentleman yield for a question?

Mr. McKELLAR. For a question.

Mr. FREAR. Has the Government built those levees?

Mr. McKELLAR. Oh, no; the Government did not build them. The city of Memphis built them. There is where the gentleman from Wisconsin is making a mistake——

Mr. FREAR. I have not charged it, I am asking.

Mr. McKELLAR. I know. Now, the gentleman seems to think we are just beginning this levee-building project. Why, gentlemen, that is not the fact at all. This bill simply provides for the completion of a project begun in 1879. The Mississippi River Commission was authorized that year; they have been going along steadily, but by very small degrees at first, the levee districts in Mississippi, Arkansas, and Louisiana contributing most of the funds to build these levees. The levee districts under direction of the Mississippi River Commission have spent up to date $90,000,000. The Government has spent all told only $29,000,000 up to date, and now the time has come when these levees, to be made thoroughly effective, must be completed by building up the low places and lapses and by making stronger and higher portions that are now low and weak. They are for the most part completed already.

Why, the gentleman from Wisconsin [Mr. FREAR] says that lots of work which has been done has been thrown away. Only a very small portion of the work has been useless. The great majority of the money that has been expended by the levee districts has been expended to good purpose, and it is the groundwork of these levees that are to be built up and completed under the provisions of this bill. Some gentlemen say it is a big appropriation. Why, gentlemen, it is not a great deal larger than we have been appropriating for several years. We have been appropriating some five or six million dollars a year for a number of years for this project, but it has been done by piecemeal. The Mississippi River Commission does not know when it is going to be cut down or be cut off. It can make no definite plans. It can not contract, so as to get the work economically done. This bill merely provides for a completed project—gives the commission this money, so that they can go ahead and make their plans to complete the project within about five years. Now is not that a business thing to do? Why take a dozen bites at the cherry? Why dole out the appropriations, and thus make the work more expensive?

Why, some gentlemen say this is a local matter, and ought to be borne entirely by the landowners; and the gentleman from Wisconsin [Mr. FREAR], in his usual vigorous style, talks about its being absolutely for the benefit of these landowners. I do not look at it that way at all. This river, from the mouth of the Ohio down, is a great channel, which takes away the flood waters of a large number of the States. You see from the map there that probably one-third of the United States, nearly, is drained right through this lower Mississippi Valley.

Mr. EAGLE. Thirty-one States.

Mr. McKELLAR. Thirty-one States. All of those States are being drained to a greater extent every day, and therefore a larger volume of water will come down that river every year. The building of levees along the banks of tributaries, the clearing up of woodlands, the draining of low lands above, are to blame for that. Now, who shall say it is not right and proper, where 31 of our States are drained, in whole or in part, by this lower river, that the United States Government should not do its share to protect the people along its banks from flood waters?

Mr. REAVIS. Will the gentleman yield?

Mr. McKELLAR. I will.

Mr. REAVIS. Is there any part of the Mississippi River which has no levee construction at all?

Mr. McKELLAR. Yes, sir. I will say in the State of Tennessee there is practically none. There is in the northeast corner of Tennessee the levee that runs down from Kentucky about 6 or 8 miles, I think, into Tennessee territory, but I will tell the gentleman why there are no levees on the Tennessee side now. The foothills come nearer the river on the Tennessee side, and the amount of land subject to overflow, while large in the aggregate, is small comparatively, and the Mississippi River Commission up to this time has taken the position that levees are not practicable. In other words, the commission claims that if a levee district is created there it would cost the landowner such a tremendous amount of money to levee the lands along the Tennessee shore that it would not make a paying investment, and they have never recommended it. Later on we hope to find a way to make it a profitable matter for the Government and the landowners to build levees on the Tennessee side, too.

There is another matter that I here wish to call to the attention of the committee and of the House, and that is, those landowners who are now between the levees and not protected by the levees are entitled to consideration at the hands of the Government. Of course the flood waters on their lands are made higher by these levees. They are the richest kind of lands and, as a rule, after the flood waters go down splendid crops are made on them, but the lands consist largely of islands. It has been suggested in the hearings that mounds should be built at proper places on these islands so that men and stock and cattle could be carried to these mounds safely even during the highest floods. The cost of these mounds will be small. I would like very much to have a provision of this kind to go into this bill, but inasmuch as the main purpose is to build levees I shall not ask for that amendment now. The amount required for such a purpose would be comparatively small.

The CHAIRMAN. The time of the gentleman has expired.

Mr. REAVIS. Mr. Chairman, I ask unanimous consent that the gentleman may have two minutes more—may have five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman? [After a pause.] The Chair hears none.

Mr. REAVIS. Are floods of more frequent occurrence in recent years than they were formerly?

Mr. McKELLAR. Well, I can not say they are more frequent, but they have gone higher. The effect of clearing up the wooded districts above, the effect of draining great areas above, the clearing of land above has made the volume of water that goes down the river larger, and then, too, the building of levees on either side naturally confines the water to some extent and makes the river higher all along down.

Mr. REAVIS. Has the river had a tendency in recent years to fill up?

Mr. McKELLAR. I think not. I listened with a great deal of interest to the statement made by the chairman of the committee [Mr. HUMPHREYS of Mississippi] this morning concerning the report of the engineers about various rivers in the world, and I agree that heretofore it has been thought, under a misunderstanding, and under a pretty general misunderstanding, too, that the beds of those rivers referred to by Mr. HUMPHREYS rose when levees were erected on either side. He mentioned the River Po, in Italy, the Yellow River, in China, and other rivers. There is nothing along the Mississippi River—and I have lived along it for many years—that suggests that the levees have elevated the bed. I think the levees have a tendency to confine the channel and wash out the river rather than to raise the bed of the river.

Mr. REAVIS. As the watershed has been turned from grazing land to cultivated land, has there been a tendency for silt to flow into these rivers so much? I know the Missouri River has a tendency to fill, as well as similar rivers running into the Missouri, in recent years. Has the gentleman known of anything of that kind with reference to the Mississippi?

Mr. McKELLAR. I can not say that I have. I want to say that when it reaches Memphis we have such a big river there, with such a powerful and tremendous current, that while silt may accumulate in certain places, it washes out in others. I have known a place of 1,500 acres made in one section of the river in a short space of time, and other places of equal size washed out in a period of five years. That happened right near the city of Memphis, where I live.

Mr. REAVIS. Is there a very rapid current in the territory with which the gentleman is familiar?

Mr. McKELLAR. A very rapid current. The river is from 40 to 60 feet deep right in front of Memphis.

Now, Mr. Chairman and gentlemen, I hope that you will pass this bill and permit this great project to be completed. It is a matter of justice; it is a matter of right. It is for the benefit of all the people of our country, I believe, in that it is fair to all. We have the channel there to act as a drain for other States. These flood waters come from 31 other States. It is not fair and it is not right that the States through which this great lower river runs should be made to bear all the expense of draining perhaps one-third of the Nation. Your Republican Party declared for it in its last platform, the Progressive Party declared for it, and the Democratic Party declared for just such a measure as this. The people of the United States, I believe, feel very kindly toward it. I believe that they think it is fair that the people along the banks of this river should not be subjected every year to the fear of overflow from the flood waters of so many other States. The waters have gone higher than was expected. These engineers have been working on it for almost a lifetime. They believe that completion is now within their grasp. They believe they have the facts and figures, and have shown them to you in the hearings here, that with this sum of money and with the sums of money that have already been given and will be given by the landowners through the levee districts, the project can be completed. All the political parties are com-

mitted to it. All the great political leaders are in favor of it. The business interests favor it. Let us put it out of the realm of doubt and let us finish the project once for all time. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, the rivers and harbors bill that passed the House last month carried an item of $6,000,000 for the Mississippi River from the Head of the Passes to the mouth of the Ohio River. Bear in mind that we have already appropriated so far as the House is concerned $6,000,000 for the Mississippi River for that section which is specifically referred to in this flood-prevention bill. In addition to that $6,000,000 we appropriated for the Southwest Pass of the Mississippi River $600,000; for the Mississippi, from St. Paul to Minneapolis, $176,000; for the Mississippi, from the mouth of the Missouri to Minneapolis, $1,200,000; for the Mississippi, from the mouth of the Ohio to and including the mouth of the Missouri, $350,000. There are several other Mississippi River items in the rivers and harbors bill. The total, for the purpose of continuing the work upon the Mississippi River, is considerably more than $8,000,000. Now, that is one year's contribution by the Congress of the United States to the purposes of the Mississippi River.

I have here a report, House Document No. 1491, being a résumé of preliminary examinations, surveys, projects, and appropriations for the improvement of rivers and harbors, embodying a letter from the Secretary of War, which sets out in an analysis of appropriations for the various rivers that for the Mississippi River from the Head of the Passes to the Ohio River there has been appropriated up to March 4, 1915, $87,077,000. I am not giving odd numbers. Eighty-seven million dollars has already been appropriated and used for the improvement of the Mississippi for navigation purposes and flood prevention in building levees and revetments up to March 4, 1915.

For the whole Mississippi River—that is to say, from mouth to source—there has been appropriated up to date, March 4, 1915, a total of $166,498,000. Now, when gentlemen say, "Let us continue the improvement; let us go on and finish it," I would not have them forget that under the guise of flood prevention they are now asking for $45,000,000, in addition to more than eight millions already appropriated this year in the rivers and harbors bill and in addition to $87,000,000 already appropriated and spent on the Mississippi from the Head of Passes to the Ohio River.

Mr. HUMPHREYS of Mississippi. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. HUMPHREYS of Mississippi. What warrant has the gentleman for saying that we are asking for this in addition to the $8,000,000?

Mr. MOORE of Pennsylvania. Because the gentleman himself—very naturally and commendably, and if I came from his State and from the banks of that river I would probably stand as he does—advocated these items in the rivers and harbors bill for the Mississippi River improvement and because the same gentleman, who is vigilant and entitled to all the enconiums that are coming to him to-day, now comes in with his flood-prevention bill and blandly asks for $45,000,000 more.

Mr. HUMPHREYS of Mississippi. Well, Mr. Chairman, of course I admit all the good things that the gentleman said about me to be true [laughter], but the gentleman does understand that the appropriations authorized in this bill are for a subsequent year and are not to be applied to the fiscal year for which the $6,000,000 carried in the river and harbor bill was appropriated.

Mr. MOORE of Pennsylvania. That is true.

Mr. HUMPHREYS of Mississippi. And if this bill should become a law the river and harbor bill for the next year would carry no provision for this particular part of the river.

Mr. MOORE of Pennsylvania. Well, that is a declaration that I have heard from the gentleman for the first time.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask unanimous consent for five minutes.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. That is a declaration which the gentleman may have made before, but I did not hear it. It is such a declaration as the gentleman did not make when he came in with his proposition for the creation of a Flood Control Committee. I think I asked the gentleman—and if I did not ask him, I certainly asked the chairman of the Committee on Rivers and Harbors—whether we would stop making appropriations for the Mississippi River in the river and harbor bill after the Flood Control Committee got to work, and I did not receive a very satisfactory answer to that question.

Mr. HUMPHREYS of Mississippi. I can tell the gentleman just what question he asked and what answer was given, as I recall it. He asked if the appropriations to be authorized by this committee, which has no power to appropriate, would thereafter be carried in the sundry civil bill or the river and harbor bill, and some gentleman stated that, in his opinion, it would still be carried by the river and harbor bill. But I take it that the gentleman from Pennsylvania was not seriously impressed with that statement. Of course the appropriations authorized will be carried in the sundry civil bill.

Mr. MOORE of Pennsylvania. I would much underrate the ability and the assiduity of the gentleman from Mississippi if I thought he would leave unimproved any chance to get in under the sundry civil bill if he gets the authorization desired in this flood-control bill. The gentleman will be there with both feet at the proper time.

Mr. HUMPHREYS of Mississippi. The gentleman means I will have both feet in the river and harbor trough, or in the sundry civil bill. [Laughter.]

Mr. MOORE of Pennsylvania. I mean to say that "if anybody can, the gentleman can." [Laughter.]

Mr. HUMPHREYS of Mississippi. It is nevertheless true that the appropriations authorized in this bill will hereafter be carried in the sundry civil bill, and not in the river and harbor bill.

Mr. MOORE of Pennsylvania. I am glad to hear the gentleman make that statement, because it takes me to the thought that the appropriations transferred to the sundry civil bill will not prevent these numerous other appropriations for tributaries of the Mississippi that will be carried in the river and harbor bill.

Nevertheless I want to say this to the gentleman who plead with us to let them go on and finish this job: You have been at it since 1879, with the best engineering talent that this country could give you, and you have been taken care of to the extreme limit, even to the extent of building shipyards in which to build your boats, and dry docks in which to repair them. It is easy to see why this movement is popular. I can even understand why some great distributing cities like St. Louis or Chicago can appreciate the importance of a measure which means that in their vicinity there will be spent during the next five years, $45,000,000 on this work on the lower Mississppi.

I am not referring to that particularly. I am calling attention to the fact that these gentlemen who are pleading now for "completion," have been at it for 30 years, and in that time have taken from the Treasury $168,000,000, or more than was given to the Atlantic seaboard projects in more than 100 years. When we are asking a little help along the Atlantic seaboard to open a passageway and make more commerce to create more revenue to spend on the Mississippi, "Wait until we complete our job on the Mississippi," is not calculated to encourage any other worthy project. It spells postponement. I have differed with eminent members of my own party on this proposition. Once a President of the United States in a speech delivered somewhere out in Ohio, declared that the first and only project that should be completed was the Ohio River. That meant that if we were to go on with the Ohio River and complete that $63,000,000 project the appropriation would be so reduced that every other worthy project in this country would be postponed. It did not seem fair.

The CHAIRMAN. The time of the gentleman from Pennsylvania has again expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I would like to have more time. I ask unanimous consent for five minutes more.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman from Pennsylvania may have 10 minutes more.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the gentleman from Pennsylvania may have 10 minutes more. Is there objection?

There was no objection.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. I yield to the gentleman from Mississippi.

Mr. HUMPHREYS of Mississippi. The gentleman says there has been $166,000,000 more spent on the Mississippi than there has been on the Atlantic seaboard.

Mr. MOORE of Pennsylvania. No; I say that is more than was spent on the Atlantic coast. We had only about $140,000,000 up to 1907.

Mr. HUMPHREYS of Mississippi. But the gentleman does not want to convey the impression, by putting that statement

about the $168,000,000 in such close juxtaposition to his criticism of the project now under discussion, that $168,000,000 has been expended upon it.

Mr. MOORE of Pennsylvania. I say on the whole Mississippi River project.

Mr. HUMPHREYS of Mississippi. And its tributaries.

Mr. MOORE of Pennsylvania. No; not its tributaries. I am simply quoting the report of the Secretary of War. I will refer to the page, so that the gentleman and I may not differ on it. It is page 495 of House Document No. 1491. The summary of the total appropriation for the Mississippi River winds up with a total of $168,498,996.99.

Mr. HUMPHREYS of Mississippi. Now, the gentleman does not mean to say that that was spent on that reach of the Mississippi River which is provided for in this bill. If he does, I want to correct him.

Mr. MOORE of Pennsylvania. I know what this bill provides for. It provides for the river from the Head of Passes to the Ohio River.

Mr. HUMPHREYS of Mississippi. Yes. The $168,000,000 has not been spent on that.

Mr. MOORE of Pennsylvania. No; but on the whole Mississippi River, as I have told the gentleman. I have been very careful to differentiate.

Mr. HUMPHREYS of Mississippi. I want the House to get that very clearly in its mind—that there has been $85,000,000, or approximately that, appropriated—it has not all been spent—for the Mississippi River Commission since 1881.

Mr. MOORE of Pennsylvania. The appropriations for the Mississippi River, from the Ohio River to the Head of the Passes, including surveys from Head of Passes to headwaters—that is to say, the Ohio—the appropriations running from June 18, 1878, which was the year before the Mississippi River Commission was created, to March 4, 1915, total $87,077,191.28. Bear this in mind, now. We have differed on this before. This is found on page 492, letter of the Secretary of War, being House Document No. 1491.

Mr. HUMPHREYS of Mississippi. Of that amount, the sum of $29,000,000 has been spent for levees; $43,000,000 has been spent for revetments which the Engineer says are absolutely in the interests of navigation. Now, the gentleman understands that down to the year 1900 the Mississippi River was the greatest highway of commerce in this country—one of the greatest in the world.

Mr. MOORE of Pennsylvania. In the days of the old flatboats, before the railroads; yes.

Mr. HUMPHREYS of Mississippi. Prior to 1900. So that the figures which the gentleman has given, which go back over 40 years, when the river was being improved for navigation, have no relation whatever to the subject of improvement which is now before the House.

Mr. MOORE of Pennsylvania. I beg the gentleman's pardon. The Mississippi River Commission was created in 1879.

Mr. HUMPHREYS of Mississippi. The first appropriation was made for it in 1881.

Mr. CAMPBELL. Will the gentleman yield?

Mr. MOORE of Pennsylvania. I will yield as soon as I state these figures. I wish to state them because there has been a misunderstanding, and I want the gentleman from Mississippi to be correct, as I am correct. I am now quoting from pages 491 and 492 of the official statement of the Secretary of War in House Document No. 1491, showing the appropriations for the Mississippi River from the Ohio River to the Head of the Passes from June 18, 1878, one year before the organic law creating the Mississippi River Commission, down to March 4, 1915, amounting in the aggregate to $87,077,191.28. Those are the figures. Now, I yield to the gentleman from Kansas.

Mr. CAMPBELL. What I want to know is this: Do the gentleman from Mississippi [Mr. HUMPHREYS] and the gentleman from Pennsylvania [Mr. MOORE] place the relative value of their measures upon the comparative amount that has been appropriated heretofore for either of those matters? If they do, they are giving to the country something to use in support of the country's campaign against pork-barrel appropriations for rivers and harbors. If the Mississippi River has no better claim for appropriations than the fact that it has not had as much as the Atlantic coast, and if the Atlantic coast has no better claim than that it has not had as much as the Mississippi River, then both of these claims are resting upon a very poor foundation.

Mr. MOORE of Pennsylvania. The gentleman's lecture is about as helpful as it would be for him to suggest that when we are getting appropriations for the cattle tick they are all right, but when we are getting them for rivers and harbors they are all wrong.

Mr. CAMPBELL. No; I am basing it on the position that these gentlemen are now taking.

Mr. MOORE of Pennsylvania. The gentleman is taking a very high plane. I estimate him highly and admire him, but still I do not care to sit here and see all the money that comes into the Treasury of the United States go into the State of Kansas, because they may need it, and none of it go into the State of Pennsylvania; that is all.

Mr. CAMPBELL. We get very little of it in the State of Kansas. Cow Creek does not get an appropriation, and it should be improved just as much as many streams in the country, and we do not have any money for the cattle tick, either.

Mr. MOORE of Pennsylvania. If Cow Creek had more water and fresher water, the cows would be healthier. [Laughter.]

Now, Mr. Chairman, I have no desire to be captious with anyone on this proposition; but so long as gentlemen argue in support of this measure that we ought to be fair with them and give them the money "to complete this project," I think it is fair to say that there are many worthy projects in the river and harbor bill that are awaiting completion, upon which work has been postponed. I submit that if appropriations for rivers and harbors are to be cut down to $25,000,000 per annum, it will be impossible to deal fairly with all parts of the country so long as a project demanding $45,000,000 takes precedence over the other worthy projects. And so, as to the Ohio, which I want to see improved along with the Mississippi, I differed from my President, the President of the United States, when he argued—and I presume it was a matter of State pride—that all else should give way to the completion of the Ohio. The gentleman from Mississippi [Mr. HUMPHREYS] and the forthcoming Senator from Tennessee [Mr. MCKELLAR] imbibe a little of that pride once in a while, and so do I. And it is perfectly natural that even a President should want to see his own project written into the statutes first. But if it takes $63,000,000 to complete the Ohio, for instance, to say nothing of the Mississippi, and all other work is to be suspended until that splendid stream is to be dammed up to the limit, from Pittsburgh to Cairo, 900 miles, with a uniform depth of 9 feet, what is to become of the other great and worthy projects which are bearing commerce, which are creating revenue, and which are capable of doing greater good if properly recognized by Congress?

Mr. MCKELLAR. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. MCKELLAR. I want to say that I like the gentleman from Pennsylvania very much.

Mr. MOORE of Pennsylvania. And I like the gentleman from Tennessee.

Mr. MCKELLAR. But I am not quite sure that he is familiar with the project.

Mr. MOORE of Pennsylvania. Mr. Chairman, I have seen the banks of the Mississippi drop off into the river like a piece of cheese clipped from a cake by a sharp knife.

Mr. MCKELLAR. With the gentleman's knowledge of what has already been done to complete the levees and with his knowledge of the whole project, is the gentleman in favor of not completing that project, and will he say that to this House?

Mr. MOORE of Pennsylvania. I should be delighted to vote to complete it to-morrow, if assured that it could be done; but I question whether $45,000,000, taken in this sumptuary manner away from river and harbor work, would complete the project to prevent floods to-morrow or next year or the next 100 years.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. DYER. Mr. Chairman, since the beginning of my service in this House I have pointed out upon several occasions the great importance of enacting legislation to control the floods of the Mississippi River and to improve the river for navigation. I have introduced bills to bring this about. This Congress created the Committee on Flood Control. The real work was thus started, and we now have before us this splendid bill. It aims to do two things—control the floods and improve the river, just what I have advocated.

The distinguished chairman of this committee, Mr. HUMPHREYS of Mississippi, has ably explained the details of this bill and its importance. He said, in part:

Under the terms of the bill the Government will contribute $30,000,000 for levees and $15,000,000 for revetment, whereas local interests will contribute not less than $10,000,000 for levees, and, in addition, will furnish rights of way, damages, and so forth, and assume all the burden of maintenance. But even if the commerce had passed from the river never to return, which is untrue and wholly and thoroughly improbable that it will ever be true, the money appropriated will have been well invested. Sixteen million acres of the geological cream of the earth are waiting the magic touch to spring into fields of waving beauty. The people of the lower valley have, out of their own pockets, spent more than $100,000,000 since the Civil War in the construction of

levees. This is more than enough to have built the levees high enough and strong enough to have withstood the greatest flood that ever came down the river had not the States of the northern valley perfected their drainage system. They stand ready to continue their contributions, but they do insist that the Federal Government tote its part of the load. Holland spent $46,000,000 to reclaim 2,000 square miles in the Zuyder Zee. Egypt spent $53,000,000 to reclaim 2,200 square miles in the valley of the Nile. Surely this great Nation can afford to contribute $45,000,000 toward the reclamation of 20,000 square miles, when by the same act more than 1,000 miles of the world's mightiest river will be rendered capable of carrying the commerce of an empire.

Mr. Chairman, this is one of the greatest preparedness and conservation measures that has ever come before the Congress of the United States. It will protect the lives and the property of thousands of the people of the Mississippi Valley.

One very great good that will come with the enacting of this bill into law and the completion of this project will be the assistance and encouragement it will give to restore river transportation. Once the river is safe from overflows, the channel will be more settled and safer for barges and ships to haul commerce. The great States of the Mississippi Valley are now earnestly at work to provide docks, terminals, and barges to carry freight on the river.

In 1880 the traffic on the Mississippi River amounted to nearly 2,000,000 of tons annually. During recent years it has not amounted to more than 150,000 tons. The great falling off has been due to quicker transportation by railroads and to the failure of cities to build docks and terminals. The opening of the Panama Canal has made practically necessary the restoration of Mississippi River transportation, or our cities and the people of the Mississippi Valley must suffer in loss of trade and business. I am glad to say that we are alive to the true situation. St. Louis is beginning to build docks and terminals. In fact, every important city on the Mississippi River is now building or has plans for providing modern docks with rail connections and the proper machinery for loading and unloading. Some of the cities that are taking advantage of this situation in regard to docks, terminals, and so forth, are St. Louis, Minneapolis, St. Paul, Rock Island, Dubuque, Clinton, Davenport, La Crosse, Muscatine, Fort Madison, Keokuk, Quincy, and New Orleans.

Mr. Chairman, the Atlantic coast cities have a vast advantage now over the Mississippi Valley cities in the transportation of their products by reason of the Panama Canal and an all-water route, and I am glad to hear that the distinguished gentleman from Pennsylvania approves of this measure with the exception, as I understand it, he thinks the $45,000,000 should be spent in Pennsylvania, his own State, or in the New England States before it is spent on the Mississippi River.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. DYER. Yes.

Mr. MOORE of Pennsylvania. I made no suggestion of transferring the $45,000,000 to Pennsylvania, for Pennsylvania does not need all of it just now. [Laughter.]

Mr. DYER. I am glad to hear the gentleman make that admission. I suppose he means that they do not want more than $35,000,000 now and the other $10,000,000 later. [Laughter.] It has been the desire, Mr. Chairman, of the Members of Congress residing in the Mississippi Valley, and the Mississippi Valley is a vast territory, to see the project enacted into law that will mean that the levees are to be built and that this vast territory of 75,000,000 acres of land are to be reclaimed for cultivation.

The amount of actual wealth that it will bring to the country is so enormous that figures are almost useless to describe them. It will be of great value to the whole people and to the entire country. The appropriation of money for the Mississippi River work by piecemeal, as we have been doing for so many years, has not fixed definitely in the minds of the people what our purpose is and what is going to become of it. The result is that they have not begun to work as they should to assist to restore the river transportation; and river transportation can not be restored on the Mississippi River until the people of the cities establish terminals and docks so that the freight can be made ready to be moved on the river.

St. Louis, of course, is interested in this bill, because it means so much to the great Mississippi Valley and to the 30,000,000 people living in that section of the country. St. Louis is the great commercial center; it is the great city of the Southwest, and that city will from a business point greatly benefit from the enactment of this bill into law. This great city is willing to do its full part in paying the expenses of this project. I have received many telegrams and letters in support of this bill from citizens and business concerns of that city. Among those who have wired their indorsement are the following: The Business Men's League of St. Louis; John Deere Plow Co.; Oliver Chilled Plow Works; J. I. Case Plow Works; Parlin & Orendorff Plow Co.; the Johnston Harvester Co.; Missouri Moline Plow Co.; the William J. Lemp Brewing Co.; the Majestic Manufacturing Co.; Paul Brown, editor St. Louis Republic; the Caradine Harvest Hat Co.; the O. K. Harry Steel Co.; Crunden Martin Manufacturing Co.; A. L. Shapleigh; Simmons Hardware Co.; F. K. Houston; William R. Compton Co.; the Germans' Savings Institution; Charles F. Luehrmann Hardwood Lumber Co.; the Streckfus Steamboat Line; and many other citizens and business concerns of St. Louis.

St. Louis has already begun to build docks and terminals for the purpose of restoring to the river the transportation that represented millions of dollars a few years ago. New Orleans has done it. The other cities on the Mississippi River will do it if this project is established, and it is known for sure that the river is going to have its banks made so that the overflows will be at an end. The millions of acres of land will become, of course, valuable. No one denies that. But let us look at what the facts are, as gathered by this flood committee. We find that since the United States and the levee districts began to cooperate in levee building for flood control the levee districts have contributed $91,000,000 and the United States $29,000,000. Under the provisions of the pending bill during the next five years the United States will contribute $30,000,000 and no district less than one-third of the amount contributed by the United States, and in addition to this the levee districts will have to furnish rights of way and pay all damages incident to the location of the levee line and provide for the maintenance of the levees. This will probably amount to $15,000,000, so that the account will then stand:

| | |
|---|---|
| Contributed by levee districts | $106,000,000 |
| Contributed by Federal Government | 59,000,000 |

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. DYER. I ask for five minutes more.

The CHAIRMAN. The gentleman asks that his time be extended five minutes. Is there objection?

There was no objection.

Mr. DYER. Of course we all know that the people who own the swamp and overflowed land will be benefited. The people of the cities and States are going to help, and they have already helped, as I have indicated, in a great amount of money expended in this work. Some of the cities and States have done more than they ought to have done under all the circumstances. This is largely a Government project. It is a project in which all the people of this country ought to be interested, including the gentleman from Pennsylvania and the people of that great State. The result that will come to this country in one way at least is worthy of note, and that will be that the agricultural productions of the Mississippi Valley will be so greatly increased. The land that will be reclaimed for cultivation is the richest land in this whole country, and the production will be so enormous that it will help in reducing the high price that we now have to pay for foodstuffs. It will be the means of bringing about what the Democratic Party promised us but failed to bring, and that is the reduction in the cost of living.

The great increase that will come will be immense, and, Mr. Chairman, I can not understand why any Representative in the Congress of the United States should not be in favor of the project that will benefit more than 30,000,000 people. If the river banks are made secure, and the people who live in that section can go about their business and go to work and outline and lay plans for raising the enormous crops, it will be the means of making the Mississippi Valley, as it ought to be, the greatest and richest agricultural section in all the world.

When that is done, Mr. Chairman, as I said before, all the towns along the river will build their warehouses, will build the docks and the terminals, that will be needed to take care of the vast passenger and freight business on the river, take advantage of the cheap transportation that water always brings, and we will find our boats loaded with commerce at cities lying along the river, we will find them carrying these goods in enormous quantities down the river to the Gulf, and there to be loaded into steamers that will carry the products of the Mississippi Valley through the canal to South America and the Far East. [Applause.]

Mr. Chairman, my city of St. Louis will then by leaps and bounds become much greater, much larger, and much more useful to the people of the Mississippi Valley and the great Southwest. Our population will increase because we will have more business. We will advance from near 800,000 to 1,000,000 and more.

Mr. MOORE of Pennsylvania. Mr. Chairman, the gentleman has painted a beautiful picture, and I would like to see it

come to pass, but what has that to do with flood control? That is a question of navigation, which should properly be considered by the Committee on Rivers and Harbors.

Mr. DYER. Oh, Mr. Chairman, the gentleman would be against this proposition no doubt if it came from the Committee on Rivers and Harbors. It is immaterial where it comes from. This great proposition has come before the House. It is a just and a fair measure; and I want to see it enacted into law. In closing, I want to pay a tribute to one Member of this House to whom I believe more credit is due for the fact that we have an opportunity to vote for this legislation than any other Member in this House at the present time or at any time in the past, and that is my distinguished colleague, the gentleman from Missouri [Mr. CLARK], our beloved Speaker. [Applause.]

Mr. SHALLENBERGER. Mr. Chairman, I am glad to support this bill for flood control and development of national resources by conserving the forces of nature and making them serve us rather than act as destructive agencies. The Mississippi River and its tributaries drain the richest and most productive regions occupied by the human race. The rivers open ways across the earth's surface for both land and water transportation. Mankind has always produced its greatest material achievements in the valleys of the world. Art, science, and labor combine to build cities along the great water arteries of the earth, and agriculture is most profitable and produces its fullest fruitage where the waters of the rivers have throughout the ages accumulated the richest soils and spread them out in level fields for the use of man. One thing is yet left for America to do to make the valleys of our great rivers the home of the highest developed and most successful civilization yet achieved upon earth. It is to control, distribute, and harness the waters of the streams so that they serve and enrich the Nation, not destroy the efforts of those who labor to make the rivers bear the burden of commerce and the lands productive.

Three agencies for national development are benefited by controlling and conserving the floods that now devastate the valleys—navigation and internal commerce; great water powers, that will furnish heat, light, and cheap power for the future; and improved agriculture, by spreading the waters that now destroy over the agricultural lands and storing in reservoirs at the sources of the streams. By intelligent effort we can redeem the submerged valleys of the Southland from floods and make more productive great areas of land in the North and West, where waters now go to waste that should be put to use in producing food to feed the Nation. The Platte River, extending through the center of Nebraska, borders the congressional district which I have the honor to represent. The Republican River, flowing through the second largest valley in the State, extends through the entire southern portion of the same district, from west to east. The Platte drains the largest area of any stream flowing into the Missouri. The Missouri is the greatest tributary of the Mississippi. The Republican is a great feeder of the Kansas River, the second largest tributary of the Missouri. Both of these streams are subject to violent and destructive floods. Diversion and storage of these flood waters upon the lands that border these streams will make the country upon which they are spread bloom and blossom as the rose and at the same time prevent their flow being added to the floods in valleys below. The Republican River destroyed millions of dollars' worth of property only last year by its repeated overflows. The Platte swells annually the floods in the Mississippi Valley by reason of the vast amount of water that comes down from the mountains and the great plains which it drains. Lying between the Platte and the Republican is a most fertile and beautiful table-land, as rich and productive as any upon earth if only enough water is put upon it to make it do its best service for man.

I have introduced a bill that is before the committee which has reported the measure now before the House which proposes to take the waters from the Platte, that now only waste and destroy the valleys below, and spread them over these table-lands and make them a blessing instead of an injury to the lands that are contiguous to them. I expect that this great committee, dealing as it will on a nation-wide scale to control the floods of the Mississippi and Missouri Valleys, will take up the prevention of floods in the Republican and Platte Rivers, both interstate streams, that now cause destruction in those beautiful and productive valleys. These problems are all national in scope and will be worked out in good time by the American Congress for the benefit of the American people. Energetic and progressive farmers and business men in the counties of Phelps, Kearney, and Gosper, in Nebraska, are already associated together in a great project to divert the waters of the Platte onto the table-lands between the Platte and Republican Rivers, and with the assistance that the Government will give them they will develop a great demonstration of the practicability of storing the flood waters for beneficial use in the soil instead of allowing them to run to waste for destruction and damage.

We have had a great deal of talk of late in this House about the hundreds of millions of money expended by the United States in the Philippine Islands. Authorities differ as to whether it is millions or billions we have spent there. In any event, we have appropriated it for another people, an alien race, of another color, with a different language, who do not love the flag as we do nor would not rise to defend it in an hour of peril. We are to spend many millions in Alaska to build a Government railroad near the Arctic Circle. We have spent hundreds of millions at Panama to build a water highway for all the world. I am glad to vote for a proposition to spend a little money at home to encourage the development of American homes and civilization upon American soil. [Applause.]

Mr. MONDELL. Mr. Chairman, the people I have the honor to represent on this floor live approximately a mile in altitude above the troubled waters of the lower Mississippi Valley, and we are so far away from that great stream that we are familiar with it only as we view the sparkling streams in the northwest corner of our State that form the headwaters of its longest tributary.

Mr. DYER. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. And yet, far away as we are from this flood-troubled river, our people feel, in common with most of the people of the country, some responsibility for the Mississippi River and for its control. I yield to the gentleman from Missouri.

Mr. DYER. The distinguished gentleman himself, I take it, however, first learned the beauty and value of this project from having himself been born upon the banks of the Mississippi River.

Mr. MONDELL. Mr. Chairman, I was born on the banks of that noble stream, and I learned to swim in its muddy waters, and I think of it pleasantly in the recollections of my boyhood days, before I left the muddy waters of the Mississippi for the more refreshing and clearer swimming holes of the Gasconade and later the Shoshone and Wind Rivers.

Mr. STEENERSON. Mr. Chairman, the gentleman is aware that the source of the Mississippi is not muddy, for the river rises in my district.

Mr. MONDELL. Mr. Chairman, I am even more fully aware than the gentleman from Minnesota that the source is not muddy, for the source of the Mississippi is not in his State, as he erroneously supposes, but in the State which I have the honor to represent. The Mississippi River rises in the Yellowstone National Park. It is known there as the Fire Hole River in the first few miles of its course, and it then becomes the Madison, eventually the Missouri, and finally the Mississippi.

Mr. STEENERSON. Mr. Chairman, I know that the American people will be very much obliged for this correction of their general geography. It has heretofore been generally supposed that this great river had its source in Lake Itaska, one of the most beautiful lakes on this continent, where the water is as clear as crystal and deservedly has received the Indian name of "Sky Tinted Water." That lake is in the State of Minnesota.

Mr. MONDELL. All of which proves what an important river it is, because it has so many beautiful and widely separated sources. The American people have long appreciated the duty that the country owes in the matter of the control of the Mississippi River. It is the great national ditch, as it has been called, draining thirty-odd States, into which we drain every swamp, into which we pour the waters of all of the reclaimed swamp lands of all the great territory above the Delta of the Mississippi. Out in our country we have been trying to do something toward helping the flood problem by holding back some of the waters of the Mississippi River and its tributaries and utilizing them for the irrigation of arid lands, but we have always realized and understood that that work, while useful from our standpoint, was but an insignificant factor in the settlement of the question of the Mississippi floods. I am glad that we created the Flood Control Committee. I am glad that we were fortunate enough to secure the services of a very able and active man at the head of that committee. I am glad that the Flood Control Committee brought in a bill, and I hope that it will pass, though I think it might be improved.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Chairman, I want to say to my colleagues who will have to do with the direction and supervision of the expenditure of the money that will be appropriated, that there is a very great responsibility resting upon them. We started in a few years ago to reclaim the semiarid lands of this country by Federal aid. We did not ask, as you gentlemen do in this case, for an appropriation outright of 75 per cent in the one case and 50 per cent in the other from the Federal Treasury, never to be returned. We were very glad to secure a loan, the major portion of which we believe will be repaid.

We have made some mistakes in the reclamation business, not fundamental, not vitally serious, not affecting the investment in the main, and yet mistakes that have not helped along that highly important and useful work. Possibly one of the reasons for that was that Congress did not have at the beginning as complete control and did not exercise as complete jurisdiction or supervision over the work as it might or it should have done. Judging from our experience, it is exceedingly important that all of the friends of flood control of the Mississippi River and other rivers shall see to it not only that the work is undertaken along the proper lines and under the proper plans, but that they keep their eye on the work as it progresses, to the end that as few mistakes as possible may be made. Some will be made in any event. No great public work goes on without some mistakes being made and some expenditures that are not the wisest. In the interest of the development of a great national work, which I am glad to see undertaken frankly on its merits and not as an adjunct to a river and harbor bill, which has to do with navigation, and in the hope that that great work will be wisely inaugurated and sanely developed——

Mr. PLATT. Will the gentleman yield?

Mr. MONDELL. I trust the Members of Congress from the regions affected and the members of this committee will give their personal attention to the work as it develops and see to it that it is carried out in a thorough, competent, and economical manner. I now yield to the gentleman from New York.

Mr. PLATT. The gentleman lives near the headwaters of the tributaries of the Mississippi River. Will the gentleman say it is impossible to control the floods from the sources, near the headwaters? Is that the opinion of the gentleman and of the engineers?

Mr. MONDELL. I think it is the opinion of engineers, arrived at after a great deal of study, that all you can economically and advantageously do in the control of floods by reservoiring at the headwaters of streams, all that can be accomplished in that way, will have comparatively little effect upon floods of great river systems. In order to hold back enough water to have any appreciable effect upon the crest of the great floods of a river like the Mississippi it would be necessary to utilize vastly greater areas for storage than are to be found at the headwaters of streams.

I do not wish to be understood as minimizing the value and importance of the application of water to the soil for irrigation and the impounding of such water in flood time for such use later on the headwaters of the Mississippi and its tributaries as a factor in flood control. In fact, I am so greatly interested in the development of irrigation and the building of irrigation works that I am naturally tempted to view development of that kind as an important factor of flood control; but a regard for the truth compels me to admit that all that we may do and hope to do in impounding the waters of the tributaries and using them for irrigation, we shall not reduce the peak of the Mississippi floods greatly. However, we do expect that the benefits of that irrigation work as a factor in flood control will not be overlooked.

In expressing the hope that this bill shall pass, I do not wish to be understood to favor all its provisions or as enamored with all of its plans. I think it would have been better if the committee had spent a little more time and worked out a better, or at least a more detailed, plan than has been worked out or will be inaugurated under this bill. For one thing, when the work done will be of great and direct benefit in reclaiming lands, there should be some plan by which the lands benefited will pay a considerable portion of the cost in addition to what the States are to pay. I am inclined to think that before we get very far on this work some such plan as this will have to be worked out. Another thing, I know of no very good reason for the differences in the percentages to be paid locally provided for in the bill. Above all, the work must be done permanently and thoroughly, or the country will soon tire of the expenditure. I for one will be as hostile as I am now favorable if it shall develop that the work is to be carried on in such a way as to be of only temporary benefit. It must be permanent and effective or it will be abandoned.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that I may proceed for 10 minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that he may proceed for 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Chairman, I want to make an observation or two about this bill—I believe that is the way to introduce it. I have supported various propositions for the great Mississippi River, and feel quite willing to do so, though I do not see that the proposition which is pending before the House now makes any material change in the policy which has heretofore been pursued. We have been appropriating five, six, seven, or eight million dollars a year for some years for the Mississippi River, and undoubtedly would continue to do so, and I do not see how it makes any great difference to authorize an appropriation of $10,000,000 a year, with a limitation of $45,000,000, which does not amount to a row of pins. The Appropriation Committee will probably not appropriate $10,000,000 anyhow—certainly will not unless the engineers say they can use it for the next year—and the limitation upon this bill amounts to nothing, because it does not limit the authority to appropriate in the river and harbor bill; no pretense to do that. I believe from the statements that have been made here to-day there are 20,000,000 acres of land subject to overflow. Three gentlemen have made the statement that there are 16,000,000 acres of land which are overflowed, and they are not worth very much because they are overflowed; that this will redeem that land. The total amount of cost which is to be charged against the land under the terms of this bill is one-third of $45,000,000, which is $15,000,000, and in addition to that what may be paid for rights of way and for maintenance. Fifteen million dollars to redeem 16,000,000 acres of land does not seem a very large sum to charge against the property owners. Am I right when I understand that there are 16,000,000 acres of land which may be redeemed by this bill? The gentleman from Mississippi says I am. That land, when it is finally redeemed, when it is certain that it is no longer subject to overflow, was described by one gentleman—I think correctly—as the richest land in the world. It would be worth from $200 to $500 an acre. It is proposed to charge against it for its redemption less than $1 per acre.

Now, that does not seem to be a very careful consideration by our distinguished Committee on Flood Control. That land has always been overflowed. The overflow is not caused, as suggested, from the rapid drainage of the Northern States. It was overflowed when the Government was organized. It was overflowed before the first white settler put his foot on the American Continent. It was overflowed 50 years ago. It was overflowed 10 years ago, and it is overflowed now. Doubtless the rapid drainage of the land in the North helps to add to the quantity of water which comes at certain periods of the year, but the amount that is added no one can tell, because the building of levees and restriction of the water within the banks of the stream have added a great deal more, probably, to the height of the water of the Mississippi River than the extra flow. Where the water used to spread out all over an area they now confine it within two narrow banks. Of course, that raises the gauge of the water, and if there is a break it overflows very rapidly at some places. I think the people of the Delta are entitled to consideration from the Government. I think we should make some contribution, because we have added somewhat to the flood waters of the Mississippi from the rapid drainage in the North, but when we propose to say that we pay three-fourths out of the General Treasury for the redemption of 16,000,000 acres of land, the richest land in the world, and the landowner pays one-fourth, or $15,000,000, it seems to me that we are asking a good deal of the General Government and are asking very little of the landowners.

I had hoped when the Committee on Flood Control was created that it would take a very broad view of the whole subject of flood control. There is not a new idea in this bill. There is not a new thought connected with the report which the distinguished chairman made, and which is a very able report, in reference to flood control. I do not know whether or not it is practicable to save any of the water at the headwaters which now goes to waste, aiding in destruction on the lower end of the river, in order that that water so saved may be utilized in irrigation projects, in order that the water may reach the river more slowly than it does now and on its way help to bring fertility to the soil and add to the produce of the farm. But there is no such thought here. The Committee on Flood Control has acted rather precipitately, it seems to me. They have taken the reports of the Army engineers, and there is no one

doubts that the Army engineers, who have given more careful study to the subject of navigation than they have to flood control, think the only way to take care of flood control is to raise the level of the levees and protect them from being washed away.

Well, that may be correct; but the other side of it ought to be considered. It has not been considered, and is not considered here. We ought to know from most careful investigation whether it is possible to hold back some of the waters which run away in the spring, in order that they may be utilized during the drought of the summer and the autumn. There is no such thought here. The Army engineers have been opposed to it, because they have never had occasion to give special consideration to that side of the question. We have appropriated and expended a very large sum of money—millions of dollars—upon the Mississippi River for the purpose avowed—of aiding navigation. The whole purpose of the river and harbor bill was to aid navigation, not to control flood waters; while everyone knew, as a matter of fact, that the aiding of navigation was, in part at least, only a pretense, a matter of making it constitutional and bringing it before the House in that shape. Still, that has been the thought of the engineers. Some people believe—and some people of somewhat great eminence—that it may be possible to partly control the flood waters of the spring months by saving those waters for use on their way to the sea. [Applause.] This bill abandons the idea. There is no question here at all of ever making any pretense of gathering up the waters when the snows melt and the spring rains fall in order that they may be utilized. This bill only helps to hurry the water to the ocean, where it is of no value.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, in answer to the gentleman from Illinois, this fact is very clearly established by the reports of the engineers not that the increased elevation of floods to-day is entirely due to the improvements that have taken place in the northern valleys, but this fact is made perfectly clear, that the people of the lower delta have already out of their own pockets contributed more than enough to have completed a levee system high enough, strong enough to have controlled every flood that would have come down the river or that ever did come down the river prior to the activities of the people of the northern valley.

Now, let us take some figures. The greatest flood that ever came down the river after our records began to be accurate was in 1858, shortly after the development of the upper valley began, and was stimulated by what was called the swamp-and-overflow land grant.

Mr. GREEN of Iowa. Will the gentleman yield there for a question?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. GREEN of Iowa. When did the records begin?

Mr. HUMPHREYS of Mississippi. They began about the first of the century, 1800—the early part of the century, shortly after the Louisiana Purchase was consummated. The first general investigation was made by Bernard and Totten, in 1822. A very elaborate investigation was made in the Ohio watershed by Lieut. Elliot, and in his report he made this statement:

> The process by which the country above is relieved is the process by which the country below is ruined.

In 1850—I have forgotten the exact date—Congress passed what is known now as the swamp and overflow land-grant act, under the terms of which all the public lands in the States of the valley were donated to the several States on the condition that the proceeds of their sales should be devoted to the construction of levees and drains—in the lower States to the construction of levees and in the upper States to the construction of drains. But it soon developed, by reason of the fact that the States of the upper valley developed much more rapidly and that it was cheaper to build drains than it was to build levees, that the elevation in the flood area progressed much more rapidly than the people were able to build their levees.

Mr. CAMPBELL. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. CAMPBELL. The gentleman is developing the general proposition that the lower Mississippi has been seriously affected by the developments on the upper Mississippi. Is it not true that the narrowing of the channel raising the levees has been the serious question with the people on the lower Mississippi——

Mr. HUMPHREYS of Mississippi. Undoubtedly.

Mr. CAMPBELL (continuing). Rather than what has been done in the upper Mississippi?

Mr. HUMPHREYS of Mississippi. Undoubtedly.

Mr. CAMPBELL. And that that has caused floods?

Mr. HUMPHREYS of Mississippi. No; that has not caused the flood, but it has seriously elevated, and very materially, the flood heights.

Mr. CAMPBELL. Is it not true that the levees on the lower Mississippi that have been so elevated have rather added to the grievousness of the situation?

Mr. HUMPHREYS of Mississippi. Undoubtedly. Now, I am going to give you some figures.

In 1858 the flood as it came out of the Ohio, just below the mouth of the Ohio, measured 1,475,000 second-feet. I take, as typical of the development of that country, the 11 States which are in the triangle described between the Missouri River on the one side and the Ohio on the other. At that time the farm values were approximately $800,000,000 in round figures. In 1880 those values had increased to $5,000,000,000, evidencing the improvement, among other things, which had taken place.

The flood of 1882, taken exactly at that same point, measured 1,800,000 second-feet. Now, in 1910 farm values in those same States had increased to $20,000,000,000. In the meantime the innumerable drainage districts had been formed, innumerable slashes and natural reservoirs had been drained, and in 1912, following immediately after the census, measured at that same point, the discharge was 2,300,000 cubic feet a second. So that from the date when the value was $800,000,000, measured at the same point just below the mouth of the Ohio, the discharge increased from 1,475,000 cubic feet to 2,300,000 cubic feet.

Now, the people of the lower Deltas have contributed out of their own pockets more than enough money to have taken care of the flood of 1858 easily, without any Federal aid. So much for that.

The precipitation of these tremendous volumes of water—and the reports show that the floods are no more numerous or in their total volume no greater than before, although the volume is precipitated much more rapidly and passes off more rapidly——

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. TILSON. Mr. Chairman, I ask unanimous consent that the gentleman have 10 minutes more.

Mr. HUMPHREYS of Mississippi. Five minutes more will be enough.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. HUMPHREYS of Mississippi. This rapid precipitation of the waters caused by the improvement of the drainage areas above has produced this most disastrous effect, and the gentleman from Wisconsin [Mr. FREAR] attributes that to inexpert levee construction. But I think that is not warranted by the facts. The rushing of these waters in the lower channel so rapidly has caused the banks to cave infinitely more rapidly than in the earlier days and before any economical method of revetment and bank protection was discovered. When a levee was located they built it in the hope that it would last for 20 years before it would cave into the river.

Mr. DILLON. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. DILLON. I would like to have the gentleman state to the committee at what period in the year his trouble with overflows on the Mississippi occur? In what months are the most serious floods?

Mr. HUMPHREYS of Mississippi. The most serious floods come in March and April. This year it came in February.

Mr. DILLON. How about June?

Mr. HUMPHREYS of Mississippi. That is what we call the "June rise," but it is rarely serious, although sometimes it is quite a serious matter. Sometimes it happens, as it did in 1912, that the floods came out of the Missouri and the Ohio Rivers at the same time.

Mr. DILLON. We get our troubles in South Dakota usually in the early spring, and then again in the month of June.

Mr. HUMPHREYS of Mississippi. Yes; so that this development up there has assisted in destroying the levees. It has not only put more water into the river at one time, but it has caused the levees that were destroyed to cave into the river.

Now, in view of the fact that the people have had to put up more than $100,000,000 since the Civil War—but let me add before I go further that when the Civil War came on it is stated in the famous report of Humphreys and Abbot of 1860 that the levee system was in a fair way to completion and the cleared lands were valued at $100 an acre and the wooded lands at $25 an acre. In 1880 more than half of the land had passed from private ownership, had passed out of the hands of

the property owners and taxpayers there, after a vain effort to meet the progressively increasing floods that had come as the result of the rapid development of the Northern States.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. GREEN of Iowa. Has the gentleman any figures there as to the increase of floods in the lower Missouri?

Mr. HUMPHREYS of Mississippi. No.

Mr. GREEN of Iowa. I have had occasion to think that the floods in general would be rather less than greater than they had originally been in the upper Missouri.

Mr. HUMPHREYS of Mississippi. I have no figures on the Missouri, except incidentally. I made an investigation on one occasion, not for the purpose of ascertaining the volume of the flood, but I ascertained—and I do not know how long this condition obtained—that for 10 years the engineers kept a record of 800 miles on the Missouri and they found that more than 10,000 acres of farm land caved in annually.

Mr. HELGESEN. Mr. Chairman, will the gentleman yield there?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. HELGESEN. I understand that the gentleman stated that the greatest flood on the lower Mississippi occurred in 1912, and that it was caused by the Ohio and Missouri Rivers both happening at that time to discharge their floods?

Mr. HUMPHREYS of Mississippi. Yes. That contributed very largely to it.

Mr. HELGESEN. Then it would be unfair to charge the development of the North with that condition, because it was a weather condition, and it would have come on just the same even if there had been no development in the North.

Mr. HUMPHREYS of Mississippi. Yes; but the flood came again in 1913 and again in 1916. There has been an increase in the flood volume, and gentlemen must know that as the improvement of the drainage area above proceeds the water must necessarily be discharged more rapidly into the tributaries. That is the purpose of drainage.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. KEATING. I will state frankly to the gentleman that the point that is sticking with me is the point raised by the gentleman from Illinois [Mr. MANN]. The gentleman from Mississippi states that there is to be redeemed 16,000,000 acres of land, and that all that land is in private ownership?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. KEATING. Why should not the men who own that land contribute to the redemption of that land, or reimburse the Government for putting its money into it?

Mr. HUMPHREYS of Mississippi. One reason, I will say, is because they can not do it all. They have tried it once, with the result that more than half of it was forfeited. For 200 years the people have been endeavoring to settle this marvelously fertile valley. It has tempted the cupidity of men ever since they landed at New Orleans. There has been a continuous and constant effort to reclaim these fertile areas, with the result that in 200 years they have been able to put under cultivation three and one-half million acres out of the twenty millions.

Mr. KEATING. The suggestion I was making was not that the Government should not assist you. I am perfectly willing to see the Government put money into this project, as I am willing to see it put money into the reclamation fund. But after you have redeemed it and made it worth $200 or $250 an acre, why not then reimburse the Government?

Mr. HUMPHREYS of Mississippi. It may be that in the course of human events that land will be worth from $200 to $250, but it is not worth it now. The finest land in that country, highly improved, is not worth the fourth of that. Fifty dollars an acre is the most that anybody can get for the finest farming land there. In my district, about half of which is immune from overflow, where we have completed our levee system, and where we have not had a crevasse in 19 years——

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. HULBERT. I ask unanimous consent that the gentleman's time be extended five minutes.

The CHAIRMAN. Without objection, the gentleman's time will be extended five minutes.

There was no objection.

Mr. HUMPHREYS of Mississippi. I want to make a reply to one other statement of the gentleman from Illinois which I have not yet reached. I took up my time on this other matter. The question of making a general survey of the drainage area, with a view to ascertaining if it were not possible to husband all the water as it falls from the skies, put it to beneficial uses, and in that way reduce the floods of the lower valley—that matter has been studied. It has been studied for a long time by the engineers. If we were to create a commission with authority to make that investigation and report, we found we were confronted with the statement that no country on the face of the earth has ever been able to make such a survey for less than $70 a square mile. Now, when those figures confronted us, when we were told that it will take, at the lowest estimate, $10,000,000 to make that investigation in the Ohio Valley alone, the committee naturally hesitated. It is estimated by the engineers that $190,000,000 would be required to make the surveys contemplated in one very comprehensive bill which was pending before the committee, that it would require 10 years to make the surveys, and that there are not engineers enough in the Government service to do it in that time.

Mr. MANN. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I yield to the gentleman.

Mr. MANN. A few years ago we sent an Army engineer over to China to tell that country how to prevent floods in one of the greatest streams in the world over there. Did he have to make a survey of all this land, at $70 an acre, in order to tell them how?

Mr. HUMPHREYS of Mississippi. I said $70 a square mile.

Mr. MANN. Seventy dollars a square mile, or any other area that the gentleman wants to fix, I do not care what it is. He did not make any surveys at all, did he?

Mr. HUMPHREYS of Mississippi. I am not fully informed on that. I know what the gentleman is talking about.

Mr. MANN. He did undertake to tell them how to prevent floods in their great rivers. I do not know whether it was successful or not, but he did undertake to tell the Chinese how to prevent that.

Mr. HUMPHREYS of Mississippi. Yes.

Mr. MANN. The gentleman says that in this country all of the engineers combined could not do it without spending $190,000,000.

Mr. HUMPHREYS of Mississippi. If the House understood me to say what the gentleman understood me to say, I was unhappy in my statement, because that is not what I intended to say. The gentleman referred to a survey of this country to see if the water could not be put to some beneficial use from the springs down. Now, here is what the committee does provide. Take the Ohio Valley as an illustration. Why spend $10,000,000 for a survey of the entire Ohio watershed, to ascertain the possibility of controlling the floods of that entire watershed, when it is known just what tributaries of the Ohio these disastrous floods occur upon. We know there is trouble in the Allegheny and the Monongahela and the Scioto and the Wabash and the Miami and others that are troubled with floods.

Every stream in this country where there is a flood condition is represented here on the floor of this House, and it is quite certain that those matters will be brought to the attention of the committee. Therefore the committee provided machinery whereby, instead of taking this entire watershed at a cost of untold millions of dollars, and making an investigation, we would accomplish the desirable thing by taking the tributaries where flood conditions do prevail, where everybody knows that they prevail, and examine the watershed of each particular tributary, which can be done for one-twentieth part of the cost of a great comprehensive survey of the entire country. Now, that is what the committee attempts to provide in section 3 of the bill.

Mr. BORLAND. Will the gentleman yield to me at that point?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. BORLAND. I want to ask the gentleman whether it is not true also that the water that would be collected from these sudden spring floods would be collected in a section of the country where it is of no value and in no demand for the purposes of irrigation? In other words, these floods occur in the humid belt, do they not, and the water that would be collected would be of no value as stored water for the purposes of irrigation?

Mr. HUMPHREYS of Mississippi. As a rule that is true, though there are some places where it can be profitably used for irrigation.

Mr. STAFFORD. In Wisconsin we are conserving the waters, not for irrigation but for power purposes, at the headwaters of the streams tributary to the Mississippi River.

Mr. BORLAND. There is a certain amount of that.

Mr. GARD. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I yield to the gentleman from Ohio.

Mr. GARD. In that connection has the gentleman and his committee, in estimating the cost of the surveys of which he has spoken, taken into consideration the very excellent drainage

map afforded at present by the United States Geological Survey, comprising, I think, surveys of nearly all the States of the Union.

Mr. HUMPHREYS of Mississippi. Of course those surveys do not cover all the States of the Union by a great deal, but that was considered in the estimates. Now, what we provide is this: You have a flood situation——

The CHAIRMAN. The time of the gentleman has again expired.

Mr. STAFFORD. I ask unanimous consent that the gentleman may proceed for five minutes more. We are all very interested in his explanation.

Mr. HUMPHREYS of Mississippi. I do not wish to take all the time.

Mr. MANN. I am sorry I made a speech of 10 minutes that takes the gentleman 20 minutes to answer.

Mr. HUMPHREYS of Mississippi. I think anyone who can answer a speech of the gentleman from Illinois in 20 minutes is doing very well. [Applause and laughter.]

When a watershed is to be examined we provide in the bill that Congress shall indicate that it desires this particular watershed investigated. Then the engineers are called upon to make a comprehensive survey of the entire watershed, and in their reports these are the things they are called upon to report: They shall state what, if any, water-power propositions are involved, give the character and extent of the area, whether it involves the flooding of cities or farm areas or mining properties or what; what, if any, other beneficial uses of water can be coordinated with the flood appropriations; what, if any, effect it will have on navigation of any stream that will be involved. The examination is comprehensive enough, and it is confined to those watersheds that we know before hand are subject to damage by floods. It occurs to the committee that that is a much more businesslike procedure and a much more economical procedure than to create a commission or authorize any agency we have in the Government to go out and make a comprehensive survey of the entire country involving an expenditure of many millions of dollars.

Mr. CLINE. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I will.

Mr. CLINE. I would like to ask the gentleman whether there was any estimate made by the engineers who were before the committee as to the cost of making a critical examination of the different watersheds that contribute to the flooding of the Mississippi.

Mr. HUMPHREYS of Mississippi. Yes; it was stated that it would cost $10,000,000 to make that survey of the Ohio River Valley, that watershed alone, and if we undertook the surveys contemplated in the comprehensive measure that has been urged for several years it would cost $190,000,000 and take 10 years to complete the work.

Mr. HELVERING. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. HELVERING. Last year in Kansas there were thousands of acres overflowed by the tributaries of the Kaw River. Would that scheme of the gentleman relieve that situation in Kansas?

Mr. HUMPHREYS of Mississippi. Section 3 undertakes to provide the machinery in the War Department whereby Congress hereafter, if it was thought a desirable thing to do, could secure the investigation of the situation that the gentleman suggests, and in that investigation they would make a comprehensive survey of the entire watershed and determine whether the water could be diverted to irrigation or what not.

Mr. HELVERING. Does the scheme which the gentleman has outlined relieve the situation above the one I have mentioned?

Mr. HUMPHREYS of Mississippi. I do not think it does.

Mr. PLATT. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. PLATT. Is it not true that the Ohio Valley is already covered by topographical survey maps, and how it would cost $10,000,000 I do not not see.

Mr. HUMPHREYS of Mississippi. I do not know why, but it has not been done for less than that anywhere else on the face of the earth.

Mr. CAMPBELL. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. CAMPBELL. Mr. Chairman, I was an enthusiastic supporter of the rule creating the Committee on Flood Control. I was in favor of the creation of that committee because I believed that something practical could be done in controlling flood waters that ultimately create great damage on the larger streams near their mouths. You may imagine somewhat my disappointment that this bill, one of the first and most important reported by the committee, does nothing to carry out the purpose indicated by the name of the committee that was created. This amount could as well have been provided for by the Committee on Rivers and Harbors as by the Committee on Flood Control. There is therefore nothing new, nothing in this appropriation that fulfills the mission of the committee.

In the first place, there are, I believe, scientific reasons for believing that flood control is a sound proposition; that it is possible to control the flood waters of the great streams of this country. I believe that it is possible to save the lower Mississippi, the Missouri, the Kaw, and every great river in the country from the serious overflows that result in such great havoc during the flood season.

I had hoped that this committee would take up that question under surveys that have already been made, that are available now in the departments of this Government, and do something that would relieve those living on these streams from the damage that they sustain by reason of the overflow of the streams at every flood season. There is nothing in this bill that will remedy those conditions that have heretofore existed.

I had hoped that along the waters of the Republic, along the waters of the Kaw, along the banks of every stream that is tributary to the Mississippi, there would be an impoundment under the recommendations of this committee of the flood waters used for irrigation or used for power purposes after the flood tide had passed. Nothing of that kind is done.

The whole scheme of this bill is to relieve the flood conditions on the rivers with which the people have been battling for two or three centuries. The floods on the lower Mississippi have always inundated the land tributary to the river. They always will while the waters are permitted to reach the lower Mississippi Valley in flood seasons.

If those sections of the country are to be reclaimed and made available for farming purposes without serious loss to the people who live upon them, that settlement should be made upon these lands on the same conditions under which settlers go upon semi-arid lands of this country to-day, where irrigation is provided, and these lands should be reclaimed in exactly the same way and on the same principle that these arid lands are reclaimed. The swamp lands, the overflowed lands of the Mississippi, of the Missouri, of every stream, should be reclaimed for the benefit of the citizens of this country under exactly the same conditions and the same provisions as the arid lands are reclaimed. The settler should pay for the land, the Government being reimbursed, as suggested by the gentleman from Colorado a moment ago, when the lands have been reclaimed. Why should the Treasury of the United States be mulcted for these enormous amounts every year for flood control when there is no flood control, for navigation when there is no navigation, all for the purpose of temporarily, if possible, aiding some one in settling upon lands that have been subject to overflow ever since there has been a bed for the Mississippi or for the Missouri or for any other of the streams tributary to which the lands are to be reclaimed? The overflow of the Mississippi and of the Missouri and of these other streams is not a matter of modern origin, and it does not occur because of anything that has happened in the upper tributaries of those streams within the last half century or three-quarters of a century. These streams have always overflowed; they always will overflow while the waters of the upper tributaries are permitted to go into those streams during the flood season. So I say I am disappointed that the Committee on Flood Control has not brought in a bill with a view to controlling the floods in the streams tributary to these great rivers and preventing the floods in the flood season, as it has been demonstrated in other countries can be done and as it has been believed in this country by engineers for years could be done, and as is believed in this country to-day by many men who have given the subject serious consideration can be done. There is nothing in the bill, there *is nothing* in the proposition that is new. There is nothing that differs from what could be brought in here by the Committee on Rivers and Harbors in the regular appropriation bill reported by that Committee. [Applause.]

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. DILLON. Mr. Chairman, I indorse the position taken by the gentleman from Kansas [Mr. CAMPBELL]. Before making any remarks I would like to ask the chairman of the committee a question, referring to line 3, page 1, which reads "for controlling the floods of the Mississippi River." Would that include the Missouri River and its tributaries?

Mr. HUMPHREYS of Mississippi. It would not.

Mr. DILLON. Mr. Chairman, I thank the gentleman for his clear and positive answer. It seems to me that this committee has overlooked one of the principal elements of flood control. I live on the banks of the Missouri River and know something about its floods. Scarcely a spring passes that we do not have floods that cover thousands of acres of land. It is not a question of the Mississippi River; it is a question of the Missouri River with us. How are we going to control that situation? It is well known what it is, and to control these floods is not a difficult proposition. When the snows melt in the spring the waters come down from the James, the Vermilion, and other rivers flowing to the south, and at the same time from the prairies west of the Missouri River we have the flood waters flowing into the Missouri, which floods thousands of acres of land, not one year, but practically every year. Again in the month of June comes another rise; we call it the June rise. The snows on the mountains in the West are melted, and the waters come pouring down from the West into the Missouri, and we have again a flood that devastates and destroys our crops. I believe it to be a feasible proposition to impound these waters. I think the committee has commenced at the wrong end. You should commence on the tributaries, the streams that feed the Missouri, and impound the waters and store them for irrigation purposes, in order that they may be used for irrigating our lands and thus hold back the floods.

If we can hold back these mountain streams, we will avoid the June rise, we will avoid the spring rise, and we will not be troubled with floods. If this is to be a bill confined only to the Mississippi River, then there is serious objection to it. There is no good reason why it should not be general in its character by which we may stop these waters in the spring of the year caused by the melting of the snow and hold them back until the flood dangers are passed.

Mr. DENISON. Mr. Chairman, will the gentleman yield?

Mr. DILLON. Yes.

Mr. DENISON. I would like to know what State of the Union the gentleman would use for the purpose of impounding these waters.

Mr. DILLON. Wherever they may be impounded. For instance, there are narrow defiles in these mountain streams where a small dam costing but little money could hold in check these waters, and the holding of them in check would prevent these floods, and the waters could be used afterwards. As a matter of fact, the Missouri River is the greatest river of the country and the Mississippi is a tributary to it. [Applause.] So I think the committee has overlooked the great question, which is the impounding of the waters and stopping them at their source. If you will do that, you will not be troubled with the Mississippi floods so far as the western country is concerned. [Applause.]

Mr. BENNET. Mr. Chairman, I first want to call the attention of the committee to the fact that Mr. Fox, who is carrying on this propaganda, is not very well acquainted with the constitution of the State of New York. Each Member from New York yesterday received a copy of the bill, and attached to it was what purported to be resolutions adopted by the house of representatives of the State of New York. We never had a house of representatives in the State of New York in the history of the Government. We do have a legislature, and this rather gives the impression, although this book I hold in my hand does not, that these are the instructions to the Members of Congress. It may be that the legislature thinks it has the right to instruct Members of Congress. Now, the fact is—of course, the gentleman from Mississippi did not know it—but the fact is that these resolutions were introduced in our assembly in 1914 as joint resolutions to be passed by both houses of the legislature, and were passed by the assembly of 1914, but were unanimously laid on the table in the senate. [Laughter.] So our legislature has not very thoroughly indorsed it.

Mr. HELVERING. If the gentleman will permit, I was going to suggest possibly there has been a mistake, and there has been an exchange of States, because in my State we do not have an assembly but we have a house of representatives.

Mr. BENNET. The gentleman has my sympathy. [Laughter.] I hope that his house of representatives is as good a body as our assembly.

Mr. BORLAND. They have a representative government in Kansas.

Mr. HUMPHREYS of Mississippi. If the gentleman will permit, the gentleman called on me last night and I explained the matter, and that many of these resolutions were adopted by many legislatures throughout the country, some by the house of representatives and some by the senate, and some by both. I made inquiry at once this morning when the gentleman told me about the New York situation, and I was advised that Mr. Sweet, speaker of the house, requested the leader, Mr. Hinman, to introduce the resolution, which he did, and that resolution passed in that chamber which usually corresponds to the house of representatives. I have certified copies from a number of the States which I could not get hold of to-day; I have them somewhere or other, but I could not get hold of them to-day, but there was no intention on my part to deceive the gentleman from New York or the House. I was simply expressing the opinion of the general assembly or the house of representatives, or whatever they call it in New York, on this subject, and it had done thus and so.

Mr. BENNET. It is called the assembly in my State and the house of representatives in Kansas.

Mr. MANN. If the gentleman desired to express the opinion of the lower house of the legislature, did the gentleman also have an expression of opinion of the upper house?

Mr. HUMPHREYS of Mississippi. My understanding was it was passed by the house of representatives. I did not go into it any more accurately than that.

Mr. MANN. The gentleman from Mississippi was probably imposed upon by some advocate.

Mr. HUMPHREYS of Mississippi. I was not.

Mr. MANN. Then this House was imposed upon.

Mr. HUMPHREYS of Mississippi. If the House was imposed upon, it was imposed upon by me.

Mr. MANN. Of course nobody thinks that the gentleman from Mississippi would impose upon the House.

Mr. BENNET. The gentleman would not do a wrong in any way for the purpose of passing his bill.

Mr. HUMPHREYS of Mississippi. These resolutions were gathered by this Mississippi Levee Improvement Association, which has been conducting this propaganda throughout the country for the last several years, moving pictures, picture books, lectures, and every other means of reaching the people, and among other things it seems they got a lot of resolutions passed by various legislatures, and these were sent to Members of the House for their information.

Mr. MANN. Under the gentleman's frank?

Mr. HUMPHREYS of Mississippi. Under the gentleman's frank.

Mr. MANN. Well, the gentleman was imposed upon.

Mr. BENNET. Mr. Chairman, I ask unanimous consent—inasmuch as I did not have a chance to utter a single sentence—for five minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent for five minutes. Is there objection?

There was no objection.

Mr. BENNET. Because I wanted to pay my respect to this humorous volume which has been placed in my hands, entitled "The Mississippi River: Its Improvement and Flood Control, Declared to be a National Duty by Governors and State Legislatures."

I think it was Artemus Ward who said that he was perfectly willing to sacrifice his wife's relatives on the altar of his country's devotion; and as I read through this volume I am struck with the unanimity with which the governors of the States are willing to have the United States appropriate money. And in order that this may be embalmed in the CONGRESSIONAL RECORD, I wish to say that Gov. Spaulding, of New Hampshire, is in favor of having it done by the Federal Government. Gov. Beekman, of Rhode Island, cautiously thinks that the Federal Government "should do all in their power to preserve the channel of the Mississippi River"—so long as Rhode Island does not have to pay any of the money. Benjamin Gates, secretary of civil and military affairs for the State of Vermont, is directed by the governor to say, "The project is worthy of the attention of Congress." Charles R. Miller, governor of Delaware, is willing that this should be done through Congress. He is the governor of that great State which consists of three counties at low tide and two at high tide. [Laughter.] The governor of Kansas, without the concurrence of the house of representatives, says this presents "a problem which is worthy of the attention of the National Government"—still protecting the treasury of the State of Kansas. Our old friend L. B. Hanna, governor of North Dakota, is warm-hearted and enthusiastic about it. He says: "I will be glad, indeed, to see our National Government expend money sufficient to see that the floods which have devastated so much country in the South in times gone by might be entirely done away with." And that is before he took the trip abroad with Henry Ford. [Laughter.] Gov. Alexander, of Idaho, says, "It is to be hoped that Congress will see its way clear to provide such appropriation as may be necessary for the protection and reclamation of those valuable lands."

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. BENNET.. I will.

Mr. MOORE of Pennsylvania. Idaho is a great maritime State, too, is it not?

Mr. BENNET. Our old friend Frank Willis is heard, by saying: "This can be accomplished only by having the general management of the work under the control of the Federal Government. Assuring you of my interest in this worthy movement," and so forth.

G. W. Clarke, governor of Iowa, is anxious. He is in hopes "that Congress will consider this problem at an early date and provide the necessary means for the construction and maintenance of the required levees." Iowa is on board as long as the National Government pays for it. Wisconsin rather varies the monotony of the rest of the governors by indorsing the attitude of the gentleman from Wisconsin [Mr. FREAR] and says, through Gov. Philipp, "I hope this project will not suffer by being confused with the so-called 'pork-barrel' measures which apportion money upon a political basis without legitimate return." The governor is going to be disappointed, because all over this country this is going to be called a "pork-barrel" measure. I did not hear the speech of the gentleman from Wisconsin [Mr. FREAR], but I doubt that he is favoring the bill. Gov. Brewer, of Mississippi, is for the Old Flag and appropriations to the extent of a page of typewriting. Gov. Stuart, of Virginia, had a busy day, and gives us four lines, and simply says that he begs to say that he "regards the levee problem of the Mississippi River of such importance as to deserve the attention of Congress." The secretary of the governor of Colorado conveyed the distinguished consideration of the governor of that great State, and said that Gov. Carlson directed him to say that only the National Government is competent to deal effectively with the same. Gov. Trammell, of Florida, is sure that this thing can only be cared for by Congress at its next session. The governor of West Virginia, whose name I can not make out, but whose initials are "H. D. H.," or were on the 18th of August, 1913, and who may have changed his mind since, says, "I shall be glad to add whatever influence I have to bring about substantial support from the Federal Government."

Who is the governor of West Virginia?

Mr. GARD. Mr. Hatfield.

Mr. BENNET. Gov. Henderson, of Alabama, thinks that this is a national question.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BENNET. Mr. Chairman, I ask unanimous consent for three minutes more.

The CHAIRMAN. The gentleman from New York asks unanimous consent for three minutes more. Is there objection?

There was no objection.

Mr. CAREW. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. CAREW. Does the gentleman appreciate how much the time he is now occupying costs the National Government?

Mr. BENNET. No. I think I can discuss that with my colleague outside; and, incidentally, since my colleage has asked the question, I will say that the next letter, from the governor of the State of Indiana, can only be characterized by saying it is worthy of one of our recent Democratic governors of New York, our former colleague, Gov. Sulzer, at his best. I read it in full:

> Your letter was received during my absence on the coast, hence the delay in answering it.
>
> It is my judgment that those charged with the responsibility of taking steps looking to a proper solution of the Mississippi River problem will not have to be urged to do their duty. They understand what is required and will do what they can to make the people secure in their rights.
>
> Very truly, yours, SAMUEL M. RALSTON, *Governor.*

[Laughter.]

Gov. Curtis, of Maine, wants the whole country relieved from flood damages—also at the expense of the Federal Government.

The governor of Arkansas is naturally for the proposition.

The governor of Missouri does not have to be shown in relation to this matter. He says:

> I think the action should be Nation wide instead of being an expense to the few States bordering on the Mississippi River.

Where is the State of Missouri located? [Laughter.]

The governor of Georgia thinks that the United States alone is the proper body to take care of it. Shades of the representatives of State rights! [Laughter.]

And here is one letter from all the governors that shows thoughtful and careful consideration. It is from a man who served with distinction in this House. He was called from this floor to be governor of his State and is now, unfortunately, dead. It is our old friend, Gov. Hammond, of Minnesota. [Applause.] He says:

> In reply to your letter of May 11, let me say that I have always been in favor of Mississippi River improvement. The expenditures made in the past have not produced wholly encouraging results, but it seems to me that our engineers, with the experience they have had, can formulate a plan for the improvement of the river that will include very little of a temporary character, but, even though progress be slow, will make for permanence.
>
> Sincerely, yours, W. S. HAMMOND, *Governor.*

He expected our Committee on Flood Control to take its time and do a good job.

The governor of Oregon says he is in favor of getting something for Oregon first. [Laughter.] If this project does not interfere, he is for that, too. [Laughter.] His letter was written on the 21st of May, 1915. It is signed "James Lithycombe."

The governor of North Carolina, Locke Craig, writes:

> It is the duty of the General Government to preserve the channel of the Mississippi as a highway for commerce and to protect the lands of the valley from destruction by floods.

The governor of Tennessee says:

> The magnitude of the undertaking and the expanse of rich country to be preserved makes it a claim upon the Federal Government rather than upon States and small levee districts.
>
> LOUIS C. YE, *Governor.*

Then Connecticut, with proverbial caution, says, through its governor:

> Connecticut is probably as little affected by the conditions upon the Mississippi as any State in the Union, but I think that its people would willingly give their consent for the expenditure of national funds for the completion of the levee system.

Now, here is Pennsylvania, and there has been a little lack of correlation between the governor and at least one Representative of that State here in Congress. [Laughter.]

Mr. HUMPHREYS of Mississippi. Mr. Chairman, will the gentleman yield there?

Mr. BENNET. Yes.

Mr. HUMPHREYS of Mississippi. I want to call the gentleman's attention to the fact that the name of the governor of Tennessee is "Thomas C. Rye."

Mr. BENNET. I thought it was Rye, but I did not dare say "Rye," remembering that Tennessee was a dry State [Laughter.]

Now, the governor of Pennsylvania says this—and I want to have the attention of the gentleman from Pennsylvania [Mr. MOORE]. He says, through his secretary:

> The governor has directed me to say, in reply to your letter of May 13, that he will ask the Congressmen from Pennsylvania to act upon the matter mentioned, and that he hopes the money may be given, as he is in favor of the levee system of protection.

Mr. MOORE of Pennsylvania. I think he meant the system of protection to American industry. [Laughter.]

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. GALLAGHER. Has not the gentleman read enough to convince him?

Mr. BENNET. I have read enough to convince me that whenever it is a question of letting the National Government do it the governors of the States are unanimously willing, and also enough to indicate to this House what it seems to me is beneficial to indicate, and that is the ease with which men in high positions permit their names to be attached to documents recommending projects calling for millions of dollars, without giving one useful or careful thought to the matter. [Applause.]

Mr. BORLAND rose.

The CHAIRMAN. The gentleman from Missouri is recognized.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, before the gentleman proceeds, let us see if we can not read some of the bill. We have had now four hours and a half of debate. I want to see if we can reach some agreement by which we can at least read the first section of the bill before adjournment.

Mr. MANN. Have we not read the first section?

Mr. HUMPHREYS of Mississippi. No; we have read the first paragraph, not the first section.

Mr. MANN. It was to be read by sections.

Mr. HUMPHREYS of Mississippi. That was not the understanding. It was read by paragraphs.

Mr. MANN. It ought to be read by sections.

Mr. HUMPHREYS of Mississippi. Before the gentleman from Missouri proceeds, I want to ask unanimous consent that we read this first section. Then he can proceed.

Mr. DILLON. I have an amendment to offer on this paragraph.

Mr. MANN. Was there an agreement to read it by paragraphs?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. MANN. I am sorry about that.

Mr. HUMPHREYS of Mississippi. I did it under the assurance that gentlemen on that side should be given a vote. We have been just as clever as we possible could be.

Mr. MANN. We on this side are willing to close debate now.

Mr. HUMPHREYS of Mississippi. We do not want to close debate.

Mr. BORLAND. What is this—an amendment?

Mr. MANN. An amendment to the first paragraph.

Mr. BORLAND. I have no objection.

Mr. MANN. Does the gentleman from South Dakota want to discuss it?

Mr. DILLON. Briefly; and there may be others who may want to discuss it.

Mr. MANN. How much time does the gentleman want?

Mr. DILLON. Five minutes.

Mr. MANN. I suggest to the gentleman from Mississippi that he ask unanimous consent to close debate on the first paragraph in five minutes.

Mr. HUMPHREYS of Mississippi. I ask unanimous consent that debate on this paragraph be closed in five minutes.

The CHAIRMAN. The gentleman from Missouri [Mr. BORLAND] has been recognized.

Mr. BORLAND. Does the gentleman want to take my time?

Mr. DILLON. No; I want to speak on my amendment.

Mr. BORLAND. Then I suggest to the gentleman from Mississippi that he make it 10 minutes.

Mr. HUMPHREYS of Mississippi. I want to hear the gentleman's amendment. I do not know what it is. I will withhold my request for five minutes.

Mr. BORLAND. Mr. Chairman, I am very glad to give my support to this bill, although it does not directly solve the problems in which my section of the country is peculiarly interested. I know, however, that it is the forerunner of legislation which will solve the great flood problem of the Mississippi Valley.

I am for this bill for two reasons. In the first place, I believe that the overflow of the lower Mississippi Valley is a great national problem, which can be effectively dealt with only by Congress. I know that the people of the States affected have not lain idle and permitted this damage to come upon them without exerting to the utmost all of the physical and legal power that they had to prevent it. In spite of the facetiousness of some gentlemen who live safely beyond the Alleghenies, they must recognize the fact that the people in the Mississippi Valley who have had to contend against this flood condition have undoubtedly exerted themselves to the utmost to control the situation. So when they finally came to the conclusion that there is no control which holds out any hope of being effective except national control, their opinion is entitled to great weight.

In addition to that the gentleman from New York [Mr. BENNET] is wrong in assuming that because the Mississippi Valley States are urging this action upon Congress they have not contributed to the purpose out of their own State treasuries.

Mr. BENNET. Will the gentleman yield?

Mr. BORLAND. Very briefly. I have not much time.

Mr. BENNET. I never made any such statement. I know the contrary. They have contributed from their funds.

Mr. BORLAND. I want to assure the gentleman from New York that they have.

Mr. BENNET. I said that they had.

Mr. BORLAND. And especially I am familiar with the contributions of the State of Missouri, on the Missouri River, which forms one of the important parts of this problem, and which to-day is being leveed largely by levee districts organized under State law and existing under local taxation.

But in the brief time I am going to occupy I want to call your attention to the fact that I am for this proposition, not alone upon its individual merits, but because it recognizes a principle for which I have long contended—that the improvement of the interior of the country, the internal development of the country, is a matter of national interest. If we can reclaim this great body of land and make it productive and responsive to the growing wealth of the Nation, it is a matter of national benefit and national concern. More land can be reclaimed by levee construction in this country than can ever be reclaimed by the most expensive irrigations projects that can be adopted, and it can be reclaimed more cheaply, and it is better land after it is reclaimed. I know that in the past we have had to do this to an extent under the navigation clause of the river and harbor bill; but I am glad that Congress is frankly taking charge of the situation as an independent proposition, and solely upon the question of national interest in the reclamation of these lands and their restoration to the productive area of the country, their restoration to the food-producing and raw-material producing area of this country, looking upon it as a national proposition worthy of the attention of Congress.

Mr. FESS. Will the gentleman yield?

Mr. BORLAND. Briefly.

Mr. FESS. I want to ask whether the gentleman has any doubt as to the effectiveness of the work, and whether he can give us assurances that the money expended will not be wasted.

Mr. BORLAND. I do not pass on that from a technical standpoint. I know of no method that has ever been used except the levee method to control flood conditions, but I am in favor of reclamation from a national standpoint.

Mr. WHEELER. Mr. Chairman, it is a question in my mind whether I will support this bill. I am in a little doubt as to what effect it will have on the land lying along the Illinois River. There have been thousands and thousands of acres of land redeemed there, the most productive lands in the State to-day. They have expended anywhere from $75 to $100 per acre in redeeming the land by erecting dikes and levees 15 feet high, establishing pumping stations for pumping the surface water, and if this water along the Mississippi River is confined to the banks as proposed by experts and engineers who have gone over the situation, there is no question in my mind but what it will have a great effect on the water in the Illinois River.

Mr. MOORE of Pennsylvania. What does the gentleman mean, reduce the water level?

Mr. WHEELER. No; raise it up very materially, in my opinion; so much so that these lands will become overflowed, and, in fact, become worthless, because we have June floods there; and the question is, Who is going to pay the damages?

Mr. MOORE of Pennsylvania. Does the gentleman mean that the building of revetments below will tend to back the water up?

Mr. WHEELER. That is my contention; that is, the water in the Illinois River will be so retarded by confinement by the water in the Mississippi River that naturally it will take more time to empty the channel in the Illinois River, and it has got to seek a level somewhere.

Mr. BENNET. Do not some people say that building of bridges on a river obstructs the flow of the river to a certain extent?

Mr. MOORE of Pennsylvania. That has developed in inquiries on certain bridge bills.

Mr. FESS. Two large concrete bridges were built across the Miami, and when the flood came the débris lodged against it and the water backed up so that it turned the course of the water and it went down Third Street.

Mr. WHEELER. I do not contend that it is correct, but I would like to receive some information on it from those who have studied the Illinois River, built dikes and levees at enormous expense, and as to what the engineers say, because, as I said before, somebody is responsible in case that should happen. They are redeeming land every year, forming drainage districts, and if the flow is retarded in the Mississippi River it naturally means a retarding of the flow of the water of the Illinois River. I am of the opinion that the dikes there at present are not high enough to take care of additional water.

Mr. HUMPHREYS of Mississippi. Let me say that the levees of the lower regions of the Mississippi will have no effect at all on the Illinois River. They accelerate the flow.

Mr. WHEELER. But you receive the flow from the Missouri River and it will retard the flow of the Illinois River.

Mr. HUMPHREYS of Mississippi. The flow of the Mississippi is not retarded, and the effect of the improvement on the lower Mississippi on the Illinois River is absolutely nil.

Mr. WHEELER. Do I understand the gentleman to say that if they confine the water in the lower Mississippi it will not retard the flow in that river?

Mr. HUMPHREYS of Mississippi. No; it accelerates the flow. Mr. Chairman, I ask unanimous consent that we read the first section now, and then it will be in order to amend it.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent to complete the reading of the first section. Is there objection?

Mr. DILLON. I object; I want my amendment read.

The Clerk read as follows:

Page 1, line 3, strike out the words "Mississippi River and continuing its improvement from the Head of the Passes to the mouth of the Ohio River" and insert in lieu thereof the following: "Ohio, Missouri, and Mississippi Rivers and their tributaries."

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 10 minutes.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that all debate on this section and amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. DILLON. Mr. Chairman, as supplemental to what I have already said, I want to present the issue to this committee that if we are to have a drainage system we want one that will be considered from every standpoint. The impounding of the waters is the most material proposition before this Flood Committee, and you have entirely ignored every element of impounding of waters. Now, there is no good reason why we should not commence at the other end of this program and stop the flowing of the flood waters by impounding them and in that way you would benefit the lands along the Missouri as well as the lands lying along the Mississippi. You will never control the flood waters of these great streams unless you impound the waters, because the water will fall as sure as the night follows the day, and when you have great rains and the melting of snows, floods will follow all through this entire valley. It seems to me that we will be making a great mistake if you do not take into consideration these propositions. To do things by piecemeal will be a failure. I want to see this bill perfected so that we can all support it; simply doing it by sections, in the form of levees, will mean a miserable failure. I hope this amendment will be adopted, so that we all may be able to give this bill our support, but without such an amendment it is doubtful if I could support a bill of this character. [Applause.]

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I hope the amendment will not be agreed to. It provides for including here the Ohio and the Missouri Rivers and their tributaries, for not only controlling the floods in the Ohio and the Missouri Rivers, but also for continuing their improvement. Congress has already adopted a project for the improvement of the Ohio River, costing more than $60,000,000, which is now proceeding, and it has adopted a project for the improvement of the Missouri River, to cost $20,000,000, and that is proceeding. This amendment, if agreed to, will appropriate $45,000,000 for the improvement of the Ohio River——

Mr. DILLON. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. DILLON. The gentleman says that we have adopted a plan for the improvement of the Missouri River. Where does that come in?

Mr. HUMPHREYS of Mississippi. In the river and harbor appropriation bill.

Mr. DILLON. That is, from Kansas City to St. Louis?

Mr. HUMPHREYS of Mississippi. I can not yield any further.

Mr. DILLON. We have been trying to get a little appropriation up there and we have not been able to do it.

Mr. HUMPHREYS of Mississippi. To adopt this amendment would provide for appropriating $45,000,000 more for the improvement of the Ohio, which is already proceeding now under a plan to cost $60,000,000, and for the Missouri, which is already proceeding under a plan to the improvement to the extent of $20,000,000. It also would appropriate a portion of this $45,000,000 for the improvement of all of the tributaries of those rivers, without any survey or estimate. Nobody knows whether it will cost $45,000,000 or $145,000,000. I hope the committee will not agree to any such proposition. The Ohio River tributaries—the Wabash, the Miami, the Allegheny, the Monongahela—are now being surveyed with a view to the control of the floods. Those surveys are being made, and reports will be had on them next year, so Congress will know then what it will cost and will be able to determine whether Congress is able to undertake the control of the floods on these various tributaries. This proposition is without any survey, without any investigation whatever, just to undertake the control of the floods in all of the tributaries of the Ohio River and of the Missouri River, and, in addition to that, to undertake their improvement, and appropriate therefor $45,000,000.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from South Dakota.

The question was taken; and on a division (demanded by Mr. DILLON) there were—ayes 13, noes 30.

Mr. DILLON. Mr. Chairman, I suggest the absence of a quorum.

Mr. STAFFORD. Mr. Chairman, I hope the gentleman will not do that. We had an understanding to run until 5.30 o'clock.

Mr. DILLON. Mr. Chairman, I will withdraw the point of order for the time being, but I will say to the gentleman that I will put it in in some other form.

So the amendment was rejected.

The Clerk read as follows:

(b) That no money appropriated under authority of this section shall be expended in the construction or repair of any levee unless and until assurances have been given satisfactory to the commission that local interests protected thereby will contribute for such construction and repair a sum not less than one-third of such sum as may have been allotted by the commission for such work: *Provided*, That such contributions shall be expended under the direction of the commission, or in such manner as it may require or approve, but no contribution made by any State or levee district shall be expended in any other State or levee district except with the approval of the authorities of the State or district so contributing.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word with the idea of seeing if we can not come to some understanding. There are a number of gentlemen here who wish to offer amendments to this and to some of the succeeding paragraphs. Will the gentleman from Mississippi agree to have the remainder of the section read to the end, with the right to offer amendment to any of the respective paragraphs?

Mr. HUMPHREYS of Mississippi. That is entirely satisfactory.

Mr. LENROOT. I would rather finish this paragraph first.

Mr. HUMPHREYS of Mississippi. Let us read the section and then offer the amendments to the paragraphs.

Mr. LENROOT. With the understanding that as to this particular paragraph there shall be no attempt to cut off debate, that there shall be the same freedom as though it were read separately?

Mr. HUMPHREYS of Mississippi. Oh, yes.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the rest of section 1 may be read to the end with the right to offer amendments to any of the paragraphs beginning with line 15 on page 2.

The CHAIRMAN. Is there objection?

Mr. DILLON. Mr. Chairman, reserving the right to object, I would like to ask the gentleman whether he expects to close this paragraph so that we can not offer amendments next Wednesday?

Mr. STAFFORD. No; the very purpose is to allow amendments to be offered next Wednesday.

Mr. DILLON. If that is understood, I have not read this carefully, and I may want to offer some amendment.

Mr. STAFFORD. That is the very purpose, so that Members can prepare their amendments between now and Wednesday next, and they can be then discussed.

The CHAIRMAN. Is there objection?

Mr. LENROOT. Mr. Chairman, reserving the right to object——

Mr. MOORE of Pennsylvania. Mr. Chairman, reserving the right to object, I desire to know whether, if this agreement is entered into any gentleman can offer amendments to any one of these paragraphs if we read to the end of the section now?

Mr. STAFFORD. That is the understanding, beginning on line 15, page 2.

Mr. MOORE of Pennsylvania. Mr. Chairman, still reserving the right to object, there is this objection to that. The gentleman from Mississippi may want to limit the debate on amendments when that question arises, and that may put some gentlemen to a disadvantage.

Mr. STAFFORD. I would like to say to the gentleman from Pennsylvania, if the gentleman from Mississippi will permit, that this paragraph is one of the important paragraphs in the bill, and the amendments to be offered require consideration for some time and, perhaps, would require a larger membership in the discussion.

Mr. GARD. Why can not the unanimous-consent request include the offering of amendments before to paragraph A, which has been passed?

Mr. STAFFORD. That has already been passed, with opportunity to Members to offer amendment, but nobody saw fit, and I did not think it was right to go back and make the request include a paragraph that had been already read.

Mr. GARD. It is only part of one section, and intimately related.

Mr. HUMPHREYS of Mississippi. It has been read.

The CHAIRMAN. Is there objection?

Mr. BENNET. I object.

Mr. LENROOT. Mr. Chairman, I offer an amendment; in line 20, page 2, strike out the word "third" and insert the word "half."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 20, strike out the word "third" and insert the word "half."

Mr. LENROOT. Mr. Chairman, the amendment I propose, if adopted, would require the owner of the land or levee district, instead of paying one-fourth of the total cost, to pay one-third

of the total cost. Now, Mr. Chairman, when this committee was created we all recognized that the Speaker of this House was very influential in its creation, and you will remember that he made a speech in favor of the rule creating the committee. In that speech he advocated two things that he believed this Committee on Flood Control would do. He advocated two propositions that he believed would be a solution of this flood question, and the first one was that some means would be devised to curtail the flow of the streams, thus preventing these floods, and he used this language:

> The only thing to do, it seems to me, is to appoint a committee that will take the best advice it can get so that a system can be devised to curtail, if that is the word, the vast amount of water which goes down the rivers, overflowing the whole country, and make them go down more gradually.

Now, Mr. Chairman, the committee that has made this report—and I have examined it with some care—not only did not make a report upon that proposition, but it does not seem to have even considered it at all, for the admitted result of the proposition which is now before the House is that the waters will not be curtailed in their flow, but, on the contrary, will be accelerated, so that as to one of the propositions that the Speaker advances it not only has been abandoned by the committee, but has not even been considered by it. And we are now confronted with the other proposition, which is a reclamation proposition, and as to that the Speaker had this to say:

> Now, I do not believe that Congress is ever going to drain the public lands, or the private lands either, at public expense, but I will tell you what I believe it will do. It will rig up a scheme like the irrigation scheme except exactly the reverse as to the subject matter, by which these overflowed lands will be drained and the men who own the lands will pay for the drainage.

He says that the theory of irrigation is that the irrigation works will be completed and not cost the Government a single cent, and so forth. Now, in the report of the committee we find that up to this time private interests have contributed $3 in the building of levees on the lower Mississippi for every dollar that the Government has expended. In other words, in the proportion of 3 to 1 contributed by private interests. The United States Government has contributed $29,000,000 for the construction of levees and private interests $90,000,000. Now, this bill before us goes clear to the other extreme.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LENROOT. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent for five minutes more. Is there objection?

There was no objection.

Mr. LENROOT. Whereas private interests in the past have been contributing $3 for every dollar the Government has been contributing, and making splendid progress at that, now we propose that the Government shall contribute $3 for every dollar that private interests shall contribute. Now, it seems to me that that is an altogether unfair proposition. It is going altogether too far. And admitting, as I do, that the Government ought to contribute a portion of this cost for the reasons that have been suggested, the fact, nevertheless, remains that every acre of this land that is now overflowed will be increased tremendously in value by this improvement. And instead of the Government contributing $3 for every dollar that private interests contribute the contribution should at least be equal. But I have not even asked for that in my amendment. If my amendment is adopted, the Government will contribute $2 for every dollar that private interests contribute instead of $3, as is proposed in the pending bill.

Mr. GARRETT. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. GARRETT. Taking the amount that has heretofore been expended and the amount that is involved in this bil, will it not work out to about the basis that the gentleman suggests?

Mr. LENROOT. It may; but as I have listened to the debate, and I have been very much enlightened by it during the discussion, there are some portions of this river where the levees are completed entirely, and that get no benefit from this bill. Now, while you are really discriminating against those who have paid $3 for $1 of the Government where the work is completed, is it too much to ask that in that portion of the river where levees are still necessary that they shall pay at least $1 for every $2 that the Government contributes, whereas in the past they have had to pay $3 for every dollar that the Government has contributed?

Mr. GARRETT. I have only this suggestion to offer to the gentleman, if he will permit, and that is that this levee system must necessarily be one complete system in order to give the full relief that is necessary. It will be impossible to work out an absolutely equitable system on any basis, I will say to the gentleman.

Mr. LENROOT. I think that is true; but I do insist that where we propose, as would be in the case of my amendment, to pay $2 for every dollar contributed by the State, that that is certainly equitable, whereas in the past the States have contributed $3 for every dollar that the Government has contributed.

Now, it is said that they can not afford to pay any more. Why, Mr. Chairman, every one of us who lives in a city, especially in the case of street improvement, has seen case after case where property has been assessed and where the taxes can not be paid out of the income from that property, and they have been compelled to mortgage the property. In some cases it has actually been confiscated by taxation. But where the improvement increases the value of the property that is no reason why they should not make a fair contribution for the benefits actually received, because, perchance, they might have to mortgage their land in order to pay the assessment.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HUMPHREYS of Mississippi. I call the gentleman's attention to this: He quoted from the Speaker about the drainage of swamp lands. Gentlemen understand it is a fact that after this land is protected from overflow, of course it has to be drained. Every dollar of the drainage is borne by the local interests. The Government contributes nothing whatever to that. There are projects, as I stated a few moments ago, now in process of completion, that cost $40,000,000, in round figures, for drainage, but the Government is not asked to contribute anything whatever toward them.

Mr. LENROOT. Let us see about that. It has been stated during the debate that on a large portion of this river the river will be as high as 15 feet above the land upon either side, the levees protecting the lower land. These levees are themselves going to make drainage unnecessary. You are certainly not going to be able to drain from lowlands into the Mississippi River if the flow of the Mississippi is above the level of the water upon your lowlands.

Mr. HUMPHREYS of Mississippi. Of course you could not drain into higher water; but even if the levee is constructed by the local interests, you still could not drain over the levee into the river. That is certainly true. But whatever drainage has to be done has to be paid for exclusively by the owners.

Mr. LENROOT. There is no difference between us. The fact is when you have low water upon the Mississippi River a very large percentage of those lands will of themselves be drained, and thereafter the levees will protect them.

Mr. HUMPHREYS of Mississippi. They will be protected from overflow, but they have to be drained.

Mr. LENROOT. But they will drain without expense at low water, to a very large extent.

Mr. HUMPHREYS of Mississippi. No; you have to have these drainage projects. You have to have tremendous drainage projects. The drainage cost in my own county, for instance, is equal to $7 on every acre of land in that county.

Mr. LENROOT. That is a very trifling sum; lands worth absolutely nothing improved at $7 an acre expense, to make it worth $100 an acre, is not a very serious matter. The fact is that it is the building of these levees that will make the tremendous value of the land where you can at a comparatively small expense, after the building of the levees, drain them, and where without the levees you can not do anything with them.

Mr. HUMPHREYS of Mississippi. The gentleman is very much mistaken if the gentleman thinks by building levees and constructing drainage systems the land will be made worth $100 an acre. The fact is the land will be worth only half of that after the drainage has been completed and the land placed under cultivation and after the houses are put upon it. It is still worth only about $50 an acre.

Mr. LENROOT. Perhaps I was misled by some of the over-enthusiastic statements that have been made here to-day.

Mr. HUMPHREYS of Mississippi. It will cost from $35 to $40 an acre to put the land under cultivation. Then it will cost to drain somewhat more in certain places than in others. There is very little land in that country that can be sold for as high as $50 an acre.

Mr. LENROOT. Let me see if the gentleman's statements are correct. If they can not afford to pay $1 for every $2 which the Government pays, how in the past have they been

able to pay $3 to every $1 that the Government has contributed?

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I suggest that it is the proper time now to rise, and the gentleman can take the floor on the next occasion when the bill is under discussion.

Mr. HUMPHREYS of Mississippi. We will do that in a few minutes.

Mr. DENISON and Mr. CURRY rose.

Mr. HUMPHREYS of Mississippi. We have proceeded heretofore—that is, the Government has proceeded—by meager appropriations; that is, very small appropriations, and the fact is before us to-day that we have gone along at such a snail's pace that we have never been able to finish the levee system. The result has been that we would get the levees started and pretty well up, and then the floods would come on and destroy them, and we would then have to start all over again, because we had not proceeded expeditiously and completed them.

Now, if we are to proceed in a business way—and nobody doubts that the Government is going to continue in this enterprise, whether it appropriates a considerable sum or a small sum—we are going to stay in it until it is completed. Now, if we can go on in a business way we will have to appropriate, as is proposed in this bill, $6,000,000. That is the opinion of the commission; and it was the opinion of others who came before us that it was impossible for them to raise more than $2,000,000 to put into levees, because they would have to raise another million for rights of way, damages, administration, and things of that kind, and then they would have to pay a million and a quarter interest on the bonds already outstanding, and they could not raise any more money than that. Now, if we are going to require a larger proportion of contribution by them, the only way it can be accomplished will be by the Government spending less money. That will mean that we will proceed during the years as we have been proceeding, that these levees will be swept away by the next flood, that we will be called upon, as we were a few years ago, to spend a million and a quarter dollars down there after the flood of 1912 in relief matters. We spent a million dollars in the flood of 1913 in emergency work, which the commission says was not permanent; and in the last analysis we will spend more money than is contemplated by this bill; and instead of concluding the whole matter in the next five years we will stretch it out to the next 15 or 20 years, maybe; and instead of completing the levees at an expenditure of $30,000,000 on the part of the Government, they will cost $40,000,000 or more, probably $50,000,000.

Mr. LENROOT. May I ask the gentleman as to the method of raising this money? Is it by selling bonds?

Mr. HUMPHREYS of Mississippi. They have outstanding now $20,000,000 of bonds; and, then, they have anticipated their revenues to a considerable extent by ordinary debentures.

Mr. LENROOT. I want to ask the gentleman whether, by this Government going ahead expeditiously and with a full project, it will not be very much easier in the future to sell levee bonds than it has been in the past when the Government has been pursuing this haphazard policy?

Mr. HUMPHREYS of Mississippi. Undoubtedly it will; and it is contemplated in some of the districts, I know, that if this is done they may be able to float bonds. Most of them are already bonded now up to the limit; and, as I stated before, because of the fact that there was no assurance that they were going to complete the job investors were a little chary about buying the bonds, and the result is a very high rate of interest. It is their hope and expectation that they may be able to float bonds at a lower rate of interest. That is the way in which they expect to raise this money.

Mr. LENROOT. So the gentleman does not believe it will be more difficult to raise money in the future on the basis of $2 expenditure by private individuals and $1 by the Government than it has been in the past on the basis of $3 expenditure by private individuals and $1 by the Government?

Mr. HUMPHREYS of Mississippi. No; not on the basis proposed in the bill. I did not mean to be understood that the districts could not raise the money.

Mr. STAFFORD. Mr. Chairman, I suggest the absence of a quorum.

Mr. HUMPHREYS of Mississippi. I will say to the gentleman that, in compliance with my agreement with him, I was about to move that the committee rise.

Mr. STAFFORD. The Chairman was about to recognize another gentleman. If the gentleman is about to move that the committee rise, I will withhold the point.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CARAWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 14777) to provide for the control of the floods of the Mississippi River and of the Sacramento River, Cal., and for other purposes, and had come to no resolution thereon.

### LEAVE TO EXTEND REMARKS.

Mr. HUMPHREYS of Mississippi. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Mississippi asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

### HOUR OF MEETING TO-MORROW.

Mr. GARRETT. Mr. Speaker, I believe an agreement has already been made to meet at 11 o'clock to-morrow.

Mr. STAFFORD. No such agreement has been made.

The SPEAKER. No; it has not been made.

Mr. GARRETT. I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 a. m. to-morrow. Is there objection?

Mr. STAFFORD. Reserving the right to object, I do not think that it is customary to meet at 11 o'clock on unanimous-consent day, and to-morrow is given over to unanimous consent. As the leader of the minority left a few minutes ago, with the understanding that we should meet at 12, I think I shall be constrained to object.

Mr. GARRETT. I was under the impression that the agreement had already been made. I want to suggest to the gentleman from Wisconsin that the Unanimous Consent Calendar is pretty full, and I think we could expedite business very much.

Mr. STAFFORD. It has not been generally expected that we would meet at 11 o'clock, except on days when appropriation bills are being considered.

The SPEAKER. The Chair will state to the gentleman from Wisconsin that the Unanimous Consent Calendar now contains 8 pages, and the Chair has about 12 or 13 applications to suspend the rules.

Mr. GARRETT. It would relieve the situation very much.

The SPEAKER. Is there objection?

Mr. STAFFORD. I object.

### COMMITTEE ON ELECTIONS NO. 2.

Mr. RUSSELL of Missiouri. Mr. Speaker, I want to call up for immediate consideration the resolution which I send to the Clerk's desk pertaining to the business of the House.

The SPEAKER. Is it privileged?

Mr. RUSSELL of Missouri. I think so, but I will ask unanimous consent for the present consideration of the resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 222.

*Resolved*, That Election Committee No. 2 be permitted to sit during the sessions of the House for the remainder of the week while holding hearings on the election case of Horgan against Tinkham.

The SPEAKER. Is there objection?

There was no objection, and the resolution was agreed to.

### MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 5424. An act to construct a bridge in San Juan County, State of New Mexico.

The message also announced that the Senate had insisted upon its amendment to the bill (H. R. 6057) to amend section 14 of the reclamation extension act approved August 13, 1914, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. SMITH of Arizona, Mr. LANE, and Mr. JONES as the conferees on the part of the Senate.

### ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 759. An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof.

ADJOURNMENT.

Mr. FOSTER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 46 minutes p. m.) the House adjourned until to-morrow, Thursday, May 4, 1916, at 12 o'clock noon.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. GANDY, from the Committee on the Public Lands, to which was referred the bill (S. 3203) granting to the city of Lemmon, S. Dak., certain lands for reservoir purposes, reported the same with amendment, accompanied by a report (No. 625), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STOUT, from the Committee on the Public Lands, to which was referred the bill (S. 3646) to amend the act of February 11, 1915 (38 Stat. L., p. 807), providing for the opening of the Fort Assinniboine Military Reservation, reported the same with amendment, accompanied by a report (No. 626), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. TAYLOR of Colorado, from the Committee on the Public Lands, to which was referred the bill (S. 733) providing for patents to homesteads on the ceded portion of the Wind River Reservation in Wyoming, reported the same with amendment, accompanied by a report (No. 627), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. McCLINTIC, from the Committee on the Public Lands, to which was referred the bill (H. R. 12208) adding certain lands to the Teton National Forest, Wyo., reported the same without amendment, accompanied by a report (No. 628), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STEPHENS of Texas, from the Committee on Indian Affairs, to which was referred the bill (H. R. 14533) to authorize the Secretary of the Interior to issue a patent in fee simple to the district school board No. 112, of White Earth Village, Becker County, Minn., for a certain tract of land upon payment therefor to the United States in trust for the Chippewa Indians of Minnesota, reported the same without amendment, accompanied by a report (No. 629), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. PHELAN, from the Committee on Banking and Currency, to which was referred the bill (H. R. 15004) to provide capital for agricultural development, to create standard forms of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create financial agents for the United States, and for other purposes, reported the same without amendment, accompanied by a report (No. 630), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. PETERS, from the Committee on Claims, to which was referred the bill (H. R. 7504) for the relief of E. W. Rohmeling, reported the same without amendment, accompanied by a report (No. 631), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 1622) for the relief of Henry S. Royce, reported the same with amendment, accompanied by a report (No. 632), which said bill and report were referred to the Private Calendar.

Mr. CAPSTICK, from the Committee on Claims, to which was referred the bill (H. R. 12267) for the relief of Wallace L. Bell, reported the same without amendment, accompanied by a report (No. 633), which said bill and report were referred to the Private Calendar.

Mr. STOUT, from the Committee on the Public Lands, to which was referred the bill (S. 1741) for the relief of certain homestead entrymen for lands within the limits of the Glacier National Park, reported the same without amendment, accompanied by a report (No. 634), which said bill and report were referred to the Private Calendar.

Mr. PETERS, from the Committee on Claims, to which was referred the bill (H. R. 3894) for the relief of George H. Grace, reported the same without amendment, accompanied by a report (No. 635), which said bill and report were referred to the Private Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 1087) granting a pension to Henry N. Wilks; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 2783) granting a pension to Alexander Ellert; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 6235) granting an increase of pension to Dock J. Miller; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 14638) granting a pension to Michael P. Foley; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 15055) to correct the military record of Charles King; Committee on Military Affairs discharged, and referred to the Committee on Naval Affairs.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. OLDFIELD: A bill (H. R. 15311) to amend section 66 of the Judicial Code (36 Stat. L., p. 1104); to the Committee on the Judiciary.

By Mr. CONRY: A bill (H. R. 15312) fixing the compensation of inspectors of customs, and for other purposes; to the Committee on Expenditures in the Treasury Department.

By Mr. SLAYDEN: A bill (H. R. 15313) to provide for the removal of the Botanic Garden to Rock Creek Park and for its transfer to the control of the Department of Agriculture; to the Committee on the Library.

By Mr. WEBB: A bill (H. R. 15314) prohibiting threats against the President of the United States; to the Committee on the Judiciary.

By Mr. CARTER of Oklahoma: A bill (H. R. 15315) authorizing the Secretary of War to have made an appropriate investigation of the Washita and other rivers in southeastern Oklahoma, with a view to controlling floods; to the Committee on Flood Control.

By Mr. McGILLICUDDY: A bill (H. R. 15316) to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes; to the Committee on the Judiciary.

By Mr. HAYDEN: A bill (H. R. 15317) making an appropriation for drilling test wells for artesian water in the San Simon Valley, Ariz.; to the Committee on Appropriations.

By Mr. STEENERSON: A bill (H. R. 15318) granting the consent of Congress to the village and township of Hendrum, Norman County, Minn., and the township of Elm River, Traill County, N. Dak., to construct a bridge across the Red River of the North on the boundary line between said States; to the Committee in Interstate and Foreign Commerce.

By Mr. SCULLY: A bill (H. R. 15319) for the encouragement of the production of better horses for agricultural and military purposes; to the Committee on Agriculture.

By Mr. CONNELLY: A bill (H. R. 15320) providing for a site and public building for post-office and other Federal purposes at Hays, Kans.; to the Committee on Public Buildings and Grounds.

By Mr. STOUT: A bill (H. R. 15321) authorizing the allotment of lands to children on the Fort Peck Reservation, Mont.; to the Committee on Indian Affairs.

By Mr. HELGESEN: A bill (H. R. 15322) granting the consent of Congress to the Board of County Commissioners of Traill County, N. Dak., to construct a bridge across the Red River of the North; to the Committee on Interstate and Foreign Commerce.

By Mr. VOLSTEAD: Joint resolution (H. J. Res. 216) proposing to amend the Constitution of the United States to authorize the Congress to enact laws to define and limit the causes for divorce; to the Committee on the Judiciary.

By Mr. KEATING: Resolution (H. Res. 221) making certain inquiries of the Secretary of the Treasury; to the Committee on Expenditures in the Treasury Department.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ALLEN: A bill (H. R. 15323) granting an increase of pension to Frederick Brunner; to the Committee on Invalid Pensions.

By Mr. ASHBROOK: A bill (H. R. 15324) granting an increase of pension to Quincy A. Cheadle; to the Committee on Invalid Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 15325) granting an increase of pension to Nancy S. H. Goodwin; to the Committee on Invalid Pensions.

By Mr. CONRY: A bill (H. R. 15326) granting an honorable discharge to Isaac Matthew Edwards; to the Committee on Military Affairs.

By Mr. DOOLITTLE: A bill (H. R. 15327) granting an increase of pension to Clarinda Branch; to the Committee on Invalid Pensions.

By Mr. EAGAN: A bill (H. R. 15328) granting an increase of pension to Elijah Blackhurst; to the Committee on Invalid Pensions.

By Mr. EDMONDS: A bill (H. R. 15329) granting to Noble D. Preston brevet ranks of major and lieutenant colonel, United States Volunteers; to the Committee on Military Affairs.

By Mr. GOOD: A bill (H. R. 15330) granting an increase of pension to William Ellison; to the Committee on Pensions.

Also, a bill (H. R. 15331) granting an increase of pension to Margaret Westcott; to the Committee on Pensions.

By Mr. GREGG: A bill (H. R. 15332) for the relief of A. H. Stein; to the Committee on Claims.

By Mr. HILLIARD: A bill (H. R. 15333) granting a pension to Martin O. Larsen; to the Committee on Pensions.

By Mr. KEY of Ohio: A bill (H. R. 15334) granting a pension to Andy R. Fetter; to the Committee on Pensions.

By Mr. LAFEAN: A bill (H. R. 15335) granting an increase of pension to Joseph Walton; to the Committee on Invalid Pensions.

By Mr. MANN: A bill (H. R. 15336) for the relief of Lena R. McCauley; to the Committee on War Claims.

By Mr. RUSSELL of Missouri: A bill (H. R. 15337) granting a pension to Mary Cash; to the Committee on Invalid Pensions.

By Mr. SISSON: A bill (H. R. 15338) granting a pension to John F. Gilliam; to the Committee on Pensions.

By Mr. SMITH of Texas: A bill (H. R. 15339) waiving the age limit for admission to the Medical Corps of the United States Navy in the case of W. Culbert Lyon; to the Committee on Naval Affairs.

By Mr. STEPHENS of Texas: A bill (H. R. 15340) for the cancellation of the allotment and trust patent therefor of Agnes Small Head or Follows the Track, a deceased Crow Indian of Montana; to the Committee on Indian Affairs.

Also, a bill (H. R. 15341) to provide for the disposal of the inherited estate of Takes Across the Water, widow and sole heir of Looks At the Water, deceased allottee of the Crow Indian Reservation; to the Committee on Indian Affairs.

By Mr. TAGUE: A bill (H. R. 15342) granting a pension to Ann Riley; to the Committee on Pensions.

By Mr. TEMPLE: A bill (H. R. 15343) granting an increase of pension to Eli Hovis; to the Committee on Invalid Pensions.

By Mr. TOWNER: A bill (H. R. 15344) granting a pension to Ida Lillis Pettit; to the Committee on Invalid Pensions.

By Mr. WARD: A bill (H. R. 15345) granting an increase of pension to Ellen J. Stratton; to the Committee on Invalid Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of Chamber of Commerce of Honolulu, indorsing Senate bill 203 and House bill 11252; to the Committee on Education.

Also (by request), memorial of State Convention of Nevada Woman's Civic League, at Reno, favoring reporting the Susan B. Anthony amendment; to the Committee on the Judiciary.

Also (by request), memorial of Local Philadelphia, Socialist Party, indorsing House joint resolution 159; to the Committee on Labor.

Also (by request), memorial of Board of Aldermen of New York, favoring preparedness; to the Committee on Military Affairs.

Also (by request), petition of men and women of Sacramento, favoring the Sutherland-Mondell woman-suffrage amendment; to the Committee on the Judiciary.

By Mr. BAILEY: Petition of sundry voters of Fallen Timber, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. BEAKES: Petition of W. P. Elmore and 72 citizens of Jackson, Mich., protesting against the passage of House bills 491, 6468, and 13778; to the Committee on the Post Office and Post Roads.

Also, petition of Paul C. Rowlands and 24 citizens, of Jackson; J. C. Pullen and 47 citizens, of Belleville; Walter H. Smith and 37 citizens, of Monroe; Mrs. E. P. Jones and 28 citizens, of Ann Arbor and Saline; Luther E. Lovejoy and 43 citizens, of Wyandotte; Ann L. Potts and 16 citizens, of Cadmus; E. P. Munn and 24 citizens, of La Salle; Clark T. Woodward and 25 citizens, of Carleton; R. L. Scamehoon and 22 citizens, of Jackson; Rev. Edwin Ewell and 20 citizens, of Monroe County; Lynn A. Barrow and 20 citizens, of Adrian; M. S. Leadd and 23 citizens, of Adrian; J. C. Holser and 24 citizens, of Erie; the Presbyterian Sunday School of Cadmus; the North Street Methodist Episcopal Church, of Jackson; the North Rome Free Baptist Church, of North Rome; the adult members and voters of the Methodist Episcopal Church of Milan; the congregation of the Methodist Episcopal Church of Belleville, all in the State of Michigan, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of C. A. Wilkie and 24 citizens of Jackson County; Zearl Stoddard and 24 citizens of Lenawee County; William Colton and 51 citizens of Temperance; the Methodist Church of Alpena; the Baptist Sunday School of Temperance; 400 members of St. Paul's Methodist Episcopal Church, of Monroe; the First Methodist Church of Wyandotte; the Presbyterian Church and Sunday School of La Salle; the First Methodist Episcopal Church and Sunday School of Carleton; the Congregation and Sunday School of the Free Methodist Church of Jackson; the members of the Congregational Church and Sunday School of Maybee; the West Adrian Sunday School, of Adrian; the Friends' Church of Adrian; the Evangelical Sunday School of Erie; the Sabbath School of the Presbyterian Church of Erie; H. J. Gilbert and 40 citizens of Jackson; S. B. Huff and 35 citizens of Medina; and the Baptist Sunday School of Medina, all in the State of Michigan, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of Oliver Stroll and 100 citizens of Battle Creek; William J. Avery and 19 citizens of Moorepark; and Mrs. E. E. Merchant and 42 citizens of Paw Paw, all in the State of Michigan, protesting against the passage of House bills 491, 6468, and 13778; to the Committee on the Post Office and Post Roads.

By Mr. BRUCKNER: Memorial of Board of Aldermen of New York City, favoring House bill 6915; to the Committee on the Post Office and Post Roads.

Also, memorial of United Boards of Business Agents of New York City, indorsing Senate bill 3457 and House bill 8826; to the Committee on Naval Affairs.

Also, memorial of the Manufacturers' and Business Men's Association of Brooklyn, opposing House bills 8665 and 8677; to the Committee on Labor.

Also, petition of Samuel Baker, of New York, indorsing the Nolan bill; to the Committee on Labor.

Also, petitions of sundry citizens of The Bronx, in favor of the Stevens bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of Daniel J. Laverty, of New York, favoring pensions for superannuated postal employees; to the Committee on the Post Office and Post Roads.

Also, petition of Charles Lange, of New York City, favoring pensions for postal employees; to the Committee on the Post Office and Post Roads.

Also, memorial of Board of Aldermen of New York City, favoring preparedness; to the Committee on Military Affairs.

Also, petition of William A. Maguire, of The Bronx, N. Y., favoring House bill 9820; to the Committee on the Judiciary.

Also, petitions of sundry citizens, favoring House bill 8036; to the Committee on the Merchant Marine and Fisheries.

By Mr. BRUMBAUGH: Evidence to accompany House bill 6984, granting a pension to Mary A. McCann; to the Committee on Invalid Pensions.

By Mr. BURKE: Memorial of Evangelical Lutheran Immanuel's Church, of Lebanon; St. John's Church, of Random

Lake; Evangelical Lutheran Church of Herman; Conference of Evangelical Association, at Appleton; Rev. E. Buenger and citizens of Fredonia; Trinity Evangelical Lutheran Church, of Milwaukee; and Trinity Church of Herman, all in the State of Wisconsin, against war with Germany; to the Committee on Foreign Affairs.

By Mr. DALE of New York: Petition of women voters of Nevada, California, and Arizona, favoring suffrage amendment; to the Committee on the Judiciary.

Also, petition of United Military Order of America, relative to preparedness; to the Committee on Military Affairs.

Also, petitions of National Bank of Commerce and P. W. Brooks & Co., of New York City, relative to flood-control bill; to the Committee on Rivers and Harbors.

By Mr. DAVIS of Minnesota: Petitions of business men of the third congressional district of Minnesota, favoring bills taxing mail-order houses; to the Committee on Ways and Means.

By Mr. DAVENPORT: Petitions of the merchants of Nowata, Afton, Miami, and Chelsea, Okla., favoring the passage of House bills 270 and 712, providing for a tax on mail-order houses doing an interstate business; to the Committee on Ways and Means.

By Mr. ELSTON: Protest of Phoebe A. Hearst and others, against action of House Judiciary Committee with reference to Susan B. Anthony amendment; to the Committee on the Judiciary.

Also, petition of E. E. Parlin and other citizens of Alameda County, Cal., against House bills 491 and 6468, amending the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. FLYNN: Petitions of P. W. Brooks & Co. and National Bank of Commerce, all of New York City, relative to flood-control bill; to the Committee on Rivers and Harbors.

By Mr. FULLER: Petition of the Illinois Bankers' Association, favoring Senate bill 19, Pomerene bill-of-lading bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of the United Military Order of America, relative to preparedness; to the Committee on Military Affairs.

By Mr. GALLIVAN: Memorial of House of Representatives of Massachusetts, in re flood control; to the Committee on Flood Control.

Also, petition of sundry citizens of Massachusetts, favoring House bill 8665; to the Committee on Labor.

Also, memorial of John Devoy Branch, Friends of Irish Freedom, in re foreign relations; to the Committee on Foreign Affairs.

Also, petition of Ham Parsoom Obanian, of South Boston, Mass., favoring Senate resolution for assigning an Armenian relief day; to the Committee on Foreign Affairs.

By Mr. HADLEY: Petition of citizens of Benton County, Wash., against passage of House bill 13048, for juvenile court in the District of Columbia; to the Committee on the District of Columbia.

By Mr. HASTINGS: Petition of citizens of Muskogee, Okla., for continued neutrality of United States; to the Committee on Foreign Affairs.

By Mr. HILLIARD: Petition of 20 citizens of Denver, Colo., against the Taylor system in Government shops; to the Committee on Labor.

By Mr. HULBERT: Memorial of Board of Aldermen of New York City, relative to preparedness; to the Committee on Military Affairs.

By Mr. KAHN: Petition of citizens of San Francisco, Cal., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. KALANIANAOLE: Memorial of Chamber of Commerce of Honolulu, indorsing House bill 11252 and Senate bill 703; to the Committee on Rivers and Harbors.

Also, memorial of Chamber of Commerce of Honolulu, favoring including the College of Hawaii among the colleges benefiting by the Hatch Act; to the Committee on Agriculture.

Also, memorial of Chamber of Commerce of Honolulu, favoring the Newlands bill; to the Committee on Agriculture.

Also, memorial of Chamber of Commerce of Honolulu, in re trade conditions; to the Committee on Appropriations.

By Mr. LAFEAN: Memorial of Chamber of Commerce of Montgomery, Ala., favoring passage of the Shields bill; to the Committee on Interstate and Foreign Commerce.

By Mr. LIEB: Petition of E. E. Baker, George Appel, A. C. Koch, John Mominee, A. G. Eltonhead, John M. Koch, Albert Griese, Jesse Woods, J. C. Sutherland, John Coakley, Clarence Fehrenbach, William A. Herrscher, Oscar Miller, John C. Ruff, Carl Eberhart, Dello Turpen, H. C. Johnston, Thomas Simpson, Mrs. W. Packard, Mrs. F. Reishert, Fred Hohenberger, Charles Morell, George J. Mutschler, Mrs. Mary McGuire, Miss Lula Merritt, Earl V. Reese, Alexander Thomson, A. G. Ermling, A. A. Miller, Robert Leigh, Ralph Stevens, Charles Minch, Lawrence Hicks, Joe H. Kimburger, and W. Francis Jaus, all of Evansville, Ind., favoring House bill 8665; to the Committee on Labor.

By Mr. LOUD: Petition of A. Clabuesch and 190 other members of the Evangelical Lutheran Zion Church of Remus, Mich., protesting against any declaration of war with Germany; to the Committee on Foreign Affairs.

By Mr. McKINLEY: Petition of sundry citizens of the State of Illinois, against the Taylor system in Government shops; to the Committee on Labor.

By Mr. MAGEE: Petition of sundry citizens of Syracuse, N. Y., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. MAPES: Petition of 16 citizens of Grand Rapids, Mich., against the Taylor system in Government shops; to the Committee on Labor.

By Mr. MATTHEWS: Evidence in support of House bill 15251, to increase pension of Albert Fuller; to the Committee on Invalid Pensions.

By Mr. MILLER of Minnesota: Petition of sundry citizens of Carlton, Minn., against passage of the Moss-Hollis rural-credits bill; to the Committee on Banking and Currency.

By Mr. NOLAN: Petition of Building Trades Council of San Francisco, Cal., transmitting resolutions in opposition to war; to the Committee on Foreign Affairs.

By Mr. O'SHAUNESSY: Memorial of German-Americans of Rhode Island, in reference to shipment of Red Cross supplies; to the Committee on Foreign Affairs.

Also, memorial on postalizing the wires; to the Committee on the Post Office and Post Roads.

Also, memorial of sundry organizations of Rhode Island, favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of the State of Rhode Island, favoring adequate military preparedness; to the Committee on Military Affairs.

Also, petitions of sundry citizens, favoring House bill 5757; to the Committee on Reform in the Civil Service.

Also, petition of sundry citizens of the State of Rhode Island, against the Taylor system in Government shops; to the Committee on Labor.

Also, petition of John F. McEvoy, of Providence, R. I., in re foreign relations; to the Committee on Foreign Affairs.

Also, petition of sundry citizens of Rhode Island, favoring House bill 8665; to the Committee on Labor.

Also, petition of James H. Young, of Edgewood, R. I., indorsing Senate bill 4784; to the Committee on Education.

By Mr. RANDALL: Memorial of women of Sacramento, Cal., urging woman suffrage; to the Committee on the Judiciary.

By Mr. ROGERS: Petition of sundry citizens, opposing becoming involved in the European war; to the Committee on Foreign Affairs.

By Mr. SMITH of Michigan: Petition of Burt Walker and 26 other citizens of Battle Creek, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, additional papers to accompany House bill 14897, in pension case of Eliza C. Spears; to the Committee on Invalid Pensions.

By Mr. STAFFORD: Protest of the Trinity Evangelical Lutheran Church, against the passage of House bills 6468 and 491; to the Committee on the Post Office and Post Roads.

By Mr. VARE: Memorial of Chiropody Society of Pennsylvania, in favor of the regulation of podiatry or chiropody in the District of Columbia; to the Committee on the District of Columbia.

Also, memorial of Civic Club of Philadelphia, relative to the erection of the central power plant, Washington, D. C.; to the Committee on the District of Columbia.

Also, memorial of Wharton Street Methodist Episcopal Church members, favoring amendment to the United States Constitution prohibiting polygamy; to the Committee on the Judiciary.

Also, memorial of Union Veteran Legion, in support of widows' pension bill No. 11707; to the Committee on Invalid Pensions.

By Mr. WASON: Petition of R. E. Lufkin, of Quaker City, N. H., and 17 other residents, all of the second New Hampshire congressional district, favoring the adoption of a prohibition amendment to the Constitution; to the Committee on the Judiciary.

Also, petition of F. H. Britton, of Claremont, N. H., and 16 other residents, all within the second New Hampshire congressional district, favoring the adoption of a prohibition amendment to the Constitution; to the Committee on the Judiciary.

By Mr. WHALEY (by request): Petition of Miss Susan Furt and others, in favor of Susan B. Anthony amendment; to the Committee on the Judiciary.

## SENATE.

THURSDAY, *May 4, 1916.*

*(Legislative day of Wednesday, May 3, 1916.)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

### RURAL CREDITS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create Government depositaries and financial agents for the United States, and for other purposes.

Mr. HOLLIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Harding | Newlands | Smoot |
| Bankhead | Hollis | Norris | Sterling |
| Beckham | Hughes | O'Gorman | Sutherland |
| Brady | Husting | Oliver | Swanson |
| Brandegee | James | Overman | Taggart |
| Broussard | Johnson, Me. | Page | Thomas |
| Chamberlain | Johnson, S. Dak. | Phelan | Thompson |
| Clapp | Jones | Pittman | Tillman |
| Culberson | Kenyon | Ransdell | Townsend |
| Cummins | Kern | Reed | Underwood |
| Curtis | La Follette | Shafroth | Vardaman |
| Dillingham | Lodge | Sheppard | Walsh |
| du Pont | Martin, Va. | Sherman | Williams |
| Fall | Martine, N. J. | Simmons | Works |
| Gallinger | Myers | Smith, Ga. | |
| Gronna | Nelson | Smith, S. C. | |

Mr. HOLLIS. I desire to announce that the Senator from Delaware [Mr. SAULSBURY], the Senator from Arkansas [Mr. ROBINSON], and the Senator from West Virginia [Mr. CHILTON] are absent on official business.

Mr. GALLINGER. I wish to announce the enforced absence of the Senator from Maine [Mr. BURLEIGH] on account of illness in his family.

Mr. KERN. I desire to announce the absence on official business of the senior Senator from Florida [Mr. FLETCHER] and the unavoidable absence on account of sickness of the junior Senator from Illinois [Mr. LEWIS]. These announcements may stand for the day.

The VICE PRESIDENT. Sixty-two Senators have answered to the roll call. There is a quorum present. The pending amendment is the amendment proposed by the Senator from Iowa [Mr. CUMMINS] to strike out section 29 of the bill.

Mr. WALSH. Mr. President, I rise to submit some remarks upon the very interesting questions presented by the addresses of the Senator from Utah [Mr. SUTHERLAND] and the Senator from Iowa [Mr. CUMMINS]. They have raised the question whether section 29 can be constitutionally sustained, and to my mind that involves the question as to whether the act as a whole can be sustained. The two questions, as I view the matter, being bound up in each other, the seriousness of the question, then, is quite obvious.

Mr. President, it has been repeatedly asserted that this bill is not workable; that it is doomed to failure. The same charge was made with respect to the Federal reserve act. We were told again and again that it was a piece of complicated machinery that would inevitably fall of its own weight; that it would not have the confidence of the business public.

So, Mr. President, predictions that if this pending measure becomes a law it will be a total failure are made by those who rather hope that it will be; and of course whether it is successful or not will depend very largely upon the question whether it is, in the popular mind at least, a constitutional exercise of the power of Congress.

The very complete discussion of these questions by the Senator from New Hampshire [Mr. HOLLIS], who with singular ability has presented this bill to the Senate, practically leaves nothing to be said, and my only excuse for detaining the Senate longer in the discussion of this subject is that something further might aid in dispelling any apprehensions that may have been excited by reason of the comments of these two distinguished Senators, both of them recognized as among the ablest lawyers of this body.

I think, Mr. President, it is rather strange that the Senator from Utah, in the discussion of this subject, should have confined his comment to principles which he thought were supported by the early United States Bank cases and the latter cases dealing with the question whether the property of railroad corporations charged with public functions was exempt, and wholly failed to call the attention of the Senate to the later decisions dealing with the constitutionality of the national bank act and the exemption to which national banks and the property of national banks is entitled under the Constitution and under the statutes.

One would naturally think that when the National Government, in the year 1863, undertook to establish one system of national banks and when now, in the year of grace 1916, it undertakes to establish another system of national banks the question of the constitutionality of this measure would be most safely resolved by a careful study of the decisions construing the act of 1864. Yet this did not receive even a passing notice, as my recollection now serves me, from the distinguished Senator from the State of Utah. They are in great number, among others the Deering case in Ninety-first United States, to which the attention of the Senator was called by the Senator from New Hampshire [Mr. HOLLIS], and the Owensboro case, to which his attention was first invited by the Senator from Illinois [Mr. LEWIS] and later by the Senator from Kansas [Mr. THOMPSON].

As the opinion in that case put into the RECORD yesterday, reported in One hundred and seventy-third United States, a modern case, was decided at a time when the court had before it all the earlier decisions to which the attention of the Senate was invited by the distinguished Senator from Utah, I think it would be wise to direct our attention first to that last general declaration upon the subject and see if we can not make some progress from that as a basis toward determining the question that is now presented concerning this bill.

That was a case in which the constitutionality of a statute of the State of Kentucky was considered, a statute which made the franchises of banks taxable. A later decision of the Supreme Court recites that it presented as well the question whether the property of the bank is taxable, and the opinion in the case, laying down in perfectly clear and positive terms the rule that no property of a national bank is taxable except where it is made so by the act of Congress, was in a way brushed aside on yesterday by remarking that the language is to be considered in connection with the facts, that the question under consideration was the taxability of the franchise.

I invite the attention of the Senate now to the language of the opinion in that case by the Chief Justice. I read from page 667 of One hundred and seventy-third United States, as follows:

> Early in the history of this Government, in cases affecting the Bank of the United States, it was held that an agency, such as that bank was adjudged to be, created for carrying into effect national powers granted by the Constitution, was not in its capital, franchises, and operations subject to the taxing powers of a State. (McCulloch *v.* Maryland, 4 Wheat., 316; Osborn *v.* Bank of the United States, 9 Wheat., 738.)
>
> The principles settled by the cases just referred to and subsequent decisions were thus stated by this court in Davis *v.* Elmira Savings Bank (161 U. S., 283):
>
> National banks—

National banks. We are creating national banks here—

> National banks are instrumentalities of the Federal Government, created for a public purpose, and, as such, necessarily subject to the paramount authority of the United States. It follows that an attempt by a State to define their duties or control the conduct of their affairs is absolutely void, wherever such attempted exercise of authority expressly conflicts with the laws of the United States, and either frustrates the purpose of the national legislation or impairs the efficiency of these agencies of the Federal Government to discharge the duties for the performance of which they were created. These principles are axiomatic and are sanctioned by the repeated adjudications of this court.

So far for the Elmira Savings Bank case. Then the Chief Justice concludes:

> It follows then necessarily from these conclusions that the respective States would be wholly without power to levy any tax, either direct or indirect, upon the national banks, their property, assets, or franchises, were it not for the permissive legislation of Congress.

Not only their franchises, Senators, but their property, their assets. The court continues:

> The first act providing for the organization of national banks, passed February 25, 1863 (c. 58, 12 Stat., 665), contained no grant of power to the States to tax national banks in any form whatever. Doubtless the far-reaching consequence to arise from depriving the States of the source of revenue which would spring from the taxation of such banks, and the error of not conferring the power to tax, early impressed itself upon Congress, for the following year, act of June 3, 1864 (c. 106, 13 Stat., 99), power was granted to the States, not to tax the banks, their franchises, or property, but to tax the shares of stock in the names of the shareholders.
>
> This provision subsequently was amended and supplemented in various particulars (act of Feb. 4, 1868, c. 6, 15 Stat., 34), and the result of this legislation is embodied in section 5219 of the Revised Statutes, which is as follows:
>
> "SEC. 5219. Nothing herein shall prevent all the shares in any association from being included in the valuation of the personal property of the owner or holder of such shares, in assessing taxes imposed by authority of the State within which the association is located; but the legislature of each State may determine and direct the manner and place of taxing all the shares of national banking associations located within the State, subject only to the two restrictions—that the taxation shall not be at a greater rate than is assessed upon other moneyed

capital in the hands of individual citizens of such State, and that the shares of any national banking association owned by nonresidents of any State shall be taxed n the city or town where the bank is located and not elsewhere. Nothing herein shall be construed to exempt the real property of associations from either State, county, or municipal taxes to the same extent, according to its value, as other real property is taxed."

The court then says:

This section, then, of the Revised Statutes is the measure of the power of a State to tax national banks, their property, or their franchises. By its unambiguous provisions the power is confined to a taxation of the shares of stock in the names of the shareholders and to an assessment of the real estate of the bank. Any State tax, therefore, which is in excess of and not in conformity to these requirements is void.

So that I think, Mr. President, we must accept as law that no property of any of the national banks is subject to taxation, except its real estate, and except that a tax may be levied upon the shares of each stockholder assessable against him, but payable by the bank as the agent for the shareholder, the amount being collectible at the source.

Therefore, Mr. President, I think we can not accept the doctrine that was asserted on yesterday that, if a national bank should loan money upon the security of a herd of cattle and it became necessary to reduce its security and to sell the cattle, or if it seized the cattle under an attachment or execution and sold them and bought them in—I think we can not assent to the proposition that those cattle would be to any extent subject to taxation.

Mr. President, the national banks under the late amendment are now authorized to loan money to a limited extent upon farm mortgages. Those farm mortgages are its property exactly the same as are the farm mortgages to be taken under the provisions of the bill under consideration the property of the banks that shall hold them. Unquestionably the mortgages now held by national banks upon farm property are exempt from taxation. The bank pays taxes upon the real estate which it owns, and it pays those taxes just simply because Congress has permitted the State to tax the property of the banks to that extent, and no further.

So, Mr. President, the question that is now addressed to us touching the taxability by the State of the stock of the banks, of the bonds issued by the banks, of the mortgages taken by the banks, and held as security for those bonds, resolves itself into a question simply as to whether or not there is any essential and material difference, so far as this question of taxability is concerned, between the national banks established and created under the acts of 1863 and 1864, and the national banks which we propose to create under this act.

Mr. SUTHERLAND. Mr. President, may I ask the Senator from Montana a question?

Mr. WALSH. Certainly.

Mr. SUTHERLAND. The case to which the Senator has been referring, the case of Owensboro National Bank against Owensboro, I think recognizes the authority of the decision of the court in the McCulloch case. Is that the view of the Senator from Montana?

Mr. WALSH. It clearly says so. It says that the national-bank act was sustained upon the authority of the McCulloch case.

Mr. SUTHERLAND. But I understand the Senator from Montana to cite the Owensboro case as authority for the proposition that the State would be without power to tax any of the property of a national bank unless it were expressly permitted by the act of Congress to do so?

Mr. WALSH. The Senator from Utah has stated my position correctly. I have simply quoted the language of the opinion.

Mr. SUTHERLAND. I ask the Senator from Montana how he reconciles that conclusion with the statement in the McCulloch case, which the Senator now says is the basis for the decision in the Owensboro case, that the decision in that case, namely, the McCulloch case, does not extend to "a tax paid by the real property of the bank in common with the other real property within the State, nor to a tax imposed on the interest which the citizens of Maryland may hold in this institution, in common with other property of the same description throughout the State." In other words, as I construe that language, and as I construe the decision in the McCulloch case, Chief Justice Marshall held that the notes which were issued by the bank were not subject to taxation; that, as a matter of implication, the State could not tax those instrumentalities; but Chief Justice Marshall held in the McCulloch case, as I understand, that the State could tax the real property of the bank in common with the real property of the citizens of the State, and that the State could tax the shares of stock held in that institution by the citizens of Maryland. In the act creating the United States bank there was no provision permitting the State to tax that species of property, and yet the court held that it was taxable by the State.

Mr. WALSH. Mr. President, I will say, in answer to the Senator from Utah, that I do not feel called upon to attempt to reconcile the decision made by the Supreme Court of the United States in the Owensboro case, decided in the year 1898, with some furtive and casual comment that was made in the McCulloch case away back in 1819.

I desire to say further, in connection with this matter, that, of course, the McCulloch case has frequently been reviewed and applied by the Supreme Court of the United States; and I can call your attention again and again to declarations by the court in later cases to the effect that the conclusion at which the court arrived in this case may seem to be not entirely in harmony with some of the declarations of the court in the McCulloch case.

The Senator from Utah referred, in the course of his discussion, to the railroad cases, to which I shall presently advert—the Peniston case and the Thompson case. In the Thompson case the court said "it is true that the remarks made in the course of the opinion in the McCulloch case are probably inconsistent with the conclusion that we arrive at here," but they then went on to say that, however that might be, they reached the conclusion which they did.

So, Mr. President, I do not feel called upon at this time to endeavor to reconcile these clear declarations of the Supreme Court of the United States within our own time, a matter of less than 20 years ago, that none of the property of national banks is taxable except by permission of Congress, with some declarations that may be found in these earlier cases. I shall, however, discuss the railroad cases presently.

I proceed in this connection to say that the court has recognized a vast difference between a bank created by act of Congress and even a railroad corporation, the business of which is the transportation of articles in commerce, with the incidental obligation to carry the mails and military supplies of the Government. But the point I want to address your attention to now is that it was held in the McCulloch case and in the Osborn case, in 1819 and 1823, that a bank is a proper instrumentality for the purpose of carrying out the fiscal operations of the Government. Now, bear in mind, not that bank, not the bank constituted as was the original United States bank, incorporated in 1791 or reincorporated in 1811, but that a bank is a necessary and convenient instrumentality for the purpose of carrying on the fiscal operations of the Government; and apparently this is what is meant by what is said in those cases, that the Government is obliged to have revenue in order to carry on its operations; that it must collect that revenue from time to time; and that it must have a convenient place in which it can deposit that revenue until it shall desire to use it. Likewise it is a fair inference from all of those decisions that it was the conclusion of the court in these early days, as well as of the statesmen who considered it in those times, that the Government would want to borrow money from time to time, and the little banks, private affairs or established under State authority, might not have the funds that would enable the Government to meet its necessities in times of emergency, and that therefore it had a right to create a bank from which it could conveniently borrow large sums of money when it had occasion to do so. Therefore I take it that these earlier decisions declared that the Congress has a right to create a bank.

You will bear in mind that the original United States bank act contemplated the immediate assistance of the Government financially. Doubtless that was one of the factors which entered into the creation of the national banks under the act of 1863 and 1864, but I want to invite your attention to the fact that that was not regarded by the court in any of these cases as an essential consideration in the power to create a bank. The original United States bank act provided, among other things, that a portion of the capital, 20 per cent, should be subscribed by the Government of the United States. It also provided that a portion of the subscriptions of the subscribers to the capital stock should be paid in bonds issued by the Government of the United States, thus making a market for those bonds. Likewise it had the power to issue bills, which, although not legal tender, were accepted in payment of obligations due to the United States and passed current as money, much the same as our national-bank bills do; but that was not considered as a necessary ingredient, as a necessary power, to give to this bank in order that the act should have a constitutional basis. The mere question was whether the United States had the right to organize a bank.

Let me call your attention to the language of the McCulloch case and the Osborn case. I quote first from the opinion of

Chief Justice Marshall in the McCulloch case, reading from page 422:

If a corporation may be employed, indiscriminately with other means, to carry into execution the powers of the Government, no particular reason can be assigned for excluding the use of a bank, if required for its fiscal operations. To use one must be within the discretion of Congress, if it be an appropriate mode of executing the powers of government. That it is a convenient, a useful, and essential instrument in the prosecution of its fiscal operations is not now a subject of controversy. All those who have been concerned in the administration of our finances have concurred in representing its importance and necessity—

Simply a bank—

and so strongly have they been felt that statesmen of the first class, whose previous opinions against it had been confirmed by every circumstance which can fix the human judgment, have yielded those opinions to the exigencies of the Nation. Under the confederation Congress, justifying the measure by its necessity, transcended, perhaps, its powers to obtain the advantage of a bank; and our own legislation attests the universal conviction of the utility of this measure. The time has passed away when it can be necessary to enter into any discussion in order to prove the importance of this instrument as a means to effect the legitimate objects of the Government.

But were its necessity less apparent, none can deny its being an appropriate measure; and if it is, the decree of its necessity, as has been very justly observed, is to be discussed in another place. Should Congress, in the execution of its powers, adopt measures which are prohibited by the Constitution, or should Congress, under the pretext of executing its powers pass laws for the accomplishment of objects not intrusted to the Government, it would become the painful duty of this tribunal, should a case requiring such a decision come before it, to say that such an act was not the law of the land. But where the law is not prohibited and is really calculated to effect any of the objects intrusted to the Government, to undertake here to inquire into the decree of its necessity would be to pass the line which circumscribes the judicial department and to tread on legislative ground. The court disclaims all pretensions to such a power.

Then, Mr. President, I assert that the Supreme Court of the United States in the McCulloch case did not say that only a bank having the power to issue bills that shall pass current as money is within the power of Congress to create; it did not say that a bank a portion of whose capital stock is paid for by Government bonds is a governmental instrumentality and the creation of such a bank as that is within the power of Congress; it did not say that a bank that agrees to lend money to the Government of the United States is an instrumentality within the power of Congress to create; but it said that a bank is a convenient and a necessary agency and instrumentality in order that the Government might carry on its ordinary fiscal operations, and that, therefore, the power to create it is impliedly granted to Congress; and that was what was said in the Osborn case. In that case the court said, referring to the Ohio law which challenged the act of Congress:

Is that law unconstitutional? This point was argued with great ability, and decided by this court, after mature and deliberate consideration, in the case of McCulloch *v.* State of Maryland. A revision of that opinion has been requested, and many considerations combine to induce a review of it. The foundation of the argument in favor of the right of a State to tax the bank is laid in the supposed character of that institution. The argument supposes the corporation to have been originated for the management of an individual concern, to be founded upon contract between individuals, having private trade and private profit for its great end and principal object. If these premises were true, the conclusion drawn from them would be inevitable. This mere private corporation, engaged in its own business, with its own views, would certainly be subject to the taxing power of the State, as any individual would be; and the casual circumstance of its being employed by the Government in the transaction of its fiscal affairs would no more exempt its private business from the operation of that power than it would exempt the private business of any individual employed in the same manner. But the premises are not true: the bank is not considered as a private corporation, whose principal object is individual trade and individual profit, but as a public corporation, created for public and national purposes. That the mere business of banking is in its own nature a private business, and may be carried on by individuals or companies having no political connection with the Government, is admitted; but the bank is not such an individual or company. It was not created for its own sake or for private purposes. It has never been supposed that Congress could create such a corporation. The whole opinion of the court in the case of McCulloch *v.* State of Maryland is founded on and sustained by the idea that the bank is an instrument which is "necessary and proper for carrying into effect the powers vested in the Government of the United States." It is not an instrument which the Government found ready-made and has supposed to be adapted to its purposes, but one which was created in the form in which it now appears, for national purposes only. It is undoubtedly capable of transacting private as well as public business. While it is the great instrument by which the fiscal operations of the Government are effected, it is also trading with individuals for its own advantage.

Mr. President, the question that addresses itself to us is, To what extent are these principles affected, to what extent are they modified, to what extent are they overruled by the railroad cases to which your attention has been called at some length?

In the ninth volume of the compilation known as the Federal Statutes Annotated is a paragraph which, to my mind, quite clearly points out the distinction between the two classes of cases, and it is this: That in the case of the bank, that is in itself an instrumentality of the National Government. The conclusion is to be drawn, even though it were not expressed, as was the case in the United States Bank, that the National Government did not intend that the States should tax these banks any further than it allowed them to tax them; but when it came to create a great railroad corporation that was given a great grant by the Government of the United States of lands constituting an empire, that accumulated an enormous amount of property only incidentally used for public purposes, the conclusion was to be drawn, if Congress was silent upon the matter, that it intended to allow the States to tax the property of these corporations; and the conclusion was drawn that they were subject to taxation because Congress had not in the acts creating them declared, in effect, that their property should not be subject to taxation.

I read as follows from page 232 of the volume to which I have referred:

Congress may, in the exercise of powers incidental to the express powers conferred, make or authorize contracts with individuals or corporations for services to the Government; may grant aid by money or land, in preparation for, and in the performance of, such services; may make any stipulation and conditions in relation to such aid not contrary to the Constitution; and may exempt, in its discretion, the agencies employed in such services from any State taxation which will really prevent or impede their performance. But because of the advancement by the Government of large sums in aid of the construction of the railroad, and the making of large grants of land upon no condition of benefit to itself, except that the company will perform certain services for full compensation independently of those grants, it can not be claimed that the railroad, owing its being to State law, and indebted for these benefits to the consent and active interposition of the State legislature, has a constitutional right to hold its property exempt from taxation—

Now, observe—

without any legislation on the part of Congress which indicates that such exemption is deemed essential to the full performance of its obligations to the Government.

And that fully sustains the view expressed by the Senator from New Hampshire [Mr. HOLLIS] that the property of these corporations would be exempt from taxation if Congress had so declared. Indeed, Mr. President, I want to call the attention of the Senators to a most important fact in that connection.

The case of Thompson against Railroad Co., in Ninth Wallace, presented the case of a corporation created under the laws of a State, but invested with powers and duties of a national character, and enjoying aid by land grants and otherwise from the General Government. The case of Railroad Co. against Peniston, reported in Eighteenth Wallace, was the case of a corporation created by act of Congress for the conduct and operation of a railroad, and it was held that its general property likewise was subject to taxation by the State. Mr. Justice Swayne was one of the judges concurring in the opinion of the court in that case. He filed a separate opinion, as follows:

Mr. Justice SWAYNE (concurring in the judgment): I concur in the affirmance of the judgment in this case. I see no reason to doubt that it was the intention of Congress not to give the exemption claimed. The exercise of the power may be waived. But I hold that the road is a national instrumentality of such a character that Congress may interpose and protect it from State taxation whenever that body shall deem it proper to do so. For some of the leading authorities in support of the principle involved in this view of the subject, I refer to the Chicago & Northwestern Railway *v.* Fuller, decided by this court a short time ago.

And then three other judges—Bradley, Field, and Hunt—dissented absolutely from the opinion.

In the Thompson case some reference was made to the same thing.

But, Mr. President, this question of the taxability of the property of the Pacific Railroad companies created under the act of Congress, or of those railroad corporations created by virtue of the laws of certain States, but granted aid by Congress in discharging Federal functions, was likewise under consideration in a modern case. I refer to the case of Central Pacific Railroad Co. against State of California, reported in One hundred and sixty-second United States, and decided in 1895. The court in that case reaffirmed the doctrine that the property of that railroad company was subject to taxation; but the court said, in the course of the opinion, as follows:

Of course, if Congress should think it necessary for the protection of the United States to declare such property exempted, that would present a different question. Congress did not see fit to do so here, and unless we are prepared to overrule a long line of well-considered decisions, the case comes within the rule therein laid down. Although in Thomson's case it was tangible property that was taxed, that can make no difference in principle, and the reasoning of the opinion applies.

So that, Mr. President, when we have a statute which expressly declares that for the purpose of carrying out the national purposes that Congress has in view this property is not taxable, we present a case altogether different, as the court says in this case, from the railroad cases to which your attention has been so earnestly invited by the Senator from Utah [Mr. SUTHERLAND].

Now I recur for a moment to the proposition I advanced awhile ago—that the creation of a bank possessing the ordinary functions of a bank, having the power to receive deposits and

having the power to loan money, is within the power of Congress; and that it was so decided in these earlier cases appears to me quite clear from this language of the court in the last Legal Tender case, reported in One hundred and tenth United States I read from page 445, as follows:

It is equally well settled that Congress has the power to incorporate national banks, with the capacity, for their own profit as well as for the use of the Government in its money transactions, of issuing bills which under ordinary circumstances pass from hand to hand as money at their nominal value, and which, when so current, the law has always recognized as a good tender in payment of money debts, unless specifically objected to at the time of the tender. (U. S. Bank *v.* Bank of Georgia, 10 Wheat., 333, 347; Ward *v.* Smith, 7 Wall., 447, 451.) The power of Congress to charter a bank was maintained in McCulloch *v.* Maryland (4 Wheat., 316) and in Osborn *v.* United States Bank (9 Wheat., 738) chiefly upon the ground that it was an appropriate means for carrying on the money transactions of the Government.

That was the chief ground on which the court rested its decision.

Now, the court goes on:

But Chief Justice Marshall said: "The currency which it circulates, by means of its trade with individuals, is believed to make it a more fit instrument for the purposes of government than it could otherwise be; and if this be true, the capacity to carry on this trade is a faculty indispensable to the character and objects of the institution." (9 Wheat., 864.) And Mr. Justice Johnson, who concurred with the rest of the court in upholding the power to incorporate a bank, gave the further reason that it tended to give effect to "that power over the currency of the country which the framers of the Constitution evidently intended to give to Congress alone."

Thus you will see, Senators, that the court referred to these matters as additional grounds upon which the power to create the bank rested, but they were not essential at all, the main thing being that it became a convenient means for carrying on the fiscal operations of the Government.

The Senator from Iowa [Mr. CUMMINS] entertains very grave apprehensions that if any such principle as that announced in this bill receives acceptance, and the Congress should later undertake to create corporations for the purpose of engaging in interstate business, all of the property of the corporations thus created will be exempt from State taxation. I hope I have stated the position of the Senator accurately. I have tried to do so.

I think the apprehensions of the Senator have very little foundation, Mr. President. In the first place, even though it were possible for Congress to exempt the property of corporations of that character from State taxation, how can we conceive that the Congress of the United States, in which every State is represented in this body, having an equal voice, will ever undertake to deprive the States of this great power of taxation? Moreover, if the Congress ever should undertake to create corporations of that character, they will be less like a banking corporation than are the railroad corporations, the property of which, it has been held, is not exempt from taxation—at least, unless Congress so declares.

Mr. President, a corporation that might be created by Congress for the purpose of engaging in commerce would not be performing any governmental functions. It would not be necessary nor perhaps even convenient for the purpose of carrying on the Government operations. It would be purely a private enterprise, and would stand upon exactly the same footing as all corporations created by a State to engage in business enterprises of one kind or another.

Mr. THOMAS. Mr. President——

Mr. WALSH. I yield to the Senator from Colorado.

Mr. THOMAS. I have been very much impressed with the soundness of the Senator's argument; and I think it is appropriate here to suggest the query whether, if Congress has not this power of exemption, the States might be in position, or some one or more of them, if it so desired, to tax these agencies or these instrumentalities so highly as virtually to destroy, or at least to cripple, the purpose and object for which the system is designed?

Mr. WALSH. I am very glad the Senator suggested that. That was the point I was coming to—that we do not want to take out this provision in section 29. I agree substantially with the Senator from Iowa that if we have no constitutional power to invade the taxing power of the State so as to make this property exempt we can not, as a matter of course, undertake to do it by a declaration in the statute. The exemption arises by reason of the fact that the banks to be created are instrumentalities of the National Government, and all their property is exempt, except to such extent as the Congress may permit the States to tax them; and we propose to permit the States to tax their real estate, and all their other property, if they have any, and to declare that the stock and the bonds and the mortgages which give substance to the bonds shall all be exempt from taxation.

Mr. President, this is not at all, as the Senator from Iowa seems to believe, an extraordinary or unusual declaration in a statute of the nontaxability of property which is not taxable even though there were no declaration in the statute. The Revised Statutes of the United States, section 3701, declares that—

All stocks, bonds, Treasury notes, and other obligations of the United States, shall be exempt from taxation by or under State or municipal or local authority.

No one can doubt that they would be fully exempt if there was no such declaration as that in the statute. The Senator from Colorado [Mr. THOMAS] called attention a few days ago to the recital in the acts admitting most of the States to the Union within modern times requiring the State to agree that the public lands within their borders should not be subject to taxation. I read the provision of the enabling act under the authority of which four of the great Northwestern States came into the Union. They were each required to enter into a stipulation as follows:

That the people inhabiting said proposed State do agree and declare that they forever disclaim all right and title to the unappropriated and ungranted public lands lying within the boundaries thereof and to all lands lying within said boundaries owned or held by any Indian or Indian tribes the right or title to which shall have been acquired through or from the United States or any prior sovereignty, and that until the title of such Indian or Indian tribes shall have been extinguished the same shall be and remain subject to the disposition and under the absolute jurisdiction and control of the Congress of the United States; that the lands and other property belonging to citizens of the United States residing without the said State shall never be taxed at a higher rate than the lands and other property belonging to residents thereof; that no taxes shall be imposed by the State upon lands or property therein belonging to or which may hereafter be acquired by the United States or reserved for its use.

Then it goes on to provide that lands belonging to the Indians shall not be taxed.

And, Mr. President, it was not necessary by any means that the States should enter into any such compact with the Government of the United States in order that the public lands within their borders should be exempt from taxation. Neither was it necessary that there should be any recital to that effect in any statute; they were, as a matter of fact, so exempt. That was determined in Pollard against Hagan's Lessees in 1845, and the substance of the decision was referred to by Mr. Webster in the great debate over the admission of California into the Union, the enabling act there providing, in substance, as does the act which I have just read to you, that the people of California should stipulate that public lands within that State should not be subject to taxation.

Mr. SUTHERLAND. Mr. President——

The PRESIDING OFFICER (Mr. VARDAMAN in the chair). Does the Senator from Montana yield to the Senator from Utah?

Mr. WALSH. I do.

Mr. SUTHERLAND. I quite agree with what the Senator says with reference to the Treasury notes and the property of the United States, that they would be exempt from State taxation without any act of Congress to that effect. The statute which exempts them in each case is merely declaratory of the rule which would exist in the absence of a statutory provision. But does the Senator contend that the property mentioned in section 29 would be exempt if it were not expressly so provided in the bill?

Mr. WALSH. I am endeavoring to establish that it is not a strange thing in our legislation at all to declare by congressional act that certain property shall be exempt from State taxation which would be exempt even though there were no such statute.

Mr. SUTHERLAND. That is quite true; it is not a strange or unusual thing; it has been done. However, the question I propounded to the Senator is whether or not he thinks that section 29 is necessary to prevent the State from taxing the property there described?

Mr. WALSH. I do not think that it is necessary, except that it is a declaration upon the part of Congress that it believes these instrumentalities which they are creating will not effectuate the national purpose for which they are created unless they are exempted, and therefore there is an express declaration upon the part of Congress that those items of property shall not be subject to taxation.

Mr. SUTHERLAND. Then, if I understand the Senator from Montana, he thinks this property would be excluded from State taxation if section 29 were stricken from the bill.

Mr. WALSH. I do not undertake to say so. The question as to whether it would or would not should be a matter for the construction of the court, guided by no expression of opinion on the part of Congress if you strike it out. The court might say, as the court said in the railroad cases, in the absence of a declaration by Congress that exemption is necessary in order

that this organization may carry out their purpose, we shall assume that Congress permitted the State and desired that the State should exercise the right of taxation.

Mr. SUTHERLAND. That is an entirely different thing from holding that Congress would have the power to forbid the State from taxing property of that kind. As I understand the decision of the court in that particular, they simply said that if that was done it would present a different case. They did not say what they would hold on the question if presented.

Mr. WALSH. Exactly; and the question the Senator was discussing under the railroad cases was one which the court in the Central Pacific Railway Co. case said was entirely different from the question which would have been presented if Congress had made the declaration.

Mr. SUTHERLAND. It would undoubtedly present a different question, but the court does not enlighten us as to what they would have decided if that question had been presented.

However, if the Senator will bear with me for just a moment, the distinction which I see between this measure and the statute to which the Senator referred, namely, where Congress has expressly declared that certain property of the United States should be exempt from taxation, is that they were dealing there with property of the United States, and here we are undertaking to deal with property of an agency of the United States, which property, as I interpret it, is not related to any function which the agency is discharging for the United States Government, but is property owned in its private capacity, and not in any way connected with the exercise of any governmental function.

Mr. WALSH. I call the attention of the Senator now to the declared exemption of certain property which did not belong to the United States—that is, it belonged to an Indian. I read from volume 3 of Indian Laws and Treaties, as follows. This is the act admitting the State of New Mexico into the Union.

That no taxes shall be imposed by the State upon lands or property therein belonging to or which may hereafter be acquired by the United States or reserved for its use; but nothing herein, or in the ordinance herein provided for, shall preclude the said State from taxing, as other lands and other property are taxed, any lands and other property outside of an Indian reservation owned or held by any Indian, save and except such lands as have been granted or acquired as aforesaid or as may be granted or confirmed to any Indian or Indians under any act of Congress, but said ordinance shall provide that all such lands shall be exempt from taxation by said State so long and to such extent as Congress has prescribed or may hereafter prescribe.

Mr. SUTHERLAND. Will the Senator read that latter part again?

Mr. WALSH (reading)—

But said ordinance shall provide that all such lands—

That is, lands of the Indians—

shall be exempt from taxation by said State so long and to such extent as Congress has prescribed or may hereafter prescribe.

Congress there assumed the right to lay down the rule that a State can tax the property of an Indian just to the extent that Congress permits the State to tax the property of the Indian.

Mr. SUTHERLAND. Of course, Congress was there dealing with an individual who occupies a peculiar status and who is the ward of the Government of the United States. It has always been held that the United States Government has peculiar powers with reference to Indians.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Iowa?

Mr. WALSH. I do.

Mr. CUMMINS. Does the Senator from Montana assert what might be inferred from what he has just said that the United States could sell the public domain and exempt it from taxation for all time?

Mr. WALSH. No.

Mr. CUMMINS. In the hands of an individual?

Mr. WALSH. The Senator from Montana does not make any such assertion at all.

Mr. CUMMINS. Why?

Mr. WALSH. Why?

Mr. CUMMINS. I must state my premise. I infer from the last clause of the statute just read that it was read to show that Congress can exempt the lands of the Indians for just so long a time as it plenses, and I am sure the Senator from Montana did not think the Government could attach that condition to the sale of its Government domain generally.

Mr. WALSH. No; the Senator from Montana does not take any such position. I am very sure that the exercise of this power grows out of the peculiar relation between the General Government and the Indians.

Mr. CUMMINS. But I was wondering if the Senator from Montana would give his reason for denying the right of Congress to sell its public domain and attaching to it exemption from taxation. It is an instrumentality. We have complete power to dispose of it.

Mr. WALSH. I do not agree with the Senator at all. When the Government of the United States transfers its land and parts with title to it I do not consider it any longer an instrumentality of the Government.

Mr. CUMMINS. I inferred that you limit the power of Congress in that respect.

Mr. WALSH. Indeed I do not consider it an instrumentality of the General Government at any time.

But, Mr. President, we are simply driven to the question as to what is the essential difference between these national banks and the national banks now known, and until some essential difference in principle is established or pointed out I think we may safely proceed upon the assumption that these banks will be taxable to such an extent, and to such an extent only, as Congress may permit them to be taxed.

Moreover, Mr. President, if there were any doubt about the matter the declaration upon the part of Congress to the effect that they would not be able to carry out their purposes except by this exemption, and that Congress intended they should be exempt, will serve to remove whatever doubt there may be concerning the exemption of this character of property.

I must say, Mr. President, that I am unable to distinguish in principle between these national banks and the national banks now in existence. It is true that the national banks now in existence have the power to issue their notes payable on demand and that those notes circulate practically as money, but wherein in principle do those obligations differ from the obligations these banks issue that are designated as bonds? They differ only in that the bank bills or notes are payable upon demand and the bonds to be issued by these banks are payable at fixed and definite times provided in the bill. There is no other difference between them that I can see, and certainly that distinction will not enable us to discern any difference in principle between the two systems of national banks.

Mr. CUMMINS. I ask the Senator from Montana whether there is in the statute relating to national banks any provision prohibiting the States from taxing national-bank currency in the hands of a citizen or individual?

Mr. WALSH. I think not. I think that if you had a thousand dollars in national-bank bills in your possession you would be subject to taxation by the State of Iowa.

Mr. CUMMINS. Precisely. Then, if I have $1,000 of farm-loan bonds in my hands, I would not be subject to taxation, I assume, under this bill?

Mr. WALSH. I assume not.

Mr. CUMMINS. Where does the Senator from Montana think that Congress can exempt the individual holder of national-bank currency from taxation on account of his ownership of currency?

Mr. WALSH. I have no doubt it can.

Mr. CUMMINS. The Senator has no doubt about it?

Mr. WALSH. No; I have not.

Mr. CUMMINS. It has no authority?

Mr. WALSH. That is what it does.

Mr. CUMMINS. I asked the Senator whether there was any statute so far as he knew which attempted to exempt in the hands of an individual owner national-bank currency from taxation by the State. There is no such statute, is there?

Mr. WALSH. There is no such statute. Perhaps I spoke hastily a moment ago. I am not prepared to say whether they would fall within the general exemption of the statute.

Mr. CUMMINS. There is no exemption, as I read it, with regard to national banks at all. There are certain directions given with respect to the extent of taxation; it must be discriminatory.

Mr. WALSH. The Senator differs with me about that.

Mr. CUMMINS. That relates, however, to the shares of stock. However we may differ with regard to the construction of section 5219 of the Revised Statutes, it is a negative or legislative suggestion, namely, that the shares of stock of national banks shall not be taxed more heavily by a State than other moneyed capital. The only other reference in section 5219 is to real estate. I do not know of any provision in the law which exempts or attempts to exempt national-bank currency from taxation in the hands, of course, of an individual holder. I was asking whether the Senator from Montana knew of any such statute, and I assume that he does not. Now, I ask him whether it is exempt, in his opinion?

Mr. WALSH. I will say to the Senator, I do not know. I am perfectly certain it is not taxable in the hands of a bank.

Mr. CUMMINS. Of course, in the hands of the national bank it becomes simply the property of the national bank and would be treated, I assume, like any other property of the national

bank, but in the hands of an individual holder I think it bears the same relation precisely to the national bank which issued it as does the farm-loan bond bear to the farm-loan bank which issued it. If either of them is exempt from taxation upon the part of the State, it is because the national bank in the one case issued it and the farm-loan bank in the other case issued it, and it would be exempt under the Constitution, if at all. Does the Senator think that if the Constitution does not exempt that currency in the one case or the bond in the other from taxation Congress could exempt either?

Mr. WALSH. Certainly if the Constitution does not permit it, Congress can not do it. That is axiomatic. I could answer that very readily.

Mr. CUMMINS. But neither is the property of the bank; both belong to an individual.

Mr. WALSH. Oh, yes; but they are issued by the bank in pursuance of authority conferred by the act of Congress.

Mr. CUMMINS. They are issued by the bank. I was mentioning this because I yesterday asserted that Congress had never attempted to exempt from taxation the property or the instrumentality of any corporation organized under its laws. I stated to the Senator from Colorado, when he made the suggestion which he did, that my assertion did not cover the question of the property of the United States itself, the status of which, I think, is determined by the Constitution, but concerning which compacts have been made between the States and the Union, and I think the Senator from Montana agrees with me that no such exemption has ever been made by statute; in other words, that if this property is exempt, it is exempt because of the principles laid down in McCulloch against Maryland, in Osborn against The Bank, and in the Owensboro Bank case. That is what exempts the property, if it is exempted, is it not?

Mr. WALSH. That is what exempts the property, beyond question; but the question still presents itself as to whether or not in the particular case Congress intended that an exemption should be extended. Congress may withhold the exemption.

Mr. CUMMINS. I asked the Senator this question—and it was the point of my whole argument—If the property is not exempted by reason of its character, its relation to the instrumentality which Congress has created, can it be exempted by Congress?

Mr. WALSH. I think that is right. I think it can not be exempted.

Mr. CUMMINS. I ask the Senator one more question, and I shall not further detain him. Is there any difference at all between the case of Osborn against the Bank, decided in the early years of the Republic, and the case of the Owensboro National Bank against Owensboro, in Kentucky? Are they not identical so far as the cases are concerned?

Mr. WALSH. Quite so.

Mr. CUMMINS. That is to say, the Osborn bank presented a case of a tax upon the franchise of the United States Bank; the Owensboro bank case presented an instance of a tax upon the shares, but in such manner that the Supreme Court held that it was in fact a tax upon the franchise of the bank.

Mr. WALSH. And the property.

Mr. CUMMINS. Is it not, therefore, true that when the Supreme Court stated in the paragraph that I can not recall sufficiently to quote, but which the Senator from Montana will recognize, that all the property of a national bank is exempt from taxation unless Congress gives the State the privilege of taxing it, it was pure dictum?

Mr. WALSH. Oh, I do not think so at all.

Mr. CUMMINS. There was nothing of that sort involved in the case.

Mr. WALSH. I do not think that was pure dictum. Indeed, in a later opinion—I have not undertaken to analyze just exactly the foundation for it—but in a later opinion the court declared that the question presented in the Owensboro case was the question as to whether or not the State could tax the franchise and property of the bank. So it is not a dictum by any means.

Mr. SUTHERLAND. Mr. President, the question as to whether or not Congress had the power to exempt all the property of the national banks from taxation could not have been presented to the court, because Congress had never attempted to do that thing. Congress had not attempted to exempt all of the property of the national banks; it had expressly said in the statute that the State might tax the shares of the bank, and that it might tax the real estate of the bank. So the question as to whether or not Congress could have passed a statute to the exact contrary and have said that the State could not tax the shares and could not tax the real estate, never was presented to the court, and therefore could not have been decided by the court.

Mr. WALSH. Of course, I do not care to enter into a discussion as to whether it is dictum or is not dictum. The declaration is perfectly plain, and the Supreme Court itself has declared that the question of the taxability of the property of the bank was involved.

Mr. SUTHERLAND. Mr. President——

Mr. HOLLIS rose.

Mr. SUTHERLAND. Just a moment, if the Senator from New Hampshire will permit me. The point I make about it is this: The syllabus of the Owensboro case is to the effect that—

> A State is wholly without power to levy any tax, either direct or indirect, upon national banks, their property, assets, or franchises, except when permitted so to do by the legislation of Congress.

No such question as that was presented to the court. The question presented to the court was whether or not the State could impose a franchise tax; and to that extent there was presented precisely the question which was presented to the court in the earlier days in the Osborn Bank case, and which the court in that case held could not be done by the State. That the court went beyond the question presented by the statute is clear, as it seems to me, from the consideration that the court expressly follows, or attempts to follow, the decision of the court in the McCulloch case; and in the McCulloch case the Supreme Court of the United States held that the real estate of the bank and the shares of the bank in the hands of individuals could be taxed, even though there was no permission in the statute passed by Congress to the State to exact the tax. So, if the court followed that decision, as it seems to have done, it must have held that property of that species could be taxed without the permission of Congress.

As a matter of fact, the Senator from Montana knows as well as I do that, following the decision in the McCulloch case, the shares of stock of the United States Bank in the hands of individuals were taxed and that the real estate of the bank was taxed. The question as to whether or not the tax could be exacted upon the shares came up before the State courts in numerous cases. In South Carolina there was a series of cases—I do not remember how many of them—in which the courts expressly held, putting the decision upon the authority of the McCulloch case, that shares of stock in the United States Bank could be taxed, notwithstanding the fact that no permission had been given by Congress to that effect.

Mr. WALSH. Mr. President, because the Owensboro case has been attacked in so far as it declares the property of the national banks not subject to tax except as permitted by Congress, and the question presented there was as to the taxability of the franchise of the bank, I merely wish to read a brief statement of facts from the opinion, so as to show just exactly what was involved in that case. The court said:

> This suit was originally instituted in a court of the State of Kentucky by the plaintiff in error, the Owensboro National Bank. The relief prayed was that the city of Owensboro and its tax collector, Simmons, be perpetually restrained from enforcing the collection of alleged "franchise" taxes for the years 1893 and 1894, claimed by the defendants to have been assessed under authority of a revenue act of the State of Kentucky enacted November 11, 1892, as amended. The taxes in question were laid upon the amount fixed by the State board of valuation and assessment provided for in the act, which valuation equaled the combined sum of the par of the capital stock of the bank, its surplus, and undivided profits. It is admitted on the record that the avails of the bank to the amount of the valuation were invested in nontaxable bonds of the United States.

So, really, the tax was a tax laid upon what represented all of the property of the bank.

Mr. SMITH of Georgia. Mr. President, will the Senator allow me to ask him a question?

Mr. WALSH Certainly.

Mr. SMITH of Georgia. I will also ask it of any other Senator who may have the information. Does the Senator know whether the right to tax national-bank notes in the hands of third parties has ever been tested and sustained by any State court? I know that it is the custom to tax them, at least, I know in my own State that holders of national-bank notes get rid of them just before tax-return day, as far as practicable, and substitute for them Treasury notes, and I know that the rule has been to tax national-bank notes in the hands of private citizens. What I wanted to ask was whether that was a mere voluntary submission by the holders of those notes to taxation or whether the question has ever been before any State court or any court for decision? If it has been, I do not know.

Mr. SUTHERLAND. No one ever submits to voluntary taxation.

Mr. WALSH. Mr. President, I will say to the Senator that I do not recall ever having heard or read of that question being tested, but it seems to me a rather remarkable thing that a man, when the assessor comes around, should have among a miscellaneous lot of currency that would not be taxable certain national-bank notes and that the assessor should demand that

he list those national-bank notes, and that thus the question should be presented to the court for determination. It seems to me that that is a condition of things not at all likely to arise.

Mr. SMITH of Georgia. Mr. President, if the Senator will pardon me, my acquaintance with the subject has simply grown out of my knowing that there has been by certain persons quite a rush on the banks for Treasury notes just before tax-paying time, so as to get rid of their national-bank notes. That is probably a line of conduct with which others are also familiar; but whether it has ever been held anywhere that a national-bank note in the hands of a private citizen is subject to taxation I do not know at all, and I thought possibly I might be able to obtain some information on that subject.

Mr. HOLLIS. Mr. President, I am quite sure there is no such decision as that about which the Senator from Georgia inquires; but I call his attention to the statute which expressly exempts Treasury notes from taxation by the State, but does not exempt national-bank notes.

Mr. President, this question of exemption from taxation has been fully and ably argued on four different days. There was one day last week devoted to it; it was argued on Tuesday, on yesterday, and it has been argued so far to-day. We have had two addresses from the distinguished Senator from South Dakota [Mr. STERLING], two from the Senator from Iowa [Mr. CUMMINS], two from the Senator from Utah [Mr. SUTHERLAND], one from the Senator from Montana [Mr. WALSH], one from the Senator from Colorado [Mr. THOMAS], and I believe it is the opinion of the Senate that the subject has been fully debated. I may be wrong; if so, the vote of the Senate will decide; but in order to test that opinion I move that the amendment of the Senator from Iowa be laid on the table.

Mr. CURTIS. Mr. President, I make the point of no quorum.

The PRESIDING OFFICER (Mr. MYERS in the chair). The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Borah | James | Overman | Sutherland |
| Brady | Johnson, Me. | Page | Swanson |
| Brandegee | Johnson, S. Dak. | Pittman | Taggart |
| Chamberlain | Jones | Poindexter | Thomas |
| Clapp | Kenyon | Pomerene | Thompson |
| Culberson | La Follette | Ransdell | Tillman |
| Cummins | Lane | Shafroth | Townsend |
| Curtis | Lea, Tenn. | Sheppard | Vardaman |
| Dillingham | Lee, Md. | Sherman | Walsh |
| du Pont | Lippitt | Simmons | Warren |
| Fall | Martin, Va. | Smith, Ariz. | Weeks |
| Gronna | Martine, N. J. | Smith, Ga. | Williams |
| Harding | Myers | Smith, S. C. | Works |
| Hollis | Nelson | Smoot | |
| Hughes | Norris | Sterling | |
| Husting | O'Gorman | Stone | |

The PRESIDING OFFICER. Sixty-one Senators have answered to their names. There is a quorum present.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. The Senator from Idaho.

Mr. BORAH. Mr. President, I understand the question is on the motion to lay on the table the amendment of the Senator from Iowa [Mr. CUMMINS].

The PRESIDING OFFICER. The Chair will state that that is the question.

Mr. BORAH. If it is not too late, if the yeas and nays have not been called for, I only want to say——

The PRESIDING OFFICER. The yeas and nays have not been called for, but the motion is not debatable, except by unanimous consent.

Mr. BORAH. I do not care to debate it. I simply desire to say a word, which I can say just as well after the vote is taken.

Mr. GRONNA. I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on the motion of the Senator from New Hampshire [Mr. HOLLIS] to lay on the table the pending amendment offered by the Senator from Iowa [Mr. CUMMINS]. The yeas and nays have been ordered, and the Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. BRADY (when his name was called). I have a general pair with the senior Senator from Florida [Mr. FLETCHER]. He is absent from the Chamber, and I therefore withhold my vote.

Mr. DILLINGHAM (when his name was called). I have a general pair with the senior Senator from Maryland [Mr. SMITH], who is absent. For that reason I withhold my vote. If at liberty to vote, I would vote "nay."

Mr. STONE (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. CLARK]. I am told that the junior Senator from Utah [Mr. SUTHERLAND] has a pair of the same kind with the senior Senator from Arkansas [Mr. CLARKE]. His pair and mine, I am informed, are both absent. I transfer the pair of the Senator from Wyoming [Mr. CLARK] to the Senator from Arkansas [Mr. CLARKE] and vote "yea."

Mr. SUTHERLAND (when his name was called). Under the announcement just made by the Senator from Missouri [Mr. STONE], and I am at liberty to vote. I vote "nay."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER], which I transfer to the senior Senator from Nevada [Mr. NEWLANDS] and will vote. I vote "yea."

Mr. TILLMAN (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. GOFF] to the junior Senator from Arkansas [Mr. ROBINSON] and vote "yea."

Mr. TOWNSEND (when his name was called). I have a pair with the junior Senator from Florida [Mr. BRYAN], but under an arrangement with him I am at liberty to vote. I vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the junior Senator from Illinois [Mr. LEWIS] and will vote. I vote "yea."

The roll call was concluded.

Mr. DU PONT. I inquire whether the junior Senator from Kentucky [Mr. BECKHAM] has voted?

The PRESIDING OFFICER. He has not.

Mr. DU PONT. As I have a general pair with that Senator, I withhold my vote.

Mr. O'GORMAN. I have a general pair with the senior Senator from New Hampshire [Mr. GALLINGER]. In his absence, I withhold my vote.

Mr. LODGE (after having voted in the negative). I ask whether the senior Senator from Georgia [Mr. SMITH] has voted?

The PRESIDING OFFICER. He has not.

Mr. LODGE. As I have a general pair with that Senator, I withdraw my vote.

Mr. WARREN. I wish to announce the unavoidable absence of my colleague [Mr. CLARK of Wyoming]. He is paired with the senior Senator from Missouri [Mr. STONE]. I make this announcement for the day.

Mr. CURTIS. I have a general pair with the junior Senator from Georgia [Mr. HARDWICK], and therefore withhold my vote. If at liberty to vote, I would vote "nay." At this time I desire to announce the absence of the junior Senator from Maine [Mr. BURLEIGH] on account of illness in his family.

Mr. FALL. I have a general pair with the senior Senator from West Virginia [Mr. CHILTON]. In his absence I withhold my vote.

Mr. GALLINGER. I inquire if the senior Senator from New York [Mr. O'GORMAN] has voted?

The PRESIDING OFFICER. He has not.

Mr. GALLINGER. I have a general pair with that Senator, and for that reason withhold my vote.

The PRESIDING OFFICER. I transfer my pair with the junior Senator from Connecticut [Mr. MCLEAN] to the junior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Nebraska [Mr. HITCHCOCK];

The Senator from New Mexico [Mr. CATRON] with the Senator from Oklahoma [Mr. OWEN]; and

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY].

The result was announced—yeas 39, nays 24, as follows:

YEAS—39.

| | | | |
|---|---|---|---|
| Ashurst | Johnson, S. Dak. | Poindexter | Swanson |
| Broussard | La Follette | Pomerene | Taggart |
| Chamberlain | Lea, Tenn. | Ransdell | Thomas |
| Culberson | Lee, Md. | Reed | Thompson |
| Gore | Martin, Va. | Shafroth | Tillman |
| Hollis | Martine, N. J. | Sheppard | Underwood |
| Hughes | Myers | Simmons | Vardaman |
| Husting | Norris | Smith, Ariz. | Walsh |
| James | Phelan | Smith, S. C. | Williams |
| Johnson, Me. | Pittman | Stone | |

NAYS—24.

| | | | |
|---|---|---|---|
| Borah | Jones | Overman | Sutherland |
| Brandegee | Kenyon | Page | Townsend |
| Clapp | Lane | Sherman | Wadsworth |
| Cummins | Lippitt | Smith, Mich. | Warren |
| Gronna | Nelson | Smoot | Weeks |
| Harding | Oliver | Sterling | Works |

NOT VOTING—33.

| | | | |
|---|---|---|---|
| Bankhead | Catron | Curtis | Gallinger |
| Beckham | Chilton | Dillingham | Goff |
| Brady | Clark, Wyo. | du Pont | Hardwick |
| Bryan | Clarke, Ark. | Fall | Hitchcock |
| Burleigh | Colt | Fletcher | Kern |

| | | | |
|---|---|---|---|
| Lewis | Newlands | Robinson | Smith, Md. |
| Lodge | O'Gorman | Saulsbury | |
| McCumber | Owen | Shields | |
| McLean | Penrose | Smith, Ga. | |

So Mr. CUMMINS's amendment was laid on the table.

Mr. GRONNA obtained the floor.

Mr. CLAPP. Mr. President, will the Senator yield to me for a moment?

Mr. GRONNA. I yield.

Mr. CLAPP. I simply want to say that, no matter how it may place me in the RECORD as in apparent hostility to a matter, I will not vote to table an amendment unless it has become evident that there is a persistent opposition designed to delay the passage of a measure. I make that statement now with reference to all matters. While it may place a Senator in an unfair light with reference to his supposed attitude toward a pending amendment, I shall vote against shutting off debate unless it is evident that debate has reached a point where it is being resorted to merely for delay. I do not believe it is proper, nor do I believe it is fair.

Mr. JONES. If the Senator from North Dakota will permit me, I will simply say that I want to emphasize what the Senator from Minnesota has said, and, further, that if I had had an opportunity to vote on this amendment on its merits I should have voted against it.

Mr. LANE. Mr. President, if the Senator will permit me, I wish to say that I voted against tabling this amendment for the reason that I do not believe in that process of conducting legislation. I like to see a question allowed to come out in the open, and then fight it out, and vote on it upon its merits. I am constitutionally opposed to this way of shutting off debate arbitrarily and tyranically. I am very glad to have an opportunity to say that, although, if the amendment had been allowed to come up on its merits, I would have voted against it.

Mr. WILLIAMS. If the Senator will yield for my part in this experience meeting, I think about the only precious privilege left to the Senate is the motion to lay on the table. It is about the only way we have of terminating a debate. I welcome it as one of the muniments of human liberty. When a fellow is opposed to anything, the quickest possible way to beat it is to lay it on the table.

Mr. GRONNA. Mr. President, I was about to say what the Senator from Minnesota [Mr. CLAPP] and other Senators have said, that I shall not vote to lay on the table any amendment that to my mind is fundamental, and where it has not been shown that time is taken up for the purpose of delaying the passage of the measure.

The Senator from Montana [Mr. WALSH] referred this morning to the Federal reserve act. He called attention to the fact that some Senators who were opposed to the passage of that measure and had predicted that it would not work well, would perhaps find that the same result that followed the enactment of that bill would come from the passage of this one. I should like to call the Senator's attention to the fact that the so-called Federal reserve act provided that every national bank had to join the Federal Reserve Association or it would lose its charter. How many State banks have joined the Federal Reserve Association, I ask the Senator? I also want to remind the Senator from Montana of the fact that it will not be as easy a matter for this political board to compel the American farmer to mortgage his land under the provisions of the bill as it was to compel the national banks to join the association.

I am in favor of a rural-credits law. I think I know something about the hardships that the farmers of the United States have had to endure, and I am not going to take up the time of the Senate this afternoon with any idea in view of opposing this bill in its entirety. I am going, however, to take the time of the Senate to call attention to some of the imperfections in this bill and to some of the provisions that, in my humble judgment, should be changed, because some of them, as I believe, are unworkable.

Mr. President, knowing as I do how arduously the Senator from New Hampshire has labored to perfect the pending rural-credits measure, and knowing that it has been his sincere desire to secure the enactment of a law which will give real relief to the farmers of the country from the burden of unduly and unjustly high interest rates, I have hesitated to say anything in criticism of the bill, and it is with a feeling of regret that I now undertake briefly to call the attention of the Senate to some features which appear to me to be faulty, and to the effect of those provisions.

The problem of rural credits, it appears to me, should be approached from a somewhat different angle. I believe that what we should aim at is the establishment of associations which will borrow money for the farmer, rather than the creation of banks or other organizations lending to the farmer. If an association of the farmers of this country can be created which will substitute for the uncertainty of the loan of an individual farmer the security of farm loans as a class, it is my belief that the investors of this country will find the bonds of such an association an attractive investment, even at low rates of interest, and that by this means funds for farm loans can be obtained.

The pending measure lacks cooperative features. In certain respects, it appears to me, it provides for banks and organizations to lend money, rather than associations which will enable the farmer to borrow on more reasonable terms. The Federal land banks provided for are lending institutions; and while the farm-loan associations provided for are to be represented on the board of directors, it may be doubted whether this will result in the Federal land bank being conducted with a view to furnishing loans at as reasonable a rate as possible rather than with a view to making profits.

The farm-loan associations provided for in this bill appear to me to be too small and weak to be of the greatest assistance to the farmers. They are, in fact, small corporations authorized to do a certain amount of banking business. Because of their small size and the fact that only borrowers can be members, it seems to me to be doubtful whether their obligations will be much safer than the mortgage of the average farmer. I believe it is a serious fault to exclude from such associations farmers who are not borrowers; it seems to me that these would add strength to the association, and it would seem probable that the benefit they might derive from their membership when they might wish to borrow money in the future would be a sufficient incentive to them to become members at a time when they were in no need of a loan. This exclusion, it seems to me, weakens the associations needlessly, and I can not perceive any good purpose served by it.

I may also say that I believe there are too many restrictions attempted to be placed on the farmers applying for loans under this measure. A farmer who risks the loss of his farm by placing a mortgage thereon is not going to do so unless he feels that it is necessary. Under these provisions, if the family of a farmer should suffer from serious and protracted illness, or if he should have any other misfortune which would make it necessary for him to raise money by means of a loan, he could not obtain such a loan from the Federal farm banks, even though such a loan might be safer than loans made by the Federal land bank and the farmer might be in more urgent, immediate need of funds than a farmer to whom the bank was authorized to lend money.

The joint-stock land banks authorized in this bill do not appear to me to form part of a rural-credits system. They are merely commercial banks, differing from other national banks in that they are to deal in farm loans.

I might say in passing, Mr. President, that some of those who are recognized as financiers in this country have written to me stating their belief that so far as the joint-stock banks are concerned they are simply loaning institutions, which necessarily must be started in the larger cities, as small banking institutions in small towns could not possibly serve the purpose or could not loan to the farmers the amount of money that will be required. Necessarily, therefore, the so-called joint-stock bank will be started in the larger cities of the country, and they will simply displace the institutions which we already have.

It is provided in the bill that bonds which may be issued, that are exempt from taxation, shall be permitted to be issued by these corporations at a rate of 5 per cent. It seems to me that this provision of the bill should be changed, and that in no case or under no circumstances should a higher rate than 3½ or 4 per cent be allowed to be charged by those large banking institutions if the bonds and mortgages are to be exempt from taxation.

They will compete with State banks which at the present time make the same kind of loans, and to this extent may perhaps reduce in some localities the rates of interest which the farmer has to pay at present. It may be considered doubtful whether they would form any very useful supplement to the State banks. And I may say in this connection, that the banks which have been of most benefit to the farmers in the past have been the State banks, and not the national banks. So far as the negotiable paper of the farmer has been standardized, it has been done by State banking systems.

Two years ago I introduced a rural-credits bill aiming to establish such a system of associations as I believe we should attempt to make provision for. I reintroduced the measure at this session as Senate bill No. 576.

Mr. President, I want to discuss briefly the provisions of the bill which I have had pending in the Senate for a number of years, and while I shall not of course criticize the chairman of the subcommittee, the Senator having the pending bill in charge, for not reporting my bill, I did have the hope that some of the provisions contained in that bill would be adopted, and I still have the hope that the Senator from New Hampshire will accept as amendments some of the provisions to which I shall call attention.

NATIONAL FARM-LOANS ASSOCIATION CREATED.

It is proposed to create a national farm-loans association, with an authorized capital stock of $50,000,000. The stock is to be held solely by State associations provided for in the bill. Each State association is to subscribe for such stock in the amount of 50 per cent of its own capital, but no association is to be required to subscribe more than $2,000,000. The national farm-loans association is to commence business when not less than 10 State associations have been organized and have made the required stock subscription. (Secs. 1 and 3.)

COMMITTEE ON ORGANIZATION.

A committee on organization is provided for, which is to consist of the Secretary of the Treasury, the Secretary of Agriculture, the Comptroller of the Currency, and two additional members named by the President. This committee will appoint in each State a State agent, who will receive applications for membership in the State association and subscriptions to the stock of such association, and when the necessary stock has been subscribed take the steps necessary to effect the organization of the State association. No State association is to be organized if the subscription to its capital stock is less than $50,000. (Sec. 5.)

DIRECTORS OF THE NATIONAL FARM-LOANS ASSOCIATION.

The board of directors of the national farm-loans association is to consist of a member from each State, elected by the members of the State association. When 10 State associations have organized and chosen directors of the national farm-loans association the board of directors is to organize. A director must be a member of the State association by which elected, must be engaged in farming, must be a resident of the State, and must have such further qualifications as the by-laws of the national farm-loans association may prescribe. A director may be removed by a two-thirds vote of the directors or by a majority vote of the State association which he represents. Directors are to be elected for a term of five years, and they are divided into five classes, in such a way that one-fifth of the total number are elected each year. (Secs. 7, 8, and 10.)

BOARD OF GOVERNORS.

The national farm-loans association is to be governed by a board of governors consisting of seven members, two of whom are to be appointed by the President, by and with the consent and advice of the Senate, and five of whom are to be elected by the board of directors. The latter may be removed by a two-thirds vote of the directors and the former may be removed by the President on charges preferred by the board of directors of the national farm-loans association or by the board of directors of any State association. The term of office is to be five years. (Sec. 9.)

I believe the pending bill provides now for a term of 8 years. Originally it provided for a term of 10 years.

STATE ASSOCIATIONS CREATED.

In each State there is to be organized a State association, with a capital stock of not less than $50,000 nor more than $5,000,000. This stock is to be issued in shares of $25 each, and no one person, organization, or association of persons is to be allowed to hold more than 10 shares. Each State association is required to subscribe to the capital stock of the national farm-loans association an amount equal to 50 per cent of its own capital, but in no event more than $2,000,000. (Sec. 4.)

DIRECTORS OF STATE ASSOCIATIONS.

Each State association is to be governed by a board of directors, consisting of members elected by the local associations. The term of office is to be three years, and the directors are to be divided into classes in such a way that the terms of one-third of the total number will expire each year. A director of a State association must be an actual resident of the State, must be engaged in farming, must be a member of a local association, and must be a stockholder in the State association. The by-laws of the State association may prescribe further qualifications. A director may be expelled by a two-thirds vote of the total number of directors, and may be recalled by a majority vote of the local association which he represents. (Secs. 6 and 11.)

LOCAL ASSOCIATIONS PROVIDED FOR.

Local associations may be formed by any number of persons, not less than 50—in the pending bill it is provided that 10 may constitute an organization or association. Anyone who is familiar with conditions in the country knows that that number is not sufficient and that it should be increased. These 50 shall be persons who are actually engaged in farming, covering a territory of not more than 25 square miles. In sparsely-settled sections the board of directors of the State association may authorize local associations covering a greater territory. Each local association is to be governed by a council elected by the members of the association. The association also elects a president, who is ex officio chairman of the council, a secretary, and such other officers as the by-laws may provide for. The term of office is in each case one year. Any person actually engaged in farming and who is of good character may become a member of a local association, but such an association may by a two-thirds vote of all its members exclude an applicant or expel a member. (Sec. 12.)

QUALIFICATIONS OF ELECTORS.

Every member of a local association in good standing shall be qualified to vote for members of the council of such local association and on all questions coming before the association. In order to vote for directors of the national farm-loans association or of the State association, or on questions submitted by the National or State association, he must be a stockholder in the State association. No one is to be permitted to vote in any State of which he is not a resident, nor is any person who is not a member of a local association to be allowed to vote at any election. Each person is to have only one vote, irrespective of the number of shares of stock he may own. All elections are to be by secret ballot. (Secs. 13 and 14.)

GOVERNMENT DEPOSITS.

On the organization of the national farm-loans association the Secretary of the Treasury is to be required to deposit with the association the sum of $5,000,000. For each State association organized with a capital of not less than $50,000 he is to deposit an additional sum of $200,000; and if a State association is organized with a greater capital than $50,000, or increases its capital beyond this amount, the Secretary is to be required to make a further deposit of such a sum as shall be equal to the amount by which the capital of the State association exceeds the minimum of $50,000. (Sec. 15.)

NATIONAL FARM-LOANS ASSOCIATION MAY ISSUE BONDS.

The national farm-loans association is to be given the power to borrow money and to issue bonds. Such bonds are to bear interest at the rate of 4 per cent per annum, payable semiannually. The pending bill provides that the rate of interest on this class of bonds shall be 5 per cent. Such bonds are to be issued for such terms as the board of directors may decide, not exceeding 20 years, with the privilege of paying them at the end of five years. The board of directors may change the rate of interest, but shall not increase it until such action has been authorized by a majority vote of the members of the State associations.

I wish in this connection to venture the statement that no professor of economy, no man who has given the subject any great thought, no man who has been on a board of directors of any great financial institution, either a bank or an insurance company, will say that the time provided for in the pending bill is workable. The pending bill provides for a term of 36 years, which I believe is entirely too long. No obligation of this class should be issued for a longer term than 20 years. It is neither beneficial to the farmer, the community, the State, nor the Federal Government to issue bonds for a longer term than 20 years. I sincerely hope the Senator from New Hampshire will permit us to amend that section of the bill.

As security there is to be held at least an equal amount in face value of mortgage or deed of trust farm loans or of such mortgage loans and lawful money. A reserve of 5 per cent is required against such bonds. Not more than one-half of such reserve may be advanced to the different State associations for the making of short-time loans. (Secs. 16 and 17.)

Mr. President, the pending bill does not provide for short-time loans at all. I believe I am stating the fact when I say that every farmers' organization in this country has called the attention of Congress to the fact that there is more demand for money for short-time loans and which are more acceptable than the long-time loans, but there is no provision for a short-time loan in the pending bill.

LONG-TIME LOANS.

The national farm-loans association is to be empowered to make loans on farm lands, through the State associations, for terms of not less than 1 year nor more than 20 years. Such loans are to bear interest at the rate of 5 per cent, but this rate may be reduced by the board of directors. On all loans for a longer term than five years a part of the principal, in no case less than 5 per cent, must be paid at the end of five years and every year thereafter.

The pending bill provides that the first year 1 per cent of the principal must be paid, together with the interest. My bill provides that only the interest shall be paid during the first five years, but that after the five years not less than 5 per cent must be paid, and after one year both the principal and interest may be paid.

The borrower is to have the right to pay a larger part of the principal if he so desires, and he may at any time pay the entire loan by paying at the same time the interest which would be due at the next interest-due date. There is no provision made for this in the pending bill. The board of directors are required to prescribe the purposes for which loans may be made, the maximum and minimum amounts of such loans, and the ratio which the amount of the loan may have to the value of the land on which made. (Sec. 18.)

All applications for long-time loans are to be submitted to the local council or to its officers, who forward it to the State association, together with their report and such information as the State association may require.

Mr. President, who is more fitted to pass upon the loans than this local association, the members of which know all the conditions in the immediate vicinity?

If the State association approves the application, it calls on the national association for the amount of the loan. All notes and evidences of indebtedness are forwarded to the national association after being indorsed by the president of the State association. Such indorsement creates a binding obligation on the State association for the payment of the loan and the annual installments of interest.

It seems to me that a first mortgage for a reasonable amount upon a productive farm, together with the indorsement of the State association, will make this paper as good as a Government bond, and that a bond based upon those mortgages will find its way through the avenues and channels of ordinary trade, because there are millions of money now awaiting such an investment as could be made under the provisions of the bill.

Mr. President, it is a fallacy to believe that the Federal Government owns all the money. It is the people of the Government who have the money. The bill of the Senator from New Hampshire is constructed upon the fallacious theory that it is the Federal Government which must provide this money.

The applications for long-time loans have to be submitted to this local council, as I said. Loans may be made to actual farmers who are not members of the local association. There is no such provision in the pending bill.

Loans may be made to actual farmers who are not members of a local association or stockholders in the State association on the same terms as to members. No loans can be made on any property except farm lands. (Sec. 19.)

SHORT-TIME LOANS.

Short-time loans for terms of not more than nine months may be made by a State association to extent of one-half of its paid-in capital and to the further extent of such sums as the national association may advance for such purpose, but the national association shall in no case advance a sum greater than the par value of the capital stock of the State association. Applications for short-time loans must be approved by the officers of the local association, and such local association shall be liable to the State association for the payment of such loan.

My bill provides that the local association shall be responsible to the State association for the short-time loans. Short-time loans are to bear interest at the rate of 6 per cent. (Sec. 20.)

I wish to call the attention of the Senator from New Hampshire to this point. I believe some provision should be made in the bill for the disposition of the money when it is paid back by the farmer to the land bank. There is no such provision in the bill.

DISPOSITION OF MONEYS COLLECTED ON LONG-TIME LOANS.

Money collected as part or all of the principal of a long-time loan is to be used for the following purposes only: First, to pay the principal of such bonds as may be due or may be subject to call; second, to make another long-time loan.

Money collected as interest on long-time loans is to be distributed as follows: There is to be paid (a) the actual expenses of the national farm-loans association; (b) the interest due on bonds outstanding; (c) an amount to each State association equal to 10 per cent of the capital stock of the national farm-loans association held by such State association. Of any proceeds remaining, one-half is to be paid into the Treasury of the United States and the remaining one-half is to be paid to the different State associations in proportion to the average amount of outstanding long-time farm loans made through such State associations. The amounts paid into the United States Treasury are to be credited against the sums advanced to the national farm-loans association, and when such payments equal the sum total of all such advancements the debt of the association to the United States is to be considered canceled and thereafter such payments shall not be made. (Sec. 22.)

Under the provisions of my bill I simply start these associations. The Government of the United States puts in a part of the money, but there is a provision made that it shall be returned or the Government shall be reimbursed, and whenever the Government has once been paid in full no further advances are to be made to these associations by the Government of the United States. They stand absolutely on their own resources, just the same as any other business institution should stand.

DISPOSITION OF MONEYS COLLECTED ON SHORT-TIME LOANS.

Money collected as the principal of short-time loans is to be used only in repaying the advancements made to the State association by the national association, or in making other short-time loans.

Money collected as interest on such loans is to be used to pay the expenses the State association incurred in making them, including any losses resulting from such loans; the remainder shall be distributed in such manner as the board of directors of the State association shall direct.

Money received from the national association as provided in section 22 shall be used to pay the expenses incurred by the State association in making long-time loans; any remainder is to be distributed in such manner as the board of directors of the State association may direct. (Sec. 23.)

Mr. President, I said at the outset that I voted against the motion of the Senator from New Hampshire to lay on the table the motion of the Senator from Iowa to strike out the exemption section, 29. On the direct question I should have voted to retain the exemption clause, because I do not believe we can do justice to the agricultural industry or to the farmers of the country unless the mortgages and bonds are made exempt from taxation.

EXEMPTION FROM TAXATION.

The bonds issued by the national farm-loans association, together with the interest thereon, and all notes and mortgages taken by the association, shall be free from taxation of every kind, but this exemption shall not extend to any real estate actually owned by any of the associations. (Sec. 24.)

THE STOCK OF THE NATIONAL FARM-LOANS ASSOCIATION.

Shares of the capital stock of the national farm-loans association are not to be transferred nor hypothecated nor owned otherwise than by the State associations in the proportion prescribed.

If the subscriptions of the State associations exceed the amount of capital stock authorized, the board of directors of the national association may apportion the stock among the State associations in proportion to their respective capital. If a State association surrenders its charter or decreases its capital stock to such an extent that the amount of stock held by it is in excess of 50 per cent of its own capital, the remaining State associations may be required to take over the surplus stock. If at any time the capital stock of the national association should exceed 50 per cent of the combined capital of the State associations, such excess stock is to be retired. (Sec. 25.)

STOCK OF STATE ASSOCIATIONS.

Each State association may increase or decrease its capital stock within the limits provided, and may reduce the number of shares each person may hold to not less than one, and may require any person holding more than such a number of shares to dispose of the excess to any applicant who is not the owner of any stock, at its market value, in no case less than par, but no person can demand that more than one share be sold to him. (Secs. 26 and 27.)

LIABILITY OF STOCKHOLDERS.

Stockholders in every State association are liable to the par value of their stock in addition to the amount which they have invested in such stock. (Sec. 28.)

POWER TO HOLD REAL ESTATE.

The real estate which the various associations can hold is limited to such as is required for their immediate accommodation in carrying on the business, such as may be mortgaged to them as security for loans, such as may be conveyed to them in satisfaction of debts, and such as may be purchased at sales under decrees, judgments, or mortgages held by such association, or in order to secure debts due them. Except for the first-named purpose, no association shall retain title for a longer term than five years. (Sec. 29.) This is practically similar to the provision embodied in the pending bill.

EXAMINING BOARDS.

The board of directors of the national farm-loans association shall select from among its own members an examining board which shall, at least once a year, make an examination of the business of the national association and the State associations, and make a full report to the board of directors. Similarly, the boards of directors of the various State associations shall select examining boards which shall examine the condition of the business of the State association, and may, when deemed necessary, inquire into the management of the local associations in the State. This is provided for in section 30.

REPORTS TO BE MADE BY THE VARIOUS ASSOCIATIONS.

I want to call the attention of the Senator from New Hampshire [Mr. HOLLIS] to this provision.

Each State association is to make a monthly report to the board of governors of the national farm-loans association, and in addition thereto an annual report, one copy of which shall be forwarded to the board of governors and one copy to the Comptroller of the Currency. The board of governors shall similarly make monthly and annual reports to the Comptroller of the Currency. The board shall also make an annual report to Congress. I believe that it is absolutely necessary and important that the report should be made to Congress as well as to the Comptroller of the Currency, showing the operations of the national farm-loans association and the State associations, and shall include in such report the annual reports of the State associations. The Comptroller of the Currency is to have the power to make examinations of the affairs of the national farm-loans association and of the State associations in the same manner as of national banking institutions. This is provided for in section 31.

DISCIPLINE OF STATE ASSOCIATIONS.

If the officers of a State association conduct their business in violation of the provisions of the law or of the by-laws of the national farm-loans association, the board of governors may, with the approval of the board of directors of the national association, refuse to advance further funds to such State association and may require the repayment of all funds previously advanced. In such event, further funds are to be advanced only after the offending officers have been removed and assurances have been given that the offensive practices have been discontinued. (Sec. 32.)

RIGHT TO AMEND ACT RESERVED BY CONGRESS.

The right is to be reserved to Congress to alter or amend the act, to take effect at the end of any decennial period after the organization of the national association. (Sec. 33.)

The underlying idea in framing this bill has been to form an organization of borrowers rather than of lenders, in order to substitute for the uncertain obligation of the individual farmer the bond of a nation-wide association of farmers. As a class farm loans are almost as secure as Government bonds, but at the present time the investor must examine the conditions of each loan in which he may desire to invest. It appears to me that the bond issued by a national association will have such a security that money for farm loans will be attracted in much greater amounts than at present, and at much lower rates of interest.

Membership in these associations has not been restricted to borrowers, as there would seem to be no good reason for such restriction, and the admission of others who are not at the time borrowers would tend to strengthen the system by increasing public confidence in the associations. Furthermore, what is contemplated is a permanent system—an organization, membership in which will enable the farmer to secure a loan when he needs it without requiring him to become a borrower when he does not need it in order to retain his membership.

Rather than selecting an arbitrary number of associations and trying to divide the United States into an equal number of sections it appeared preferable to establish a State association in each State. The laws governing real estate transfers differ in the different States, and each State association will have only the laws of that one State to consider in adapting its operations, while under a system where an association covered a district composed of several States or parts of States the laws of all of such States would have to be taken into consideration, which might seriously interfere with an attempt to make uniform rules for such district. Furthermore, I believe that the fewer kinds of districts we have, with their necessarily artificial boundaries, the less confusion there will be.

It is possible that it may be considered that the aid extended by the Government in the matter of deposits with the national association is larger than is wise. But it is believed that while in the long run the investors of the country will find the bonds issued by the national association attractive investments, there will be some hesitancy at the outset in accepting these bonds, and that if immediate relief, rather than assistance 10 or 20 years hence, is to be aimed at, the credit of the Government must be used to some extent in some manner or other. The Federal Reserve System uses the resources and credit of the Government in carrying on its operations, and it would not seem too much to ask that as much be done to assist in establishing a system of rural credits, especially as it is contemplated that such assistance be withdrawn when no longer needed.

Experience may show that the provision made for the repayment to the Government of the funds advanced is not sufficient, and that provision should be made for the repayment of a greater sum each year. The aim has been to formulate this provision in such a manner as not to embarrass the association at the outset and yet to result in considerable repayments each year when the system is well established.

In the making of long-time loans, instead of the usual amortization schemes whereby the borrower pays a certain sum each year, so apportioned as to result in the repayment of the principal together with all the interest at the end of a certain number of years, it has been thought best to allow some latitude both to the borrower and the associations. Ordinarily it will be found that the borrower will be in a better position to pay a proportionally larger part of the principal each year after the fifth, than to make annual payments the first few years equal to those made the last years during which the loan runs. It is also thought that if the borrower finds he can repay the loan before it is due, he should be allowed to do so without being penalized therefor.

To reduce as much as possible the cost of making loans, it is made the duty of the officers of the local associations to examine the application and submit a recommendation on it, and also to furnish such information as the officers of the State association may require relative to it. In order to protect the national association, the State association is made liable for the full amount of every loan made.

As will be observed, the money advanced by the national farm-loans association for use in making short-time loans can not exceed 2½ per cent of the par value of the outstanding bond issue, nor can it exceed the capital of the State association to which advanced. In addition to this sum, the State association may lend an amount not in excess of one-half of its capital. It is possible that during the early days of the system it will be found that these funds will not suffice to meet the demand for short-time loans, but it has been thought best to err on the side of safety. Some difficulty may be experienced in holding the local associations liable for these short-time loans, but it would appear that the advantages derived by the members of such local associations from affiliation with the State association would be a sufficient inducement to render them willing to pay such assessments as it might be necessary to make as well as to exercise all due caution in the making of such loans.

Provision is made for the disposition of the moneys collected so as to insure the payment of the interest and principal of the bonds issued by the national farm-loans association, the expenses of the National and State associations, and the repayment of the money advanced by the Government.

Since these associations are not organized for profit, it is thought wise to exempt so far as possible their bonds and mortgages from taxation, especially as these are merely evidences of indebtedness, either of the associations or of the members of the associations.

Mr. President, if the Senator from New Hampshire would consent to strike out the provision for the establishment of the joint-stock bank, I should feel that I would not have so much right to criticize the bill; but it is my sincere belief that those so-called joint-stock banks can not perform the functions of a rural-credit system. The joint-stock banks would be simply another financial banking institution, which would supersede the institutions which we now have; but this legislation is proposing to give them an undue advantage as against the institutions which are now in existence, in so far as it permits them to issue bonds which are to be exempt from taxation. I say that

some consideration should be given to the institutions which are now in existence.

As the State associations are dependent on the national association for practically all the funds with which to carry on business, it is thought that the power given the latter to refuse to advance funds will be sufficient to secure observance on the part of the former of the laws and by-laws regulating their operations.

As stated at the outset, the aim of this bill is to provide credit for farmers by forming associations of borrowers rather than of lenders. That is the only way you can form a real farm rural-credit association, by the borrowers and not by the lenders.

Loans based on farm lands ought to be the safest of all loans. Distrust of such loans can come only from a lack of knowledge on the part of the lender as to the security for the particular loan. The formation of a national association as proposed will relieve the lender from the necessity of inquiring as to the safety of any particular loan. With the affairs of such an association wisely administered its bonds should approach in safety that of our national bonds. They would be far safer than any of our industrial bonds or railroad bonds. There would be no opportunity for reckless directors or managers to speculate in the stock of the association, nor would there seem to be any temptation to unduly expand the loans. As the national farm-loans association will have no outstanding demand obligations, a nation-wide panic can affect it only indirectly through the possibly lessened demand for its bonds.

There may be those who believe that this bill contemplates too much governmental assistance to the farmer. The assistance, however, it should be noted, consists mainly in establishing the system and advancing some funds at the beginning of its operations. That there is need of some such system I firmly believe. Few people realize how small are the returns the average farmer enjoys as the result of his year's labor. As the result of investigations made by the Department of Agriculture the following is published in the department's Weekly News Letter, dated April 26, 1916, only a few days ago:

> * * * Recently 64 groups of farms in 19 States were studied in order to ascertain what the farmer obtained for his year's work after deducting the interest at 5 per cent on the value of his farm and other capital—in other words, to find out his labor income or wages. In each of these groups, which included altogether 4,400 farms—

That seems to me, Mr. President, to be a respectable number—

> the conditions were reasonably similar. In each group the farmers were divided into five numerically equal classes according to their labor incomes.
>
> It was found that although the average labor income for all the groups was only $387—

That is for the whole year—

> the average for the farmers in the first class—that fifth of the farmers who did best—was $1,421. In the second class it was $642. The last class—the fifth of the farmers who were least successful—got nothing for wages and lost, on the average, $517.

Instead of receiving pay for their labor, they lost $517:

> That is to say, the interest on the amount of money represented by their farm, stock, and equipment would have been $517 more than the farm returned them. It should be borne in mind in this connection that the labor income is merely the farmer's wages, and that the family has in addition, besides interest on investment, the use of the farmhouse and such fuel and food as the farm supplies free of money cost.

Now, it seems evident that even the class of farmers who were most successful can not prosper greatly if they have to pay the interest rates which farmers have to pay in many sections of this country. In the cases considered by the department, the interest on the investment was figured at 5 per cent. Obviously, in those places where the interest rate is twice this figure, the average farmer can not, if he is considerably in debt, pay the interest on his debt and make anything beyond a bare living.

To me it does not seem too much to ask the Government to enable the farmer to establish a rural-credit system which will make it possible for him at the end of the year to show a fair return for his year's labor, even though in doing so the Government may be asked for a limited time to extend aid by making deposits with the national farm-loans association.

Mr. President, I am not opposed to a rural-credit system; I am intensely in favor of a rural-credit system, but my fear is that the provisions of the pending bill will not give to the farmers the relief to which they are entitled. The rate of interest specified in the bonds should not be 5 per cent; it should not be above 4 per cent. Is there a Senator on this floor who would be willing to vote for an issue of Government bonds bearing interest at the rate of 5 per cent? The farm-loan bonds will be just as safe as Government bonds; why, then, should not the rate of interest be reduced? Is there a Senator on this floor who will say that in the older sections of the country the farmers can not now secure money at 6 per cent? So, what relief will you give to the farmers of the United States by passing this bill? The maximum rate of interest under this bill on farm loans should not exceed 5 per cent.

We all know that the man who is interested in a financial concern feels it is his obligation and his duty to treat that institution fairly. The man who becomes a shareholder or who acts as an officer in such an institution as a bank knows that there is an obligation binding upon him, and that he must see to it that that institution is cared for. You are permitting in this bill—and I say it in all seriousness to the Senator from New Hampshire—banking institutions to be exempt from taxation on their bonds as well as on their mortgages, and yet you make it possible for them to charge the farmer just as high a rate of interest as he is paying to-day.

Mr. President, as I have said, my fear is that the farmers of the United States will not be benefited by this bill unless we change it. I am very sure that the farmers in my section of the country will not submit to the provisions of this bill, with all its restrictions, under which they will be penalized and compelled to pay as high a rate of interest as they are now paying. For that reason, Mr. President, I say that I hope the Senator from New Hampshire will permit us to change some of the provisions in the bill.

I shall not vote against this bill; the Senator from New Hampshire knows that; I believe he knows that I intend to vote for it, because I believe in a rural-credits system; but I sincerely hope that the majority party will permit us to incorporate into this bill some of our ideas, which are practical ideas, and make it a better bill. I for one am perfectly willing to give the Democratic Party credit for it, but give us the opportunity to help you to improve it for the benefit of the American farmer.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER (Mr. THOMPSON in the chair). Does the Senator from North Dakota yield to the Senator from California?

Mr. GRONNA. I yield to the Senator from California.

Mr. WORKS. I understand the Senator to say that, in his judgment, this bill will be of no practical benefit to the farmers?

Mr. GRONNA. That is my belief.

Mr. WORKS. And yet the Senator says he is going to vote for the bill.

Mr. GRONNA. Yes; I am going to vote for it.

Mr. WORKS. I should like the Senator to explain his position a little in that respect, for I know the Senator is perfectly sincere in any view he may take; but I do not understand very well how the Senator can take that position. I think if we are going to pass a rural-credits bill we should pass one that will do some good, and that no legislation ought to be passed by Congress that is not going to benefit somebody.

Mr. GRONNA. Mr. President, I agree with the Senator from California that it is rather an embarrassing position to take. I have said that there are provisions in this bill which I can indorse. The bonding feature of this bill is, in my judgment, nearly perfect, and I am not complaining of that provision. What I object to is the rate of interest. The maximum rate of interest should not exceed 4 per cent, because the farm-loan bonds will be absolutely as good as Government bonds.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield further to the Senator from California?

Mr. GRONNA. I yield to the Senator.

Mr. WORKS. There may be some good things in this bill; I have no doubt there are; but when it comes to a final vote on the passage of the bill we have got to take it as a whole or let it alone; and the fact that there are some good provisions in it will not help the matter if, taken as a whole, it is not beneficial. It is that view of it which was appealing to my mind when the Senator was stating his position with respect to the bill.

Mr. GRONNA. Mr. President, the Senator from California is right; but I have the hope that at some time in the future the Congress of the United States will amend this bill. I am no prophet, but I do predict that the money appropriated for high-salaried officers under the system now proposed will be money thrown away, unless we can secure men as directors upon the farm-loan board and upon the various other boards who will see to it that the maximum amount specified in the bill will not be used; but that is a very unsafe proposition. No man who knows anything about financial affairs will risk his fortune to the good judgment of the other fellow. It may be that this bill will be of some help to the American farmer; but if it shall so happen that it will give the farmer relief, it will be because some men will be appointed on these boards who know more about the conditions than we who make this law.

As I said at the outset, the Senator from New Hampshire has given this bill close attention; he has devoted a great deal of time to it, and he deserves a great deal of credit for doing what he already has done; but no one man can hope to be able to change the whole financial system of a Government like the United States, where the welfare of a hundred million people is involved, without criticism, and I have called the attention of the Senate to some of the provisions of the bill which, in my judgment, are faulty, weak, and dangerous, but not with the idea of opposing a rural-credits system, because I am sincerely in favor of the right kind of a rural-credits bill.

The Senator from California asked me how I could explain my position when I attack certain provisions of the bill and then state that I will vote for it. It is only with the hope, as I have said, that at some time in the future this bill will be amended and improved, not altogether along the lines that I have suggested, but I believe that some of the provisions I have suggested will have to be incorporated into the law, if its provisions are to be successfully carried out and if it is to become a financial success.

Mr. President, I have here a letter from a gentleman, who I understand is not only a business man but a financier, whose name is James A. Johnston and whose post-office address is Poplar Bluff, Mo. I shall not take the time of the Senate to read his letter, but there are so many valuable suggestions in it that I ask to have it printed in the RECORD in connection with my remarks without reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

The letter referred to is as follows:

POPLAR BLUFF, MO., *February 3, 1916.*

Hon. ROBERT L. OWEN,
*Chairman Committee on Banking and Currency,*
*United States Senate, Washington, D. C.*

DEAR SIR: Referring to your favor of January 22, I beg to submit for your observation a few suggestions concerning S. 2986, introduced by Senator HOLLIS. You will observe that the page and line of said bill is referred to in this brief so far as specific suggestions are concerned.

Page 3, line 1: The words "10 years," I think, should be changed to "5 years."

(a) A man to serve in this place will need to have the experience of half a lifetime, besides a general reputation that will carry with it confidence. All of which follows hard work, and if he should enter on the duties of this post in the prime, his time should be terminated by statute just before he passes a point where ambition and efficiency begin to decline.

(b) Admitting a man of character will be selected. He may have professional ambitions and environments or business interests that will retain a hold upon him, and it is possible, for various reasons, for the appointee to fail, or, at any rate, not handle the work to an advantage. In such an event 5 years would be better for the banking system than 10.

Page 16, line 8. A definite territory should be designated, based either on area or population.

Page 16, lines 15 and 16: It would be a mistake to permit anyone to be a director who is not a stockholder. There would be much danger of business being choked to death.

Page 16, line 21: The president should be a man that is on the outside and in touch with the farming public—that is, active among them and associated in a way to have an opportunity to mix with them in order that farmers may have an opportunity to learn the advantages awaiting them under this law.

(a) In order to encourage the study of the detail, board meetings should be had at fixed periods, say every 15 days, members receiving $3, the president receiving $3.50 per attendance. On the publicity of the provisions under this section much depends, and board members must know the detail of the law, so they can explain it.

(b) (The writer has been a stockholder for nearly 20 years in our local building loan association, and a good portion of the time a member of the loan committee. One of the weak places was that not enough people were interested who knew the detail, and with whom the public came in contact, to encourage the patronage it was entitled to. Said association would be stronger to-day if it had the board meetings every 15 days and each member paid for his attendance.)

(c) The principle as well as the detail will have to be instilled in the borrower's mind, and the explanation must to a large degree come from some one of the association with whom said farmer is acquainted.

(d) For the further reason that the loan applications will have many provisions therein and will need to be fully explained to the borrower when taken home by him, there studied, and be explained again by the officer.

(e) If meetings are too long apart under such necessarily slow procedure, private loan companies, banks, and bankers will get one or more commissions before applicants and the board learn the detail and properly prepare the application.

(f) Every facility consistent with prudence and economy should be written into this section, for the success of the measure depends on applications; at least two members of the board should ever be in a position to encourage new business, as well as take care of that in the records.

(g) Publicity by placard in every post office in the county where association is located should be required.

Page 24, division B: This section in the opinion of the writer will make a weak point, for the reason that it would be considered unwise by the average man who has anything or expects to leave anything to indorse any piece of paper that is to be paid 5, 10, or 30 years hence. That being the feeling of the average individual, competition will use this clause to scare and intimidate those who might otherwise patronize the system. Division A furnishes all the responsibility and safety needed for the creditor. That being the case, everything else should be arranged for the purpose of getting business.

Page 26, line 11: If this certificate could be in $50 and multiples, and draw interest collectible by the bearer at maturity or semiannually at any loan association, bank, or post office, it would be the means of placing them with people who now keep such funds in their sock.

(a) A certain multiple, say $200, to be converted into coupon bonds at a rate higher than the certificate can draw.

Page 27, lines 13 and 18: Provisions should be made to cover all classes of mechanic liens, as they have priority over other liens in some States. In fact it would be a good idea to have all funds loaned to be paid out only on the order of the applicants, the borrower and the president and secretary of the association, the voucher relating purposes of the payment. In this way no money could go out in an improper channel.

Page 27, lines 19 and 20: "Five to 36 years." Thirty-six years is too long. Is there a member of your committee—aye, what Member of the entire Senate would want to indorse any kind of check, draft, or note that would be payable 36 years hence. Twenty years is long enough; and, furthermore, such liens as this may make bond sales weaker by having your farm-loan notes dated too long hence. There are a number of reasons, but the fact that said notes are to be indorsed and guaranteed by all the institutions that handle them is sufficient from a business standpoint to look impracticable. Twenty years is a long time. Trust companies and building loan associations, as a rule, try to have their paper turn over every 5 to 10 years.

Page 28, line 13: Maximum interest rates should be inserted, be it 5, 6, or 7 per cent.

(a) It might be advisable to schedule rate according to the time. For example, 5 years, 6 per cent; 10 years, 5½ per cent; 20 years, 5 per cent.

Pages 29 and 30: Could contain a clause providing that when proceeds of liens was expended on a building that insurance to be assigned to the local association.

(a) It might be that in the event of the destruction by fire the borrower would not have funds to replace and could not borrow from others on account of farm-loan association lien, and that in that way be forced to let property decline. A fire insurance clause would do no harm and might be well worth while for both borrower and the association.

Page 31, end of line 8: Without finding any fault with the contents of this and succeeding sections, would like to suggest as follows:

The essentials about this bill—first stability and second simplicity—in procedure to make it popular with the masses and beyond the influence of criticism; at any rate, the criticism of its enemies. As a whole, this measure is practical, but think it should be changed some, and by such change be better.

For example, to make it stronger and to give it assurance of confidence have all notes, bonds, and certificates of deposit made at one central bank at the seat of government, Washington, D. C. Capital stocks, say, fifty to one hundred million dollars, one half paid in the funds, for the first half to be raised by and paid in by the Federal Government, a part of which might be raised from the sale of bonds, a portion with cash; the other half of the capital stock to be retained in the treasury of said institution to be subscribed and paid for by the State Federal land bank as hereinafter suggested. State Federal land bank to be at seat of State government, capital stock one or two millions, according to the population of the State, and subscribed and paid in the same manner as national institutions.

The national farm-loan association, with each application for a loan, also have application for shares of stock in the State institution for an amount equal to 5 per cent of the loan applied for. The State institution to do likewise with the national institution at the seat of Government. In this way the Government will some day be relieved of all the money it has paid in. This is a slight deviation from the plans you have outlined; it might be stronger and better.

Among the other features that would add to its strength and usefulness would be to have the national institution at the seat of Government issue all of the certificates of deposit and in small denominations drawing a certain small interest rate, sell them or charge them to the State institution, to be countersigned and indorsed and sold to the public or to the national rural association, and to all postmasters in said State of a certain class office, to be by them countersigned and sold to the public. Said certificates would be payable on fixed dates with interest, and could be made so as to be exchanged at will for bonds of a higher rate of interest and issued by the national institution, the bond issues to be sold through the same channel or on the open market. Said bonds of course to be issued on liens that have originated with the rural loan association under a detail that almost insures stability and safety. And if it could be done without too much danger of errors, to issue at the national institution a certain ratio of bonds and a certain ratio of currency on the liens gathered from said rural association and indorsed by them and the State institution. It would cut down the interest to be paid and furnish a good circulating medium besides.

(a) For example, $50,000 in notes and liens sent to the national institution by the State institution, on the group, national institution to issue, say, $25,000 in currency. Currency to go direct, $25,000 bonds either sold on open market or sent to State institution.

(b) This would be of the same class of currency as regional law issues on two-name paper, only in this case you have one name and the property and the two banks that indorse it. But under the regional law bank's names are ignored and the two-named paper make the base. In this case it looks as though it would be safe to issue currency against one-half of said notes, other one-half in bonds, all of which to be canceled when security is paid.

Page 32, line 15: Associations should not be permitted to buy land under any circumstances as an investment or otherwise except at sale under its own liens or to protect its lien, and then only when the public will not bid the amount of that lien or liens.

(a) Bondholders will soon learn to like the plan if its resources are always liquid as planned, but if the system permits local associations to get land dumped on them, competition will show it up as having a weak link.

Section 19, D. C., page 41, line 8: This section can not be of much use to farmers, inasmuch as a bank the size stipulated therein would need to be in a city to find the capital for such an organization, and capital in such cities would, if invested in any bank, get into one having other advantages.

(a) And if they did organize would not stand much show to get deposits with the depositing public. Their competitors would see to that on account of the long-time real estate paper and bonds, and their turnovers would most likely be too slow to allow them a net profit after buying time deposits, and meeting competition on loans. If this bank could be one in a State or given territory, and be the middle step

between the farm-loan association and the Federal land bank, it would be a strong link. As it now reads it is doubtful if it will be of any real value as a relief to farmers.

Page 50, line 24: Suppose that on account of the fact that larger and extensive industrial companies, manufacturers, warehousemen, railway, and other borrowers have to (which they are doing now at an enormous rate per month) get their money in the United States for the next 5 to 10 years, which looks at this time as they will do, can the farm-loan bank sell their liens in competition? If they can not, then, of course, they can not supply money for farmers. Such a condition is the case now; that is, no bank with funds on hand that they can, or will, lend to him except for a short time. In order to be its real self and be useful the Federal land bank or banks should have authority to issue a certain amount of circulating medium based on the liens they hold. Such would be new funds in circulation.

All certificates of deposit and all bonds would have a better standing if issued by one bank under proper restrictions; likewise the currency; and if it is considered unwise to have a bank issue the currency, it might be that it could be made to read so the Federal Treasurer could issue money on said liens with and under certain restrictions. The saving of this interest, together with the assurance of the funds, may mean the success of the measure; funds insufficient will also insure its failure.

Criticism of this plan would be based on the principal of a single or central bank, and which would be justifiable if said central bank controlled personal credit. That is, if it was a personal application, and whether or not the applicant got the accommodation depended on the state of mind, opinion, pleasure, or displeasure of the acting official, as is the case in every bank in the United States to-day. But inasmuch as the credit line defined is based on documents and declarations by applicants, appraisers, and others no personal credit will be at stake. Therefore one bank can issue all the credit needed under the detail of the law and do it better, and for less expense, than a dozen or more could. The detail of the law can and will be used to protect the lien holders.

All national-bank methods of the past, all the State banks customs so far as they relate to credit, can be eliminated when we consider this bill, for they are in no way akin. Each of the above-named banks are supposed to do business largely on individual responsibility, in a general way—that is, responsibility as a whole—while your plan deals with the individual in a specific way; that is, you have a specific indestructible thing of his nailed down and sowed up tight, and as a farmer would say "hog tied," and the only danger about the plan is getting the property. Therefore you can afford to deviate entirely from the State and national-bank rules.

Trust companies in this State are selling a great many liens cut up into one to five hundred dollar denominations, to be paid off at fixed periods and sold to the depositing public who prefer them to pass books, and indeed it is a protection to the individual who wishes to be about his own business, be he laborer, guardian, custodian, or retired business person who gets the interest and has the lien for protection. From this class you raise a great deal of money, but this plan, or any rural-credit system you launch, will need a system of automatically furnishing its own resources in order to insure its success.

The late Sam Jones, one time, in delineating his desire and capacity to talk to the rank and file, said one time he had occasion to talk to an audience of colored people, and after he had finished one old black mammy came forward to greet him and said: "Brother Jones, youse got a white skin, but thank the Lord youse got a black heart."

Now I, to a certain and limited extent, know the needs of the farmer for the following reasons: First, I was on a rented farm the first half of my life, the last half of it I have been dealing, a part of the time quite extensively, with farmers, merchants, manufacturers, and banks, and to a considerable extent know their ups and down, needs and abuses of credits, and if you would formulate a set of questions and send them to one or two thousand persons situated and experienced as the writer, you would get a detail not possible for the average lawyer to know, and around such information and facts it would be easy to wrap the law.

If there be any specific question that you would like to ask or any data at my command that you may need, will be glad to supply it on request.

Hoping that this document will be of some use to you, I remain,

Yours, very truly,

JAS. A. JOHNSTON.

Mr. GRONNA subsequently said: Mr. President, I offer a substitute for the pending bill, and I ask unanimous consent to have it printed in the RECORD in connection with the remarks which I made this afternoon. I discussed the provisions of the bill quite thoroughly; I took, I think, an hour or more in doing so, and I do not feel warranted in delaying the action of the Senate on the bill at this time, for I understand that the Senator from New Hampshire [Mr. HOLLIS], having the bill in charge, is anxious to have it passed this evening.

The VICE PRESIDENT. Without objection, the substitute submitted by the Senator from North Dakota will be printed in the RECORD. The Chair hears none.

The substitute referred to is to strike out all after the enacting clause of the bill and insert the following:

That the national farm-loans association of the United States be, and is hereby, created and established for a term of 50 years from the date of filing with the Comptroller of the Currency of a certificate of paid-in capital stock as hereinafter provided. Said association shall have a capital stock of $50,000,000, but shall be authorized to commence business when 10 or more State associations shall have been organized, as hereinafter provided, and shall have made the required subscriptions to the capital stock of the national farm-loans association. The capital stock of said association shall be divided into shares of $100 each. The outstanding capital stock may be increased from time to time as State associations increase their capital or as additional State associations are organized under the provisions of this act. The head office of the national farm-loans association shall be located in Washington, in the District of Columbia.

SEC. 2. That upon duly making and filing with the Comptroller of the Currency the certificate hereinafter required the national farm loans association shall become a body corporate, and as such and by that name shall have power—

First. To adopt and use a corporate seal.

Second. To have succession for a period of 50 years from the date of said certificate.

Third. To make all contracts necessary and proper to carry out the purposes of this act.

Fourth. To sue and be sued, complain, and defend in any court of law or equity as fully as a natural person.

Fifth. To elect or appoint directors and officers in the manner hereinafter provided and define their duties.

Sixth. To adopt by its board of directors by-laws, not inconsistent with the provisions of this act, regulating the manner in which its property shall be transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed.

Seventh. To purchase, acquire, hold, and convey real estate as hereinafter provided.

Eighth. To exercise by its board of directors or duly authorized committees, officers, or agents, subject to law, all the powers and privileges conferred upon the national farm-loans association by this act.

SEC. 3. That all subscriptions to the capital stock of the national farm-loans association shall be by State associations organized as hereinafter set forth. Each such State association shall subscribe for stock in the national farm-loans association in the amount of at least 50 per cent of its own subscribed capital, but no State association shall be required to subscribe for more than $2,000,000 of such stock in any event. Each State association shall pay at least 20 per cent of its subscription in cash; one-half of the remainder shall be paid in one year from the date of the organization of such State association, and the remaining one-half shall be paid in two years from the date of such organization. When any State association increases its capital it shall subscribe for an additional amount of stock in the national farm-loans association equal to one-half of such increase in its own capital stock, 40 per cent of which shall be paid in cash and the remainder in one year from the date of such increase.

SEC. 4. That there may be organized in each State a State association in the manner hereinafter set forth. Such State association shall have a capital stock of not less than $50,000, but it may at any time increase its capital stock to not more than $5,000,000. Such stock shall be issued in shares of $25 each, and no one person, organization, or association of persons shall hold more than 10 such shares. Such State association may begin business when a certificate of paid-in capital stock is filed with the Comptroller of the Currency as hereinafter provided. One-half of the subscriptions for stock in such State association shall be paid in cash and the remaining one-half shall be paid in one year from the date of organization. Each such State association shall subscribe to the cpital stock of the national farm-loans association as hereinbefore provided. Such State associations shall have the same general powers enumerated in section 2 of this act, and may exercise them in any manner not inconsistent with the provisions of this act or the by-laws adopted by the national farm-loans association.

SEC. 5. That the Secretary of the Treasury, the Secretary of Agriculture, the Comptroller of the Currency, and two members to be named by the President of the United States are hereby constituted a committee to effect the organization of the national farm-loans association and State associations. Within 30 days after the passage and approval of this act the President shall appoint the two members indicated, who shall be paid a salary at the rate of $500 per month until such time as the board of governors hereinafter provided for have been elected and assumed office, when their duties and salaries shall wholly cease and determine. Within 15 days after the appointment of such members the committee shall meet in the city of Washington, at a time and place to be designated by the Secretary of the Treasury, and shall proceed to organize by electing a chairman and a secretary. Said committee shall have power to employ such clerks, stenographers, and other employees as may be necessary. The necessary expenses of said committee shall be payable out of the Treasury upon vouchers approved by the chairman of the committee, and the sum of $100,000, or so much thereof as may be necessary, is hereby appropriated for this purpose out of any unexpended balance in the Treasury. The committee shall elect one person in each State as its agent, hereinafter called the State agent, who shall receive applications for membership in the State association in such State and subscriptions to stock in such State association. The State agent shall open an office at a place within the State to be designated by the committee and shall announce by public advertisement that he has been designated to receive applications for membership in the State association and subscriptions to the stock of such State association. When his office has been open for the receipt of applications and subscriptions for a period of 30 days he shall transmit a full report to the committee on organization. If it shall appear that subscriptions of not less than $50,000 have been received the committee shall, under such rules and regulations as it may deem necessary, authorize said State agent to receive the 50 per cent payments on such subscriptions. Said State agent shall also within 15 days from the receipt of such authorization, under regulations to be prescribed by the committee, provide for an election of directors by the persons subscribing to the capital stock of such State association. Such directors shall have such qualifications and shall hold office for such terms as are hereinafter set forth. If it shall appear from the report of the State agent to the committee on organization that subscriptions in the amount of $50,000 have not been received he shall by public advertisement announce that his office will remain open for the receipt of applications and subscriptions for another period of 30 days; if at the end of such additional period the required amount has not been subscribed the office of the State agent shall be closed. No State agent or officers of a State association shall refuse to receive subscriptions to the capital stock of such association until such subscriptions total $5,000,000, but no subscriptions shall be received from any person who is not an actual farmer residing within the State in which such association is organized.

SEC. 6. That 15 days after the election of the directors of the State association they shall meet at a place and on a day to be designated by the State agent and proceed to organize by electing a president, vice president, secretary, treasurer, and such other officers as may be necessary. They shall also adopt a body of by-laws which shall be submitted to a referendum vote by the subscribing members of the State association. The president and secretary shall execute a certificate in duplicate setting forth the name of the association, the amount of capital stock subscribed, the number of stockholders, and certifying that the State association has made the required subscription to the stock of the national farm-loans association. One copy of this certificate shall be filed with the Comptroller of the Currency and one copy with the committee on organization. The subscription of said State association to stock in the national farm-loans association shall become due 15 days after the orgazination of the said board of directors. On the organization of the board of directors the powers of

the State agent shall cease. Such State agent shall submit a full report of his operations to the committee on organization.

SEC. 7. That not later than 15 days after the organization of the board of directors of any State association said board shall make provision for the election of a member of the board of directors of the national farm loans association, under such rules and regulations as the committee on organization shall prescribe. Such directors of the national farm-loans association shall have such qualifications and shall be chosen for such term as is hereinafter set forth.

SEC. 8. That as soon as State associations have been organized in not less than 10 States and directors of the national farm-loans association have been chosen in such States such directors shall meet in the city of Washington at a time to be designated by the committee on organization, and shall organize by electing a president, vice president, secretary, treasurer, and such other officers as may be necessary. Immediately after such organization they shall adopt a body of by-laws, not inconsistent with the provisions of this act, governing the operations of the national farm-loans association. On a demand of one-third of the directors present any part of the by-laws shall be submitted to a vote of the members of the various State associations. On a similar demand any proposed subsequent changes in the by-laws shall be similarly submitted. The board of directors shall also elect five members of a board of governors, whose duties and terms of office shall be such as is hereinafter provided. Within 15 days after their election and qualification the president and secretary of the board of directors shall execute a certificate setting forth the fact of the organization of said board, the number of State associations which have subscribed to the capital stock of the national farm loans association, and the amount subscribed by each such State association, which shall be filed with the Comptroller of the Currency.

SEC. 9. That the national farm-loans association shall be governed by a board of governors, consisting of seven members, two of whom shall be appointed by the President of the United States, by and with the consent and advice of the Senate, and the remaining five of whom shall be elected by the board of directors, but the members elected by the board of directors may be removed by a two-thirds vote of such directors, and the members appointed by the President may be removed by the President on charges made either by the board of directors of the national farm-loans association or by the board of directors of any of the State associations. The members of the board of governors shall be paid a salary of $7,000 per annum. Members appointed by the President shall serve five years from the date of appointment. Of the five members of the board of governors elected by the board of directors at the first election one shall serve one year, one two years, one three years, one four years, and one five years; thereafter the term of each member shall be five years, and if any vacancy occur the person elected to fill such vacancy shall, under such election, serve only the remainder of the unexpired term. The board of governors shall perform all the duties necessary to carry out the purposes of this act under the provisions of this act and the by-laws of the national farm-loans association in a manner to be prescribed by said by-laws. Until the election and qualification of the board of governors such powers shall, so far as may appear necessary, be exercised by the committee on organization. On the election and qualification of the board of governors the powers and duties of the committee on organization shall cease, and all duties and powers which it may thereafter be necessary to exercise in connection with the organization of any State associations shall be exercised by the board of governors.

SEC. 10. That the board of directors of the national farm-loans association shall consist of one member from each State in which a State association has been organized as provided in this act, who shall be elected by the members of such State association. Each such director shall be a member of the State association of the State from which elected, shall be engaged in farming, and shall be a resident of the State from which elected; the national farm-loans association may by by-laws prescribe further qualifications. The directors and officers of the board shall receive such compensation as the by-laws may prescribe. A director may be removed by a two-thirds vote of the board of directors or by a majority vote of the members of the State association whom he represents. The directors shall be divided into five classes. Those from the following States shall constitute the first class: Alabama, Michigan, Missouri, Nevada, North Dakota, Oklahoma, Pennsylvania, Vermont, Virginia, and Washington. Those from the following States shall constitute the second class: Arizona, Kansas, Kentucky, Massachusetts, Mississippi, New Jersey, North Carolina, Washington, West Virginia, and Wyoming. Those from the following States shall constitute the third class: Arkansas, California, Colorado, Connecticut, Georgia, Indiana, Iowa, Maine, Maryland, and Montana. Those from the following States shall constitute the fourth class: Delaware, Idaho, Louisiana, Minnesota, Nebraska, New Mexico, Ohio, Rhode Island, and South Carolina. Those from the following States shall constitute the fifth class: Florida, Illinois, New Hampshire, New York, Oregon, South Dakota, Tennessee, Texas, and Utah. At the first meeting of the board of directors it shall be determined by lot the terms of which class shall expire in one year, in two years, in three years, in four years, and in five years. Thereafter all directors shall be elected for terms of five years, except that a person elected to fill a vacancy shall serve under such election only the unexpired term of his predecessor.

SEC. 11. That each State association shall be governed by a board of directors to be elected by the members of such association, and shall consist of one director from each local association hereinafter provided for, but the number of such directors shall not be less than 10, and the State associations may at any time, by a referendum vote, change the number. Such directors shall at their first meeting be, by lot, divided into three classes. The terms of the first class shall expire one year from the date of organization of the State association, the terms of the second class in two years, and the terms of the third class in three years. Thereafter all directors shall be elected for a term of three years, but if a vacancy occurs the person elected to fill such vacancy shall under such election serve only the unexpired term. A person to be eligible as a director of a State association must be an actual resident of the State, must be engaged in farming, must be a member of a local association, and must be a stockholder in the State association. The by-laws of the State association may prescribe additional qualifications. The board of directors shall organize by electing a president, vice president, secretary, and treasurer, and they may elect such other officers and employees as shall be authorized by the by-laws of said association. The directors shall serve without pay, but the officers and employees of the association may be paid such compensation for services actually rendered as the by-laws shall prescribe. Any director may be expelled by a two-thirds vote of the total number of directors and may be recalled by a majority vote of the local association or district which he represents.

SEC. 12. That local associations may be formed by any number of persons, not less than 50, actually engaged in farming, covering a territory of not more than 25 square miles, but the board of directors of the State association may authorize local associations covering a greater territory in sparsely settled sections. Each such local association shall be governed by a council, the members of which shall be elected by a majority vote of such association. Such council shall consist of seven members; the local association may by a majority vote change such number, but in no case shall the council consist of less than five members. Each local association shall have the power to adopt such by-laws necessary for the carrying out the purposes of its organization as are not inconsistent with the provisions of this act or with the by-laws adopted by the national farm-loans association and the State association in the State in which located. The members of the council shall be elected for a term of one year. The local association shall also elect by majority vote a president and a secretary, and such other officers as its by-laws may authorize. All officers shall be elected for a term of one year. The president of the local association shall be chairman of the council ex officio. Any person actually engaged in farming and of good character may become a member of a local association, but such association may by a two-thirds vote of all its members exclude an applicant or expel a member.

SEC. 13. That all elections of members of the board of directors of the national farm-loans association and the boards of directors of the different State associations, and all votes on questions submitted to the members of such associations, shall be by secret ballot. Ballots shall be mailed to all qualified electors in each State by the officers of the State association not more than 10 nor less than 6 days before the day of election; after having marked the ballot so as to indicate his choice the elector shall, on the day designated as election day, mail it in a sealed envelope directed to the president of the State association. Such envelopes shall not be opened except in the presence of the canvassing board, to be constituted as shall be prescribed in the by-laws of the State association, which board shall proceed to canvass the votes on a day not later than 10 days after the date of election. The canvassing board shall certify to the board of directors of the national farm-loans association the results of all votes for directors of the national farm-loans association and on all questions submitted to the electors by the national farm-loans association, and shall certify to the board of directors of the State association the results of all votes. The boards of directors of the national farm-loans association and State associations shall prescribe such further regulations as may be necessary to insure the secrecy of the ballot and a correct and honest count of the votes. Each State association may by its by-laws prescribe other modes of electing members of the board of directors of such State association, but in no event shall the secrecy of the ballot be permitted to be destroyed, nor shall such directors be elected otherwise than by a direct vote of the members of such State association. Elections of members of the council of each local association shall be by secret ballot in such manner as such local association shall prescribe.

SEC. 14. That every member of a local association in good standing shall be qualified to vote at elections for members of the council of such local association and on all questions coming before such local association. Members of local associations who have subscribed to the stock of the State association, or are owners of such stock, shall be qualified to vote for members of the board of directors of such State association and for members of the board of directors of the national farm-loans association and on all questions submitted by the national farm-loans association and the State association; but no one shall be entitled to vote in a State of which he is not an actual resident, and no one who is not a member of a local association, an no one who has not subscribed to the stock of the State association, or is not the owner of such stock, shall be qualified to vote for directors of the national farm-loans association or State association, or on any questions submitted by such associations. Each elector shall have only 1 vote, irrespective of the number of shares of stock he may hold.

SEC. 15. That on the organization of the national farm-loans association, as hereing provided, the Secretary of the Treasury shall deposit with such association the sum of $5,000,000. He shall further deposit with such association the sum of $200,000 on proof of the organization of any State association with a subscribed capital of not less than $50,000, and the subscription by such State association to the capital stock of the national farm-loans association in the amount and in the manner hereinbefore provided. If a State association shall be organized with a capital greater than $50,000, he shall deposit in addition to the sum of $200,000 such additional sum as shall be equal to the amount by which the subscribed capital stock of such State association exceeds $50,000, and if a State association shall increase its capital stock in the manner prescribed he shall, on proof that such State association has made the required additional subscription to the capital stock of the national farm-loans association, deposit an additional sum equal to the amount by which the capital of the State association has been increased.

SEC. 16. That the national farm-loans association shall have power to borrow money and to issue bonds for this purpose. Such bonds shall bear interest at the rate of 4 per cent per annum, payable semiannually. They shall be issued for such terms as may be decided by the board of directors, not exceeding 20 years, and the privilege shall be retained of paying such bonds at the end of five years or any time thereafter on any date on which interest is due on the giving of such proper notice as may be provided by the board of directors. The board of directors may change the rate of interest, but it shall not be increased above 4 per cent per annum until such action has been authorized by a vote of a majority of the qualified electors. As security for such bonds there shall be held at least an equal amount in face value of mortgage or deed-of-trust farm loans (and of bonds or notes secured thereby), or of such mortgage or deed-of-trust farm loans and lawful money.

SEC. 17. That the national farm-loans association shall have power to make loans on farm lands through the State associations organized under the provisions of this act. The money loaned by the association shall consist of such funds as have been advanced by the United States to the national farm-loans association and such funds as have been obtained by the sale of bonds as hereinbefore provided, but a reserve of 5 per cent shall be maintained against such bonds. Such part of said reserve as the board of governors shall decide may be deposited in any Federal reserve bank, and an amount not exceeding one-half of such reserve may be advanced to the different State associations for the making of short-time loans having a term of not more than nine months.

SEC. 18. That long-time loans made by the national farm-loans association shall be for terms of not less than one year nor more than 20 years. Such loans shall bear interest at the rate of 5 per cent per

annum, payable annually, but the board of directors of the national farm-loans association may reduce such rate. Every contract for a loan for more than five years shall contain a clause providing that five years after the date of the loan and every year thereafter there shall be due and payable, in addition to the interest, a part of the principal, which shall in no case be less than 5 per cent of the original loan; after each such payment interest shall be computed only on that part of the principal remaining. The contract shall also give the borrower the right to pay a larger part of the principal if he so desires on any day on which interest is due, and shall give him the right to pay the entire loan at any time on paying at the same time the interest that would be due on the next interest-due date. The board of directors of the national farm-loans association shall prescribe the purposes for which long-time loans may be made, the maximum and minimum amounts of such loans, the ratio which the loan may have to the value of the land on which made, and such other conditions of the loan as are not inconsistent with the provisions of this act.

SEC. 10. That all applications for long-time loans shall be submitted to the local council or its officers, who shall forward it to the president of the State association, together with a report on the value of and security offered, the standing of the applicant in his community, and such other information as may be required, and a recommendation in the matter. On the receipt of such application the president of the State association, or such officer as may be designated by the board of directors for the performance of such duties, shall, after having obtained such further information as may be necessary in the case, pass on the application without undue delay. If he rejects the application, the applicant shall have the right to appeal from such action to the board of directors of the State association, under such rules and regulations as the board of directors of the national farm-loans association shall prescribe. When an application is approved, the national farm-loans association shall, on a call signed by the president of the State association, forward funds in the amount approved. There shall be transmitted to the national farm-loans association, with the indorsement of the president of the State association, all notes, obligations, and evidences of indebtedness on which such loan is made, and the indorsement shall create a binding obligation on the State association for the payment of said loan at maturity, together with the annual installments of interest, and for this obligation the capital of the State association shall be liable. Any actual farmer, whether or not a member of a local association, and whether or not a stockholder in the State association, may submit an application for a loan; and loans may be made to such nonmembers on the same terms as to members. No loans shall be made on any other property than farm lands.

SEC. 20. That short-time loans for a period of not more than nine months may be made by the State associations on such security and under such regulations as such State association shall by their by-laws prescribe. Each State association may make such loans to the extent of one-half of its paid-in capital, and to the further extent of such sums as the national farm-loans association may advance for such purposes, but the national farm-loans association shall in no case advance a greater sum than the par value of the capital stock of such State association. Applications for short-time loans shall be submitted to the officers of the local association, and unless approved by them, the application shall not be allowed. If approved by them, the State association shall forward to the president of the local association the amount approved, with directions to pay the same over to the applicant on the deposit of the security required. For the payment of such loans the local association shall be liable to the State association. Such loans shall pay interest at the rate of 6 per cent per annum.

SEC. 21. That there shall be no discrimination against an application for a loan shown by any officer of the national farm-loans association or of any of the State and local associations because of the race, creed, political belief, or previous condition of servitude of the applicant, but this shall not be held to prevent such officers from giving due weight and consideration to the applicant's character, thrift, mode of life, and standing in his community.

SEC. 22. That all collections of the interest on long-time loans and the principal of such loans shall be made by the officers of the respective State associations in accordance with such regulations as the board of governors may prescribe. Moneys so collected shall be transmitted to the national farm-loans association, but the board of governors may deposit any part of such moneys with the State association collecting them. Money paid as part or all of the principal of a loan shall be used only for the following purposes: First, to pay the principal of such bonds as may be due or may be subject to call; second, to make a long-time loan as provided in this act. Moneys collected as interest on long-time loans shall be distributed as follows: There shall be paid (a) the actual expenses of the national farm-loans association; (b) the interest due on the bonds issued by the national farm-loans association; (c) an amount to each State association equal to 10 per cent of the stock of the national farm-loans association held by such State association. Of any proceeds remaining one-half shall be paid into the Treasury of the United States and the remaining one-half shall be paid to the different State associations in proportion to the average amount of outstanding long-time farm loans made through each State association, such average to be computed in such manner as the board of directors of the national farm-loans association shall direct. The amounts paid into the Treasury of the United States shall be credited against the sums advanced to the national farm-loans association by the United States, and when such payments equal the sum total of such advancements the debt to the United States shall be considered canceled, and thereafter such payments shall not be made.

SEC. 23. That all collections of the interest and principal of short-time loans shall be made by the officers of the local association or by the officers of the State association, as the board of directors of such State association may direct. Moneys paid as the principal of such loans shall be used only to repay advancements made to the State association by the national farm-loans association or to make other short-time loans as provided for in this act. Moneys paid as interest shall be used to pay the expenses of the State association incurred in making such loans, including any losses from such loans; the remaining profits shall be distributed in such manner as the board of directors of the State association shall direct. Moneys received by the State association from the national farm-loans association, as provided in section 22 of this act, shall be used to pay the expenses of the State association in the making of long-time loans, including any losses which may have resulted from such loans; the remainder shall be distributed as the board of directors of the State association may direct.

SEC. 24. That the bonds issued by the national farm-loans association under the provisions of this act, together with the interest thereon, and all notes and mortgages taken by the national farm-loans association upon farm lands shall be free from all taxation of every kind, National, State, and municipal, but this exemption shall not extend to real estate actually owned by the national farm-loans association or by any of the State associations.

SEC. 25. That the shares of the capital stock of the national farm-loans association shall not be transferable, and under no circumstances shall they be hypothecated, nor shall they be owned otherwise than by the subscribing State associations, nor shall they be owned by such associations in any other than in the proportion herein provided, but the board of directors of the national farm-loans association may, in the event the subscriptions of State associations should exceed the authorized capital stock of the national farm-loans association, apportion such stock among the State associations in proportion to their capital, without regard to the requirement that each State association shall subscribe for an amount of stock equal to 50 per cent of its own capital; but if a State association should surrender its charter or decrease its capital to such an extent that the amount of the stock of the national farm-loans association owned by it is in excess of 50 per cent of its capital, the remaining State associations may be required to take over this surplus stock up to 50 per cent of their respective capitals. If at any time the outstanding capital stock of the national farm-loans association shall exceed 50 per cent of the combined capital of the State associations, such excess stock shall be retired and the shares canceled, and the State association holding such excess shares shall be paid their par value.

SEC. 26. That each State association shall have power to increase and decrease its capital within the limits provided in this act. Each State association may also decrease the number of shares of its stock which any one person may hold to any number not less than one, and may require any person holding such stock in excess of such amount to dispose thereof to any applicant for the purchase of such stock who is a member of a local association, at the market value of such stock, in no case less than par, but no person who is already the owner of stock in such association shall hereby be given the right to demand the sale of stock to him, nor shall anyone be given the right to demand the sale to him of more than one share of stock. When the number of shares which any one person may hold has been decreased, it shall not again be increased unless such increase shall be approved by a majority vote of the members of the State association, and in no case shall such number be increased to more than 10.

SEC. 27. That whenever the capital stock of a State association is increased or decreased, the president and secretary of such association shall execute in duplicate a certificate showing such increase or decrease; one copy of this certificate shall be filed with the Comptroller of the Currency and one copy with the board of governors of the national farm-loans association. If the capital stock of the national farm-loans association shall be increased or decreased, the president and secretary of the board of directors shall execute and file with the Comptroller of the Currency a certificate showing such increase or decrease.

SEC. 28. That the stockholders in every State association shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such association, to the extent of the amount of their stock therein, at the par value thereof, in addition to the amount invested in such stock. Persons holding stock as executors, administrators, guardians, or trustees shall not be personally subject to any liabilities as stockholders; but the estates and funds in their hands shall be liable in like manner and to the same extent as the testator, intestate, ward, or person interested in such trust funds would be if living and competent to act and hold the stock in his own name.

SEC. 29. That the national farm-loans association and the various State associations organized under the provisions of this act may purchase, acquire, hold, and convey real estate for the following purposes and for no other:

First. Such as shall be necessary for the immediate accommodation of their boards of directors and officers in the transaction of the business of such associations.

Second. Such as shall be mortgaged to them in good faith by way of security for debts and loans.

Third. Such as shall be conveyed to them in satisfaction of debts previously contracted in the course of their dealings.

Fourth. Such as they shall purchase at sales under judgments, decrees, or mortgages held by said associations, or shall purchase to secure debts due to them.

But the national farm-loans association and the State associations shall not hold the title and possession of any real estate, except such as is acquired for the first-named purpose, for a longer time than five years.

SEC. 30. That there shall be an examining board elected annually by the board of directors of the national farm-loans association from among their own number, excluding the officers of the association. It shall be the duty of this board to make a careful examination of the condition and the business of the national farm-loans association and of all the State associations at least once every year and to make a full report to the board of directors. Similarly there shall be an examining board to be selected by the board of directors of each State association, which shall examine the condition and business of such State association at least once a year and which may, when deemed necessary, inquire into the management of the local associations in such State. Such board shall make a full report to the board of directors of the State association.

SEC. 31. That each State association shall make a monthly report to the board of governors of the national farm-loans association showing its operations for the preceding month, and in addition thereto shall make an annual report, one copy of which shall be forwarded to the board of governors and one copy to the Comptroller of the Currency. The board of governors shall similarly make monthly and annual reports to the Comptroller of the Currency. The board shall also make an annual report to Congress, showing the operations of the national farm-loans association during the preceding year, together with the operations of the State associations, and shall include in such report the annual reports of the State associations. The national farm-loans association and the State associations shall make public abstracts of their annual reports. The Comptroller of the Currency shall have power, whenever it is deemed necessary and proper, to cause examinations to be made of the affairs of the national farm-loans association and the State associations in the same manner as examinations are made of national banking institutions.

SEC. 32. That whenever it is found that the officers of a State association are conducting their business in violation of the provisions of this act or of the by-laws of the national farm-loans association, the

board of governors shall, with the approval of the board of directors of the national farm-loans association, refuse to advance any further funds to such State association for the making of either long-time or short-time loans, and may require the repayment of all such funds previously advanced. Further funds shall be advanced to such State association only when the offending officers have been removed and assurances have been given that the offensive practices will be discontinued.

SEC. 33. That Congress reserves the right to alter or amend the provisions of this act, to take effect at the end of any decennial period from and after the organization of the national farm-loans association.

Mr. HOLLIS. Mr. President, I have listened with the deepest interest to the very able address by the distinguished Senator from North Dakota [Mr. GRONNA]. He is a good farmer, an accomplished banker, a patriotic citizen, and a sound legislator. We had the benefit of his advice throughout the deliberations of the Senate Banking and Currency Committee. He attended faithfully, as he always does; and there are many provisions in this bill that are due to his advice. We received the greatest help from his opinion.

A year ago Congress established a joint committee to prepare a bill on the subject of rural credits. That committee met the 1st of November. It spent two solid months, meeting mornings and afternoons, preparing a bill. In previous Congresses some twenty or more bills had been introduced, and the joint committee took the one that it thought had the most merit. Starting with that bill, the joint committee prepared the bill that is now before the Senate, with a very few amendments made by the Senate Banking and Currency Committee; so that the bill which is now before the Senate is the result of the work of many, many men who have been interested in this subject, and it does not represent the views of any one man particularly. It represents the composite of the views of many men.

I was particularly struck with what the distinguished Senator said about the quality of the men who are to put this system into force. He is exactly right about that. Unless there are good and learned and able banking men to get behind this system and make it a success, it will be a failure. That is so with every law that is passed. It is so with every form of government that is devised. Unless the men behind the guns are faithful, the guns will not be effective.

I should feel very much gratified if I could agree with the Senator in some of the criticisms he makes of the bill, some that he has previously made, and some that have not been adopted in the bill; but I think the bill has been very, very carefully considered. I do not want the Senator to think that I want to shut off debate on any amendmnt he may offer. I do not feel that way. I made the motion to lay the other amendment on the table merely because it had been discussed for four days.

Mr. GRONNA. Mr. President——

Mr. HOLLIS. I yield to the Senator from North Dakota.

Mr. GRONNA. I will only suggest to the Senator that before a vote is taken on the pending bill I shall ask the privilege of having a vote upon my bill as a substitute for it.

Mr. HOLLIS. Yes; I understand that, and the Senator will undoubtedly have that opportunity.

If there is no amendment pending, I want to make a few verbal changes and corrections in the bill to perfect it.

The PRESIDING OFFICER. The bill is still in Committee of the Whole and open to amendment.

Mr. HOLLIS. On page 53, line 3, after the word "mortgages," I move to insert the words "and bonds."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. After the words "first mortgages," in line 3, page 53, it is proposed to insert the words "and bonds."

Mr. HOLLIS. That is for the reason that we are here dealing with the security that is put up for an issue of farm-loan bonds, and the bill provides elsewhere that that may be United States bonds as well as mortgages; and the words "and bonds" were omitted here by mistake.

The amendment was agreed to.

Mr. HOLLIS. I move to make the same insertion, in line 21, after the word "mortgages."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 53, line 21, after the words "said mortgages," it is proposed to insert the words "and bonds."

The amendment was agreed to.

Mr. HOLLIS. In line 9, after the word "bonds," I move to insert a comma.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 53, line 9, after the words "issue of bonds," it is proposed to insert a comma.

The amendment was agreed to.

Mr. HOLLIS. On page 62, line 10, after the word "any," I move to insert the word "other."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 62, line 10, after the word "any" and before the word "Federal," it is proposed to insert the word "other."

The amendment was agreed to.

Mr. HOLLIS. On page 63, line 23, I move to strike out the hyphen after the word "twenty."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 63, line 23, where it reads "twenty-per centum," it is proposed to strike out the hyphen.

The amendment was agreed to.

Mr. HOLLIS. Hyphens are not very popular just now.

On page 64, at the bottom of the page dealing with the reserves and dividends of farm-loan associations, I move to strike out the words "than two per centum of its capital or," for the reason that this is a provision that came over from the former bill, which has been replaced by the words "twenty-five per centum of such net earnings," so that it is of no further value.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 64, line 24, it is proposed to strike out the words "than two per centum of its capital or."

The amendment was agreed to.

Mr. HOLLIS. On page 69, line 1, at the beginning of the line, I move to insert the word "to."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 69, line 1, before the words "the holder," it is proposed to insert the word "to."

The amendment was agreed to.

Mr. HOLLIS. On page 76, line 2, after the word "and," I move to insert the word "shall."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 76, line 2, after the word "and," it is proposed to insert the word "shall," so that it will read: "and shall also make report."

The amendment was agreed to.

Mr. HOLLIS. Mr. President, the section that the Senate now has under consideration deals with the subject of dissolution and appointment of receivers. I invite the attention of the Senator from Kansas [Mr. CURTIS]. He brought up the other day the question of whether the appointment of a receiver should properly be left to the farm-loan board instead of to a court. I have no doubt the Senator was aware that under the national banking act receivers have been appointed for 50 years by the Comptroller of the Currency. I find, on investigation, that 564 receivers have been appointed by the Comptroller of the Currency since 1864, 106 of them within the last 10 years. There are many cited cases dealing with the constitutionality of the procedure that I shall not take the trouble to put in the RECORD unless the Senator desires.

Mr. CURTIS. Mr. President, I have no desire to have the authorities placed in the RECORD. I asked the question because there was some doubt in my mind about the authority of Congress to authorize a board to appoint a receiver. I knew that under the national banking act the Comptroller of the Currency had appointed receivers; but that is done upon the theory that the receivers are Government officers, and I had not studied this bill sufficiently to determine whether or not the receivers appointed by the board would likely be construed to be Government officers. If they are so to be considered, and the courts should hold that they are Government officers, I think that the board would have a perfect right to appoint them; but if it is held that they are not Government officers, then I doubt very much the authority of Congress to grant such power to the board.

Mr. HOLLIS. Mr. President, I will insert in the RECORD, without reading, the authorities that cover the point raised by the Senator.

The PRESIDING OFFICER. In the absence of objection, that may be done.

The matter referred to is as follows:

Washington National Bank of Tacoma *v.* Eckles (57 Fed., 870).
Bushnell *v.* Leland (164 U. S., 684).
Clapp *v.* Beebe (57 N. Y., 339).
Cadle *v.* Baker (20 Wall., 650).

Mr. HOLLIS. On page 76, in line 6, I move to strike out the comma and the words "to be appointed."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 76, line 6, after the word "receiver," it is proposed to strike out the comma and the words "to be appointed."

Mr. HOLLIS. I do that in order that the declaration of insolvency, as well as the appointment of the receiver, may be made by the Federal farm-loan board, which was the intention.

The amendment was agreed to.

Mr. HOLLIS. On page 29, line 6, after the word "bonds," I move to insert the words "issued by a Federal land bank." This is the feature permitting the purchase of bonds on the installment plan; and I think it should be applied only to those bonds issued by the Federal land banks, not to those issued by the joint-stock land banks.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 29, line 6, after the word "bonds," the first word in the line, it is proposed to insert the words "issued by a Federal land bank."

The amendment was agreed to.

Mr. HOLLIS. On page 41, in the section dealing with the agents of Federal land banks, it is provided that the—

Federal land banks may pay to such agents not to exceed one-half of 1 per cent per annum upon the unpaid principal of said loan.

I wish to add the provision:

Such payment to be deducted from dividends payable to the borrower on his stock in the Federal land bank.

Otherwise there would be a double payment there. The borrowers coming into the system through the agents would not join the farm-loan associations; they would get their dividends directly from the Federal land bank, and whatever is paid to the agents for expenses should be deducted from their dividends.

Mr. STERLING. Mr. President, will the Senator state that amendment again?

The VICE PRESIDENT. The Secretary will state the amendment.

The SECRETARY. On page 41, line 9, after the word "loan" and before the period, it is proposed to insert a comma and the words "such payment to be deducted from dividends payable to the borrower on his stock in the Federal land bank."

The amendment was agreed to.

Mr. SUTHERLAND. Mr. President, before the Senator passes from that, may I ask just what is the effect of the amendment which the Senator has last suggested?

Mr. HOLLIS. I shall be very glad to state that.

Mr. SUTHERLAND. The effect of it is to have the borrower pay a commission, is it not?

Mr. HOLLIS. No. Under the general provisions of the bill, a borrower would become a borrower through the farm-loan association, and the profits from his loan would be taken out by the land bank, and then would come to the loan association in the form of dividends, and then back to the borrower in the form of dividends from the farm-loan association. Under this provision of the bill a borrower applies through a bank, and we provide that the bank shall get not to exceed one-half of 1 per cent commission. Now, if the borrower were allowed to take this full dividend from the bank, it would include the whole 1 per cent. Therefore there should be deducted from the dividend so much commission as is paid to the bank acting as agent for its services.

Mr. SUTHERLAND. It does come out of the borrower in the end?

Mr. HOLLIS. Yes; it should.

On page 42, line 4, at the beginning of the line, I move to insert the words "ten times." The reason for that is this: In this paragraph of the bill a limitation is put upon the amount of these mortgages an agent may indorse. There should be some limit; but to limit it to the capital and surplus would make it a very small amount in a locality, and on conference with the members of the House Banking and Currency Committee it has been agreed to put that at ten times, thinking that is perfectly safe.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 42, at the end of line 3, after the word "exceed," it is proposed to insert the words "ten times," so that it will read, "shall not exceed ten times its capital and surplus."

The amendment was agreed to.

Mr. HOLLIS. Mr. President, the criticism has been made by the distinguished Senator from North Dakota [Mr. GRONNA] that the farm-loan associations do not have much substance. That is very true. It is not intended that they shall have a great deal. They are merely to act as the local agents for the land banks in placing and supervising the loans and collecting the payments; and under the terms of the bill as it now stands the farm-loan associations will not have any money on which to do business. They will have expenses, but nothing upon which to do business. We have provided that when loans are made through the banks as agents the banks may be allowed one-half of 1 per cent commission; and I think the same advantage should be given to the farm-loan associations, and that they should be allowed to borrow not to exceed one-fourth of the amount of their capital stock in case they have liabilities to meet.

I therefore ask the Secretary to read the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 38, at the end of section 15, it is proposed to insert the following:

Subject to rules and regulations prescribed by the Federal farm-loan board, any national farm-loan association shall be entitled to retain as a commission from each interest payment on any loan indorsed by it not to exceed one-quarter of 1 per cent semiannually upon the unpaid principal of said loan, any amount so retained as commissions to be deducted from dividends payable to such farm-loan association from the Federal land bank, and to borrow from the land bank of the district, at a rate of interest not to exceed 6 per cent per annum, sums aggregating one-fourth of its stock holdings in said land bank.

The amendment was agreed to.

Mr. HOLLIS. On page 13 there is an omission of the word "district," in line 19, after the word "each." I move to insert the word "district" at that point.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 13, line 19, after the word "each," it is proposed to insert the word "district," so that it will read "each district director shall."

The amendment was agreed to.

Mr. HOLLIS. Mr. President, on pages 18 and 19 are provisions stating that the ownership of stock shall not be a necessary qualification for officers and directors of the farm-loan association. That has been a debated point. The reason for not requiring them to be shareholders is this: No one can be a member unless he is a borrower. Therefore, no one can be an officer unless he is a borrower, if this provision stays in. Now, there will be cases where a man will be a borrower and become an officer, and get very much interested in the association, but pay up his loan; and in those cases that man could not serve any longer as an officer unless this provision were in the bill.

I am satisfied, however, after conferring with many people, that on the whole it is desirable that no one but borrowers shall be members or officers of these farm-loan associations; and I therefore move, on page 18, in lines 17, 18, and 19, to strike out the proviso.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 18, line 17, beginning with the words "*Provided, however,*" it is proposed to strike out down to and including the word "director," in line 19, the words proposed to be stricken out being as follows:

*Provided, however,* That the ownership of stock shall not be a necessary qualification for director.

The amendment was agreed to.

Mr. HOLLIS. On page 19, to carry out the same purpose, I move to strike out the words in lines 6 and 7, "but they need not be shareholders of the association."

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 19, line 6, after the word "business," it is proposed to strike out the comma and the words "but they need not be shareholders of the association."

The amendment was agreed to.

Mr. SUTHERLAND. Mr. President, let me ask the Senator a question there? As amended, will there be a requirement that the directors shall be stockholders?

Mr. HOLLIS. Yes. As amended, as the bill now stands, no one but a shareholder can be an officer.

Mr. SUTHERLAND. Where does the Senator find that provision?

Mr. HOLLIS. That is not in the bill. This is merely left out, and then it will be left for each association to make its own by-laws in that regard. They will do as they think best.

Mr. SUTHERLAND. There would be no requirement that the——

Mr. HOLLIS. Oh, there is nothing compulsory about it. That is left to the individual wishes of each association. In many States no one but a shareholder of a corporation can be a director, but in other States it is not so.

Mr. SUTHERLAND. That is the usual requirement of all laws providing for incorporation.

Mr. HOLLIS. I think that may be safely left to the local custom. However, if anyone wants to offer an amendment compelling it, I shall be very glad to accept it.

Mr. SUTHERLAND. If the Senator should leave the proviso in, that would not alter the rule, would it? The proviso is:

That the ownership of stock shall not be a necessary qualification for director.

But that would allow them to prescribe that qualification, if they desired.

Mr. HOLLIS. I should expect that provision, as it stands, to be construed by these local associations as permitting them to have men for officers who were not shareholders. I should expect it would have the effect that anyone would think it would have on reading it. I agree it would not have that legal effect.

On page 60, line 5, after the word "mortgage," I move to insert the words "or bond," for the same reason as in two other places.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 60, line 5, after the words "first mortgage," it is proposed to insert the words "or bond."

The amendment was agreed to.

Mr. HOLLIS. On page 60, line 9, before the word "mortgage," I move to strike out the word "the" and insert the word "any."

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 60, line 9, before the word "mortgage," it is proposed to strike out the word "the" and insert the word "any," so that if amended it will read "credited upon any mortgage entitled to such credit."

The amendment was agreed to.

Mr. HOLLIS. On page 32, line 18, I move to strike out the words "farm-loan association" and insert "Federal land bank." When this provision was originally drawn the loans were made directly by the farm-loan association. It has now been changed so that the loans are made by the Federal land bank through the association.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 32, line 18, it is proposed to strike out the words "farm-loan association," and in lieu thereof to insert "Federal land bank."

The amendment was agreed to.

Mr. HOLLIS. In connection with the provision on page 46, line 17, there have been various changes in the sections, and the numbers have not been properly changed. I therefore move to strike out the words "section 13 or section 20," and insert "sections 12, 20, or 23."

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 46, line 17, it is proposed to strike out the words "section 13 or section 20" and to insert "sections 12, 20, or 23."

The amendment was agreed to.

Mr. HOLLIS. On page 51, the amendment that was adopted, offered by the Senator from Ohio [Mr. POMERENE], the printed amendment, is not correct. It should read:

To exercise general supervisory authority over the Federal land banks, the national farm loan associations and the joint stock land banks herein provided for.

The hyphen should come out of "joint-stock."

The amendment was agreed to.

Mr. HOLLIS. On the opposite page, page 50, in line 6, I move to insert at the end of the line "and in its discretion to authorize them to increase their capital stock." That should obviously be allowed, and it has escaped everyone's attention until lately.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 50, line 6, after the word "act" and before the period, it is proposed to insert "and in its discretion to authorize them to increase their capital stock."

The amendment was agreed to.

Mr. SMOOT. Mr. President, I should like to have the provision read as amended.

The VICE PRESIDENT. The Secretary will read the provision as amended.

The Secretary read as follows:

(a) To organize and charter Federal land banks, national farm-loan associations, and joint-stock land banks, subject to the provisions of this act, and, in its discretion, to authorize them to increase their capital stock.

Mr. HOLLIS. On page 31 criticism has been made of the restrictions that are put on the mortgages, and in line 12 it is provided that a loan may be obtained "to provide for the purchase of a farm for a home." I believe myself that is too narrow, and I therefore move to strike out the words "a farm for a home" and insert the words "agricultural land."

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. In the paragraph on page 31, occupying line 12, it is proposed to strike out the words "a farm for a home" and to insert the words "agricultural land," so that it will read:

(a) To provide for the purchase of agricultural land.

The amendment was agreed to.

Mr. HOLLIS. I have one more provision that I offer because it was recommended to me by an association of farmers who have had a good deal of experience in running organizations of this sort. They said that the by-laws should contain provisions requiring the board of directors to meet at least twice a month and providing a reasonable director's fee for attendance and a reasonable forfeit for failure to attend any meeting. I felt myself that that could be fairly left to the by-laws, but they felt that they would be very much gratified if that could be put in. If there is any objection, I will not offer it.

Mr. SMOOT. I do not think it is wise to put it in this law. I am not going to make any strenuous objection to it, if the Senator from New Hampshire really thinks it ought to be in the bill. I think it is very unwise and I do not think there is any precedent for any such legislation passing Congress.

Mr. HOLLIS. I do not think it ever has been done heretofore. I should leave everything of this sort to local discretion. I will not offer the amendment, then.

That is all I have to offer.

Mr. POMERENE. Mr. President, I offer the amendment which I send to the desk, to come in on page 46. It is the one which was offered, I think, on Saturday.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 46, line 6, it is proposed to strike out the words "and paid in cash" and to insert in lieu thereof:

One-half thereof paid in cash and the balance subject to call by the board of directors.

The amendment was agreed to.

Mr. POMERENE. Mr. President, I offer the amendment which I send to the desk, to be inserted after line 10.

Mr. SMOOT. Before that is acted upon, may I ask the Senator having the bill in charge if he will not accept an amendment, in line 5, increasing the amount of the capital stock to $500,000, now that the amendment has been adopted which was just offered by the Senator from Ohio? In other words, it seems to me that with this provision in, a capital stock of $125,000 would be altogether too small to do any kind of a business. I know that it is not mandatory; but, really, I believe that a capital stock of $250,000 is as small as it ought to be in order to have the institution begin doing business.

Mr. POMERENE. Before finally disposing of the amendment, I want to offer a suggestion.

Under an amendment which was offered by the chairman of the committee a moment ago the capital stock may be increased from time to time. My thought is that in some localities which are sparsely settled it may be deemed wise to organize one of these banks. As they are not banks of deposit, it would certainly jeopardize the financial success of the institutions to some extent if they were obliged to pay in $250,000 at once and not be able to loan it out. For that reason it seems to me that if we start with $125,000, the balance being subject to call, the directors have it absolutely in their power to get this money in just as quickly as it may be needed.

Mr. SMOOT. Of course I always like, in passing a law, to have an absolute understanding as to exactly what they have to meet and when they have to do it, just the same as in the national-bank law, or just the same, generally, as in organizing a State bank.

Mr. POMERENE. Ordinarily, the Senator is right. If this were a bank of deposit, or something of that kind, I would entirely agree with the Senator.

Mr. SMOOT. I am not going to insist upon it, though I believe it would have been very much better to have the amount increased. I will not offer it as an amendment.

Mr. POMERENE. I offer the second amendment.

The VICE PRESIDENT. It will be stated.

The SECRETARY. On page 46, line 10, after the numerals "$500,000" and the period, insert:

No joint stock bank shall issue any bonds until after the capital stock has been entirely paid up.

Mr. SMOOT. That should be "joint-stock land bank," should it not?

Mr. POMERENE. Yes; "joint-stock land bank."

The VICE PRESIDENT. The amendment will be so modified.

Mr. POMERENE. The reason for this amendment, I think, is apparent. We would not want any bonds to be issued unless the entire capital stock was paid up.

Mr. SMOOT. It is all right.

The amendment was agreed to.

Mr. SMITH of Georgia. Mr. President, whether all the provisions of the rural-credits bill suit me or not, I shall vote for the best bill or the nearest bill to the one that I would like to vote for when it finally comes before the Senate.

Soon after I entered the Senate, more than four years ago, I expressed my deep conviction that no greater contribution could be made to our national prosperity than legislation which improved the condition of the farmers, not in the interest of the farmers alone but in the interest of all the people of the country. I believe intensely in the importance of improving the condition of the small farmer as well as the large farmer. No nation ever went backward when agriculture was going for-

ward. The great necessities of life—food and raw materials for clothing come from the soil.

About four years ago I called to the attention of the Senate five lines of legislation by which I then urged that the agricultural conditions of our country might be improved and which we might properly handle.

I urged that they were lines which could properly be directed and partly supported through national legislation, and that they would greatly add to the fertility of the soil and to the net profits of agriculture and substantially improve the general conditions of farm life.

I urged that there were practical and sane ways for aiding the farming classes of the country, not in a sense of paternalism, not in a sense of taking from them their own responsibilities, but to stimulate them as individuals to a better condition of preparedness as individuals to carry individual responsibility and thus open the door of hope to many a struggling farmer and encourage many a tenant farmer to become the owner of the land he tills.

The five suggested lines of legislation in the interest of the farmer to which I then called attention were parcel post, agricultural-extension work from the colleges of agriculture, a market division to help improve the marketing of farm products, a contribution to good roads, and improvement of rural credits. Three of those five are already laws, and I hope within a few days we will, by passing the good-roads legislation, add legislation upon that subject; we will pass a rural-credits bill to-day.

There are three lines of credit that the farmer needs. One is to aid him in purchasing, holding, and improving his land. This kind of credit necessarily is a long-time credit, and we seek to provide for it in this bill. The other two are, first, in connection with raising his crop, and, second, in connection with marketing his crop.

I do not know whether additional legislation can be passed upon those lines, but I desire to call attention to the fact that the theory that our reserve-bank system is solely in the interest of bankers and merchants is entirely a misapprehension of that legislation. To make easier the time loans which farmers need to raise their crops, we made a provision in that act that notes given in connection with agriculture for farm purposes, though not due for six months, should be good to be discounted in reserve banks, giving the farmer, as compared with the ordinary merchant the right to have his paper discounted, though it ran six months, while the merchant's paper could only be discounted if it ran 90 days.

We also provided in that bill a system of finance by which farmers are greatly aided at the time they become merchants and dispose of their crops. I refer especially to farmers who produce staple crops, such as oats, corn, wheat, or cotton.

I will illustrate what I mean by its effect upon the cotton crop. Coming in at a single season in enormous quantities, the facilities for obtaining money, and obtaining it at a low rate of interest, saved the farmers of the South last fall. The ability to warehouse cotton and obtain money at 6 per cent upon that cotton made it possible to carry a large part of the crop and prevent it from crowding down the price by putting upon the market more than the market could supply. The small farmer who did not warehouse his cotton at all received the benefit even more, perhaps, than the large farmer who warehoused it, because the warehousing process and the loans upon warehousing took off the market great quantities of cotton and left the market for the small farmer to sell his cotton to the consumer and get the benefit of a good price. So it is that the banking and currency act which we passed has been of great service to the farmer.

It has been claimed by some that the Federal reserve banking system was in the interest of the banks and not of the people. Those who make this claim should remember that the national banks of the country were compelled by the Federal reserve act to finance 12 Federal reserve banks. They were required to subscribe all the money for the stock of these banks, and they were only allowed to receive 6 per cent interest upon their stock, no matter how much the banks made. They were required to deposit their reserves in the Federal reserve banks. While prior to the passage of this law the national banks deposited their reserves in the banks of the big cities and received interest upon their reserves, the Federal reserve act required them to deposit their reserves in the Federal reserve bank without interest.

After paying 6 per cent on the capital stock paid into the reserve banks by the national banks, the balance of all profits made by the reserve banks goes to the United States for the benefit of the people of the country. The 6 per cent is only paid when earned.

Mr. President, coming down to the long-time loans that the farmer needs, the suggestion has been made in a number of letters that I have received that this could be done in a simple way merely by the Government issuing Treasury notes and loaning them direct to the farmer. I wish to say just a word about that in reply to the men who make the suggestion. The farm loans are now between four and five billion dollars. Under such a system the loans would readily run to $6,000,000,000. Loaned at a nominal rate of interest, it would be $6,000,000,000 of additional paper money, without any possible basis to maintain specie payments. The country would go at once to a paper basis. Money would be as plentiful as the leaves in autumn and not very much more valuable. It is simply an impossible proposition, as we all know.

The second is that the Government should issue its own bonds at 3 per cent and raise the money for farm loans. That would involve an issue in not a great length of time of Government bonds running from $4,000,000,000 to $6,000,000,000. The low rate of interest at which Government bonds now sell would cease. They would go to a commercial rate higher than the rate of interest they now draw; and if this country were unfortunately confronted with war and the credit of the country were needed for the defense of the country, and an enormous quantity of bonds had already gone into the markets, it would hamper the credit of the Government and hinder the possibility of our properly financing the affairs of the Government, besides the unfairness of selecting simply one class of people to whom such a credit was extended rather than to all the people is a serious obstacle.

There is but one way to effectively handle this subject. It is to overcome the difficulty of disposing of credits upon farm lands secured by mortgages which now can not be readily sold for the reason that the lender is so far separated from the borrower. A man in Washington contemplates a loan in Oregon. He is not familiar with the land; he is not familiar with the land law; he is not familiar with the lawyers. If his note fell due and was not paid, the collection of his debt would be a source of embarrassment. The same thing would be true if living here and the loan were made in Georgia. The expense of the individual transaction is great.

The lands of the country furnish the very best basis for credit, and farm land is the best of all lands. Yet unless the loans can be consolidated, unless the various loans can be brought together and the creditor saved the necessity for supervision of the loan, saved the necessity for investigating the value of the loan, it is impossible to bring them to the lowest rate of interest to which they are entitled.

The rural-credits scheme is to furnish an agency or agencies equipped to examine titles and to pass upon the value of property, to bring the notes secured by mortgages on lands together, and to finance the loan by issuing bonds, secured by the note and land mortgage of the farmer as collateral, the agency handling the mortgage and the bond, taking the responsibility of passing on the title and the value of the property, taking the responsibility of the collection of the money and letting the investor look simply to the central agency that handles the work under Government supervision. In this way we minimize the cost of examining titles, we minimize the cost of examining values, we minimize the cost of collection, and we free the lender from those responsibilities while a complete organization extending all over the United States, handling vast quantities of these loans, is in a position to handle them most economically and to the very best advantage.

I thoroughly approve freeing these loans from taxation. It is an unjust taxation. The farmer pays his tax on his land; he pays his tax on his improvements. If the man who loans him the money must also pay a tax on the note he holds, he must charge that much more interest against the farmer when he makes the loan. The average tax in most of the cities is 2½ per cent. Take the city in which I live. Our city tax is 1¼ per cent, our State and county tax 1 per cent, the two together never less than 2¼ per cent. If a citizen loans money to a farmer and wants 5 per cent on his money, he must charge 7¼ per cent to get it. If he charges 5 per cent, then 2¼ per cent off leaves 2¾ per cent interest. If the taxes can be taken off of these loans as they have been in many States, I have no question but that the immediate and complete benefit goes to the farmer.

Suppose one of the banks to be organized issues a 4 per cent bond and that bond is to be subject to taxation. A citizen of my home, Atlanta, gets it and he has to pay 2¼ per cent taxes on it. He can not invest in the bond at all. It would leave him only 2¾ per cent interest. But if he can buy it on a 4 per cent basis with no taxes there are many who would buy it. We simply can not travel with this movement, we can not succeed in substantially reducing the rate of interest which the farmer is to pay unless these instrumentalities are freed from taxes.

I have thought, Mr. President, and I still think that we would escape some trouble if we had the bill in a little different shape. There are many things in the bill which commend themselves to me. I believe in the plan of the Government furnishing $6,000,000 for the capital of these banks, and $6,000,000 annually to aid in financing it. I approve investing postal savings in these banks. But I believe it would be better if we simply chartered one bank in the District of Columbia, where there is no question about our right to grant the charter, and where there is no question about our right to free it from taxes. Then it could do business only in those States that freed the bonds issued from taxes. All the States would soon free them from taxes. We would thereby induce the States to cooperate in this movement for the benefit of the citizens of the States of the whole country. It seems to me in that way the business could start out more conservatively with expenses in proportion to the amount of loans which are to be made, and gradually grow in expense as it developed in the quantity of loans made. Such an organization would have its land agent in each State of the Union and enlarge the number of its employees as the volume of the loans increased, and the 1 per cent coming to the bank would furnish the means.

A capable land agent and a capable lawyer to examine the titles could for the present do practically the entire work of the central bank in each State. They could travel through the State, meeting the farmers who desire to make loans in their respective counties, examine into the value of the lands, and pass upon the titles.

Such a central corporation located in Washington could be required to deposit all of its farm mortgages with the Treasurer of the United States and receive from him a certificate of deposit of collateral notes secured by mortgage on farm lands equal to the amount of the bonds issued upon such collateral. The certificate of the Treasurer of the United States could be attached to the bonds, showing that the security for the bonds was in the possession of the Government. The collateral would be put up for the bond issue by the central organization from time to time as the issues of the bonds were required to meet the loans needed by the farmers.

The stock in the central corporation would be owned by the Government, the officers would be appointed by the President and confirmed by the Senate, and the safeguard of a Government administration both in passing upon the value of the lands and the titles upon which the mortgages were given to secure farmers' notes would rapidly grow in public confidence and the bonds secured by these collaterals would in my opinion soon find ready sale all over the United States. The 1 per cent difference between the rate of interest charged the farmer and the rate at which the bonds for general distribution were sold would more than cover the expense of operation and the central corporation should rapidly accumulate a surplus. This surplus would be an additional guaranty fund for the payment of outstanding bonds or else be used as a credit upon the farmers' notes. It would be easy under such a system to permit the borrower to increase his rate of interest to 6 or 7 per cent, and this increase beyond 5 per cent would be passed to his credit, reducing the amount of the principal which he owed, or invested for him in other 4 per cent bonds to be held for his benefit. It could be handled with so much less machinery that I regret exceedingly such a change did not occur to me sufficiently early to work out an amendment. I only hope that before the bill passes the House of Representatives or comes back to us for conference some such change may be made.

I throw out this suggestion really only having developed it in my own mind last night, too late to offer an amendment. I introduced a bill somewhat upon these lines 12 months ago, but it was prepared by some one else and I did not really thoroughly comprehend it myself, nor did I comprehend the importance as I do now of eliminating all doubt as to the constitutionality of everything connected with this organization, if we expect the bonds to sell upon the market for their full value with the privileges we are undertaking to give them.

I would be exceedingly gratified if some such line of amendments might yet be worked into this legislation. I would feel great confidence in the ability of an organization here starting with $6,000,000 of capital and reaching out into the States as the call was made, developing in size and force of operators as the business developed. It would certainly be constitutional, because nobody can question our right to create a corporation in the District of Columbia. We certainly have the right to free from taxation the assets of a corporation of the District of Columbia, and I believe we would have the cooperation of the States to free the bonds issued. Indeed in few States would they now be taxable. It is also worth mentioning that the lowest rates of interest on farm loans are paid in those States where the holders of such loans are not required to pay tax on them.

I do not mean to express an opinion that the pending bill is not constitutional. If I were called on to express an opinion from my own original view of what the Constitution meant I might almost be ready to express an opinion, but the decisions of the Supreme Court lean toward a different view, and under those decisions it might be that the Supreme Court would sustain this power. It hardly comports with my own earlier conception of the Constitution.

Mr. CUMMINS. Mr. President, I am prompted to ask a question of the Senator from Georgia. I am sure he desires that the farmer shall have the benefit of the exemption from taxation either under the Constitution or under section 29 of the bill, no matter which. Is there any way in which it can be made absolutely sure that his rate of interest will be reduced by the rate of taxation? That is to say, suppose the rate of taxation of this Federal farm bond was 1 per cent. I wish the Senator from Georgia would tax his ingenuity to prepare an amendment to the bill which will make it compulsory upon the farm-loan bank to loan the farmer at a rate of interest which is at least the rate of taxation less than other institutions which are taxed are loaning money to farmers.

Mr. SMITH of Georgia. I think the bill now does it, and I will explain to the Senator why I think it does. I do not think the Senator was in the Chamber when I suggested that I would greatly prefer an organization located in the District of Columbia, where there would not be any doubt about our right to free it from taxation as we legislate for the District of Columbia. But, passing by that, these organizations sell their collateral bonds. They are not allowed to charge a farmer more than 1 per cent in addition to what they sell their collateral bonds for. They are not operated for profit. They are cooperative. Expenses are limited to 1 per cent of the loans. That expense is subject to the control of the Federal board. They can not spend a cent of that 1 per cent except for legitimate expenses. Now, they can not charge more than 1 per cent above what they sell the bonds for. So the farmer gets the full benefit of the rate at which they sell these bonds.

I say to the Senator without a moment's hesitation that a 4 per cent nontaxable bond will sell for as much as a 5 per cent bond in a community where there is a 1 per cent tax on that bond.

We have the market of the whole United States. We have the little fellow who wants to save some money. We have the big man who wants to invest. Now, with the whole people of the United States in a position to invest, with all those who can invest competing in the purchase of these bonds sold in small as well as large sizes, it must be true that a man figuring upon his income, figuring on his investment, will figure what the investment really amounts to. If he knows he has a nontaxable investment and contemplates investing in that or in some other bonds that would be taxed he looks at the relative rate of interest of the two and he finally computes the investment that will net him the most. There are very few people who have anything to invest, who do not make that kind of a calculation, and unless they are capable of making that kind of a calculation they will not long last as people with anything to invest. My own judgment is that the farmer is sure to get the benefit of it.

Mr. CUMMINS. That depends entirely on the will of the loaner. When the person with money comes to part with it, it is a voluntary act on his part, and he may, if he desires, take into consideration the fact that the bond is not taxable or he may not. It depends entirely upon the grip that those who have money to loan may gain upon the money market. But is there not some way in which it can be reduced to a certainty, so that these bonds shall not be sold unless they can be sold at a rate of interest that will take into account the fact that they are exempt from taxation?

Mr. SMITH of Georgia. There is a provision that under no circumstances can they be sold bearing more than 5 per cent interest at par. That is in the bill.

Mr. CUMMINS. No.

Mr. SMITH of Georgia. Yes; there is a provision of that sort in the bill. Unless they can sell them at par on a 5 per cent basis for par they can not be sold.

Mr. CUMMINS. I agree with that. I was thinking about the mortgage.

Mr. SMITH of Georgia. Then we have the market of the whole United States. We have the little fellow who wants to save some money. We have the big man who wants to invest. Now, with the whole people of the United States in a position to invest, with all those who can invest competing in the purchase of these bonds sold in small as well as large sizes, it must be true that a man figuring upon his income, figuring on his in-

vestment, will figure what the investment really amounts to. If he knows he has a nontaxable investment and contemplates investing in that or in some other bonds that would be taxed he looks at the relative rate of interest of the two and he finally computes the investment that will net him the most. There are very few people who have anything to invest, who do not make that kind of a calculation, and unless they are capable of making that kind of a calculation they will not long last as people with anything to invest. My own judgment is that the farmer is sure to get the benefit of it.

Mr. CUMMINS. He would get the benefit of it under the operation of those normal factors in business which the Senator has just stated. But the business of the United States is not normal. We have found that it is not normal in any branch of human activity, and we have been busy for the last two years endeavoring to restore normal conditions, that is, to prevent those combinations and concerns and associations which disturb if they do not destroy the ordinary currents of business by which profits are determined or ought to be determined.

I fear, and I think I have a real basis for it, that the person who has money to invest in these farm-loan bonds will not be the little fellow with a hundred dollars. He has no way of getting it any more than he has of getting any other security. It will be the insurance companies, the savings banks as associations, the very large investors of money who will be attracted to these bonds. As I said yesterday, I think they are a very attractive investment. I do not believe that in determining the rate of interest at which they will take these bonds they will give the farmer or the borrower the benefit of the exemption from taxation.

Mr. SMITH of Georgia. In most of the big cities where the large insurance companies are located to which the Senator refers the States exempt such securities from taxation. They do not now pay taxes upon them; and one of the reasons why we get a considerable sum of fairly low-rate money in my section is that in Connecticut, and I think in New York, the insurance companies do not pay taxes on their loans. In my own State if the loan is made there you do pay a tax on it, and local money is not in competition with this outside money for such loans. If local loans on farm lands were free from taxation, I am confident farmers would obtain money at lower interest rates.

Mr. CUMMINS. So far as the insurance companies are concerned, most of them have a peculiar form of taxation that is applicable only to such business. They are permitted to deduct their liabilities from their assets or property so that they pay taxes only upon their surplus.

Mr. SMITH of Georgia. But they would not pay taxes on the basis of the quantity of the loans they held. I do not think any of them pay taxes on their real estate loans. They pay taxes on the basis of capital and surplus, but not on their farm loans. That is the rule nearly everywhere. Instead of doing a special favor to them, we will be developing a great mass of small holders of money as competitors with them on the same basis of freedom from taxation.

Mr. CUMMINS. But, Mr. President, the exemption of the savings banks really is not any exemption at all; so far as their mortgages are concerned it is but a shadow. The depositors in the savings banks pay taxes on their deposits.

Mr. SMITH of Georgia. Yes.

Mr. CUMMINS. Of course, the tax on those deposits is the equivalent of the tax on the mortgages, because they represent exactly the same capital.

Mr. SMITH of Georgia. Yes; and this would not change that.

Mr. CUMMINS. It can not be said that they are free from taxation.

Mr. SMITH of Georgia. As a rule the savings bank itself now pays no taxation on its land loans. If it invests in these 4 per cent bonds and pays no taxes upon them, it would be in just the same position then that it would be in loaning direct to the farmer.

Mr. CUMMINS. I do not assent to that. It seems to me there is an important or vital element left out.

Mr. SMITH of Georgia. So far as the taxes are concerned, I mean.

Mr. CUMMINS. With the farm-land bank—putting aside now the capital stock and their other physical property—money comes in from the East to a farm-land bank in Iowa; it comes from wherever it can be found willing to invest in the farm-loan bonds. That wealth is not taxed anywhere to anybody under this bill; whereas in the case of the savings-bank depositor, who furnishes the money to be loaned, who occupies toward the savings bank the same relation as those who buy the farm-loan bonds do to the farm-loan bank, they pay interest upon their deposits. In that way the wealth represented by that accumulation is taxed. This bill proposes to exempt positively certain wealth or property from taxation. That is not true of a savings bank, even though the savings bank itself is not taxed upon its mortgages.

Mr. SMITH of Georgia. But the Senator from Iowa wanted some way to prevent the big financial institutions from getting the benefit of this exemption from taxation. What I undertook to do in reply to the Senator was to show that their loans are now exempt from taxation, and that, if they invested in these securities, they would no more be placing their money in loans that were exempt from taxation than they are now so exempt; that the average citizen's loan would be subject to taxation in many States, and the effect of this exemption from taxation, instead of inuring to the benefit of the big financial institutions, will make competitors against them in loans of this character; that it will put the average citizen on the same basis as to freedom from taxation and ability to lend his money out at a low rate of interest that the savings banks and the insurance companies now have.

Mr. WILLIAMS. Mr. President, I do not want this bill to go to its passage without announcing to the Senate and to my constituents my emphatic advocacy of it. I am not much of a hand at dividing "a hair 'twixt south and southwest side," nor do I think, as a rule, that that amounts to much in practical life or in practical legislation, or anywhere else outside of a law court bent on technicalities.

In every controversy, Mr. President, there are some things which are conceded and some things which are disputed. I think, as a rule, a sensible debater will inquire what they are, and will plainly state them to his own judgment and as far as he can to the judgment of other people, and will dispose of the question by elimination of the first sort and contrast and comparison of the second.

Mr. President, there is no dispute anywhere about the practical general benefit of this proposed legislation. I have not heard one Senator raise his voice to say that, if this bill became a law, it could do any interest of a general and unselfish character any harm. That is one of the things which is not disputed.

There is another thing which is not disputed. If the Federal Government wishes to render its aid to commercial banking, it ought to render its aid, as far as it constitutionally can, to agricultural banking. Nobody disputes the proposition that agriculture is the fundamental, basic, primordial, healthy pursuit of mankind, and that if any sort of industry at all deserves encouragement at the hands of the Government more than another, it is agriculture. Even that proposition might be disputed to a slight extent; but the proposition that it deserves as much consideration as any other pursuit can not be disputed by anybody; certainly not by anybody who holds office.

Now, having gotten rid of the things that are not in dispute, the things which are conceded in connection with this legislation; everybody admitting that it is good legislation; everybody admitting that it sounds in benefit and not in damage; everybody admitting that we have neglected our farming and agricultural interests beyond every other civilized nation on the globe; everybody admitting that we have nothing in America to compare in its benefits to the German landschaft system, nothing to compare even with the French crédit foncier, nothing to compare even with the Italian land-loan system, we come to disputed questions. Everybody then agreeing that if, as the legislative body of the Federal Government, we have the constitutional power to pass this legislation, we ought to pass it, we come to the questions now that are disputed.

I have listened here for two or three days to some very shrewd arguments by lawyers who are trying to divide "a hair 'twixt south and southwest side," as I said at the beginning, and yet the whole constitutional question reduces itself to this: John Marshall himself once said that, if the end or the purpose of an act be constitutional, then every means for its accomplishment which is appropriate or convenient, if not necessary, is also constitutional.

In the early history of this Republic it was disputed as to whether or not the United States Government had a right to charter a bank at all. Without passing upon the original proposition, the Supreme Court, when John Marshall—the demigod of Republicans and Federalists—was Chief Justice, decided that it had a right to do it; that is res adjudicta; he decided that a bank—any bank—a banking business, from its very nature was a convenient and appropriate fiscal agency for the Federal Government, and that, as the Federal Government needed, in order to carry out its powers, fiscal agencies to render it more efficient in carrying out its granted powers, it had a right to charter a bank.

Now, then, later on the question came up as to whether or not the Federal Government, having a right to charter a bank in which the Federal Government in that particular case had stock, had a right to charter banks in which the Federal Government had no stock, and the sole general purpose of which was to make money in private business, the Supreme Court then decided that the Federal national banking system, as now organized, differing in those respects from the original United States Bank, was authorized by the Constitution.

Now, I lay down this proposition, and I think it is indisputable, not only from the layman's standpoint but also from the lawyer's standpoint: If this Government has the right to institute the banks contemplated under this legislation at all—and leave that question in dispute for the nonce—then it has the right, as a means to the accomplishment of its ultimate purpose, to pass every provision that defends and protects the system, every provision that will render it more efficient as an instrumentality for the purposes for which it has been enacted. That is following in the line of the decision that if the end be constitutional, the means, if it is appropriate and convenient, is constitutional, and that, furthermore, the court will not sit too closely in judgment upon the appropriateness or the convenience of the means, because that, after all, is a question for the legislative branch of the Government.

Now, how is any man going to say that the establishment of this system is constitutional, but that a provision in the bill to render it efficient and to protect it and defend it from the possible attacks of another sovereignty are not constitutional? Again, how is any man going to say that the Federal Government has a right to establish a bank—a bank, any bank, a banking system—from its very nature convenient and appropriate as a fiscal agent of the United States Government, usable for the purpose of strengthening its credit and its cash—how is he going to say that it has the power to do that for the commercial interests of the country and has no power to do the same thing for the agricultural interests of the country?

There is no difference between the national banking act and this act except the differences that grow out of the very character and nature, not of Federal jurisdiction, not of the extent of power granted by the Constitution to the Federal Government, but of the business carried on on the one side by the commercial people and on the other side by the agricultural people.

Everybody with a particle of knowledge of banking laws at all knows that you can not engraft an agricultural system upon a commercial system of banking without bankrupting the commercial system. A commercial bank wants live assets, which are readily convertible into cash. It can not survive a run; that is one of the ordinary incidents of commercial banking if it puts its money out on long time or upon securities which require length of time for foreclosure in the courts. The difference—whatever difference exists—is a difference in the character of the business carried on, not a difference in the constitutional power of the Federal Government.

I agree with an argument made yesterday—in the address commenced day before yesterday and concluded yesterday—by the Senator from Iowa [Mr. CUMMINS] that if these mortgages and bonds can be exempt by act of Congress from local taxation, there is nothing added to the strength of the bill by saying that these banks shall be "construed as being fiscal agencies" of the Federal Government. They either are or they are not; the courts can determine that question; but if a commercial bank, simply because it is a bank—and that is what John Marshall decided—is from its very nature a useful adjunct to the Federal Government and a possible fiscal agency of it, then these banks are also. This is true, because this bill carries with it the same right of deposit and very many other rights which characterize the commercial banks. If it did not, however, the fact still remains that the banks hereby organized will be useful and appropriate agencies for the Federal Government.

Mr. President, there is another reason why I should like to see this bill passed. I should like to see the example set in America of exempting debts from taxation. I hope to live to see the time when no State or county or city will tax the evidences of indebtedness, because, in the long run, when you do that, you tax the people least able to pay taxes, to wit, the debtors.

The Senator from Iowa had a colloquy a moment ago with the Senator from Georgia [Mr. SMITH] about whether or not an exemption from taxes would reduce the amount of interest that a man had to pay upon a loan. There are peculiar abnormal circumstances here and there under which an exemption from taxation will not reduce the interest that the borrower will have to pay; but, when that is the case, it is not *because* of the exemption from taxation, it is *in spite* of it and in the teeth of it, just as a hundred times, in considering economic questions, the application of a general law is locally or temporarily set aside by the more intense operation of some particular law that happens at the place or at the time to assume control. Notwithstanding that, for any man of ordinary common sense to deny that an exemption from taxation upon loans and mortgages will normally and in the long run inure to the benefit of the man who borrows money is equivalent to that man's denying the operation of the law of supply and demand.

I come into the market with a certain amount of money to lend. A and B and C and D and E come into the market with money to lend. X and Y and Z come into the market to borrow money. We meet one another in the marts, just like buyers and sellers of goods do. There is a certain amount of loanable funds; there is a certain demand for loanable funds, and the price of interest is just as thoroughly fixed by the comparison of the demand for loans with the supply of loanable money as the price of cotton or of wheat is fixed upon the market by the supply of spot cotton or wheat on the one hand and the effective demand for either upon the other—meaning by "effective demand" the number of dollars in the hands of would-be buyers. The minute you reduce the cost of any operation you fix it so that normally and in the long run the price to the ultimate consumer of the operation decreases. The ultimate consumer of the operation of borrowing and loaning is the borrower. The Senator from Iowa says "of course the lender will get all he can." Of course he will. So will the seller of cotton get all he can; of course he will; but if there are 18,000,000 bales of cotton and a demand for 10,000,000 bales only, the question resolves itself into this: Not what he wants, but what he can get; and the question of what he can get resolves itself into this: How many people with dollars behind them want this thing? So it is with loanable funds, and so it is with everything else in this world. The opera singer depends upon how many people can sing that way and how many people have money in their pockets willing to pay to hear a particular sort of song sung. The very ballet dancer in the vaudeville show has her price as a dancer depend absolutely upon those two things—how many people are there who can dance that way and how many people are there willing to pay to see somebody dance that way. It may happen in a great war or in a time of great distress that a ballet dancer's time is worth nothing; people are thinking about something else; and it may happen with regard to loans, now and then, that you might exempt them from taxation and furnish half the money, and still the demand for loans would be so great that the interest might be very high; but the normal, general rule—and that is what legislators must obey—is that the cheaper you make the operation of lending, the cheaper the borrower can get his money.

Mr. President, it seems to me, to sum it all up in one sentence, that these are the two great things that ought to appeal to us: If the Federal Government can do for its agricultural interests what Germany and France and Italy have done, we ought to do it, and then when you come to the consideration of whether it can or can not—meaning, of course, constitutionally can or can not—this conclusion presents itself—that if we have the power to inaugurate these banks at all then we have the power to defend and protect and better the system by every possible provision which is an appropriate and germane means for strengthening of the system to make it efficient.

Mr. STERLING obtained the floor.

Mr. LODGE. Mr. President, will the Senator allow me to ask to place in the RECORD a short letter?

Mr. STERLING. I yield to the Senator from Massachusetts.

Mr. LODGE. Mr. President, I introduced the other day a draft of a report signed by Mr. Herrick. There was some misunderstanding owing to what was printed at the head of the paper. It was not a report but a draft of a report, and I ask that a letter from Mr. Herrick may be placed in the RECORD. It corrects the mistake in regard to that matter.

The VICE PRESIDENT. Without objection, it is so ordered.

The letter referred to is as follows:

NEW YORK CITY, *May 3, 1916.*

Hon. HENRY C. LODGE,
*United States Senate, Washington, D. C.*

DEAR SENATOR LODGE: The article appearing on pages 7744–47 of the CONGRESSIONAL RECORD of the 25th of last month is not a report. It is simply my suggestions for a report, which I as chairman submitted on March 31, 1916, to the members of the rural-credits committee of the Chamber of Commerce of the United States of America. The members of this committee are:

Robert W. Brown, secretary American Galloway Breeders' Association, Carrollton, Mo.
Roger A. Derby, Drowning Creek Plantation, Jackson Springs, N. C.
Oscar L. Gubelman, Knauth, Nachod & Kuhne, New York, N. Y.
C. B. Kegley, master of the State Grange, Palouse, Wash.
Clarence Ousley, Agricultural and Mechanical College of Texas, College Station, Tex.

H. J. Sconce, president Peace Valley Farms Co., Sidell, Ill.
R. B. Van Cortlandt, New York, N. Y.
H. W. Danforth, president National Council of Farmers' Cooperative Associations, Washington, Ill.
John J. Dillon, commissioner, Department of Foods and Markets, New York, N. Y.
William Hill, Bethany, W. Va.
F. E. Myers, F. E. Myers & Bro., Ashland, Ohio.
Herbert Quick, Berkeley Springs, W. Va.
Treadwell Twichell, Mapleton, N. Dak.
George Woodruff, president First National Bank, Joliet, Ill.
Myron T. Herrick, Cleveland, Ohio.

The committee has not yet rendered a report, but expects to do so before the end of the month. Would it be possible to have this fact published in the RECORD? If so, I wish you would do me the very great favor of reading this letter into the debate.

The word "report," it is true, is used neither in the heading nor in the text of my article. Nevertheless, as it stands, it could easily be construed as a report because of the use of the name of the Chamber of Commerce of the United States of America at the top of the paper upon which it was written.

Very sincerely, MYRON T. HERRICK.

Mr. STERLING. Mr. President, I realize how apparently useless it is at this stage of the discussion, and after various amendments have been disposed of, to bring forward anything new, especially if it be anything of a radical nature affecting the general plan of this bill; but I trust that Senators will, notwithstanding the lateness of the day, have an open mind with reference to the proposed substitute which I have to offer and the few suggestions I may make in regard to it. The changes I have to suggest are of such nature that the general plan of the system proposed by the Senator from New Hampshire for the Committee on Banking and Currency can be readily changed and adapted to the plan I have in view.

The Senator from New Hampshire is well aware of the fact that I am in hearty sympathy with the main provisions of this measure, rather with what I may term the essential provisions of the measure. I was in favor of section 29, the section which exempted the bonds and mortgages and capital stock of the farm-land banks from taxation, and when I voted against tabling the amendment of the Senator from Iowa, it was not because I was in favor of the amendment but because I was opposed to the principle involved in a motion to table.

Mr. President, the purpose of this measure, as the bill was originally introduced, is "to provide loans of money for the purchase of a farm for a home." That has been broadened so as to include the purchase of agricultural lands, and I think the amendment, as accepted by the Senator from New Hampshire in this respect, is a very wise one. It is "to provide for the purchase of equipment, fertilizers, and live stock necessary for the proper and reasonable operation of the farm, * * * to provide buildings, and for the improvement of farm lands," and finally "to liquidate indebtedness of the owner of the land mortgaged, existing at the time of the organization of the first national farm-loan association," as provided in his bill, or "indebtedness subsequently incurred for one of the purposes above mentioned."

First and primarily, of course, the great purpose is to enable the farmer desiring money for these several purposes, or any of them, to get that money at a lower rate of interest and on longer time than he is now enabled to do. But the instrumentalities through which it is to be accomplished, or the parts of the machine, as I may term them, are, first, the farm-loan board; second, the Federal land bank; and, third, the national farm-loan association.

The question occurred to me, Mr. President, when I first read the provisions of this bill, as to whether there was not more machinery here provided for than is necessary to effect these very laudable purposes. With that in view I made some study of the bill to see whether a part of this machinery could not be dispensed with, and whether we could not accomplish the same purpose at less expense and more easily than we can with all this machinery. It may be said, with reference to any machine designed to accomplish a certain result or a certain purpose, that the more simple and the less complex that machine is the better it is, the less is the liability to breakage, the less will be the friction, and the less the cost of operating the machine. So I think this machine may be simplified; you may leave out at least one of the parts and still have a perfect machine for the accomplishment of all the purposes contemplated by the bill.

Mr. President, the weak part of the machine, as it occurs to me, the needless part of the machine—and as I now view it, the impractical part of the machine—is the national farm-loan association. I want to call attention to some of the provisions relative to the national farm-loan association.

First, on page 12 it is provided:

Farm-loan associations limited and farm-loan associations unlimited shall, respectively, have representation on the board of directors in proportion to the amount of unpaid principal on loans made to their members by the land bank and actually outstanding three months before each election. If the amount unpaid on the principal of loans outstanding in either division shall amount to less than $1,000,000, all associations in the district shall vote together for all three local directors.

Now, remember that only three directors are to be elected. The other two of the five directors are to be appointed by the Federal farm-loan board. But how shall we apportion the three elected directors between those associations the liability of whose members is unlimited and those the liability of whose members is limited when you have but three to elect?

The proposition is that they shall elect "in proportion to the amount of unpaid principal on loans made to their members by the land bank and actually outstanding three months before each election." Suppose it is an equal amount on the part of the unlimited liability association and the limited liability association, and you have the mathematical problem then of each one, if they elect according to this proportion, electing one and one-half of the three directors. Suppose it is a different proportion than that; it is one and two-thirds, on the one hand, and one and one-third, on the other. There you have the proposition of electing one and two-thirds of the three directors by the unlimited liability association, for example, and one and one-third of the three directors by the limited liability association.

So here is one practical difficulty in the very organization of the national farm-loan association, a difficulty which extends to the government and to the administration of the affairs of the association. There being three directors to elect, the only circumstances under which a proportionate number of directors can be elected by these two classes of associations will be where the proportion would be as 1 to 2, or, in other words, where the amount unpaid of principal on loans made to their members by the land bank and actually outstanding three months before each election is twice as much in one association as it is in the other. Then the election would be practical, and you would have a proportion which would authorize one form of association to elect one, the other form of association to elect two, of the elective directors. Otherwise, and under no other circumstances could you have the three directors elected in proportion to the amount of the unpaid principal of each of these associations.

With this as a practical difficulty in the organization and government of the national farm-loan association, I come to consider for a moment the purposes of the national farm-loan association when it is organized. What purpose does it serve? Primarily it is meant to be the intermediary between the farmer and the Federal land bank from which the farmer, as a member of the national farm-loan association, procures a loan, because it is not the national farm-loan association but it is the land bank that handles the money and loans the money to and takes the mortgage from the farmer. The mortgage runs not to the national farm-loan association but to the Federal land bank.

What other purpose is served, or is it urged upon the floor here is served, by the national farm-loan association? The other purpose is this, namely, that under the terms of the bill the national farm-loan association and all the members of it are liable for the indebtedness of the individual member of the farm-loan association; and it is to be remembered that in order to be qualified to be a member of the farm-loan association he must be a borrower. Otherwise, he is not entitled to belong to the farm-loan association at all. The liability of the loan association, it is urged, adds to the security of the mortgages given by its members and the bonds issued thereon.

But, Mr. President, is that security necessary? It occurs to me that one great trouble with this measure in its entirety is that the framer of the bill, or the committee, have been misled by the provisions of the Federal reserve bank act. They have thought that this bill must be in analogy to that plan; and hence they must have the Federal farm-loan board to correspond to the Federal Reserve Board; they must have the Federal land bank to correspond to the several Federal reserve banks in the 12 districts in the United States; and they must have the national farm-loan association to correspond to the national banks, they being members of the Federal reserve bank system. And why? Because each and every national bank is security for the obligations of its borrowing members, whose obligations it takes to the Federal reserve bank for rediscount, and there gets the currency permitted to be issued under the Federal reserve bank act to the member banks for the purposes of use in business. But there is absolutely no need for the indorsement of a national farm-loan association in order that the mortgages, or the bonds issued upon the mortgages, may be secure.

Under the provisions of this bill the loans are to be made under the most careful limitations and restrictions. The bill is safeguarded throughout in that respect, in the first place, and then, in the second place, a loan may be made only to the extent of 50 per cent of the value of the property mortgaged to secure the

loan. It is the best security in the world; bonds issued thereon will be readily taken by the investing public; the tendency will naturally be to bring down the rate of interest charged the farmer, and all this without a national farm-loan association behind it.

You have what, now, as further security than the mortgagor himself, than the farm he mortgages, and the Federal land bank which loans him the money and takes his mortgage? You have the security of every other Federal land bank for the payment of every coupon interest note upon default of payment by the bank that issued it, and then, finally, as to the ultimate payment of the principal, you have the security of every Federal land bank in the entire system.

Do you need any more security than that to make these, as it were, liquid assets, or the assets upon which negotiable bonds may be issued and pass current as money throughout the country? I think not. So, Mr. President, when it comes, first, to the practical difficulties in the operation of the national farm-loan association, and, second, to the question of the necessity of such associations as security for the loans, it seems to me that in providing for the national farm-loan association we are providing for an institution that is both quite impractical and unnecessary.

In passing, let me refer to another instance that may interfere with the practical success of the National Farm Loan Association. Ten persons under the bill can form a national farm-loan association. They must all be borrowers in order to be qualified to form and be members of it. In a given State or community they may not readily be found. There may be found one at a given place in one portion of the State, and you may not find another would-be borrower within a distance of 10 miles or another within a distance of 20 miles. And so only within the radius of 25 or 30 miles may you find the 10 members required to form the National Farm Loan Association. Thus you can see some of the difficulties of organization to begin with in men getting together to transact the business of such an association, holding their meetings, electing officers, and providing for a course of action by that farm-loan association. If we can dispense with this part of the machinery, which seems to me so utterly useless and may be mischievous, we would better do it if we can, as I said, accomplish the same laudable purpose without it; and I think we can.

How may we do it in the main? I have provided in my proposed substitute, not for 12 Federal land banks, but that the farm-loan board may create as many Federal land banks as there are States in the Union. Let me read the provision in that regard. This is section 4, and it corresponds to section 4 in the original bill:

That each State of the United States is hereby constituted a Federal land bank district, to be known and designated by the name of the State comprising such district. As soon as practicable the Federal farm-loan board shall establish in each such district one Federal land bank, with its principal office located in such city within the district as said board shall designate, and each land bank shall include in its title the names of the city and State in which it is located. Subject to the approval of the farm-loan board any Federal farm-land bank may establish branches within the State or district in which it is located.

In no case shall a Federal land bank be established with a capital stock of less than $250,000.

Senators will remember that in the pending bill the minimum of capital stock is $500,000 and the minimum of all the capital stock of all the Federal land banks under the system provided for in the original bill will be $6,000,000. I have thought that, since we have established so many under the provisions of this bill, $250,000 should be the limit. If we organize 24 Federal land banks in 24 States of the Union we shall have an aggregate capital stock equal to that provided for in this bill, namely, $6,000,000, if we take only half the States in the Union, whereas if one is organized in every State of the Union we shall have just twice the aggregate capital stock provided for in this bill.

Further:

*Provided*, That if, in the judgment of said Federal farm-loan board, agricultural conditions, or the terms and conditions on which farm loans may be procured from other sources, in any State do not warrant the establishment of a Federal land bank in such State, then such board may defer the establishment of such bank until conditions do so warrant, or may refrain altogether from establishing such bank: *Provided further*—

I do not want to cut anybody out of the privileges he may enjoy under a Federal farm-loan or rural-credits system, and hence I provide this—

That any qualified person seeking a loan on farm lands in a State where no bank has been established may make application to and receive a loan from the Federal land bank of an adjacent or other State under all the provisions and restrictions of this act.

So, throughout my proposed substitute, wherever the farm-loan association has been mentioned, or where there has been any reference to it in the original bill, I have changed or cut out the language entirely. Beginning with section 7 of the original bill, which deals especially with farm-loan associations—those of unlimited and those of limited liability—I cut out all of those provisions, and I adapt then my ideas in regard to the Federal land bank to the rest of the provisions of this bill, and harmonize them with them. In other words, then, the individual farmer, instead of being a member of a national farm-loan association and subscribing to that stock to the extent of one-twentieth the amount he wants to borrow, becomes a subscriber to the stock of the Federal land bank, and his stock is security for the debts of the Federal land bank, as was his stock security for the debts of the national farm-loan association.

Mr. SMITH of Michigan. And as is the stock of the other banks.

Mr. STERLING. Yes; and as is the stock of the other banks. I am glad the Senator from Michigan mentions that fact, because I want to call attention again to that feature of the bill in regard to the class of farm-loan associations where the liability of the members is limited—limited in the ordinary way—where each one is liable equally and ratably for himself, and not one for another, for the debts of the association, to the extent of the par value of his stock and to the extent of the amount paid in on his stock. That is the general limited liability. The other is where he is liable one for another for the indebtedness of the association, without any limit whatever in that liability. Whatever property he may have under that rule liable to execution at all is subject to execution to satisfy any contract, debt, or engagement whatever of the association.

Mr. President, this touches again the practicability of the national farm loan association. How many such associations is it believed will be organized under the unlimited-liability plan? The Senator from New Hampshire [Mr. HOLLIS] hopes that eventually they will all become unlimited-liability associations. Why, he says, it will add to the security, as though under this bill any more security were needed than the value of the man's farm, the mortgage being for not to exceed one-half that value, with the added liability of the Federal land bank from which he borrows, and, added to that, the liability of each and every land bank in the entire system. There is no need for an unlimited-liability association to render the mortgage a better security or the bonds a better investment. I would hesitate before encouraging or advising any farmer friend of mine to identify himself with or become a member of any unlimited-liability association.

Mr. SMITH of Michigan. Especially, Mr. President—if the Senator will permit me—after he has pledged his property, and pledged it for 50 per cent of its value only.

Mr. STERLING. Yes.

Mr. SMITH of Michigan. If the value of the land is arrived at fairly, he has given ample protection for his loan, without assuming the responsibility of others.

Mr. STERLING. Certainly.

So, Mr. President, it seems to me now that the proposition I urge is entitled to the greatest consideration. We are starting out here on a new plan, beneficently intended, and I feel it will be beneficent in its results. I think that the more easily that plan is understood, the more simple the machinery to begin with, the more readily can we say its success will be assured. It is easy to segregate, as it were, this unnecessary part of the scheme from the rest and have, first, your Federal farm-loan board, organized as it is under the provisions of the original bill, and then your Federal farm-land banks, organized, as they are to be, under the provisions of the original bill, with the farmer a member of the Federal land bank instead of the farm-loan association, but having exactly the same rights and subject to the same liabilities he would have and be subject to were he a member of such an association.

Mr. President, I have gone through the original bill and compared my substitute with it, and I think I have now in every respect adapted my substitute to the provisions of the original bill, leaving out, of course, all references to national farm-loan associations. I might have had this substitute read before beginning my remarks, and yet I did not want to take that time. I simply hope that in all fairness, and in order that it may have some further consideration, the bill may not be pressed to a final vote this evening.

Mr. HOLLIS. Mr. President, I notified the Senate last night that it was my intention to pass the bill, if I could, to-day, and I have every hope of being able to do so. I am very sure the point the Senator has made is clear to the Senate. His bill is like the bill before the Senate in every particular, except that the national farm-loan associations are eliminated. I also understand that the Senator is willing to submit his substitute without having it read; and, if so, we may vote upon it at once.

Mr. STERLING. I am willing to submit it. I should like, if I may have unanimous consent, to have the substitute printed in the RECORD.

The VICE PRESIDENT. Without objection, it will be so ordered.

Mr. STERLING. I want to call attention to one feature of the bill in which I have made a change, and that is on page 5, I think, of the bill. I have stricken out the provisions relative to the attorneys, experts, assistants, clerks, and so forth, and to their appointment without regard to the civil-service law. It should not have been in my substitute. I had already offered an amendment which was printed providing for striking that out, and it was by inadvertence that it was printed in the substitute.

The substitute submitted by Mr. STERLING is as follows:

Amendment in the nature of a substitute intended to be proposed by Mr. STERLING to the bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create Government depositaries and financial agents for the United States, and for other purposes, viz: Strike out all after the enacting clause and insert the following:

"That the short title of this act shall be 'The Federal farm-loan act.' Its administration shall be under the direction and control of the Federal farm-loan board hereinafter created.

"DEFINITIONS.

"SEC. 2. That wherever the term 'first mortgage' is used in this act it shall be held to include such classes of first liens on farm lands as shall be approved by the Federal farm-loan board, and the credit instruments secured thereby. The term 'farm-loan bonds' shall be held to include all bonds secured by collateral deposited with a farm-loan registrar under the terms of this act; they shall be distinguished by the addition of the words 'regular' or 'joint stock,' as the case may be.

"FEDERAL FARM-LOAN BOARD.

"SEC. 3. That there shall be established at the seat of government in the Department of the Treasury a bureau charged with the execution of this act and of all acts amendatory thereof, to be known as the Federal farm-loan bureau, under the general supervision of a Federal farm-loan board.

"Said Federal farm-loan board shall consist of five members, including the Secretary of the Treasury, who shall be a member ex officio, and four members to be appointed by the President of the United States, by and with the advice and consent of the Senate. Of the four members to be appointed by the President, not more than two shall be appointed from one political party, and all four of said members shall be citizens of the United States and shall devote their entire time to the business of the Federal farm-loan board; they shall receive an annual salary of $10,000, payable monthly, together with actual necessary traveling expenses.

"One of the members to be appointed by the President shall be designated by him to serve for two years, one for four years, one for six years, and one for eight years, and thereafter each member so appointed shall serve for a term of eight years, unless sooner removed for cause by the President. One of the members shall be designated by the President as the farm-loan commissioner, who shall be the chairman and the active executive officer of said board. Each member of the Federal farm-loan board shall within 15 days after notice of his appointment take and subscribe to the oath of office.

"The first meeting of the Federal farm-loan board shall be held in Washington as soon as may be after the passage of this act, at a date and place to be fixed by the chairman of said board.

"No member of the Federal farm-loan board shall be an officer or director of any institution, association, or partnership engaged in banking. Before entering upon his duties as a member of the Federal farm-loan board each member shall certify under oath to the President that he is eligible under this section.

"The President shall have the power, by and with the advice and consent of the Senate, to fill any vacancy occurring in the membership of the Federal farm-loan board; if such vacancy shall be filled during the recess of the Senate a commission shall be granted which shall expire 30 days after the Senate convenes.

"The Federal farm-loan board shall appoint a farm-loan registrar in each land-bank district to receive applications for issues of farm-loan bonds and to perform such other services as are prescribed by this act. It shall also appoint one or more land-bank appraisers for each land-bank district and as many special appraisers as it shall deem necessary. Farm-loan registrars, land-bank appraisers, and special appraisers appointed under this section shall be public officials and shall have no connection with or interest in any institution, association, or partnership engaged in banking.

"The salaries and expenses of the Federal farm-loan board and of farm-loan registrars and special appraisers authorized under this section shall be paid out of any moneys in the Treasury of the United States not otherwise appropriated. Land-bank appraisers shall receive such compensation as the Federal farm-loan board shall fix, and shall be paid by the Federal land banks and the joint-stock land banks which they serve, in such proportion and in such manner as the Federal farm-loan board shall order.

"The Federal farm-loan board shall be authorized and empowered to employ such attorneys, experts, assistants, clerks, laborers, and other employees as it may deem necessary to conduct the business of said board. All salaries and fees authorized in this section and not otherwise provided for shall be fixed in advance by said board and shall be paid in the same manner as the salaries of the Federal farm-loan board.

"Every Federal land bank shall semiannually submit to the Federal farm-loan board a schedule showing the salaries or rates of compensation paid to its officers and employees, and said board shall have power to disapprove such schedule, or any item in it, and to alter any or all salaries therein shown.

"The Federal farm-loan board shall annually make a full report of its operations to the Speaker of the House of Representatives, who shall cause the same to be printed for the information of the Congress.

"The Federal farm-loan board shall from time to time require examinations and reports of condition of all banks established under the provisions of this act, and shall publish consolidated statements of the results thereof. It shall cause to be made appraisals of farm lands as provided by this act, and shall prepare and publish amortization tables which shall be used by banks under its supervision. It shall, by suitable rules and regulations, require all offenses and delinquencies under this act to be forthwith reported to it and to the United States district attorney for the district in which any such offense or delinquency shall occur, and shall institute immediate proceedings in the proper court for the prosecution of any person committing an offense under any provision of this act.

"The Federal farm-loan board shall prescribe a form for the statement of condition of banks under its supervision, which shall be filled out quarterly by each such bank and transmitted to said board.

"It shall be the duty of the Federal farm-loan board to prepare from time to time bulletins setting forth the principal features of this act, and to distribute the same, particularly to the press, to agricultural journals, and to farmers' organizations; to prepare and distribute in the same manner circulars setting forth the principles and advantages of amortized farm loans and the protection afforded debtors under this act, and advising investors of the merits and advantages of farm-loan bonds; and to disseminate, in its discretion, information for the further instruction of farmers regarding the methods and principles of co-operative credit and organization. Said farm-loan board is hereby authorized to use a reasonable portion of the organization fund provided in section 36 of this act for the objects specified in this paragraph, and is instructed to lay before the Congress at each session its recommendations for further appropriations to carry out said objects.

"FEDERAL LAND BANKS.

"SEC. 4. That each State of the United States is hereby constituted a Federal land-bank district, to be known and designated by the name of the State comprising such district. As soon as practicable the Federal farm-loan board shall establish in each such district one Federal land bank, with its principal office located in such city within the district as said board shall designate, and each land bank shall include in its title the names of the city and State in which it is located. Subject to the approval of the farm-loan board any Federal land bank may establish branches within the State or district in which it is located.

"In no case shall a Federal land bank be established with a capital stock of less than $250,000: *Provided*, That if in the judgment of said Federal farm-loan board agricultural conditions, or the terms and conditions on which farm loans may be procured from other sources, in any State do not warrant the establishment of a Federal land bank in such State, then such board may defer the establishment of such bank until conditions do so warrant, or may refrain altogether from establishing such bank: *Provided further*, That any qualified person seeking a loan on farm lands in a State where no bank has been established may make application to and receive a loan from the Federal land bank of an adjacent or other State under all the provisions and restrictions of this act.

"Each Federal land bank shall be temporarily managed by five directors appointed by the Federal farm-loan board. Said directors shall be citizens of the United States and residents of the district. They shall each give a surety bond, the premium on which shall be paid from the funds of the bank. They shall receive such compensation as the Federal farm-loan board shall fix. They shall choose from their number, by majority vote, a president, a vice president, a secretary, and a treasurer. They are further authorized and empowered to employ such attorneys, experts, assistants, clerks, laborers, and other employees as they may deem necessary, and to fix their compensation, subject to the approval of the Federal farm-loan board.

"Said temporary directors shall, under their hands, forthwith make an organization certificate, which shall specifically state:

"First. The name assumed by such bank.

"Second. The district within which its operations are to be carried on, and the particular city in which its principal office is to be located.

"Third. The amount of capital stock and the number of shares into which the same is to be divided.

"Fourth. The fact that the certificate is made to enable such persons to avail themselves of the advantages of this act.

"The organization certificate shall be acknowledged before a judge of some court of record or notary public, and shall be, together with the acknowledgment thereof, authenticated by the seal of such court or notary, transmitted to the farm-loan commissioner, who shall record and carefully preserve the same in his office, where it shall be at all times open to public inspection.

"The Federal farm-loan board is authorized to direct such changes in or additions to any such organization certificate as it may deem necessary or expedient.

"Upon duly making and filing such organization certificate the bank shall become, as from the date of the execution of its organization certificate, a body corporate, and as such, and in the name designated in the organization certificate, it shall have power—

"First. To adopt and use a corporate seal.

"Second. To have succession until it is dissolved by act of Congress or under the provisions of this act.

"Third. To make contracts.

"Fourth. To sue and be sued, complain and defend, in any court of law or equity, as fully as natural persons.

"Fifth. To elect or appoint directors, and by its board of directors to elect a president and a vice president, appoint a secretary and a treasurer and other officers and employees, define their duties, require bonds of them and fix the penalty thereof; by action of its board of directors dismiss such officers and employees, or any of them, at pleasure and appoint others to fill their places.

"Sixth. To prescribe, by its board of directors, subject to the supervision and regulation of the Federal farm-loan board, by-laws not inconsistent with law, regulating the manner in which its stock shall be transferred, its directors elected, its officers elected or appointed, its property transferred, its general business conducted, and the privileges granted to it by law exercised and enjoyed.

"Seventh. To exercise, by its board of directors or duly authorized officers or agents, subject to law, all such incidental powers as shall be necessary to carry on the business herein described.

"After the subscriptions to stock in any Federal land bank, hereinafter authorized, shall have reached the sum of $100,000, the officers of said land bank shall be elected and appointed as hereinafter provided, and shall, upon becoming duly qualified, take over the management of said land bank from the temporary officers appointed and chosen under this section.

"The board of directors of every Federal land bank shall be selected as hereinafter specified, and shall consist of five members, each holding

office for three years. Three of said directors shall be known as local directors, and shall be chosen by the stockholders of said bank in the manner prescribed for the election of directors of national banking associations; and the remaining two directors shall be known as district directors, and shall be appointed by the Federal farm-loan board and represent the public interest.

"The Federal farm-loan board shall designate one of the district directors to serve for two years and to act as chairman of the board of directors. The other district director shall serve for a term of one year. After the first appointments each director shall be appointed for a term of two years.

"At the first regular meeting of the board of directors of each Federal land bank it shall be the duty of the local directors to designate one of the local directors whose term of office shall expire in one year from the date of such meeting, one whose term of office shall expire in two years from said date, and one whose term of office shall expire in three years from said date. In making such designations an equitable allotment shall be made between directors chosen in the two divisions in accordance with the proportional representation determined by the farm-loan commissioner. Thereafter every director of a Federal land bank chosen as hereinbefore provided shall hold office for a term of three years. Vacancies that may occur in the board of directors shall be filled in the manner provided for the original selection of such directors. The board of directors shall at such first regular meeting elect from their number a loan committee of three members.

"Directors of Federal land banks shall have been for at least two years residents of the district for which they are appointed or elected, and at least one district director shall be experienced in practical farming and actually engaged at the time of his appointment in farming operations within the district. No director of a Federal land bank shall act as an officer, director, or employee of any other bank.

"Directors of Federal land banks shall receive, in addition to any compensation otherwise provided, a reasonable allowance for necessary expenses in attending meetings of their respective boards, to be paid by the respective Federal land banks. Any compensation that may be provided by boards of directors of Federal land banks for directors, officers, or employees shall be subject to the approval of the Federal farm loan board.

"CAPITAL STOCK OF FEDERAL LAND BANKS.

"SEC. 5. That every Federal land bank shall have, before beginning business, a subscribed capital of not less than $250,000. The Federal farm loan board is authorized to prescribe the times and conditions of the payment of subscriptions to capital stock, to reject any subscription in its discretion, and to require subscribers to furnish adequate security for the payment thereof.

"The capital stock of each Federal land bank shall be divided into shares of $5 each, and may be subscribed for and held by any individual, firm, or corporation, or by the Government of any State or of the United States.

"Stock owned by the Government of the United States in Federal land banks shall receive no dividends, but all other stock shall share in dividend distributions without preference. Each borrowing shareholder in any Federal land bank, including the government of any State or of the United States, shall be entitled to one vote for each share of stock held by him or it in deciding all questions at meetings of shareholders, and no other shareholder shall be permitted to vote. Stock owned by the United States shall be voted by the farm-loan commissioner, as directed by the Federal farm-loan board.

"It shall be the duty of the Federal farm-loan board, as soon as practicable after the passage of this act, to open books of subscription for the capital stock of a Federal land bank in each Federal land bank district. If within 90 days after the opening of said books any part of the minimum capitalization of $250,000 herein prescribed for Federal land banks shall remain unsubscribed, it shall be the duty of the Secretary of the Treasury to subscribe the balance thereof on behalf of the United States, said subscription to be subject to call in whole or in part by the board of directors of said land bank upon 30 days' notice, with the approval of the Federal farm-loan board; and the Secretary of the Treasury is hereby authorized and directed to take out shares corresponding to the unsubscribed balance as called, and to pay for the same out of any moneys in the Treasury not otherwise appropriated.

After the subscriptions to capital stock, exclusive of Government subscriptions, shall amount to $250,000 in any Federal land bank, said bank shall apply semiannually to the payment and retirement of stock held by the United States, one-quarter of all sums thereafter subscribed to capital stock, until all stock held therein by the United States is retired at par.

"Whenever capital stock of any Federal land bank or joint-stock land bank to the amount of $100,000 is paid in, at least 10 per cent thereof, and at least 10 per cent of any further payment amounting to $100,000, shall be invested in bonds of the United States, not later than two years after such payment.

"GOVERNMENT DEPOSITARIES.

"SEC. 6. That all Federal land banks and joint-stock land banks organized under this act, when designated for that purpose by the Secretary of the Treasury, shall be depositaries of public money, except receipts from customs, under such regulations as may be prescribed by said Secretary; and they may also be employed as financial agents of the Government; and they shall perform all such reasonable duties, as depositaries of public money and financial agents of the Government, as may be required of them. And the Secretary of the Treasury shall require of the Federal land banks and joint-stock land banks thus designated satisfactory security, by the deposit of United States bonds or otherwise, for the safekeeping and prompt payment of the public money deposited with them, and for the faithful performance of their duties as financial agents of the Government. No Government funds deposited under the provisions of this section shall be invested in mortgage loans.

"SEC. 7. Any person, qualified under the provisions of this act, desiring to borrow on farm-land mortgages from a Federal land bank within the district where the land to be mortgaged is situated shall deposit with the treasurer of said bank for the purchase of stock at par an amount equal to 5 per cent of the face of the desired loan. If the loan is granted, the applicant therefor shall thereupon become the owner of one share of capital stock in said bank for each $100 of the face of his loan, which shall be paid off at par and retired upon full payment of said loan. Said capital stock shall be held by said bank as collateral security for the payment of said loan, but said borrower shall be paid any dividends accruing and payable on said capital stock while it is outstanding. Such stock may at any time, in the discretion of the directors of said land bank, be paid off at part and retired. In such case a holder of said stock shall be credited with the par value thereof, and if said par value shall exceed the amount then due on his loan the balance shall be paid to him in cash.

"SEC. 8. Every Federal land bank formed under this act shall have its organization certificate provide for an increase of its capital stock from time to time for the purpose of securing additional loans for its qualified members and stockholders desiring the same and providing for the issue of shares to borrowers in accordance with the provisions of this act. Such increases shall be included in the quarterly reports of said banks to the Federal farm-loan board.

"SEC. 9. All earnings and reserves of any Federal land bank, together with the capital stock of said bank, shall be primarily applied to satisfy the obligations of said bank; and all mortgages belonging to said bank, whether or not the same have been pledged with the farm-loan registrar, shall be security for the payment of every farm-loan bond issued by said bank.

"RESTRICTIONS ON LOANS BASED ON FIRST MORTGAGES.

"SEC. 10. That no Federal land bank organized under this act shall make loans except upon the following terms and conditions:

"First. Said loans shall be secured by duly recorded first mortgages on farm land within the land-bank district in which the bank shall be situated.

"Second. Every such mortgage shall contain an agreement for the payment of a fixed number of semiannual installments sufficient to provide for an agreed rate of interest during the term and for the payment of the principal during and at the end of the term, on what is known as the amortization plan.

"Third. Every such mortgage shall run for a period of at least 5 years and not exceeding 36 years.

"Fourth. Every mortgage loan made under this act, for whatever period, shall provide for its extinguishment, at the option of the borrower, in whole or in part, at any date set for the payment of interest after five years from the date upon which said loan was made, as follows:

"(a) By the tender at their face value of farm-loan bonds issued by the land bank holding such mortgage, all unmatured coupons being attached to said bonds.

"(b) By advance payments in cash in sums of $100, or any multiple thereof. In such case the Federal land bank receiving such payments shall purchase for its own account, and credit at par upon the mortgage, farm-loan bonds in suitable amount; said land bank may call, as may be necessary, farm-loan bonds in suitable amounts, and when such calls shall have become effective shall credit such payments on such mortgage.

"*Provided*, That farm-loan bonds of any Federal land bank, tendered or purchased under the foregoing two paragraphs to extinguish the whole or any part of a mortgage loan, shall bear the rate of interest current on farm-loan bonds issued by such bank at the time such mortgage loan was made.

"Fifth. The rate of interest charged for such loans shall not exceed the legal rate fixed by law for loans by national banks.

"Sixth. Such loans may be made for the following purposes and for no other:

"(a) To provide for the purchase of a farm for a home.

"(b) To provide for the purchase of equipment, fertilizers, and live stock necessary for the proper and reasonable operation of the farm; the term 'equipment' to be defined by the Federal farm-loan board.

"(c) To provide buildings and for the improvement of farm lands; the term 'improvement' to be defined by the Federal farm-loan board.

"(d) To liquidate indebtedness of the owner of the land mortgaged, existing at the time of the organization of the first Federal land bank under the provisions of this act, or indebtedness subsequently incurred for one of the purposes above mentioned.

"Seventh. No such loan shall exceed 50 per cent of the value of the land mortgaged, said value to be ascertained by appraisal, as provided in section 16 of this act. In making said appraisal the actual earning power of said land shall be a principal factor. A reappraisal may be permitted at any time in the discretion of the Federal land bank, and such additional loan may be granted as such reappraisal will warrant under the provisions of this paragraph. Whenever the amount of the loan applied for exceeds the amount that may be loaned under the appraisal as herein limited, such loan may be granted to the amount permitted under the terms of this paragraph without requiring a new application or appraisal.

"Eighth. No such loan shall be made to any person who is not at the time, or who does not in his application promise shortly to become, engaged in the cultivation of the farm mortgaged. In case of the sale of the mortgaged land, the Federal land bank may, in its discretion, declare the mortgage thereon due and payable, or permit said mortgage to be assumed by the purchaser. In case of the death of the mortgagor, the mortgage may, on default and if necessary to protect the loan, declare the mortgage due and payable and take all steps necessary for its collection.

"Ninth. The amount of loans to any one borrower shall in no case exceed a maximum of $10,000, nor shall any loan be less than the sum of $200.

"Tenth. Every applicant for a loan under the terms of this act shall make application on a form to be prescribed for that purpose by the Federal farm-loan board, and such applicant shall state the objects to which the proceeds of said loan are to be applied, and shall afford such other information as may be required.

"Eleventh. Every borrower shall pay simple interest on defaulted payments at the rate of 6 per cent per annum, and by express covenant in his mortgage deed shall undertake to pay when due all taxes or assessments which may be lawfully assessed against the land mortgaged. Taxes or assessments not paid when due, and paid by the mortgagee, shall become a part of the mortgage debt and shall bear simple interest at the rate of 6 per cent per annum.

"Twelfth. Every borrower who shall be granted a loan under the provisions of this act shall enter into an agreement, in form and under conditions to be prescribed by the Federal farm-loan board, that if the whole or any portion of his loan shall be expended for purposes other than those specified in his original application, or if the borrower shall be in default in respect to any condition or covenant of the mortgage, the whole of said loan shall, at the option of the mortgagee, become due and payable forthwith: *Provided*, That the borrower may use part of said loan to repay any sum borrowed to pay for his stock in the Federal land bank, and the land bank holding such mortgage may permit said loan to be used for some other purpose specified in this section.

"Funds transmitted or paid out to borrowers on loans made to them by Federal land banks shall be in current funds, or farm-loan bonds, at the option of the borrower.

"POWERS OF FEDERAL LAND BANKS.

"SEC. 11. That every Federal land bank shall have power, subject to the limitations and requirements of this act—

"First. To issue, subject to the approval of the Federal farm-loan board, and to sell farm-loan bonds of the kinds authorized in this act, to buy the same for its own account, and to retire the same at or before maturity.

"Second. To invest such funds as may be in its possession in the purchase of qualified first mortgages on farm lands situated within the Federal land-bank district within which it is organized or for which it is acting.

"Third. To receive and to deposit in trust with the farm-loan registrar for the district, to be by him held as collateral security for farm-loan bonds, first mortgages upon farm land qualified under section 10 of this act, and to collect or empower any duly authorized agent, to collect and immediately pay over to said land bank the dues, interest, armortization installments and other sums payable under the terms, conditions, and covenants of the mortgages and of the bonds secured thereby.

"Fourth. To receive and to set apart for expenses and profits the excess of interest payments on indorsed mortgages above the interest payments on farm-loan bonds for which said mortgages are held as collateral security, said excess of interest in no case to be more than 1 per cent of the amount of principal remaining unpaid on said mortgages.

"Fifth. To acquire and dispose of—

"(a) Such property, real or personal, as may be necessary or convenient for the transaction of its business, which, however, may be in part leased to others for revenue purposes.

"(b) Parcels of land mortgaged to it as security where there has been default in payment of the mortgage.

"(c) Parcels of land acquired in satisfaction of debts or purchased at sales under judgments, decrees, or mortgages held by it. But no such bank shall hold title and possession of any real estate purchased or acquired to secure any debt due to it, for a longer period than five years, except with the special approval of the Federal farm-loan board in writing.

"Sixth. To deposit its securities and its current funds subject to check with any Federal reserve bank or with any member bank of the Federal reserve system, and to receive interest on the same as may be agreed.

"Seventh. To borrow money, to give security therefor, and to pay interest thereon.

"Eighth. To buy and sell United States bonds.

"RESTRICTIONS OF FEDERAL LAND BANKS.

"SEC. 12. That no Federal land bank shall have power—

"First. To accept deposits of current funds payable upon demand except from its own stockholders, or to transact any banking or other business not expressly authorized by the provisions of this act.

"Second. To loan on first mortgage except on direct application of a qualified borrower under the provisions of this act or through agents as provided in section 14.

"Third. To accept any mortgages on real estate except first mortgages created subject to all limitations imposed by section 10 of this act and those taken as additional security for existing loans.

"Fourth. To issue or obligate itself for outstanding farm-loan bonds in excess of twenty times the amount of its capital and surplus.

"Fifth. To demand or recive, under any form or pretense, any commission or charge not specifically authorized in this act. This provision shall also apply to joint-stock land banks.

"SPECIAL PROVISIONS.

"SEC. 13. That any person who shall become a shareholder of any Federal land bank and is otherwise qualified under the provisions of this act shall be entitled to borrow money on farm-land mortgage upon filing his application in accordance with section 7 and otherwise complying with the terms of this act whenever the Federal land bank of the district has funds available for that purpose, unless said land bank or the Federal farm-loan board shall, in its discretion, otherwise determine.

"Such member may, at his option, pay the expenses for appraisal, examining title, drawing legal papers, recording, and similar services, or he may require such expenses to be advanced by the Federal land bank making the loan, in which case said expenses may be made a part of the face of the loan and paid off in amortization payments. Such addition to the loan shall not be permitted to increase said loan above the 50 per cent limited in section 10.

"Any person who shall borrow from a Federal land bank for the purpose of purchasing a farm for a home under the provisions of section 10 of this act may, at his option, borrow from the Federal land bank such sum as is needed to pay for his required shares of stock in the Federal land bank, and such sum may be borrowed in addition to the amount permitted to be borrowed under the provisions of said section 10.

"AGENTS OF FEDERAL LAND BANKS.

"SEC. 14. Federal land banks may make loans on farm lands through agents approved by the Federal farm-loan board.

"Such loans shall be subject to all the conditions and restrictions provided by this act, and each borrower shall contribute 5 per cent of the amount of his loan to the capital of the Federal land bank, and shall become the owner of as much capital stock of the land bank as such contribution shall warrant.

"No other agent than a duly incorporated bank, trust company, or mortgage institution, chartered by the Federal Government, or by the State in which it has its principal office, shall be employed under the provisions of this section.

"Federal land banks may pay to such agents not to exceed one-half of 1 per cent per annum upon the unpaid principal of said loan.

"Actual expenses paid by borrowers for appraisal, examining title, drawing legal papers, recording, and similar services may be added to the face of the loan and paid off in amortization payments. Such addition to the loan shall not be permitted to increase said loan above the 50 per cent limited in section 10.

"Said agents, when required by the Federal land banks, shall collect and forward to such banks without charge all interest and amortization payments on loans indorsed by them.

"Any agent negotiating any such loan shall indorse the same and become liable for the payment thereof, and for any default by the mortgagor, on the same terms and under the same penalties as if the loan had been originally made by said agent as principal and sold by said agent to said land bank, but the aggregate of the unpaid principal of mortgage loans received from any such agent shall not exceed its capital and surplus.

"JOINT-STOCK LAND BANKS.

"SEC. 15. That corporations, to be known as joint-stock land banks, for carrying on the business of lending on farm-mortgage security and issuing farm-loan bonds, may be formed by any number of natural persons not less than 10. They shall be organized subject to the requirements and under the conditions set forth in section 4 of this act, so far as the same may be applicable: *Provided*, That the board of directors of every joint-stock land bank may consist of more than 5 members.

"Shareholders of every joint-stock land bank organized under this act shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such bank to the extent of the amount of stock owned by them at the par value thereof, in addition to the amount paid in and represented by their shares.

"Except as otherwise provided, joint-stock land banks shall be subject to all the restrictions and conditions imposed on Federal land banks by this act, so far as such restrictions and conditions are applicable: *Provided, however*, That the Government of the United States shall not purchase or subscribe for any of the capital stock of any such bank; and each shareholder of any such bank shall have the same voting privileges as holders of shares in national banking associations.

"No joint-stock land bank shall have power to issue or obligate itself for outstanding farm-loan bonds in excess of fifteen times the amount of its capital and surplus, or to receive deposits, or to transact any banking or other business not expressly authorized by the provisions of this act.

"No joint-stock land bank shall be authorized to do business until capital stock to the amount of at least $250,000 has been subscribed and paid in cash, and a charter has been issued to it by the Federal farm-loan board. In States having populations exceeding 2,000,000, the capital stock of joint-stock land banks shall be not less than $500,000.

"Farm-loan bonds issued by joint-stock land banks shall be so engraved as to be readily distinguished in form and color from farm-loan bonds issued under this act by Federal land banks, and shall otherwise bear such distinguishing marks as the Federal farm-loan board shall direct.

"Joint-stock land banks shall not be subject to the provisions of section 11 or section 17 of this act as to interest rates on mortgage loans or farm-loan bonds, nor to the provisions of the paragraphs designated first, sixth, eighth, ninth, and twelfth of section 10 as to restrictions on mortgage loans: *Provided, however*, That no loans shall be made in excess of 50 per cent of the appraised value of the mortgaged lands, and all loans shall be secured by first mortgages on farm lands within the State in which such joint-stock land bank has its principal office or within some State contiguous to such State.

"Joint-stock land banks shall in no case charge interest on farm loans exceeding by more than 1 per cent the rate of interest established for the last series of farm-loan bonds issued by them.

"Each joint-stock land bank organized under this act shall have authority to issue bonds based upon mortgages taken by it in accordance with the terms of this act. Such bonds shall be in form prescribed by the Federal farm-loan board, and it shall be stated in such bonds that such bank is organized under section 15 of this act, is under Federal supervision, and operates under the provisions of this act.

"Farm-loan bonds issued by joint-stock land banks shall be called joint-stock bonds.

"APPRAISAL.

"SEC. 16. That whenever an application for a mortgage loan is made to any Federal land bank it shall be first referred to the loan committee provided for in section 7 of this act. Said loan committee shall examine the land which is offered as security for the desired loan and shall make a detailed written report signed by all three members, giving the appraisal of said land as determined by them, and such other information as may be required by rules and regulations to be prescribed by the Federal farm-loan board. No loan shall be approved by the directors unless said loan committee agrees unanimously upon a favorable report.

"The written report of said loan committee shall be submitted to the Federal land bank, together with the application for the loan, and the directors of said land bank shall examine said written report when they pass upon the loan application which it accompanies, but they shall not be bound by said appraisal.

"Before any mortgage loan is made by any Federal land bank or joint-stock land bank it shall refer the application and written report of the loan committee to one or more of the land-bank appraisers appointed under the authority of section 3 of this act, and such appraiser or appraisers shall investigate and make a written report upon the land offered as security for said loan. No such loan shall be made by said land bank unless said written report is favorable.

"Whenever any Federal land bank or joint-stock land bank shall desire to issue farm-loan bonds under the provisions of section 19 of this act, the Federal farm-loan board shall refer the application of such land bank to one or more of the special appraisers appointed under the authority of section 3 of this act. Such special appraiser or appraisers shall make such examination and appraisal of the mortgages offered as collateral security for such bonds as the Federal farm-loan board shall direct, and shall make a written report to said board. No issue of farm-loan bonds shall be authorized unless the Federal farm-loan board shall approve such issue in writing.

"Forms for appraisal reports for Federal land banks shall be prescribed by the Federal farm-loan board.

"Land-bank appraisers and special appraisers shall make such examinations and appraisals and conduct such investigations concerning farm-loan bonds and first mortgages as the Federal farm-loan board shall direct.

"No borrower under this act shall be eligible as an appraiser under this section, but borrowers may act as members of a loan committee in any case where they are not personally interested in the loan under consideration. When any member of a loan committee or of a board of directors is interested, directly or indirectly, in a loan, a majority of the board of directors shall appoint a substitute to act in his place in passing upon such loan.

"POWERS OF FEDERAL FARM-LOAN BOARD.

"SEC. 17. That the Federal farm-loan board shall have power—

"(a) To organize and charter Federal land banks and joint-stock land banks, subject to the provisions of this act.

"(b) To review and alter at its discretion the rate of interest to be charged by Federal land banks for loans made by them under the provisions of this act, said rates to be uniform so far as practicable.

"(c) To grant or refuse to Federal land banks or joint-stock land banks authority to make any specific issue of farm-loan bonds.

"(d) To make rules and regulations respecting the charges made to borrowers on loans under this act for expenses in appraisal, examining title, drawing legal papers, recording, and similar services.

"(e) To require reports and statements of condition and to make examinations of all banks doing business under the provisions of this act.

"(f) To prescribe the form and terms of farm-loan bonds, and the form, terms, and penal sums of all surety bonds required under this act and of such other surety bonds as they shall deem necessary, such surety bonds to cover financial loss as well as faithful performance of duty.

"(g) To require Federal land banks to pay forthwith to any Federal land bank their equitable proportion of any sums advance by said land bank to pay the coupons of any other land bank, basing said required payments on the amount of farm-loan bonds issued by each land bank and actually outstanding at the time of such requirement.

"(h) To exercise such incidental powers as shall be necessary or requisite to fulfill their duties and carry out the purposes of this act.

"APPLICATIONS FOR FARM-LOAN BONDS.

"SEC. 18. That any Federal land bank, or joint-stock land bank, which shall have voted to issue farm-loan bonds or joint-stock bonds under this act, shall make written application to the Federal farm-loan board, through the farm-loan registrar of the district, for approval of such issue. With said application said land bank shall tender to said farm-loan registrar as collateral security first mortgages on farm lands qualified under the provisions of section 10 or section 14 of this act, or United States Government bonds, not less in aggregate amount than the sum of the bonds proposed to be issued. Said bank shall furnish with such mortgages a schedule containing a description thereof and such other information as may be prescribed by the Federal farm-loan board.

"Upon receipt of such application said farm-loan registrar shall verify said schedule and shall transmit said application and said schedule to the Federal farm-loan board, giving such further information pertaining thereto as he may possess. The Federal farm-loan board shall forthwith cause one or more special appraisers to make such investigation and appraisement of the securities tendered as it shall deem wise, and upon receiving a report from said special appraiser or appraisers it shall grant in whole or in part, or reject entirely, such application.

"The Federal farm-loan board shall promptly transmit its decision as to any issue of farm-loan bonds to the land bank applying for the same and to the farm-loan registrar of the district. Said registrar shall furnish, in writing, such information regarding any issue of farm-loan bonds as the Federal farm-loan board may at any time require.

"ISSUE OF FARM-LOAN BONDS.

"SEC. 19. That whenever any farm-loan registrar shall receive from the Federal farm-loan board notice that it has approved any issue of farm-loan bonds under the provisions of section 18, he shall forthwith take such steps as may be necessary, in accordance with the provisions of this act, to insure the prompt execution of said bonds and the delivery of the same to the land bank applying therefor.

"Whenever the Federal farm-loan board shall reject entirely any application for an issue of farm-loan bonds the first mortgages tendered to the farm-loan registrar as collateral security therefor shall be forthwith returned to said land bank by him.

"Whenever the Federal farm-loan board shall approve an issue of farm-loan bonds the farm-loan registrar having the custody of the first mortgages and bonds tendered as collateral security for such issue of bonds shall retain in his custody those first mortgages and bonds which are to be held as collateral security and shall return to the bank owning the same any of said mortgages and bonds which are not to be held by him as collateral security. The land bank which is to issue said farm-loan bonds shall transfer to said registrar, by assignment in trust, all first mortgages and bonds which are to be held by said registrar as collateral security, said assignment providing for the right of redemption at any time by payment as provided in this act and reserving the right of substitution of other mortgages qualified under section 10 or section 14 of this act. Said mortgages shall be deposited in such deposit vault or bank as the Federal farm-loan board shall approve, subject to the control of said registrar, and in his name as trustee for the bank issuing the farm-loan bonds and for the prospective holders of said farm-loan bonds.

"No mortgage shall be accepted by a farm-loan registrar from a Federal land bank as part of an offering to secure an issue of farm-loan bonds, either originally or by substitution, except first mortgages made subject to the conditions prescribed in said sections 10 or 14.

"It shall be the duty of each farm-loan registrar to see that the farm-loan bonds delivered by him and outstanding do not exceed the amount of collateral security pledged therefor. Such registrar may, in his discretion, temporarily accept in place of mortgages withdrawn United States Government bonds, farm-loan bonds, or cash.

"The Federal farm-loan board may, at any time, call upon any land bank for additional security to protect the bonds issued by it.

"FORM OF FARM-LOAN BONDS.

"SEC. 20. That all bonds provided for in this act shall be issued under the authority and by the direction of the Federal farm-loan board. They shall be issued in denominations of $25, $50, $100, $500, and $1,000. They shall run for specified minimum and maximum periods, subject to be paid and retired at the option of the land bank at any time after 10 years from the date of their issue. They shall have interest coupons attached, payable semiannually, and shall be issued in series of not less than $50,000, whose amount and term shall be fixed by the Federal farm-loan board. They shall bear a rate of interest not to exceed 5 per cent per annum.

"The Federal farm-loan board shall prescribe rules and regulations concerning the form of farm-loan bonds, and the circumstances and manner in which farm-loan bonds shall be paid and retired under the provisions of this act.

"Farm-loan bonds shall be delivered through the registrar of the district to the bank applying for the same.

"In order to furnish suitably engraved bonds for delivery to Federal land banks and joint-stock land banks, the Comptroller of the Currency shall, under the direction of the Secretary of the Treasury, cause plates and dies to be engraved in the best manner to guard against counterfeits and fraudulent alterations, and shall have printed therefrom and numbered such quantities of such bonds of the denominations of $100, $500, and $1,000 as may be required to supply such land banks. Such bonds shall be in form and tenor as directed by the Federal farm-loan board under the provisions of this act and shall bear the distinctive numbers and names of the several land banks by which they are issued. They may be exchanged into registered bonds of any amount, and reexchanged into coupon bonds, at the option of the holder, under rules and regulations to be prescribed by the Federal farm-loan board.

"When such bonds have been prepared they shall be deposited in the Treasury or in the subtreasury or mint of the United States nearest the place of business of each land bank, and shall be held for the use of such bank, subject to the order of the farm-loan registrar of the district.

"The plates and dies to be procured by the Comptroller of the Currency for the printing of such bonds shall remain under his control and direction, and the expenses necessarily incurred in executing the laws relating to the preparation of such bonds and all other expenses incidental to their issue and retirement shall be paid by the land banks. The Federal farm-loan board shall levy semiannually against the respective Federal land banks and joint-stock land banks, in proportion to the issue of bonds by each, a sufficient amount to cover such expenses.

"The examination of plates, dies, bed pieces, etc., and regulations to such examination of plates, dies, etc., of national-bank notes provided for in section 5174, Revised Statutes, are hereby extended to include bonds herein provided for.

"Any appropriation heretofore made out of the general fund of the Treasury for engraving plates and dies, for the purchase of distinctive paper, or to cover any other expense in connection with the printing of paper currency, and any distinctive paper that may be on hand at the time of the passage of this act may be used in the discretion of the Secretary of the Treasury for the purposes of this act, and should the appropriations heretofore made be insufficient to meet the requirements of this act, the Secretary is hereby authorized to use so much of any funds in the Treasury not otherwise appropriated as may be required for the purpose of furnishing the bonds aforesaid, adequate reimbursement being duly made therefor under the provisions of this section.

"SPECIAL PROVISIONS OF FARM-LOAN BONDS.

"SEC. 21. That each Federal land bank shall be bound in all respects by the acts of its officers in signing and issuing farm-loan bonds, and by the acts of the Federal farm-loan board in authorizing their issue.

"Every Federal land bank issuing farm-loan bonds shall be primarily liable therefor, and shall also be liable, upon presentation of farm-loan bond coupons, for interest payments due upon any farm-loan bonds issued by other Federal land banks and remaining unpaid in consequence of the default of such other land banks; and every such bank shall likewise be liable for such portion of the principal of farm-loan bonds so issued as shall not be paid after the assets of any such other land banks shall have been liquidated and distributed: *Provided*, That such losses, if any, either of interest or of principal, shall be assessed by the Federal farm-loan board against solvent land banks liable therefor in proportion to the amount of farm-loan bonds which each may have outstanding at the time of such assessment.

"Every farm-loan bond issued by a Federal land bank shall be signed by its president and attested by its secretary, and shall contain on the face thereof a certificate signed by the farm-loan commissioner to the effect that it is issued under the authority of the Federal farm-loan act, has the approval in form and issue of the Federal farm-loan board, and is legal and regular in all respects; that it is not taxable by National, State, municipal, or local authority; that it is issued against collateral security of Government bonds, or first mortgages on farm lands, deposited with the farm-loan registrar, and that all Federal land banks, stating the approximate amount of their aggregate capital and surplus, are liable for the payment of each bond.

"APPLICATION OF AMORTIZATION AND INTEREST PAYMENTS.

"SEC. 22. That whenever any Federal land bank, or joint-stock land bank, shall receive any interest, amortization, or other payment upon any first mortgage pledged as collateral security for the issue of farm-loan bonds, it shall forthwith notify the farm-loan registrar of the items so received. Said registrar shall forthwith cause such payment to be duly credited upon the mortgage entitled to such credit. Whenever any such mortgage is paid in full, said registrar shall cause the same to be canceled and delivered to the proper land bank for transmission to the original maker thereof, or his heirs, administrators, or assigns.

"Upon written application by any Federal land bank, or joint-stock land bank, to the farm-loan registrar, it may be permitted, in the discretion of said registrar, to withdraw any mortgages or bonds pledged as collateral security under this act, and to substitute therefor other mortgages or United States Government bonds not less in amount than the mortgages or bonds desired to be withdrawn, such substituted mortgages being qualified under section 10 or section 14 of this act.

"Whenever any farm-loan bonds, or coupons or interest payments of such bonds, are due under their terms, they shall be payable at the land bank by which they were issued, in gold or lawful money, and upon payment shall be duly canceled by said bank. At the discretion of the Federal farm-loan board, payment of any farm-loan bond or coupon or interest payment may, however, be authorized to be made at any Federal land bank, any joint-stock land bank, or any other bank, under rules and regulations to be prescribed by the Federal farm-loan board.

"When any land bank shall surrender to the proper farm-loan registrar any farm-loan bonds of any series, canceled or uncanceled, said land bank shall be entitled to withdraw first mortgages and bonds pledged as collateral security for any of said series of farm-loan bonds to an amount equal to the farm-loan bonds so surrendered, and it shall be the duty of said registrar to permit and direct the delivery of such mortgages and bonds to such land bank.

"Interest payments on hypothecated first mortgages shall be at the disposal of the land bank pledging the same, and shall be available for the payment of coupons and the interest of farm-loan bonds as they become due.

"Whenever any bond matures, or the interest on any registered bond is due, or the coupon on any coupon bond matures, and the same shall be presented for payment as provided in this act, the full face value thereof shall be paid to the holder.

"Amortization or other payments on the principal of first mortgages held as collateral security for the issue of farm-loan bonds shall constitute a trust fund in the hands of the Federal land bank, or joint-stock land bank, receiving the same, and shall be applied or employed as follows:

"In the case of a Federal land bank—

"(a) To pay off farm-loan bonds issued by said bank as they mature.

"(b) To purchase farm-loan bonds issued by said bank or by any Federal land bank.

"(c) To loan on first mortgages on farm lands within the land-bank district, qualified under this act as collateral security for an issue of farm-loan bonds.

"(d) To purchase United States Government bonds.

"(e) To convert said payments into gold or lawful money.

"In the case of a joint-stock land bank—

"(a) To pay off farm-loan bonds issued by said bank as they mature.

"(b) To purchase farm-loan bonds.

"(c) To loan on first mortgages on farm lands within the State in which it has its principal office.

"(d) To purchase United States Government bonds.

"(e) To convert said payments into gold or lawful money.

"The farm-loan bonds, first mortgages, Government bonds, or gold or lawful money, constituting the trust fund aforesaid, shall be forthwith deposited with the farm-loan registrar as substituted collateral security in place of the sums paid on the principal of indorsed mortgages held by him in trust.

"Federal land banks, in the order of their applications, shall have a preference over other subscribers in purchasing the whole or any part of an issue of farm-loan bonds.

"Every Federal land bank, or joint-stock land bank, shall notify the farm-loan registrar of the disposition of all payments made on the principal of mortgages held as collateral security for an issue of farm-loan bonds, and said registrar is authorized, at his discretion, to order any of such payments, or the proceeds thereof, wherever deposited or however invested, to be immediately transferred to his account as trustee aforesaid.

"RESERVE AND DIVIDENDS OF LAND BANKS.

"SEC. 23. That every Federal land bank, and every joint-stock land bank, shall, out of its net earnings, semiannually carry to reserve account 25 per cent thereof until said reserve account shall show a credit balance equal to 20 per cent of the outstanding capital stock of said land bank. Whenever said reserve shall have been impaired, said balance of 20 per cent shall be fully restored before any dividends are paid. After said reserve has reached the sum of 20 per cent of the outstanding capital stock, 5 per cent of the net earnings shall be annually added thereto. For the period of two years from the date when any default occurs in the payment of the interest, amortization installments, or principal on any first mortgage, by both mortgagor and indorser, the amount so defaulted shall be carried to a suspense account, and at the end of the two-year period specified, unless collected, shall be debited to reserve account.

"Whenever the net earnings of any Federal land bank or joint-stock land bank, after deducing the 25 per cent or the 5 per cent hereinbefore directed to be deducted for credit to reserve account, shall amount to 2 per cent upon the face value of the capital stock of such land bank then outstanding, said land bank may, at its discretion, declare a divident to shareholders of the whole or any part of the balance of said net earnings.

"DEFAULTED LOANS.

"SEC. 24. That if there shall be default under the terms of any indorsed first mortgage held by a Federal land bank under the provisions of this act, the agent, if any, through which said mortgage was received by said Federal land bank shall be notified of said default. Said agent shall thereupon be required, within 30 days after such notice, to make good said default, either by payment of the amount unpaid thereon in cash or by the substitution of an equal amount of farm-loan bonds issued by said land bank, with all unmatured coupons attached.

"EXEMPTION FROM TAXATION.

"SEC. 25. That every Federal land bank, including the capital stock and reserve or surplus therein and the income derived therefrom, shall be exempt from Federal, State, municipal, and local taxation, except taxes upon real estate held, purchased, or taken by said bank under the provisions of section 11 of this act. First mortgages executed to Federal land banks or to joint-stock land banks and farm-loan bonds issued under the provisions of this act shall be deemed and held to be instrumentalities of the Government of the United States, and as such they and the income derived therefrom shall be exempt from Federal State, municipal, and local taxation.

"INVESTMENT IN FARM-LOAN BONDS.

"SEC. 26. That farm-loan bonds issued under the provisions of this act by Federal land banks or joint-stock land banks shall be a lawful investment for all fiduciary and trust funds, and may be accepted as security for all public deposits.

"Any bank of the Federal Reserve System may buy or sell farm-loan bonds issued under the authority of this act; any member bank of said system may accept time drafts against a deposit of such bonds as security; acceptances of a member bank thus made, or the direct obligations of such bank maturing within 60 days, when accompanied by farm-loan bonds as collateral security not less in face value than the amount of such direct obligation, shall be eligible for discount by the Federal reserve bank of its district.

"Section 9 of the act of June 25, 1910, entitled 'An act to establish postal savings depositaries for depositing savings at interest, with the security of the Government for repayment thereof, and for other purposes' (vol. 36, U. S. Stat. L., p. 814), shall be, and the same is hereby, amended by adding a new paragraph at the close of said section to read as follows: 'Federal farm-loan bonds authorized by the Federal farm-loan board and issued by any Federal land bank may be purchased by the trustees, in lieu of United States bonds or other securities, for the purpose of investing postal savings deposits under the provisions of this section. Whenever funds shall be withdrawn from postal savings depositaries for investment, the trustees are hereby authorized to purchase Federal farm-loan bonds in the open market or from any Federal land bank authorized to issue the same: *Provided*, That in no case shall such farm-loan bonds be purchased at more than par, nor shall more than 30 per cent of the postal savings deposits be invested at any one time in farm-loan bonds as herein provided.'

"STATE LEGISLATION.

"SEC. 27. That it shall be the duty of the farm-loan commissioner to make examination of the laws of every State of the United States and to inform the Federal farm-loan board as rapidly as may be whether in his judgment the laws of each State relating to the conveying and recording of land titles, and the foreclosing of mortgages or other instruments securing loans, as well as providing homestead and other exemptions and granting the power to waive such exemptions as respects first mortgages, are such as to assure the holder thereof adequate safeguards against loss in the event of default on loans secured by any such mortgages.

"Pending the making of such examination in the case of any State, the Federal farm-loan board may declare first mortgages on farm lands situated within such State ineligible as the basis for an issue of farm-loan bonds; and if said examination shall show that the laws of any such State afford insufficient protection to the holder of first mortgages of the kinds provided in this act, the said Federal farm-loan board may declare said first mortgages on land situated in such State ineligible during the continuance of the laws in question. In making his examination of the laws of the several States and forming his conclusions thereon said farm-loan commissioner may call upon the office of the Attorney General of the United States for any needed legal advice or assistance, or may employ special counsel in any State where he considers such action necessary.

"At the request of the executive of any State the Federal farm-loan board shall prepare a statement setting forth in what respects the requirements of said board can not be complied with under the existing laws of such States.

"EXAMINATIONS.

"SEC. 28. That the Federal farm-loan board shall appoint as many land-bank examiners as in its judgment may be required to make careful examinations of the banks permitted to do business under this act.

"Said examiners shall be subject to the same requirements, responsibilities, and penalties as are applicable to national bank examiners under the national bank act, the Federal reserve act, and other provisions of law. Said examiners shall be required to examine and report the condition of every Federal land bank and joint-stock land bank at least twice each year.

"Said examiners shall receive salaries to be fixed by the Federal farm-loan board, which shall be paid by the Secretary of the Treasury out of any money in the Treasury not otherwise appropriated.

"PENALTIES.

"SEC. 29. That any applicant for a loan from a Federal land bank or joint-stock land bank who shall knowingly make any false statement in his application for such loan, and any member of a loan committee or any appraiser provided for in this act who shall willfully overvalue any land offered as security for loans under this act shall be deemed guilty of a misdemeanor and shall be imprisoned not exceeding one year or fined not more than $5,000, or both. Any examiner appointed under this act who shall accept a loan or gratuity from any bank examined by him, or from any person connected with any such bank in any capacity, shall be deemed guilty of a misdemeanor, and shall be imprisoned not exceeding one year or fined not more than $5,000, or both, and may be fined a further sum equal to the money so loaned or gratuity given, and shall forever thereafter be disqualified from holding office as an examiner under the provisions of this act. No examiner shall perform any other service for compensation while holding such office, for any bank or banking or loan association, or for any person connected therewith in any capacity.

"Any person who shall falsely make, forge, or counterfeit, or cause or procure to be falsely made, forged, or counterfeited, or willingly aid or assist in falsely making, forging, or counterfeiting any bond, coupon, or paper in imitation of, or purporting to be in imitation of, the bonds or coupons issued by any bank or association, now or hereafter authorized and acting under the laws of the United States; or any person who shall pass, utter, or publish, or attempt to pass, utter, or publish any false, forged, or counterfeited bond, coupon, or paper purporting to be issued by any such bank or association, knowing the same to be falsely made, forged, or counterfeited; or whoever shall falsely alter, or cause or procure to be falsely altered, or shall willingly aid or assist in falsely altering any such bond, coupon, or paper, or shall pass, utter, or publish as true any falsely altered or spurious bond, coupon, or paper issued, or purporting to have been issued, by any such bank or association, knowing the same to be falsely altered or spurious, shall be deemed guilty of a misdemeanor and shall be fined not exceeding $5,000 or imprisoned not exceeding five years, or both.

"Other than the usual salary or director's fee paid to any officer, director, or employee of a Federal land bank or a joint-stock land bank, and other than a reasonable fee paid by such bank to any officer, director, attorney, or employee for services rendered, no officer, director, attorney, or employee of any bank organized under this act shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of such bank. No bank organized under this act shall charge or receive any fee, commission, bonus, gift, or other consideration not herein specifically authorized. No examiner, public or private, shall disclose the names of borrowers to other than the proper officers of a Federal land bank without first having obtained express permission in writing from the farm-loan commissioner or from the board of directors of such bank, except when ordered to do so by a court of competent jurisdiction or by direction of the Congress of the United States, or of either House thereof, or any committee of Congress or of either House duly authorized. Any person violating any provision of this paragraph shall be punished by a fine of not exceeding $5,000 or by imprisonment not exceeding one year, or both.

"Any person connected in any capacity with any Federal land bank, or joint-stock land bank, who embezzles, abstracts, or willfully misapplies any moneys, funds, or credits, or who without authority from the directors draws any order, assigns any note, bond, draft, mortgage, judgment, or decree, or who makes any false entry in any book, report, or statement of such land bank with intent in either case to defraud such institution or any other company, body politic or corporate, or any individual person, or to deceive any officer of a land bank or any agent appointed to examine into the affairs of any such bank, and every person who with like intent aids or abets any officer, clerk, or agent in any violation of this section, shall be deemed guilty of a misdemeanor, and shall be fined not exceeding $5,000 or imprisoned not exceeding five years, or both.

"Any person who shall receive, defraud, or impose upon, or who shall attempt to deceive, defraud, or impose upon, any person, firm, or corporation by making any false pretense or representation regarding the character, issue, security, or terms of any farm-loan bond, or coupon, issued under the terms of this act; or by falsely pretending or representing that any farm-loan bond, or coupon, issued under the terms of this act by one class of land banks is a farm-loan bond, or coupon, issued by another class of banks; or by falsely pretending or representing that any farm-loan bond, or coupon, issued under the terms of this act, or anything contained in said farm-loan bond, or coupon, is anything other than, or different from, what it purports to be on the face of said bond, or coupon, shall be deemed guilty of a misdemeanor, and shall be fined not exceeding $5,000 or imprisoned not exceeding five years, or both.

"GOVERNMENT DEPOSITS.

"SEC. 30. That the Secretary of the Treasury is authorized and directed, upon the request of the Federal farm-loan board, to make advances or deposits for the temporary use of any Federal land bank, out of any money in the Treasury not otherwise appropriated. Such Federal land bank shall issue to the Secretary of the Treasury a certificate of indebtedness for any such advance or deposit, bearing interest at the rate of 2 per cent per annum, to be secured by farm-loan bonds or other collateral to the satisfaction of the Secretary of the Treasury. Any such certificate shall be redeemed and paid by such land bank at the direction of the Federal farm-loan board. The aggregate of all sums so advanced or deposited by the Secretary of the Treasury in any fiscal year shall not exceed the sum of $6,000,000 at any one time.

"DISSOLUTION AND APPOINTMENT OF RECEIVERS.

"SEC. 31. Upon default of any obligations by any Federal land bank or any joint-stock land bank, said bank may be declared insolvent and placed in the hands of a receiver, to be appointed by the Federal farm-loan board. Such receiver, under the direction of the Federal farm-loan board, shall take possession of the books, records, and assets of every description of said bank, collect all debts, dues, and claims belonging to it, and with the approval of the Federal farm-loan board, or upon the order of a court of record of competent jurisdiction, may sell or compound all bad or doubtful debts, and, on a like approval or order, may sell all the real and personal property of such association on such terms as the Federal farm-loan board or said court shall direct. Such receiver shall pay over all money so collected to the Treasurer of the United States, subject to the order of the Federal farm-loan board, and also make report to said board of all his acts and proceedings.

"Whenever the capital stock of a Federal land bank shall be reduced the board of directors shall cause to be executed a certificate to the Federal loan board showing such reduction of capital stock, and if said reduction shall be due to the insolvency of a farm-loan association, the amount repaid to such association.

"No Federal land bank or joint stock land bank shall be dissolved without the written consent of the Federal farm-loan board.

"ORGANIZATION EXPENSES.

"SEC. 32. That the sum of $100,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be expended under the direction of the Federal farm-loan board, for the purpose of carrying into effect the provisions of this act.

"LIMITATION OF COURT DECISIONS.

"SEC. 33. That if any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this act, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof, directly involved in the controversy in which such judgment shall have been rendered.

"REPEALING CLAUSE.

"SEC. 34. That all acts or parts of acts inconsistent with this act are hereby repealed, and this act shall take effect upon its passage. The right to amend, alter, or repeal this act is hereby expressly reserved.

"Amend the title so as to read: 'A bill to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes.'"

The VICE PRESIDENT. The question is on the substitute of the Senator from South Dakota.

Mr. CURTIS. Mr. President, when this bill was agreed upon by the committee I sent a number of them and copies of the bill introduced by the Senator from North Dakota [Mr. GRONNA] and a House bill to various organizations in the State of Kansas. At that time I thought the Gronna bill would be offered as a substitute for this measure; and I asked the heads of these organizations if they would not comment upon the two bills and write me what they thought of them. I stated in the letter that as this measure had been agreed upon by the committee and was indorsed by the majority, it would likely pass.

I have here a letter from one of the leading farmers of the fourth Kansas district, in which he analyzes this measure, and I should like to have it read in my time. After it is read, I want to submit a few remarks.

The VICE PRESIDENT. Is there any objection? The Chair hears none.

The Secretary read as follows:

ONAGA, KANS., *March 25, 1916.*

Hon. CHARLES CURTIS,
*Washington, D. C.*

MY DEAR SENATOR: Under date of February 18 you wrote me asking the farmers' view on rural credits bill recommended by the Joint Committee on Rural Credits. You will pardon my delay in responding thereto, but I desired to give the matter careful consideration before submitting an opinion, and, if possible, ascertain from farmers themselves their consensus of the measure proposed. I feel that I can now give you the general view of the Kansas farmer.

The Kansas farmer has very little trouble to-day in securing real estate loans on improved land, or on land in cultivation upon which improvements are to be made, for a period of five years or longer, to the amount of 50 per cent of the value of the land, at 6 per cent interest. Fully half of these loans are made by loan agents and the other half by trust companies, banks, and private persons. The loan agents and trust companies obtain their money at 5 per cent. They sell the loans in the East so that the purchaser realizes 5 per cent interest on his money, and they thus make 1 per cent profit, less their expense, in securing and writing the business. It is apparent, therefore, that the Kansas farmer is securing money at a fair rate of interest.

Under the proposed measure loans will be made to actual tillers of the soil for 50 per cent of the value of the land, at 5 per cent interest, no loan to exceed the sum of $10,000, or for a longer time than 36 years, said loans to become due in case the land is sold by the mortgagor.

The first criticism of this bill is the complicated machinery for putting same into effect.

1. The appointment of a Federal farm-loan board of five members, with a staff of assistants and clerks.
2. The appointment of a registrar.
3. The creation of 12 Federal land banks, with directors, attorneys, appraisers, stockholders, and a corps of employees.
4. The creation of national farm-loan associations of two kinds.
5. The organization of joint-stock land banks.

It is difficult to determine just how many persons will be required to start the system, but that it will require the services, in whole or in part, of a great number is clear. This will require the expenditure of a large sum of money, and after the system is started the expense of operation will be large.

The second objection is that the system is founded upon the idea of profit. The Federal land bank and the joint-stock land bank are to have paid-up capital stock. This stock is to be subscribed by persons, firms, corporations, by the United States, and by national farm-loan associations. The stock of any one or all of these banks might be held by capitalists. Every subscriber, except the national farm-loan associations, will purchase such stock as an investment, and the incentive to every investment is profit.

If the object of this legislation is to provide funds which are to be loaned to farmers at the lowest rates of interest, then, why should it be founded upon the idea of profit? While we do not think it would happen, however, it is possible that the stock of these banks might be controlled by a very few persons.

There is no good reason why our Government should build up a system of dividend-paying financial institutions in order to supply money to the agricultural interests of the country. If the primary object is the issuing of bonds secured by farm mortgages, then the bank idea should be eliminated.

Now, if banks are necessary in conducting this business, why should the number be limited to 12? It would seem that certain financial centers of the country are to be favored once more, as in the case of the Federal reserve banks.

Any view of this measure looks toward the exploitation of the borrower in the interest of the investor. The bill does not seek to give the borrower the lowest rate obtainable. If money can be obtained on 4 per cent bonds, then it should be loaned to the borrower at 4 per cent plus the expense of handling the business and a slight charge to cover possible losses or depreciation in values. The bill contemplates loaning the money, raised by the sale of 4 per cent bonds, to the borrower at 5 per cent interest. This will give the bank making the loan a profit of 1 per cent, less expenses. The loans are to run from 5 to 36 years, which means that 5 per cent to 36 per cent of the loan will go to the bank making the loan during the period of time.

There is no provision made for distribution of surplus in case the bonds should sell at a premium, which is very probable. Under the bill such premium would be the property of the bank issuing the bonds and could be paid out in dividends.

The farm-mortgage indebtedness of the United States is more than seven and one-half billions of dollars. If this legislation is to be of any benefit to the farmer he must have the privilege of refunding his outstanding mortgage indebtedness, should he desire to do so, and he will desire to do so where he is now paying more than 5 per cent interest. That being the case, it is fair to assume that seven billions of the present mortgage indebtedness will be rewritten within a year after the bill becomes a law, if the money is available. It is very doubtful whether so much money can be raised by the sale of 4 per cent bonds, but that is a fair estimate of the amount which will be required to meet the demand. The profit to the banks on that amount would be $7,000,000 annually. Assuming that there will be 36 banks, with a combined capital of twenty-four millions, and assuming that the business can be handled for one-half of 1 per cent, which is about the cost at the present time, these banks could set aside 12 per cent on their capitalization the first year. If the new business amounts to one billion a year, which is a fair assumption, at the end of five years these banks would be making over 35 per cent. This is manifestly unfair to the borrower, when the paramount purpose of this bill is to furnish money at a low rate. The Government of the United States, which is conducted for the benefit of all the people, should not lend aid to the creation of any financial institution or system which will grow fat on the earnings of the people as a whole. A proposition very similar to this caused trouble in 1836.

As has been said, half of the real estate loans made to-day are successfully made without the assistance of a bank, except to cash the checks. Surely, then, a system can be devised whereby bonds secured by real estate mortgages can be placed on the market and the proceeds loaned without the establishment of dividend-paying financial institutions, where the profits go not to the borrowers but to private investors.

This is the age of cooperation. The producer is learning that the secret of success is to cooperate with those similarly engaged. The most successful cooperative organizations are those where the profits of the business are distributed among the patrons according to the patronage of each. The profits under this bill should be distributed to the borrowers according to the amount of money loaned.

The bill, then, should provide for the issue and sale of bonds, without the aid of joint-stock companies, by associations composed of borrowers, and the profits should be distributed among the members.

There are other objections to the bill, but as these are the leading ones, I shall omit the others. Trusting that this may be of some benefit to you, and assuring you that I shall be pleased to furnish what information I may have at any time, I am,

Yours, truly, CHESTER A. LEINBACH.

Mr. CURTIS. Mr. President, it is not my intention to comment upon this letter nor to detain the Senate very long in a discussion of this measure. Upon two different occasions I have pointed out objections to the measure. One is that I think it provides for too many offices. In fact, I doubt if anyone now knows how many it will require. The reserve bank system now employs, with only 12 banks, 593 persons, and I judge that this measure will require many more than that number.

I believe it is top-heavy, and I doubt very much if there are many farmers in the State of Kansas who will take advantage of the provisions of the act. I doubt if it will be of any benefit to them.

I doubt if you will get 10 or more farmers in Kansas or in other parts of the country to organize and become responsible for each other's mortgages and the obligations of the association provided for in the act. I doubt that very much. But, in my judgment, if the bill does them no good, it will do them no harm. There may be some sections of the country where the bill will do some good, and because I believe it is a step in the right direction it is my intention to vote for the bill upon its final passage. In the meantime, I shall vote for the substitute offered by the Senator from North Dakota [Mr. GRONNA].

I may say in this connection that I have received several letters from farmer organizations, or, rather, from heads of organizations, who have studied these measures very carefully, and every one who expressed a preference, expressed a preference for the Gronna bill with the exception, I think, of one or two, who favored the House bill, which I think is known as the Morgan bill.

I do not believe we are justified in building up a great organization here and providing for 12 banks in different sections of the country, with a corps of officers of all kinds to be paid large salaries. I believe if we want to help the farmers we should provide for an organization or an association and have the loans made in the simplest way and with just as little expense as possible. As was said by the writer of the letter which was read, these associations should not be organized for profit. If we are going to help the farmers, we ought to help them by making the loans through associations which will not be so expensive as to be burdensome.

Mr. GRONNA. Mr. President——

Mr. CURTIS. I yield to the Senator from North Dakota.

Mr. GRONNA. I do not know whether I misunderstood the letter when it was read, but I understood the writer to say that the rates to the farmers are going to be 5 per cent and that the rates on the bonds would be 4 per cent. I wish to say to the Senator from Kansas that the pending bill—the Hollis bill—provides for a maximum of 5 per cent on bonds and 1 per cent more to the farmer, which, of course, would be 6 per cent.

Mr. CURTIS. I understand that, and in that regard, of course, the writer was mistaken. I wished to say this much before the final vote is taken. I shall vote for the measure not because I believe it is going to do our farmers in Kansas any good in its present shape, but it can do them no harm, and it may do good elsewhere, and in the course of time defects may be discovered in the measure and a future Congress can and will remedy those defects.

Mr. CLAPP. Mr. President, at the proper time I shall offer, in behalf of the senior Senator from North Dakota [Mr. McCUMBER], a substitute. He is necessarily absent from the Senate. I may say in passing that it will be a pleasure to offer this substitute. If we are unable to substitute either this or the so-called Gronna substitute, I shall vote for the pending bill, although I regret some of its features. It does seem to me that every time we undertake a movement of this kind instead of starting back to the party who is to be benefited we start with a great top-heavy organization here in the city of Washington.

I shall not take the time of the Senate at this late hour to discuss the merit of farm credits. I believe that we are coming to recognize in this country that farm credits require a different system of handling than do commercial credits.

Nor am I at all deterred in supporting either of these measures by the charge that they are along the line of paternalism or constitute class legislation. Nearly all our legislation in the first instance benefits some particular class. We justify such legislation upon the broad ground that in the last analysis the entire public receives the benefit of it. Those who have received directly and at first hand the benefits of such legislation along former lines may as well recognize at one time as another that you can not pass legislation where the direct benefit is first hand to a particular class without sooner or later meeting the proposition that such legislation will be advanced all along the line of our activities.

The pending bill is at least a recognition that farm credits do require a different system of handling than ordinary commercial credits. I have received some requests to vote against the pending bill, but I shall vote for it upon the principle that it is the recognition that farm credits do require a different system of handling, and if we can once get that principle enacted into legislation I have no doubt that whatever imperfections or disappointments may be disclosed in connection with the pending bill will be later corrected.

I will not go over the McCumber substitute. He has twice discussed it at length in the Senate. It is simply a plain proposition to take the agencies that are already in existence all over the country and, instead of establishing additional agencies in every town and village, to use the agencies that are already there and through those agencies make the loans at a rate of 4½ per cent, the Government taking the mortgages and issuing debentures upon them at the rate of 4 per cent. Under this plan there is no question of taxation. The mortgages will belong to the Government and the debentures will be issued by the Government, and naturally, of course, both mortgages and debentures would be free from any taxation.

The plan is a plain one, a simple one, and I believe it is a workable plan. Instead of starting in with a great top-heavy organization, as the pending bill does, it utilizes those organizations and those instrumentalities which are already in operation.

As soon as the pending substitute of the junior Senator from North Dakota [Mr. GRONNA] is disposed of I shall offer the substitute proposed by the senior Senator from North Dakota [Mr. McCUMBER].

Mr. JONES. Mr. President, I wish to offer an amendment in the nature of a proviso at the close of paragraph 7, on page 32, of the bill.

The VICE PRESIDENT. It will be stated.

Mr. HOLLIS. Mr. President, a point of order. I think the Senator from North Dakota [Mr. GRONNA] has already an amendment pending.

The VICE PRESIDENT. The original text can be perfected before the question is put on the substitute. The amendment proposed by the Senator from Washington will be stated.

The SECRETARY. On page 32, line 13, after the word "appraisal" and before the period, insert a colon and the following proviso:

*Provided*, That whenever a loan is desired for improving land in such a manner as to enhance the value of the land itself as distinguished from increase in value due to the erection of buildings or other similar improvements, and delivery of money to be loaned is not desired until the completion of such improvement, and the application so states and fully describes the proposed improvement, the appraisal shall state the value which such land will have when so improved, and the loan may equal one-half of such valuation, but the loan so made shall not be forwarded by the land bank for delivery until the loan committee appraising such land reports to it that such improvement has been made and that the value of the land as so improved equals the appraised valuation, and if such report be not received within six months after the date of making the loan and notice thereof to the applicant, or such further time as the land bank in its discretion may allow, such loan shall be canceled and the mortgage given to secure it shall be satisfied on payment of the accrued interest. An applicant may apply for a loan to improve land, the loan to be delivered on the completion of the proposed improvement, and at the same time make a separate application on other land for a loan to be delivered immediately.

Mr. JONES. Mr. President, this amendment was suggested by one of my constituents. It takes into consideration a particular situation which he has in mind, but the amendment applies to another situation that is especially applicable to the West.

In the irrigated sections the lands that are to be irrigated are in such a condition that, before they can be put into crop, they require the expenditure of a considerable sum of money to get them levelled, to get the ditches built, and to get them in proper shape. This cost ranges from ten to fifteen, twenty-five, thirty-five dollars, or more, an acre. The particular situation that this gentleman has in mind is where lands have been logged off. It costs a great deal then to get the land clear of stumps, so that it may be cultivated. This amendment, therefore, is intended to cover a situation like the one described; and, in my judgment, it is very important, not only to all the logged-off sections, but to practically every irrigated section throughout the West.

As I understand, under the bill the appraisement is made, if the land is not actually under cultivation, upon the basis of the condition of the land when the application is submitted. Wherever the land is improved by leveling and getting it in proper shape under irrigation projects for the planting of crops, it is worth just the amount, at least, that has been expended to get it in shape more than it is in the raw state. As I say, that cost runs from ten, fifteen, twenty, twenty-five, thirty, or forty dollars an acre. So, with reference to the land that has been cut for the timber, that land is increased in value by clearing away the stumps, practically what it costs to clear the stumps away; and that may be as high as $100 an acre, if the man has to clear it himself, a small tract at a time; but, if it is possible for a man who owns, say 40 acres of this logged-off land, to let a contract, by which a person who is accustomed to do this work can take the whole 40-acre tract, he can get it done for probably $25 an acre.

The purpose of this amendment is to give the man who wants to get a loan, the benefit of the value of the land that has been thus improved and put into shape for cultivation. Under the amendment the money will not be advanced until the improvement is actually made and completed. So if the land is

not cleared of stumps or leveled or put in shape, the loan is not made.

I think that is a very important provision and a very wise one. I think it would accomplish a great deal of good. I doubt myself if any particular use of this bill will be made in my State unless something of this kind is put into it. Unless that be done, I doubt if very much use of it will be made in the different irrigated sections of the country where this rural-credit legislation is really needed by the men who are trying to make homes in that desert country.

So, I hope, Mr. President, that the chairman of the committee will not make an objection to this amendment.

Mr. HOLLIS. Mr. President, the purpose of this bill is to enable farmers to borrow money on land as it exists. The proposed amendment is to permit the land bank to make a contract that it will loan a certain amount of money as the land may exist at some future time. I do not think that will do any particular harm, but we must depend for the money that we are to loan farmers on the money that we can borrow from the investors in farm-loan bonds; and I fear that those investors would look with apprehension on any plan that bound a land bank to loan a certain amount of money on a tract of land as it might exist at some future time.

Mr. JONES. Mr. President, I want to call the Senator's attention to the fact that the loan will not actually be made until the land has been put in the condition contemplated, so that it is in practical effect the same as if the loan were made upon the land in its improved condition.

Mr. HOLLIS. It seems to me that every practicable end will be reached under the bill as it is. It is perfectly easy to go to a land bank, just as a man goes to the savings bank now, to see if he can borrow a certain amount of money if he buys a certain farm. If the land bank thinks that the land under consideration is going to be worth that amount of money when the work has been done, it will undoubtedly give him assurance; but I do not, however, think this matter is very important. I do not feel that I ought to accept the amendment; but my feelings will not be injured if the Senate should adopt it.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Washington [Mr. JONES]. [Putting the question.] The "noes" seem to have it.

Mr. JONES. I ask for a division, Mr. President.

The VICE PRESIDENT. All in favor of the amendment will rise and stand until they are counted. [A pause.] Those opposed will rise. [A pause.] The amendment is rejected.

Mr. SMOOT. Mr. President, I have here a letter from the Secretary of the National Civil Service Reform League, of New York. It is in relation to the amendment which was offered by the Senator from Nebraska [Mr. NORRIS] proposing to strike out the part of section 3 beginning on line 21, page 5. It is the provision that all attorneys, experts, assistants, clerks, laborers, and other employees, and all registrars and appraisers of the Federal farm-loan board shall be appointed without complying with the requirements of the civil-service law. I shall not take the time to read the letter, but I ask that it be printed in the RECORD, without reading.

The VICE PRESIDENT. It is so ordered in the absence of objection. The Chair hears none.

The letter referred to is as follows:

NATIONAL CIVIL SERVICE REFORM LEAGUE,
*New York, May 3, 1916.*

Hon. REED SMOOT,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR SMOOT: On behalf of the National Civil Service Reform League I earnestly urge that section 3 (page 5, lines 21 and following) of the pending rural-credits bill (S. 2986, Calendar No. 135) be eliminated.

This is the section which provides that all "attorneys, experts, assistants, clerks, laborers, and other employees, and all registrars and appraisers" of the Federal farm-loan board shall be appointed without complying with the requirements of the civil-service law.

The bill specifically provides that these subordinate places are all to be treated, initially at least, as unclassified offices. The effect is only to subject the administration of the new act to the most serious menace possible, namely, the influences of partisan politics in the entire organization of the subordinates of the board. It will be impossible to keep these influences out if the places are in the unclassified service. Everyone knows this to be true. The adoption of the amendment, in other words, will expose the new rural-credits system of the country to the corrupting and extravagant influences of the spoils system. Nothing could be more surely fatal to the success of the new system than this result. On its merits and aside from its character as a rider it is neither necessary nor in the slightest degree excusable. No more serious menace to the new rural-credits system, for example, could be imagined than that its administration be tainted with politics, and no surer way could be found to make that menace real than by opening the entire subordinate force to partisan appointments, as the rider in the rural-credits bill does.

For the great majority, if not in fact for all, of the places not the slightest difficulty will be encountered in securing efficient men of practical experience without political ties and obligations through examinations conducted by the Civil Service Commission with the aid of the experts which it can employ. If any exceptions are necessary, it would be within the President's power to make such exceptions by Executive order under the civil-service law. This power to classify offices or put them in the unclassified service should be left to the President, as has been the practice under the civil-service law for 30 years.

In explaining the presence of this outrageous spoils item in the bill, Senator HOLLIS referred to the exemption of the employees of the Federal Reserve Board. It is true that these employees were exempted by act of Congress without just cause. The best answer in favor of the elimination of such spoils provisions is the statement of Senator HOLLIS that the Federal Reserve Board is using the machinery of the Civil Service Commission to secure a great many of its employees. The Federal Reserve Board needed the protection of the civil-service law against the pressure of spoilsmen.

It is further contended by the advocates of the rider that competitive examinations would mean a delay for years in the organization of the new rural-credits system. Such a statement is not supported by the facts, inasmuch as the Civil Service Commission is holding examinations to secure highly technical eligibles for many of the great departments. The staff for the railway valuation work in the Interstate Commerce Commission were all obtained as the result of competitive examinations conducted by the Civil Service Commission. Such an explanation on the part of the Senator in charge of the bill can not possibly support the exemption of every single employee of the Federal farm-loan board including "clerks, laborers, and other employees."

For these reasons, the league, therefore, urges that if an opportunity is given you register your opposition to this dangerous provision and vote against its adoption by the Senate.

Very truly, yours,

GEORGE T. KEYES, *Secretary.*

Mr. STERLING. Mr. President, I should like to ask the Senator from New Hampshire if there has been any change in the first paragraph of section 17 of the bill?

Mr. HOLLIS. I will say, in reply to the Senator, that I find the only change has been to strike out the word "some," in line 12 of that section.

Mr. STERLING. I should like to call the attention of the Senator to the peculiar language of that paragraph of the section. It reads as follows:

SEC. 17. That whenever, after this act shall have been in effect one year, it shall appear to the Federal farm-loan board that national farm-loan associations have not been formed, and are not likely to be formed, in any locality, because of peculiar local conditions, said board may, in its discretion, authorize Federal land banks to make loans on farm lands through agents approved by said board.

I call the Senator's attention to the words "after this act shall have been in effect one year." Of course the effect of that would be to prevent any would-be borrower from securing a loan from a Federal land bank during that year unless there was formed a national farm-loan association.

Mr. HOLLIS. That is exactly the purpose of the language; that is precisely the intention.

Mr. STERLING. Well, does the Senator think that is a wholesome and wise provision?

Mr. HOLLIS. Certainly; otherwise they would not organize and we should not secure the cooperative features requiring the assistance of the farmers to the farm-loan association. They would all do it through land banks, and we should miss the important features of the bill which we had in mind when we chartered them.

Mr. STERLING. There may be peculiar conditions in a given locality which will prevent the organization during the first year. You ought to provide every man where there is no farm-loan association the opportunity to apply for a loan during that time.

Mr. HOLLIS. Yes; that is it. We shall have one year to find out.

Mr. STERLING. I move to strike out the words "after this act shall have been in effect one year."

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from South Dakota.

The amendment was rejected.

Mr. THOMPSON. Mr. President, I desire to offer a slight amendment in line 3 on page 30, which I think the Senator from New Hampshire will be glad to accept. I have received a large number of letters from farmers and others interested in the passage of this bill, who feel that they should have the right, or at least the option, to make payments annually as well as semiannually. I move as an amendment, after the word "semiannual," in line 3, on page 30, to insert the words "or annual." I think the Senator from New Hampshire will accept that amendment.

Mr. SMOOT. If that is what the Senator desires to reach, why not strike out the word "semiannual" and insert the word "annual"?

Mr. THOMPSON. I think it is proper to give the option of paying either semiannually or annually; that is all.

Mr. HOLLIS. I do not think the purpose will be clearly expressed unless both "semiannual" and "annual" are inserted. That will give the option. In some parts of the country the payments could be made semiannually and in other parts they could be made annually. So far as I am concerned, I am willing to accept the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Kansas.

The amendment was agreed to.

Mr. JONES. Mr. President, I have a letter from the commissioner of the Washington State Grange, representing the department of rural credits and national marketing, with reference to this bill, in which he points out some features to which those for whom he speaks are very much opposed, stating that they do not think it will bring very much relief, but that he has been advised by different Representatives that the committee bill is the only one that stands any chance of passage. Taking that view of it in this letter, he urges that the bill be amended in certain particulars. One is to strike out all of sections 7, 8, 9, 10, and 11 and insert in lieu section 12 of what he calls the Morgan bill. As I understand the amendment of the Senator from South Dakota [Mr. STERLING], it does that, and so I shall not offer that amendment. Furthermore, I am satisfied that it would be useless to offer the amendment anyhow, because I can see that the Senator from New Hampshire could not very well accept it, and, with his opposition, it would stand no chance of passage.

I want to call the attention of the Senator from New Hampshire also to another suggestion or two which this gentleman makes, and ask the Senator whether or not the committee has considered these propositions. He suggests that paragraph 3 of section 12 be stricken out, and that there be inserted the words "Every such mortgage shall run for a period of at least 5 years and not exceeding 60 years."

Mr. HOLLIS. I am perfectly willing to accept that.

Mr. JONES. If the Senator is willing to accept it, I offer the amendment, namely, in section 12, to strike out paragraph 3 and insert——

Mr. HOLLIS. It will be sufficient to strike out the word "thirty-six," in line 8, and insert "sixty."

Mr. JONES. Very well; that will cover it, and I offer that amendment.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 30, line 8, it is proposed to strike out "thirty-six" and insert "sixty."

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. JONES. The gentleman referred to also suggests in section 12, that paragraph 5 be stricken out, and that there be inserted in lieu the following. I will read it to the Senator and ask what he things of it:

The rate of interest charged for such loans shall not exceed 5 per cent per annum, of which one-half of 1 per cent shall apply as amortization payment, and one-half of 1 per cent shall be used for administration expense.

Mr. HOLLIS. Mr. President, I can not accept that amendment. The section has already been amended by inserting the following:

No loan or mortgage shall be made under this act at a rate of interest exceeding 6 per cent per annum, exclusive of amortization payments.

If we can not place our farm-loan bonds at 5 per cent, then we can not loan to anybody; but we can do a great deal of good if we can loan in some sections as high as 6 per cent. I am afraid the amendment the Senator has suggested would defeat the object of the bill.

Mr. JONES. The Senator knows much more about that than I do, and I am not going to urge it further, but I desired to offer the suggestion.

I have one further amendment that I should like to see adopted. I know it is late; but I have been hoping to get to present it during the day, but, on account of the continuance of general debate, I have been unable to do so. I desire to offer now an amendment as a new section to the bill.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to add a new section to read as follows:

SEC. —. That the Federal farm-loan board provided for herein be, and it is hereby, authorized and directed, in connection with the loaning system provided for in this act, to organize and put in operation a loaning system under and through which loans of not exceeding $5,000 may be made to any one person at not to exceed 4 per cent interest per annum and for a period of time not to exceed 20 years. Such loans shall be made only for the purpose of acquiring farm lands or city property and improving the same for residence purposes, or for improving residence property, and shall be made to such honest, industrious, temperate, economical persons as, in the judgment of said board, with the property so purchased or improved as security, will reasonably insure the repayment of such loan with interest within the time fixed. The terms of payment shall be arranged as the board may deem wise, and be such as will repay the loan with interest by the time set for the maturity of the same.

The said Federal farm-loan board is hereby authorized to make all rules and regulations necessary to carry out the foregoing provisions and not inconsistent with the provisions of this act.

For the purpose of instituting and carrying on operations under this section the sum of $5,000,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to continue available until used, and to be supplemented by such appropriations as Congress may from time to time make upon estimates to be submitted by said board. All repayments of loans made hereunder and all income from such loans shall constitute a loaning fund hereunder. All the provisions of this act which are applicable to the purposes of this section and not inconsistent with its provisions shall apply to the same.

Mr. JONES. Mr. President, I am not going to take the time to express my views with reference to the pending measure, further than I have already expressed them and as they have been expressed by several of the Senators who have spoken with reference to it. I am going to vote for it, in the hope that it will accomplish some good, and that it will at least inaugurate a system that can be worked out in the end to bring relief to those whom we are trying to relieve and as the best that it is possible to get now.

Rural-credit legislation has been promised in all of the political platforms, so that it is not a partisan question at all. I fear that this measure will not meet the public sentiment that led to those platform declarations. Money will not be secured as easily or as cheaply as those who have urged rural-credit legislation had hoped for nor by those who expect relief by it.

The amendment which I have proposed is in substance a bill which I introduced at the last session of Congress. When I introduced it I made a brief statement with reference to the purpose of it. At that time a very prominent Senator on the floor seemed to regard it in rather a light way, and made some rather caustic suggestions with reference to it. He seemed to think that there was nothing at all in it except paternalism and socialism, and said with reference to it:

I really think the Senator ought to amend his bill, however. There are a great many young men and young women who would like to go into the mercantile business. They have not the means to buy stock, and present prices for money and interest are too heavy a burden for them. They will have to have their experience, and they need a little Government assistance. There are a great many people who want to go into the fruit business, others into the dairy business, and I might mention half a thousand businesses which people would like to go into, but they really have not the means to start in the business. It will be experimental with them, and they do not want to take the chance of the experimenation. They want the Government to take the chance and give them an opportunity to develop the "individualism" of which the Senator speaks.

Mr. President, we have been trying this same proposition with the American Indian. We have had it in operation for the last 50 years. We furnish them plows, we furnish them farms, we try to start them in business, and every year we have to furnish the same thing over and over again. We have been trying to develop individualism in the Indian to take care of himself, and just so long as we will do that he will allow the Government to take care of him; and almost any individual, be he white or black or yellow, will do substantially the same thing.

Inasmuch as the Senator is seeking to apply our policy with reference to the American Indian to our farmers and people generally, it seems to me this bill ought to be referred to the Committee on Indian Affairs.

Mr. President, I bided my time; I felt the Senator would see the light; I was sure he would join the ranks of those who really want to help those who really need help. He has done so. I am glad to say that this Senator has proposed as a substitute for the pending measure practically the measure I then introduced—at least, a measure under which money will be taken directly from the Treasury of the United States and loaned, not to school-teachers, not to merchants, not to these thousand and one other businesses, but to the farmers. So, I am glad to have my bill now receive the indorsement of this able Senator—not only the indorsement by actually adopting the principle of it but by introducing it here in all seriousness without even having it referred to the Indian Affairs Committee and pressing it with far greater ability than I.

Mr. President, what I propose is to furnish money directly to those who need it without the intervention of an expensive and complex agency upon security that will be just as ample, in my judgment, as what you have under this bill. Under this amendment we provide for the loaning of money at not exceeding 4 per cent interest. The interest rate is fixed. There will not be any question like that raised by the Senator from Iowa [Mr. CUMMINS] with reference to the rate of interest, and the borrower getting the benefit of a low rate. It is to be not exceeding 4 per cent. It must be paid off in 20 years, and so arranged over that period as to meet the interest and make sufficient payments to cancel the obligation at the end of 20 years. The security which the Government will have will be the property that is purchased, and all of the money that is loaned must be used in the purchase of property—farm property or city property—and back of that you have the industry and character of the individual.

Some suggest, "How do you determine the character of these men?" Why, it will be determined by the agencies provided in this bill for passing upon loans. Every loaning association that will be organized under this bill can pass with reasonable cer-

tainty upon the character of any man that may apply for a loan, and the probabilities of his repaying that loan. They will know whether he is reliable or not.

I know and you know in your communities of men to whom, if you had money to loan, you would be perfectly satisfied to loan that money if you could direct what they should purchase with it; and with your knowledge of their character and industry and economy and what they can do, you would count that as a better security than to take farm lands at 50 per cent of their value. Of course the man is apt to die within a day or two after he gets the loan; that is true, but suppose he does. The Government has everything that was purchased with that money. Nothing is lost if proper supervision was exercised in the purchase. Each year that passes the principal is lessened and the amount of security increases. There might be some loss on a particular loan, but on the whole the Government would be amply secured. The sole purpose of this amendment is to get the money to people that need it, with ample security to the Government.

I know of renters in the different States of this country who are not only supporting themselves, but supporting somebody else—not only supporting their own family, but supporting some other family—off 40 or 80 or 160 acres that they have rented. In many of the sections of the Middle West a man who rents a farm gives half his crop to the landlord, and if he takes the risk and pays cash rent, he pays $5, $6, or $7 an acre cash rent. If he gets a crop he is able to pay that and get something himself. If he gets no crop he has to pay the $5, $6, $7, or $8 an acre, if it can be gotten out of him; and in many cases men have had to turn over to the landlord, in effect, every dollar in value of the crops that they have raised on their lands leased in order to discharge their rent. The landlord takes no chances. He gets his return without effort on his part, while the renter may get nothing for his labor and his family suffer from want. These men are honest; they are industrious and frugal; but it is almost impossible for a man to support his own family and some other family at the same time off of farm lands. If the Government is to help anyone these are the men to be assisted. If these men had an opportunity to get money to buy a farm, so that whenever they worked upon it the whole profit of their labor was their own and what they did not have to use for the support of their family they could use for paying the purchase price of land, we would find a great many people who are renters in this country who in a very few years would own their own farms.

So it is with laboring men in the cities. They would soon be able to own their homes. There are building and loan associations, I know, organized and doing a great deal of good. That is true. I think much greater use could be made of them than is made of them. But as we are starting upon a proposition to take the money of the United States to help some of the people of this country, I should like to see some of it used for the men who really need help.

I am not so much interested in helping the man who has a quarter-section of land or a section of land already. I am not interested in his ability to borrow five, ten, or fifteen thousand dollars upon that in order to make more or buy out his poor neighbor so much as I am interested in enabling the poor fellow who has not any land, who has not any home, to get a home. That is what I should like to do something toward accomplishing, if we could.

Mr. SUTHERLAND. Mr. President, does the Senator's amendment contemplate that money shall be loaned at 4 per cent per annum to the full purchase price of the property, and that that is the only security which shall be taken for the loan?

Mr. JONES. That and the character of the man. It contemplates that if a man wants to buy 80 acres of land, which he can get for $5,000, he will come here to the agency provided in this bill and make his showing to them. Then if they approve it and say: "This land is worth $5,000; he is getting it at a reasonable rate; he is the right kind of a man; his industry and character and economy and frugality and all that sort of thing commend him to us, and we recommend that he shall have the $5,000 to buy that 80 acres," that is what the amendment proposes to do.

Mr. SUTHERLAND. How much money does the Senator think the Government of the United States would have to invest in this enterprise to satisfy all the people in the United States who would be willing to acquire farms and city homes upon those terms?

Mr. JONES. Mr. President, we can not go beyond the amount provided in the bill—$5,000,000.

Mr. SUTHERLAND. The Senator proposes to appropriate $5,000,000?

Mr. JONES. Yes.

Mr. SUTHERLAND. And then says that other appropriations shall be made as from time to time may be found to be necessary?

Mr. JONES. Yes.

Mr. SMITH of Michigan. "First come, first served."

Mr. SUTHERLAND. I think the Senator will agree with me that the $5,000,000 would not last very long.

Mr. JONES. Well, I do not know how long it would last; but it certainly would do some good while it did last. Here we put up, for these banks, $6,000,000. How much good is that going to do? How much real, substantial good to the men that need help will the Government money do that you put up under this bill?

Mr. SUTHERLAND. I think probably that $5,000,000 would not get beyond the Members of this Senate, who would be very glad to borrow money upon those terms, pay 4 per cent, and simply use the lands that they had bought as security, and speculate themselves upon the increased valuation of the lands.

Mr. JONES. Oh, no; there would not be any speculation under this. This is to be acquired for a home, and the people of a community know whether a man is acquiring land for a home or not. Of course, if the Senator from Utah went off into the State of Washington and wanted to buy something there, he might not get a report from the loan association at that place under which he would get the money. But if he was right in his home place, where they knew that he was not going to be a candidate for the Senate or for the Presidency or for the Supreme Bench—for all of which he is well qualified—if they knew that he was going to settle down there and stay at home and live among them as one of them, they would probably not hesitate to recommend him for a loan to enable him at the end of his term, when he goes out without anything, to have $5,000 to acquire a home for his declining years. That home, with his ability and industry, would make the loan gilt-edged.

Mr. SUTHERLAND. If the Senator's amendment is adopted, I am quite sure that the Senator and myself will both write out an application for a loan very quickly after his amendment goes into the bill.

Mr. JONES. Mr. President, I will not speak for the Senator from Utah; but I do not think I would apply for the loan, because I will frankly say that I like the work in the Senate. I have seen the time, however, when I was glad to apply for a loan on substantially those terms, and I am glad to say that I got it. I am glad that I could even get a loan without any landed security, and that the man who loaned it never lost a cent, and that he did not hesitate about letting it go. It was suggested to me a moment ago that one of the greatest financiers of this country loaned a large sum of money to some individual without any security except his word; but he knew what was back of the man. He knew what was back of his word. He knew whether or not he was likely to get his money back, and he knew it much better than if somebody that he did not know had come to him with a lot of land security or other kind of security. He knew that honesty, good judgment, and industry are the best kinds of security. They never depreciate.

Mr. President, I will not say that I do not hope this amendment will be adopted; possibly it will not be; and yet the fundamental principle of this amendment—Government aid to private parties—is the fundamental principle of the pending bill, and in the several substitutes that are offered for this bill. The only difference is in the application of the principle. Adopt the principle and its application is only a matter of degree and judgment. Adopt this bill and the time will come when you will adopt my amendment and the Congress of the United States will make it a little bit easier and make it possible for men who really need help, for men who have but very little security except their character to get some help and some relief. You may laugh at this amendment, but you will vote for the principle of it in this bill.

I should like to see some encouragement given to the forming of organizations in this country similar to those abroad, under which men are able to get credit largely upon their character, with security from the neighbors who know them and who know that they can be depended upon. That is the correct system, but we are not yet ready for it here. Possibly we will work out something along those lines by and by, rather than something like this; but there is not anything of that sort in this bill.

Mr. President, I have taken more time than I intended to take. I would not have taken so much except for the interruptions, and for the very great interest I see manifested in the amendment I have proposed; and I shall submit it to the Senate without further argument.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Washington.

Mr. JONES. I ask for the yeas and nays.

The yeas and nays were not ordered.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. CUMMINS. Mr. President, to perfect the bill, I offer the amendment, which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to add to section 29 the following proviso:

*Provided*, That if the farm-loan board finds and certifies as a fact that the foregoing exemption from taxation does not operate to reduce the rate of interest to the borrowers by substantially the rate of taxation from which the aforesaid property is exempted, then this section shall cease to have any force and effect.

Mr. CUMMINS. Mr. President, just a moment with regard to the amendment. I had hoped that the Senator from New Hampshire would at once accept it.

Mr. HOLLIS. I thought the Senator was sure that this exemption from taxation would not be effective. If so, there is no point to his amendment.

Mr. CUMMINS. I do not believe the Congress has any authority to pass section 29. My mind has not been changed upon that subject by the very learned arguments from the other side, to which I have listened with great interest. But the Senator from New Hampshire [Mr. HOLLIS] and the Senator from Montana [Mr. WALSH] believe that Congress has the power to make the exemptions specified in section 29. They have asserted—at least, the Senator from New Hampshire has asserted many times—that the purpose of the exemption is to make it possible for the farmer to borrow money from the land banks at a rate of interest lower than he would be able to borrow the money for if the property were subject to taxation.

This amendment takes the Senator from New Hampshire at his word; and if the effect of the exemption is to benefit the farmer, section 29 will continue in effect. If, however, it shall turn out—as I fear it will turn out—that the exemption from taxation benefits only men or institutions of great capital, and if the farmer is still compelled to pay the rate of interest which he would be required to pay if there were no exemption, then it is a plain, palpable conclusion that we ought not to exempt the property of these moneyed men from taxation.

I believe the amendment I have offered is entirely within our competency. It has been held more than once, I think, that an administrative body may be given the authority to ascertain a fact upon the existence of which the continuance of the operation of a law shall depend. If the farm-loan board is as faithful as I am sure it will be in conserving the interests of the farmers, there ought to be no apprehension of any unwise or unfounded ascertainment of the fact which I have pointed out.

I should like to know from any Senator, whether on this side or the other side of the Chamber, why the proposal should be opposed if it turns out that the borrower does not receive the benefit of the exemption which is said to be made in the section.

I hope the Senator from New Hampshire will not think that I have offered the amendment lightly. I am sincerely in favor of it. I asked the Senator from Georgia, it will be remembered, when he was speaking whether he could make any suggestion that would render it certain that the farmers shall receive the benefit of the exemption. He had no suggestion, except the general operation of unwritten financial or commercial usages. I have since that time put my mind upon it, and this is the result of my efforts to find a way in which we will make it reasonably sure, anyhow, that the intended beneficiary of this exemption shall, in fact, receive what it is intended he should have.

Mr. POMERENE. Mr. President——

Mr. CUMMINS. I yield to the Senator from Ohio.

Mr. POMERENE. If the Senator will permit me, the other day some reference was made to our constitution in the State of Ohio, and, if I may repeat very briefly, I think we have an object lesson in that State. The constitution of the State of Ohio adopted in 1851 provided that all property, real, personal, and intangible, including credits, bonds, and mortgages, should be taxed according to its true value in money and according to a uniform rule. That has remained the provision in our constitution except for a period of perhaps three or four years, during which time the constitution had been amended and the amendment remained in force. Under the amendment township bonds, county bonds, municipal bonds were exempted from taxation. Prior to that time all public funds of this character were sold and usually held by the savings banks in the New England States. During the time they were exempt from taxation most of them were bought and held in the State of Ohio by farmers and other small owners. While they could thus be held the bonds sold in Ohio for either a less rate of interest or for a very much higher premium. I have no doubt that that would be the result if these bonds here are exempted from taxation. Later the constitution was again amended and these bonds were again made taxable, and since that time nearly all of them have been held outside of the State.

The Senator may say, if that be true it is no reason why this amendment should not be incorporated in the bill. My judgment is so firm that it will benefit the farmer that I see no need for placing it in the bill, and if it is placed in it will simply be a matter for contention later on. For that reason I for one would be opposed to the amendment.

Mr. CUMMINS. Mr. President, the question propounded by the Senator from Ohio is somewhat intricate. I, of course, shall not attempt to answer it as a question; but it is plain, is it not, that the case he suggests is not parallel to the case under consideration. There——

Mr. POMERENE. I do not agree with the Senator.

Mr. CUMMINS. Allow me to answer the question, if I can. There the State of Ohio or a municipality as the borrower deals directly with the loaner of the money. It is a matter of contract between the two without any intermediary. Under this bill the farmer does not deal directly with the person who ultimately advances the money and who will control the rate of interest. The land bank is the institution which deals with the farmer through the farm-loan association. Even if it were true that ordinarily exemption from taxation does tend to increase the value of a security, and I have no doubt about that, it would be absurd to doubt it, when the farm-loan bonds are offered for investment they will be in competition with similar securities that are subject to taxation. Those who invest in the farm-loan bonds want to secure the highest rate of interest possible under the circumstances. In my judgment, therefore, the fact that farm-loan bonds are exempt from taxation will not diminish the rate of interest upon them to the extent suggested by the Senator from Ohio as to State or municipal bonds. On the other hand, those who supply the money market for these securities will get all the interest they can, and if they believe that they can secure the higher rate of interest by insisting upon it then they will receive the benefit of the exemption and not the borrower.

Mr. HOLLIS. I ask for a vote on the pending amendment.

The VICE PRESIDENT. The question is on the amendment of the Senator from Iowa [Mr. CUMMINS].

The amendment was rejected.

Mr. STERLING. I offer the following amendment.

The SECRETARY. On page 33, at the end of line 5, add the following:

Nor shall any loan be for a less sum than $200.

Mr. STERLING. Mr. President, just a word with reference to this proposed amendment——

Mr. HOLLIS. I will accept the amendment.

The amendment was agreed to.

Mr. NORRIS. I offer the following substitute——

The VICE PRESIDENT. A substitute for the bill?

Mr. NORRIS. For the bill.

The VICE PRESIDENT. It is not in order. There is a substitute pending now.

Mr. NORRIS. What is the substitute pending?

The VICE PRESIDENT. The one offered by the Senator from South Dakota [Mr. STERLING].

Mr. GRONNA. Mr. President, I move to strike out on page 44, section 18. This is the section which provides for the joint-stock land banks. I do not believe that it should be in the bill. I discussed it quite fully this afternoon, and I shall not take any further time of the Senate, but simply ask to have a vote on it.

The VICE PRESIDENT. The question is on the amendment of the Senator from North Dakota.

Mr. NORRIS. Mr. President, briefly stated this bill provides for three kinds of securities. First we have the security of farm-loan associations that is based upon mortgages, where the liability of the individual members of the farm-loan association is unlimited. Then we have bonds issued by the farm-loan bank based upon mortgages from farm-loan associations in which their liability is limited. Then we have bonds issued by joint-stock banks which are organizations organized with private capital. It is the joint-stock land-bank provision that the Senator from North Dakota seeks to strike out of the bill by his amendment.

I realize that it is perhaps useless now at this stage to try to amend the bill, but I do believe that there ought to be only one kind of bonds issued under this law. I think if we permit the

bill to stand as it is now, with three separate and distinct kinds of bonds that are attempted to be floated under the provisions of the bill, we will have these different kinds of bonds coming into competition with each other, and the investing public will be induced by various means and in various ways to invest their money in one and against the other. The tendency of the private institutions who have organized joint-stock companies for private profit will be to try to induce the investing public to believe that the bonds of the joint-stock company are better as a matter of investment than the other bonds provided for in the bill.

I had intended to introduce an amendment similar to this, but it became apparent to me that it would be useless, although I am glad that the Senator from North Dakota has offered the amendment. It seems to me that it will strengthen this law. I do not believe there can be any doubt about it. More than that, there is no reason why, in my judgment, we should organize by Federal law a system by which we expect to furnish the farmer cheap money by a sort of mutual organization plan, and at the same time and in the same law put into it a provision that will put that very idea into competition with privately owned and privately managed institutions for the purpose of profit, which will certainly come in competition with the other methods provided for in the bill.

There is ample room now under the various State laws for private corporations and stock companies to organize and go into this business if they desire to, and I for one would not want to keep them out of the field; but Congress is trying to devise a plan here by which farmers can organize among themselves associations of borrowers for the purpose of combining their credit and getting money at as near cost as possible. Then we ought to confine our energies and our efforts, it seems to me, to that kind of a plan. As I understand it, this plan was put into the bill, as well as the two forms of farm associations, limited and unlimited, because there were certain people who advocated that we ought to pass a bill, and that the only bill we ought to pass is one that would provide for private individuals to organize for the purpose of profit organizations and corporations similar to the joint-stock provision. There were other people who said that under a certain system in Europe, where they had unlimited liability, they got cheaper money. They advocated that in these associations the liability of the farm membership should be unlimited, and thus we would have a combination of unlimited obligations that would reduce the rate of interest to the farmer and would make the bonds better and sell them at a lower figure, and give the farmer the benefit of it. There were others still who argued that the American farmer could not be induced to go into organizations where the liability of the individual member was unlimited, and that the American farmer, different from the European farmer, would not consent to become obligated for the debt of his neighbor; that he would not permit his farm to be put up as security for some other farmer's debt. Hence they advocated the system of limited liability.

Now, the committee having the bill in charge put all three of them in the measure, so that they would all be satisfied. I am going to vote for the bill whether this amendment is adopted or not, but if I had my way about it I would eliminate what the Senator from North Dakota undertakes to eliminate—the privately organized joint-stock companies—and I would likewise eliminate the unlimited liability associations by which one farmer becomes obligated for the debt of another in the same association, although I am not so particular about that. I do not believe in reality it is necessary to eliminate that, because according to my belief, if this bill goes into effect, there never will be an association organized anywhere in America where the farmers will go in under the unlimited plan. They will not consent to become liable, both individually and with their property, for the debts of somebody else; but as far as the joint-stock company is concerned, it seems to me we ought to eliminate it. If a joint-stock company method is the way to get money for the farmers, then we ought to eliminate everything else that is in the bill. There is not any reason, in my judgment, for having three methods provided for in the bill that will come into competition with each other on the money market and that, I believe, will do injury.

The VICE PRESIDENT. The question is on the amendment of the Senator from North Dakota [Mr. GRONNA].

The amendment was rejected.

Mr. GRONNA. On page 55, line 3, I move to strike out the word "five" and to insert the word "four," so as to read:

They shall bear a rate of interest not to exceed 4 per cent per annum.

I call the attention of the Senator from New Hampshire to this amendment that I am offering.

Mr. HOLLIS. Does the Senator ask me to accept it? He knows well I can not. You can not regulate the rate of interest by passing statutes. It depends on the market. I can not accept it.

Mr. GRONNA. I ask for a vote on my amendment.

The amendment was rejected.

Mr. GRONNA. I move to strike out the word "five" and to insert the words "four and one-half," so as to read:

They shall bear a rate of interest not to exceed 4½ per cent per annum.

The VICE PRESIDENT. The question is on the amendment submitted by the Senator from North Dakota [Mr. GRONNA].

The amendment was rejected.

Mr. CLAPP. Mr. President, I offer the substitute——

The VICE PRESIDENT. There is a substitute pending. The Chair is trying to get the original amendment perfected so as to put the question on the substitute.

Mr. CLAPP. I thought the substitute had been acted upon.

The VICE PRESIDENT. Is there any further amendment to the original bill? The Chair hears none. The question now is on the substitute offered by the Senator from South Dakota [Mr. STERLING]. [Putting the question.] The "noes" seem to have it. The "noes" have it, and the amendment is rejected.

Mr. GRONNA. Mr. President, I now offer as a substitute for the bill the amendment to which I have heretofore referred, which has been ordered printed in the RECORD. I ask for a vote of the Senate upon it.

The VICE PRESIDENT. The question is on the amendment in the nature of a substitute offered by the Senator from North Dakota.

The amendment was rejected.

Mr. CLAPP. Mr. President, I offer the substitute which has been heretofore proposed by the Senator from North Dakota [Mr. MCCUMBER], and I ask unanimous consent that it may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it will be printed in the RECORD.

The substitute referred to is as follows:

That there is hereby created in the Treasury Department a bureau to be known as the bureau of farm credits. Said bureau shall be presided over by an officer, who shall be designated commissioner of farm credits. The Secretary of the Treasury shall provide for sufficient clerical force to perform the duties of said bureau.

SEC. 2. That there is hereby appropriated and set aside for the use of said bureau in the manner hereinafter provided, the sum of $10,000,000, or so much thereof as may be necessary.

SEC. 3. That the said sum so provided shall be used for the purpose of purchasing notes secured by first mortgages on agricultural lands, as hereinafter provided, for stationery and clerical expenses, and such other expenses as may be incident to the business of said bureau.

SEC. 4. That every national bank and every State bank desiring to avail itself of the privileges herein provided are hereby created and declared to be agencies of the Treasury Department for the purpose of receiving from mortgagors notes and mortgages securing same, advancing the moneys to the said mortgagors and transmitting said notes and mortgages to the bureau of farm credits, and receiving in return therefor the amount advanced to the mortgagor by the said bureau.

SEC. 5. That it shall be the duty of the Secretary of the Treasury to apportion the sum hereby appropriated among the several States according to the agricultural population, importance of the agricultural productions of each States, and percentage of agricultural lands incumbered by mortgages or trust deeds, and to pay for such notes and mortgages as may be presented to the extent of the amount apportioned to any State.

SEC. 6. That any owner of agricultural lands within the United States, who is living upon and farming such lands, desiring a loan under the provisions of this act, shall execute a promissory note, due in 10 years, bearing interest at the rate of 4½ per cent per annum, interest payable annually, which interest shall be evidenced by 10 coupon notes attached to said principal note, and which coupons shall also bear interest at the rate of 5 per cent per annum from the date of maturity until paid, payable annually. Said note shall also provide that the principal may be paid on any interest-paying day after the expiration of five years. Said note shall be secured by a first mortgage upon the lands so farmed by the owner and executed and recorded in the manner provided by the laws of the State in which the land is situated, for the execution and recording of mortgages on real estate. Such mortgage shall be accompanied by an application for loan, which application shall recite the purpose for which the loan is desired, the market value of the land, the value at which it was last assessed for taxation, the value and kind of buildings thereon, the number of acres under cultivation, the character and quality of the soil, the number of acres capable of being cultivated, and such other information as may be required by the rules of the said bureau. Said application shall have attached thereto or made as a part thereof an affidavit signed by the owner and at least two neighbors who are thoroughly acquainted with land values in the vicinity, stating the market value of such lands and the market value of the particular lands to be mortgaged. Said note, mortgage, and application shall also be accompanied by an abstract of title duly certified by an abstract company, the register of deeds, or other officer authorized by the laws of the State to make and certify abstracts of lands, which abstract shall show no other mortgages, judgments, delinquent taxes, or other liens of any character against the said lands, unless the purpose of the loan is to secure money to cancel such liens. Said owner shall then present to any national bank or State bank accepting the provisions of this act the said loan papers. The said abstract and papers shall be carefully examined by the president, cashier, or other officer of the bank for the purpose of ascertain-

ing whether the title is perfect in the mortgagor, whether the land is affected by any liens, who shall certify the result of his examination of the abstract, and who shall further certify what in his opinion and judgment is the actual cash selling price of the land. And no mortgage shall be accepted for a greater amount than one-half of the value of such lands, including improvements, nor in any event to an amount exceeding one-half of the actual market value thereof. The said bank may charge the borrower for its services in examining papers and abstract, and in forwarding the papers to the bureau of farm credits, a sum not exceeding 1 per cent of the amount of the mortgage. No mortgage shall be less than $300 nor more than $10,000 to one person or company, and shall be in multiples of $100. The said notes and mortgages shall not be dated at the time they are executed and presented to the bank. The said bank shall forward all the said papers to the said bureau of farm credits, which bureau shall examine the abstract, note, mortgage, and application, and if said abstract shows the land to be clear or to have no liens of greater amount than the amount desired to be loaned, and all papers properly executed, it shall remit to the bank forwarding the papers the amount of the loan, and shall date the notes and mortgage the date on which the remittance is made, from which date interest shall begin to accrue; and all coupons shall be dated to correspond with the date affixed to the principal instrument; and said bureau shall return, with the remittance, the abstract of title. Upon the receipt of the said abstract of title by the bank said bank shall require the abstract to be continued up to date of payment by said bank to the borrower, and if said abstract, after being continued, shows the land clear, the bank shall indorse over to the borrower the remittance made by the bureau of farm credits. If there are any liens upon the land, the bank, out of the remittance, shall first pay and have canceled such liens and pay the balance to the borrower. The bank shall be held responsible for any negligence in the performance of its duties as agent of said bureau. The principal and all interest coupons shall be payable at the bank where and through which the loan is negotiated and remitted by said bank to said bureau.

SEC. 6. That whenever the bureau of farm credits shall have received such mortgages to the extent of $1,000,000 it shall issue bonds in the name of the United States payable in 20 years and bearing 4 per cent interest, payable annually, with the privilege and option of the said bureau to pay the principal at the expiration of 10 years. Said bonds shall be issued in denominations from $100 to $500 each, and the said commissioner of farm credits shall sell the said bonds for the face value thereof to any person applying therefor, preference being given to those desiring small investments. Said bonds shall not be subject to taxation by the United States, a State, or municipality. All moneys received by the said commissioner in the sale of bonds and the principal and all interest paid on said mortgages shall be covered into the said fund of $10,000,000 and used in the payment of mortgages as they may be presented, the expenses of the bureau, the interest on bonds, and payment thereof at maturity.

SEC. 7. That all mortgages shall run to the commissioner of farm credits, and said commissioner shall have all the rights and authority of a mortgagee under the laws of the State wherein such mortgage is executed.

SEC. 8. That all taxes of every kind levied by a State or municipality which may become a lien prior to said mortgage shall be paid by the mortgagor at least 30 days prior to the time such lands could be sold for delinquent taxes. Upon his failure to do so, or to pay any other lien that may attach to said lands and become superior to said mortgage, the commissioner may pay the same and the mortgage shall stand as security for such sums so paid and interest thereon at 8 per cent per annum. And said mortgage shall further provide that in default of the payment of any interest or the payment of taxes, or other superior liens, as aforesaid, the commissioner may foreclose the premises pursuant to the laws of the State in which the land is situated. All papers necessary for the foreclosure proceedings shall be prepared and premises foreclosed by the proper law officer of the bureau. In lieu of foreclosure the commissioner may sell the mortgage to any person desiring to purchase the same, without recourse, and the money so received shall be covered into said fund. Upon foreclosure, the said commissioner may transfer and assign the certificate of sale to any purchaser, and after the period of redemption has expired, may sell the lands. And any sum received therefor shall in like manner be covered into said fund.

SEC. 9. That it is the purpose of this act not only to secure and facilitate borrowing upon agricultural lands at a reasonable rate of interest, but also to afford a means for those who desire a safe investment, and so long as the said bureau shall be able to dispose of bonds at par it shall accept mortgages presented to any extent above the $10,000,000 hereby appropriated.

SEC. 10. That said bonds shall be negotiable in form, and transferable by indorsement, and may be bought and sold by Federal reserve banks under the provisions of sections 13 and 14 of the Federal reserve act, approved December 23, 1913, and may also be received as colateral for the issue of Federal reserve notes under the provisions of section 16 of said act.

SEC. 11. That the word "mortgage" shall be construed to include deeds of trust or any other instruments of security on agricultural lands.

SEC. 12. That the Secretary of the Treasury shall make all needful rules and regulations to carry out the provisions of this act.

SEC. 13. That this act shall take effect from and after its passage and approval.

The VICE PRESIDENT. The question is on the amendment, in the nature of a substitute, proposed by the Senator from Minnesota [Mr. CLAPP] for the Senator from North Dakota [Mr. MCCUMBER].

The amendment was rejected.

Mr. NORRIS. Mr. President, I reoffer the amendment which I offered awhile ago.

The VICE PRESIDENT. The amendment proposed by the Senator from Nebraska will be stated.

The SECRETARY. It is proposed to strike out all after the enacting clause and to insert the following——

Mr. HOLLIS. Mr. President, does the Senator from Nebraska care to have the amendment read, if it may be printed in the RECORD?

Mr. NORRIS. No. It has already been printed in the RECORD. I do not care to have it read. I discussed it at considerable length the other day, but I should like to have it printed in the RECORD at this point. I do not care to have the Secretary take up the time to read it.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment referred to is as follows:

That there is hereby established in the Department of Agriculture a bureau to be called the bureau of farm loans. There shall be appointed a director of said bureau, who shall receive a salary of $6,000 per annum, and an assistant director, who shall receive a salary of $4,500 per annum. The assistant director shall perform the duties of the director of said bureau in case of the death, resignation, removal from office, or absence of the director, and he shall also perform such other duties as may be assigned to him by the Secretary of Agriculture, by the director, or by law. There shall also be in said bureau a chief clerk and such other agents, clerks, inspectors, and employees as are provided for in this act or as may hereafter be authorized by law, or as may be authorized by the Secretary of Agriculture. The director and assistant director shall hold their respective offices for a term of 10 years and shall be removed from office during such term only for cause. The Secretary of Agriculture can remove either of said officers for a violation of law or neglect of duty, but only after a public trial upon charges duly made, of which the accused official shall have reasonable notice, and then only upon the approval in writing of the President of the United States. The director and assistant director shall be appointed by the President, by and with the advice and consent of the Senate, and in case there is a vacancy in either of said offices the appointment to fill the same shall be made for the full term.

SEC. 2. That under the rules and regulations made by the director of said bureau and approved by the Secretary of Agriculture, and in accordance with the provisions hereinafter provided, the said bureau shall make loans on farm lands located in any of the States of the Union or in the District of Columbia. Said loans shall be secured by mortgage made payable to said bureau, and shall bear interest at the rate of 4 per cent per annum, payable semiannually. No loan shall be made upon any tract of land less than 10 acres in area. Loans shall be made only for $100 or any multiple of $100 up to and including $2,000. The mortgage securing any such loan shall provide that at the end of five years one-tenth of said loan shall become due, and that thereafter one-tenth of said loan shall become due each year until the entire loan matures. Said mortgage shall also provide that whenever any interest is due, the mortgagor or his grantee shall have the right to pay the entire loan or to make a payment of $100 or any multiple thereof on the principal thereof, and upon such payment being made the interest on the amount so paid shall thereupon cease. Said mortgage shall also provide that both principal and interest shall draw interest at the rate of 6 per cent per annum from maturity.

SEC. 3. That no person shall be entitled to a loan of money from said bureau until he has made application therefor under oath upon blanks to be furnished by said bureau. Such application can be sworn to before any person authorized to administer an oath, and all postmasters and their deputies in the United States are hereby authorized to administer oaths to applicants making application for loans under this act and to administer oaths to such applicants or other persons to any other affidavits made necessary by the rules and regulations of said bureau. Whenever any oath is administered by a postmaster or deputy postmaster no charge shall be made therefor. No person shall be entitled to a loan under this act who is not of good moral character and who does not establish to the satisfaction of said bureau that he is honest and bears a good reputation in the neighborhood where he resides. No loan shall be made to any person who is not an actual resident on and engaged in the cultivation of the land offered as security: *Provided*, That where the applicant for the loan is endeavoring to secure the money for the purpose of building a house upon the land or for the purpose of making part payment upon the purchase price thereof, the bureau can waive this stipulation if convinced that it is the intention of applicant as soon as possible to reside upon the land and to cultivate the same, the intention of this act being to provide money only for persons who intend to reside upon and cultivate the land which they offer as security. No loan shall be made for more than one-half of the value of the land offered as security and only for one or more of the following purposes:

First. To make payment of part of the purchase money of the land to be mortgaged.

Second. To pay off an indebtedness already existing against said land.

Third. To build a house, barn, or other building or buildings upon said land: *Provided*, That said bureau, under proper rule and regulation, can provide that not to exceed 50 per cent of any loan may be used for the purchase of stock and farm implements. Any applicant or other person testifying falsely to any material fact in any application or other affidavit connected with any loan under this act shall, upon conviction thereof, be deemed guilty of perjury and punished accordingly.

SEC. 4. That it shall be the duty of every postmaster, deputy postmaster, or other employee or official of the Government, without fee or pay therefor, to make confidential reports to said bureau, upon request therefor, upon anything pertaining to any loan and upon the character or standing of any applicant or witness. Such postmaster, deputy postmaster, or other officer shall also, when requested by said bureau, appoint appraisers to appraise the land offered for security under the regulations of and upon the blanks furnished by said bureau.

SEC. 5. That any person applying for a loan shall furnish to said bureau an abstract of title to the land offered as security and shall pay all the necessary expenses connected with the making of said loan. Such applicant shall furnish conveyance for the appraisers appointed to fix a value upon land offered for the loan, or shall pay for the transportation of said appraisers to and from said land, and if required by said appraisers he shall pay a fee to each of them, not exceeding two in all, which fee shall be ascertained in advance and fixed by the official appointing said appraisers. It shall be the duty of said bureau and the officials appointing said appraisers to select efficient, qualified, and unbiased persons, but, at the same time, to regulate any fee that they may charge for such service so as to make the same as small as possible. Said appraisers shall make return upon blanks provided by the bureau and shall swear to the same before some person qualified under this act to administer an oath.

SEC. 6. That it shall be the duty of every United States district attorney or deputy district attorney, upon request from said bureau, to examine the abstract of title to any land offered as security under this act and to make return thereof to the said bureau. It shall likewise be the duty of any district attorney or deputy district attorney when

requested by the bureau to foreclose any mortgage taken as security for a loan under this act and to prosecute the same to final judgment. All such services so rendered by an attorney connected with the Department of Justice shall be a part of his official duty and shall be rendered without pay, but said bureau shall pay in all cases the actual expenses of any such attorney in connection with such litigation.

SEC. 7. That it shall be the duty of any post-office inspector, United States marshal, deputy United States marshal, or other employee or inspector of any other department, when engaged in official business in the vicinity of any land mortgaged to said bureau, upon request of said bureau, to make a personal inspection of the same and to report thereon to said bureau. Such inspection shall be made without charge, but said bureau shall pay the actual expenses, if any, made necessary thereby. It shall likewise be the duty of any postmaster, deputy postmaster, or other governmental official residing or doing business in the vicinity of any land that has been mortgaged to said bureau, upon request of said bureau, to make a report upon said loan or as to whether the money borrowed upon said land has been expended or is being expended in accordance with the purposes for which the same was loaned, and in making any loan under this act the said bureau can withhold, under such rules and regulations as it may prescribe, any part of the same for the purpose of insuring the application of said loan to the purposes for which the same was made.

SEC 8. That should the owner of any land mortgaged to said bureau fail or neglect to pay the interest thereon at or before the time when the same is due, or permit the taxes on the land to become delinquent, or neglect or refuse, without the consent of said bureau, to apply the money borrowed in accordance with the statements made in the application for the loan, or if he has made any false statement as to any material matter in said application, or if he neglects to properly care for the improvements on said land, or if he do any other act that materially injures the value of the security, either by overt act or by neglect and inattention, or should said land, without the consent of the bureau, cease to be farmed and cultivated, then the said bureau shall have the right, at its election and without notice, to declare the entire amount secured by said mortgage due and payable, and may take any steps necessary for the foreclosure of said mortgage and the collection of said loan, and from and after said election so made by the bureau the amount secured by said mortgage shall bear interest at the rate of 6 per cent per annum.

SEC. 9. That in making any payment of interest or payment of the principal, or part payment of the same, upon any loan made under this act the person making such payment can pay the same to any postmaster designated by said bureau, and the same shall be transmitted by said postmaster either directly to the bureau or to such Federal reserve bank as may be designated by the bureau, and such postmaster shall immediately notify the bureau of such payment and the transmission of the money so paid, and thereupon credit shall be given for the payment of such money as of the date the same was paid to the postmaster. The said bureau shall notify each person to whom a loan has been made as to the post office where payments upon his loan can be made. The bureau may make such designation by general circular or by specific notice in writing, and can designate by such notice a post office within a county or other district to which all payments within such district can be made.

SEC. 10. That the bureau shall deposit all money it receives in the Federal reserve banks provided for in the act of December 23, 1913, and in making disbursements of money it shall do so by check upon such banks. Any Federal reserve bank organized under the said Federal reserve act is hereby authorized and instructed to receive such deposits and to pay checks or drafts drawn by said bureau upon said deposits, the same as other accounts authorized to be held by said banks under said act.

SEC. 11. That the bureau shall have power to sue and to be sued, to complain and defend in any court of law or equity having jurisdiction of the subject matter in litigation. To protect any loan it may pay the taxes or any other prior lien due and unpaid against the land securing said loan, and in such case the amount paid in liquidation of such taxes or lien shall be added to and become a part of its mortgage on said real estate, and from the date of such payment shall bear interest at the rate of 6 per cent per annum. It shall have the right and authority to purchase, at sale under judgments or decrees of court rendered in foreclosure proceedings of any mortgage it owns, the land so mortgaged, but in such case it shall not bid a greater amount for such land at such sale than the amount due in such proceedings, together with costs and expenses expended in relation to said loan. In case the bureau obtains title as set forth in this section to any real estate, it shall have authority to sell the same at such price as may be for the best interests of said bureau, in the judgment of the director, and to convey title to the purchaser thereof by deed signed and acknowledged by the director. In making such sale it shall be authorized to take a return mortgage from the purchaser for part of the purchase price thereof in accordance with the provisions of this act.

SEC. 12. That in order to secure money for the purpose of making loans as hereinbefore provided the said bureau shall issue bonds which shall be the obligation both as to principal and interest of the United States. Said bonds shall be issued in denominations of $100 or any multiple thereof, and shall bear interest at the rate of 3½ per cent per annum, payable semiannually. Said bonds, together with the interest thereon, and also all notes and mortgages taken by said bureau upon farm lands, shall be entirely free from all taxation of every kind, National, State, and municipal. When in need of money for the purpose of making loans as provided in this act, the bureau shall give notice of its intention to issue bonds and invite from the public generally subscriptions to said bonds. If the amount of subscriptions shall exceed the then demand of the bureau, it shall give preference in accepting money for said bonds to those offered in the smallest amounts, the intention being to give as wide circulation and distribution to said bonds throughout the country as is possible. Said bonds shall be issued for the term of 15 years, with the privilege on the part of said bureau of paying the same upon the date of maturity of any interest payment after 10 years. After this act shall have been in active operation for one year said bureau shall have authority to change the rate of interest charged for farm loans thereafter made and to also change the rate of interest upon the bonds herein provided for thereafter issued, it being the object of this act to pay as low a rate of interest upon said bonds as will float said bonds at par and to charge as low a rate of interest upon the farm loans herein provided for as will bring in sufficient revenue to pay said bonds, the interest thereon, the expenses connected with the making of said loans, and any losses, if any, incurred therein.

SEC. 13. That it shall be unlawful for any Senator, Member of the House of Representatives, or any other official of the Government of the United States to use or attempt to use any political or other influence to induce said bureau to make or refuse to make any loan or loans. Any person found guilty of the conduct in this section prohibited shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not exceeding $2,000.

SEC. 14. That it shall be unlawful for any official of any State or any officer or member of any political committee to use or attempt to use any political or other influence to induce said bureau to make or refuse to make any loan or loans. Any person found guilty of the conduct in this section prohibited shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not exceeding $1,000.

SEC. 15. That it shall be the duty of the officials of said bureau to give publicity to any letter or communication from any of the persons named in the above two sections requesting or urging said bureau to make or to refuse to make any loan, and to give to the Department of Justice the names of any of said mentioned persons attempting to influence the action of said bureau in allowing or refusing any application for a loan, together with the evidence connected with said attempt, whether the same be in writing or otherwise.

SEC. 16. That any person who shall make any false representation to said bureau in connection with the making or the investigation of any application for a loan shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not exceeding $1,000 or be imprisoned for a term not exceeding one year, or both such fine and imprisonment, in the discretion of the court.

Mr. NORRIS. So far as I am concerned, I am ready for a vote on the amendment.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Nebraska.

The amendment was rejected.

Mr. LANE. Mr. President, before the bill proceeds further, in justice to myself, I wish to say that it is not so liberal as I would like to have it. It does not render it so easy for the deserving farmer to obtain money as it should. In Oregon we loan $6,000,000 of the school fund to farmers, and have had such a fund for 30 years, at 6 per cent, with the governor, the secretary of state, and the State treasurer acting as a board, under the advice of the attorney general, without the loss of one dollar of the loan. Such a Federal law would be safe, if it were administered with ordinary business acumen; but the Members of this body have not yet arrived at that conclusion, and this bill being the best that we can get under the circumstances, I am going to vote for it in the hope that it may lead to something better.

Mr. NORRIS. Mr. President, the brief remarks of the Senator from Oregon [Mr. LANE] illustrate what I tried to establish the other day, and which I tried to carry out in the substitute which I have offered. How many millions did the Senator say had been loaned of the school fund in the State of Oregon?

Mr. LANE. The loan is now $6,000,000.

Mr. NORRIS. Six million dollars belonging to the school fund. That has been loaned out to the farmers of Oregon for how many years?

Mr. LANE. For about 30 years, if my memory serves me aright.

Mr. NORRIS. That practice has been going on for about 30 years; and, as the Senator states, without the loss of a dollar. The substitute which I proposed, in effect, undertook to carry that into the Nation as it has been carried out in the State of Oregon with the exception that the rate of interest would be 4 per cent, instead of 6 per cent. In my judgment there can be no way in which cheap money can be afforded for loaning purposes to the farmers of the country unless the Government lends its credit for the purpose of floating the bonds that will be placed upon the market. Personally I can not see why the Government should not do so directly with the loans properly supervised in the same way in which the State of Oregon has done it in that State. It would not be dangerous in any respect, as I look at it, to the Government; but it would certainly bring about a reduction in the rate of interest. Unless the Government credit is loaned to any plan of this kind, it will not result in the relief that is possible to be brought about. To my mind the pending bill gives some relief of that kind. It does not do it, however, in the right way, nor does the bill go to the extent to which it ought to go.

I do not believe that it is necessary for the Government to loan its general funds for any purpose of this kind. My substitute did not provide for anything like that; but in some way the Government ought to loan its credit; and, in my judgment, it is a proper use of Government credit, and a proper instrumentality of the Government, if we can bring about a low rate of interest, that must be paid by the man who has the best security in the world and who has to pay the highest rate of interest under present conditions.

I said the other day that I doubted very much whether this bill would work satisfactorily. Other men just as honest and much more able than I think it will. I know it has been conceived and drafted in a very honest intention and with the

honest belief that it will bring relief. I sincerely trust that it will, although I feel morally certain that if it does bring some relief, it will not be to the degree that we ought to go and to the degree that we may properly go if we utilize the Government credit in the proper way.

The bill was reported to the Senate as amended.

The VICE PRESIDENT. The question is on concurring in the amendments made as in Committee of the Whole.

Mr. HOLLIS. I reserve the amendment which was submitted by the Senator from Utah [Mr. SMOOT] to the committee amendment. I want a separate vote on that amendment in the Senate.

The VICE PRESIDENT. What is the amendment?

Mr. HOLLIS. The amendment is, on page 3, line 12, where, on the motion of the Senator from Utah, the figures "$10,000" were struck out and the figures "$7,500" were inserted.

The VICE PRESIDENT. The question is on concurring in all the other amendments made as in Committee of the Whole.

The amendments made as in Committee of the Whole, with the exception of the reserved amendment, were concurred in.

The VICE PRESIDENT. The question now is on concurring in the amendment which was adopted, as in Committee of the Whole, on the motion of the Senator from Utah [Mr. SMOOT] to the amendment reported by the committee, on which the Senator from New Hampshire [Mr. HOLLIS] desires a separate vote. The amendment will be stated.

The SECRETARY. In the committee amendment, on page 3, line 12, the Senate, as in Committee of the Whole, struck out "$10,000" and inserted "$7,500."

Mr. SMOOT. On that I ask for the yeas and nays.

Mr. HOLLIS. Mr. President, those opposed to the amendment of the Senator from Utah, I understand, will vote "nay"?

The VICE PRESIDENT. Yes.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CURTIS (when his name was called). I have a general pair with the Senator from Georgia [Mr. HARDWICK], which I transfer to the Senator from Illinois [Mr. SHERMAN], and vote "yea."

Mr. PAGE (when Mr. DILLINGHAM's name was called). I wish to announced the necessary absence of my colleague [Mr. DILLINGHAM]. He is paired with the senior Senator from Maryland [Mr. SMITH]. If present and permitted to vote, my colleague would vote "yea."

Mr. FALL (when his name was called). I have a general pair with the senior Senator from West Virginia [Mr. CHILTON]. I transfer that pair to the Senator from California [Mr. WORKS] and vote "yea."

Mr. OWEN (when his name was called). I transfer my pair with the Senator from New Mexico [Mr. CATRON] to the Senator from Delaware [Mr. SAULSBURY] and vote "nay."

Mr. ASHURST (when the name of Mr. SMITH of Arizona was called). I rise to announce that my colleague has just been called from the Chamber on a very important matter at one of the departments.

Mr. SHAFROTH (when the name of Mr. THOMAS was called). I desire to announce the unavoidable absence of my colleague [Mr. THOMAS]. He is paired with the senior Senator from North Dakota [Mr. MCCUMBER].

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Arkansas [Mr. ROBINSON] and vote "yea."

Mr. TOWNSEND (when his name was called). I transfer my pair with the Senator from Florida [Mr. BRYAN] to the junior Senator from Rhode Island [Mr. COLT] and vote "yea."

Mr. UNDERWOOD (when his name was called). I have a general pair with the junior Senator from Ohio [Mr. HARDING]. I transfer that pair to the Senator from Arizona [Mr. SMITH] and vote "nay."

Mr. LODGE (when the name of Mr. WEEKS was called). My colleague [Mr. WEEKS] is absent from the Chamber. If present, he would vote "yea." He is paired with the Senator from Kentucky [Mr. JAMES].

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from Illinois [Mr. LEWIS] and vote "nay."

The roll call was concluded.

Mr. BECKHAM. I transfer my pair with the Senator from Delaware [Mr. DU PONT] to the Senator from Louisiana [Mr. BROUSSARD] and vote "yea."

Mr. STONE. I thought I had arrangements made with a Senator on the other side for a mutual transfer of pairs; but I do not see him present, and as I am unable to obtain a transfer of my standing pair with the Senator from Wyoming [Mr. CLARK] I will have to withhold my vote. If I were permitted to vote, I should vote "nay."

Mr. MYERS. I transfer my pair with the Senator from Connecticut [Mr. MCLEAN] to the Senator from Tennessee [Mr. SHIELDS] and vote "nay."

Mr. JAMES. I desire to withdraw my vote, as I am paired with the junior Senator from Massachusetts [Mr. WEEKS], and he has not voted.

Mr. SMITH of Georgia. I desire to announce the absence of my colleague [Mr. HARDWICK]. He is paired with the junior Senator from Kansas [Mr. CURTIS].

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Nebraska [Mr. HITCHCOCK];

The Senator from North Dakota [Mr. MCCUMBER] with the Senator from Colorado [Mr. THOMAS];

The Senator from New Hampshire [Mr. GALLINGER] with the Senator from New York [Mr. O'GORMAN]; and

The Senator from Utah [Mr. SUTHERLAND] with the Senator from Arkansas [Mr. CLARKE].

The result was announced—yeas 29, nays 31, as follows:

YEAS—29.

So the amendment of Mr. SMOOT to the amendment of the committee made as in Committee of the Whole was nonconcurred in.

The amendment of the committee was concurred in.

The VICE PRESIDENT. The bill is in the Senate, and open to amendment.

Mr. STERLING. I submit the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to strike out lines 18 and 19 on page 25; and strike out "division A" in line 20 on the same page and insert in lieu thereof the words "national farm loan"; and to strike out pages 26, 27, and down to and including the word "board," in line 10 on page 28.

Mr. STERLING. Mr. President, just a word in explanation of this amendment. The amendment relates to the two classes of farm-loan associations, the limited class and the unlimited class. If the amendment is adopted the provision will read:

> That shareholders of every farm-loan association shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such association to the extent of the amount of stock owned by them at the par value thereof, in addition to the amount paid in and represented by their shares.

In other words, the amendment will provide for the limited liability of the members of the national farm-loan associations, and there will not be any distinction in liability whatsoever.

I wish to say further that I hardly think that the adoption of this amendment will affect any of the other provisions of the bill. If it does, and if the amendment should be accepted, the necessary changes could be made very readily so as to make the bill correspond with the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment was rejected.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. BRANDEGEE. Mr. President, I shall take only one minute, and it is the first minute I have taken on the floor since this bill has been under consideration.

This bill will do my section of the country no good whatever, in my opinion. There is no demand for it there. The loans are obtainable upon good farm security from the insurance

companies and the savings banks, and, in my opinion, this bill and its provisions will not be availed of at all. I would not, however, vote against the bill for that reason if I were convinced that it would be of any substantial benefit in other parts of the country; but I regard the bill as an unpractical and unconstitutional piece of legislation, and therefore I shall cast my vote against it.

As showing the extent to which the insurance companies have loaned money upon farms and the exceedingly moderate rates which they have charged, I ask permission to insert in the RECORD a short editorial from the Hartford Courant, of my State.

The VICE PRESIDENT. Without objection, it is so ordered. The matter referred to is as follows:

[Editorial from the Hartford Courant of May 1, 1916.]

ABOUT FARM LOANS.

While there is agitation over Government banks to afford to farmers the opportunity to borrow on their farms it is well worth while to look over the extent and the experience of one of our great life insurance companies in this field, suggesting alike the worth of such investments and the ease with which the farmer can borrow.

The Connecticut Mutual Life Insurance Co., of this city, the first life insurance company organized under the laws of Connecticut, dating back to 1846, found that the accustomed outlets for investments in city mortgages, Government, municipal, railway, and other securities of the most desirable standard were somewhat limited; and in that year, after a thorough study of the whole situation, the company began making farm loans, and selected for its operations the choicest agricultural areas in the States of Ohio, Indiana, Illinois, Missouri, Iowa, and Nebraska, and northeastern Kansas, commonly known as the "corn belt."

From August 1, 1881, to April 26, this year, the company has made loans on farm lands and improvements in the vast sum of $128,786,021.67. There have been retired on this account, in cash payment or new loans, the sum of $95,038,811.56, leaving outstanding in force on April 26, 1916, $33,747,210.11. In the 35 years of this experience the company has acquired title to these mortgaged farm lands in a sum amounting to only sixty-three one-hundredths of 1 per cent of the principal. These farms so taken have, on the other hand, yielded to the company on sales a net profit of $68,367.61.

These loans have all run directly to the company and have been negotiated through its approved financial correspondents in the various States—men of judgment, experience, and personal integrity; men of the highest standing in their respective communities, competent and experienced in all matters relating to farm-loan securities; experts in valuations, and with personal knowledge of the character and responsibility of the borrowers. These loans have been made on the most favorable rates of interest to the thousands of borrowers, running from a minimum of 4½ per cent to a maximum of 6 per cent per annum. It is a most notable share, through this remarkable experience, that this company has had in the development and conservation of the great agricultural interests so vital to our country's prosperity.

There would seem to be little occasion for the exploitation of the scheme entitled "rural credits," with all its complications, covered in the Hollis bill, so called, pending in the Congress, or for its acceptance, with its many burdensome details, by the multitude of borrowers whose relations with this company and many others transacting a like business have been and are satisfactory in all respects.

It is a significant fact in this relation that at the close of 1914 (the figures for 1915 are not yet available) 148 American life insurance companies carried in their assets $654,650,505 loans on farms in the United States, or 39.3 per cent of their entire mortgage holdings, all of which amounted to $1,677,102,467.

The VICE PRESIDENT. The question is, Shall the bill pass?

Mr. HOLLIS. On that I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BECKHAM (when his name was called). I transfer my pair with the Senator from Delaware [Mr. DU PONT] to the Senator from Louisiana [Mr. BROUSSARD] and will vote. I vote "yea."

Mr. HOLLIS (when Mr. CHILTON's name was called). I have been requested to announce that the senior Senator from West Virginia [Mr. CHILTON], the junior Senator from Delaware [Mr. SAULSBURY], and the junior Senator from Arkansas [Mr. BOBINSON] are absent on official business, and are all paired in favor of the bill.

Mr. CURTIS (when his name was called). I am paired with the junior Senator from Georgia [Mr. HARDWICK]. He has authorized me to vote on this bill, as he would vote "yea," and I intend to vote "yea." I, therefore, vote "yea."

Mr. PAGE (when Mr. DILLINGHAM's name was called). I wish to announce the necessary absence of my colleague [Mr. DILLINGHAM]. He is paired with the senior Senator from Maryland [Mr. SMITH]. If present and at liberty to vote, my colleague would vote "nay."

Mr. FALL (when his name was called). I announce my pair with the senior Senator from West Virginia [Mr. CHILTON], but as I am at liberty to vote upon this matter I vote "yea."

Mr. JAMES (when his name was called). I transfer the general pair I have with the junior Senator from Massachusetts [Mr. WEEKS] to the junior Senator from Georgia [Mr. HARDWICK] and will vote. I vote "yea."

Mr. OVERMAN (when his name was called). I have a general pair with the junior Senator from Wyoming [Mr. WARREN]. I transfer that pair to the junior Senator from Tennessee [Mr. SHIELDS] and will vote. I vote "yea."

Mr. OWEN (when his name was called). I transfer my pair with the Senator from New Mexico [Mr. CATRON] to the Senator from Delaware [Mr. SAULSBURY] and will vote. I vote "yea."

Mr. ASHURST (when the name of Mr. SMITH of Arizona was called). I again announce the unavoidable absence of my colleague [Mr. SMITH of Arizona].

Mr. STONE (when his name was called). I transfer my standing pair with the Senator from Wyoming [Mr. CLARK] to the Senator from West Virginia [Mr. CHILTON] and will vote. I vote "yea."

Mr. SMOOT (when Mr. SUTHERLAND's name was called). My colleague [Mr. SUTHERLAND] is necessarily detained from the Senate. He has a general pair with the senior Senator from Arkansas [Mr. CLARKE].

Mr. SHAFROTH (when Mr. THOMAS's name was called). I desire to announce the unavoidable absence of my colleague [Mr. THOMAS].

Mr. TILLMAN (when his name was called). Repeating the announcement I made a moment ago, I vote "yea."

Mr. UNDERWOOD (when his name was called). I have a general pair with the junior Senator from Ohio [Mr. HARDING]. I transfer that pair to the junior Senator from Arizona [Mr. SMITH] and vote "yea."

Mr. MYERS (When Mr. WALSH's name was called). My colleague [Mr. WALSH] is necessarily absent. If he were present, he would vote "yea."

Mr. LODGE (when Mr. WEEKS's name was called). My colleague [Mr. WEEKS] is necessarily absent. He is paired with the senior Senator from Kentucky [Mr. JAMES]. If present, my colleague would vote "nay."

Mr. WILLIAMS (when his name was called). Repeating the announcement made upon the last roll call, I vote "yea."

The roll call was concluded.

Mr. HOLLIS. I wish to announce that the senior Senator from Nebraska [Mr. HITCHCOCK] is paired with the junior Senator from Maine [Mr. BURLEIGH]. If the Senator from Nebraska were present, he would vote "yea."

Mr. SHAFROTH. I desire to announce that my colleague [Mr. THOMAS], who is unavoidably absent, is paired with the senior Senator from North Dakota [Mr. MCCUMBER], and that if my colleague were present he would vote "yea."

Mr. MYERS. I desire to announce the pair of my colleague [Mr. WALSH] with the Senator from Rhode Island [Mr. LIPPITT], both of whom are absent.

Mr. CURTIS. I desire to announce that the Senator from New Hampshire [Mr. GALLINGER] is paired with the Senator from New York [Mr. O'GORMAN]. I also desire to announce the absence of the Senator from Maine [Mr. BURLEIGH], who is paired with the Senator from Nebraska [Mr. HITCHCOCK]. I do not know how the Senator from Maine would vote if he were present.

The result was announced—yeas 58, nays 5, as follows:

YEAS—58.

| | | | |
|---|---|---|---|
| Ashurst | Hughes | Nelson | Smith, Mich. |
| Bankhead | Husting | Newlands | Smith, S. C. |

So the bill was passed.

The title was amended so as to read: "A bill to provide capital for agricultural development, to create a standard form of in-

vestment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes."

PETITIONS AND MEMORIALS.

Mr. NELSON presented petitions of sundry citizens of Minnesota, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. DU PONT presented a petition of sundry citizens of Rehoboth Beach, Del., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Newark, Del., praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Milford, Del., praying for prohibition in the District of Columbia, which was ordered to lie on the table.

Mr. THOMAS presented petitions of sundry citizens of Colorado, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. JONES presented petitions of sundry citizens of Washington, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. PHELAN presented memorials of sundry citizens of California, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented petitions of the Friday Study Club, of Santa Barbara, and of the Woman's Club, of Carquinez, all in the State of California, praying for an investigation into conditions surrounding the marketing of dairy products, which were referred to the Committee on Agriculture and Forestry.

He also presented a memorial of the Civic Art Commission of Berkeley, Cal., remonstrating against the proposed location of the central heating, lighting, and power plant in the District of Columbia, which was ordered to lie on the table.

Mr. TILLMAN presented a petition of sundry citizens of Salley, S. C., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. TOWNSEND presented petitions of sundry citizens of Michigan, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Michigan, praying that the United States remain at peace, which were referred to the Committee on Foreign Relations.

He also presented a petition of the Fourth District Michigan Christian Endeavor Union, of Holland, Mich., praying for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented a petition of the Fourth District Michigan Christian Endeavor Union, of Holland, Mich., praying for prohibition in the District of Columbia, which was ordered to lie on the table.

He also presented a petition of Orcutt Camp, No. 10, Sons of Veterans, of Kalamazoo, Mich., praying for an increase in armaments, which was ordered to lie on the table.

Mr. KERN presented a petition of the Lutheran Ministers and Teachers' Conference, of Peru, Ind., praying that the United States remain at peace, which was referred to the Committee on Foreign Relations.

He also presented a memorial of sundry citizens of Indianapolis, Ind., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of Franklin, Ind., praying for the enactment of legislation to recognize the services of certain employees in the Canal Zone, which was referred to the Committee on Interoceanic Canals.

He also presented petitions of sundry citizens of New Albany, Ind., praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

Mr. WADSWORTH presented memorials of sundry citizens of New York, remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

He also presented memorials of sundry citizens of Jamestown, N. Y., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

Mr. SMITH of Michigan. I have a telegram from the mayor of Port Huron, Mich., which I ask may be printed in the RECORD.

There being no objection the telegram was ordered to be printed in the RECORD, as follows:

PORT HURON, MICH., *May 4, 1916.*

Hon. WILLIAM ALDEN SMITH,
*Washington, D. C.:*

Port Huron is a city of 22,000 and growing. It has varied industries, including elevators, large thrashing machinery plant, railroad shops, and marine interests. At present, because we have no sufficient channel, we do not benefit by large lake commerce which passes our door. We are located at the foot of Lake Huron on the greatest waterway in the world and the St. Clair River, but get no benefit. Consequently the surrounding and interior territory get no benefit. We urge your cooperation and help in securing an appropriation for the construction of an additional channel such as is recommended by engineer and shipping interests.

JOHN L. BLACK, *Mayor.*

Mr. O'GORMAN presented a petition of the Merchants' Association of New York, praying for the extension of the pneumatic-tube service of the New York City post office, which was referred to the Committee on Post Offices and Post Roads.

He also presented the petition of Adolph Lewisohn, of New York City, N. Y., praying for the enactment of legislation to provide a guarantee of the Philippine government bonds in connection with the proposed legislation to grant independence to the Philippine Islands, which was ordered to lie on the table.

He also presented a petition of the Chamber of Commerce of Plattsburg, N. Y., praying for the enactment of legislation to provide an adequate standing army, which was ordered to lie on the table.

Mr. PAGE presented memorials of Industrial Grange, No. 127, Patrons of Husbandry, of Andover; of Crystal Lake Grange, No. 441, Patrons of Husbandry, of Barton; and of Mount Philo Grange, No. 329, Patrons of Husbandry, of North Ferrisburg, all in the State of Vermont, remonstrating against an increase in armaments, which were ordered to lie on the table.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BANKHEAD:

A bill (S. 5841) to authorize the Perdido Bay Bridge & Ferry Co., a corporation existing under the laws of the State of Alabama, to construct a bridge over and across Perdido Bay from Lillian, Baldwin County, Ala., to Cummings Point, Escambia County, Fla.; to the Committee on Commerce.

By Mr. DU PONT:

A bill (S. 5842) granting an increase of pension to Hetty R. Lynch; to the Committee on Pensions.

By Mr. KERN:

A bill (S. 5843) granting an increase of pension to Mary J. Yocum; to the Committee on Pensions.

By Mr. TAGGART:

A bill (S. 5844) granting a pension to Wilbur C. Gahret; and

A bill (S. 5845) granting an increase of pension to Louise P. Wasem (with accompanying papers); to the Committee on Pensions.

By Mr. BECKHAM:

A bill (S. 5846) granting a pension to James G. Rollins (with accompanying papers);

A bill (S. 5847) granting a pension to Jacob F. Allen (with accompanying papers);

A bill (S. 5848) granting an increase of pension to Cyrus B. Parrigin (with accompanying papers);

A bill (S. 5849) granting an increase of pension to John French (with accompanying papers); and

A bill (S. 5850) granting an increase of pension to William Ingram (with accompanying papers); to the Committee on Pensions.

By Mr. MARTIN of Virginia:

A bill (S. 5851) granting the consent of Congress to the Norfolk-Berkley Bridge Corporation, of Virginia, to construct a bridge across the Eastern Branch of the Elizabeth River in Virginia; to the Committee on Commerce.

By Mr. O'GORMAN:

A bill (S. 5852) for the relief of the Hellenic Transatlantic Steam Navigation Co. (with accompanying paper); to the Committee on Claims.

By Mr. UNDERWOOD:

A bill (S. 5853) to incorporate the Federal Council of the Churches of Christ in America; to the Committee on the Judiciary.

By Mr. SWANSON:

A bill (S. 5854) to provide for the erection, furnishing, and equipping of a building in the city of Washington, D. C., for the Department of Justice; to the Committee on Public Buildings and Grounds.

By Mr. LODGE:
A joint resolution (S. J. Res. 128) authorizing the acceptance of the gift of the Berkshire Trout Hatchery, Berkshire County, Mass.; to the Committee on Fisheries.

GOOD ROADS.

Mr. SHAFROTH submitted an amendment intended to be proposed by him to the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter, which was ordered to lie on the table and be printed.

INDIAN APPROPRIATIONS—CONFERENCE REPORT.

Mr. ASHURST. Mr. President, I wish to give notice that to-morrow morning, immediately after the reading of the Journal, or as soon thereafter as I can secure the floor, I shall ask the Senate to consider the conference report on the Indian appropriation bill.
The report has been standing for something like a week, and I shall ask the Senate to dispose of it to-morrow.

GOOD ROADS.

Mr. BANKHEAD. I move that the Senate proceed to the consideration of House bill 7617, commonly known as the good-roads bill.
Mr. SMOOT. The Senator can take up that bill by motion in the morning just as well.
Mr. BANKHEAD. I will lay it aside at once.
Mr. SMOOT. With that understanding, I have no objection.
The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Alabama.
The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter.
Mr. BANKHEAD. I ask that the bill may be temporarily laid aside.
The VICE PRESIDENT. Without objection, it is so ordered.
Mr. KERN. I move that the Senate adjourn.
The motion was agreed to; and (at 6 o'clock and 50 minutes p. m., Thursday, May 4, 1916) the Senate adjourned until to-morrow, Friday, May 5, 1916, at 12 o'clock meridian.

## HOUSE OF REPRESENTATIVES.

### THURSDAY, *May 4, 1916.*

The House met at 12 o'clock noon.
The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:
Almighty God, our heavenly Father, we thank Thee for all the rich and varied blessings of life, especially for the faculties of mind and soul with which Thou hast endowed us, and we most fervently pray that we may wisely, conscientiously, and efficiently use them in the work Thou hast called us to do, that we may be faithful sons of Thee, the living God. And Thine be the praise through Jesus Christ our Lord. Amen.
The Journal of the proceedings of yesterday was read and approved.

ILLITERACY.

Mr. HUGHES. Mr. Speaker, I ask unanimous consent to print in the RECORD an article from the Macon (Ga.) Telegraph on the subject of illiteracy, in which article is incorporated a plan of correction inaugurated most successfully by the very distinguished gentleman from Georgia, Judge PARK, which is worthy of the highest commendation.
The SPEAKER. The gentleman from Georgia asks unanimous consent to print in the RECORD an article from the Macon (Ga.) Telegraph on the subject of illiteracy, incorporating a system of correcting it inaugurated by a Member of the House, Judge PARK. Is there objection?
There was no objection.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bill (S. 5802) to amend an act approved June 8, 1906, entitled "An act to amend section 1 of an act entitled 'An act relating to the Metropolitan police of the District of Columbia,' approved February 28, 1901," in which the concurrence of the House of Representatives was requested.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:
S. 5802. An act to amend an act approved June 8, 1906, entitled "An act to amend section 1 of an act entitled 'An act relating to the Metropolitan police of the District of Columbia,' approved February 28, 1901"; to the Committee on the District of Columbia.
S. 509. An act for the relief of the heirs of Joshua Nicholls; to the Committee on War Claims.
S. 3423. An act to provide for the construction of a bridge across the Salt Fork of the Arkansas River near White Eagle Agency, in the Ponca Indian Reservation, Okla.; to the Committee on Indian Affairs.
S. 4425. An act to provide for the retirement of officers and employees of the Bureau of Lighthouses and the Lighthouse Service; to the Committee on Interstate and Foreign Commerce.
S. 4426. An act to regulate the salaries of keepers of lighthouses; to the Committee on Interstate and Foreign Commerce.

CALENDAR FOR UNANIMOUS CONSENT.

The SPEAKER. Under the order heretofore made the Calendar for Unanimous Consent will be called, and the Clerk will report the first bill.

FRAUDULENT ENLISTMENT.

The first business on the Calendar for Unanimous Consent was the bill (H. R. 7619) to repeal section 3 of section 1342 of the Revised Statutes of the United States, enacted July 27, 1892.
The SPEAKER. Is there objection?
Mr. MANN. I object.
The SPEAKER. The gentleman from Illinois objects, and the bill is stricken from the calendar.
Mr. MANN. Mr. Speaker, the gentleman from Ohio [Mr. GORDON] who is interested in the bill is not present, and I am perfectly willing that it should go over without prejudice.
Mr. FOSTER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.
The SPEAKER. Is there objection?
There was no objection.

SECTION 20 OF THE ACT TO REGULATE COMMERCE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 722) to amend section 20 of an act to regulate commerce, approved February 4, 1887, as amended, and for other purposes.
The SPEAKER. Is there objection?
Mr. MANN. Mr. Speaker, reserving the right to object, there is a minority report upon this bill. The gentleman from New Jersey [Mr. PARKER] filed a minority report and is not present. In his absence I would have to object, unless the gentleman from Georgia will consent to having it passed over without prejudice.
Mr. ADAMSON. Mr. Speaker, I know the gentleman is in the city, for he attended a committee meeting a few moments ago.
The SPEAKER. Has the gentleman from Georgia any suggestion to make in respect to the bill?
Mr. ADAMSON. Mr. Speaker, I will act on the suggestion of the gentleman from Illinois and ask unanimous consent that it be passed over without prejudice.
The SPEAKER. Is there objection?
There was no objection.

JOINT COMMITTEE TO INVESTIGATE INTERSTATE AND FOREIGN COMMERCE.

The next business on the Calendar for Unanimous Consent was the joint resolution (S. J. Res. 60) creating a joint subcommittee from the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to interstate and foreign commerce, and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee.
The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I am making some further inquiries which are not yet complete, and I hope the gentleman from Georgia will ask to have this joint resolution passed over without prejudice.

Mr. ADAMSON. Mr. Speaker, I have no disposition to refuse to oblige the gentleman from Illinois in any respect, but I beg to state to him, in showing the importance of this matter, that probably one-half, or at least a very large percentage, of the bills before our committee are depending on this resolution. Every time we take up one for consideration somebody suggests it will be covered by the jurisdiction of the joint committee, if appointed under this joint resolution. I would be glad to have the joint resolution disposed of one way or the other, so that our committee would be relieved of that embarrassment.

Mr. MANN. Mr. Speaker, I am sure that the gentleman's committee is busy with important work, so that they are not losing anything by putting over some bills.

Mr. ADAMSON. The gentleman speaks correctly, so far as that is concerned, yet there are so many bills as to which that plea is made that it amounts to an embarrassment. The gentleman suggests to me that it can be called up again a week from next Monday, and, in view of that statement, I ask unanimous consent that it be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection.

FOREST HOMESTEAD ACT.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10668) to repeal section 4 of the act of Congress approved June 11, 1906, known as the forest homestead act, and for other purposes.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. This bill is on the Union Calendar.

Mr. FOSTER. Mr. Speaker, I ask unanimous consent that it be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the Clerk will read the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That section 4 of the act of Congress, approved June 11, 1906, entitled "An act to provide for the entry of agricultural lands within forest reserves," be, and the same is hereby, repealed: *Provided*, That lands within forest reserves in Lawrence and Pennington Counties, in South Dakota, shall remain subject to all other provisions of the said act of June 11, 1906.

With the following committee amendments:

After the word "reserves," in line 6, insert "as amended by the act of February 8, 1907 (Stat. L., vol. 34, p. 883), and by the act of July 3, 1912 (Stat. L., vol. 37, p. 239)."

Mr. MANN. Mr. Speaker, I move to amend the committee amendment, line 10, page 1, by striking out the words "two hundred and thirty-nine" and inserting "one hundred and eighty-eight."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 1, line 10, by striking out the words "two hundred and thirty-nine" and inserting "one hundred and eighty-eight."

Mr. FOSTER. Mr. Speaker, let me ask the gentleman—he has probably looked it up—as to whether the reference to the page is wrong——

Mr. MANN. The reference is wrong, and I think I am correct in the amendment I offered. I have that notation, and I did look it up.

Mr. FOSTER. All right.

Mr. MANN. It was acknowledged to be wrong when the bill was up the last time.

Mr. FOSTER. That is my recollection.

The SPEAKER. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to.

The amendment as amended was agreed to.

The Clerk read the next committee amendment, as follows:

Page 2, line 1, strike out, after the word "repealed," the colon and the words "*Provided*, That" and insert a period and the word "all."

The question was taken, and the amendment was agreed to.

The next committee amendment was read as follows:

Page 2, line 2, strike out the words "forests reserves" and insert the words "a national forest."

Mr. MANN. Mr. Speaker, I ask unanimous consent to amend the committee amendment by striking out the word "a" and inserting the word "the."

The amendment was agreed to.

The committee amendment as amended was agreed to.

The next committee amendment was read, as follows:

Page 2, line 3, after the word "shall," insert the words "be and."

The question was taken, and the amendment was agreed to.

The next committee amendment was read, as follows:

In line 5, page 2, after the word "six," insert the words "and acts amendatory thereof and supplementary thereto."

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

MANUSCRIPT COPIES OF PATENT OFFICE RECORDS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11798) providing for the temporary employment of typewriters in the Patent Office.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I would like to inquire of the gentleman having charge of this bill what is the especial need of this additional force? I see the chairman of the subcommittee on the legislative, executive, and judicial appropriation bill present, and, as I recall, this authorization was included as a Senate amendment to the bill which was not agreed to in conference.

Mr. MANN. Was agreed to.

Mr. BYRNS of Tennessee. No; it was not agreed to. But I will call the attention of the gentleman to the fact that this is a different provision and covers a much wider scope than the Senate amendment, because that amendment was limited to the expenditure of $10,000, and there is absolutely no limit of expenditure that may be made under this bill except the provision here providing that the amount expended for such employment shall not exceed in any month the amount received for furnishing the manuscript copies of records, and so forth.

Mr. STAFFORD. In other words, the language of this bill is broader than the item which was objected to in conference?

Mr. BYRNS of Tennessee. Yes.

Mr. STAFFORD. Mr. Speaker, in the absence of the gentleman having charge of the bill, I am going to ask——

Mr. MORRISON. Mr. Speaker, Mr. OGLESBY has charge of this bill, and I do not see him present at this moment; but I would like to answer any question any gentleman desires to ask in reference to the purposes of this bill.

Mr. STAFFORD. Can the gentleman inform the House whether any other bureau has a similar authority to that intended to be vested by this bill?

Mr. KITCHIN. Mr. Speaker, I suggest that the bill be passed over without prejudice until Mr. OGLESBY returns. He will be in in a few moments.

Mr. STAFFORD. Very well.

Mr. SISSON. Then it will go to the heels of this docket.

Mr. FOSTER. Mr. Speaker, I ask that it be passed over without prejudice.

The SPEAKER. The gentleman asks that this bill be passed over without prejudice——

Mr. MORRISON. Mr. Speaker, I am chairman of that committee, and I am willing to assume the responsibility of answering any question.

Mr. KITCHIN. I beg the gentleman's pardon. I did not so understand, and I withdraw my request.

Mr. STAFFORD. Mr. Speaker, I renew the inquiry I put to the gentleman as to whether there is any other bureau that has a similar authority which is intended to be vested in the Commissioner of Patents?

Mr. MORRISON. Mr. Speaker, I am not able to answer that question, but I would like to be permitted to state how we came to have this bill before the House. The Patent Office is called upon frequently to furnish certified copies of records to be used in litigation. The present force is not able to furnish the work within a reasonable time, and it operates to the great disadvantage of litigants.

Mr. STAFFORD. Will the gentleman permit?

Mr. MORRISON. Certainly.

Mr. STAFFORD. Is this additional work done throughout the year, or is it periodical?

Mr. MORRISON. It is periodical, because it grows very largely, if not exclusively, out of litigation, and there is no assurance in advance how much demand there will be for this work.

Mr. STAFFORD. Of course there are advantages, which the gentleman would recognize, in having a permanent force rather than a small temporary force of employees, as provided in this bill.

Mr. MORRISON. It is not general. As I recall the bill, the Commissioner of Patents has permission to give temporary employment to those who are already eligible to permanent employment, so that this work when it is needed may be done quickly. I will state the financial side of it so far as the Patent

Office is concerned. The typewriters who do the work are paid $2.50 per day. On the average the office will receive for their work $8 to $10 a day. It is not a matter that will involve expense on the part of the Government except long enough to pay for the help, deliver the work, and get back the current price as fixed by law.

Mr. STAFFORD. Under the phraseology of this bill, what would prevent the Commissioner of Patents from detailing these typewriters on other work and keeping them employed continuously throughout the year?

Mr. MANN. The bill, if the gentleman will pardon me, only provides for keeping current the work of furnishing manuscript copies of records. They could not under this bill employ these clerks for any other purposes. It only authorizes the employment for that purpose. Those records are sold. So all this bill does is that if the gentleman or some one else ordered some manuscript copies of patents for use, they could get them promptly. Now you can not always get them promptly because there is no force to copy them. This bill would authorize the temporary employment of typewriters to copy those manuscripts, which are sold at 10 cents a folio, or something like that. Is that the price?

Mr. MORRISON. I think so. That is my recollection.

Mr. STAFFORD. I reserved the objection more to direct the attention of the conferees on the legislative bill to this measure, as they have objected to a similar provision in the appropriation bill as a Senate amendment.

Mr. FOSTER. Mr. Speaker, reserving the right to object, I understand they have 140 copyists over in that office now.

Mr. MANN. Those are permanent employees.

Mr. FOSTER. I know they are.

Mr. MANN. And this bill provides that when there is an excess demand for manuscript copies over those that can be furnished by the permanent employees, the Commissioner of Patents can furnish those manuscripts, which are sold and used in patent litigation.

Mr. FOSTER. There is no limitation on this bill.

Mr. MANN. There is a limitation that they can not be used for any other purpose than that.

Mr. FOSTER. It seems to me that this is not a good way to give the department leave to go ahead and employ copyists.

Mr. MANN. It is immaterial to me, but here is the situation: Here is a patent lawyer who has litigaticn. He wants to obtain copies of patents. He asks the Government to furnish him those copies. Under the law he is required to pay 10 cents a folio for them, and the office can not furnish them to him. Litigation has to be put off on the ground that the Government of the United States can not furnish copies of the patents which are necessary to the litigation, and that is a reflection upon the governmental operation.

Mr. GOOD. Let me ask the gentleman how far behind the commissioner is in furnishing requests for copies?

Mr. MANN. I do not suppose he is behind at all now, but there are times when he is behind and can not furnish the copies.

Mr. GOOD. He can furnish them within a few days. He has so many clerks there that he can so adjust the work that these copies can be furnished. This is simply another plan to get additional clerks where we have already granted so many additional clerks that for one I do not see what the Commissioner of Patents is going to do with them.

Mr. MANN. I have not talked with the Commissioner of Patents about this bill, but I know a great many patent lawyers in Chicago, where a great deal of patent business is transacted, have frequently complained to me that they were delayed unduly in obtaining copies of patents which they had to have in their litigation, and that occasionally, at least, it required the postponement of litigation which was ready to be disposed of. I do not think that ought to occur.

Mr. MADDEN. I think that in any ordinary business we would do just exactly what this bill proposes to do. We would give to the man in charge of the office the facilities to keep his business up current. And inasmuch as only $2.50 is paid for any person who is employed for every $8 that is received, it seems to me that it is a good business transaction if nothing else, to say nothing at all of the importance and propriety of giving to the people who are interested in the work prompt service.

Mr. SISSON. They are making a little profit out of this work now.

Mr. MADDEN. They always will.

Mr. SISSON. This bill provides that they may employ this temporary service, provided that it does not exceed the return on the sale of these copies—that is, the fees for copies. The result of it is that if you furnish these clerks to the departments then the other clerks will be doing other work, and you simply put more clerks there than are needed, and in that way they will be able to eat up under this bill all the profits that may come to the Government under the present system.

Mr. MADDEN. But they pay them by the folio, do they not?

Mr. SISSON. Not these per diem clerks. Now, they do not pay anything for regular clerks. Where the regular clerks down there copy it is a part of the overhead charge of running the office, which is constant.

Mr. HAMLIN. Here is a limitation which I think the gentleman overlooks in the bill. The commissioner is not authorized to employ these temporary clerks unless it is necessary to keep current the work.

Mr. SISSON. That will always be necessary in all the departments of this Government, and there never will be a time, until you change the system, when that will not be the case. And if you observe closely these departments, you will find, as we all find, that that is true. And the gentleman from Illinois [Mr. MADDEN] has served on the committee, and he will not deny that statement.

Mr. MADDEN. That is true.

Mr. HAMLIN. I think we have to trust executive officers.

Mr. SISSON. I do not know who has the floor, but I am going to object to this bill, anyway.

Mr. MORRISON. I would like the gentleman from Mississippi to withhold his objection until I tell the House the facts, which I think I can do in three minutes.

Mr. SISSON. Very well.

Mr. MORRISON. The fact is that there is no working force in the Patent Office available to furnish these certified copies. The fact is that the litigants of the country from time to time are required to have certified copies. Frequently they must have them within a few days of the time when the order is given.

Mr. GOOD. Where does the litigant get the copies under the present law?

Mr. MORRISON. In some cases he does not get them. In some cases he sends a clerk from his own office to get them, and has them certified after the clerk has made them, and pays the office for the work that his own clerk has done. In other cases he gets a postponement of the trial of the case to some time in the future.

Mr. GOOD. Under the present law the commissioner does not hire people to have these copies made and sent out, does he?

Mr. MORRISON. Under the present law he has no authority to hire persons not regularly on the force to do this work.

Mr. GOOD. No; but he is doing that with his regular force, is he not?

Mr. MORRISON. Yes; when he can, but it frequently happens that it can not be done within five or six or seven weeks after the order is given, and in such instances the litigant must either get the case continued or send his own clerk and have him do the work and get the office to certify the work of his own clerk.

Mr. SISSON. Mr. Chairman, will the gentleman yield?

Mr. MORRISON. Yes.

Mr. SISSON. Does the gentleman understand that the legislative bill, the conference report on which has just passed the House and been sent to the President, gives the commissioner nearly $70,000 additional to what he had last year? That is in the present bill.

Mr. MORRISON. I do not recall, even if I remembered the amount given; but not one dollar of that is available for this work.

Mr. SISSON. We anticipated in the committee the very bill which was reported by the gentleman's committee reorganizing the Patent Office. We had come before us in the committee the Commissioner of Patents and the chief clerk, and we had hearings as to what would be needed to carry out the law which you gentlemen recommended to Congress and which passed the House. Now, in carrying out that law we added $67,000 to that bill with the idea that all this work that he has been claiming he had to detail his clerks to do would be done and taken care of with regular clerks, by lower grades of clerks under the civil service, and that there would then be a great profit to the Government in this business. But if you will permit him, as he is permitted under this bill, to permit all that force which is given to be performing various and sundry and other duties, perhaps unnecessary, Congress loses the absolute control of the duties which these permanent clerks may perform, because he will then do all this work with this special $2.50 per day man. In order that Congress may control what these clerks are doing the committee gave him

$67,000 worth of clerks in the places where he said they were needed. I do not think the gentleman's committee were aware of the fact when they reported this bill.

Mr. MORRISON. The committee were aware of all these facts, and still believe that it is a bad thing for the litigants of the country for Congress to refuse this appropriation.

Mr. SISSON. Does the gentleman know how many copyists there are there?

Mr. MORRISON. No; I can not tell the gentleman.

Mr. SISSON. There are 140 copyists there now; what we have given.

Mr. MORRISON. The Patent Office is underofficered and has fewer employees than are needed to give the people of the country the value of their money.

Mr. SISSON. Then I will ask the gentleman what on earth the commissioner can do with 140 copyists? He can have 140 days' work done in one day. Some of these copies that the gentleman refers to include only one typewritten page. The average would not include more than two or three pages to be copied. A great deal of this stuff is in forms printed with cuts. All you have to do is to make that a part of the record and certify to that. All that has been provided for, and the Commissioner of Patents is to be congratulated, as I understand, because he has endeavored to reduce that work to a minimum. Now we have given him 140 copyists. Perhaps he does not like to turn into the Treasury one dollar earned from the work of his office.

Mr. MORRISON. The filing of a claim for a patent and the proceedings thereunder sometimes runs into hundreds of pages. The Patent Office issues a completed patent once in every six minutes of the working time of the employees of that office, and the man who knows that and knows the volume of work that may be entailed by a single application will know what they do with the employees of that office.

The SPEAKER. Is there objection?

Mr. SISSON. I object, Mr. Speaker.

The SPEAKER. The gentleman objects, and the bill is stricken from the calendar.

DISTRICT COURT AT WINCHESTER, TENN.

The SPEAKER. The Clerk will report the next bill.

The next business on the Calendar for Unanimous Consent was the bill (S. 377) providing for the establishment of a term of the district court for the middle district of Tennessee at Winchester, Tenn.

The title of the bill was read.

Mr. WEBB. Mr. Speaker, I ask that this bill be considered in the House as in Committee of the Whole. It is on the Union Calendar.

The SPEAKER. You have not got permission to consider it at all yet. Is there objection to the present consideration of the bill?

Mr. MANN. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman how much business is likely to be transacted at this new location?

Mr. WEBB. I yield to my friend from Tennessee [Mr. MOON] to answer that question. The report sets out those facts.

Mr. MOON. A very large amount of business is done in the middle district of Tennessee at Nashville. We have two Federal courts in Tennessee, one in the eastern and middle districts of Tennessee and one in the western district of Tennessee. There are two Federal judges. One judge has perhaps two-thirds of all the business in the State—the judge presiding in the eastern and middle divisions of Tennessee.

In east Tennessee court is held at three places, and in middle Tennessee there is one at Nashville and one at Cookeville. It is desired by the lawyers who live at the southern end of the middle district of Tennessee, close to the Alabama line, that a term of court be held in Winchester. Winchester is half way between Chattanooga and Nashville, the distance being 156 miles. The lawyers living east of Winchester, within 25 miles of Chattanooga, are obliged to go to Nashville to attend court, so they have to travel 125 or 130 miles there. The judge sits half the year at Nashville. Winchester is in a very large county—Franklin County—which has much Federal business. Of course I can not tell the number of cases.

Mr. MANN. That is what I want to inquire. The report says there will be a great saving to the people of Franklin County. How much Federal business is there in Franklin County?

Mr. MOON. I am not able to tell the gentleman the number of cases; I should suppose 40 or 50 cases in Franklin County.

Mr. MANN. In view of the statement in the report I think somebody ought to be able to tell.

Mr. MOON. I wrote for a report of the number of cases, but have not received it. Now, the point is this: It will be a great convenience, not only to the litigants and in the saving of the trips of witnesses to Nashville but to the bar of that section of the State, for the judge to hold two terms of court there. I am advised that he has no objection to it, and there will be little or no expense to the Government. If it were necessary to put up a Federal court building at Winchester or to rent quarters for the Federal court there, some question of economy might be involved, but we have a new Federal building there in which we have a Federal court room already.

Mr. MANN. I want to know how you got a Federal court room and a Federal building in a city where there is no authorization to hold a Federal court?

Mr. MOON. I can tell the gentleman very easily how it happened.

Mr. MANN. I know it is a secret that other Members of the House would like to obtain.

Mr. MOON. An appropriation was made for a post-office building, and one large room was set aside for Federal purposes, and could be used for any Federal purpose. The post office does not need specially that room in the building, and it is there, available for use by the Federal judge.

Mr. MANN. What was the occasion for Congress and the department constructing a building and putting in rooms which the Government did not need?

Mr. MOON. Of course, the gentleman understands that the building was not put up for a Federal court room, but there is that space which is not needed for post-office purposes which can be used for a court room.

Mr. MANN. All I know, except what the gentleman says, is the statement in the report:

> It has a new Federal building in which there is room provided for holding court.

Mr. MOON. That simply means that there is a room there which can be utilized for that purpose. I do not mean to say that the law has already directed it to be held there at all.

Mr. MANN. I understand the gentleman to say that the Supervising Architect has provided a room there for which there is no use now.

Mr. MOON. No; he has provided a room which can be utilized for holding court and which is not used for any purpose now.

Mr. MANN. For which there is no use now?

Mr. MOON. There is not, of course, except for that purpose.

Mr. MANN. Of course, that is an extra expense.

Mr. MOON. If the gentleman wants to know about the facts, there is nothing to be concealed. The appropriation for this building was $55,000, and it was requested by the people of Winchester, when that building was put up, that space be given in the upper part of it for the purpose of holding a court, so that if eventually we could get it there that might be done. Now, there is no expenditure outside of the appropriation of $55,000.

Mr. MANN. I will say this, that the people of Winchester are very forehanded, and that is more than can be said of the Supervising Architect's Office, which was not economical.

Mr. MOON. Oh, well, $55,000 is the amount they put in all these buildings. If the gentleman has had any experience with one of these smaller buildings, he knows that if the contractor's bid is $45,000 and the appropriation is $55,000, the Government will force you to use the other $10,000 on the building in some way.

Mr. MANN. Well, we would not. Let me ask the gentleman another question. There is no provision in this bill that I think it is customary to have in some bills in reference to a deputy clerk or marshal.

Mr. MOON. That is not necessary. The marshal, of course, has his deputies, and the clerk can go to Winchester. I think the only expense that will possibly be attached under present conditions to the holding of this court at Winchester will be the purchase of the dockets, and possibly a few tables and chairs for that room.

Mr. MANN. We pay the judge $10 a day while he is holding court.

Mr. MOON. Yes; we pay him that, wherever he is.

Mr. MANN. Oh, no.

Mr. MOON. He is paid that wherever he is in the middle division of Tennessee.

Mr. MANN. We do not pay him that when he is at home.

Mr. MOON. He is not at home except in Knoxville, in east Tennessee, so anywhere he holds court in middle Tennessee he gets the allowance.

Mr. MANN. At how many places are Federal courts now held in Tennessee?

Mr. MOON. They are held in Knoxville, Chattanooga, and Greeneville, in the eastern division, which is smaller than the middle division, and they are held at Nashville and Cookeville, in the middle division, and now we want this one at Winchester to accommodate the people in the lower end or southern part of middle Tennessee. Then court is also held at Jackson, in west Tennessee, and Memphis, in west Tennessee. There are two judges for the State of Tennessee.

Mr. GREEN of Iowa. Will the gentleman yield further?

Mr. MOON. Yes.

Mr. GREEN of Iowa. Are there jury rooms and the marshal's room and a room for the clerk at Winchester?

Mr. MOON. No.

Mr. MANN. There soon will be an addition.

Mr. MOON. It is not the purpose to hold criminal courts there. The main docket that will be disposed of there will be the equity docket. It is purely for the convenience of lawyers and the judge. Now, we hold a court under exactly similar circumstances. We have a room provided in the post-office building. As a matter of course, if you are going to have a Federal building and maintain three or four terms a year you might want these extra rooms, but here is a term once a year, purely for the accommodation of the judge and the lawyers. As to the convenience of jury rooms, that is altogether available, because we have a fine public building—a courthouse—in less than 200 feet of this new building, which can be used if needed.

Mr. GREEN of Iowa. Does the gentleman think that they will be contented with that very long, and that they will not be in here asking for an appropriation to enlarge that building to provide these additional rooms?

Mr. MOON. Oh, no; I think not. In Greeneville they have been holding court for a number of years, and they have been contented.

Mr. GREEN of Iowa. What is the population of Winchester?

Mr. MOON. The population of the county is about 30,000 to 40,000.

Mr. GREEN of Iowa. Will it be for the convenience of any of the other counties?

Mr. MOON. Grundy County that adjoins is a mountainous county, and there are tens of thousands of acres of land in litigation between the citizens of Tennessee and nonresidents, and it will be a great convenience to the people of that county, and I have no doubt four or five additional counties. It will be observed that there is no separate division made. This is merely a provision that allows the court to be held in another place, in an already legally established court division of the State. I hope there will be no objection.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I think the gentleman ought to get some information definitely before this bill passes.

Mr. MOON. I hope the gentleman will not object. He voted for the passage of a bill for Cookeville and Greeneville.

Mr. MANN. Unless the gentleman asks to have it passed over at this time in order to get the information about the litigation that will be taken care of, I shall object.

Mr. MOON. This county has one-third of the litigation of middle Tennessee.

Mr. MANN. It is easy to ascertain the amount of litigation pending and what will be taken care of by this district, and this information has not been obtained.

Mr. MOON. I will say that that has been written for but it has not been sent. I do not think it is very material, and the gentleman can take the statement of his colleague as to what is to be done.

Mr. MANN. But he does not know.

Mr. MOON. He does know.

Mr. MANN. How much is the litigation that is pending there now?

Mr. MOON. I am not able to tell just what the litigation in middle Tennessee is, but much of it comes from Franklin County.

Mr. MANN. I do not think we ought to take up the time of the House any longer, and unless the gentleman asks to have it postponed I shall object.

Mr. MOON. Well, the gentleman can object.

The SPEAKER. Is there objection?

Mr. MANN. I object.

Mr. WEBB. Mr. Speaker, I ask unanimous consent that the bill be passed without prejudice.

Mr. MANN. It is too late, the bill is off the calendar.

Mr. MOON. Yes; it is too late, and the gentleman will pay one hundred times for his objection.

Mr. MANN. I am willing to pay a thousand times.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that the bill be passed without prejudice.

Mr. MANN. I object, and I objected before.

The SPEAKER. The bill will go off the calendar.

### BRIDGE ACROSS ST. LOUIS RIVER BETWEEN MINNESOTA AND WISCONSIN.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 3032) authorizing the county of St. Louis to construct a bridge across the St. Louis River between Minnesota and Wisconsin.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the county of St. Louis, in the State of Minnesota, a municipal corporation organized and existing under and pursuant to the laws of the State of Minnesota, to build, maintain, and operate a bridge across the St. Louis River, at a point suitable to the interests of navigation, between the State of Minnesota and the State of Wisconsin, commencing at or near the intersection of Cherokee Street and One hundred and thirty-fifth Avenue west, in the city of Duluth, Minn., at the suburban village known as Fond du Lac, thence crossing the St. Louis River in a line at right angles to the channel of said river to a point on the Wisconsin shore about 100 feet westerly from the mouth of Dubray Creek, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. MILLER of Minnesota. Mr. Speaker, I ask unanimous consent that I may proceed for three minutes in relation to a bill on the Unanimous Consent Calendar.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to proceed for three minutes with reference to a bill on the calendar. Is there objection?

Mr. MOON. I object.

### STATUE OF JAMES BUCHANAN.

The next business on the Calendar for Unanimous Consent was the joint resolution (H. J. Res. 145) authorizing the erection on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, let the bill be reported.

The Clerk read as follows:

*Resolved, etc.*, That the Chief of Engineers, United States Army, be, and he is hereby, authorized and directed to grant permission to the trustees designated in the will of Mrs. Harriet Lane Johnston for the erection of a memorial to James Buchanan, a former President of the United States, on public grounds of the United States in the city of Washington, D. C., in the southern portion of Meridian Hill Park, between Fifteenth, Sixteenth, W, and Euclid Streets NW.: *Provided*, That the design and location of said memorial and the plan for the treatment of the grounds connected with its site shall be approved by the Commission of Fine Arts, and that the United State shall be put to no expense in or by the erection of said memorial.

With the following committee amendment:

After the word "Columbia," in line 9, page 1, of the resolution, strike out all the words following down to and including the word "northwest," in line 11.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I see that the committee recommends an amendment to strike out the location of this monument. I would like to know where it is to be located.

Mr. SLAYDEN. I will say to the gentleman that that was stricken out because the committee did not feel that the committee or the author of the bill should select the site, and the whole matter is in abeyance awaiting consultation of the Fine Arts Commission, consisting of sundry gentlemen whom the gentleman from Illinois knows and Col. Harts, the secretary of the commission. The matter has not yet been determined, and, so far as I know, the site has not been tentatively selected. The gentleman from Maryland [Mr. LINTHICUM] says it has. I will yield to him.

Mr. LINTHICUM. They have tentatively agreed on a site. I was in conference with Col. Harts yesterday in selecting the Fort McHenry monument at Baltimore, and had a long conversation about this Buchanan monument. He says that the Fine Arts Commission have practically decided to locate it in Meridian Hill Park; that there is to be a large court with an octagonal basin of water in front, and back of this, as a commanding figure, is to be the statue. Then there is to be another line of treatment of the park, all to meet at a central point. This is entirely in accord with the desires of the Fine Arts Commission. They have practically passed upon the statue, with the exception of a few minor changes. The location is well suited and

quite satisfactory, and is in Meridian Hill Park. Col. Harts says that they hope to get busy very shortly.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. LINTHICUM. Yes.

Mr. MILLER of Minnesota. I understand the gentleman to state that the Fine Arts Commission is in favor of this statue.

Mr. LINTHICUM. Yes; and they are in favor of placing it in Meridian Hill Park. I was informed by one of the sculptors, acting as a juror on the Fort McHenry monument, that they have practically decided on the statue executed by Bergé, of Baltimore, which is said to be most appropriate.

Mr. MILLER of Minnesota. I presume it is the desire of the gentleman's committee to erect statues in the Capital City to the great men of the Nation. Can the gentleman from Maryland point out just what claims James Buchanan had for such distinction?

Mr. LINTHICUM. The gentleman from Maryland will not attempt to add to the historical knowledge of the gentleman from Minnesota. Knowing the gentleman so well, it would be useless to call his closer attention to the history and life of Buchanan—lawyer, Congressman, ambassador, and President of the United States.

Mr. MILLER of Minnesota. I wanted to give the gentleman from Maryland a chance to make a speech.

Mr. LINTHICUM. I am not desirous of making a speech. My desire is to pass this resolution.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. LINTHICUM. Yes.

Mr. MOORE of Pennsylvania. James Buchanan was a President of the United States, I will say to the gentleman from Minnesota. And he hailed from Pennsylvania. He was the only Pennsylvania President that we ever had. Some day we will have another, and then we will ask for another monument. I would say further to the gentleman from Minnesota [Mr. MILLER] that Mr. Buchanan was President in a very trying time, when the Union was threatened, and while he was the subject of a very great deal of criticism, he was regarded as one of the very ablest lawyers and statesmen of his day.

Mr. SLAYDEN. And he was also minister to some of the European countries.

Mr. MOORE of Pennsylvania. He had had a very unusual career. He never married. That was one of his failings.

Mr. MILLER of Minnesota. Would it not be more appropriate, then, to erect a monument to the Nation's great who have never married and not specify any particular man?

Mr. MOORE of Pennsylvania. James Buchanan was born in Pennsylvania, and he ought to be given credit for that.

Mr. MILLER of Minnesota. I admit that is a distinction that he could not live down.

Mr. MOORE of Pennsylvania. And he died in Pennsylvania and is buried there. In his earlier career he was a Member of Congress.

Mr. MILLER of Minnesota. Is that on the debit or the credit side of his account?

Mr. MOORE of Pennsylvania. And his name will be found in the archives, where the name of the gentleman from Minnesota will be found some day—not sooner, but later. He was ambassador to Russia and subsequently to the Court of St. James. He was United States Senator and Attorney General of the United States before he was President, and his record was about as strong as that of any man, so far as his serviceability as a citizen is concerned. He was, as I say, President at a time when the Union was in the throes of a very great disturbance, and as the result of his attitude on public questions at that time he was very much criticized, but he was President of the United States, and criticism of a President is not unusual.

Mr. COOPER of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. MOORE of Pennsylvania. If I may be permitted to do so.

Mr. COOPER of Wisconsin. Speaking of Mr. Buchanan being a great man, a distinguished Pennsylvanian has suggested to me that quite recently he read an authority which said that Pennsylvania had produced but two really great men. One was Benjamin Franklin, of Massachusetts, and the other was Albert Gallatin, of Switzerland. [Laughter.]

Mr. MANN. And I might add for the benefit of the gentleman from Pennsylvania that that statement is quoted from a speech recently made by the President of the United States to which I listened, but he added the name of a third man, of whom I had never heard before or since.

Mr. MOORE of Pennsylvania. I do not care to mention that third name now. [Laughter.] I was about to inform the gentleman from Wisconsin that while he has discovered that Franklin was a Pennsylvanian, and Gallatin also, there are others. Pennsylvania's illustrious men are so numerous that I would not undertake to mention them at this time.

Mr. MILLER of Minnesota. Mr. Speaker, if we are going to erect a statue to a Pennsylvanian who really created something of permanent value and benefit to the people, does the gentleman not think that a statue erected to the memory of James Wilson would be very appropriate? He probably was the most potent influence in the framing of our Constitution.

Mr. MOORE of Pennsylvania. That is very true, and we honor him very much in our State, and people from other States honor him likewise. It is quite unnecessary to say that if we undertook to call the roll of great men who have come from Philadelphia, who started this Nation from that city, it would take more time than the Speaker would permit us to use for the purpose.

Mr. SLOAN. Mr. Speaker, will the gentleman yield?

Mr. DAVENPORT. Mr. Speaker, will the gentleman yield?

The SPEAKER. To whom does the gentleman yield?

Mr. MOORE of Pennsylvania. I yield to my friend from Nebraska to say that his forbears came from Pennsylvania and that we are proud of the fact.

Mr. SLOAN. The gentleman was naming the eminent natives and citizens of Pennsylvania and among others mentioned Benjamin Franklin and Albert Gallatin, but there is MOORE, I understand. [Laughter.]

Mr. MOORE of Pennsylvania. Oh, yes; but I did not want to mention that.

Mr. DAVIS of Texas rose.

Mr. MOORE of Pennsylvania. Mr. Speaker, it might be interesting to my friend from Texas to know that Daniel Boone also came out of Pennsylvania.

Mr. DAVIS of Texas. I want to suggest that my recollection is that the man who rang the Liberty Bell was a Pennsylvanian.

Mr. GREENE of Vermont. Oh, they always have a lot of old ringers in that State. [Laughter.]

Mr. MOORE of Pennsylvania. In addition to the Liberty Bell I might remind the gentleman that we also contributed the Declaration of Independence and the Constitution.

Mr. MANN. Mr. Speaker, while I am perfectly willing and desirous that as to any of these statues or monuments the Fine Arts Commission should be consulted and that we should not act contrary to their recommendations, yet I am certainly not willing, so far as I am concerned, by unanimous consent, to eliminate the Congress from any consideration in the choice of a place for the erection of any statue anywhere in the District of Columbia. I think the recommendation of the place of erection should be made so that we can approve when we pass the bill.

The Fine Arts Commission under this bill, if passed as recommended by the committee, might erect this statue on the White House Lot, the Washington Monument Lot, in the Potomac Park, in Rock Creek Park, in Meridian Hill Park, or anywhere else. They might erect it down here in front of the Post Office Building or in front of the White House. We ought to have something to say about where these things are to be erected, and unless we can, none of these bills will pass by unanimous consent, and I object until we get that information.

The SPEAKER. The gentleman from Illinois objects.

Mr. LINTHICUM. Will the gentleman withhold his objection for a moment?

The SPEAKER. And the resolution is stricken from the calendar.

Mr. MANN. I am willing that it should be passed over without prejudice.

Mr. LINTHICUM. Mr. Speaker, I ask the gentleman to withhold his objection for a moment to say that this monument and its location have been definitely decided upon for the southern part of Meridian Hill Park, and it was so included in my bill. But the gentlemen of the committee having charge of the bill thought we had better leave the matter entirely in the hands of the Fine Arts Commission. I thought that was the general practice, but if the gentleman objects to it in this shape, I will ask him to withhold his objection and let the resolution be passed without prejudice.

Mr. MANN. Ask that it be passed over.

The SPEAKER. The gentleman from Maryland asks unanimous consent that the resolution be passed without prejudice. Is there objection? [After a pause.] The Chair hears none.

### CONCURRENT JURISDICTION IN REFERENCE TO FISH IN THE COLUMBIA RIVER.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 6097) to ratify the contract and agreement between the States of Oregon and Washington regarding concurrent jurisdiction over the waters of the Columbia

River and its tributaries in connection with regulating, protecting, and preserving fish.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MOON. Mr. Speaker, I object.

Mr. GANDY. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. GANDY. I rise to ask unanimous consent to return to the bill H. R. 10668 for the purpose of making a correction.

The SPEAKER. As soon as we get through with this bill. Does the gentleman object?

Mr. MOON. Mr. Speaker, I object, and was on my feet when I did so.

The SPEAKER. The gentleman from Tennessee objects.

Mr. HAWLEY. Mr. Speaker, will the gentleman from Tennessee withhold his objection?

Mr. MOON. No, sir.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent that this bill be passed without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

Mr. MOON. Mr. Speaker, I object.

The SPEAKER. The bill is ordered stricken from the calendar.

FOREST HOMESTEAD ACT.

Mr. GANDY. Mr. Speaker, I ask unanimous consent to return to the bill (H. R. 10668) for the purpose of making a correction.

The SPEAKER. What is the calendar number?

Mr. MANN. Unanimous Consent Calendar No. 94.

The SPEAKER. Is there objection to the request of the gentleman to return to the bill mentioned?

Mr. MANN. Mr. Speaker, I reserve the right to object until I can hear the gentleman.

Mr. GANDY. Mr. Speaker, in line 2, page 2, the amendment recommended by the committee read, "A national forest," and, on the suggestion of the gentleman from Illinois [Mr. MANN], that was changed to "the national forest." I will say there are two forests, and I now ask unanimous consent to strike out the word "the" and make the word "forest" in the plural.

Mr. MANN. What are those forests?

Mr. GANDY. Harney, on the south side of what is known as the Base Line, and the Black Hills National Forest, on the north side, within those two counties.

Mr. MANN. Will the gentleman please make that request a little later, after I have looked this over? I had looked the matter over very carefully before.

Mr. GANDY. I did not understand when.

Mr. MANN. Give me a little chance to look it over again.

Mr. GANDY. All right.

INVESTIGATION OF AVIATION SERVICE IN THE UNITED STATES ARMY.

The next business in order on the Calendar for Unanimous Consent was the joint resolution (S. J. Res. 65) creating a joint commission of Congress to be known as the joint commission of Congress to investigate the aviation service of the United States Army.

The Clerk read the title.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I will leave the objection to the gentleman from Tennessee——

Mr. MOON. Mr. Speaker, I do not know why the gentleman from Illinois should have made such a gratuitous remark.

Mr. MANN. It was not gratuitous.

Mr. MOON. I have no partnership with him on the subject of objections.

Mr. MANN. It was the action of the gentleman in objecting and his attitude.

Mr. MOON. The gentleman has very little sense, then, in judging a man's attitude.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, what is the necessity or occasion for the passage of this resolution now? Has not the aviation service been reorganized by the Secretary of War?

Mr. CALDWELL. Well, the gentleman will understand that aviation was started in America; that it is commonly understood——

Mr. MANN. Oh, I was here when it started, and helped to start it and put it in the Army.

Mr. CALDWELL. If the gentleman will allow me, I will answer him.

Mr. MANN. But what has all this got to do with this question?

Mr. CALDWELL. If the gentleman will wait a minute I will state, and if he will listen he will learn something. There are men in the world who learn as they grow older.

Mr. MANN. The gentleman from Tennessee does not.

Mr. CALDWELL. Neither does the gentleman from Illinois, apparently. I have endeavored to be as courteous as I possibly can.

Mr. MANN. The courtesy is not too great.

Mr. CALDWELL. I understand that; but it is because the gentleman will not permit it, that is all. Now, as I was saying, aviation started in America. We find ourselves to-day the last in aviation service of all the great powers in the world. The object of this resolution is to get the necessary information for the purpose of framing a law that will put America in the forefront in the matter of aviation. There was, of course, at the time this resolution was first offered, a deplorable condition existing in the aviation service. That condition has been, to some extent, rectified, but at the same time there is no law pending before this Congress, and the Military Committees of both Houses do not feel they are in this position to frame the proper kind of a bill until we know more about conditions. We know men who have appeared before those committees have not been able to give the information that was required. We know men came here who are heads of the service, but who were unable to answer the questions and were compelled to rely upon the people who are their subordinates, and they have proven inefficient. We want this for the purpose of having a law that will protect America in the air as well as she is protected on the land and in the sea.

Now, it is my purpose to offer an amendment to this bill, if we get consent to the consideration of it, to change the time of reporting from July 1 to December 1, in order that a thorough examination of this situation can be undertaken. And I will say to the gentleman that this resolution has been considered by the Committee on Military Affairs in the House and has been unanimously reported, and I have been directed to press it here if possible.

Mr. MANN. Has the gentleman finished?

Mr. CALDWELL. Yes, sir; I have finished.

Mr. MANN. Mr. Speaker, the report in this case, favorably reporting the joint resolution, says:

> The committee has had under consideration the evidence on file and the statements submitted by Senator ROBINSON, the author of the joint resolution, to the Senate Committee on Military Affairs, as embodied in Senate Report No. 153.

Mr. MOON. Mr. Speaker, of course everybody understands that the gentleman from Illinois [Mr. MANN] is just trying to take up the time in casting out his insinuations and remarks against gentlemen here who had nothing to say about it. I do not want to take any more time on this matter, and I am going to object right now.

Mr. CALDWELL. I hope the gentleman will withdraw his objection.

The SPEAKER. The gentleman from Tennessee has objected.

Mr. MOON. I give notice right now, that if a bill with the merit in it that the bill possessed which I presented a while ago can not receive consideration under unanimous consent there is no bill on this calendar that will.

Mr. CALDWELL. Mr. Speaker, I ask unanimous consent that this bill retain its place on the calendar without prejudice.

The SPEAKER. The gentleman from New York asks unanimous consent that this bill be passed without prejudice. Is there objection?

There was no objection.

HEROES OF THE TITANIC.

The next business on the Calendar for Unanimous Consent was the House joint resolution 104, granting permission to the Woman's Titanic Memorial Association to erect a memorial on public ground in the city of Washington, D. C.

The SPEAKER. Is there objection to the consideration of the resolution?

Mr. KAHN. Mr. Speaker, I ask unanimous consent that the resolution remain on the calendar and be passed without prejudice.

The SPEAKER. Is there objection?

Mr. HUDDLESTON. Mr. Speaker, I object.

The SPEAKER. The gentleman objects, and the resolution is stricken from the calendar. The Clerk will report the next bill.

FEDERAL RESERVE ACT.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13391) to amend the act approved December 23, 1913, known as the Federal reserve act, by adding a new section.

The SPEAKER. Is there objection?

Mr. BENNET. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. BENNET. In order to stop the slaughter of the innocents, I move that the House do now adjourn.

The SPEAKER. The gentleman from New York moves that the House do now adjourn.

The question was taken, and the motion was rejected.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 13391) to amend the act approved December 23, 1913, known as the Federal reserve act, by adding a new section.

*Be it enacted, etc.*, That the act approved December 23, 1913, known as the Federal reserve act, be amended by adding thereto a new section, as follows:

"SEC. 25a. Any national bank possessing a capital and surplus of $1,000,000 or more may purchase and hold stock in foreign or domestic corporations, other than national banks, which are authorized by their charter to do a banking business in foreign countries: *Provided, however*, That the aggregate amount of stock so held by any one national bank shall not exceed 10 per cent of the capital and surplus of the bank: *And provided further*, That before any such national bank shall purchase stock in any such corporation it shall file with the Federal Reserve Board a copy of the charter or articles of incorporation of such association and shall agree to be bound by such special regulations or restrictions regarding its business with, and relations to, such corporation as may be prescribed by the Federal Reserve Board: *And provided further*, That before any national bank shall be permitted to purchase stock in any such corporation, the said corporation shall enter into an agreement or undertaking with the Federal Reserve Board to restrict its operations or conduct its business in such manner or under such limitations and restrictions as the said board may by regulations provide. If at any time the Federal Reserve Board shall ascertain that the said restrictions or limitations prescribed by it are not being complied with by such corporation or by any national bank holding stock therein, said board shall be authorized and shall have power to institute an investigation of the matter and to send for persons and papers, subpœna witnesses and administer oaths, in order to satisfy itself as to the actual nature of the transactions referred to. Should such investigation result in establishing the failure of the corporation in question, or of the national bank or banks which may be stockholders therein, to comply with the regulations laid down by the said Federal Reserve Board, such national banks may be required to dispose of stockholdings in the said corporation upon 30 days' notice, and in the event of their noncompliance with such order the Federal Reserve Board shall request the Comptroller of the Currency to institute proceedings for forfeiture of charter.

"Any national banking association located in a city or incorporated town of more than 100,000 inhabitants and possessing a capital and surplus of $1,000,000 or more may, under such rules and regulations as the Federal Reserve Board may prescribe, establish branches within the corporate limits of the city or town in which it is located.

"Any national banking association located in any other place may, with the approval of the Federal Reserve Board, and under such rules and regulations as such board may prescribe, establish branches with the limits of the county in which it is located, provided that no such branch shall be established unless the capital of the parent bank is at least equal to the aggregate of the amounts which would be required of each branch, under the provisions of section 5138, Revised Statutes, if it were organized as an independent association, together with the amount required of the parent bank itself by that section."

Also the following committee amendments were read:

On page 1, line 10, strike out the colon after word "countries" and insert after the word "countries," in line 10, the word "exclusively," followed by a colon.

On page 2, line 4, strike out the word "special."

On page 2, line 7, strike out the colon after the word "Board" and insert a comma, and insert after the word "Board," in line 7, the following: "and the said board is hereby empowered and directed to make regulations for the conduct of such foreign business for each foreign country where such business is to be conducted," to be followed by a colon.

On page 2, line 13, strike out the words "be regulations."

On page 2, line 13, strike out, after the word "provide," the period and insert the following: "for the foreign country wherein such business is to be conducted."

On page 2, line 15, strike out the word "limitations" and insert in lieu thereof the word "regulations."

On page 3, lines 3 and 4, strike out the words "shall request" and insert in lieu thereof the words "may direct."

On page 3, strike out all of lines 13 to 24, inclusive.

The SPEAKER. Is there objection?

Mr. MOON. Mr. Speaker, I object.

Mr. GLASS. Mr. Speaker, I move to suspend the rules and pass the bill.

Mr. FINLEY. Mr. Speaker, it is not in order to suspend the rules now according to the usual practice here?

The SPEAKER. It is an unusual situation.

Mr. FINLEY. It has not been the practice.

The SPEAKER. The Chair understands that.

Mr. MANN. Did not the bill pass the point of consideration?

The SPEAKER. No.

Mr. MANN. I thought it did.

Mr. GLASS. Mr. Speaker, I move to suspend the rules and consider the bill H. R. 13391.

Mr. MANN. The gentleman will have to make his motion to pass the bill in a certain way.

Mr. GLASS. And pass the bill with the committee amendments and with the further amendment that I send to the Clerk's desk.

The SPEAKER. The gentleman from Virginia moves to suspend the rules and pass the bill, which the Clerk will report. The Clerk will read the amendment into the bill.

Mr. MANN. That is to take something out of the bill?

Mr. GLASS. Yes; it is to strike out.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] had best pay close attention to the reading of this, so as to get the amendment where he wishes it, because he can not amend.

Mr. GLASS. It is a very simple amendment, Mr. Speaker.

The SPEAKER. The Chair suggests to the gentleman from Virginia that the gentleman knows more about his bill than anybody else does, and if he gives close heed to the reading he will get it the way he wants it.

The Clerk read as follows:

*Be it enacted, etc.*, That the act approved December 23, 1913, known as the Federal reserve act, be amended by adding thereto a new section, as follows:

"SEC. 25a. Any national bank possessing a capital and surplus of $1,000,000 or more may purchase and hold stock in foreign or domestic corporations, other than national banks, which are authorized by their charter to do a banking business in foreign countries exclusively: *Provided, however*, That the aggregate amount of stock so held by any one national bank shall not exceed 10 per cent of the capital and surplus of the bank: *And provided further*, That before any such national bank shall purchase stock in any such corporation it shall file with the Federal Reserve Board a copy of the charter or articles of incorporation of such association and shall agree to be bound by such regulations or restrictions regarding its business with, and relations to, such corporation as may be prescribed by the Federal Reserve Board and the said board is hereby empowered and directed to make regulations for the conduct of such foreign business for each foreign country where such business is to be conducted: *And provided further*, That before any national bank shall be permitted to purchase stock in any such corporation, the said corporation shall enter into an agreement or undertaking with the Federal Reserve Board to restrict its operations or conduct its business in such manner or under such limitations and restrictions as the said board may provide for the foreign country wherein such business is to be conducted. If at any time the Federal Reserve Board shall ascertain that the said restrictions or regulations prescribed by it are not being complied with by such corporation or by any national bank holding stock therein, said board shall be authorized and shall have power to institute an investigation of the matter and to send for persons and papers, subpœna witnesses and administer oaths, in order to satisfy itself as to the actual nature of the transactions referred to. Should such investigation result in establishing the failure of the corporation in question, or of the national bank or banks which may be stockholders therein, to comply with the regulations laid down by the said Federal Reserve Board, such national banks may be required to dispose of stockholdings in the said corporation upon 30 days' notice, and in the event of their noncompliance with such order the Federal Reserve Board may direct the Comptroller of the Currency to institute proceedings for forfeiture of charter."

The SPEAKER. Is a second demanded?

Mr. MADDEN. I demand a second, Mr. Speaker.

Mr. GLASS. I ask unanimous consent, Mr. Speaker, that a second be considered as ordered.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] has 20 minutes, and the gentleman from Illinois [Mr. MADDEN] has 20.

Mr. GLASS. Mr. Speaker, I shall require only a moment or two to explain the provisions of this bill.

Mr. MOON. Mr. Speaker, I make the point that there is no quorum in this House.

The SPEAKER. The gentleman from Tennessee makes the point that there is no quorum present, and evidently there is not.

Mr. GLASS. I move a call of the House, Mr. Speaker.

The SPEAKER. The gentleman from Virginia moves a call of the House.

A call of the House was ordered.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

| | | | |
|---|---|---|---|
| Adair | Collier | Gard | Jones |
| Aiken | Conry | Gardner | Keister |
| Anderson | Copley | Garland | Kent |
| Austin | Costello | Godwin, N. C. | Kiess, Pa |

| Overmyer | Sanford | Sparkman | Wilson, Fla. |
| Paige, Mass. | Saunders | Steele, Iowa | Wilson, Ill. |
| Patten | Schall | Steele, Pa. | Wood, Ind. |

The SPEAKER. On this roll call 310 Members, a quorum, answered to their names.

Mr. GLASS. Mr. Speaker, I move that further proceedings under the call be dispensed with.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors. The gentleman from Virginia [Mr. GLASS] has 20 minutes and the gentleman from Illinois [Mr. MADDEN] has 20.

Mr. GLASS. Mr. Speaker, as previously stated, I shall not occupy more than a minute or two to explain this bill. It is merely an amplification of the provisions of section 25 of the Federal reserve act, authorizing national banks with a million dollars or more of capital to establish branches abroad.

It was found that under the provisions of the Federal reserve act only national banks of very large capital could operate effectively, so that of the six branch banks established abroad, in the South American countries and in Panama and in Cuba, four of them have been established by the National City Bank of New York, and two by a banking association here in Washington. Thus it would appear that under the provisions of the Federal reserve act there is a very great likelihood of the foreign banking business becoming a monopoly. Hence a large number of national banks have petitioned that the law be so amended as to permit a number of national banks to unite and form a banking corporation to do business in foreign countries—to subscribe 10 per cent of their capital to such domestic or foreign corporation doing a banking business exclusively in foreign countries.

That, in a word, is the purpose of this bill.

Mr. KITCHIN. Mr. Speaker, may I interrupt the gentleman a moment?

Mr. GLASS. Yes.

Mr. KITCHIN. Was that a unanimous report from the committee?

Mr. GLASS. It is a unanimous report. There was no objection whatever to the bill.

I may state in this connection that the committee embodied in this bill a provision for domestic branch banking; but in view of the fact that there was considerable opposition to that proposition, and no objection whatsoever to the other proposition, it was thought advisable to eliminate from the bill the domestic branch banking proposition in order to separate it from the foreign banking proposition, to which there was no objection.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. GLASS. I yield.

Mr. STAFFORD. I notice that you provide but 30 days' notice in which a bank that fails to comply with the regulations of the Federal Reserve Board must dispose of its holdings of stock in this foreign banking corporation. Does the gentleman believe that in case a national bank offends in the particular suggested, 30 days would be sufficient time for them to dispose of their holdings in a foreign bank?

Mr. GLASS. It will not necessarily be a foreign bank. There is doubt whether it will be a foreign bank. It will be a bank authorized in the United States to do a foreign business. It is in a new field of banking, and the committee thought that every possible safeguard and precaution ought to be taken in initiating this new adventure in the banking business, and we thought that 30 days will be ample time for an offending bank. A bank has no business to offend.

Mr. STAFFORD. That would be ample time in which to dispose of their stock after they had failed to comply with the conditions?

Mr. GLASS. The committee thinks so.

Mr. RUBEY. Mr. Speaker, will the gentleman yield?

Mr. GLASS. Yes.

Mr. RUBEY. I notice on page 3 lines 13 to 19 have been stricken out.

Mr. GLASS. Yes; lines 13 to 19 have been stricken out. Mr. Speaker, I reserve the balance of my time.

Mr. MADDEN. Mr. Speaker, I do not intend to take much time in the consideration of this bill. I do not want to consume the time of the House. I think the recommendation made by the committee in this bill fills a long-felt want. We have been in a very embarrassing situation on account of not having any foreign banking connections. I can realize how impossible it would be for any single bank in the United States, even though we may have some very large ones, to organize a bank to do a foreign business; whereas, under the recommendations proposed in this bill it will be possible for national banks to take stock in a bank to do an exclusively foreign business and thereby enable the exporters of the United States to enlarge the scope of their activities abroad. Inasmuch as the committee have thought wise to offer an amendment to modify other clauses of the bill, I see no reason why the bill as proposed to be amended should not pass. Therefore I will not take the time that was allotted to me under my demand for a second.

Mr. GLASS. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question being taken and two-thirds voting in the affirmative, the rules were suspended and the bill passed.

GOLD.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13474) to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The bill was read, as follows:

*Be it enacted, etc.*, That section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act approved March 2, 1911, be, and the same is hereby, further amended by striking from the last proviso of said section 6 the word "one-third" and inserting in lieu thereof the word "one-half," making the last proviso of said section 6 read as follows:

"*And provided further*, That the Secretary of the Treasury may, in his discretion, receive, with the Treasurer or any assistant treasurer of the United States, deposits of gold bullion bearing the stamp of the coinage mints of the United States, or the assay office in New York, certifying their weight, fineness, and value, in ammounts of not less than $1,000 in value, and issue gold certificates therefor of the description herein authorized. But the amout of gold bullion and foreign coin so held shall not at any time exceed one-half of the total amount of gold certificates at such time oustanding. And section 5193 of the Revised Statutes of the United States is hereby repealed."

With the following committee amendments:

Page 2, line 3, strike out the word "one-half" and insert "two-thirds"; on page 2, line 14, strike out the word "one-half" and insert "two-thirds."

The SPEAKER. This bill is on the Union Calendar.

Mr. GLASS. I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Virginia asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, will the gentleman yield for a question?

Mr. GLASS. I yield to the gentleman.

Mr. MANN. The law now provides for one-third bullion. The department originally recommended that that be changed to make it one-half, and the committee has now reported in favor of making it two-thirds?

Mr. GLASS. In favor of making it two-thirds.

Mr. MANN. I will say to the gentleman that that seems to me to be perfectly proper. Was there any change in the situation between the time that the department made its recommendation and the bill was introduced and the time when the bill was reported, or was it the result of further reflection?

Mr. GLASS. The alteration was made in consequence of the fact that the Director of the Mint was notified to appear before the committee, and the suggestion was made by my colleague the gentleman from California [Mr. HAYES] that owing largely to the disuse of coin on the Pacific coast, where coin had been most used theretofore, he thought the change should be made from one-half, as suggested by the Secretary of the Treasury, to two-thirds, to which suggestion the Director of the Mint readily agreed that it would be better to have it that way.

Mr. HAYES rose.

Mr. GLASS. I yield to my colleague.

Mr. HAYES. The only place where gold coin is used to any great extent that I know of is in California.

Mr. LA FOLLETTE. Oregon and Washington also.

Mr. HAYES. And Oregon and Washington. Gradually the people of those States are coming to use paper money, and I can see no reason in the world for paying $125,000, which is the difference in cost between what the present law requires us to

coin and what this bill would require, for coining money that will never be put in circulation. The bullion is just as good to base gold certificates on as the coin.

Mr. GLASS. This is unanimously reported by the committee, Mr. Speaker, and it not only saves $125,000 in coinage, but it releases the mints to engage in minting foreign coinage, and to that extent it will be an additional saving.

Mr. MILLER of Minnesota. Will the gentleman yield for an inquiry?

Mr. GLASS. I do.

Mr. MILLER of Minnesota. I understood from the statement just made by the gentleman from California [Mr. HAYES] that the only place where gold coin is now used is in the States of California, Oregon, and Washington. Will the coining of one-third, as provided for in this bill, no more than accommodate the demand for gold coin in those three States?

Mr. GLASS. The accommodation is now more than ample for all the gold coin that is demanded.

Mr. MILLER of Minnesota. I do not know anything about it, but I want to add that I do know that we want American gold in the various parts of the world, because that is the only thing that you can exchange at a fair, decent rate in the foreign countries of the world.

Mr. GLASS. This bill simply enables the Treasury Department to hold a greater amount of bars against outstanding gold certificates than heretofore, and a less amount of coin. To comply technically with the existing law would involve the Treasury in a useless expenditure of $125,000, and the gold coins are not demanded.

Mr. MANN. Does it not go a little further than that? We have been bringing in a very large amount of foreign coin in the last year or so. It is not unlikely that sooner or later in the course of transfers much of that will go out of the country again, and it is better not to recoin it or even reduce it to bullion, but it is better to send the coin back when we do have to export gold.

Mr. GLASS. That is entirely true.

Mr. HAYES. If the gentleman will yield, I desire to say that the amount provided for here will undoubtedly meet every demand for gold coin that can exist, and if that be not so the Secretary of the Treasury will have authority under the law, as it will be if this bill passes, to coin more if it is demanded.

Mr. GLASS. Oh, yes.

Mr. HAYES. It only authorizes that in case there is no demand for the coin the unnecessary coinage shall be suspended, thereby saving the money that would be uselessly expended.

Mr. HILL. Mr. Speaker, I move to strike out the last word. The gentleman from Minnesota [Mr. MILLER] said that he wants to see American coin go all over the world. Some years ago I visited the vaults of the Bank of England. I had the same patriotic idea that the gentleman from Minnesota has, and I found that the only result of not having such a law as this was that the United States, England, and France all went to the expense of melting down one another's money and coining it into their own coin. This bill will tend largely to prevent that, and save not only this Government but other Governments the expense of unnecessary recoining. The gentleman from Illinois [Mr. MANN] very appropriately says that we have been receiving a large amount of gold from abroad. The probability is that when the war is over a great deal of that gold will go back again. Now, supposing we coin that into American coin, what will happen? It goes over to Paris and to London, and the result will be that if you go into the vaults of the respective banks you will find a little machine with an arm on one side, a funnel at the top, and they pour the coin into the funnel; it runs down grade until it comes to the end of the arm, and then if it is the least mite light weight it is tossed to one side; if it is full weight it is tossed to the other side; it is "separating the sheep from the goats." If it is a light weight in the slightest degree, it is recoined; it goes into the world's commerce and then it possibly comes back here again and we have been in the habit of melting it down into American coin to put it behind our gold certificates, and so it goes on year after year, a perfect economic absurdity, and this bill in a large degree corrects that thing. There ought not to be the slightest opposition to it on the part of anybody.

Mr. BENNET. Will the gentleman yield?

Mr. HILL. Yes.

Mr. BENNET. Is the gentleman sure that this bill does to any large extent cure that trouble?

Mr. HILL. I think it does. It allows the Treasury to use a larger proportion of gold bullion and foreign coin, instead of changing it into American coin, and putting it behind the certificate in the form it was received.

Mr. BENNET. Along about the Sixtieth or the Sixty-first Congress we passed some sort of an act to do away with recoinage.

Mr. HILL. To some extent we did, but this goes further than that, and the further it can be carried with proper convenience to the American people the better. There are some countries where you have to ship American coin. Africa, for instance, in some cases, and certain countries in South America, but the great bulk of it goes back and forth between Paris, Berlin, London, and New York, and you can not stop it.

A word in regard to another matter. I rose to take the time on a former bill, and the gentleman will pardon me if I talk about a bill that has already passed, because I want to correct an erroneous impression in the country.

Mr. GLASS. I have no objection.

Mr. HILL. Mr. Speaker, not long ago a most distinguished citizen of the United States made this statement:

> Until the recent banking act you could not find, so far as I am informed, a branch of an American bank anywhere outside of the United States, whereas other nations of the world are doing their banking business on foreign shores through the instrumentality of their own banks.

Now, that statement was pardonable because the deadly isolation of some official positions in this country are such as excuse it. But when the head of the Bureau of Foreign Commerce, who is supposed to be directly conversant with such things, repeats the statement, and when, if I am not mistaken, it is again repeated on the floor of this House by one of the leading business men of one of the largest States in the Union, it seems to me that it ought to be corrected in the interest of everybody.

I made a trip around the world in 1901, and I then found what I believe to be the best business on earth, and that was foreign banking. I came home, and was gratified to learn that my own State had chartered a bank for the purpose and that it was doing business. And now, for the information of those gentlemen and the country at large, I want to tell you what a modest American bank has been doing the last 14 or 15 years, since 1902, in extending American business and American commerce throughout the world.

The International Banking Corporation was chartered in 1902. They have been carrying on branches at Bombay, Calcutta, Canton, Cebu, Colon, Hankow, Hongkong, Kobe, London, Manila, Panama, Peking, San Francisco, Shanghai, Singapore, and Yokohama. They have $37,000,000 cash assets engaged in that business; and yet, notwithstanding a branch has been kept right here in the city of Washington until a year or two ago, that through all these years it has been a recognized agent of the United States Government in transacting business in the Philippine Islands and all through the Orient, that for 14 years it has been carrying on this business in all the principal commercial centers of the Orient and the North American Continent, the statement is made here that we need to pass this bill—and I think we do—which has been passed in order to encourage American business in foreign countries.

We do not realize what American citizens are doing to carry the honor, glory, and credit of this great country all over the world. [Applause.] It seems to me to be fair to make this statement to the House so that they can realize that the bill as passed a moment ago is but supplementary to what is already being done by our citizens. [Applause.]

The SPEAKER. The gentleman from Connecticut withdraws his pro forma amendment, and the question is on the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. GLASS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

### EXCLUSION OF INTOXICATING LIQUORS FROM NATIONAL PARKS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6814) to exclude intoxicating liquors from national parks and national forest reserves.

The bill was read by title.

The SPEAKER. Is there objection?

Mr. MOON. I object.

Mr. RANDALL. Mr. Speaker, I ask unanimous consent that the bill may hold its position on the calendar.

The SPEAKER. The gentleman from California asks unanimous consent that the bill be passed without prejudice.

Mr. MEEKER and Mr. GALLAGHER objected.

### DRY-LAND AGRICULTURE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 393) to authorize an exchange of lands

with the State of North Dakota for promotion of experiments in dry-land agriculture, and for other purposes.

The SPEAKER. Is there objection?

Mr. MOON. Mr. Speaker, I object.

The SPEAKER. The gentleman from Tennessee objects, and the bill is stricken from the calendar, and the Chair recognizes the gentleman from Tennessee [Mr. PADGETT].

OFFICERS AND ENLISTED MEN OF THE NAVY AND MARINE CORPS DETAILED FOR SERVICE IN HAITI.

Mr. PADGETT. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 12835) to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Republic of Haiti, and for other purposes, with the committee amendments, which I send to the desk and ask to have read.

The Clerk read as follows:

*Be it enacted, etc.*, That the President of the United States be, and he is hereby, authorized, in his discretion, to detail to assist the Republic of Haiti such officers and enlisted men of the United States Navy and the United States Marine Corps as may be mutually agreed upon by him and the President of the Republic of Haiti: *Provided*, That the officers and enlisted men so detailed be, and they are hereby, authorized to accept from the Government of Haiti the said employment with compensation and emoluments from the said Government of Haiti, subject to the aporoval of the President of the United States.

SEC. 2. That to insure the continuance of this work during such time as may be desirable, the President may have the power of substitution in the case of the termination of the detail of any officer or enlisted man for any cause: *Provided*, That during the continuance of such details the officers and enlisted men shall continue to receive the pay and allowances of their ranks or ratings in the Navy or Marine Corps.

SEC. 3. That the following increase in the United States Marine Corps be, and the same is hereby, authorized: Two majors, 12 captains, 18 first lieutenants, 2 assistant quartermasters with the rank of captain, 1 assistant paymaster with the rank of captain, 5 quartermaster sergeants, 5 first sergeants, 5 gunnery sergeants, and 11 sergeants.

SEC. 4. That the following increase in the United States Navy be, and the same is hereby, authorized: One surgeon, 2 passed assistant surgeons, 5 hospital stewards, and 10 hospital apprentices, first class.

SEC. 5. That officers and enlisted men of the Navy and Marine Corps detailed for duty to assist the Republic of Haiti shall be entitled to the same credit for such service, for longevity, retirement, foreign service, pay, and for all other purposes, that they would receive if they were serving with the Navy or with the Marine Corps.

The SPEAKER. Is a second demanded?

Mr. CALLAWAY. Mr. Speaker, I demand a second.

Mr. PADGETT. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that a second be considered as ordered. Is there objection?

Mr. CALLAWAY. I object.

The SPEAKER. The gentleman from Texas objects, and the Chair appoints the gentleman from Tennessee, Mr. PADGETT, and the gentleman from Texas, Mr. CALLAWAY, to take their place as tellers, and the House will divide on the question of ordering a second.

The House divided; and the tellers reported—ayes 78, noes 12.

Mr. CALLAWAY. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Texas makes the point of order that there is no quorum present. Evidently there is no quorum present.

Mr. PADGETT. Mr. Speaker, I move a call of the House.

Mr. CRISP. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CRISP. Under the rules of the House, when the House is dividing on seconding a motion to suspend the rules, and a quorum fails to vote, is there not an automatic call of the House?

The SPEAKER. The gentleman is correct. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll. The question is on seconding the motion to suspend the rules.

The question was taken; and there were—yeas 229, nays 63, answered "present" 9, not voting 132, as follows:

YEAS—229.

So a second was ordered.

The Clerk announced the following pairs:

For balance of day:

Mr. MORRISON with Mr. HUMPHREY of Washington.

For this session:

Mr. DEWALT with Mr. MCFADDEN.

Until further notice:

Mr. DALE of New York with Mr. HASKELL.

Mr. ADAIR with Mr. GRIEST.

Mr. LANGLEY with Mr. CANTRILL.

Mr. SPARKMAN with Mr. MORIN.

Mr. SMALL with Mr. WILLIAMS of Ohio.

Mr. RAINEY with Mr. HILL.

Mr. HOUSTON with Mr. GUERNSEY.
Mr. GODWIN of North Carolina with Mr. NORTH.
Mr. WATKINS with Mr. ROWLAND.
Mr. MAHER with Mr. HEATON.
Mr. HENRY with Mr. FOCHT.
Mr. JAMES with Mr. KONOP.
Mr. OGLESBY with Mr. ROBERTS of Nevada.
Mr. BARKLEY with Mr. FAIRCHILD.
Mr. LEE with Mr. LEHLBACH.
Mr. GARRETT with Mr. MCCULLOCH.
Mr. JONES with Mr. NORTON.
Mr. LOFT with Mr. ROBERTS of Massachusetts.
Mr. NEELY with Mr. SCOTT of Michigan.
Mr. PATTEN with Mr. SWITZER.
Mr. SHERLEY with Mr. WILSON of Illinois.
Mr. HART with Mr. MOORE of Pennsylvania.
Mr. MORGAN of Louisiana with Mr. SCHALL.
Mr. VAN DYKE with Mr. SELLS.
Mr. GRIFFIN with Mr. KELLEY.
Mr. HOWARD with Mr. LONGWORTH.
Mr. HUMPHREYS of Mississippi with Mr. MOTT.
Mr. POU with Mr. SCOTT of Pennsylvania.
Mr. WILSON of Florida with Mr. PORTER.
Mr. PRICE with Mr. MOSS of West Virginia.
Mr. LAZARO with Mr. KREIDER.
Mr. RIORDAN with Mr. VARE.
Mr. SCULLY with Mr. WATSON of Pennsylvania.
Mr. LITTLEPAGE with Mr. KIESS of Pennsylvania.
Mr. LEWIS with Mr. MARTIN.
Mr. SAUNDERS with Mr. LAFEAN.
Mr. SMITH of New York with Mr. PAIGE of Massachusetts.
Mr. MCDERMOTT with Mr. SUTHERLAND.
Mr. LIEBEL with Mr. WARD.
Mr. RAGSDALE with Mr. WALSH.
Mr. ALEXANDER with Mr. CARTER of Massachusetts.
Mr. SHOUSE with Mr. HAMILTON of New York.
Mr. BRUMBAUGH with Mr. DARROW.
Mr. DECKER with Mr. HOPWOOD.
Mr. FLYNN with Mr. KEISTER.
Mr. EAGAN with Mr. KAHN.
Mr. BURKE with Mr. ANDERSON.
Mr. CALDWELL with Mr. BEALES.
Mr. HARDY with Mr. GREENE of Massachusetts.
Mr. CULLOP with Mr. EDMONDS.
Mr. FARLEY with Mr. COSTELLO.
Mr. CANDLER of Mississippi with Mr. BARCHFELD.
Mr. BURNETT with Mr. GRAHAM.
Mr. DOREMUS with Mr. FORDNEY.
Mr. COLLIER with Mr. DAVIS of Minnesota.
Mr. FITZGERALD with Mr. COPLEY.
Mr. DRISCOLL with Mr. GRAY of New Jersey.
Mr. BORLAND with Mr. FREAR.
Mr. CONRY with Mr. CURRY.
Mr. BARNHART with Mr. DUNN.
Mr. BLACK with Mr. COLEMAN.
Mr. BYRNES of South Carolina with Mr. CHANDLER of New York.
Mr. CASEY with Mr. BACHARACH.
Mr. DOOLING with Mr. AUSTIN.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present; the Doorkeeper will unlock the doors. The gentleman from Tennessee [Mr. PADGETT] is recognized for 20 minutes and the gentleman from Texas [Mr. CALLAWAY] for 20 minutes.

Mr. PADGETT. Mr. Speaker, two weeks ago this bill was before the House, and there was considerable discussion over the matter, and I do not feel called upon at this time to renew that discussion. Recently the President of the United States negotiated a treaty with the Republic of Haiti, which was ratified by the Senate, but which has not yet been proclaimed. As I understand, it is being held up in order to get this legislation in aid of the treaty. Under that treaty the United States is to appoint and administer the finances of the Republic of Haiti.

Mr. COX. Will the gentleman yield?

Mr. PADGETT. I do.

Mr. COX. What was the necessity for making that kind of a treaty? What conditions existed between the two countries which required such a treaty, in brief?

Mr. PADGETT. There was anarchy there on that little island, which is right here under our protection, and we have felt in reference to Haiti as we have felt in reference to Santo Domingo and a number of other countries, that, as under the Monroe doctrine we will not let anybody else interfere with them, it is necessary for us to maintain order and good government.

Mr. COX. They were wasting and squandering the revenues of that little Republic?

Mr. PADGETT. Absolutely, sir.

Mr. COX. And not applying them to their debts?

Mr. PADGETT. No, sir. Now, also, it was stipulated that the Government of the United States should reorganize their constabulary. We have disbanded their constabulary and have taken charge of it under the military government. Now that this treaty has been ratified, and it must be taken under civil administration, this is for the purpose temporarily of organizing the constabulary of that Republic.

Mr. SISSON. Will the gentleman yield for a question?

Mr. PADGETT. Yes, sir.

Mr. SISSON. The treaty which the gentleman speaks of provides that the Haitian Government shall pay as much for the constabulary as the Federal Government pays, does it not?

Mr. PADGETT. Not that I know of; I do not know of such a provision.

Mr. SISSON. Now, my understanding of the treaty is that half the amount to be paid for the constabulary shall be paid by the Haitian Government. Now, that being true, since the gentleman has fixed full pay for these officers, the 20 per cent for serving in the tropics simply means, under the treaty, the Haitian Government must respond in like amount, which gives these officers and marines two salaries. Now that is my understanding of the treaty.

Mr. PADGETT. I think there is no such provision in the treaty that applies to the men. A marine, an enlisted man in the Marine Corps, who is receiving somewhere from $18 to $30 or maybe $35 a month goes down there. This provides that he shall have authority to receive from the Republic of Haiti as much additional compensation as the Republic of Haiti may give him, as may be approved by the President of the United States.

Mr. SISSON. Now that is the gentleman's bill?

Mr. PADGETT. Yes, sir.

Mr. SISSON. The President will be compelled, if the treaty is as I have been informed it is, to comply with the treaty.

Mr. PADGETT. No. This being a later law the later law governs always.

Mr. SISSON. That is true; but if the gentleman were President of the United States he would not repudiate a treaty, would he?

Mr. PADGETT. He would be governed by this law that authorizes their employment.

Mr. SISSON. Without consulting the other party?

Mr. PADGETT. This says we shall consult them. It says such compensation as the President of the Republic of Haiti may pay, which may be approved by the President of the United States.

Mr. SISSON. The gentleman is asking Congress to rather buy a pig in a sack until we know what is in the treaty and what we are doing by this bill.

Mr. PADGETT. Not at all, sir; it is as plain as anything can be, and I see nothing to be alarmed over in allowing these marines that receive a small compensation, who go down into that country under hard circumstances, among a population which is not congenial, to organize temporarily a constabulary there and maintain order, this being only a temporary matter, to allow them to receive such additional compensation——

Mr. COX. What will it cost this Government?

Mr. PADGETT. It would cost this Government very little, as it is contemplated sending only about 35 of our marines down there. They have estimated the number at 35.

Mr. CALLAWAY. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. CALLAWAY. I want to know how much extra pay we give for foreign service, which is provided by this bill, that they shall have in addition to what they get under the regular service?

Mr. PADGETT. The men get 20 per cent for foreign service and officers get 10 per cent.

Mr. CALLAWAY. In addition to that, do we pay anything for service in the Tropics?

Mr. PADGETT. No, sir; that is foreign-service pay.

Mr. CALLAWAY. In tropical service, then, or foreign service, we pay 20 per cent additional to our men and 10 per cent additional to our officers. Can you tell us how many men in addition to the ones named here, the increase provided in this bill, will be named in that service?

Mr. PADGETT. Not even all of those are expected to go. There are about 55 additional officers provided there, but it is estimated in the hearing of Gen. Barnett, the commandant of the Marine Corps, that they would employ in the Government of Haiti about 35 men. That is his statement. But this addi-

tional number that is authorized is because the Marine Corps has to operate in detached and irregular bodies, a certain number here, a smaller number yonder, and a different number there, not having a regularly constituted organization, as in the Regular Army, and it would require these additional officers referred to in the bill.

Mr. CARAWAY. Haiti is practically under martial law at the present time, is it not?

Mr. PADGETT. Our Marine Corps is in control there. We are hoping to get this legislation through so that the President of the United States can proclaim the treaty recently ratified by the Senate and put the civil government of Haiti into full control and operation.

Mr. CALLAWAY. Has this anything to do with the treaty?

Mr. PADGETT. With the exception of its promulgation the treaty is complete. It has been ratified by the Senate of the United States, and the President has not yet issued his proclamation, because when the proclamation is issued the treaty would become operative, and it is waiting to have this legislation so that the President will have authority then, as the treaty provides, to take charge under civil administration and civil organization.

Mr. CALLAWAY. Do you mean to tell this House that that treaty can not become operative until this act is passed?

Mr. PADGETT. I do not. But I mean to say this, that the President could not carry out the provisions of this treaty in the way that it is intended that he should without this legislation.

Mr. CALLAWAY. Do you mean it is intended he should in this bill?

Mr. PADGETT. Just exactly.

Mr. CALLAWAY. It does not have anything on earth to do with the operation of the treaty?

Mr. PADGETT. The treaty would become operative as a treaty regardless of this legislation, but the President would not have the means of executing it as he would like to do it.

Now, I desire to reserve the remainder of my time.

Mr. CANNON. Does not the gentleman think that the difficulty in the United States now in getting volunteers for the Marine Corps and for the Army and for the Navy, at pay which is comparatively inconsiderable to what they would receive in private life, is that just such discussions as this, and just such pay as is authorized here, have a tendency to say to a hundred million of people, "After all, what good?"

Mr. HENSLEY. What other countries south of us do we bear the same relation to as we do to Haiti?

Mr. PADGETT. We have a treaty with Santo Domingo. I do not remember whether there are other treaties or not.

Mr. HENSLEY. Nicaragua?

Mr. PADGETT. I do not know whether there is a treaty with Nicaragua or not, but we have done the same thing in Nicaragua, by going down there and putting our marines in control under military authority and military government. This treaty and legislation is to put them in control under civil administration.

Mr. HENSLEY. Now, then, the Marine Corps of this country who are serving in those countries are receiving also the additional pay that this bill provides the marines shall receive in Haiti?

Mr. PADGETT. Down there they receive 20 per cent additional for the enlisted men and 10 per cent for the officers. They are there only for a short time.

Mr. HENSLEY. Why make an exception of Haiti? Why not pass a general law to cover all those countries and permit them to receive this additional pay?

Mr. PADGETT. Because I think it better to deal with each case as it arises and under the peculiar equities of each time. I reserve the balance of my time.

The SPEAKER. The gentleman from Texas [Mr. CALLAWAY] is recognized for 20 minutes.

Mr. CALLAWAY. Mr. Speaker, Haiti is under martial law at the present time, with the United States Government in charge. Now, the impression that the chairman of this committee might have left on the minds of some Members of the House—that we have a treaty entered into between the United States and the Haitian Government, ratified by the Senate, which will not become operative until this law is passed—is pure buncombe. This law has not a thing on earth to do with that treaty. That treaty will go on and operate just as well without this act and just as thoroughly as it will with it. Treaties are not made between the different Governments and ratified that have to have a part passed by the House. The truth about it is that the United States marines do not want to go down to the Haitian Government under the treaty, knowing that this provision is pending, until this law is passed, they will get only one salary instead of two salaries. Now, that is the meat in the coconut; that is the vitals in this bill.

When this bill first came before the committee it provided that the United States troops the United States Government sent to Haiti to administer the Haitian Government would receive the same salary from the Haitian Government that the Haitian Government was accustomed to pay their people for like services, in addition to the salaries they received from the United States Government, which were the regular salaries of the Marine Corps, plus 20 per cent for serving in the Tropics or in foreign service.

Mr. TEMPLE. Will the gentleman yield?

Mr. CALLAWAY. Yes.

Mr. TEMPLE. Is it true that you say this provision is in the treaty between the United States Government and the Haitian Government?

Mr. CALLAWAY. I did not say a word about that.

Mr. TEMPLE. Is there an agreement by which Haiti pays a certain amount?

Mr. CALLAWAY. No, sir.

Mr. TEMPLE. That point was brought out by another gentleman a while ago, and I thought it well to correct it.

Mr. SISSON. Will the gentleman yield?

Mr. CALLAWAY. Yes, sir.

Mr. SISSON. I have not seen a copy of the treaty.

Mr. CALLAWAY. I would like to know if there is a man in the House that has a copy of the treaty.

Mr. MANN. I have one here, and anybody can get one who wants it.

Mr. CALLAWAY. What I said about the treaty I based on my general understanding, that I take it every man in the House has, that a treaty made between the United States and a foreign country, when it is ratified by the Senate of the United States, does not wait on the passage of a law to do what the terms of it provide.

I did not consider it worth while to look to the treaty. We are passing a law, not part of a treaty.

Mr. HUDDLESTON. Mr. Speaker, will the gentleman yield?

Mr. CALLAWAY. Yes.

Mr. HUDDLESTON. I would like to inquire of the gentleman if our marines are not there to-day, performing exactly the same duties that they will perform later, and for which it is proposed to pay them this increased allowance, without any increase?

Mr. CALLAWAY. Yes; and they will perform the same service without additional allowance. Some men have spoken to me about this bill. They had letters from relatives and friends and people in their respective districts who were in the service and wanted to go to Haiti, provided this bill passed increasing their pay. That influence, I take it, is largely responsible for this bill.

Mr. DILL. Mr. Speaker, will the gentleman yield?

Mr. CALLAWAY. Yes.

Mr. DILL. Will the giving to these men of an extra salary while they are in Haiti, serving there, have any influence upon their desire to continue there?

Mr. CALLAWAY. I take it that the gentleman asked the question knowing he is talking to a practical man, who could not answer but one way. Of course, if they get two salaries while they stay there and only one when they come away, they will want to stay.

Another thing: These men detailed for service in Haiti are the men on whom we depend to put that Government in such a state as that we can withdraw, and they are the men whose advice we will depend on to determine when we shall withdraw. How long will it take them to conclude that it is in such condition that we should withdraw them if they are drawing two salaries as long as they stay and only one salary when they quit staying?

Some may say they are patriots that salaries will not affect. But they are talking to a practical-minded man when they make such statements to one who knows human nature works just the same in the Marine Corps as it works in practical everyday business.

Another thing: When we do this for those sent to Haiti to police that country we will be called on to do it for every police squad sent at any time to any country to do police duty. I can not understand how anybody can argue that we ought to do it. They say that service is hard in a tropical country, but we add 20 per cent to the salary to pay for additional hardships of foreign service. This bill provides not only that they get the 20 per cent provided by general law, but in addition to that they get

such a salary from the Haitian Government as it pays for such service. The testimony before the committee shows this conclusively.

Mr. TILSON. Mr. Speaker, will the gentleman yield there?

Mr. CALLAWAY. Yes; I yield.

Mr. TILSON. This will not increase the salary of these men unless it is approved by the President of the United States. All this is subject to approval by the President of the United States, and if he decides that receiving this additional salary is in any way unwise or productive of sinister effect upon these men he could refuse to approve of it and could stop the payment of additional pay under the terms of this bill. Is that correct?

Mr. CALLAWAY. No; it is not correct at all, because the President will be influenced by the advice of the men sent down there. They are the people who will advise him. It will have to depend upon them. Acting upon their advice, he will be influenced by the extra pay they get.

Mr. BENNET. Mr. Speaker, will the gentleman yield there?

Mr. CALLAWAY. Yes.

Mr. BENNET. Is not the gentleman willing to trust the President of the United States in a matter of this kind?

Mr. CALLAWAY. Well, I am not long on trust anywhere. [Laughter.]

Mr. TEMPLE. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from Texas yield to the gentleman from Pennsylvania?

Mr. CALLAWAY. Yes.

Mr. TEMPLE. Can the gentleman tell how many officers and men of the Marine Corps are stationed now in Haiti?

Mr. CALLAWAY. No; I can not.

Mr. TEMPLE. Or how it will compare in expense to keep those there that are there or to send the 35 that it is proposed to send?

Mr. CALLAWAY. I do not suppose it would make any difference whether you paid them two salaries or one. Will two salaries enable them to accomplish more than one salary would enable them to accomplish?

Mr. TEMPLE. There are now 1,665 men of the Marine Corps under 82 officers. It would cost a great deal more to keep them there than to keep the 40 men provided by this bill. If the gentleman is in favor of economy, he ought to be in favor of this bill.

Mr. CALLAWAY. Oh, that is pure buncombe that you are working on the House and has nothing to do with the facts.

Mr. TEMPLE. There are 1,665 men.

Mr. CALLAWAY. That has nothing to do with it. The men that are to be sent can do better work if you pay them the two salaries provided in this bill than if you pay them one salary as provided by law. That is all there is to it. Does any man attempt to say if we pay two salaries you can withdraw the Army and 35 could do the work, and if we do not provide two salaries you will have to have the Army? We know that you can not. That is rot, rot, rot.

Mr. MANN. Mr. Speaker, will the gentleman yield for a question?

Mr. CALLAWAY. Yes.

Mr. MANN. Under the existing law would the President have the authority to detail Marine officers to act as officers of the local constabulary there?

Mr. CALLAWAY. I do not think that this bill will affect the President in detailing the officers at all. If that were the question and anybody had made it in the committee or had offered it here, there would be no question raised on that. The whole question involved in this bill is a question of two salaries from different Governments.

Mr. MANN. The gentleman is on the committee. My understanding was that to make legal the detail of these officers is the main proposition.

Mr. CALLAWAY. The President has the right to detail the officers. He has the power under the treaty made and ratified by the United States Senate. It is already in effect. He could detail officers to do the work. This bill simply provides additional salaries. That is the only reason for the bill. That is the only reason I have ever head for it.

Mr. HULBERT. Mr. Speaker, will the gentleman yield for a question?

Mr. CALLAWAY. Yes; but gentlemen have taken up all my time. Some others want to be heard.

Mr. HULBERT. I have not taken up any of the gentleman's time.

Mr. CALLAWAY. I do not refer to the gentleman.

Mr. HULBERT. I have not yet made up my mind. It will depend somewhat on the answer that I get from the gentleman. The gentleman has stated that these men will receive two salaries—one that they are now receiving, plus 20 per cent by the Government. Do I understand that the other salary will be paid to them from the customs receipts of Haiti, or will both salaries be paid by the United States?

Mr. CALLAWAY. One salary will be paid by Haiti and the other by this Government.

Mr. HULBERT. These officers, sent down there, perform dual functions, do they not? In the first place, they are peace officers and maintain peace, and, on the other hand, they perform administrative functions on behalf of the Haitian Government?

Mr. CALLAWAY. I thought when a man was an officer in the Army he performed the service that the United States detailed him to perform, without regard to the number of the services.

Mr. HULBERT. Within the United States.

Mr. CALLAWAY. When he goes into foreign service he gets 20 per cent extra for the foreign service.

Mr. HULBERT. Will the gentleman yield for one more question?

Mr. CALLAWAY. Yes.

Mr. HULBERT. Does the gentleman make any distinction between sending a man into a foreign country with United States forces, in the service of his own country exclusively, and a case where men are sent into a foreign country to act in behalf of the people of that country?

Mr. CALLAWAY. That is a hair-splitting proposition I do not care to go into.

Mr. REAVIS. Will the gentleman yield for a question?

Mr. CALLAWAY. I want to save the rest of my time for the other members of the committee.

The SPEAKER. The gentleman from Tennessee [Mr. PADGETT] has eight minutes remaining and the gentleman from Texas [Mr. CALLAWAY] has five minutes.

Mr. PADGETT. I yield five minutes of my time to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, last summer and fall a treaty was negotiated between this country and the Republic of Haiti, signed by the representatives of the two Governments on the 10th day of September last. On the 8th day of January last the Secretary of State transmitted that treaty to the President of the United States with a letter, in which he said:

> The undersigned, the Secretary of State, has the honor to submit, with a view to its transmission to the Senate, if you approve thereof, to receive the advice and consent of that body to its ratification, a treaty—

And so forth. On January 11 the President, having approved thereof, transmitted this treaty to the Senate of the United States for ratification.

On February 28 the treaty was ratified by the Senate. This is about the most distinctive act which the present administration has performed in our foreign relations. The treaty was approved by the President, and by the Secretary of State transmitted to a Democratic Senate, and approved by the Democratic Senate. It requires certain action on the part of the House of Representatives to carry that treaty into effect.

The treaty provides that the constabulary in the Haitian Republic shall be officered by officers of the United States Army or Navy. The President can not direct that without an act of Congress. The bill now pending before us was prepared in the State Department and the Navy Department jointly, and transmitted to Congress with the recommendation that it be passed. To-day the motion was made to suspend the rules. To bring it up for consideration required a vote on a second, which is usually dispensed with, and on that vote 46 Democrats voted against considering the bill—128 Republicans voted in favor of considering the bill. [Applause on the Republican side.] Eighty-eight Democrats, not a two-thirds majority of the Democratic side, followed the Republicans in voting to consider the bill. Not a Republican voted against considering the bill. Here is an administration measure. [Applause on the Republican side.] A few days ago I heard gentlemen on that side of the House say, "We must stand by the President, who has asked us to agree to the Clarke amendment to the Philippine bill." Every one of the 46 Democrats who voted against the consideration of this bill meekly and mildly excused himself for his vote the other day on the ground that he was following the President. They roasted the other Democrats who did not follow the President then. Well, gentlemen, you are not following him now.

Mr. HENSLEY. Mr. Speaker, will the gentleman yield?

Mr. MANN. No; I do not yield. It is much more important to this administration to carry out this treaty that it has made with Haiti than it was to have the Clarke amendment in the Philippine bill. You have gone back on your own administration. When it comes to great questions, when it comes to the important problems in dealing with our foreign affairs——

Mr. GORDON. Like the McLemore resolution——

Mr. MANN. When it comes to the important problems, during a whole century of time, all administrations must depend upon the Republican side of the House for support. [Applause on the Republican side.]

The SPEAKER. The gentleman from Texas has five minutes left and the gentleman from Tennessee three minutes.

Mr. CALLAWAY. I yield the time on this side to the gentleman from Missouri [Mr. HENSLEY].

Mr. HENSLEY. Mr. Speaker and gentlemen of the House, it was not my intention to submit any observations concerning this bill, but after listening to the arguments made by both those who are favorable to it and those who are against it I feel inclined to say something. I can not quite understand how the Members of the House can make such arguments in connection with this matter as I have heard made here to-day. I have faith in the intelligence and the honesty of the membership of this body and I can not believe that they, if they fully understood the meaning of this measure, would support it.

It is said by the chairman of the Committee on Naval Affairs and others that it is necessary to pass this bill in order to put into force and effect the treaty which has already been ratified by the Senate between this country and Haiti. There can not be any connection whatsoever between this bill and the treaty. The provisions of the treaty can be put into force and effect without this bill, which has for its purpose wholly the increase in pay of the men and officers in the marine service of this Government. The Good Book says that one can not serve two masters, and yet in the very terms of this bill there is a divided allegiance and a divided authority. The marines in the service of this Government, enjoying full pay from this Government with 20 per cent additional for the enlisted men and 10 per cent additional for the officers for foreign service, are, under the provisions of this bill, to receive a salary from the Haitian Goverment, fixed by certain officers.

The first bill submitted by the chairman of the committee provided explicitly that in addition to the pay from this country they are to receive the same pay of native men and officers of the Haitian Government in similar positions. I stated before the committee and I say now that if it is necessary for these men and officers to receive additional pay over and above what the law provides at the present time that upon a proper showing of that fact I am perfectly willing to vote for an increase, and I have no doubt but that they are entitled to an increase, but the money should be recovered from the Haitian Government by some means or other and the whole pay of our officers and men should be chargeable against the Treasury of this Government. In other words, they should be the servants of this Government even though a portion of the money they receive is first gotten from the Haitian Government. I think it is a bad principle. We bear the same relation to several other small Republics south of us that we bear to Haiti. Now, this will be used as a precedent in case this bill becomes a law, and we will find that bills on the same basis will be introduced to take care of our men and officers in these other countries. If this is necessary, why should not there be a general law to cover all such cases as this?

Then, too, Mr. Speaker, this Government must of necessity depend upon our representatives in these countries for information; and upon the question as to when our relations with these Governments should be changed information must come from these people, and it is as natural as the night follows the day that these people will be considering their own individual interests in reporting to this Government. I am informed now that several Members of the House have friends in the service besieging them for their influence in being detailed for this constabulary service at Haiti; and, in addition to this, there is another point that I wish to call your attention to. Peculiar and extraordinary conditions prevail throughout our country concerning the question of military preparedness. I have not the time to present to you my views with reference to the causes for this situation, but we all know that in this plea of patriotism, if we make military increases, the burden must rest somewhere. Patriotism necessarily requires service. The duty devolves upon the people to render that service, and I say here and now, Mr. Speaker, that my observations thus far during this session of Congress convince me that the military people, who are most instrumental in this propaganda for preparedness, are urging increases in every way they can. I appreciate that I should be more definite and certain in my statement. I should point out to you instances where officers and men are asking and receiving increases in provisions contained in different bills from time to time, but I warn you here and now that you will find from time to time as we progress with this movement that these people will be recognized in their demands for increases simply because the people, they believe, are willing to stand for it now under the present stress of conditions.

In conclusion, Mr. Speaker, I desire again to say that I can not subscribe to this divided allegiance and divided authority. I want our people who are servants of this Nation to serve under the Stars and Stripes and not under the flag of any other nation. [Applause.]

Mr. PADGETT. Mr. Speaker, I yield three minutes to the gentleman from Alabama [Mr. OLIVER].

Mr. OLIVER. Mr. Speaker, the vote against the consideration of this bill, I feel sure, was due to misapprehension as to what in fact is its real purpose and effect. I fully concur in the view stated by the gentleman from Illinois [Mr. MANN] that the primary purpose of this bill is to make effective the treaty between this country and the Government of Haiti. The only opposition, so far as I understood, that was even suggested to the bill was due to the fact that it provided some possible additional pay for the officers and members of the Marine Corps who might be stationed there, such additional pay to come out of the revenues of the Government of Haiti.

The committee carefully guarded against any real objection that might be offered on that ground by providing in the bill that before any additional pay can be received by the officers or members of the Marine Corps, the President of the United States must first approve the same. The duty enjoined on officers and enlisted men of the Marine Corps who may be detailed for service in Haiti under the provisions of the bill are in many respects different from the duties ordinarily imposed on such officers and enlisted men. It has been correctly stated that they will have important administrative duties to perform.

Mr. CALLAWAY. Will the gentleman yield?

Mr. OLIVER. No; I can not yield now. I desire to say in support of the bill that it is my opinion that its passage is important in order to give full effect to the treaty between this Government and the Government of Haiti. The provisions, as stated, in reference to additional pay are fully guarded, and the Marine officers will be entitled to none, unless they first secure the approval of the President of the United States. [Applause.]

The proposed bill has been strongly urged by the Secretary of the Navy and the Secretary of State, and I will here insert in the RECORD as a part of my remarks and for the purpose of showing the necessity of this legislation letters from both of these Secretaries to the chairman of the Committee on Naval Affairs.

DEPARTMENT OF THE NAVY,
*Washington, March 3, 1916.*

MY DEAR MR. CHAIRMAN: In reply to the committee's letter, inclosing the bill (H. R. 12584) to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve in the Government of Haiti, and for other purposes, and requesting my views and recommendations of the department thereon, I have the honor to inform you that the department recommends this bill for your favorable consideration.

However, to better accomplish the purpose of the bill, I suggest that it be redrafted in the form of the draft herein inclosed, which has been prepared with a view to a compliance with those provisions of the treaty with Haiti which require the detail for various positions under the Government of the Republic of Haiti of officers and enlisted men of the naval service.

The bill (H. R. 12584) provides for the detail of officers and enlisted men of the naval service to serve with the Haitian Gendarmerie, without reference to the approval by the Government of Haiti, contrary to the provisions of the treaty.

The first proviso in the bill that officers and enlisted men detailed for service with the Haitian Gendarmerie "shall receive the pay and allowances of their grades in the Marine Corps and in the Medical Corps and Hospital Corps of the Navy" is ambiguous for the reason that there are several ranks in some of the grades, and that the rate of pay of the individual may be based rather on his rank than on his grade. In the Quartermaster's Department of the Marine Corps there are only two grades, those of quartermaster and assistant quartermaster, whereas there is one rank in the upper grade, that of colonel, and three ranks in the lower grade, those of lieutenant colonel, major, and captain.

Among the articles of the treaty are the following:

"The President of Haiti shall appoint, upon nomination by the President of the United States, a general receiver and such aids and employees as may be necessary, who shall collect, receive, and apply all customs duties on imports and exports accruing at the several customhouses and ports of entry of the Republic of Haiti."

"Upon the appointment of the financial adviser the Government of the Republic of Haiti, in cooperation with the financial adviser, shall collate, classify, arrange, and make full statement of all the debts of the Republic, the amounts, character, maturity, and condition thereof, and the interest accruing and the sinking fund requisite to their final discharge."

I have been advised that it is the intention to appoint temporarily, and until some further arrangements are made, officers of the line of the Pay Corps of the Navy to the positions provided for in the above articles of the treaty. To provide for this contingency it is deemed necessary that the language in section 1 of the inclosed draft should be employed.

According to the information received by the department, an additional medical officer is desired by the Haitian Government to supervise sanitary measures, and I suggest that provision be made for an increase in the Medical Corps of one surgeon and two passed assistant surgeons, as set forth in the inclosed draft; also that provision be made for the increase of five hospital stewards and two hospital apprentices, first class, in order to provide for the detail of men of those ratings.

The increases noted in the proposed draft are only to replace such officers and enlisted men as may be detailed for service under the Republic of Haiti, and the numbers proposed are in accordance with the plans submitted to the department as having been determined upon and approved after consultation with the Haitian Government. The Marine Corps is now very short of officers and noncommissioned officers, and the Medical Department of the Navy is in a similar condition, and it would seriously embarrass the service to furnish the proposed detail for the Haitian Republic unless legislative provision were made to fill the vacancies so caused. I am informed that it is very desirable to secure the speedy enactment of such legislation, since the plans for assistance of the Republic of Haiti can not be carried into effect without the details being made from the naval service; and, as you are aware, officers of the Navy and Marine Corps can not legally assume or hold offices under the Haitian Government owing to the provisions of Article I, section 9, clause 8, of the Constitution, without the consent of Congress.

Sincerely, yours,

JOSEPHUS DANIELS,
*Secretary of the Navy.*

The CHAIRMAN COMMITTEE ON NAVAL AFFAIRS,
*House of Representatives.*

—

DEPARTMENT OF STATE,
*Washington, March 4, 1916.*

Hon. LEMUEL P. PADGETT,
*Chairman Committee on Naval Affairs,*
*House of Representatives.*

SIR: I have the honor to acknowledge the receipt of your letter of March 3, 1916, with which you were good enough to inclose a copy of House resolution 12584, entitled "A bill to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of Haiti, and for other purposes."

In reply to your request for an expression of my opinion on the bill, I venture to suggest that if it meets with your approval the bill be redrafted in the form of the inclosure herewith, which I understand has been already submitted to your consideration by the Secretary of the Navy.

You will note certain increases in the numbers of sergeants, hospital stewards, and hospital apprentices, first class, which have been suggested by the Department of the Navy.

Now that the treaty between the United States and the Republic of Haiti, signed at Port au Prince on September 16, 1915, and approved by the Haitian Chambers November 11, has been ratified by the United States Senate, it is most desirable that every effort should be made to put the provisions thereof in operation with the least delay, and it is therefore my earnest hope that favorable action may be taken upon the bill at the earliest moment possible.

I can not too strongly recommend that officers and enlisted men of the Navy and Marine Corps of the United States can be made available for service in Haiti, not only because I am convinced that the purpose of the treaty would be most advantageously carried to a successful completion by them, but particularly on account of the fact that by their excellent behavior and considerate bearing they have gained the confidence and esteem of the Government and people of Haiti, toward whom this Government has now assumed great responsibilities and obligations.

It is needless for me to assure you that I shall be most happy to be of any assistance in this connection, and I beg to thank you for your courtesy in affording me an opportunity to express an opinion in the matter.

I have the honor to be, sir,
Your obedient servant,

ROBERT LANSING.

The SPEAKER. The question is on suspending the rules and passing the bill.

Mr. CALLAWAY. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 239, nays 53, answered "present" 6, not voting 135, as follows:

YEAS—239.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following additional pairs:

On the vote:

Mr. TALBOTT (for Padgett bill) with Mr. CARAWAY (against).

Mr. PATTEN (for Padgett bill) with Mr. REILLY (against).

Until further notice:

Mr. WHALEY with Mr. MUDD.

Mr. HAY with Mr. GOULD.

Mr. AIKEN with Mr. BARCHFELD.

Mr. FLOOD with Mr. FORDNEY.

Mr. KITCHIN with Mr. MCKINLEY.

Mr. LOFT with Mr. WALSH.

Mr. CLARK of Florida with Mr. DRUKKER.

Mr. DAVIS of Texas with Mr. KREIDER.

Mr. BOOHER with Mr. HAYES.

Mr. SHERWOOD with Mr. MOTT.

Mr. STOUT with Mr. WINSLOW.

Mr. VENABLE with Mr. BEALES.

Mr. BORLAND with Mr. HUTCHINSON.

Mr. MONTAGUE with Mr. STINESS.

Mr. RAINEY with Mr. NICHOLS of Michigan.

Mr. GRIFFIN with Mr. SELLS.

Mr. COLLIER with Mr. Moss of West Virginia.

Mr. SEARS with Mr. SMITH of Idaho.

Mr. CONNELLY with Mr. HOPWOOD.

Mr. CONRY with Mr. COLEMAN.

Mr. SAUNDERS with Mr. COSTELLO.

Mr. CARAWAY. Mr. Speaker, I voted "nay" and I am paired with the gentleman from Maryland, Mr. TALBOTT. I desire to withdraw my vote of "nay" and answer "present."

The name of Mr. CARAWAY was called, and he answered "Present."

Mr. REILLY. Mr. Speaker, I voted "nay." I am paired with the gentleman from New York, Mr. PATTEN. I desire to withdraw that vote and answer "present."

The name of Mr. REILLY was called, and he answered "Present."

The result of the vote was announced as above recorded.

Mr. TEMPLE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a letter from the Secretary of State and one from Col. Lejeune, of the Marine Corps, and also a copy of the treaty, all bearing on the bill that has just been passed.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD on the bill passed in the manner indicated. Is there objection?

There was no objection.

The letter and treaty referred to are as follows:

DEPARTMENT OF STATE,
*Washington, April 10, 1916.*

The Hon. H. W. TEMPLE,
*House of Representatives.*

SIR: I have the honor to acknowledge the receipt of your communication of the 6th instant in which, referring to House bill 12835, authorizing officers and enlisted men of the Navy and Marine Corps of the United States to serve under the Government of the Republic of Haiti, and authorizing an increase both in the Marine Corps and the Navy, you request further information concerning the purpose for which these officers and men are to be used and how such service differs from that which is performed by the Marine Corps in other services.

You are doubtless aware that a detachment of the Marine Corps of the United States is serving at Peking, China, and that another detachment is performing similar duties at Managua, Nicaragua. Their duties are, as the nature of their service implies, to protect the property and personnel of the respective legations.

The duty contemplated by the bill now under consideration, and which will comprise the only other foreign duty of a permanent nature now being performed by the Marine Corps, differs in that such service contemplates their nomination as officers of the Haitian constabulary, provided for in the treaty between the United States and the Republic of Haiti of September 6, 1915, a copy of which, in accordance with your request, I take pleasure in inclosing. Under the operation of this treaty and the exercise of the good offices of the United States the army of Haiti has been entirely disbanded and replaced by a native constabulary, temporarily officered by officers and men of the United States Marine Corps and naval forces.

The important obligation assumed by us to guarantee the protection of life and property, the maintenance of order, and the establishment of an adequate police force in that Republic renders it highly expedient that, until such time as the Haitians may have proven their ability to act in such capacity, the officers and men of the Marine Corps of the United States be duly authorized to act in the capacity contemplated by the bill now under discussion.

Noting with great pleasure that you are inclined to lend this measure your support, and trusting that the information herein contained may satisfactorily answer you inquiry,

I have the honor to be, sir, your obedient servant,

ROBERT LANSING.

(Inclosure: As stated.)

---

HEADQUARTERS UNITED STATES MARINE CORPS,
COMMANDANT'S OFFICE,
*Washington, April 7, 1916.*

Hon. H. W. TEMPLE, M. C.,
*House of Representatives, Washington, D. C.*

MY DEAR MR. TEMPLE: Your letter of the 6th instant, in regard to Mr. PADGETT'S bill, H. R. 12835, has been received, and in the temporary absence of the major general commandant I have the honor to reply as follows:

The only foreign countries, except Haiti, in which marines are now serving are China and Nicaragua. At Peking there are 9 officers and 337 enlisted men, and at Managua, Nicaragua, there are 3 officers and 107 enlisted men; these detachments serving as legationary guards for the protection of the ministers and their suites, and of other Americans and their property, from the violence of the turbulent, disorderly, and revolutionary elements in those countries. Such protection was found necessary because of the extreme instability of the Governments, the former detachment having been established in September, 1905, relieving an Army detachment, and the latter in November, 1912.

The First Brigade of Marines, consisting at present of 82 officers and 1,665 enlisted men, is now serving on shore in Haiti, engaged in the preservation of life, property, and tranquillity in that country. The brigade landed in July and August, 1915, and succeeded in a short time in reducing a state of disorder and anarchy to one of order and peace.

The military and police forces of Haiti have been found unreliable and have been abolished. It is proposed to organize and train a gendarmerie composed of native Haitians to assist in and eventually to take over most of the work now being done by the marines. It will be necessary that this force be temporarily officered largely by Americans in order to insure its efficiency and to place it on a sound basis from the start. The treaty signed September 16, 1915, and ratified by the Senate on February 28, 1916, provides for the detail of such officers by the President of Haiti on the nomination of the President of the United States. Marine officers and noncommissioned officers are at present assisting informally in the organization and training of this gendarmerie, but are prohibited by the Constitution from accepting positions contemplated by the treaty above referred to without the authority of Congress.

The bill to which you refer gives the necessary authority of Congress, and provides for the replacing of the officers and enlisted men detached for this duty. Without the provision for filling the places of those necessarily separated from their ordinary duty, the corps would be very seriously handicapped in the discharge of its normal functions.

I trust that the foregoing contains the information that you desire.

Very respectfully,

JOHN A. LEJEUNE,
*Colonel, United States Marine Corps.*

---

*To the Senate:*

With a view to receiving the advice and consent of the Senate to its ratification, I transmit herewith a treaty between the United States and the Republic of Haiti, signed at Port au Prince on September 16, 1915, having for its objects the strengthening of the amity existing between the two countries, the remedying of the present condition of the revenues and finances of Haiti, the maintenance of the tranquillity of that Republic, and the carrying out of plans for its economic development and prosperity.

WOODROW WILSON.

THE WHITE HOUSE,
*Washington, January 11, 1916.*

---

THE PRESIDENT:

The undersigned the Secretary of State has the honor to submit, with a view to its transmission to the Senate, if you approve thereof, to receive the advice and consent of that body to its ratification, a treaty between the United States, and the Republic of Haiti, signed at Port au Prince on September 16, 1915, having for its objects the strengthening of the amity existing between the two countries, the remedying of the present condition of the revenues and finances of Haiti, the maintenance of the tranquillity of that Republic, and the carrying out of plans for its economic development and prosperity.

Respectfully submitted.

ROBERT LANSING.

DEPARTMENT OF STATE,
*Washington, January 8, 1916.*

---

TREATY BETWEEN THE UNITED STATES AND THE REPUBLIC OF HAITI.

PREAMBLE.

The United States and the Republic of Haiti desiring to confirm and strengthen the amity existing between them by the most cordial cooperation in measures for their common advantage;

And the Republic of Haiti desiring to remedy the present condition of its revenues and finances, to maintain the tranquillity of the Republic, to carry out plans for the economic development and prosperity of the Republic and its people;

And the United States being in full sympathy with all of these aims and objects and desiring to contribute in all proper ways to their accomplishment;

The United States and the Republic of Haiti have resolved to conclude a convention with these objects in view, and have appointed for that purpose plenipotentiaries.

The President of the United States, Robert Beale Davis, jr., chargé d'affaires of the United States;

And the President of the Republic of Haiti, Louis Borno, secretary of state for foreign affairs and public instruction, who, having exhibited to each other their respective powers, which are seen to be full in good and true form, have agreed as follows:

ARTICLE I.

The Government of the United States will, by its good offices, aid the Haitian Government in the proper and efficient development of its agricultural, mineral, and commercial resources and in the establishment of the finances of Haiti on a firm and solid basis.

ARTICLE II.

The President of Haiti shall appoint, upon nomination by the President of the United States, a general receiver and such aids and employees as may be necessary, who shall collect, receive, and apply all customs duties on imports and exports accruing at the several customhouses and ports of entry of the Republic of Haiti.

The President of Haiti shall appoint, upon nomination by the President of the United States, a financial adviser, who shall be an officer attached to the Ministry of Finance, to give effect to whose proposals and labors the minister will lend efficient aid. The financial adviser shall devise an adequate system of public accounting, aid in increasing the revenues and adjusting them to the expenses, inquire into the validity of the debts of the Republic, enlighten both Governments with reference to all eventual debts, recommend improved methods of collecting and applying the revenues, and make such other recommendations to the minister of finance as may be deemed necessary for the welfare and prosperity of Haiti.

ARTICLE III.

The Government of the Republic of Haiti will provide by law or appropriate decrees for the payment of all customs duties to the general receiver, and will extend to the receivership and to the financial adviser all needful aid and full protection in the execution of the powers conferred and duties imposed herein; and the United States on its part will extend like aid and protection.

ARTICLE IV.

Upon the appointment of the financial adviser the Government of the Republic of Haiti, in cooperation with the financial adviser, shall collate, classify, arrange, and make full statement of all the debts of the Republic, the amounts, character, maturity, and condition thereof, and the interest accruing and the sinking fund requisite to their final discharge.

ARTICLE V.

All sums collected and received by the general receiver shall be applied, first, to the payment of the salaries and allowances of the general receiver, his assistants and employees and expenses of the receivership, including the salary and expenses of the financial adviser, which salaries will be determined by previous agreement; second, to the interest and sinking fund of the public debt of the Republic of Haiti; and, third, to the maintenance of the constabulary referred to in Article X, and then the remainder to the Haitian Government for purposes of current expenses.

In making these applications the general receiver will proceed to pay salaries and allowances monthly and expenses as they arise, and on the first of each calendar month will set aside in a separate fund the quantum of the collection and receipts of the previous month.

ARTICLE VI.

The expenses of the receivership, including salaries and allowances of the general receiver, his assistants and employees, and the salary and expenses of the financial adviser, shall not exceed 5 per cent of the collections and receipts from customs duties, unless by agreement by the two Governments.

ARTICLE VII.

The general receiver shall make monthly reports of all collections, receipts, and disbursements to the appropriate officer of the Republic of Haiti and to the Department of State of the United States, which reports shall be open to inspection and verification at all times by the appropriate authorities of each of the said Governments.

ARTICLE VIII.

The Republic of Haiti shall not increase its public debt except by previous agreement with the President of the United States, and shall not contract any debt or assume any financial obligation unless the ordinary revenues of the Republic available for that purpose, after defraying the expenses of the Government, shall be adequate to pay the interest and provide a sinking fund for the final discharge of such debt.

ARTICLE IX.

The Republic of Haiti will not without a previous agreement with the President of the United States modify the customs duties in a manner to reduce the revenues therefrom; and in order that the revenues of the Republic may be adequate to meet the public debt and the expenses of the Government, to preserve tranquillity, and to promote material prosperity, the Republic of Haiti will cooperate with the financial adviser in his recommendations for improvement in the methods of collecting and disbursing the revenues and for new sources of needed income.

ARTICLE X.

The Haitian Government obligates itself, for the preservation of domestic peace, the security of individual rights, and full observance of the provisions of this treaty, to create without delay an efficient constabulary, urban and rural, composed of native Haitians. This constabulary shall be organized and officered by Americans, appointed by the President of Haiti, upon nomination by the President of the United States. The Haitian Government shall clothe these officers with the proper and necessary authority and uphold them in the performance of their functions. These officers will be replaced by Haitians as they, by examination conducted under direction of a board to be selected by the senior American officer of this constabulary and in the presence of a representative of the Haitian Government, are found to be qualified to assume such duties. The constabulary herein provided for shall, under the direction of the Haitian Government, have supervision and control of arms and ammunition, military supplies, and traffic therein throughout the country. The high contracting parties agree that the stipulations in this article are necessary to prevent factional strife and disturbances.

ARTICLE XI.

The Government of Haiti agrees not to surrender any of the territory of the Republic of Haiti, by sale, lease, or otherwise, or jurisdiction over such territory, to any foreign Government or power, nor to enter into any treaty or contract with any foreign power or powers that will impair or tend to impair the independence of Haiti.

ARTICLE XII.

The Haitian Government agrees to execute with the United States a protocol for the settlement, by arbitration or otherwise, of all pending pecuniary claims of foreign corporations, companies, citizens, or subjects against Haiti.

ARTICLE XIII.

The Republic of Haiti, being desirous to further the development of its natural resources, agrees to undertake and execute such measures as in the opinion of the high contracting parties may be necessary for the sanitation and public improvement of the Republic, under the supervision and direction of an engineer or engineers, to be appointed by the President of Haiti upon nomination by the President of the United States, and authorized for that purpose by the Government of Haiti.

ARTICLE XIV.

The high contracting parties shall have authority to take such steps as may be necessary to insure the complete attainment of any of the objects comprehended in this treaty; and, should the necessity occur, the United States will lend an efficient aid for the preservation of Haitian independence and the maintenance of a government adequate for the protection of life, property, and individual liberty.

ARTICLE XV.

The present treaty shall be approved and ratified by the high contracting parties in conformity with their respective laws, and the ratifications thereof shall be exchanged in the city of Washington as soon as may be possible.

ARTICLE XVI.

The present treaty shall remain in full force and virtue for the term of 10 years, to be counted from the day of exchange of ratifications, and further for another term of 10 years if, for specific reasons presented by either of the high contracting parties, the purpose of this treaty has not been fully accomplished.

In faith whereof, the respective plenipotentiaries have signed the present convention in duplicate, in the English and French languages, and have thereunto affixed their seals.

Done at Port au Prince, Haiti, the 16th day of September, A. D. 1915.

[SEAL.] ROBERT BEALE DAVIS, JR.,
*Chargé d'Affairs of the United States.*

[SEAL.] LOUIS BORNO,
*Secretary of State for Foreign Affairs and Public Instruction.*

Mr. HENSLEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the bill that has just been passed.

The SPEAKER. Is there objection?

There was no objection.

Mr. OLIVER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the bill just passed.

The SPEAKER. Is there objection?

There was no objection.

PREVENTION AND TREATMENT OF LEPROSY IN THE UNITED STATES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 193) to provide for the care and treatment of persons afflicted with leprosy and to prevent the spread of leprosy in the United States.

The SPEAKER. Is there objection?

Mr. MOON. Mr. Speaker, I object.

Mr. ADAMSON. Mr. Speaker, will the gentleman object to passing it over without prejudice?

Mr. MOON. No.

Mr. ADAMSON. Then I so request.

The SPEAKER. Is there objection?

There was no objection.

Mr. ADAMSON. Mr. Speaker, would the Chair entertain a motion to suspend the rules?

The SPEAKER. He will.

Mr. ADAMSON. Then, Mr. Speaker, I move to suspend the rules and pass the bill as amended, and in addition to the committee amendment I suggest an amendment, on page 2, in line 21, to strike out the words "or homes."

The SPEAKER. The Clerk will report the bill with amendments.

The Clerk read as follows:

*Be it enacted, etc.*, That for the purpose of carrying out the provisions of this act the Secretary of the Treasury is authorized to select and obtain, by purchase or otherwise, a site suitable for the establishment of a home for the care and treatment of persons afflicted with leprosy, to be administered by the United States Public Health Service; and either the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, or the Secretary of Agriculture is authorized to transfer to the Secretary of the Treasury any abandoned military, naval, or other reservation suitable for the purpose, or as much thereof as may be necessary, with all buildings and improvements thereon, to be used for the purpose of said home or homes.

SEC. 2. That there shall be received into said home, under regulations prepared by the Surgeon General of the Public Health Service, with the approval of the Secretary of the Treasury, any person afflicted with leprosy who presents himself or herself for care, detention, and treatment, or who may be apprehended under authority of the United States quarantine acts, or any person afflicted with leprosy duly consigned to said home by the proper health authorities of any State, Territory, or the District of Columbia. The Surgeon General of the Public Health Service is authorized, upon request of said authorities, to send for any person afflicted with leprosy within their respective jurisdictions, and to convey said person to such home for detention and treatment, and when the transportation of any such person is undertaken for the protection of the public health, the expense of such removal shall be paid from funds set aside for the maintenance of said home.

SEC. 3. That regulations shall be prepared by the Surgeon General of the Public Health Service, with the approval of the Secretary of the Treasury, for the government and administration of said home and for the apprehension, detention, treatment, and release of all persons who are inmates thereof.

SEC. 4. That the Secretary of the Treasury be, and he is hereby, authorized to cause the erection upon such site of suitable and necessary buildings for the purposes of this act at a cost not to exceed the sum herein appropriated for such purpose.

SEC. 5. That when any commissioned or other officer of the Public Health Service is detailed for duty at the home herein provided for he shall receive, in addition to the pay and allowances of his grade, one-half the pay of said grade and such allowances as may be provided by the Surgeon General of the Public Health Service, with the approval of the Secretary of the Treasury.

SEC. 6. That for the purposes of carrying out the provisions of this act there is hereby appropriated, from any money in the Treasury not otherwise appropriated, the sum of $250,000, or as much thereof as may be necessary, for the preparation of said home, including the erection of necessary buildings, the maintenance of the patients, pay and maintenance of necessary officers and employees, until June 30, 1917.

The SPEAKER. Is a second demanded?

Mr. MANN. Mr. Speaker, I demand a second.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Georgia is entitled to 20 minutes and the gentleman from Illinois to 20 minutes.

Mr. ADAMSON. Mr. Speaker, I do not care to consume much time. The gentleman from Virginia [Mr. MONTAGUE] prepared the bill for presentation. I will take just a minute to state that it is the same bill that we passed last year, I think, with practical unanimity. It was not considered in the Senate. There is a tremendous demand for this all over the country on account of the increasing number of lepers that are upon different communities in the United States. I hope there will be no trouble about passing the bill. I reserve the remainder of my time.

The SPEAKER. Does the gentleman from Illinois care to consume his time?

Mr. MANN. No.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

SESSION OF UNITED STATES COURT AT DURANGO, COLO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13765) to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The SPEAKER. Is there objection?

Mr. MOON. Mr. Speaker, I reserve the right to object.

Mr. TAYLOR of Colorado. Mr. Speaker, will the gentleman from Tennessee [Mr. MOON] withhold his objection and permit me to make a brief statement in respect to this bill?

Mr. MOON. Yes.

Mr. TAYLOR of Colorado. Mr. Speaker, I earnestly hope that neither the gentleman from Tennessee [Mr. MOON] nor anyone else will object to the consideration of this bill, because it is of very great importance to the people and the business interests of southwestern Colorado. At the present time the State of Colorado is one Federal judicial district. Terms of court are now held in Denver, Pueblo, and Montrose, and the purpose of this bill is to establish an additional term of court in the city of Durango.

Durango is a city of some five or six thousand population and is practically 500 miles from Denver. The business interests, the lawyers, litigants, and all people in the five counties of the southwestern part of Colorado are exceedingly anxious to have a term of court established at that city. The expense at the present time, and ever since Colorado was admitted into the Union, of taking Federal business from that portion of the State to Denver for trial has been very burdensome. In fact, it is prohibitive to litigants of ordinary means. For instance, when a poor man brings a suit in the State court, which is a case that can be transmitted to the Federal court, and the defense elects to transfer it to that court, and takes the case to Denver, it practically prevents the plaintiff from following up, and he is virtually denied his rights.

The board of county commissioners of La Plata County, Colo., in which the city of Durango is located, have filed a guaranty to furnish court rooms for the holding of terms of court, including fuel, light, heat, and janitor services, free and without any expense to the Government until such time as a public building can be constructed in that city. That guaranty is in the form of a resolution, as follows:

RESOLUTION.

Whereas there is now pending before Congress a bill (H. R. 22) to amend the laws relating to the judiciary and to establish a term of the Federal court in the city of Durango, La Plata County, Colo.: Now, therefore, be it

*Resolved by the board of county commissioners of said La Plata County*, That in consideration of the passage of said bill and establishing a term of the Federal court in the city of Durango, La Plata County, Colo., said La Plata County hereby agrees to furnish court room for the holding of said term of court, including fuel, light, heat, and janitor service, free and without expense to the Government, until such time as a public building may be constructed in the city of Durango.

Passed and approved this 10th day of March, A. D. 1916.

A. E. REECE, *Chairman.*

Attest:

OLIVE ORME, *County Clerk.*

STATE OF COLORADO,
*County of La Plata, ss:*

I, Olive Orme, county clerk within and for said La Plata County, do hereby certify the above to be a true and correct copy of a resolution passed and approved by the board of county commissioners of said La Plata County on the 10th day of March, A. D. 1916. In testimony whereof I have hereunto affixed my name and the seal of said county at Durango, Colo., this 10th day of March, A. D. 1916.

[SEAL.] OLIVE ORME,
*County Clerk and Recorder.*

A public building at Durango was authorized by Congress some four years ago and the Supervising Architect is preparing to construct that building now. And the people are desirous of having a suitable provision made in that building for the Federal court, and such provision can not be made excepting by authority of Congress in the form of the passage of a bill of this kind. So that there is an emergency for the passage of this bill as soon as possible.

The Southwestern Colorado Bar Association has prepared a statement upon this subject which is very complete, and I ask to have it inserted in the RECORD as a part of my remarks, as follows:

DURANGO, COLO., *March 11, 1916.*

To the DURANGO EXCHANGE,
*Durango, Colo.*

GENTLEMEN: The Southwestern Bar Association is very much interested in the establishment of a Federal court at Durango, and at your suggestion has taken up the matter of the bill introduced by Mr. TAYLOR for that purpose, together with the suggestions made by Judge Robert E. Lewis. A canvass of the bar association and a study of the conditions show:

1. That the members of the bar to a man are unwilling to accept any provision which does not fix a definite, regular term of court to be held here if there is any business to be transacted.

2. They have no desire to cause expense or to compel the attendance of the court and officials when there is no business to transact, and to the end that the suggestions made by Judge Lewis may be met they are willing that the bill be so amended as to provide:

(a) That when there are no cases to be tried and no business to be transacted the term may be continued or adjourned by the judge in chambers at Denver.

(b) That jurors for each term may be selected from such counties as the judge may designate.

3. The board of county commissioners have by resolution agreed to furnish a courtroom, light, heat, and janitor service, without expense to the Government until such time as a public building may be constructed. Provision for such construction has been made and the site has been purchased. A certified copy of said resolution is herewith transmitted.

4. An office of the district clerk in Durango is maintained in the courthouse. The clerk is in attendance there every day and is available in all business hours. If he were also appointed clerk of the United States court the expense of that office would be nominal, and business could be transacted as readily and promptly as at the offices in Denver and Pueblo.

Under these conditions we feel that the establishment of a term of court here will not involve any considerable expense or serious inconvenience to the judge and court officials, and we think there is no valid objection to the establishment of such court.

The greater part of this district is distant from Denver at least 500 miles. It takes practically 24 hours to get to Denver from Durango, and a day longer from some other portions of the district. It takes substantially the same time and almost the same cost to reach Pueblo, and the only train service to Pueblo lands us there at 1 or 2 o'clock in the morning and makes us leave there at about midnight. It takes as long to reach Montrose, and because of higher rates over the Southern Railroad the expense is about as great as to reach Denver, and the conveniences of travel are very limited. Under these conditions it is preferable to transact the Federal court business from this district at Denver rather than at Montrose or Pueblo, and it is a hardship which should not be imposed upon our people to require them to attend at any of these places.

The bar association has been unable to get any complete data as to the business from this section which has been transacted in the Federal court. It has no record of such business outside of this county, and has no complete record of the business here. Reports made by a part only of the local attorneys to our committee show that they have been interested in the last few years in some 150 matters in the Federal court. The United States commissioner at this place has had upward of 125 cases from 1907 to this time. There are other commissioners in the district and several other counties which would be included in a Federal district to be formed, and the amount of business from these counties has been considerable. At one time, when the mining business was active, there were some 40 mining cases from Dolores County alone pending in the Federal court. During last summer there was tried in Denver a case from this section where more than 150 witnesses were taken to Denver. We think it will appear that the costs to the Government in its cases against the Porter Fuel Co., the New Mexico Lumber Co., the Pagosa Lumber Co., the Denver & Rio Grande Railroad Co., and other cases where a large number of witnesses were required, would maintain a local court here for a great many years. It has happened that most of the larger cases, involving the greatest expense and the largest number of witnesses, arising in this section have not been heard by Judge Lewis, but have been heard by Judges Trieber, Riner, Marshall, and others. For this reason, probably, Judge Lewis is not fully aware of the extent of the business actually arising in this section.

We suggest, further, that in all probability the Federal court business hereafter will increase rather than diminish, for the following reasons:

1. There is a land office here, within whose jurisdiction all kinds of public-land business is transacted and from which before long appeals to the courts will probably be allowed.

2. There are two Indian reservations, with separate agencies, schools, and irrigation projects, and with all questions arising on account thereof or on account of dealings with the Indians.

3. There are two large forest reserves with district offices within this district from the administration of which the usual questions pertaining thereto may be expected to arise.

4. There are a large number of mining districts now again actively engaged in mining. A very large proportion of the properties are owned by foreign corporations or nonresident individuals. There is renewed activity in all these camps, resulting from better prices for products and improved methods, and as well from new discoveries of precious metals and new metals.

5. There are several national banks, having the right in certain cases to sue and be sued in Federal courts.

6. The counties, schools, cities, towns, irrigation districts, power plants, mines, and industrial corporations have outstanding large issues of bonds held by nonresidents.

7. There are a large number of irrigation ditches and projected irrigation ditches, heading in Colorado and covering New Mexico lands. It can readily be seen that this condition is certain to furnish a very considerable business for the Federal courts.

8. There are seven large rivers rising in Colorado and running into New Mexico, Utah, Arizona, and California, and interstate questions as to rights to the use of water and as to respective priorities are continually arising.

9. Important questions are arising as to the priority of the Indians as to the right to use water as against the whites who have made actual, prior usage. These questions will arise as to practically all of our streams, and before long must be settled in the Federal courts.

10. This section is geographically and commercially intimately connected with northwestern New Mexico and southeastern Utah, both rapidly growing and developing communities, and controversies arising out of these relations between citizens of different States must result from this intercourse.

To the above matters may be added the facts that there is a large power plant owned and operated by a foreign corporation, which covers a large part of the territory of this district; that a considerable quantity of land has been sold by the Government with coal and mineral rights reserved to the United States; that the Government surveys of lands are very irregular and defective; and that the boundary line between Colorado and New Mexico has never been satisfactorily adjusted, and perhaps dozens of other circumstances from which Federal questions might arise.

In the course of our investigations a matter has come to our attention which we think should be mentioned. We find that several cases (par-

ticularly damage cases) have been removed from the local courts to the Federal courts, with the result that the plaintiff was unable to follow them there and to further prosecute them. We are not advised as to the merits of these cases, but certain it is that their removal to Denver and Pueblo deprived the plaintiffs in these cases of the opportunity to have tried the question involved. This condition ought not to exist, and if for no other reason there should be a Federal court within easy reach where such cases might be tried.

We have a list of the title of something over 200 cases which we can furnish you if desired, and we will endeavor to get returns from other counties, which will largely increase the number. It has been impossible for us to make anything like a full list of the cases from this section, but we have found that a very considerable amount of business, some of which was very important, has originated from this section. A very considerable number of the cases arising in this section have been in charge of Denver attorneys, and consequently are not found on the dockets of our local attorneys.

We ask you to join us in urging the passage of the bill and suggest that you concur in the amendments indicated if such amendments meet with the approval of Mr. TAYLOR.

Respectfully,

THE SOUTHWESTERN COLORADO BAR ASSOCIATION,
By REESE MCCLOSKEY, *President*.
ROBT. S. CLEMENTS, *Secretary*.

REESE MCCLOSKEY,
ROBT. S. CLEMENTS,
B. W. RITTER,
*Committee*.

It will be observed from the bill that I have therein provided that whenever there is no business to be transacted in any year, if such should ever be the case, that the judge may adjourn the term of court by an order issued at chambers in Denver, and thereby be relieved of the expense and inconvenience of making the trip to Durango. The Judiciary Committee have investigated this matter very carefully and made a complete, unanimous, and strongly favorable recommendation.

Mr. DYER. Will the gentleman yield?

Mr. TAYLOR of Colorado. I will.

Mr. DYER. I just want to state in addition to what the gentleman from Colorado has said that the Committee on the Judiciary of the House had hearings upon this bill and considered it and were unanimous in making a favorable report.

Mr. MOON. May I ask the gentleman from Colorado has he consulted the gentleman from Illinois [Mr. MANN] as to whether this bill should be passed or not?

Mr. TAYLOR of Colorado. I will say yes. [Laughter.] I asked the minority leader just a few minutes ago whether or not he had any objections to this bill, and he very frankly told me he had not. I do not always ask the gentleman from Illinois about my bills, but sometimes I do. This matter is of so much importance to the people of the southern part of my district, that, out of over anxiety, I might say, for the passage of the bill, I endeavored to ascertain whether or not there was going to be any systematic opposition to it on the part of the minority. In view of the number of bills that have been slaughtered here to-day I do not want to take any chances on getting this bill killed if I can possibly avoid it.

Mr. MOON. And he did not object. Mr. Speaker, I want to make a statement for a moment or two. I am not making any captious objection to these bills. I am willing that any bill upon the calendar should pass by a vote of the House of Representatives if it is entitled to pass, but there is a condition existing here that I think is improper. This House took from the Speaker the right of recognition on unanimous-consent requests, and it seems by common consent that everybody now goes to the gentleman from Illinois [Mr. MANN] to see whether he will object or not. I had a bill here to-day to which the gentleman objected that is identical with the bill of the gentleman from Colorado except that he hopes to have a place fixed for his court, and we have already got the place. That is all the difference between them. Just like the balance of you gentlemen, I talked with my friend [Mr. MANN] about the propriety of this matter some time ago, and he wanted to know how many cases arose in that county. Well, I could not tell him how many cases came up in a single county. I knew that division of the State had an immense amount of litigation and that that county furnished a great part of it, and I said I would send for the statement, but it had not come. Now he persists in his objection to a local measure of this kind. He proposes to determine for himself whether my bill shall pass or not. He does not make any objection to the bill of the gentleman from Colorado and does not make any objection to others.

Mr. TAYLOR of Colorado. Will the gentleman permit an interruption?

Mr. MOON. I will.

Mr. TAYLOR of Colorado. I may say the gentleman from Illinois did not agree not to object to it, but he said——

Mr. MOON. I want to say this: The gentleman from Illinois [Mr. MANN] had the right, and I am not questioning his right, to make objections to any bill in this House to which he sees fit to make objection, but when a simple measure like the one I have already referred to is presented in this House, nothing in the world in it except to hold court at two places in one county in a division, not changed or altered by the terms of the law, for the convenience of the lawyers and the convenience of the public, there comes that objection. Under such conditions I felt that it was about time in this House that bills cease to pass by unanimous consent, if a measure of that sort could not pass. I have no objection, of course, to the bills, but I have to the method of procedure—to this method of the minority leader determining in this House as to whether measures shall be passed or not because he likes or dislikes certain Democrats who may have them up. Now, why did not the gentleman object to that bill? He objected to mine. As I said, the gentleman has the right to object to my bill or anybody else's bill, I concede he has the right to continually make any sort of remark that he sees fit, until he gets to the danger line, and then very probably he will not make them—remarks about Members who are not even engaged in the debate, as he did in reference to myself to-day. Decent procedure in this House demands under such conditions that bills hereafter shall pass by a vote of the House of Representatives and not by unanimous consent, and I shall object from now on except in specially meritorious cases.

The SPEAKER. The gentleman from Tennessee objects.

Mr. TAYLOR of Colorado. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. TAYLOR of Colorado. Will the Speaker entertain a motion to suspend the rules and consider this bill at this time?

The SPEAKER. He will.

Mr. TAYLOR of Colorado. Then, Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 13765).

The SPEAKER. The gentleman from Colorado moves that the rules be suspended and the bill be passed which the Clerk will report.

Mr. TAYLOR of Colorado. There are no amendments.

The Clerk read as follows:

A bill (H. R. 13765) to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

*Be it enacted, etc.*, That section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and the same is hereby, amended to read as follows:

"SEC. 73. That the State of Colorado shall constitute one judicial district, to be known as the district of Colorado. Terms of the district court shall be held at Denver on the first Tuesday in May and November; at Pueblo on the first Tuesday in April; at Montrose on the second Tuesday in September. That the counties of Archuleta, La Plata, San Juan, Montezuma, and Dolores, in said State, shall constitute the southwestern division of said district, and a term of said court shall be held at the city of Durango, in said district, on the first Tuesday in October of each year; and the clerk of said district court of said State shall maintain an office at said city of Durango, in charge of himself or a deputy, which shall be kept open at all times for the transaction of the business of the court; and the selection of jurors for attendance upon said court in said southwestern division may be selected from said counties: *Provided*, That if at the time of holding a term of said court in any year at said city of Durango there is no business to be there transacted by said court the term may be adjourned or continued by order of the judge of said court in chambers at Denver, Colo.

The SPEAKER. Is a second demanded? [After a pause.] The Chair hears no request for a second. The question is on suspending the rules and passing the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

## CONCURRENT JURISDICTION OVER COLUMBIA RIVER.

Mr JOHNSON of Washington. Mr. Speaker, I move to suspend the rules and pass the bill H. R. 6097, with an amendment which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the bill and read the amendment into it.

The Clerk read as follows:

A bill (H. R. 6097) to ratify the compact and agreement between the States of Oregon and Washington regarding concurrent jurisdiction over the waters of the Columbia River and its tributaries in connection with regulating, protecting, and preserving fish.

*Be it enacted, etc.*, That the Congress of the United States of America hereby consents to and ratifies the compact and agreement entered into between the States of Oregon and Washington relative to regulating, protecting, and preserving fish in the boundary waters of the Columbia River and other waters, which compact and agreement is contained in section 20 of chapter 188 of the general laws of Oregon for 1915, and section 116, chapter 31, of the session laws of Washington for 1915, and is as follows:

"All laws and regulations now existing, or which may be necessary for regulating, protecting, or preserving fish in the waters of the Columbia River, over which the States of Oregon and Washington have concurrent jurisdiction, or any other waters within either of said States, which would affect said concurrent jurisdiction, shall be made, changed, altered, and amended in whole or in part, only with the mutual consent and approbation of both States."

Nothing herein contained shall be construed to affect the rights of the United States to regulate commerce or the jurisdiction of the United States over navigable waters.

This act shall take effect from and after the date of its passage.

The SPEAKER. Is a second demanded?

Mr. FINLEY. Mr. Speaker, I demand a second.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The gentleman from Washington [Mr. JOHNSON] is entitled to 20 minutes, and the gentleman from South Carolina [Mr. FINLEY] to 20 minutes.

Mr. FINLEY. Mr. Speaker, I would like to ask the gentleman from Washington to explain the necessity for this legislation on the part of Congress.

Mr. JOHNSON of Washington. This matter is explained in the report of the committee which accompanies the bill. The States of Oregon and Washington have each, in joint sessions of their legislatures, passed memorials to Congress asking for this legislation by Congress, which is in the nature of a ratification of an agreement between the legislatures of the two States. Under the Constitution of the United States the different States can not make treaties and agreements with each other. Any compact or understanding that may be reached has to be ratified by Congress. To provide for such ratification is the purpose of this bill.

Mr. FINLEY. How will it affect the fishing rights of the citizens of other States?

Mr. JOHNSON of Washington. Citizens of other States can not be concerned. These two States have concurrent jurisdiction over the waters of the Columbia River, which runs for 300 miles between the States.

Mr. FINLEY. I understand that. So there is nothing of that kind in the statute or enumerated in the bill?

Mr. JOHNSON of Washington. The right to take fish for sale is limited to citizens of the United States and to persons who have declared their intention to become such and who have been residents of one or other of the States on the Columbia River. We have, by amendment, provided that none of the laws of the United States in regard to navigation may be done away with or anything of that kind.

Mr. FINLEY. I was asking a question with reference to fishing rights of the citizens of other States.

Mr. JOHNSON of Washington. They are not affected.

Mr. FINLEY. One provision that I heard read said they may be altered or amended by the respective States.

Mr. JOHNSON of Washington. I will try to make the general situation clear to the gentleman. For 25 years these two States have had fishing laws that differed greatly. For instance, in regard to placing nets at the mouth of smaller streams that run into the Columbia River, the law was different on one side of the river from that on the other side. The law in regard to citizenship was different, and so on. After these 25 years of quarreling and trouble the two legislatures appointed commissions to get together and harmonize the laws. Then the legislatures adopted uniform laws and then they passed identical memorials to Congress asking for the ratification of a compact, as explained in the bill.

I ask for a vote, Mr. Speaker.

Mr. ADAMSON. I would like to ask the gentleman if the saving amendment that he spoke to me about has been read into the bill?

Mr. JOHNSON of Washington. It has been read into the bill.

Mr. ADAMSON. A provision not to interfere with commerce over navigable waters?

Mr. JOHNSON of Washington. Yes; that has been read in.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

APPROPRIATION FOR THE ORGANIZED MILITIA.

Mr. McKELLAR. Mr. Speaker, I move to suspend the rules and pass the bill H. R. 15005.

The SPEAKER. The gentleman from Tennessee moves to suspend the rules and pass the bill, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 15005) to appropriate $200,000 for training the Organized Militia of any State, Territory, or of the District of Columbia.

*Be it enacted, etc.*, That for paying the expenses of the Organized Militia of any State, Territory, or of the District of Columbia, which may be authorized by the Secretary of War to participate in such encampments as may be established for the field instruction of the troops of the Regular Army, as provided by sections 15 and 21 of the act of January 21, 1903, entitled "An act to promote the efficiency of the militia, and for other purposes," to be immediately available and to remain available until the end of the fiscal year 1917, $200,000 is hereby appropriated: *Provided*, That when it is not practicable to obtain the presence of regular troops for a joint encampment, the funds herein appropriated shall be available for such encampments, maneuvers, and field instruction for the Organized Militia as the Secretary of War may prescribe.

The SPEAKER. Is a second demanded?

Mr. MANN. Mr. Speaker, I demand a second.

Mr. McKELLAR. Mr. Speaker I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that a second may be considered as ordered. Is there objection? [After a pause.] The Chair hears none.

The gentleman from Tennessee [Mr. McKELLAR] is entitled to 20 minutes and the gentleman from Illinois [Mr. MANN] 20 minutes.

Mr. McKELLAR. Mr. Speaker and gentlemen of the House, this is a bill that comes from the War Department, and the reason for it in substance is as follows:

The Division of Militia Affairs has been arranging for some time to hold summer encampments. It was first contemplated they should be joint encampments composed of divisions of the Regular Army and of the Organized Militia.

However, the Army appropriation bill has been retarded because of the fact that we have to finish the new Army reorganization bill before the Army appropriation bill can be passed. Now they need this money for organizing these camps. Several of them are fixed before the 30th of June, and in the Army appropriation bill the amount appropriated for this purpose will be decreased by this sum of $200,000 appropriated in this bill. The Secretary of War has recommended that this be done. They need the money in order to carry out these summer-camp plans, and I take it for granted that there can be no real objection to the passage of this bill at this time.

Mr. SISSON. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from Tennessee yield to the gentleman from Mississippi?

Mr. McKELLAR. Yes.

Mr. SISSON. Is there an item in the Army bill of this character?

Mr. McKELLAR. Yes; it is precisely like this; but it will be omitted from the Army bill. This will take the place of the provision that ordinarily goes into the Army bill. It is just appropriating at this time for this purpose in lieu of the usual appropriation in the Army bill. I will say to the gentleman that the Army appropriation bill is frequently passed by this time.

Mr. SISSON. Does the Army appropriation bill carry this amount of money? Is it in the bill?

Mr. McKELLAR. It will be in the bill. The bill has not been reported out yet, and we can not report it out, I will say to the gentleman, until after the Hay or the Chamberlain bill, or a composite bill, is passed.

Mr. SISSON. It is in conference now?

Mr. McKELLAR. Yes.

Mr. SISSON. The conference report, of course, will have to come in and be adopted before the Committee on Military Affairs will be able to understand what organization they will have to appropriate for?

Mr. McKELLAR. Yes.

Mr. SISSON. If that becomes a law, your committee will not appropriate this amount of money for the current year?

Mr. McKELLAR. No; we will not appropriate this amount of money for this purpose this year.

Mr. TILSON. Mr. Speaker, will the gentleman yield to me for a statement?

Mr. McKELLAR. Does the gentleman want time?

Mr. TILSON. Yes; I would like to have two minutes.

Mr. McKELLAR. I will yield to the gentleman from Connecticut two minutes and reserve the balance of my time, Mr. Speaker.

Mr. TILSON. Mr. Speaker, this is by way of anticipation of the usual maneuver-encampment appropriation. It is important that these encampments be extended over as long a period as possible so as to enable as many Regular Army officers as possible to attend them; and if all the encampments must be arranged after June 30, so as to come in under the regular appropriation bill, the time would be very much limited. Hence the importance of having this bill pass ahead of the regular appropriation bill, making $200,000 immediately available. It is the intention of the committee to report just $200,000 less in the item for the joint encampments than would be reported if this bill should not pass.

Mr. McKELLAR. If nobody wishes to be heard, Mr. Speaker——

Mr. MANN. Mr. Speaker, I am not opposed to the passage of this bill. If anyone who is opposed to it desires time, I will

yield time. But I want to make a statement or two in reference to it.

Because of the necessities of the case I am not opposed to the bill, but it is an extremely bad practice. The Committee on Military Affairs does not have jurisdiction over deficiency appropriations. We have passed already in this Congress three deficiency appropriation bills, and if the War Department had attended to its business it would have asked for a deficiency appropriation to have gone in one of those appropriation bills instead of sending in a letter to have an appropriation made, not in an appropriation act at all but as a legislative act.

Mr. McKELLAR. Mr. Speaker, will the gentleman yield?

Mr. MANN. Certainly; I yield.

Mr. McKELLAR. I imagine that the gentleman will agree that our Army appropriation bill has been delayed because of this new Army reorganization bill.

Mr. MANN. Oh, the Army appropriation bill would not have become a law in any event until after the 1st of July. The gentleman knows that. It did not two years ago.

Mr. TILSON. Mr. Speaker, will the gentleman yield to me?

Mr. MANN. Certainly.

Mr. TILSON. As a matter of fact, the gentleman from Illinois is right, and this appropriation ought to have been made in the Army appropriation bill that passed a year ago. They knew at that time that there ought to be maneuver encampments held prior to July 1, 1916, and this sum ought to have been included in last year's appropriation bill.

Mr. MANN. I am not going so far back as that. We are told every day that we are to follow the military experts all along the line. In the main, I agree with that; but the military experts in the War Department are not very expert as to legislation.

They ought to know, and they do know, that when they want a deficiency appropriation they should make an estimate for it as a deficiency appropriation, and let it go before the proper committee as such. We have passed three deficiency appropriation bills which have become laws at this session of Congress. This item, or a part of it, ought to have been included in one of those bills, if they were in a hurry. If it had not been for the unusual circumstances to-day, any one Member could have knocked this bill into a cocked hat if he had wanted to. That is the way the Army does its expert business at times.

Mr. McKELLAR. I will say to the gentleman that if I had known that was what he was going to say, I would not have interrupted.

Mr. MANN. I am not criticizing the Committee on Military Affairs. They did not ask for a deficiency appropriation. They asked for the passage of a bill, which shows how foolish people can be at times.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and two-thirds voting in the affirmative, the rules were suspended and the bill passed.

### ARMY SUPPLIES TO MILITARY SCHOOLS AND COLLEGES.

Mr. MILLER of Minnesota. Mr. Speaker, I move to suspend the rules and pass the bill (S. 4726) to permit issue by the supply departments of the Army to certain military schools and colleges.

The SPEAKER. The gentleman from Minnesota moves to suspend the rules and pass a bill, which the Clerk will report.

The bill was read, as follows:

*Be it enacted, etc.*, That the Secretary of War is authorized to issue, at his discretion and under such regulations as he may prescribe, such quartermaster supplies and stores belonging to the Government, and which can be spared for that purpose, as may appear to be required for the establishment and maintenance of military instruction camps by the students of any educational institution to which an officer of the Army is detailed as professor of military science and tactics, and the Secretary of War shall require a bond in each case in the value of the property for the care and safe-keeping thereof and for the return of the same when required.

The SPEAKER. Is a second demanded?

Mr. FOSTER. I demand a second.

Mr. MILLER of Minnesota. I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. The gentleman from Minnesota asks unanimous consent that a second may be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Minnesota is entitled to 20 minutes and the gentleman from Illinois to 20 minutes.

Mr. MILLER of Minnesota. Mr. Speaker, I can state in a moment's time the reason for the passage of this bill.

For several years the military departments of some of our leading universities, as well as some of the schools in the United States organized and conducted along military lines, have desired the practical experience to be obtained only from fieldwork. Four years ago I introduced a bill permitting the Secretary of War to loan tents and equipages of that kind to schools of this class for the purposes indicated. It did not become a law.

At the beginning of this session of Congress this bill was drawn by the Secretary of War, or under his direction, sent to the Senate and introduced there by Senator NELSON, and passed that body. It has been unanimously reported by the House committee, and is here on the calendar for consideration.

A paragraph in the pending general Army reorganization bill contains this provision. The reason for asking consideration of this bill now is that it is generally agreed that the Army reorganization bill will not become a law until some time in June, or later. There are numerous colleges in the United States that desire to avail themselves of the privileges of this act early in June of this year. I have special reference to the University of Minnesota, with its cadet corps of 1,400 students, which has already made arrangements to mobilize on the Fort Snelling Reservation and conduct a series of field maneuvers lasting eight days, an unusually serious effort for practical military training by this cadet corps, which is pronounced by military inspectors to be one of the best in the United States. The president of the university informs me that it is necessary that this bill be passed immediately, in order that they may avail themselves of the opportunity to get the necessary supplies.

Mr. FOSTER. Mr. Speaker, I do not know that I am opposed to this bill, except for the fact that, as I understand, this provision is in the Army reorganization bill, which in all probability will be reported to the House and Senate for some final action within the next week or 10 days. For that reason I do not see the necessity of passing a separate bill providing for a loan of certain supplies to these military schools and colleges. I suppose that 30 days will not make much difference to these schools and colleges in getting these supplies, which this bill provides shall be obtained from the War Department.

Mr. GREENE of Vermont. Will the gentleman yield?

Mr. FOSTER. Yes.

Mr. GREENE of Vermont. The gentleman from Illinois realizes, of course, that a summer camp requires advance preparation by the school authorities, and the procurement of the necessary supplies must be anticipated with sufficient certainty so that they may make requisitions in order to get the supplies in time for use.

Mr. FOSTER. Let me say to the gentleman from Vermont——.

Mr. MOON. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Tennessee rise?

Mr. MOON. To suggest that we have worked here long enough without a quorum. I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Tennessee makes the point of order that there is no quorum present. Evidently there is not.

Mr. FOSTER. I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

| | | | |
|---|---|---|---|
| Adair | Eagan | Howard | Mudd |
| Anderson | Edmonds | Howell | Neely |
| Anthony | Edwards | Huhphrey, Wash. | Nelson |
| Austin | Evans | Husted | Nichols, Mich. |
| Bacharach | Fairchild | Hutchinson | North |
| Barchfeld | Fitzgerald | James | Norton |
| Barkley | Flood | Jones | Oglesby |
| Beales | Flynn | Keister | Olney |
| Borland | Focht | Kelley | O'Shaunessy |
| Britt | Fordney | Kent | Paige, Mass. |
| Britten | Frear | Key, Ohio | Patten |
| Brumbaugh | Freeman | Kiess, Pa. | Platt |
| Burnett | Gardner, Mass. | Konop | Porter |
| Byrnes, S. C. | Garrett | Kreider | Pou |
| Campbell | Gillett | Langley | Rainey |
| Cantrill | Godwin, N. C. | Lee | Roberts, Mass. |
| Carter, Okla. | Goodwin, Ark. | Lehlbach | Roberts, Nev. |
| Casey | Gould | Liebel | Rowland |
| Chandler, N. Y. | Graham | Lindbergh | Rucker |

| | | | |
|---|---|---|---|
| Stone | Towner | Watkins | Williams, Ohio |
| Sutherland | Vare | Watson, Pa. | Wilson, Ill. |
| Switzer | Walsh | Webb | Winslow |
| Talbott | Ward | Whaley | Wise |

The SPEAKER. On this vote 275 Members have responded to their names—a quorum.

Mr. COX. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The gentleman from Indiana moves that the House do now adjourn.

The question was taken; and on a division (demanded by Mr. Cox) there were 27 ayes and 159 noes.

So the House refused to adjourn.

Mr. FOSTER. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

Mr. FOSTER. Mr. Speaker, I asked for a second in order to get some information. The gentleman from Minnesota has given this information and says that the War Department asks for this quick action. While I do not like the plan of putting two laws on the statute books relating to the same thing, the other may not become a law for some time, and I shall make no objection.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

BRIDGE ACROSS TOMBIGBEE RIVER.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent for a minute to make a statement that I think will appeal to the brethren.

The SPEAKER. The gentleman from Georgia asks unanimous consent for a minute to address the House. Is there objection?

There was no objection.

Mr. ADAMSON. The gentleman from Alabama [Mr. GRAY], who is sick, has an emergency bridge bill, and has been trying to get it up, but has been unable to, on the Unanimous Consent Calendar. In consideration of the circumstances, I want to request that the Speaker recognize me to move to suspend the rules and take up that bill. It will take but a moment.

Mr. MANN. I have no objection to the Chair recognizing the gentleman to move to suspend the rules.

Mr. ADAMSON. That is what I want.

Mr. MANN. That is a request addressed to the Speaker.

The SPEAKER. The gentleman is recognized to move to suspend the rules.

Mr. ADAMSON. The gentleman moves to suspend the rules and pass the bill S. 4603 as amended.

The SPEAKER. The Clerk will report the bill, reading into it the amendments.

The Clerk read as follows:

An act to authorize the Jackson Highway Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Tombigbee River at Princes Lower Landing, near Jackson, Ala.

*Be it enacted, etc.*, That the Jackson Highway Bridge Co., a corporation organized under the laws of the State of Alabama, its successors and assigns, be, and are hereby, authorized to construct, maintain, and operate a bridge and all approaches thereto across the Tombigbee River at or near Princes Lower Landing, near Jackson, Ala., at a point suitable to the interests of navigation, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: *Provided*, That said bridge shall be constructed, maintained, and operated so that it may serve as a roadway for continuous use by the public as a highway bridge, to be used by vehicles, pedestrians, horsemen, animals, and all kinds of highway traffic and travel, for the transit of which reasonable rates of toll may be charged and received.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. Is a second demanded? [After a pause.] The Chair hears no request for a second. The question is on suspending the rules and passing the bill as amended.

Mr. COOPER of Wisconsin. Mr. Speaker, I would like to ask the gentleman from Georgia a question. Does the bill contain a provision for tolls?

Mr. ADAMSON. It does, but that is regulated by the general bridge act, which authorizes the Secretary of War to control that.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

INTERLOCKING DIRECTORATES OF NATIONAL BANKS.

Mr. GLASS. Mr. Speaker, I move to suspend the rules and pass the bill S. 4432, to amend section 8 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended, which I send to the desk and ask to have read.

The Clerk read as follows:

*Be it enacted, etc.*, That section 8 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, be, and the same is hereby, amended by striking out the period at the end of the second clause of said section, inserting in lieu thereof a colon, and adding to said clause the following:

"*And provided further*, That nothing in this act shall prohibit any officer, director, or employee of any member bank or class A director of a Federal reserve bank, who shall first procure the consent of the Federal Reserve Board, which board is hereby authorized, at its discretion, to grant, withhold, or revoke such consent, from being an officer, director, or employee of not more than two other banks, banking associations, or trust companies, whether organized under the laws of the United States or any State, if such other bank, banking association, or trust company is not in substantial competition with such member bank."

The consent of the Federal Reserve Board may be procured before the person applying therefor has been elected as a class A director of a Federal reserve bank or as a director of any member bank.

The SPEAKER. Is a second demanded?

Mr. BUCHANAN of Illinois. Mr. Speaker, I demand a second.

Mr. GLASS. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The genfleman from Virginia is entitled to 20 minutes and the gentleman from Illinois 20 minutes.

Mr. GLASS. Mr. Speaker, this is a bill known as the Kern amendment to the Clayton Act, reported unanimously from the Banking and Currency Committee of the Senate and passed there, I believe, without objection. It is reported unanimously from the Banking and Currency Committee of the House. Its purpose may best and most briefly be expressed by reading a paragraph from a letter from Gov. Hamlin, of the Federal Reserve Board, to Senator OWEN. In that letter Gov. Hamlin says:

This amendment, if adopted, will give some elasticity to the provisions of the Clayton Act which prohibit directors of other banking institutions from serving as directors of member banks under certain conditions. It would seem to be desirable to have this discretionary power vested in the board, since in many instances the enforcement of the provisions of the Clayton Act will result in depriving a member bank of the services of a director because of his connection with other banking institutions, even though his serving on both boards would not be violative of the spirit of the [Clayton] act.

In a word, this Kern amendment permits a person to be a member of two banking directorates in the same community and one bank directorate in some other community. This is a modification of the Clayton Act only in that respect. It does not contravene the real spirit and intent of the Clayton Act. The dual or triplicate directorship is to be permitted by the action of the Federal Reserve Board first obtained, and only in cases in which it shall appear to the satisfaction of the Federal Reserve Board that there is no substantial competition between the banking institutions upon whose directorates the person wishes to serve.

I reserve the remainder of my time.

Mr. BUCHANAN of Illinois. Mr. Speaker, when the reserve banking act was passed in the last Congress some of us, at least, hoped that the power of Wall Street would be curbed, but it seemed the administration was very kind to that combination which has been committing the crimes against the people and selected members of the Banking Reserve Board who operated affairs in complete accord with those who had been violating—I will not say violating—those who had been exercising the power of depriving the people of their rights. One of the things that we hoped to get a benefit from was denying to the big-business financiers of the country the power of interlocking directorates. This bill puts that power back into their hands. I believe Members of Congress ought to realize that the currency question is one of the biggest questions there is, and they also, at least by this time, when prices are three and four times the normal amount, should realize that there is a power somewhere by which big financiers of the country and big business continue to rob and plunder the wealth-producing masses of the country. And instead of giving them back any part of the power that was taken away from them in the banking and currency bill we ought to be taking more away from them. Why, gentlemen, to-day, through this power that is being exercised, one of the most important commodities there is to the American people, that is steel, has gone up three and four times the price it was before the war occurred, giving the war as an excuse; but in fact the reason is that they have that power or monopoly. They have the power to charge whatever they see fit to the people of the country, and if that power is enlarged at this time, instead of taking it away from them, what can the people of the country hope for?

Now, on account of that enormous robbing price they are charging it is going to stop one of the most important industries of the country if they are not curbed in some manner or other, because they are getting these prices so high that the building and construction industry of the country can not stand it, and it is about time that the Members of Congress and the people of the country wake up to the fact that something ought to be done and that we should take more power away from these people instead of giving them back some of the power that was supposed to be taken from them. Of course as long as the laws are administered by the agents of these criminals and high financiers and they have the judges to construe, strain, wrench, and twist it to suit themselves, it does not matter much about the laws we have in the country, but let us not weaken any of the laws which have been passed. I want to warn the Members of this Congress that if they start to take a step backward that the people of the country will soon become aroused and will relegate to the political scrap heap those who are responsible for it. The administration now is doing nothing to prevent the crimes that are being committed by big business of the country; in fact, they seem to acquiesce in them. We appropriate money here for the investigation of some poor devil who has not committed any crime; but the agents of big business, who are plundering and robbing the great wealth-producing masses of the country, are permitted to run with a free hand rampant over the rights and interests of the people of the country.

Mr. Speaker, this bill did not come to my attention until I came into the Chamber this afternoon. I am sorry that somebody of greater ability has not seen it of sufficient importance to take up this question and try to stop a step backward in this important legislation. In fact, we ought to be giving the people of the country protection from the money power instead of loosening up the reins, so they may have greater freedom in robbing and plundering the great masses of the people.

Mr. SMITH of Minnesota. Will the gentleman yield?

Mr. BUCHANAN of Illinois. I will reserve the balance of my time and will yield time to the gentleman, if he desires.

Mr. SMITH of Minnesota. No; I want to ask the gentleman a question.

Mr. BUCHANAN of Illinois. I do not know that I am prepared to answer the question, but I will if I can.

Mr. SMITH of Minnesota. Is the gentleman aware of the fact that this bill simply permits the Federal Reserve Board to permit a director of a member bank of the Federal Reserve System to be a director of not more than two other banks, and those banks must be noncompetitive?

Mr. BUCHANAN of Illinois. Oh, I understand how those things are done, especially when the control of these privileges are in the hands of the agents of the trusts and big business of the country. I want to say it is dangerous to take such a step. It does not matter whether it is noncompetitive. Who is going to say whether or not they are noncompetitive?

Mr. SMITH of Minnesota. Your Federal Reserve Board created for that purpose.

Mr. BUCHANAN of Illinois. I am not willing that the Federal Reserve Board shall have any more power than they have got now. They have got too much power now.

Mr. GLASS. Mr. Speaker, I ask for a vote.

Mr. MANN. Will the gentleman yield me a minute?

Mr. GLASS. I yield the gentleman—how much time?

Mr. MANN. I do not want but a moment.

Mr. GLASS. I yield to the gentleman.

Mr. MANN. Mr. Speaker, a little while ago we passed a bill authorizing national banks to buy stock in foreign banking companies. When that bill was reported to the House it contained a provision authorizing a national bank in a city of 100,000 to establish branch banks.

Partly at my suggestion, I think—I do not want to put the entire responsibility upon the gentleman from Virginia [Mr. GLASS]—when he moved to suspend the rules, he left that provision out in order that it might be considered by itself. It is a matter of some importance to a city like Chicago, both of these propositions, and I presume the same is true in other large cities. There are in the city of Chicago a number of large national banks in the downtown centers. There are in the outlying portions of the city, I think, 30 or 40 or 50 banks, some of them national banks, but most of them State banks. Under the bill now pending these local outlying banks, of course, all clear through the downtown banks. In one sense they are a kind of branch banks, though the stockholders are entirely different. Those local banks cater to the local business. This bill permits a director of one of the downtown banks to be a director of two of these small outlying banks. And the outlying banks always desire, if practicable, to have one of their directors a director of one of the big banks through whom they clear. It is an advantageous arrangement to everybody, adds to the value of the small bank, and facilitates the watching of the business that goes through the big banks. These small banks, however, were not in favor of a proposition to let the big banks establish branch banks in their locality, thinking that if that were done the branch banks would be merely receiving banks, to receive deposits without giving much attention to the needs of the locality.

I am very much obliged to the gentleman from Virginia [Mr. GLASS] for the action that he took on the former matter, so that these people can be heard if they desire to be heard in the future, and I am very glad to support this bill.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 10750. An act permitting the Mondak Bridge Co. to construct, maintain, and operate a bridge across the Missouri River, in the State of Montana; and

H. R. 8067. An act to quiet the title to certain lands in the possession of G. B. Dickson, and for other purposes.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 34 minutes p. m.) the House adjourned until to-morrow, Friday, May 5, 1916, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Acting Secretary of the Treasury, inviting attention to an item in the general deficiency bill covering the removal and reerection of the wharf at the quarantine station at Honolulu, Hawaii, and making suggestions thereon (H. Doc. No. 1081), were taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 12582) to relieve the estate of Thomas H. Hall, deceased, late postmaster at Panacea, Fla., and the bondsmen of said Thomas H. Hall, of the payment of money alleged to have been misappropriated by a clerk in said office, reported the same without amendment, accompanied by a report (No. 636), which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. HOOD: A bill (H. R. 15346) for the purchase of a site for a public building at Beaufort, Carteret County, N. C.; to the Committee on Public Buildings and Grounds.

By Mr. BOOHER: A bill (H. R. 15347) to amend existing laws relating to the use of alcohol, free of tax, by scientific institutions or colleges of learning; to the Committee on Ways and Means.

By Mr. PARK: A bill (H. R. 15348) to increase the salaries of the United States district attorney and United States marshal for the southern district of Georgia, and for other purposes; to the Committee on the Judiciary.

By Mr. FERRIS: A bill (H. R. 15349) to amend an act entitled "An act to codify, revise, and amend the laws relating to the Judiciary"; to the Committee on the Judiciary.

By Mr. CARLIN: Joint resolution (H. J. Res. 217) extending until October 15, 1918, the effective date of section 10 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914; to the Committee on the Judiciary.

By Mr. TREADWAY: Joint resolution (H. J. Res. 218) authorizing the acceptance of the gift of the Berkshire Trout Hatchery, Berkshire County, Mass.; to the Committee on the Merchant Marine and Fisheries.

By Mr. HOWARD: Resolution (H. Res. 223) authorizing the installation of an electrical mechanical voting machine in the House of Representatives; to the Committee on Accounts.

By Mr. HUGHES: Resolution (H. Res. 224) authorizing the appointment of an annual clerk to the Committee on Education; to the Committee on Accounts.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ADAIR: A bill (H. R. 15350) granting a pension to Maria Routte; to the Committee on Pensions.

Also, a bill (H. R. 15351) granting an increase of pension to Robert E. Best; to the Committee on Invalid Pensions.

By Mr. ASHBROOK: A bill (H. R. 15352) granting an increase of pension to Louis C. Baughman; to the Committee on Pensions.

By Mr. CALDWELL: A bill (H. R. 15353) granting a pension to Louisa Donnelly; to the Committee on Invalid Pensions.

By Mr. COADY: A bill (H. R. 15354) granting an increase of pension to Benjamin F. Shipley; to the Committee on Invalid Pensions.

By Mr. CRAGO: A bill (H. R. 15355) granting an increase of pension to Herbert W. Barnhart; to the Committee on Pensions.

By Mr. CULLOP: A bill (H. R. 15356) granting a pension to Perneta J. Campbell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15357) granting an increase of pension to John W. Buskirk; to the Committee on Invalid Pensions.

By Mr. DAVENPORT: A bill (H. R. 15358) for the relief of Lottie Gilstrap; to the Committee on Claims.

By Mr. DEMPSEY: A bill (H. R. 15359) granting a pension to Melissa Sisley; to the Committee on Invalid Pensions.

By Mr. DICKINSON: A bill (H. R. 15360) granting an increase of pension to George W. Wolfe; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 15361) for the relief of Daniel O'Connell; to the Committee on Military Affairs.

By Mr. FREEMAN: A bill (H. R. 15362) granting an increase of pension to Sarah V. Pitts; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15363) granting an increase of pension to Mary J. Freeman; to the Committee on Invalid Pensions.

By Mr. FULLER: A bill (H. R. 15364) granting an increase of pension to Ellen B. Thomas; to the Committee on Invalid Pensions.

By Mr. HAYES: A bill (H. R. 15365) granting an increase of pension to Cecile F. Jacobi; to the Committee on Invalid Pensions.

By Mr. HELVERING: A bill (H. R. 15366) granting an increase of pension to William H. Pitts; to the Committee on Invalid Pensions.

By Mr. JONES: A bill (H. R. 15367) to remove the charge of desertion against the military record of William H. Thompson; to the Committee on Military Affairs.

Also, a bill (H. R. 15368) granting a pension to Augustine L. Sherwood; to the Committee on Pensions.

By Mr. KEATING: A bill (H. R. 15369) granting an increase of pension to Edward N. Webb; to the Committee on Invalid Pensions.

By Mr. KEY of Ohio: A bill (H. R. 15370) granting a pension to Sarah Katharine Dodge (incompetent); to the Committee on Invalid Pensions.

By Mr. LITTLEPAGE: A bill (H. R. 15371) granting a pension to James E. Ratliff; to the Committee on Pensions.

By Mr. McGILLICUDDY: A bill (H. R. 15372) granting an increase of pension to Henry A. Cross; to the Committee on Invalid Pensions.

By Mr. NEELY: A bill (H. R. 15373) granting a pension to Perry L. Lockhart; to the Committee on Pensions.

Also, a bill (H. R. 15374) granting an increase of pension to Isaac Koon; to the Committee on Invalid Pensions.

By Mr. PATTEN: A bill (H. R. 15375) for the relief of the heirs of the late James L. Watson; to the Committee on Claims.

By Mr. RODENBERG: A bill (H. R. 15376) granting a pension to Sarah L. Truck; to the Committee on Invalid Pensions.

By Mr. SANFORD: A bill (H. R. 15377) granting a pension to Christopher Dahlen; to the Committee on Invalid Pensions.

By Mr. SMITH of New York: A bill (H. R. 15378) for the relief of James G. Hill; to the Committee on Military Affairs.

By Mr. STEPHENS of Texas: A bill (H. R. 15379) providing for disposal of the inherited estate of Kills On Her Own Ground, wife and heir to one-half of the estate of Dummy, deceased allottee of the Crow Indian Reservation, Mont.; to the Committee on Indian Affairs.

Also, a bill (H. R. 15380) providing for the disposal of the inherited estate of Kills On Her Own Ground, mother and heir to two-thirds of the estate of Small Head, deceased allottee of the Crow Indian Reservation, Mont.; to the Committee on Indian Affairs.

By Mr. STINESS: A bill (H. R. 15381) granting an increase of pension to Mary A. Dixon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15382) granting an increase of pension to Ellener R. Potter; to the Committee on Invalid Pensions.

By Mr. TAGUE: A bill (H. R. 15383) granting an increase of pension to James W. Cail; to the Committee on Invalid Pensions.

By Mr. WILSON of Louisiana: A bill (H. R. 15384) to give jurisdiction to the Court of Claims to readjudicate the case of Albert H. Gillispie against the United States, No. 30777 on the docket of said court; to the Committee on the Judiciary.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition; to the special committee to investigate the charges of contempt against H. Snowden Marshall, United States district attorney for the southern district of New York.

Also (by request), memorials of voters at the Leisure Hour Club, Carson City, and mass meeting of Nevada Woman's Civic League, Reno, Nev., favoring a favorable report on the Susan B. Anthony amendment; to the Committee on the Judiciary.

By Mr. BAILEY: Memorial of churches of the western district of Pennsylvania of the Church of the Brethren, against compulsory military training; to the Committee on Military Affairs.

By Mr. CALDWELL: Memorial of the Board of Aldermen of New York, pledging loyalty to the United States Government and favoring adequate preparedness; to the Committee on Military Affairs.

Also, memorial of the Board of Aldermen of New York, favoring House bill 6915 and Senate bill 3081; to the Committee on the Post Office and Post Roads.

Also, petition of Henry W. Volkman, of Richmond Hill, Long Island, N. Y., opposing House bill 13048; to the Committee on the District of Columbia.

Also, petition of sundry citizens of Glendale, Long Island, N. Y., opposing House bills 491 and 6468; to the Committee on the Post Office and Post Roads.

By Mr. DALE of New York: Petition of Nellie H. Nelson, of Minneapolis, Minn., favoring woman suffrage amendment; to the Committee on the Judiciary.

Also, petition of the Chamber of Commerce of Montgomery, Ala., favoring Shields general dam bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of New York Milk Committee, against Senate joint resolution 120, relative to members of United States Public Health Service; to the Committee on Agriculture.

By Mr. EAGAN: Memorial of the Chamber of Commerce of Montgomery, Ala., in re so-called Shields general dam bill; to the Committee on the Public Lands.

Also, memorial of the American Hardware Manufacturers' Association, in re flood control; to the Committee on Flood Control.

By Mr. ELSTON: Petition of D. P. Decker and other citizens of Oakland, Cal., against Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

By Mr. EMERSON: Memorial of Ohio Milk Distributors' Association as to sanitary condition of Ohio dairies; to the Committee on Agriculture.

Also, petition of citizens of the twenty-second district of Ohio, against the water-power bill; to the Committee on Interstate and Foreign Commerce.

By Mr. ESCH: Memorial of Wisconsin Conference of the Evangelical Association, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of 414 members of the Evangelical Lutheran St. Peter's Church, of Dorchester, and 2,170 members of Trinity Evangelical Lutheran Church, of Milwaukee, Wis., against United States in war; to the Committee on Foreign Affairs.

By Mr. FESS: Petition of sundry citizens of Franklin, Madison, and Pickaway Counties, Ohio, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. FLYNN: Petition of New York Milk Committee, against Senate joint resolution 120, relative to member of United States Public Health Service in a medical or private health association; to the Committee on Agriculture.

Also, memorial of Chamber of Commerce of Montgomery, Ala., favoring passage of the Shields general dam bill; to the Committee on Interstate and Foreign Commerce.

By Mr. FREEMAN: Petition of Woman's Christian Temperance Union of Norwich and Baptist Church of Clinton, Conn., favoring national prohibition; to the Committee on the Judiciary.

By Mr. FULLER: Petition of Illinois Commandery of the Military Order of the Loyal Legion, advocating universal military service; to the Committee on Military Affairs.

Also, petition of Clarence Poe, editor of the Progressive Farmer, relative to rural-credits legislation; to the Committee on Banking and Currency.

Also, petition of associated merchants of La Salle, Ill., opposing the price-maintenance bill; to the Committee on Interstate and Foreign Commerce.

Also, papers to accompany a bill granting an increase of pension to Ellen B. Thomas; to the Committee on Invalid Pensions.

By Mr. GALLIVAN: Petition of sundry citizens of Massachusetts against the Taylor system in Government shops; to the Committee on Labor.

Also, memorial of Bay State Automobile Association in re present prices of gasoline; to the Committee on Interstate and Foreign Commerce.

By Mr. HAMILTON of New York: Papers to accompany House bill 15301, granting a pension to Harriet E. Fellows; to the Committee on Invalid Pensions.

By Mr. KING: Petition of sundry citizens of Kewanee, Ill., against the Taylor system in Government shops; to the Committee on Labor.

Also, petition of Evangelical Lutheran Church of St. John, of Quincy, Ill., against bills to amend the postal law; to the Committee on the Post Office and Post Roads.

By Mr. LOUD: Petition of E. Bromley and Methodist Episcopal Church of Mecosta, Mich., favoring national prohibition; to the Committee on the Judiciary.

By Mr. McCLINTIC: Petition of sundry citizens of Shattuck, Okla., opposing Senate bill 645; to the Committee on the District of Columbia.

Also, petition of sundry citizens, favoring the Emerson joint resolution; to the Committee on Ways and Means.

Also, petition of citizens of Greer, Okla., opposing House bill 13048; to the Committee on the District of Columbia.

By Mr. MEEKER: Petition of 38 citizens of St. Louis, Mo., against passage of bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, petitions of Lodges Nos. 24 and 41 of the International Association of Machinists, of St. Louis, and 39 citizens of St. Louis, Mo., favoring House bill 8665, against Taylor system; to the Committee on Labor.

By Mr. MONDELL: Petitions of citizens of Wheatland, Wyo., and vicinity, against war with Germany; to the Committee on Foreign Affairs.

By Mr. NEELY: Petition of citizens of the State of West Virginia, against the Taylor system in Government shops; to the Committee on Labor.

Also, petition of citizens of Grafton, W. Va., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. NOLAN: Petition of the Maryland Realty Corporation, Baltimore, Md., and 39 other leading mercantile establishments of Baltimore, favoring the passage of House bill 11876, known as the Nolan minimum-wage bill; to the Committee on Labor.

By Mr. POWERS: Petition of sundry citizens of Somerset, Ky., against the Taylor system; to the Committee on Labor.

By Mr. SCOTT of Michigan: Petition of sundry citizens of the State of Michigan, favoring national prohibition; to the Committee on the Judiciary.

By Mr. SIEGEL: Memorial of Board of Aldermen of New York City, favoring preparedness; to the Committee on Military Affairs.

By Mr. SMITH of Idaho: Papers to accompany House bill 15222, granting an increase of pension to Patrick F. Corron; to the Committee on Invalid Pensions.

Also, paper to accompany House bill 6796, appropriating to purchase a site and construct a Federal building at Hailey; to the Committee on Public Buildings and Grounds.

Also, memorial of Commercial Club of Lewiston, Idaho, favoring legislation providing for the conducting of experiments for the production of potash and nitrates; to the Committee on Military Affairs.

By Mr. SNYDER: Petition of sundry citizens of the thirty-third congressional district of New York, against Taylor system in Government shops; to the Committee on Labor.

By Mr. STEPHENS of Nebraska: Petition of W. Ganiard and others, of Petersburg, Nebr., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. TINKHAM: Memorial of executive committee of the Society of the Chagres, in re conditions in Canal Zone; to the Committee on Reform in the Civil Service.

By Mr. TOWNER: Petition of Rev. R. L. Wilson and other citizens of Allerton, Iowa, praying for the enactment of a Christian amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. WINSLOW: Petition of sundry citizens of the State of Massachusetts, favoring national prohibition; to the Committee on the Judiciary.

## SENATE.

### FRIDAY, *May 5, 1916.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, Thou art worthy to receive all our adoration and praise. Every thought Thou hast had to usward has been a thought of grace, and love, and mercy. Thou hast dealt with us in our larger life, our national life, as Thou hast not dealt with any other people. We pray we may not forget our debt of obligation, an obligation that can be paid only by obedience to Thy will. We thank Thee that Thou hast given to us in this land a patriotism that is not based upon any of those forces that disintegrate and destroy, but upon those high ethical ideals which have been made known to men through the revelation of God. Guide us this day in the discharge of our duties. Forgive our sins. For Christ's sake. Amen.

The Journal of the proceedings of the legislative day of Wednesday, May 3, 1916, was read and approved.

#### COAST DEFENSES.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of the Senate of April 24, 1916, a tabulated statement showing the military forces now located in the States of Oregon and Washington, the branch of the service to which they belong, the places at which stationed, and the numerical strength at each place; also the coast defenses in the States mentioned. The communication and accompanying paper will be printed in the RECORD and referred to the Committee on Military Affairs.

The VICE PRESIDENT subsequently said:

This morning the Chair laid before the Senate a communication from the Secretary of War in response to a resolution that was introduced by the Senator from Oregon [Mr. CHAMBERLAIN] without reading the letter of the Secretary of War. It is in reference to coast defenses, and in the letter it is stated that it is confidential in character. The Chair ordered the communication printed in the RECORD. The Chair has now withdrawn that order, and if there be no objection the communication will go direct to the Committee on Military Affairs without printing.

#### THE REVOLT IN IRELAND.

Mr. BORAH. Mr. President, I ask leave to have read a very short editorial in the New York Sun of to-day, under the heading, "What would have been Abraham Lincoln's counsel?"

The VICE PRESIDENT. Is there objection? The Chair hears none.

The Secretary read the editorial, as follows:

WHAT WOULD HAVE BEEN ABRAHAM LINCOLN'S COUNSEL?

The heart of the world will join with John Redmond in hoping and pleading that the course of the British Government regarding the great body of Irishmen recently in armed revolt may be shaped by other considerations than those of a sternly punitive policy. At least three of the leaders—brave men, but both technically and legally in treasonable cooperation with the belligerent enemies of the State—have already paid the extreme legal penalty of their infatuated courage. Even as a matter of political expediency it may be doubted whether further executions either under martial or civil process would add an iota to the repressive effect of example. No man of common sense who has studied the history and justly valued the causes of Irish national discontent can mistake the certain consequences to the Empire's future of an attempt to administer retribution by wholesale.

John Redmond is right; and fortunate it will be for Britain if his loyal advice is taken at this time.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 4726) to permit issue by the supply departments of the Army to certain military schools and colleges.

The message also announced that the House had passed the bill (S. 4432) to amend section 8 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the bill (S. 4603) to authorize the Jackson Highway Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Tom Beckby, commonly called Tombigbee, River at Princes Lower Landing, near Jackson, Ala., with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 193. An act to provide for the care and treatment of persons afflicted with leprosy and to prevent the spread of leprosy in the United States;

H. R. 3032. An act authorizing the county of St. Louis to construct a bridge across the St. Louis River between Minnesota and Wisconsin;

H. R. 6097. An act to ratify the compact and agreement between the States of Oregon and Washington regarding concurrent jurisdiction over the waters of the Columbia River and its tributaries in connection with regulating, protecting, and preserving fish;

H. R. 12835. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Republic of Haiti, and for other purposes;

H. R. 13391. An act to amend the act approved December 23, 1913, known as the Federal reserve act, by adding a new section;

H. R. 13474. An act to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911; and

H. R. 13765. An act to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

## PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a petition of Local Union No. 12, Typographical Union, of Baltimore, Md., praying for Government ownership of telegraph and telephone systems, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the National Society of the Daughters of the American Revolution, praying for legislation to protect the flag, coat of arms, seal, shield, and other insignia of the United States against desecration and abuse in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. JOHNSON of South Dakota presented a memorial of sundry citizens of Colome, S. Dak., remonstrating against the proposed creation of a juvenile court in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. JOHNSON of Maine presented a memorial of sundry citizens of Belmont, Me., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. JOHNSON of Maine (for Mr. BURLEIGH) presented a petition of sundry citizens of Cumberland, Me., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also (for Mr. BURLEIGH) presented a memorial of sundry citizens of Belfast and Lincolnville, in the State of Maine, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. HUGHES presented petitions of sundry citizens of New Jersey, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of New Jersey, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

Mr. O'GORMAN. I have a letter in the nature of a memorial from Mrs. Barbara L. Horne, of New York City, which I ask may be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the letter was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

126 WEST NINETY-THIRD STREET,
*New York, May 3, 1916.*

Hon. JAMES A. O'GORMAN,
*United States Senate, Washington, D. C.*

DEAR SIR: Learning that the State Department has informed the American Red Cross that Great Britain will not permit hospital supplies to be sent forward for the central powers, I desire to enter my protest as an American against such a procedure. It would seem that our Government calmly acquiesces in thus nullifying the act of the Geneva Convention.

We speak in this country of "acting for the rights of humanity," while we ignore those very rights in justice and fair play if we uphold Great Britain in her contention on this subject. The American Red Cross must be neutral, and if supplies are sent to the allies they should also go forward to the central powers.

We who know you feel sure that you will continue to work for right, justice, and fair play in this as you have done in the past in other matters.

Very truly, yours, MRS. BARBARA L. HORNE.

Mr. ASHURST. I present resolutions adopted by the New Century Club, of Philadelphia, Pa., which I ask may be printed in the RECORD and referred to the Committee on Indian Affairs.

There being no objection, the resolutions were referred to the Committee on Indian Affairs and ordered to be printed in the RECORD, as follows:

THE NEW CENTURY CLUB,
*124 South Twelfth Street, Philadelphia, May 4, 1916.*

Hon. HENRY F. ASHURST,
*Chairman Indian Committee of the Senate, Washington, D. C.*

DEAR SIR: At a stated meeting of the New Century Club, held May 3, 1916, the following resolution was unanimously adopted, and a copy thereof was directed to be sent you.

"Whereas there are now pending in Congress certain bills inimical to the best interests of the American Indians who are under the care of the United States Government, viz, the Hastings bill (H. R. 108), the Johnson bill (S. 3904), and the Lane bill (S. 4452); and

"Whereas the New Century Club, of Philadelphia, wishes ever to stand for the rights of the oppressed: Be it

*"Resolved*, That the New Century Club, of Philadelphia, consisting of about 800 women, write to our Senators and Representatives asking them to study the terms of these bills in order that they may become convinced of their wrongful character, and to vote against them; be it

*"Resolved*, That a copy of this resolution be sent to our Senators, our Representatives, and to the chairman of the Indian Committee of the Senate and of the House of Representatives."

Very truly,

MARIE C. (Mrs. CHARLES F.) JENKINS,
*Corresponding Secretary.*

Mr. GALLINGER presented a memorial of Mount Livermore Grange, Patrons of Husbandry, of Holderness, N. H., remonstrating against any change being made in the parcel-post law, which was referred to the Committee on Post Offices and Post Roads.

## BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MYERS:

A bill (S. 5855) to provide for the disposal of the inherited estate of Takes Across the Water, widow and sole heir of Looks at the Water, deceased allottee of the Crow Indian Reservation;

A bill (S. 5856) for the cancellation of the allotment and trust patent therefor of Agnes Small Head, or Follows the Track, a deceased Crow Indian of Montana;

A bill (S. 5857) providing for the disposal of the inherited estate of Kills On Her Own Ground, mother and heir to two-thirds of the estate of Small Head, deceased allottee of the Crow Indian Reservation, Mont.; and

A bill (S. 5858) providing for the disposal of the inherited estate of Kills On Her Own Ground, wife and heir to one-half of the estate of Dummy, deceased allottee of the Crow Indian Reservation, Mont.; to the Committee on Indian Affairs.

By Mr. SIMMONS:

A bill (S. 5859) granting an increase of pension to Stephen Rice (with accompanying papers); to the Committee on Pensions.

By Mr. LANE:

A bill (S. 5860) granting an increase of pension to John A. Jones (with accompanying papers); to the Committee on Pensions.

By Mr. DILLINGHAM:

A bill (S. 5861) to create a Board of Accountancy for the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. THOMPSON:

A bill (S. 5862) granting an increase of pension to Frank W. Brown (with accompanying papers); to the Committee on Pensions.

By Mr. PENROSE:

A bill (S. 5863) authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late Charles H. Bingham from Congressional Cemetery, District of Columbia, to Lock Haven, Pa.; to the Committee on the District of Columbia.

By Mr. CURTIS:

A bill (S. 5864) to provide for the classification of the Indians under United States Indian agents or superintendents for the selection of a business committee from among the members of

each tribe of Indians, and for other purposes; to the Committee on Indian Affairs.

A bill (S. 5865) for the relief of Abner W. Loomis (with accompanying papers); to the Committee on Military Affairs.

A bill (S. 5866) granting an increase of pension to Charles E. Anderson (with accompanying papers);

A bill (S. 5867) granting a pension to Sarah E. Baker (with accompanying papers);

A bill (S. 5868) granting a pension to Sarah J. Briles (with accompanying papers);

A bill (S. 5869) granting an increase of pension to Fermon L. Botkin (with accompanying papers);

A bill (S. 5870) granting an increase of pension to George W. Carroll (with accompanying papers);

A bill (S. 5871) granting an increase of pension to Sophronia V. Dodge (with accompanying papers);

A bill (S. 5872) granting a pension to Victoria Duby (with accompanying papers);

A bill (S. 5873) granting an increase of pension to Lewis W. Fulton (with accompanying papers);

A bill (S. 5874) granting an increase of pension to Mary M. Harris (with accompanying papers);

A bill (S. 5875) granting a pension to Mary E. Hixon (with accompanying papers);

A bill (S. 5876) granting an increase of pension to Ferdinand Kunkel (with accompanying papers);

A bill (S. 5877) granting an increase of pension to George M. Kimble (with accompanying papers);

A bill (S. 5878) granting an increase of pension to Nathaniel Minks (with accompanying papers);

A bill (S. 5879) granting a pension to Ella R. Parker (with accompanying papers);

A bill (S. 5880) granting a pension to Mary Ellen Saunders (with accompanying papers);

A bill (S. 5881) granting an increase of pension to Luther M. Summers (with accompanying papers);

A bill (S. 5882) granting an increase of pension to Harriet N. Woods (with accompanying papers); and

A bill (S. 5883) granting an increase of pension to Thomas White (with accompanying papers); to the Committee on Pensions.

By Mr. NELSON:

A bill (S. 5884) granting an increase of pension to Fritz Brendler; to the Committee on Pensions.

By Mr. NORRIS:

A bill (S. 5885) to provide Federal aid in caring for indigent tuberculous persons, and for other purposes; to the Committee on Public Health and National Quarantine.

By Mr. SHIELDS:

A bill (S. 5886) extending the time for the completion of the bridge across the Mississippi River at Memphis, Tenn., authorized by an act entitled "An act to amend an act approved July 20, 1912, entitled 'An act to authorize the Arkansas & Memphis Railway Bridge & Terminal Co. to construct, maintain, and operate a bridge across the Mississippi River,' approved August 23, 1912"; to the Committee on Commerce.

By Mr. SHERMAN:

A bill (S. 5887) granting a pension to Margaret Boudreaux; to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 5888) increasing the limit of cost for site and building at Yonkers, N. Y. (with accompanying papers); to the Committee on Public Buildings and Grounds.

By Mr. SMITH of Arizona:

A bill (S. 5889) granting water-power sites on nonnavigable streams to the States in which located; to the Committee on Public Lands.

A bill (S. 5890) to authorize mining for metalliferous minerals on Indian reservations in the State of Arizona; to the Committee on Indian Affairs.

By Mr. REED:

A bill (S. 5891) granting a pension to Famy Kerr; to the Committee on Pensions.

By Mr. OVERMAN (by request):

A joint resolution (S. J. Res. 129) extending until October 15, 1918, the effective date of section 10 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914; to the Committee on the Judiciary.

### RIVER AND HARBOR APPROPRIATIONS.

Mr. KENYON submitted an amendment intended to be proposed by him to the river and harbor appropriation bill (H. R. 12193), which was referred to the Committee on Commerce and ordered to be printed.

### NATIONAL PROHIBITION.

Mr. THOMPSON. I present a paper setting forth some statistics prepared by Mrs. Alice Stone Blackwell, of Boston, Mass., editor of the Woman's Journal, showing the influence of the women voters in regard to securing prohibition in certain States. I ask that it may be printed in the RECORD for the information of the Senate and the country on these important subjects for legislation now pending before Congress.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

WHY DO THE LIQUOR INTERESTS OPPOSE WOMAN SUFFRAGE?—HAVE THEY REASON TO FEAR IT?—LOOK AT THE FACTS.

The women of Oregon and Arizona got the ballot in 1912, and a constitutional amendment for State-wide prohibition was adopted in 1914, at the first general election in which the women could vote.

The women of Washington got the ballot in 1910, and a constitutional amendment for State-wide prohibition was adopted in 1914, at the second general election in which the women could vote.

In all these States both the friends and the enemies of prohibition attribute its victory to the women.

The women of California got the ballot in 1911. In the three years from 1911 to 1915 the number of no-license towns increased from 200 to 690 (Anti-Saloon League Yearbook for 1915, p. 120). Of the cities and towns in southern California, 183 are dry and only 28 wet.

WYOMING AND TEMPERANCE.

Until after 1910 the only States where women could vote were the four Rocky Mountain States of Wyoming, Colorado, Utah, and Idaho. All of these were mining States, where the men outnumbered the women, and where the traditions and atmosphere were such as to make it inevitable that they should be slow to adopt prohibition.

Yet even in Wyoming, where there were about twice as many men as women, the influence of the women voters soon made itself felt. Away back in the Territorial days the Rev. Dr. B. F. Crary, presiding elder of the Methodist Churches in northern Colorado and Wyoming, wrote of the woman-suffrage law: "Liquor sellers and gamblers are unanimous in cursing it." He added:

"The very best ladies of this Territory vote; and, as they generally vote on the right side of all questions, the lies told to their deteriment originate with men of the 'baser sort'; with defeated demagogues and the meanest kind of politicians, who hate the majority of the women because of their pure lives and independent ballots." (Thirteen Years' Experience in Wyoming, p. 2.)

Chief Justice Groesbeck, of Wyoming, wrote, in 1897:

"The influence of the women voters has always been on the side of temperance, morality, and good government, and opposed to drunkenness, gambling, and immorality. Our liquor licenses are very heavy and the laws and ordinances are severe against the sale or furnishing of liquor to minors or to habitual drunkards." (Falsehoods about Wyoming, p. 1.)

For a long time the few and scattered women of Wyoming could obtain little more than high license. At present 96,000 of the State's 97,594 square miles are under prohibition (Anti-Saloon Yearbook for 1915, p. 214), including all the unincorporated portion of the State. The incorporated towns and villages are under license and municipal council option. Five of the incorporated cities are dry, and the Sunday-closing law is vigorously enforced throughout the State.

W. C. Deming, editor of the Cheyenne Tribune, says in the Brooklyn Eagle of October 15, 1915: "Women are very strong for strict regulation of the liquor traffic. Saloons have been driven from all unincorporated villages. They were formerly at every crossroad, but they are now conducted only where there is plenty of police regulation, and under high license."

COLORADO AND TEMPERANCE.

The women of Colorado got the ballot in 1893. Within four years the number of no-license towns in the State had more than quadrupled, and it kept on growing. When a constitutional amendment for State-wide prohibition was defeated in 1912, Ellis Meredith, the head of Denver's reform election commission, and a strong advocate of the dry policy, wrote in the Woman's Journal of November 16, 1912: "It is because under our local option law conditions are so good and dry territory increasing so fast that many people feel we shall come nearer regulating the traffic in this way."

In 1914 State-wide prohibition was adopted. Both its friends and its enemies attributed its passage to the women. The organ of the Denver brewers says that Colorado made a great mistake when it gave women the ballot.

TEMPERANCE IN IDAHO.

The women of Idaho got the ballot in 1896. The number of no-license towns grew till in 1914 there were only 190 saloons in the State. (Anti-Saloon Yearbook for 1915.) In January, 1915, a prohibition law was passed by the legislature and in November a constitutional amendment for State-wide prohibition was adopted by popular vote.

TEMPERANCE IN UTAH.

In Utah in 1911, 87 cities and towns voted dry and 23 wet, and the number of dry towns has increase since. A State-wide prohibition law was passed by the legislature of 1915, but was vetoed by the governor.

TEMPERANCE IN ILLINOIS.

The experience of Illinois is of especial interest, because in that State the men's and women's votes are cast in separate ballot boxes and it is possible to see just how the women vote. They have voted dry much more generally than the men.

For instance, at the election held in Illinois on April 7, 1914, in Rockford 5,155 women voted dry and 1,048 wet, 4,480 men voted dry and 5,155 wet; in Bloomington 3,806 women voted dry and 2,311 wet, 2,655 men voted dry and 3,896 wet; in Freeport 2,890 women voted dry and 1,877 wet, 1,984 men voted dry and 2,867 wet; in Pontiac 1,137 women voted dry and 364 wet, 768 men voted dry and 797 wet, and so on.

According to the official returns published in the Chicago Tribune of April 22, 1914, in all 121,315 women voted dry and 67,418 wet, while 144,925 men voted wet and 98,179 dry. Of the women, 64.3 per cent voted dry and 35.7 wet; of the men, 59.7 per cent voted wet and 40.3 per cent dry.

Out of 329 townships voting there were only 20 where a majority of the women voted wet, and in all of these the majority of the men voted wet also, so that the women's vote made no difference in the re-

sult. Among these hundreds of cities and towns there was not one where the women's vote turned the scale in favor of license and there were 96 where it turned the scale against license.

The Anti-Saloon Yearbook for 1915 says: "Of the 1,150 saloons that were closed, 900 were closed on account of the majorities found in the women's ballot boxes." And it adds: "The woman's suffrage bill has proved to be the most valuable piece of temperance legislation the State has enacted" (p. 135).

"An ounce of fact is worth a ton of theory."

ALICE STONE BLACKWELL.

## INDIAN APPROPRIATIONS.

Mr. ASHURST. I ask unanimous consent that the Senate proceed to the consideration of the conference report upon the Indian appropriation bill, made about a week ago.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate proceeded to consider the report of the committee of conference on the disagreeing votes of the two Houses upon the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917.

Mr. LANE. I ask leave to offer as a substitute for the conference report the following bill.

Mr. ASHURST. Mr. President, much to my regret I am inclined to make a point of order against the motion made by my esteemed friend, the Senator from Oregon. A substitute in the nature of a bill is not in order.

The VICE PRESIDENT. The Chair sustains the point of order. The only question before the Senate is either to accept or reject the conference report.

Mr. LANE. I shall offer the bill, then, for publication in the RECORD.

The VICE PRESIDENT. It will be printed in the RECORD.

The bill, which had been introduced by Mr. LANE February 14, 1916, is as follows:

A bill (S. 4452) for the abolishment of the Indian Bureau, the closing out of Indian tribal organizations, and for other purposes.

*Be it enacted, etc.*, That from and after the passage and approval of this act the offices of Commissioner, Assistant Commissioner, and Second Assistant Commissioner of Indian Affairs shall be, and are hereby, abolished. Hereafter the Bureau of Indian Affairs shall be administered as an independent bureau, subject only to the control of Congress, by three commissioners; that five candidates for said commissionerships shall be selected by a council of all the Indian tribes of the United States congregated in general delegate council, most conveniently located, which shall be designated by the Secretary of the Interior within 30 days after the passage and approval of this act; that there shall be three delegates selected from each tribe of over 1,000 members, and where tribes are formed of several separate and independent bands each such band consisting of over 1,000 members shall select three delegates. All tribes or bands consisting of less than 1,000 and more than 500 members shall have two delegates, and those tribes or bands consisting of less than 500 members shall have one delegate; that such delegates shall be chosen by the Indians in open council after due and proper notice given for at least 15 days; that the said commissioners are given full and complete authority in the management of all Indian affairs now vested in or exercised by the Secretary of the Interior, Commissioner of Indian Affairs, Assistant Commissioner of Indian Affairs, and Second Assistant Commissioner of Indian Affairs, or either or any of them, and whenever in any law the final consent, authority, or decision of the Secretary of the Interior or Commissioner of Indian Affairs is declared to be necessary or final, the authority, consent, and decision of the said commissioners shall be equally necessary and final.

SEC. 2. That said three commissioners, no two of whom shall be from the same State, shall be appointed by the President of the United States, by and with the advice of the Senate of the United States, from the five candidates named by the council, and they shall each receive compensation at the rate of $5,000 per annum. Each of said commissioners shall be paid necessary traveling expenses incurred in the discharge of his duties as a commissioner.

There is hereby appropriated out of the Treasury a sufficient sum to pay the salaries of said officials.

SEC. 3. That the said commissioners shall proceed, as soon after installation in office as possible, to a complete reorganization of the United States Indian Service, with a view to its speedy abolition and the complete emancipation of the American Indian from the control, supervision, and management of the United States Government.

SEC. 4. That all Indians who have received or who may hereafter receive an allotment of land under any law or treaty, and are not already citizens, are hereby declared to be citizens of the United States and the State where they reside, and have the same rights, privileges, and immunities of any other citizen of the United States, and be entitled to the equal protection of the law, and they, and each of them, shall have the benefit of and be subject to the laws, both civil and criminal, of the State or Territory in which they reside.

SEC. 5. That there is hereby appropriated out of the Treasury the sum of $35,000, or as much thereof as may be necessary, to pay the expenses of the delegations attending the council herein provided for.

SEC. 6. That all laws or parts of laws inconsistent herewith be, and the same are hereby, repealed.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. GRONNA. I wish to ask the chairman of the committee what disposition was made of amendment numbered 127?

Mr. ASHURST. In response to the question propounded by the learned Senator from North Dakota I will state that amendment 127, made by the Senate committee and adopted by the Senate, provided for an appropriation of $250,000, to be used in the erection of buildings and the acquisition of sites for further school buildings for the Sioux Indians. I do not know whether I am permitted to disclose what took place in the conference committee, but I assume that that is the only way I can answer the question. The House conferees simply would not consent to the amendment, and language in lieu of the Senate amendment 127 was suggested as a compromise. It was believed finally by the conferees, after they had been in session nearly a month, that it would not be wise to appropriate $250,000 without an investigation, without any letter from the department. So an amendment was agreed upon providing for the appropriation of $1,000, to be used by the Secretary of the Interior and requiring and directing him to make a report as to the school facilities or lack of school facilities on the Sioux Reservations and to report on the first Monday in January, 1917. I ask the Secretary to read the matter proposed to be inserted in lieu of the Senate amendment.

The SECRETARY. In lieu of the matter proposed insert the following:

The Secretary of the Interior is hereby authorized and directed to cause investigation to be made as to the probable cost of providing on the various Sioux Indian reservations adequate school facilities for the children of the Sioux tribes who are now without Government or public-school facilities on the respective reservations, and to make a report thereof to Congress on or before the first Monday in January, 1917, together with a complete and detailed statement of the per capita cost per annum, including mileage paid, now expended for the education of the Sioux Indian children in all the schools, whether on or off the respective reservations, and there is hereby appropriated for the expense of such investigation and report the sum of $1,000, or so much thereof as may be necessary, to be immediately available.

And the Senate agree to the same.

Mr. GRONNA. Mr. President, I did not object to the immediate consideration of the conference report, but I had hopes that the conference committee would adopt the language proposed by the Senate committee and agreed to by the Senate. As the Senate knows, this has been a very vexatious question, which has come before Congress every year since 1899.

Mr. President, the appropriation of $200,000 for mission schools is not an appropriation to carry out treaty stipulations with the Indians. I want the Senate to know that since 1909 there has been no such treaty. It expired 10 years before that time and was extended for a period of 10 years.

This has, as I said, been a vexatious question pending before this body, and I had hopes that the House conferees would see the benefit of this amendment. It was thoroughly discussed before the Senate Committee on Indian Affairs. There was not a single vote passed against it. Every member of the committee favored the amendment.

I was somewhat curious to know why the conference committee should reject such an important amendment as this. It rests on a fundamental proposition, Mr. President. The Indians residing in this country have asked me at various times to present this proposition to the Senate and to the Congress. They want public schools the same as the white children. They want to have the benefit of the public schools.

Mr. President, I hope that this investigation will be made, and that a report will be made to Congress before the next Indian appropriation bill is presented, and this will be the last time that we shall appropriate money for mission schools on any Indian reservation in the United States. This appropriation is in direct contravention of law and contrary to the spirit of our Constitution.

Mr. JONES. Mr. President, I wish to ask the chairman of the committee what was done with the provision in the bill requiring the Efficiency Board or Commission to provide a system of accounting for the Indian Office.

Mr. ASHURST. In reply to the learned Senator from Washington I will say that the provision requiring the Efficiency Bureau to make an investigation was known and comprehended within amendment 157. That amendment was not considered by the Senate committee. Senators will recall that that amendment was adopted on the motion of the esteemed Senator from Oregon [Mr. LANE], and that there was very little discussion, although there was a discussion of an hour possibly on the amendment.

When the conference committee, composed of the conferees of the two Houses on the disagreeing votes on the bill, met, we received intelligence from the Department of the Interior that that department had already availed itself of efficient and skillful persons, and had commenced the keeping of a proper, sufficient, and adequate set of books, so that all kinds of balances, trial balances or others, could be had; that it had been done at the expenditure of considerable money; and that, as the Secretary of the Interior, therefore, in his opinion viewed it, the efforts and energies of the Efficiency Bureau, so far as the office of the Indian Bureau was concerned, would be an unnecessary and useless expenditure of public money. He said that he had

inaugurated his own system and did not wish and would not consent to the Efficiency Bureau coming in and upsetting the bookkeeping which he had started. The honorable Secretary did not appear before the conference committee, but the Assistant Commissioner of Indian Affairs appeared twice and made the statement to the effect that they had their own system inaugurated, and objected to an outside board coming in and upsetting all their work at an expenditure of four or five thousand dollars, whereby no good could come.

Now, I want to say to my friend, the Senator from Washington, that that is the reason why the Senate conferees receded from the amendment.

Mr. JONES. I want to ask the Senator whether or not the House conferees were very much opposed to this provision?

Mr. ASHURST. Oh, Mr. President, the House conferees, if I am permitted to speak of what they said, were very eager for the amendment; but the Senate conferees, with a view of saving every dollar that they possibly could save, thought that for once a piece of unnecessary work and unnecessary expenditure might be prevented.

Mr. JONES. Well, Mr. President, it does seem to me, on the statement of the chairman of the committee, that a very extraordinary situation appears. According to the statement of the Senator from Arizona, the Secretary of the Interior said he would not consent to having an independent board go into the Indian Office and provide a system of accounts. It is the business of Congress to provide whether or not this shall be done. If Congress provides for it, it is not a question of the consent of any department as to what Congress deems wise.

Then the chairman of the committee says that the House conferees were eager for this amendment, and yet it is receded from by the Senate conferees after the Senate had adopted it.

Mr. ASHURST. Mr. President——

Mr. JONES. And the Senate conferees——

Mr. ASHURST. I beg the Senator's pardon. Of course the Senate conferees would have to recede when the work had already been done. Would you expect your Senate conferees to stand for an appropriation of money to build a bridge when the bridge had already been built?

Mr. JONES. No, Mr. President, but——

Mr. ASHURST. Do you expect that kind of service from your conferees?

Mr. JONES. The Senate expected its conferees to stand for an amendment which the Senate had adopted; and the Senate conferees should at least bring it in here and present to the Senate the reasons, if any, why it should not be adopted, because the Senate might not agree with the suggestion of the Secretary of the Interior that this work was already done. I do not agree with that; I do not think it has been done. I think that we ought to have the Efficiency Board provide for a system of accounting in the Indian Department.

Mr. OVERMAN. Mr. President, do I understand the Senator to say that the Secretary of the Interior had said that no efficiency board should enter his department?

Mr. JONES. The chairman of the committee said that the Secretary of the Interior said he would not consent.

Mr. ASHURST. I said I did not talk with the Secretary. I object to, I take exception to, and resent having words put into my mouth. I said I did not talk with the Secretary of the Interior; that he did not appear before the conference committee; but that in the person of his Assistant Commissioner an appearance was made, and it was there made manifest to the conference committee that the Interior Department objected to this amendment.

Mr. JONES. Of course the Senator from Arizona knows I would not intentionally put any words into his mouth that he did not utter, but I certainly understood the Senator to say——

Mr. SUTHERLAND. A parliamentary inquiry, Mr. President.

Mr. JONES. That either the Secretary or the department would not consent to an outside board going in there. If the Senator did not say that, why, of course——

Mr. ASHURST. They objected for this reason——

Mr. SUTHERLAND. A parliamentary inquiry, Mr. President.

The VICE PRESIDENT. The Senator from Utah will state his parliamentary inquiry.

Mr. SUTHERLAND. I should like to know to what amendment this heated argument is directed?

Mr. JONES. It is the amendment with reference to the efficiency committee providing a system of accounting.

Mr. ASHURST. It is amendment 157.

Mr. SUTHERLAND. Amendment 157.

Mr. JONES. Mr. President, I certainly understood the Senator from Arizona to make a statement of that character, and I think that the RECORD will show either that he stated that the Secretary or the department would not permit or consent or, he said, it would not give its consent for that being done; in other words, it appears that the Senate conferees have receded from this amendment because the department objects to it and not because the House conferees object to it.

Mr. ASHURST. No, Mr. President, if the Senator will pardon me. The Senate conferees receded simply and solely and only because the work which the amendment sought to impose upon the department had already been accomplished. Now, if my learned friend, the distinguished Senator from Washington, thinks it has not been done, that is a ground for an honest difference of opinion.

Mr. JONES. Certainly.

Mr. ASHURST. When the Senate adopted this amendment it had not been discussed in the committee, and the Senate had no knowledge whatever of the fact that the work had been done. I did not know about it.

Mr. SMOOT. Mr. President, may I ask the Senator from Arizona a question?

Mr. ASHURST. Certainly.

Mr. SMOOT. I ask the Senator if this work has been done by the Bureau of Efficiency?

Mr. ASHURST. No, Mr. President, it has not.

Mr. SMOOT. That is the object of the amendment. There is no doubt that the department has a form of bookkeeping, and, no doubt, they are following the form that has been in operation there for, perhaps, years and years; but I want to say to the Senator that there has been created by Congress a Bureau of Efficiency. Every year we appropriate for the maintenance of that bureau. For instance, that bureau went into the Post Office Department; and if any Senator will take the time to ask the Postmaster General what he thinks of the work that was done by the bureau, he will ascertain that the department recommends in the highest possible terms the work of the bureau. Not only that, but the Postmaster General will show by actual figures, as he has done to the Appropriation Committee more than once, that that bureau has saved to that department hundreds of thousands of dollars.

Mr. OVERMAN. How about the Treasury Department? That is true also as to the Treasury Department.

Mr. ASHURST. The statement of the Senator from North Carolina is entirely correct.

Mr. SMOOT. I was going to add that if the Senator from Arizona or any other Senator will inquire of the Treasury Department, he will find the same answer from the head of that department. As I have stated, Congress has established the Bureau of Efficiency. I believe the amendment was a wise and wholesome one, and I believe the Senate conferees ought to have insisted upon it. I can not see why the House conferees would object.

Mr. GALLINGER. They did not object; they favored the amendment.

Mr. LODGE. Will the Senator permit an interruption?

Mr. SMOOT. I will.

Mr. LODGE. As I have understood from the statement of the Senator from Arizona, the House conferees wanted the amendment.

Mr. ASHURST. Yes, sir; that is true.

Mr. LODGE. The House conferees wanted the amendment, and the Senate conferees gave it up; gave up the Senate's own amendment.

Mr. SMOOT. The Senate conferees gave up the Senate amendment. I am quite sure that the Senator from Arizona is not aware of the situation. Otherwise, I know that he would not have yielded on this amendment.

This Bureau of Efficiency is now working in other departments of the Government; and it has not entered any department of this Government and done the work which it performs where the head of the department does not give it the highest possible recommendation——

Mr. ASHURST. Mr. President——

Mr. SMOOT. And I am quite sure that when these facts are called to the attention of the Senator from Arizona he will believe that we ought to send this report back to conference, have this amendment insisted upon by the Senate conferees, and agreed to by the conference committee.

Mr. ASHURST. Mr. President, all that the learned Senator says is true, and all that he says was substantially before the committee.

I am not a stickler for economy; I do not pretend that I am at all times standing for rigid economy; but the question did occur to the conferees that since the department advised us that the work was being done and in a large measure, if not wholly, accomplished, why should the energies of this excel-

lent bureau, which would probably involve an expenditure of five or six thousand dollars more, be brought into requisition and the work be duplicated?

It was not in any spirit or desire to avoid responsibility on the part of the Senate conferees that the action was taken. The Senate conferees contended for nearly a month for many of the items put on the bill by the Senate; and we yielded on many amendments only after it was obvious that an agreement could not otherwise be reached. We did not believe we would be doing our duty further to contend for an amendment put on by the Senate, knowing that the Senate did not know that the work had already been done in the Interior Department.

Mr. STONE. Mr. President, may I ask the Senator a question?

Mr. JONES. Mr. President——

Mr. ASHURST. I yield the floor.

Mr. JONES. I understood I had the floor, Mr. President.

Mr. STONE. I merely desire to ask the Senator a question for information.

Mr. ASHURST. I will be glad to answer the question if I can.

Mr. SUTHERLAND. Mr. President, I should like to ask the Senator from Arizona a question.

Mr. STONE. Is this amendment now before the Senate?

Mr. ASHURST. No; it is not before the Senate.

Mr. STONE. It is in the conference report?

Mr. ASHURST. It was disagreed to; the Senate conferees receded from this amendment.

Mr. LODGE. It is before the Senate as a part of the conference report.

Mr. STONE. And the amendment that is now under discussion is a Senate amendment?

Mr. ASHURST. It is a Senate amendment.

Mr. STONE. It was stated by some Senator on the floor that the House conferees were willing to agree to and desired the Senate amendment, was it not?

Mr. ASHURST. I think that, so far as I am permitted to disclose what took place, I ought to truthfully say the House conferees did not object to the amendment. I think I state the truth when I say that there was no objection.

Mr. STONE. Mr. President, this is rather confusing. Why did the Senate conferees desire to reject an amendment which the Senate put on and which the House was willing to accept?

Mr. ASHURST. Because, as I have stated, the work had already been done; and when the Senate adopted the amendment the Senate did not know that the work had been done; that is the only reason.

Mr. STONE. I should like to ask the Senator another question——

Mr. MYERS. Mr. President——

Mr. STONE. Does the Senator desire to interrupt me?

Mr. MYERS. When the Senator from Missouri is through I should like to say a word. I do not want to interrupt the Senator.

Mr. STONE. I am not through. I should like to ask the Senator from Arizona if it be true—and I think it important to the Senate and to the dignity of the Senate to know whether it is true—that the Department of the Interior, whether by the Secretary or any authorized official, stated to the Committee on Indian Affairs or to the conference committee that that department would resent and resist any investigation by a legal body—I mean especially the Efficiency Bureau.

Mr. ASHURST. Mr. President, in reply to the question propounded by the distinguished Senator from Missouri, I will say that we did not keep a stenographic record of the proceedings of the conference committee; but I believe I can state with considerable accuracy, with ordinary accuracy, what took place. The Assistant Commissioner, Mr. Meritt, asked to come before the conference committee. That request was granted. He discussed, if I remember, some other minor details, and then said he wished to discuss in particular amendment No. 157, with reference to the Efficiency Bureau, and that the department was opposed to the amendment. It must not be forgotten that our committee has a habit—and I do not think it is a very good habit—of calling on the department for their opinion with reference to bills. The department was not in favor of that amendment, because it would involve an unnecessary expenditure of public funds and because the objects sought to be brought about by the activities of the Efficiency Board had already been inaugurated, and, if I remember correctly, were about accomplished. That is substantially about what took place and about what was said.

Mr. STONE. If it was merely a suggestion that it was unnecessary and a useless expenditure, I have not anything to say; but if a department of this Government takes the position that a body created by Congress for such a purpose as the Efficiency Commission was created for undertakes to put itself in opposition to the performance of the duties of that body——

Mr. ASHURST. No, Mr. President.

Mr. STONE. I would like to know about it. That is a very different question.

Mr. ASHURST. Mr. President, those who know the Secretary of the Interior may give their perturbed souls rest. They know that he will faithfully execute every law and regulation made by Congress.

Mr. STONE. My soul is not perturbed. It would be a very great surprise to me if the Secretary of the Interior would stand behind a proposition of that character.

Mr. MYERS. Mr. President, I think there is some misunderstanding of the situation by some of the Senators, and I think that a great deal of unnecessary and unjustifiable indignation and resentment has been worked up to a fever heat over no cause whatever and owing to an incorrect understanding of facts and conditions. As is often true in the case of a prolonged meeting, where a lot of people are present and indiscriminate talk back and forth is indulged in which is not taken down by stenographers, my recollection of affairs differs slightly in some respects from the recollection of the Senator from Arizona [Mr. ASHURST], although I agree with him in the main and as to the essentials.

In the first place, when the conferees came to this amendment there was a great deal of talk about it, but it is not my recollection that the House conferees simply rose up as one man immediately and clamored for it. There was a great deal of discussion; it lasted several hours and parts of several days, and a great many suggestions were made about amendments and changes, when, upon the unanimous request of the conferees—eight of them, five House conferees and three Senate conferees—the Assistant Commissioner of Indian Affairs was sent for and requested to come before the conferees and explain the departmental views about this matter. The Assistant Commissioner of Indian Affairs did not come of his own accord; he did not inject himself in there and assume a threatening or domineering attitude or any attitude of that kind; he did not, as I have said, voluntarily inject himself into the matter at all. He did not come until he was sent for at the unanimous request of the conferees of the House and of the Senate, and then I know he came with a little reluctance and had to be assured that it was the unanimous request of the conferees that he should come and answer certain questions. He simply said, as the Senator from Arizona has stated, that the Department of the Interior was not in favor of that amendment. We asked him the attitude of the Department of the Interior, and I, for one, am in favor of giving people a chance to be heard and of getting light on any subject which is being considered. I do not see any objection when a department is involved in any proposed legislation to asking its attitude and views in regard to it.

Mr. CURTIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Kansas?

Mr. MYERS. With pleasure.

Mr. CURTIS. Is it not a fact that the Assistant Commissioner of Indian Affairs was before the committee when the Lane amendment was adopted, and was given full opportunity to be heard?

Mr. MYERS. The Lane amendment? What does the Senator mean by the Lane amendment?

Mr. CURTIS. The amendment from which the Senate receded.

Mr. MYERS. Amendment numbered 157?

Mr. CURTIS. Yes; the one on which the Senate conferees receded.

Mr. ASHURST. It was never before the committee.

Mr. MYERS. Oh, the Senator means in the committee meeting? He is not talking about the conferees?

Mr. CURTIS. No. When the amendment, offered by the Senator from Oregon [Mr. LANE], was being considered by the Indian Affairs Committee of the Senate, was not Mr. Meritt present, and did he not have an opportunity to express himself upon it before the committee, and did not the Senate committee unanimously report it to the Senate?

Mr. MYERS. I do not know. I was not present at that meeting of the Committee on Indian Affairs, but I was present at the meeting of the conferees of which I am talking, and I know that the Assistant Commissioner of Indian Affairs came before the conferees with some reluctance, and had to be assured that it was the unanimous request of the conferees. He stated that he did not want to voluntarily inject himself into

the conference meeting or anywhere else where his presence was not wanted.

Mr. ASHURST. Mr. President——

Mr. MYERS. I am not yielding. I want to say some things. I have not fairly begun yet. I say, I am a believer in permitting a department to express its views about legislation affecting it, and particularly to send a representative to answer questions when his attendance is asked.

Mr. SUTHERLAND. Mr. President, may I ask the Senator a question?

Mr. MYERS. With great pleasure.

Mr. SUTHERLAND. As I understand, this amendment was passed by the Senate, and a conference agreed upon between the two Houses with reference to it, and the Secretary of the Interior appeared before the committee?

Mr. MYERS. Oh, the Secretary of the Interior never appeared before any committee when I was present.

Mr. SUTHERLAND. Before the conference committee?

Mr. MYERS. No, sir; he never did. Oh, no; that is absolutely incorrect. The Secretary of the Interior never did.

Mr. SUTHERLAND. Well, a representative of the Interior Department appeared?

Mr. MYERS. The Assistant Commissioner of Indian Affairs was sent for by the conferees, and in response to that command he appeared.

Mr. SUTHERLAND. He appeared before the committee and asked that the conferees recede from the Senate amendment?

Mr. MYERS. No, sir; he did not.

Mr. SUTHERLAND. What did he do?

Mr. MYERS. I was just getting to that. Now I will go on. I want to state what I have to say in a connected and sequential manner. I am just up to that point.

I had gotten this far—that the conferees sent for Mr. Meritt, the Assistant Commissioner of Indian Affairs. He appeared in response to the request for his attendance. When he appeared he was asked about the attitude of the Interior Department and the Indian Bureau in regard to this amendment, and he stated substantially about what the Senator from Arizona has stated—that the work of investigation, looking to an improved system of accounting and bookkeeping, had been started along a different line, and that in the estimation of the Interior Department the amendment was not necessary. However, what I want to get to and correct is this: Neither the Secretary of the Interior nor anybody connected with the Interior Department ever said or intimated, as some Senators here seem to infer, that he or they would not permit this to be done. They did not threaten to barricade their offices with bolted doors and bars, and with the use of clubs and rifles resist the authority of the United States Government as expressed by the Congress. They never hinted at nor intimated any such absurd state of mind. It was stated that if this work was done it would not be with the consent of the Interior Department, because the Interior Department deemed it unnecessary, and that it would conflict with work which was then actually going on to install an improved system of bookkeeping and accounting; but Congress may do a great many things that people do not ask it to do or consent to having done. Congress may do a great deal that I may not consent to nor assent to; but I do not undertake to defy Congress and say that it shall not be done. Now, there is the line of demarcation. Some of the Senators seem to have gotten the idea that the Interior Department was going to go into a state of rebellion and defy Congress. Nobody connected with the Interior Department ever intimated such a thing. It just stated in response to questions that the department did not consent to this innovation.

Mr. ASHURST. Mr. President, if the Senator will yield to me for a moment, I believe I can pour oil on the troubled waters and propose a solution that will be satisfactory to everybody. I will ask that the conference report be rejected, if the Senator will pardon me.

Mr. MYERS. I want to finish my remarks.

Mr. ASHURST. I was going to make that motion at the appropriate time—that the report be withdrawn.

Mr. MYERS. It can not be done while I have the floor.

I want to say, further, that my recollection differs quite materially from what was stated, in this particular: As to the amendment in question there was a great deal bound up with it; if we adopted that amendment, according to the contention of the House conferees, it involved our consenting to some changes in other sections, according to my recollection; if we retained amendment No. 157, it was to be tied up with and involve certain changes of a somewhat complicated nature in amendment No. 156 and section 27 of the printed bill, and the proposition was that all should stand or fall together; that if we retained amendment No. 157 we must make certain changes in No. 156 and in section 27, which appears between the two. The Senate conferees would not consent to those changes. I was opposed to them, and the Senate conferees as a body would not assent to them, and that is a further reason why this recession was made.

The Senate conferees did not just voluntarily take this action without any opposition; but they finally receded on amendment No. 157 because if they took 157 they had to accept some changes in 156, which they would not accept. It was a dual proposition. It was put up to us in this way: "If you retain 157, you have to make some changes in 156, the two go together," and the Senate conferees would not consent to that dual proposition.

Mr. NORRIS. Mr. President, would the Senator mind telling us what those other changes were?

Mr. MYERS. They were talked over for hours and, in fact, for several days, and I would have to call for the clerk's notes. I can not tell them all. I would not undertake to correctly state them. I simply know that the proposition involved some change in amendment 156. They were talked over for hours and for parts of several days. The conferees sat for about four weeks, sitting nearly every day, and it was a tremendous undertaking. I can not undertake orally to state even a small part of what occurred, but I am sure of this—I know this much—that it involved some change in 156 which was not acceptable to the Senate conferees, and that is the backbone of the reason why 157 was receded from. It was not a bald backdown on the part of some of the conferees, as some Senators seem to have acquired the idea it was.

Under the circumstances, being coupled up with changes in another section which we would not accept, and the information having come to us that the work contemplated had already been undertaken and some of it completed, and that what had been done was entitled to a trial—it having been represented to us that the system which had been installed was first entitled to a trial to see whether it would be effective before we upturned it and went into something entirely new—I think the conferees acted wisely and justifiably. I say, under all these circumstances, taking all of these things into consideration, and not just one thing persistently held up before our eyes, the mere fact that we receded, the conferees were justified in their actions, and should not be criticized.

Mr. NORRIS. Mr. President, will the Senator yield to me for a question?

Mr. MYERS. Certainly.

Mr. NORRIS. I am interested in what the Senator says is now on trial. Is there a system provided by law which they are trying now?

Mr. MYERS. They are making some changes there to improve their system; and to go to work and install this contemplated new system would upset and cause them to abandon all they had done on the system which is now on trial. So, taking all of these things together, I do not think the Senate conferees did a strange or an incomprehensible thing at all. They had ample justification for what they did. We did not just go into the conference meeting and supinely prostrate ourselves and throw up our hands and say, "We surrender immediately, and recede from this amendment." There was discussion about it pro and con in different ways for days. It took a good part of several days, and all sorts of suggestions and amendments and compromises were suggested; and, as I say, right down to the last the proposition of retaining amendment No. 157 involved certain changes in No. 156, to which we would not consent. However, I arose especially to correct the idea that some Senators seem to have acquired, that somebody connected with the Interior Department was defying Congress, or saying that they would not permit any changes. Nobody ever suggested such a thing.

Mr. JONES. Mr. President, will the Senator permit an interruption right there?

Mr. MYERS. With great pleasure.

Mr. JONES. In justice to myself, as well as to the Senator from Arizona, I just want to read an extract from the stenographic notes of his remarks a moment ago upon which my suggestions were based.

Mr. MYERS. I yield for that purpose. I do not yield the floor.

Mr. JONES. He said:

When the conference committee, composed of the conferees of the two Houses on the disagreeing votes on the bill, met, we received intelligence from the Department of the Interior that that department had already availed itself of efficient and skillful persons, and had commenced the keeping of a proper, sufficient, and adequate set of

books, so that all kinds of balances, trial balances, or others could be had, and that it had been done at the expenditure of considerable money; and that, as the Secretary of the Interior, therefore, in his opinion, viewed it, the efforts and energies of the Efficiency Bureau, so far as the office of the Indian Bureau was concerned, would be an unnecessary and useless expenditure of public money. He said that he had inaugurated his own system and did not wish and would not consent to the Efficiency Bureau coming in and upsetting the bookkeeping which he had started. The honorable Secretary did not appear before the conference committee, but the Assistant Commissioner of Indian Affairs appeared twice, and made the statement to the effect that they had their own system inaugurated, and objected to an outside board coming in and upsetting all their work at an expenditure of four or five thousand dollars, whereby no good could come.

My suggestions were based on that statement of the Senator, and I would not, of course, do him any injustice.

Mr. ASHURST. Mr. President——

Mr. MYERS. In a moment I will yield to the Senator from Arizona. The Senator from Arizona, in speaking of a representative of the Interior Department, said that that representative stated that the department would not consent to the enactment of certain legislation. Well, lack of consent or assent does not mean defiance.

Mr. JONES. Let the language speak for itself.

Mr. MYERS. I want to comment on it. I want to speak about it, too. I remember that about three years ago one of the clerks of the Senator from Washington [Mr. JONES] was taken away from him by the action of the Senate; but he did not consent to that procedure, did he?

Mr. JONES. Oh, Mr. President——

Mr. MYERS. But the Senator from Washington did not go into rebellion about it.

Mr. JONES. I got the clerk; I have him, and I expect to keep him.

Mr. MYERS. The Senator will keep him as long as the majority of this body, in its generosity, will let him.

Mr. JONES. As soon as he was taken away from me——

Mr. MYERS. The Senator did not consent to having his clerical force reduced, did he?

Mr. JONES. No; and it did not stay reduced. I have him, and, as I say, I expect to keep him.

Mr. MYERS. But at the same time the Senator did not resign from the United States Senate, and he did not go into a state of rebellion.

Another illustration: About a year ago the Senator from Washington was running for reelection to his seat in the United States Senate, and he was reelected, which was a tribute to his worth and ability; but if he had been defeated it would not have been with his consent, would it? And he would not have gone into a rebellion against the Federal Government, nor against the State of Washington, would he?

Mr. JONES. Mr. President, if that has anything to do with this conference report, I can not see it. Of course if it is entertaining to the Senator from Montana, it certainly is to me.

Mr. MYERS. It has as much to do with it as the evidently somewhat strained construction of the Senator from Washington to the effect that when a man does not consent to anything he proposes to go into a state of rebellion and defy a superior authority.

Mr. WILLIAMS. Mr. President, will the Senator permit a question?

Mr. MYERS. Certainly.

Mr. WILLIAMS. Does not the Senator think there is a difference that is patent when a Cabinet officer, or one of his agents or representatives, informs the legislative assembly that if a certain thing becomes a law he will not consent to it? Is not that the highest form of rebellion?

Mr. MYERS. It depends upon circumstances. Happily, no Cabinet officer so informed Congress, in this instance.

Mr. WILLIAMS. Well, the Senator says a representative of a Cabinet officer did.

Mr. MYERS. No; I have not so stated, I beg to say. The Assistant Commissioner of Indian Affairs was sent for by the conferees, and was asked the attitude of the Interior Department toward this amendment.

Mr. WILLIAMS. I understand that, and I understood the Senator himself to say that if this amendment were passed it would be without the consent of the Interior Department.

Mr. MYERS. I have not said that. I do not recollect saying anything of that kind. The Senator from Arizona [Mr. ASHURST] stated something to that effect. Please do not tax me with that.

Mr. WILLIAMS. Now, when an executive officer begins to read the riot act to Congress, if he has done it, by saying that he will not consent to a law, he announces beforehand opposition to and defiance of legal authority. The Senator has to consent to every law, whether he will or not, and I must, and so must every Senator.

Mr. MYERS. He submits to it as every good citizen does.

Mr. WILLIAMS. He has to consent to it; because, in a free government, the will of the majority must necessarily be accompanied by the consent of all when that will takes the form of a law. This was to have been part of a law.

Mr. MYERS. I do not believe that the United States Senate is such a high and mighty body that everybody connected with the United States Government has to submissively consent or assent to everything it does. It may do many things to which many people do not consent. Any American citizen has the right to dissent from the wisdom of anything that it may do, and certainly an official of the Government has a right, in his own mind, to say that he does not assent to it.

But I want to say that the Senator from Mississippi imputes to me the assertion that the Interior Department, or somebody connected with it, said that it would not consent to this legislation. I remember of no such language having been used before the conferees. I have not asserted it was. The Senator from Arizona may remember it; but I have not stated that any such language was used, and I do not remember that Mr. Meritt used any such language. The Senator from Arizona may, but I do not; and I want to say that whatever Mr. Meritt may have said, all that he said was certainly said in a most respectful and proper manner, frame of mind, and attitude on behalf of himself and the Interior Department toward the United States Senate and toward Congress. He said nothing, he carried no message, he expressed no idea, he made no suggestion, that carried any implication of disrespect for Congress or defiance of its authority.

Mr. STONE. Mr. President, let me ask my friend if this is not about the truth as he understands it: That this executive official, whatever his exact language was, meant merely to say that he would advise against the proposed legislation, as a matter of policy?

Mr. MYERS. Yes; he said that the Interior Department advised against it; that the Interior Department did not assent to it; did not think it necessary. Whether or not my recollection of it agrees with everybody else's recollection or is absolutely correct there is absolutely nothing in it to cause anyone in this body to assume an air of righteous indignation, and work himself up to a fever heat over some one not showing it proper respect, or bowing quite low enough in obeisance to it.

Mr. THOMAS. Mr. President, I merely wish to inquire if the Vice President at this time will entertain a motion for the previous question?

Mr. LODGE. Mr. President, I have not the honor to be upon the Committee on Indian Affairs and of course was not on the conference committee, but I am always interested in what seems to me to be the proper conduct of the business of the Senate. I have listened, as we all have, I am sure, with great interest to the lucid and ingenious argument of the Senator from Montana [Mr. MYERS], and I have tried to extricate from it what seemed to me the salient facts, setting aside for a moment the reelection of the Senator from Washington.

Mr. MYERS. Permit me to say that that will be no difficult task for a gentleman of the high standing and ability of the Senator from Massachusetts.

Mr. LODGE. Mr. President, I have the floor.

Mr. MYERS. I wanted to pay the Senator a compliment.

Mr. LODGE. I waited until the Senator got through his argument. In fact, nobody interrupted him; it was too fascinating.

It appears that the Senate added an amendment to the Indian appropriation bill known as amendment numbered 157. It further appears that that amendment is as follows:

(157) SEC. 28. On or before the 31st day of December, 1916, the Bureau of Efficiency shall prepare and submit to the Secretary of the Interior a system of accounting for the Bureau of Indian Affairs that will meet the requirements of section 26 of the Indian appropriation act approved June 30, 1913 (38 Stat. L., p. 103).

Now, to an outsider like myself that seems simple; I mean the object of it seems simple. The language is plain. We are told by the Senator from Montana that the conference committee passed hours and days even in discussing that amendment and trying to amend it and alter it and change it; and I confess it gives me great respect for the powers of that conference committee beyond even what I had before, and that was very great.

Now, the Senate put that on, and the testimony which has been rendered here by the various speakers this morning is, in substance, to the effect that the House conferees were ready to accept it. Then there floats upon the scene the person of the Assistant Commissioner of Indian Affairs.

Mr. MYERS. I wish to say to the Senator that he was sent for by the conferees.

Mr. LODGE. I did not say he was not sent for. I said he floated in.

Mr. MYERS. No; he did not float in. He was drawn in by order of the conferees.

Mr. LODGE. I do not know why he was sent for, except to explain this complicated, intricate amendment. But the substance of what he said was that the Interior Department did not want it. That is what it comes down to in plain English; and having delivered that elaborate and difficult opinion, he then retired, and the clause retired with him from the bill. The Senate put it on; the House conferees were ready to accept it, and the Senate conferees—I suppose perhaps the House conferees cooperated—took it out.

Mr. President, of course I suppose this is an old-fashioned idea, but I have always understood since I have been in the Senate, and I understood when I was in the other House, that it was the duty of the conferees on the part of the Senate to sustain amendments placed on a bill by the Senate; that it did not matter whether the conferees personally approved of an amendment in all respects, it was their duty as representing the Senate to sustain the amendment. The other House, of course, was at full liberty to resist, and if they resisted it might become necessary for the conferees on the part of the Senate to yield or to agree on a compromise.

Mr. GALLINGER. Or to bring it back.

Mr. LODGE. Or to bring it back for further instructions to the body that sent them into conference. But in this case our conferees appear to have abandoned our amendment when the other House was ready to take it.

Now, that is a point, it seems to me, of great importance in the conduct of business. There can be no possible confidence in conferees appointed by the Senate if the fundamental proposition is not agreed to that they are there to represent the will of the Senate.

I trust that this report will be returned to the conferees and that the will of the Senate will be carried out. I am not aware that the Interior Department or any other department or any assistant commissioner has anything to do with conferences between the Houses. I trust the report will go back and that the Senate conferees will not insist, they do not need to insist, but that they will allow the House conferees to keep the amendment in the bill.

Mr. JOHNSON of South Dakota. Mr. President, I am glad that the Senator from Arizona has asked that the conference report shall go back because I had intended to do so if he did not, and I believe then the matter will receive more favorable consideration and I hope will be presented to this body in much better shape. I can not support the conference report as it is and I do not think I shall support the bill.

I live in a State which, under the provisions of this legislation, would be given something like a million dollars for the benefit of the Indians, in line with the policy of the department, but if, in order to secure this appropriation for my State, I have to vote for this bill in its entirety, I say to you now, fellow Senators, I shall not do so.

There are items in the bill of something like three-quarters of a million dollars that is appropriated for the benefit of the Indians I suppose, and which I myself asked a representative of the department in the committee if they thought would be of any real benefit to the Indians and they told me no.

Mr. MYERS. I ask the Senator what items those are?

Mr. JOHNSON of South Dakota. They are items for irrigation.

Mr. MYERS. Of what project?

Mr. JOHNSON of South Dakota. A project in the Senator's State of Montana.

Mr. MYERS. Which project in Montana?

Mr. JOHNSON of South Dakota. The Blackfeet, is it not?

Mr. MYERS. I wish to show how far wide of the mark the Senator is. There is no appropriation of three-quarters of a million dollars for the Blackfeet project. There was an appropriation of $50,000, and the conferees cut it down to $25,000. The Senator is just $725,000 off the facts.

Mr. JOHNSON of South Dakota. I am referring to the appropriations in the bill for irrigation in your State, in all.

Mr. MYERS. There was appropriated only $50,000 for the Blackfeet Reservation project, and that was cut down to $25,000.

Mr. JOHNSON of South Dakota. And for the Flathead project?

Mr. MYERS. There is an appropriation of $750,000 for the Flathead, and I deny that the Indian Commissioner ever said that was not a successful project or was not for the benefit of the Flatheads. He said it was successful, and that it was for the benefit of the Flatheads.

Mr. JOHNSON of South Dakota. I did not say that the Indian Commissioner said that. I said a representative of the commissioner's department told me, on the direct question that I asked him, if that would be of any benefit to the Indians, and he said "No."

Mr. MYERS. The Flathead project? If so, I deny that there is any such language in the report which was taken down verbatim in regard to the Flathead project. I want to have it corrected. I deny that any such statement was made.

Mr. JOHNSON of South Dakota. Now, Mr. President, I am not opposed to reasonable appropriations, where I feel that there will be a return for value received, but I am to-day, and I hope always will be, opposed to any appropriation made under the guise of benefit to those whom it will not benefit and where no advantages come from such appropriations, as the bill specifies, but will accrue to the benefit of some State or some locality which is entirely foreign to the object for which the appropriation is proposed. I shall be censured in South Dakota for my vote on this measure, but that will not deter me from casting it as I believe I ought to cast it.

We are voting away appropriations of millions of dollars by methods of this kind each year, like it was so many postage stamps, and for purposes that in many cases are questionable, at least, and I shall not, as a Member of this Senate, be a party to anything that appears to me of this character.

Mr. President, I am a new Member of this Senate. When I came here I was not familiar with committee legislation matters. I do not profess to be to-day, but I am learning, and as I learn I shall act. I have not taken up much of the valuable time of this Senate thus far, because I have had nothing to say that I believed was important enough to do so. But I presume I shall have more to say as time passes, and shall take up the Indian question on the floor of this Senate very soon, perhaps at some length.

I have lived among the Indians for the past 30 years, and I believe I know what their needs and wants are. I also know of their treatment, which I shall no doubt discuss in the near future. I have had some personal talks with the Indian Department since I have been here, and shall endeavor to have other meetings with them before I discuss at length the Indian question.

There are some splendid features in this bill, particularly one presented by Senator GRONNA, of North Dakota, but the bad ones so far overbalance the good ones that I shall cast my vote against the bill as a whole, when it shall come to vote, if it is not in much better shape than it is to-day.

While I regret that my views do not conform with theirs and with those of the framers of this bill, I shall cast my vote against the conference report to-day believing that I am within my rights in doing so and that, from the light I have, I am doing my duty as I see it.

Mr. ASHURST. Mr. President, I shall take only two or three minutes. I regard my situation as a Senator somewhat different from my position as a conferee. I may be in error, but it is obvious to me that the Senate desires to retain this amendment with respect to the Efficiency Bureau, and, acting upon that belief, which has been made manifest here this morning, I am going to ask unanimous consent that the conference report heretofore submitted about a week ago be withdrawn and that it be committed to the conference committee. I am perfectly willing to adhere, and I hope the Senate will instruct the conferees to adhere, to the amendment of the Senate in regard to the Efficiency Bureau.

Mr. OVERMAN. I think the Senator is doing wisely to ask that the report shall go back. I think there will be no objection to its going back. But when it goes back, like every conference report that is sent back, every item of difference will be before the conferees. I have an item which was in disagreement, about which I intended to say something, but I am not going to do it now. I should like to have the Senator consider it when it goes back to conference.

Mr. SMOOT. I think a very proper thing for the Senator from Arizona to do is to ask unanimous consent that the report be rejected. If he will simply withdraw the report, there will be no action upon it on the part of the Senate; and there should be action upon the part of the Senate, so that he can inform the House conferees.

Mr. ASHURST. Then I ask that the conference report be rejected.

Mr. OVERMAN. That puts all the differences between the two Houses in conference.

Mr. FALL. Mr. President, I have no intention of discussing this matter at any length, but I listened with a good deal of interest to the chairman of the committee, particularly to his statement that the Secretary of the Interior should be thor-

oughly trusted to properly account for the public money appropriated by Congress or received by him as a trust fund from other sources. I do not disagree with the Senator in so far as the honesty or integrity of the Secretary is concerned, and that is not attacked, as I understand, by the proposed amendment nor by any Senator upon the floor.

The question is as to the proper method of accounting to be made. It is a fact known to every member of the Indian Affairs Committee, I presume, that it is almost impossible for any layman to understand at the present time the method of accounting used in that department. It is equally impossible for any layman who has made any investigation of the method of accounting used in the Interior Department to understand the method used in such accounting in that department. It is not only impossible for any layman to understand it, but it is impossible for the department itself to understand it.

It is not possible for a Senator to-day to obtain from the Department of the Interior or from any other source in this Government, which I have been able to reach, an accounting of the expenses of the administration of the Indian department of the Indian lands or of the public lands of the United States, and the departments admit that they can not furnish to the Senate or Senators or to the committees such an accounting under their present methods.

The excuse made, for instance, for presenting a certain report to Congress by the present Secretary of the Interior or his department, in which certain statements are made as an accounting for the public moneys coming into his hands, is simply that he has followed the methods pursued by a former administration. He can not explain it, nor can he give you the figures.

Mr. President, it is a most astounding thing to a man who has been accustomed to dealing in a business way with business problems to know that you can not from any source whatever to-day discover what it costs to administer the public lands of the United States. As illustrative of this—as it is not my desire to go very fully into the matter nor to read into the RECORD documents—I want to call the attention of the Senate to the last report of the Secretary of the Interior, because it involves an accounting for some of the amounts coming into his hands from the Indian Service and is directly in point here, and because it illustrates the methods of keeping accounts in the Interior Department.

In the report of the Secretary of the Interior dated Washington, September 22, 1915, we are told that there is set forth here, presumably accurately, an accounting of the cash receipts and expenditures of the Public Lands Department of the Interior Department. I read from the report. I should like to have the attention, if I may, of the chairman of the Committee on Indian Affairs:

> The total cash receipts for the sales of public land, including fees and commissions on both original and final entries, and sales of Government property in the local offices for the fiscal year 1915 were $3,786,319.54 (1914, $4,256,102.96), a decrease of $469,783.42. Miscellaneous receipts were as follows: From sales of Indian lands, $1,556,630.97 (1914, $1,884,802.77); depredations on public lands, $31,203.54; depredations on Indian lands, $38.33; leases, power sites, etc., act of February 15, 1901, $1,116.21; copies of records, plats, etc., made at General Land Office, $14,738.82, and at 13 surveyors generals' offices, $4,900.79, making the aggregate cash receipts of this bureau during the fiscal year 1915, $5,394,948.20 (1914, $6,148,367.63), a decrease of $753,419.43.

Note the method of accounting, and then answer, Senators, whether it is correct, taking into consideration the further figures from the official records to which I shall call your attention, reading on page 6:

> The total expenses of district land offices for salaries and commissions of registers and receivers and incidental expenses during the fiscal year ended June 30, 1915, were $828,865.71, a decrease of $24,832.89. The aggregate expenditures and estimated liabilities of the public-land service, including expenses of district land offices and surveys made were $3,008,996.31—

Now, listen—

> leaving a net surplus of $2,384,922.61 of receipts over expenditures.

This is a statement made by the Secretary of the Interior in accounting to the President and to the Congress of the United States of the administration of his office. Now, let us just follow it for a moment to see how it figures up. The total is, as he has stated, $5,394,948.20 receipts—receipts from the public-land sales and from the other items or the other sources which I have mentioned in detail. There is not one word of the $640,000 appropriated by the Congress of the United States for the support of the General Land Office; not one charge is made against it, nor one cent shown in the report as to the $3,250,100 appropriated by the Congress of the United States for the support of the Department of the Interior; not a charge against it. I will call your attention to that in a moment. I am going to read from a memorandum which I have made:

"The above quoted statements of the commissioner with regard to 'cash receipts and expenditures,' if not incorrect, are to say the least, misleading, as they fail to show the financial transactions of the General Land Office, in the discharge of the Public Land Service.

"It will be seen by the above statement, that the commissioner in arriving at his final conclusion, that there exists a 'net surplus' of $2,384,922.61 in the public-lands fund of receipts over expenditures, has taken into consideration and counted as a receipt from public lands the sum of $1,556,630.97, the proceeds of the sale of Indian lands."

Now, compare the Treasurer's report and you will find that, as a matter of fact, this account was, by the commissioner, covered into the Treasury for the credit of the Indians entitled thereto and forms no part whatever of the public-land receipts; that it was not carried as a portion of the public-land receipts; but, as it was received, was from day to day deposited to the credit of the Indian funds. So, instead of the public-land receipts, according to the Secretary's own report, showing a balance of $2,384,922.21, his books would actually show a balance of $828,291, or $1,555,000 less. This is one of the methods of keeping accounts which the Secretary of the Interior will not consent to have changed. Why? Apparently the public-land business is self-sustaining, while, as a matter of fact, this great magnificent domain, hundreds of millions of acres of property belonging to the United States in the public-land States, is costing the taxpayers of the United States every day of the year more money to administer than is being received under the laws from the sales or from any other source of income from those public lands; but, according to the method of accounting, we have a balance of $2,000,000 a year.

Further reading from this memorandum we find, in addition to the total of $5,394,948.20 shown as receipts, the General Land Office is chargeable with all appropriations made by Congress for the discharge of the public-land service for the fiscal year ending June 30, 1915, the amount of which at this time is not known, but from information at hand will probably total an amount from three and a half to four millions of dollars, and making the total cash and credits with the Treasurer of the United States to be accounted for by the Commissioner of the General Land Office, something like eight and a half or nine millions of dollars.

The Commissioner of the General Land Office refers to "the aggregate expenditures and estimated liabilities of the public-land service, including expenses of district land offices and surveys," as being $3,008,996.31.

The natural inference to be drawn from the remarks of the Commissioner of the General Land Office is that this expenditure was made from the receipts as above set forth. Is not that the natural inference? It is not, however, the case.

The moneys received from the sale of public and Indian lands and other miscellaneous receipts were deposited with the Treasurer of the United States for the credit of funds and accounts entitled thereto, and the moneys from which the operating expenses of the public-land service was paid were the credits on the books of the Treasurer provided by appropriations made by Congress.

To make a statement showing correctly the financial transaction of the General Land Office, the commissioner should, first, charge his office with all appropriation made by Congress, and, second, charge his office with all cash receipts from sale of public lands and from miscellaneous sources.

To offset this total charge, he should take credit for money deposited with the Treasurer, proceeds from sale of public lands and miscellaneous receipts, and further credit for all moneys drawn against appropriations made by Congress for purpose of conducting public-land service.

The commissioner, in his report of 1915, shows, on page 82, that for the year 1914 there was "covered into the Treasury to the credit of the reclamation fund from the sale of public lands and fees and commissions in the several States, under the act of June 17, 1902" (32 Stat., 388), the sum of $3,458,649.19, but does not include in his report for the present year the amount by him covered into the Treasury for the reclamation fund from the sale of public lands, fees, and commissions, but I am informed that this exceeds more than $3,250,000, this going to show that the commissioner deposited receipts from public lands, and so forth, with the Treasurer, and his expenditures were drawn from money to his credit with the Treasurer as a result of appropriations by Congress, and not drawn out of the public-land funds.

Now, I wish to make just a brief statement to show how the bookkeeping methods at present being followed must be incorrect, because these are all taken from the report of the same department—the Department of the Interior. This covering of money by the commissioner, proceeds of sale of lands, and so

forth, is further evidenced by the Director of the Reclamation Service, who, in his report for the fiscal year ended June 30, 1915, on page 456, has a table showing "actual receipts from sale of public land, exclusive of town-site sale, transferred to credit of reclamation fund," and shows a total receipt from this source of $4,100,720.65 instead of $3,250,000.

I have the exact amount made here in the memorandum of the commissioner as to the amount turned into the reclamation fund. The memorandum shown by his books to be turned in to the credit of the reclamation fund was $3,268,057.73. Under the report of the Reclamation Service he turned in during exactly the same period of time $4,100,000.

Is this system of bookkeeping satisfactory to the Senate of the United States? This is the people's money. I do not think that a dollar of it has been improperly expended; but I defy any living human being to ascertain from the report what the actual fact is with reference to the public-land service, to the Reclamation Service, and to the expenditures in the Indian Service, from the books in the Secretary's office or any department thereof. You go to one and you find $4,100,000 credit; you go to the other and you find they claim credit for $3,268,000, a difference of over $800,000, which would be quite an amount if it were shown on the average business man's books.

Mr. President, I have letters from the different departments and correspondence from the different bureaus. I have here a copy of a letter written by me, to which I have never been able yet to receive an answer, because it is impossible to answer it. Under date of January 27, I wrote the Commissioner of the General Land Office with the request that he give me the items going to make up the $3,008,996 of expenditure, "including expenses of district land offices and surveys"; deducting the amount of $828,865.71, as shown to be the expenses of the district land office, leaves a balance of $2,180,130.60 for other expenditures and estimated liabilities:

Will it be possible for you to give me the items going to make up this last-mentioned sum?

I do not mean, of course, to request of you that I should have every item included in this total, but merely the heading under which items were expended showing the purpose of such expenditure; for instance, an appropriation was made by Congress for salaries of commissioner, and so forth, amounting to $631,250; I presume that no part of this appropriation is embraced in the expenditure as shown of $2,180,130.60.

My secretary is going to the department this morning, and if he could obtain this information I would much appreciate it.

The memorandum made at the time by my secretary is as follows:

Delivered your letter to Mr. Tallman's office, and was sent by his secretary with the letter to division of accounts. They will be unable to furnish you with the classification of expenditures such as you desire, but will in the course of two or three days make up a statement of various appropriations for the General Land Office, giving the purpose for which the appropriation was made, showing amount of appropriation, and the amount paid from such appropriations during the fiscal year ending June 30 last.

I called attention to the fact that the amount shown by the Reclamation Service to have been received from the sale of public lands was larger than the amount received shown in commissioner's report, after deducting the receipts from sale of Indian lands.

Mr. Newberg, the chief of accounts division, promptly stated that the Reclamation Service must be in error.

The Reclamation Service is under the Interior Department, exactly as is the Indian Service. The chief of accounts says that the accounts of the Reclamation Service must be in error; but still they are furnished here and form the data upon which Congress must legislate and act, the data upon which Congress must proceed now in the matter of making appropriations for reclamation projects, because that matter is now in the hands of Congress and they show $4,100,000—$800,000 more than the accounts of the chief of accounts show.

As I have said, I have never received an answer to this letter—not that every courtesy has not been shown me and every opportunity afforded. I will say that I have had a man, who has been a bank examiner and an expert accountant for 25 years, undertake to obtain from the different bureaus the accountings which would enable him to ascertain what the cost of the administration of public lands was and what the cost of the Reclamation Service and of other bureaus included in the Department of the Interior was, but it has been absolutely impossible for him to do so, in spite of the assistance offered him—and there has been no attempt to hide anything—by the Secretary's office. Their excuse is that they have simply been following the old methods of accounting which have come down to them for unknown generations and through prior administrations; but I will defy anyone to ascertain to-day and to tell the people of the United States what it is costing to administer the different bureaus within the Department of the Interior.

Now, when the Senate Committee on Indian Affairs asks that a method of accounting be adopted so that the committee itself can examine the accounts of any reservation and into the disposition of any appropriations in order that it may be able to account to the Indians for the reimbursable funds which we are constantly appropriating, and which are trust funds in our hands for the benefit of the Indians alone, for the money is theirs and we simply administer it in trust—when the Senate Committee on Indian Affairs asks that a different method of accounting may be instituted, they are answered, as I understand, that the Interior Department will not "consent." I have simply been attempting to illustrate the difficulty.

Mr. BORAH. Mr. President, if the Senator from New Mexico will allow me, does not the Interior Department say more than that? Does it not say that it has now adopted a system of bookkeeping, as I understand, which it expects will cover this entire situation?

Mr. FALL. Well, I understand that the chairman of the committee and the ranking member of the committee on the other side do not agree exactly upon what was said.

Mr. MYERS. Mr. President, I wish to say to the Senator that I do not recollect all that was said, but, as to the use of the word "consent," I never heard anybody say that the Interior Department would not consent to this. I know nothing about that. That is one of the matters as to which I simply differ from the Senator from Arizona.

Mr. BORAH. Mr. President, if I may again interrupt the Senator from New Mexico, as I understood the Senator from Arizona, it was not that the Interior Department objected to the provision in question in and of itself, but by reason of the fact that the Interior Department had adopted or were working out a new system of bookkeeping, which they thought would be efficient and sufficient for all purposes.

Mr. ASHURST. Mr. President, I think the Senator from Idaho [Mr. BORAH] has substantially stated what I conceive to be the position of the department—not that the department in any way were opposed to a searching investigation or to an accurate method of bookkeeping, but the department, or a representative of the department, asserted that they had begun and had fairly well finished such a proper and efficient system of bookkeeping.

I do not want the Senate to get the impression that the Interior Department in any way is opposed to any investigation; on the contrary, the department itself took the initiative and instituted a new system of bookkeeping before any Member of either House of Congress suggested such a thing. I think that answers the question.

Mr. BORAH. I understood that they had begun a new system of bookkeeping in the bureau. If that is not true——

Mr. ASHURST. Mr. President, if the Senator will pardon me for a moment further, I will say that when I came to Congress I was utterly amazed to find that every bill referred to the Committee on Indian Affairs was sent down to the Interior Department with a request for the department's opinion concerning it. I do not now agree with that policy. I do not believe that bills which are introduced should be sent to the department and the department's opinion asked. I think the department should submit facts; but I found that for a long time, running many years back, that policy had been followed; and when I became chairman of the committee, following the ancient policy, which I think is an unwise one, I, as chairman, referred all bills and all amendments, just as had been done for a long time, to the Department of the Interior for its opinion.

I say here and now, that I do not agree to that policy. I wish Congress would get into the habit of making its laws without regard to the opinion of the departments; and of then permitting the departments to exercise their function of enforcing the law Congress makes.

Now, as to the word "consent." I have said, and I say again, that the honorable Secretary of the Interior did not come before the committee. His representative came before us and made manifest to us that the department objected to the legislation; but it was not even remotely suggested that they would fail to enforce the law if Congress should enact the legislation. I do not want any misapprehension to arise in that respect.

Mr. FALL. Mr. President, as I stated in opening the remarks which I have made, I have no doubt, of course, of the honesty and integrity of the different officials, and certainly not of that of the Secretary of the Interior. I am simply calling the attention of the Senate to the fact that in answer to requests for information upon the subject they admit that their accounts are not correct. For instance, the chairman of the committee, I think, will agree with me that there should not be a surplus shown in the administration of the public-land funds of two million and some odd hundred thousand dollars, when $1,555,000 of that money belongs to the Indians, and they take credit for it, but do not charge themselves with it. Mr. President, evidently that is an erroneous system of bookkeeping, involving

Indian funds—one of the very questions now under consideration; in fact, the principal question now under consideration. Under the present method, whether they have adopted a new one or not, they show $1,555,000 of private Indian moneys in the general public-land accounts as a receipt, and they show no charge against the department whereby that amount is placed to the credit of the Indians, to whom it belongs.

Is that a correct method of bookkeeping? Is that the new method which has been inaugurated, and which, in the eyes of the department, is sufficient? It is incorrect. The money is there. It is in the Treasury, or was placed in the Treasury, but never was placed to the credit of the public-land fund at all, as shown by the books of the Treasurer of the United States. While credit is obtained for it, and by that method of keeping the accounts of the public lands the receipts are so swollen as to make it appear to the people of the United States that there is an excess of receipts over expenditures, as a matter of fact the contrary is the truth.

For instance, take the matter of the public lands of the United States, which are the property of the people of the United States. You own the forest reserves. They are public-reserved lands of the United States. After deducting the credit to the Indians, which never should have been credited to the public-land fund, you still show a credit of $824,000 of excess receipts over expenditures to the general-land business. You do not tell the people in the same report that the forest reserves are costing you over $2,000,000 a year to administer more than you are getting out of them. That is part of the public land of the United States. The people of the United States consequently can not tell, unless some man rises here and gives them the figures as they should be given, that in administering the public-land service of the United States, instead of deriving any benefit from it, this great, magnificent domain which you hear Senators from the Eastern States speak of—and which some of them are so very adept in attempting to prevent anybody in the West from getting any undue benefit of—is costing the taxpayers of Massachusetts and New Hampshire and of Connecticut and the other States in the East at least $2,000,000 a year to administer more than it is producing. Properly administered, in a businesslike way, these public lands of the United States should practically support the States in which they lie, and the forest reserves will contribute very materially to the support of the Government.

Mr. GALLINGER. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from New Hampshire?

Mr. FALL. I yield to the Senator.

Mr. GALLINGER. I have been more or less surprised when certain Senators from the Western States have presented here maps showing, as I think the Senator from Idaho has, that one-half the domain of that great State has been made into forest reserves. I do not know what proportion would hold against the State of New Mexico, which the Senator in part represents. Being a friend of the forest-reserve principle, I have wondered very many times if there is not some way in which what is regarded now as an abuse can be corrected. Must we always allow 50 per cent, we will say, of a State to remain in forest reserves, hundreds and tens of thousands of acres of which, perhaps, do not possess a tree? Must we always allow that condition to exist, or have the Senators from these Western States undertaken to devise some plan whereby they can get some degree of relief?

Mr. FALL. Mr. President, speaking for myself, almost immediately upon my being sworn in as a Member of this body, when my State came into the Union, shortly after the Agricultural appropriation bill was under consideration, I made a few remarks upon the Forestry Service at that time, and I offered an amendment to the Agricultural appropriation bill the effect of which I will state. First, however, I showed to the Congress that the forest reserves in New Mexico were obtaining as an income from the people of that State a very large amount of money, something like $150,000 or $175,000, from $150,000 to $200,000 a year, very largely for grazing their stock upon the forest reserves. I showed that in addition to expending that money—every dollar of it which was received, except 25 per cent of the people's own money, which went back to the State—after expending the 75 per cent of the total proceeds they came before this Congress every year and asked for the administration of the forest reserves in New Mexico an excess appropriation out of the taxpayers' money of from one to two hundred thousand dollars per year.

My amendment proposed this: To leave the laws precisely as they stand now regulating the forest reserves; not to change the limits, the boundary lines, or to exclude an acre from them, if it so pleased the Congress; to allow not only the laws but the rules and the regulations of the Department of Agriculture to remain in full force and effect; and that then the administration should be taken over, under those laws and under the regulations, by the State of New Mexico, with a guaranty from the Legislature of New Mexico, for which I spoke, that in accepting the trust they would administer the forest reserves under the laws of the United States, under the rules and regulations as adopted by the Secretary of Agriculture, and under his general supervision, with the right in him to remove any official at any time; that they would administer the reserves without the cost of one cent to the taxpayers of the United States; they would only cut such timber as they were directed to cut; that they would not abuse the trust in any way; that they would administer the trust under the laws of the United States, with the power in Congress at any time to take back the forest reserves if they were not so administered; and that the State of New Mexico would relieve the people of the United States of the burden of administering the forest reserves, which are now costing them $2,000,000 more per annum than they receive from them.

I think this is the solution of the matter, Mr. President, for this reason: I know that the Senator from New Hampshire will agree with me that as to the general subject of the public lands in the States, while they constitute a trust for the people of the entire United States, as Daniel Webster said, they should be administered for the benefit of the people living in the State in which they are. I have been contending for that old theory, settled in 1836, from the moment I entered this body down to the present time, and I am still contending for it. I admit that the people of Massachusetts or New Hampshire or other States may have some interest in the mines situated in my State or in the mineral to be obtained from the mine, whether it is gold, copper, silver, or what it may be, because they can remain as nonresidents or as stockholders in a company operating and taking the wealth of the mines from underground. They may help develop my State in that way; but when the question arises of handling the surface lands of my State, then the question of populating my State arises.

If you interfere with the disposition of the surface lands in a State, if you throw restrictions around that disposition by Federal acts, in that way you prevent the new State from acquiring the population which has made this country what it is, and your acts militate against the progress and the prosperity of these public-land States, unless in your legislation you legislate for population.

Now, while these public lands, or the surface lands, form a trust, or belong to the people of the United States, in the administration of them, as shown by the records of the Public Land Office, instead of producing any revenue for the people of the United States, they are costing the people of the United States money every day; and, if the Senate will bear with me for a moment, I want to show something as to the conditions in my State.

The total area of the State is 78,485,760 acres. It is one of the largest States in the Union. There were extensive Spanish land grants in my State confirmed almost entirely by action of Congress when New Mexico had no representative here. Land grants which as originally made would have covered 20,000 acres were extended to cover a million acres, and they were confirmed without the people of New Mexico being heard upon the proposition, largely by direct action of Congress, to the extent of 9,882,229 acres. The railroad grants in my State amount to 4,035,653 acres. The Indian reserves amount to 3,766,554 acres. The Pueblo Indian reservations amount to 985,300 acres. The national monuments in New Mexico amount to 21,109 acres. The military reservations amount to 162,842 acres. The horse-breeding ranch amounts to 230,000 acres, although no horses are being bred on it. The forest reserves amount to 9,881,660 acres. Under certain special acts 5,861, 13,577, and 1,440 acres were set aside. Coal-land withdrawals existing on December 31, 1915—and this means the surface, now, of the coal lands—amount to 5,712,616 acres. Of the magnificent total of 78,000,000 acres of land there remain 27,000,000 acres of public land.

New Mexico came into the Union as a Territory in 1846. It was a Spanish territory or a Crown province. Its people swore allegiance to the Government of the United States without firing a shot or making any resistance whatsoever. They were promised immediate statehood and the use of their resources as citizens of the United States by Mr. Kearney's proclamation, and afterwards by a treaty—at least, so construed. From that day to this they have remained as good, loyal citizens of New Mexico. We had a total acreage of 78,485,000 acres. Under the public-land laws adopted by the Congress of the United States for the settlement of those lands in New Mexico it has only been

possible for the people of that State to acquire 3,581,000 acres. We pay all the taxes; we build the roads.

It was said here in the debate over the public roads on the forest reserves that we tax ourselves and build a road up to one line of the forest reserve, and to the other line of the forest reserve, and can not build it across. We tax ourselves and build a road up to the line of an Indian reserve, and we can not build it across, and the Government will not help us. For every public road built in Arizona or New Mexico benefiting 1 acre of private land the public lands of the United States receive the benefit to the extent of 10,000 acres—at least for every road going through the State.

I hope the Senate will pardon me for these digressions. I will speak possibly upon some other date upon these matters, which are so material to us; but I wanted to call the attention of the Senate now, once for all, to the fact that the bookkeeping in the Department of the Interior, if carried on in any private enterprise, would cause the immediate discharge of every man connected with it. The system is not an obsolete system; it is an incorrect system, if you can call it a system at all. The Senate amendment should be insisted on in this bill as an opening wedge to give the people of the United States, the taxpayers of the United States, the Indians for whom we are acting in trust, some opportunity to ascertain what goes with their money.

Mr. LANE. Mr. President, before the question is put on agreeing to the conference report, I wish to say that I proposed the amendment which has been under discussion without prejudice, for the reason that the books have never been experted, and it has been asserted that they can not be balanced or a balance sheet placed before the Senate which will show how the money has been expended. The department, through its representatives, states that it can not be done, and on the showing of a body of experts who examined the department's books, and whose expenses the United States Government paid, it can not be done. I wish, therefore, that this body would insist that the amendment stay in the bill without prejudice, in order that we may know what we are doing when we make appropriations for the Indian Bureau.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The conference report was rejected.

Mr. ASHURST. I move that the Senate further insist upon its amendments to the Indian appropriation bill and ask for a further conference with the House on the disagreeing votes of the two Houses thereon, and that the conferees on the part of the Senate be appointed by the Chair.

The motion was agreed to; and the Vice President appointed Mr. ASHURST, Mr. MYERS, and Mr. CLAPP conferees at the further conference on the part of the Senate.

### GOOD ROADS.

Mr. STONE. Mr. President, I ask the Senate to take up the motion made on Wednesday to discharge the Committee on the Census from the consideration of Senate bill 5796.

The VICE PRESIDENT. It is just 2 o'clock, and it is the duty of the Chair to lay the unfinished business before the Senate. It will be stated.

The SECRETARY. A bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter.

Mr. STONE. I ask to lay aside the unfinished business temporarily that the motion referred to may be disposed of.

Mr. BORAH. Does the Senator from Wisconsin [Mr. LA FOLLETTE] know that the motion is to be made?

Mr. STONE. I told the Senator from Wisconsin that I would have him phoned to at his office, and I have informed him that I am making this motion.

The VICE PRESIDENT. Without objection, the unfinished business is temporarily laid aside. Pending the question on the motion of the Senator from Missouri, the Chair lays before the Senate bills from the House of Representatives for reference.

### HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on the Judiciary:

H. R. 6097. An act to ratify the compact and agreement between the States of Oregon and Washington regarding concurrent jurisdiction over the waters of the Columbia River and its tributaries in connection with regulating, protecting, and preserving fish; and

H. R. 13765. An act to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The following bills were severally read twice by their titles and referred to the Committee on Banking and Currency:

H. R. 13391. An act to amend the act approved December 23, 1913, known as the Federal reserve act, by adding a new section; and

H. R. 13474. An act to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911.

H. R. 193. An act to provide for the care and treatment of persons afflicted with leprosy and to prevent the spread of leprosy in the United States was read twice by its title and referred to the Committee on Public Health and National Quarantine.

H. R. 3032. An act authorizing the county of St. Louis to construct a bridge across the St. Louis River between Minnesota and Wisconsin was read twice by its title and referred to the Committee on Commerce.

H. R. 12835. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Republic of Haiti, and for other purposes, was read twice by its title and referred to the Committee on Naval Affairs.

### CALLING OF THE ROLL.

Mr. GALLINGER. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Harding | Oliver | Stone |
| Bankhead | Husting | Overman | Sutherland |
| Beckham | Johnson, Me. | Owen | Swanson |
| Borah | Johnson, S. Dak. | Page | Taggart |
| Brady | Jones | Poindexter | Thomas |
| Brandegee | Kenyon | Ransdell | Thompson |
| Chamberlain | La Follette | Shafroth | Tillman |
| Clapp | Lane | Sheppard | Townsend |
| Culberson | Lodge | Sherman | Underwood |
| Cummins | Martin, Va. | Smith, Ariz. | Vardaman |
| Curtis | Martine, N. J. | Smith, Ga. | Warren |
| Dillingham | Myers | Smith, Md. | Works |
| Fall | Nelson | Smith, S. C. | |
| Gallinger | Norris | Smoot | |
| Gronna | O'Gorman | Sterling | |

Mr. SWANSON. I desire to state that the senior Senator from Ohio [Mr. POMERENE] is unavoidably detained from the Senate on official business.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). Fifty-seven Senators have answered to their names. A quorum of the Senate is present.

### ADVISORY VOTE ON DECLARATION OF WAR.

Mr. STONE. I understand that the unfinished business has been laid aside.

The PRESIDING OFFICER. The Chair so understands.

Mr. STONE. Mr. President, the motion which I made on Wednesday and which went over under the rule I wish now to call up. The motion is that Senate bill 5796, which was referred to the Committee on the Census, be now referred to the Committee on Foreign Relations; or more correctly stating the motion, that the Committee on the Census be discharged from the further consideration of this bill, and that the same be referred to the Committee on Foreign Relations.

The PRESIDING OFFICER. The Senator from Missouri moves that the Committee on the Census be discharged from the further consideration of the bill (S. 5796) to authorize the Director of the Bureau of the Census under certain conditions to prepare and distribute blank ballots, and to receive and count marked ballots and report to Congress the result of an advisory vote, and that the bill be referred to the Committee on Foreign Relations.

Mr. STONE. Mr. President, I wish to say a few words only by way of explanation. It seems to me so perfectly manifest that the bill ought to go to the Committee on Foreign Relations that I need only call attention to the substantive features of its provisions.

Preliminary to that, I ask the Senate to read the title of the bill. The title reads "A bill to authorize the Director of the Bureau of the Census under certain conditions to prepare and distribute blank ballots and to receive and count marked ballots and report to Congress the result of an advisory vote." Under that title neither the Presiding Officer nor the Secretary upon reading the title would be able to form any kind of impression as to the provisions of the bill or as to its purposes. It was

referred to the Committee on the Census because of the peculiar character of the title of the bill, and because its author requested that reference.

Now, examining the text it will be found that it provides—

That whenever the President shall sever diplomatic relations with any foreign Government, and thereafter, 1 per cent of the qualified electors in each of 25 States, as determined by the votes cast at the last preceding general election at which Members of Congress were voted for in each of said States, shall file with the Director of the Bureau of the Census duly verified petitions as herein provided, it shall be the duty of said director to ascertain and report to Congress, as provided in this act, the number of electors voting at an advisory election in each congressional district in the several States of the Union in favor and the number of such electors voting in opposition to a declaration of war against such foreign Government. Each of the aforesaid petitions *shall* have written or printed at the top of each sheet thereof substantially the following—

Now, what is the following that shall be written or printed at the top of each sheet sent out? It is as follows:

I, the undersigned, a qualified elector of the city of ———, county of ———, and State of ———, who resides at number ———, on ——— street (or in the town of ———), do hereby petition that the question of declaring in favor of, or in opposition to, war against the Government of ——— (with which Government diplomatic relations have been severed by the President) be submitted to a vote of the electors of the several States.

Name of signer, ——— ———.
In cities: Street ———, number ———.
Date of signing, ———, 19—.

These papers are to be sent out by the Director of the Census to the various postmasters of the country to be distributed by them to the electors of the vicinage. The electors are to fill out the blanks I have read, indicating whether they favor or oppose a declaration of war and return the ballot to the Director of the Census.

Here is the form of the ballot:

Shall the United States declare war against the Government of ——— (here insert name of country), with which Government the President has severed diplomatic relations?

Yes. ——. No. ——.

The voter is required to mark whether he votes affirmatively or negatively. Then follows this:

I do hereby certify that I am a legally qualified voter, residing at No. ———, on ——— Street, in the city, village, or town of ——— county of ———, State of ———, and that I have not heretofore voted at this advisory election.

(Signature of voter) ——— ———.

Dated this ——— day of ———, 19—.

And on the opposite side of said card the address of the Bureau of Census, Washington, D. C., with the words "Official business—Free."

The remainder of the bill is administrative. I have read the substantive features of it.

The ballot is to be sent out to postmasters by the Director of the Census and distributed by the postmasters among the electors in each vicinity. The form of the ballot thus given is to be used, and is to be returned by the voter to the Director of the Census; and the director, in turn, would be required to count and tabulate the returns, and report the result to the Clerk of the House of Representatives, where they are to be preserved, open to the examination of Members of either House of Congress.

Mr. President, it seems so clear that a measure of that kind which concerns and is intended to influence the action of the Congress of the United States in declaring war against a foreign country should go to the Committee on Foreign Relations instead of to the Committee on the Census or to any other committee of the Senate that it is scarcely worth while to elaborate the subject.

Mr. President, we have pending at this hour a situation understood by all of us, by the country, and by the whole world that exemplifies the force of what I have said. I refer to the issue which is at present in the course of diplomatic negotiation between this country and the German Government. It does not matter in the least what the opinion of individual Senators may be with respect to this situation or whatever may be the opinion of individual Senators as to whether the facts and circumstances would justify the Executive in severing diplomatic relations between these two Governments or whether events past or events that might arise would justify a declaration of war by the war-making power of this Nation—that is, the Congress—is a subject of such grave, and it may become one of such emergent, character that Congress should not be held in restraint, and be put in a measurably powerless attitude to take affirmative action. Whatever the opinion of individual Senators may be as to these matters, and without discussing the merits of the bill, I submit to the Senate that the bill presents a question of policy which so intimately and directly concerns the most vital interests of this Government in dealing with foreign affairs that there ought not to be a moment's hesitation in the mind of any Senator that it ought to go to the committee appointed by this body to take charge of our foreign relations.

I think that is all I care to say at this time.

Mr. CLAPP. Mr. President, of course there are two questions involved here. One is as to the advisability of legislation such as is embodied or proposed by the bill under consideration; the other to what committee the bill should be sent, because, of course, no matter what the view of any individual Senator would be as to the merits of the bill it must, in our legislative procedure, go to some committee.

I can not agree with the Senator from Missouri that this is a proper measure to send to the Committee on Foreign Relations. The Committee on Foreign Relations deals with two phases of the attitude of this country toward foreign nations. One is the diplomatic phase, and the other is the consideration of treaties after they have been sent to the Senate by the President. This bill does not deal, of course, with either of those subjects. This bill, if it should become a law, does not become operative in the mechanism, if I may use that term, provided for in the bill until after diplomatic relations have been severed.

I would be the last to embarrass the President in his diplomatic relations, and for that reason, among others, I voted several weeks ago against tabling a substitute resolution which would, in my judgment, embarrass him possibly in subsequent diplomatic matters. After he has dealt, and the Foreign Relations Committee has dealt so far as it may in conjunction with the President, with the matter of diplomatic relations, then, if war were to follow, the question of war in that case would not go to that committee. That committee would have completed its natural functions and ceased to be a material factor in the case when once diplomatic relations were severed. That being true, it is obvious that that committee would not be the committee to which to send this bill. As it is a marked change in law that is proposed, it might, with far more propriety, be urged that it should go to the Judiciary Committee, which deals in a broad way with new legislation. It might even, with much more propriety, be urged that it should go to the Military Committee, which would become the active committee if war were to follow the severance of diplomatic relations.

As to the features of the bill it would seem as though some such provisions as these should have existed long ago as a part of our fundamental law. Twice already the Congress has been placed in a position where it was no longer free to act upon its judgment with reference to the original merits of a question involving war, because, under our Constitution, while the function of declaring war is vested solely in the Congress, yet a President, as Commander in Chief of the Army and Navy, may take such action and may in effect bring on war, and then Congress, in order to avoid the effect of a divided sentiment in this country as to the country or the people involved in that war, must vote aye and approve the course already adopted.

I remember that a year or so ago when our marines were ordered to Mexico, if I had been a Member of the House of Representatives when the motion to approve that action was pending there I would have voted "no" most emphatically. That event is now so far removed from the present contingency in Mexico that there can be no embarrassment in discussing the merits of that act at that time. We had refused to recognize Huerta as the head of a government. Whatever may be said as to inadvertence, of the wrong technically, upon our men, you could not charge it as an international insult to a flag, an act that was not done by somebody recognized and clothed with the prestige and the authority of national existence. Yet it was insisted that Huerta should make an apology; and a difference grew up upon the question of the number of guns that should be fired as a salute. Failing to agree upon that, our marines were ordered to Mexico, and we were upon the verge of a situation there that might well have developed to a war in a broad scale. When that resolution finally reached a vote in the Senate—I think it was early one morning—our soldiers were being shot down upon the streets of Vera Cruz, and we were in actual war; not, of course, upon a broad scale; but, nevertheless, when organized troops of soldiers, recognizing military authority, are actually fighting, combating, that is war. It seems to me that, deplorable as that transaction had been up to that time, there was but one thing to do, and that was to show to the people of Mexico that we were a united people and were behind the President, and for one I voted to approve that action.

Mr. LA FOLLETTE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Wisconsin?

Mr. CLAPP. I do.

Mr. LA FOLLETTE. I would ask the Senator from Minnesota if he has any doubt that the action of the President in that instance would have resulted in war if our troops had been ordered into and had actually invaded the country of a nation that was in a position to resist, instead of being a nation that was disorganized, which was in the throes of rebellion, helpless, beyond the power to resist? If it had been a strong nation, that action of the President would have brought war upon this country without Congress ever having had the opportunity to exercise its constitutional prerogative of declaring war.

Mr. CLAPP. Undoubtedly. Then it would have seemed, at least to me, a duty to approve what was being done, rather than to encourage, by a suggestion that there was a division of sentiment here, opposition and the further shooting down of our men.

Mr. President, a few months ago I saw a cartoon in a newspaper which was based upon the suggestion that had been made that an eminent citizen of this Republic was going to Europe to talk peace. Of course I may as well name him. It referred to the proposed trip of William J. Bryan to Europe to talk peace. That picture represented some 12 men huddled together, all wearing crowns, throwing their hands aloft, and saying, "We will have peace if it will only prevent you coming here." It was intended as a humorous slant at Mr. Bryan; it was intended to suggest the thought that those crowned heads would stay their hands in that bloody conflict rather than to have to listen to the speeches of Mr. Bryan. But, Mr. President, there was in that picture a lesson deep and important, and one probably never dreamed of by the man who drew that picture. The question is this: How should it happen that 12 men could say whether or not peace or war should prevail in Europe?

Of all the lessons taught by this terrible maelstrom of war to-day, there is none, to my mind, so important as the thought that there must come a time when no 12 men can say whether or not we shall have war or peace upon any continent of this earth. We have to-day peace societies, and their motives are grand and worthy, but we shall have permanent peace on this earth only when that time comes that the great, broad equation of humanity, composing the nations of the earth, shall declare whether there shall be peace or war, and when that broad equation includes not only those who must bare their breasts to the battle storms on the battle field, but shall include the womanhood of the nations who must bear their share of the burden and the sacrifice of war.

Mr. President, this proposed measure takes from Congress no power whatever. If this Nation should be threatened by war, if, as a matter of defense, it was unwise to await the action of a submission to the people of the question, no one would doubt but that Congress would promptly and efficiently respond to the demand for defense and to repel invasion; but it does contemplate that in this matter of declaring war, when time shall permit of the submission of the question, that the great rank and file of this Republic shall be heard in some effective manner, so far as affecting the presentation of their sentiments upon that question. It is only advisory, after all; and yet, Mr. President, if to-day there were an occasion where we were called upon to say whether as a body we would vote for war, there is not a Member of this body but would take into account the thought of the sacrifice that the people must bear and the thought of the attitude of the American people toward the proposed declaration of war.

Instead of leaving that to the uncertain medium that to-day might be employed to communicate to Congress the sentiment and the purposes of the people, this bill, in an orderly way, seeks to provide that the people of this country may be heard, if Congress in its wisdom, in view of the exigencies of probable war, felt that it was wise to await that decision; taking nothing, then, from the power of Congress for providing an orderly way of getting that sentiment that to-day we all understand must come in an uncertain way—come with no certainty as conveying the real purpose of a people behind the expression. It would seem as though a measure of this kind might well be incorporated into the laws of this country, not with reference to existing conditions, but it should long ago have been a part of the law of this country.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Idaho?

Mr. CLAPP. I do.

Mr. BORAH. Would it interrupt the Senator if I were to ask him a question?

Mr. CLAPP. Not at all.

Mr. BORAH. Does the Senator from Minnesota believe that there is any way by which to have a real plebiscite with reference to this kind of a question under our Government? Is there any way by which, when the result would come back here, we would know that there was any authenticity or verity to the public opinion which apparently was recorded by the vote? How would you get a vote or get an expression which, if Congress desired to be guided by it, would indeed be the public opinion of the country?

Mr. CLAPP. The provisions of this bill are that these ballots shall be sent out; that is, after a petition has been presented by the requisite percentage of voters, and those ballots returned, and when counted reported to Congress. Of course, you might well say that even the result of a general election is not fully decisive of the sentiments of a country. There were, no doubt, things in the political platforms of four years ago that were not sanctioned, and which, if submitted to a careful consideration of the American people, would not have received the sanction of a majority of the voters. The only real decisive thing in an election, of course, is the determination of which of several candidates shall be regarded as having received the requisite number of votes; but clearly this is much more satisfactory, much more orderly, and would much more reflect the will and the sentiments of the people than would any system which we have to-day.

One of those systems was discussed at some length by one of the Senators the other morning, as though he had—and I say it in no spirit of reflection—suddenly discovered the existence of a system. Every Senator who has been here any number of years knows that time and again stimulated views of sentiment have been sent to Congress until we have learned to doubt whether they really reflect a settled purpose; but surely this would go far toward relieving that situation.

Mr. President, I did not at this time intend to speak in detail of the merits of the measure. It may be that debate will disclose the fact that this measure will require amendment and perfection. I was speaking more generally upon the broad proposition that the time must come, not only abroad but even here, with a Congress clothed with the power to declare war, when there must be a more general, orderly expression of the will and purpose of the people except when war is essential as a matter of the immediate defense of our country.

But the question that is to-day before us is, Whether or not this bill should go to the Foreign Relations Committee? As I said at the outset, there is nothing in the bill, if it became a law, with which the Foreign Relations Committee would deal. After the severance of diplomatic relations, then, in the ordinary course of things, the next step would be a declaration of war, possibly; but whether Congress would declare war or would refrain from declaring war would not depend upon the views nor would it be a matter within the control of the Committee on Foreign Relations. This measure in no manner impinges upon diplomatic matters; it in no manner limits the authority of the President; nor does it in any manner limit the activity of the Committee on Foreign Relations. It only seeks to provide that, after the function of the President and the function of that committee have ceased and been discharged, because the function has already been performed, whatever that may be, then the question of whether war should follow should be submitted in an advisory manner to a vote of the American people, not even interfering with the power of Congress to take such steps as to it seem wise or necessary.

The PRESIDING OFFICER. The question is on the motion of the Senator from Missouri [Mr. STONE].

Mr. NORRIS. Mr. President, it seems to me we ought always to bear clearly in mind the distinction between the question now before the Senate and the merits of the bill. It is not a question now as to whether or not this bill should be passed; that is not even indirectly involved in the question before the Senate. The question is, Whether this bill shall be referred to the Committee on Foreign Relations or to the Committee on the Census? To determine which of those committees ought to have the bill for consideration, we must have recourse to the bill itself to see for what it provides.

Mr. President, there is not a provision anywhere in the bill pertaining to any department of the Government or to any bureau of a department, except the Bureau of the Census. All of the work to be done, all of the details to be arranged, are under the terms of the bill put upon the Bureau of the Census. As to whether we want this kind of a law, that question will be determined by the Senate when the bill is reported by a committee to the Senate, and subsequently by the other House. As to the necessity of such a law, the reasons for it, and the objections to it, that is a matter that will be determined, so far as the merits of the legislation are concerned, by the Senate, and

not by any committee; but if we want this kind of a law, if we believe it is wise, its details and the manner of working it out, inasmuch as the bill provides that every single function under it shall be performed by the Bureau of the Census, it seems to me that it can not appropriately go to any other committee of the Senate than the Committee on the Census.

The bill provides that upon the filing of a petition—and that petition will be filed with the Director of the Census—containing a certain number of names, and so forth, the Census Bureau shall do certain things. They shall, under certain conditions, provide a ballot, which they shall send out to the postmasters, and the postmasters shall, under the terms of the bill, distribute the ballots among the people, and every citizen shall be allowed to receive one of the ballots, and when he gets ready to vote he returns the ballot to the postmaster, and the postmaster sends it where? To the Bureau of the Census. It comes back again to the Census Bureau. And when the returns are in the Census Bureau shall report the decision to Congress. No instrumentality of our Government is to be put in operation anywhere, except the Census Bureau, by the terms of this bill.

The bill, merely having been introduced, must take its regular course, as do other bills. We can not determine now what the policy of the Senate will be, whether the Senate will pass the bill or not; but it undertakes to work out certain details, every one of which, without exception, must be carried out in every particular by the Census Bureau. That bureau will do all of the work.

The Foreign Relations Committee, as I understand its jurisdiction and its work, has nothing to do with a matter of that kind. If we had before the Senate a joint resolution to declare war against another country and the question arose as to where that joint resolution should be referred, then, manifestly, it ought not to go to the Committee on the Census, but it ought to go to the Foreign Relations Committee. That question is, however, not presented here; that has nothing whatever to do with this question. This is a bill providing that certain things shall be done by the Bureau of the Census; and, therefore, it seems to me the question immediately before the Senate being, What committee of the Senate should have that kind of a bill, that it should be referred to the committee that deals with census matters.

It is just as much a matter for the Committee on the Census as though it were a bill calling upon the Bureau of the Census to secure certain information in regard to the population of the country or to secure certain information in regard to any class of corporations or any industry of any kind. Any bill that may by its terms make it the duty of the Census Bureau to do anything along its peculiar line of activity should be referred to the Committee on the Census. That is particularly true when there is nothing else involved in the bill except a duty to be performed by the Census Bureau. No other committee of the Senate is so appropriately adapted to the consideration of that kind of a bill as the Committee on the Census. It seems to me we eliminate all difficulty in passing on this question if we draw the distinction between the broad question of passing the bill and the question of getting the bill in shape for the performance of the peculiar duties mapped out in the bill.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Idaho?

Mr. NORRIS. I yield to the Senator.

Mr. BORAH. If the bill had been introduced solely for the purpose of working out the machinery for taking a referendum upon any public question, separating the question of the machinery by which to take a plebiscite from the subject matter upon which it is going to be taken, we would have, as I understand, the proposition for which the Senator is contending—that is, the mere question of working out a method by which to record public opinion?

Mr. NORRIS. Yes.

Mr. BORAH. But the Senator will notice that this bill covers in and of itself a certain subject matter in connection with that, and that is the question of a declaration of war in case of the severence of diplomatic relations. Does the Senator believe that it is possible under our dual form of government to work out a system or method by which we can have anything like an authentic expression of public opinion upon an abstract question, aside from a general election or something of that kind?

Mr. NORRIS. I am inclined to think that this bill does that to quite an extent. I do not believe, however, that is material; and I have not discussed that question because I do not regard it as material in deciding the question now before the Senate, as to which committee ought to consider this bill.

Mr. BORAH. I was going to say that if anyone knows how to work out the machinery or the method by which to get a referendum upon a public question of that kind, I should like such a one to consider this bill, because I would not know how to do it.

Mr. NORRIS. This bill, the Senator must know, provides exclusively for one operation, and it undertakes to carry that out under the exclusive jurisdiction of the Bureau of the Census.

Mr. BORAH. I understand that.

Mr. JONES. Mr. President——

Mr. NORRIS. In just a moment I will yield to the Senator. No other bureau or department of the Government has anything to do with it. As to whether they can work out a good scheme, I do not care to discuss that. I will only say, in answer to the question of the Senator, that I believe they can; I believe this bill contains the outlines of something of that kind. It must be remembered that it is not final. The bill on its face provides that the report shall be made to Congress, and Congress can give it whatever consideration it deems it ought to have. It is not compulsory; it does not undertake to decide whether we shall have war or not; it simply gives Congress the information as to what the people who care to vote on the proposition under the method provided for think in regard to that question.

Mr. BORAH. What I was seeking to call to the Senator's attention was that, it seems to me, a method or a scheme by which this vote shall be taken and the machinery by which it shall be recorded might very properly be separated and distinguished from the subject matter upon which we might finally come to a conclusion to take a vote; and the method of working out the machinery or formulating the machinery might belong to one committee, and then when we came to arrange for taking the vote it might go to another committee.

Mr. NORRIS. There is not anything involved in this bill except the formulation of a program. As I said in the beginning, whether we want to take that step, whether we want such a formulation made, will depend upon the action of the Senate when the bill is reported here; and the Senate will then determine that proposition.

Mr. SUTHERLAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Utah?

Mr. NORRIS. I yield first to the Senator from Washington [Mr. JONES], who undertook to interrupt me a while ago.

Mr. JONES. Mr. President, I think the Senator from Idaho has practically answered the suggestion that I was going to make, which was simply this: I was going to ask whether or not the Senator thought that the Census Committee could not work this out just as well as the Foreign Relations Committee, so far as that is concerned?

Mr. NORRIS. I think so.

Mr. JONES. We do not know whether it can be worked out or not; but one committee is just as competent to do it as the other.

Mr. NORRIS. I now yield to the Senator from Utah.

Mr. SUTHERLAND. Mr. President, I want to ask the Senator from Nebraska what he regards as the vital matter in this bill? Is it the question as to whether or not Congress, before exercising its constitutional power over the subject of war, shall invite the opinion of the people of the country, or is it the question of what machinery shall be adopted to ascertain that opinion?

Mr. NORRIS. I think in the beginning of my remarks I answered that question. I will say to the Senator that, as to whether we should adopt any machinery, whether we should take any steps to ascertain that, is a matter that no committee of the Senate can determine; but it must be passed on by the Senate, and will be passed on by the Senate, if this bill is ever reported to the Senate, and then voted on, no matter to what committee the bill is referred.

Mr. SUTHERLAND. Of course, Mr. President, that is true of any question.

Mr. NORRIS. Yes.

Mr. SUTHERLAND. The Senate must pass upon it; but under the rules of the Senate—and very wise rules, I think—when a bill is introduced, depending upon its subject matter, it goes to a particular committee. Now, it seems to me that the subject matter of this bill is the question which I first stated in the proposition I propounded to the Senator, namely, whether or not Congress shall, before exercising its constitutional power, invite the opinion of the people at all. The Senator very well said a moment ago that if a joint resolution were introduced here declaring war against any country, that joint resolution, of course, would go to the Committee on Foreign Relations, because such a matter would very profoundly affect our foreign relations. Now this bill deals with that same subject matter. Before the Congress can——

Mr. NORRIS. No; not at all; I do not think so.

Mr. SUTHERLAND. Yes; this deals with the subject matter of war with a foreign country.

Mr. NORRIS. Oh, no; very indirectly it does; but the Senator, I think, is wrong when he says that this bill even indirectly is to determine whether we shall have war with any foreign country. It has nothing whatever to do with that; it seeks only to get the advice of the citizens of the country, and it provides a method by which that advice may be obtained, and uses the Bureau of the Census as the instrumentality.

Mr. SUTHERLAND. Exactly; it undertakes to provide a way by which Congress shall ascertain what is the sentiment of the people of the country with reference to declaring war against a particular foreign country——

Mr. NORRIS. Yes.

Mr. SUTHERLAND. Because it provides that its provisions shall only apply to a case where diplomatic relations have been severed. Therefore it deals with some particular country. The bill provides that—

> It shall be the duty of said director to ascertain and report to Congress, as provided in this act, the number of electors voting at an advisory election in each congressional district in the several States of the Union in favor and the number of such electors voting in opposition to a declaration of war against such foreign Government.

Evidently the purpose of ascertaining the opinion of the people respecting that is that it may have its influence upon Congress.

Mr. NORRIS. Yes; I think so.

Mr. SUTHERLAND. It is to influence the question as to whether we shall declare war.

Mr. NORRIS. Yes.

Mr. SUTHERLAND. So, after all, the fundamental, the vital, question involved in this bill is whether we shall first of all have the opinion of the people before acting on the question of a declaration of war.

Mr. NORRIS. If there were no modus operandi provided as to how that should be ascertained, if we were merely going to pass on the question as to whether we were going to get an advisory opinion from the citizens of this country on any question, war or anything else, why should such a proposition be referred to the Committee on Foreign Relations?

Mr. SUTHERLAND. That is a very pertinent inquiry.

Mr. NORRIS. They have nothing to do with it; they are not peculiarly adapted to consider the question as to whether or not Congress shall ascertain the opinion of the citizenship of the country; they have not any more jurisdiction over a proposition of that kind than has any other committee, nor as much, it seems to me.

Mr. LA FOLLETTE. Mr. President——

Mr. SUTHERLAND. If the Senator will permit me to answer the question, first——

Mr. LA FOLLETTE. Before the Senator answers it, just let me make a suggestion, if the Senator will permit me.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Wisconsin?

Mr. NORRIS. Yes.

Mr. LA FOLLETTE. Is it not easily conceivable that the Committee on the Census might broaden the terms of this bill so as to provide for an expression from the qualified voters of the country upon any question relating to the public welfare?

Mr. NORRIS. It is.

Mr. LA FOLLETTE. Then surely it would remove any question as to the prerogatives of this special Committee on Foreign Relations.

Mr. NORRIS. Well, in my judgment, if a bill were introduced to get information on this or any other subject—it does not make any difference what; anything that you can conceive of—if it provided, as this bill does, that the instrumentality for ascertaining the information should be the Bureau of the Census, I think that bill ought to go to the Census Committee, just as much as this bill should go there, because it might pertain to something entirely different from a declaration of war.

Mr. SUTHERLAND. Now, may I answer the question which the Senator propounded, which is a very fair question?

Mr. NORRIS. Certainly.

Mr. SUTHERLAND. We are not dealing with some other bill. We are dealing with this bill; and this bill proposes that after diplomatic relations shall have been severed with any foreign government, there shall be a referendum to the people of the country to ascertain their opinion as to whether or not war shall be declared against that particular country. That is the vital subject with which this bill deals.

Mr. NORRIS. Yes.

Mr. SUTHERLAND. So that the question asked by the Senator from Nebraska is a very fair one.

Mr. STONE. Mr. President——

Mr. SUTHERLAND. Suppose the bill dealt with that question alone, and did not deal with the machinery. The Senator wanted to know why it should go to the Committee on Foreign Relations. Now, suppose that a resolution was introduced here which simply declared that it was the sense of the Senate that before war should be declared against a foreign country the opinion of the people of the United States should be ascertained. It seems to me that obviously a resolution of that kind would go to the Committee on Foreign Relations——

Mr. NORRIS. The answer to that——

Mr. SUTHERLAND. Wait a minute; I have not quite finished, if the Senator will permit me—because the subject matter of it is the question of war with a foreign country. The question presented by the resolution is whether or not we shall so far modify the action of Congress under the Constitution of the United States—which vests the war-making power in Congress—as to invite an advisory opinion of the people before Congress acts; but it deals with that question of war, and it deals with that constitutional power to declare war, and therefore, as I have said, deals in the most profound sense with our foreign relations; and I can conceive of no committee to which it could be appropriately referred except the Foreign Relations Committee. Of course, that is only a difference in the point of view of the Senator and myself.

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Missouri?

Mr. NORRIS. I want first to answer the question propounded by the Senator from Utah.

Mr. STONE. Mr. President——

Mr. NORRIS. I will yield to the Senator in just a moment. I want to refer to what the Senator has said.

I could use the Senator's own language and answer his suggestion. In answering a question of mine, he said: "We have this bill before us, and we must not take into consideration what might be in a bill." In answer to his question as to what we should do with a resolution which said that before we declared war it was the sense of Congress that we should submit the matter to a referendum vote, I will say that that is not the question before the Senate now. That is not the bill that is up for reference. It is an entirely different bill. This bill provides in detail for the operations of the Bureau of the Census. It has nothing to do with the State Department. Not even indirectly can they be interested in it.

Mr. SUTHERLAND. Mr. President——

Mr. NORRIS. Let me finish, now. I let the Senator finish his question.

It does not make any difference what the subject might be, if you provide in the bill for the detail of carrying it out. In this case, for instance, the State Department, as I said a while ago, would have nothing to do. They have not even an indirect interest in it. The question of taking a referendum vote before we pass on the tariff, before we pass on a public-buildings bill, before we pass on a currency bill, if the details of the bill are carried out, is something entirely different from the enactment of a tariff bill, from the enactment of a currency bill, or from the enactment of a public-buildings bill; and that is what this bill undertakes to do.

Why, we could have a bill providing for the raising of revenue by a tariff; it would be referred to the Senate Committee on Finance, and then it might have in it a whole lot of other incidental questions. It might have in it, and always does, legal questions of great importance that would perhaps, and in my judgment would, under the theory of the Senator from Utah, be referred to the Committee on the Judiciary.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. The Senator from Missouri [Mr. STONE] has twice addressed the Chair. Does the Senator from Nebraska yield to him?

Mr. NORRIS. I yield to the Senator from Missouri.

Mr. STONE. I thank the Senator.

The matter before the Senate, of course, is merely one of correct procedure under the rules and practice of this body, and perhaps is far less important for the moment than matters of legislation pending. I wish to say to the Senate and to the Senator from Nebraska that I was permitted to call up this motion after the unfinished business had become the order of the Senate by the courtesy of the Senator from Alabama [Mr. BANKHEAD], and I stated to him that I did not suppose it would take over 20 or 30 minutes to dispose of it; but it seems now that there is likely to be a somewhat prolonged discussion.

I assume, as long as this motion is pending, that the Committee on the Census will await the action of this body. I should like now, if the Senator from Nebraska will consent, out of deference to the wish of the Senator from Alabama, who has charge of the bill which is the unfinished business—and

which he can call up anyhow, I imagine, under the rules—to lay aside for the time being this motion which I have called up, and to-morrow morning, during the morning hour, if I can, I will ask to take it up again.

Mr. NORRIS. I have no objection to that. I will say to the Senator that I was about through.

Mr. STONE. The Senator from Alabama has spoken to me just now, and he is anxious to go on with the good-roads bill. Recognizing and in a sense returning the courtesy he extended to me, I make this request, that the matter may be laid aside.

Mr. LODGE. I understand the Senator will call it up to-morrow in the morning hour?

Mr. STONE. I will call it up to-morrow in the morning hour.

GOOD ROADS.

Mr. BANKHEAD. I ask that the Senate may resume the consideration of the unfinished business.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter.

The PRESIDING OFFICER. The pending question is upon the amendment of the Senator from Montana [Mr. WALSH] to the amendment of the committee.

Mr. SMOOT. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Husting | Owen | Swanson |
| Bankhead | Johnson, Me. | Page | Taggart |
| Beckham | Johnson, S. Dak. | Phelan | Thomas |
| Borah | Jones | Pittman | Thompson |
| Brandegee | Kenyon | Poindexter | Tillman |
| Chamberlain | La Follette | Shafroth | Townsend |
| Clapp | Lane | Sheppard | Underwood |
| Culberson | Lee, Md. | Simmons | Vardaman |
| Cummins | Lodge | Smith, Ariz. | Walsh |
| Curtis | Martine, N. J. | Smith, Ga. | Warren |
| Fletcher | Myers | Smith, Md. | Works |
| Gallinger | Nelson | Smoot | |
| Gronna | Norris | Sterling | |
| Harding | Overman | Sutherland | |

The PRESIDING OFFICER. Fifty-three Senators have answered to their names. A quorum of the Senate is present. The question is upon the amendment submitted by the Senator from Montana [Mr. WALSH] to the amendment of the committee.

Mr. TOWNSEND. Mr. President, I have been detained from the Senate on a conference committee during the discussion of this provision, and do not know, therefore, just exactly what has been said or what arguments have been advanced.

I trust, however, that this amendment will not prevail. This is a bill which has for its object a certain specific thing; and if we are going to load it up with the various amendments which have been offered, of course it is the best way to defeat it. I imagine that Senators who are opposed to good-roads legislation of this kind will support these amendments, although I have no doubt that the amendment has been offered and is supported by some in good faith.

I submit, however, that no one of the forest reservation States will get less than its proportionate share of whatever is appropriated under the original bill as presented by the Senate committee. Indeed, if we were to deal with exact equity, they are getting more than their share. There is an element which has not been discussed, but which to my mind has some merit. That is the question as to whether the States which pay the most toward the support of this bill, and will pay the most from the beginning, ought not to have that fact considered in apportioning the appropriation.

Suppose there entered into this as one of the elements for the distribution of the fund the amount of income or corporation tax that is paid by the various States. If that were included in the bill, Michigan and several other States would get much more money than they will get under the pending measure. In fact, applying that rule at the time, when the bill provides for the payment of the $25,000,000 in full, Michigan will pay something like a million dollars and get back something like $700,000.

But, Mr. President, this bill has been worked out with an idea of encouraging the building of good roads for the public good in all the States. The amendment provides that this money shall be paid back out of the forest products; yet I have sat here since I have been a Member of this body and have listened to Senators from the reservation States who insisted that the forest reservations were an expense to the Government; that they were not yielding any profit over and above expenses.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from California?

Mr. TOWNSEND. I yield.

Mr. WORKS. The Senator from Michigan is treating this bill as one intended to improve travel and as being in the interest of the States. I had supposed that from the alleged object of the bill, as contained in it, it was for the purpose of improving rural post roads in the interest of the Government. Now, if that be so, and that is the object of the bill, and is not a mere pretense, why should we stop to figure upon how much of the money one State or another will get?

Mr. TOWNSEND. I am not figuring upon that, Mr. President. I am simply answering suggestions that were made while I was in the Senate based on the question of equity. I have ignored it, and have stated clearly that I did not urge a reason which I thought had some merit—that the States which paid the most might get the most out of the appropriation. But I could have urged it with as good reason as supports this amendment.

I was saying, when interrupted by the Senator from California, that the charge has not been answered conclusively that this money will not be refunded to the Government, because, I repeat, the statements are on record here that these forest reservations are costing us more than we are getting out of them. I have not heard that denied. So that these States that are to get this gift without any contribution on the part of the State itself are getting this extra amount of money over and above what the other States not having forest reservations would obtain.

But, Mr. President, this question of roads through the forest reservations is one which should be submitted to and considered by the Committee on Agriculture. I will vote, if it is necessary, for money to build roads on the public domain through the forest reserves if it is found that they are necessary.

Mr. JONES and Mr. WALSH addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Washington?

Mr. TOWNSEND. Yes.

Mr. JONES. The Committee on Public Lands has nothing to do with lands in forest reserves. The Agricultural Department has charge of roads, and they are therefore under the jurisdiction of the Committee on Agriculture and Forestry.

Mr. TOWNSEND. I understand that. I made a misstatement. I meant the Committee on Agriculture and Forestry if it has that matter in charge.

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Montana?

Mr. TOWNSEND. I yield.

Mr. WALSH. I rose to make the same suggestion as that made by the Senator from Washington and to add that the bill under consideration originally went to the Agricultural Committee but was taken from that committee and sent to the Committee on Post Offices and Post Roads. If it had been left there this would be entirely appropriate, as would the other matters.

Mr. TOWNSEND. I think it would not be appropriate on a purely good-roads bill.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Utah?

Mr. TOWNSEND. I yield.

Mr. SMOOT. Just for the RECORD, I want to say that wherever lands within a forest reserve are legislated upon—that is, the disposition of those lands—the measure always goes to the Public Lands Committee, and that committee has always considered that class of legislation.

Mr. TOWNSEND. It makes no difference which committee it is, if it be the proper committee. If I made a misstatement as to the committee, I mean the proper committee that has this matter in charge. That is the committee which should consider the question of roads through the national forests.

I have a good deal of sympathy with these western Senators. I have been in their States. I know something about the amount of land that has been set aside for forest reservations, and I should like to have that question brought up and dealt with upon its merits. But I dislike very much, after having considered this road bill, to have it loaded down with a proposition of this kind, which may imperil it, and which may not pass through the House if you have this amendment on it. At any rate, I should like to have a report from the powers that have in charge the forest reservations as to their views upon the need of roads therein.

I say this because I am interested in this particular bill—a bill which has had careful consideration, and which stands a chance of becoming a law if we can pass it through the Senate without encumbering it with other provisions which have not been carefully considered, and which would bring up objections that might be fatal to its final passage.

Mr. NELSON. Mr. President, I am not at all unfriendly to this bill in its original form. I intend to vote for it whether this amendment is put on the bill or not. But there is no part of this entire road scheme, if you group the two together, both under the original bill and under this amendment, that is of such great importance to the people of the country, especially where forest reserves exist, as this amendment of the Senator from Montana.

We have in the northeastern corner of our State a forest reserve created a few years ago. Considerable settlements have been made in that part of the country by homesteaders; and when this forest reserve was created it was in two sections, leaving a strip, a sort of "no man's land," between the two wings of the forest reserve. In fact, the forest reserve up there is like a pair of goggles, and the poor settlers who are inside of that area of land are practically marooned. They have no way of getting out.

In the State of Minnesota public roads are built by the township and county authorities. The State does not build any roads. The State appropriates a small amount of money to aid in the building of roads, but the building of roads is done either by the townships, the towns—we have town government in Minnesota—or by the counties, and they are utterly helpless. They can not invade a forest reserve and build a road there. The counties can not go to a forest reserve and build a road through there. Moreover, the forest reserves up in that part of the country are covered with timber and a dense growth of underbrush, so that it is almost impossible to go through a foot of them.

For four years I have been trying to get a bill passed by Congress providing for the construction of a road from the shore of Lake Superior through a forest reserve, so as to reach those marooned settlers on the interior to whom I have referred. The forest reserve is within a few miles of the shores of Lake Superior. I have not been able, however, to get a favorable report or to get any action. I reintroduced the same bill at this session, hoping to secure something for the building of a road, in cooperation with the towns and counties, into that forest reserve, and what was the result? The department sent back a letter—I think the Senator from Montana has the letter—stating that they were opposed to my bill, but that they favored legislation exactly like the amendment which the Senator from Montana has offered. Practically that amendment has been recommended by the Agricultural Department, and if roads are a necessity anywhere, they are needed under such conditions as prevail in the State of Minnesota.

It is idle to talk about this amendment not being germane to the bill. What did you do here a short time ago? You attached a provision for a nitrate plant to an Army bill. You attached to a bill for increasing our Army a water-power bill, a nitrate bill; and, pray, why is it not as much a necessity and as germane to attach to a road bill a bill for roads through forest reserves to aid marooned settlers in getting out?

I am surprised at the statement that it will imperil the bill if we put on this amendment. I take it that the Members of the House, when this question is presented to them, will look at it in the same light that we look at it—that it is of as much importance to get roads through these forest reserves as it is to build little sections of automobile roads here and there through the country.

That is all there is to it, and I sincerely trust that all those who are friendly to the poor settlers who are marooned in forest reserves will vote for this amendment and give us that relief. I am actuated by no hostility to the original bill. I am simply in favor of this amendment because I regard it as one of prime necessity. Whether the amendment is adopted or not, I intend to vote for the original bill, and it is not in hostility to that bill that I am supporting the amendment.

Mr. BANKHEAD. Mr. President, I assume that the Senator from Minnesota is in favor of this amendment because he has a national forest reserve or an Indian reservation in his State. My information also is that that reservation consists of about a million acres, and under the provisions of this bill the Senator's State gets $2,191,000. It seems to me that after the great effort made on the part of the committee to frame the bill so as to do justice and equity and be fair with every State in the Union and every section of the country, Senators ought to be satisfied with its provisions.

Mr. SMITH of Arizona. Mr. President, as much as I dislike to say anything or do anything which the Senator having charge of this bill may feel retards its speedy passage here or hampers its course through the other House, I can not in the circumstances refrain from supporting the amendment of the Senator from Montana [Mr. WALSH]. No Senator here is more deeply interested than I in seeing that proper aid is extended by the Federal Government to the cause of good roads, better highways in the respective States. The bill now before us is as fair, to the extent it goes, as we can reasonably expect at this session of Congress, especially when the amendment now pending is placed within its provisions. That the proposed amendment will improve the bill by more nearly equalizing its beneficence and at the same time impose in a very slight degree the performance of a duty on the part of the General Government to the public-land States which has been long and scandalously neglected to the injury of those States and the destruction of vast resources belonging to the United States.

The injury to the Western States arises from the boundless reservation of lands from State use, which is now doing no one any good, and costs more for administration than it returns to the Treasury. And this condition will obtain until proper roads and trails are provided whereby the ripe and dying trees may be sawed and transported to market. These roads and trails will also afford the only means of successfully fighting forest fires, which yearly consume more merchantable stumpage than reaches the market in lumber shape in 10 years. Yet we call this conservation of our natural resources. We can never even fortify ourselves against this criminal waste until we devise a means of getting into the forest to cut the overripe and dying trees, thus preventing in a large degree those fire traps and tinder beds caused by fallen and decayed trunks and intermingled branches inviting a spark from a vagrant pipe or a stroke of lightning, to start at once a conflagration that reigns at will over valley and mountain peak and ceases not its mad rule as long as anything destructible lies within its relentless grasp. Yes, this is real modern, up-to-date conservation of our national resources. And the Federal Treasury pays out $2,000,000 a year, above all income derived from the forests, to keep this miserable business going. The amendment now before us looks toward a sensible reform. It proposes to prevent this destruction and waste as far as it can. Roads and trails will help the fire fighters meet the danger of great conflagrations at the start. Roads will make the dangerous timber accessible to the ax and a willing market. The market will produce an income oversufficient to meet the cost of road construction.

If these forests belonged to the States, instead of the National Government, they would to-day be yielding not only a rich income to be applied to State fiscal needs, but the forests would be in fact conserved, by cutting only the ripened trees and giving the young growth the sunlight necessary to its health and swift maturity. The States would build, because it could afford to build the roads. The States would protect the forests because they could not afford to ruin them. We live in the glory of a new day. With enlightened vision we behold the future, without forgetting the tempering lessons of the past. The States are not bent on self-destruction. They are not seeking ways to find bankruptcy. The States have learned as fast as Congress has—the public-land States much faster. These States are more interested, for the problem is at their fireside every day in the year. When will you representatives of Eastern States listen to the voice of justice and consanguinity? If you insist on keeping these vast reservations free from any use by the State, you must furnish the money to build proper roads through them and not impose any part of the expense on the States. We are compelled to police these reservations, yet we can not tax them. We see millions of property going to waste yet we have no power, nay, we have no right, to protect or care for it. We could not build a road or trail through one of them even to connect two important settlements needing each other's products without obtaining the consent of and submitting to the direction of some Government official. But, Mr. President, if we were willing to build such roads the Government—Congress—has put our ability to do it out of the question. Take my own State, Arizona, as a striking example of your wise and beneficent legislation. Forest reservations, extending often over lands on which no tree ever did or ever will grow; Indian reservations, often including lands never occupied and which never will be occupied by any Indian on earth; military reservations, some of them abandoned but not returned to the public domain—these constitute nearly half the area of my State and hold within their borders four-fifths of the really valuable land.

A new Indian reservation of a couple or so million of acres has just been created, and every water-power site—our own

water mind you—has been humanely withheld from our impious hands. The balance left the cities, towns, irrigated districts of small extent, live stock, and the mines must afford from taxes funds to meet the enormous but essential expense attending State, county, and municipal governments. In the face of these facts you hesistate to relieve in the slightest degree the disgraceful situation which your blindness has imposed. A picture often shows a true condition that words however adequate can not reveal.

Look at this map of Arizona [exhibiting], on which I have had the reservations in Arizona plainly painted in colors which catch the eye, so that a glance will show not only the reserved lands but the lands unreserved as well. Turn from this horrid picture to the uncolored and unmarred face of the maps of Indiana, Illinois, Ohio, Michigan, Wisconsin, Kansas, and imagine, if you can, where those States would stand now if in an earlier day the new conservation had been born, and they had contributed a like amount of their birthright to its shortsighted and insatiate zeal. When wisdom shall find a home in the brain and justice an abiding place in the hearts of our national representatives, then, and not till then, will these vast areas be returned to the States in which they are located, and contribute, as they should contribute, to the wealth, prosperity, and happiness of the people, who have undergone unspeakable trials, endured merciless hardships, in laying the foundation of a great State, never dreaming that those boundless resources about them were soon to be withdrawn from their use and dedicated to the General Government—to waste, to destruction.

An early decision of our Supreme Court (Shively *v.* Bolby, 152 U. S.) held, or at least said in effect, that the lands in the Territories were held by the General Government in trust for the people who should constitute the State when ultimately formed. That this was the original purpose is amply shown in the history of the States first admitted and in the liberal, humane homestead law under which nearly all the agricultural lands were settled. But it is needless to go further into this question now. What I have said, aside from advocacy of this bill, has been to set forth facts showing the propriety and justice of the amendment, which proposes an advance of $6,000,000 to construct roads in Government reservations. The sum is vastly inadequate, but the optimism of western spirit will keep on struggling and despond not, while hoping that a day is coming soon when some measure of justice will to equal extent relieve the burden which your mistaken policy has imposed on the States recently admitted to the Union. I can not, Senators, resume my seat without uttering the protest of the young, strong, virile, hopeful West against being longer mothered at the unyielding breast of experimental theory.

Mr. SWANSON. Mr. President, I have listened to the Senator from Arizona [Mr. SMITH] with a great deal of interest. I do not think there ever was a bill prepared with more liberality to the West than this bill. This bill as it came from the House divided the money according to population and rural and star routes. Star routes and rural-delivery routes are usually fixed according to population. We thought it was an element of justice to include the area of all the States, including public lands, State lands, and all in the division, and that that is taking care of the situation generously in all the States that have forest reservations.

Now, let us see what is done under this bill in the State of Arizona and the State of Alabama. The chairman of the committee and of the subcommittee that prepared the bill so framed it that under the bill every man, woman, and child in Arizona gets $5.20 per capita to aid road development in that State. Under the bill Alabama will get about 80 cents per capita, and the same proportion will exist with the other States. There has never been a bill prepared which is more generous to the Western States with that condition than this bill.

The other House has refused repeatedly to include area in any division that comes out of the Treasury for the construction of public roads, but in addition to that, what will the States of Arizona and Montana get? In addition to that, enough for road construction that they complain of, they get 10 per cent of lands that are sold in the forest reserves to keep up the trails.

It seems to me that this is a bill that these gentlemen ought to acquiesce in. It seems to me that it is just and fair. Montana gets about five times as much money as Alabama, $4.40 per capita. Every man, woman, and child in Montana under the bill will get out of the Public Treasury $4.40 per capita to aid in road development and to aid in transportation facilities. Yet Alabama, the State of the chairman of the committee, gets only 80 cents per capita. It is supposed that money more or less gets into the Treasury according to the per capita population.

There has been a great deal of difficulty in getting the House ever to consent that there should be a division of this kind. We thought and we believed and we are satisfied that the bill generously takes care of the situation in connection with the forest reserves.

If the forest reserves do not pay enough, if 10 per cent more ought to be paid, that is another question, and it ought not to be projected into this bill. This amendment does not recognize the injustice of the present law but it asks the Federal Treasury to advance money for what they get from the forest reserves, 10 per cent, and let roads be built there earlier than they are built in the other sections of the country. It extends credit to certain sections to build roads earlier than where there are immense areas with thick population.

I hope the gentlemen from the Western States like Arizona and Montana, considering the generous provisions of the bill, will acquiesce in it. You are going to have great difficulty in getting the House to accept it. When we prepared the bill in subcommittee, and also in the full committee, contentions were made that it was not fair to certain States; that States of the character described by the Senator from Arizona were treated with too much generosity and received too much. It seems to me that they have been treated with generosity and ought to be satisfied with the provisions of the bill.

I think this bill is just; I think it is fair. We thought as it was done to develop the new parts of the country there was an element of justice in it from the fact that we included the forest reserves and the Government reserves to get this pro rata part of the money. I hope gentlemen will not embarrass the bill and these States in their development by insisting on this amendment, which would be a subject of long contention with the House and the sections that think that this is already too generous a measure in its provisions.

Mr. BORAH. Mr. President, I have already spoken briefly upon this amendment and I am not going to detain the Senate long.

The Senate has been listening for the last seven or eight years, ever since the forest reservations were created and these large withdrawals were made, to the complaints of those who represent the Western States. Manifestly, Mr. President, we would not come here season after season and year after year presenting this condition of affairs if it were not vital, if it were not such a condition as impels us to present it and represent it to the Senate of the United States. It is no pastime affair—it is a task of much moment to us.

We have secured some relief in the last few years, and we feel that we have secured it by constantly presenting this matter to the Senate, feeling that when the Senate understands the situation as it is, knows the facts as they exist, we will get the relief to which we are entitled; that it is not by reason of the desire of any part of the country to really oppress or hold back or retard the development of another part, but that it is by reason of the fact that unfortunately no one can know what the real condition is unless he comes and lives with us and among us. We can only inadequately present it to you. To know the situation as it is in fact you must be a part of that situation. Neither facts nor figures nor excursions even can make it known to you in all its bearings, in all its burdens and discouragements.

Mr. President, the Senator from Michigan [Mr. TOWNSEND] was of the opinion that the amendment is not germane to this bill. The bill is providing for a public-road system and appropriations for aid to States in building public roads. If we were in the same situation that you are in the Eastern States, of course, this amendment would not be here. It is here by reason of a condition of affairs which this bill does not, as it is now made, fit. But, based upon our conditions as contradistinguished from yours, it is not only germane but essential to meet the equities of the problem.

You may think that by including the area of the State, and we appreciate that fact, you have met the situation fully, but you have not met the situation fully, because it is not alone a question of area, but it is the burden upon the State which that area in its idle condition imposes upon the State that makes it necessary for us to represent this question under a different form.

Mr. President, these forest reserves not only have the effect of preventing taxation, and thereby embarrassing us in raising our money by which to keep up our portion of this expense when the roads are built, but there is another feature to the forest reserves which I am sure the Senate of the United States does not fully appreciate, and that is that those forest reserves as

they are maintained are a menace to every piece of property in the States where they exist. The forest reserves in those States, without more thorough equipment and means for taking care of them as against fire, without a better method of preserving them against these accidents, are a distinct menace in every way to our homes, to the property which is situated in any part of the State, because every Senator must know on reflection that when those forest fires break out and rage for a few days in a forest the distance which they go into the settled community is great, and greater injury has been done than it would be possible for me to portray in those parts of the State where really no forests exist, a long way from a real forest reservation. The fires break out and, sweeping beyond the forests, go into the villages and grain fields, and the injury is almost incalculable.

There is only one way by which we can take care of these forests as against fire, and that is to have them properly intersected with roads. There is no other means, so they tell me, and it looks reasonable to a lay mind, by which you can with any reasonable degree protect against those conditions. Roads you must have and trails and methods and means of quick access to different parts of the reserves in order to protect against the spread of fire. The roads are not there now. They have only been begun, and in a most imperfect way have they been extended. The means of protecting us against fire is not there now.

It is not only for our interest and greatly to our advantage, but it is also to the interest of the Government and greatly to the advantage of the Government that these roads should be built for the preservation of these vast estates which belong to the Government.

We did not create these forest reserves. It is not a condition of our own making that we are asking to be relieved against. It is not a folly, if it be a folly, which we created and ask to be protected against. You good people in the East put these forest reserves on us. Now, will you not take care of them? These are your creations. You started the propaganda and voted the leases and issued the proclamations not by our request, but out of your own abundant wisdom and benevolence. Now, will you permit your handiwork to perish, to be destroyed, or will you take care of them?

Mr. OVERMAN. How did the people of the East put the forest reservations on you? I do not understand the Senator.

Mr. BORAH. By eastern Presidents creating reservations and then Congress voting to keep them, and constantly voting against all relief even to the simple and unjust proposition of excluding the agricultural lands.

Mr. OVERMAN. It was done by the Presidents of the United States.

Mr. BORAH. Unfortunately we have not had any President from the West yet.

Mr. WALSH. The condition may be soon remedied, however.

Mr. BORAH. Mr. President, what I mean is this: Those of us—the Senator from Montana and the Senator from Oregon and the Senator from Arizona will bear me out—when we have asked for relief against these conditions in these Western States find an insuperable obstacle in the great number of votes which line up in the Eastern States against us. They take an entirely different view of the conservation question from what we do. I am not going to argue now whether they are right or whether we are right; but they take the view which leads them to cast their votes against any practical relief.

It has been asked what shall we do with reference to these forest reserves? It would seem, Mr. President, that a forest reserve ought not to have agricultural land within its boundaries; and it would seem that anyone anywhere throughout the United States would be willing to vote to eliminate the agricultural land from a forest reserve; and yet I say, without fear of successful contradiction, that there are millions of acres of the forest reserves which are as good agricultural lands as lie outdoors.

I also invite you to consider the fact that in the five years preceding the breaking out of the European war we lost over a hundred thousand settlers during each and every one of those five years, who went into Canada to select farm lands upon which to make their homes. We not only lost the citizens, the best sinew and brain and brawn of the land; we not only lost the wealth which went with them, but we are permitted to have nothing in their place, except the idle and untaxed lands, while if we were permitted to settle our lands we would have these men there as taxpayers and as supporters of the Government, to help build up our educational institutions, to maintain our courts, and to enforce our laws.

Mr. President, with other Members from the West, I have endeavored to get these agricultural lands eliminated, but as soon as the campaign is started here in the Senate or in the House of Representatives there begins a propaganda against their elimination. The story is circulated that it is for the purpose of land-grabbing, and of this and that. The result is that the bills for the purpose die, and hundreds and thousands of acres of tillable agricultural lands remain in forest reserves.

If you will take out of the forest reserves the real agricultural lands, you will hear very little complaint from the State of Idaho as to the forest reserves; and I maintain, sir, that until you do that, so long as you retain these vast areas there, it is your solemn, bounden duty to vote money to preserve them from destruction.

My friends, the argument which is made by conservationists in the East is to the effect that you own these lands. I heard the Senator from North Carolina say one night here in a discussion that these lands belonged to all the people throughout the United States. If so, we are asking you to-day to appropriate sufficient money to preserve from destruction the property which you own. I would be willing to submit this amendment to Mr. Secretary Lane or to Mr. Secretary Houston or to the Chief of the Bureau of Forestry or to anyone else who is familiar with the matter; and if they did not say that the amendment was essential and vital to the preservation of these lands and of this estate, I would be willing to modify my position in regard to it.

Mr. OVERMAN. Mr. President, if the Senator from Idaho will yield to me——

Mr. BORAH. Yes.

Mr. OVERMAN. The question has never been submitted to the Senate as to whether they will give to the States these forest lands. I have never had an opportunity to vote on the question. I am in favor of giving these lands to the States; but the Western people have never given us an opportunity to vote on the question; they have never seemed to press a bill of that kind of which I have any recollection.

Mr. BORAH. Mr. President, at some time within the next few days I am going to gather up the amendments to bills which have been presented here from time to time for the relief of the situation in the West.

Mr. OVERMAN. There have been amendments offered to certain bills, but the straight proposition has never been put up to the Senate, as I recollect.

Mr. BANKHEAD. Mr. President, I want to ask the Senator from Idaho how much money is now annually appropriated from the Treasury for the preservation of the forest reserves and what part of it is appropriated for the building of trails? Then I want to ask him the further question—and he may answer both—suppose you have roads through the forest reserves, what benefit would the citizens of the State of Idaho receive from those roads?

Mr. BORAH. Oh, Mr. President, the benefit would be incalculable.

Mr. BANKHEAD. Wait a minute until I get through with my question. In the first place, agricultural lands included in these reservations are not subject to homestead entry; so there are no homes there.

Mr. BORAH. I did not catch the Senator's suggestion.

Mr. BANKHEAD. I say the agricultural lands in these reserves to which the Senator has so eloquently referred as being the "best out of doors," are not subject to homestead entry, but belong to the Government, and are in a reserve. The timber all belongs to the Government, and that can not be cut and used. I am, therefore, at a loss to understand what great benefit the State of Idaho would receive from the appropriation proposed in the amendment.

Mr. BORAH. Well, Mr. President, there was an illustration given by the Senator from Minnesota a few moments ago as to the situation in that State. When I was at home last summer I had this proposition presented to me, and I presume that there are dozens of them throughout the country. Here was what was known as Smith prairie, in my State, a large, rich valley, which was being thickly settled and well developed. The people living there, by reason of the forest reserves between them and the town where they do their trading, and by reason of the fact that there were no roads through the forest reserves, were practically marooned. They had to travel from 75 to 100 miles to get to their trading points, whereas, if there had been roads through the forests which lie between the two places, they could have gotten there within 35 or 40 miles. Those inconveniences exist all through that country, and they retard development; they discourage development. Not only is development discouraged by reason of the regulations which exist with reference to the taking of title in forest reserves, but a man does not like to go and locate even in a desirable place, so far as the fertility of the soil is concerned, if he is going to be cut off indefinitely and interminably from the

point of civilization, as it were, or the point where he must trade.

If the practical Senator from Alabama would come to the State of Idaho and spend the next 60 days after this session adjourns, and go among those who are settled in those places, and see the hardships and the burdens they have to carry, he would understand, far better than I can convey to him in my inadequate way, the discouragement and the burden to the State having such a vast area with no way to pass over it.

Mr. BANKHEAD. Mr. President, I authorize the Senator from Idaho to pay my compliments to the people of that State, and to say to them for me that I am ready at any time to vote to relieve that situation if the Senator from Idaho will bring a bill into the Senate for that purpose.

Mr. BORAH. Mr. President, I think that the Senator from Alabama means just precisely what he says. I have no doubt but that he would vote for such a bill; I have not a particle of doubt that if such a bill were here and had to pass through the Congress of the United States the Senator and I would both have passed beyond the Jordan before it would get through. We know what we are up against.

Mr. BANKHEAD. I do not see how the Senator from Idaho can know that; he has never tried.

Mr. SMITH of Arizona. We can not get such a bill out of committee.

Mr. BORAH. I have offered this proposition upon the floor of the Senate in the shape of amendments, and I have had it defeated. Such propositions are lying in committees, and they die in committees.

Mr. BANKHEAD. I do not remember that.

Mr. BORAH. Mr. President, I have had pending before this body and before the other body for the last three years a most just, equitable, and fair amendment to the homestead law, to enable the homesteader to get title to his land, and under conditions in which he could get it and live, but the bill is as dead as is Julius Cæsar. The same senseless tirade is made in certain quarters that it is to make land grabbing easy, and timid legislators listen and let it die in committee.

Mr. BANKHEAD. The bill is still in committee, is it not?

Mr. BORAH. It is in a committee of a body of which I am not permitted to speak.

Mr. BANKHEAD. I would suggest that that committee is made up of friends of the measure, who are almost exclusively from the States interested, and they ought to bring it out.

Mr. BORAH. The bill is now, I say, in a committee of the other House, and has been there for over two years.

Do not forget, for instance, that the great State of New York has, I think, about 39 Representatives, while the State of Idaho, the State of Montana, the State of Washington, and these other Western States have not, all combined, as many Representatives in that House as has the State of New York; and ordinarily, if you canvass the State of New York, you will find—I am merely taking that State as an illustration—their sentiment to be against what they universally speak of as making it easy for us in the West to grab more lands. Mr. President, sympathy does not do us any good. We can not get the votes.

The Senator from Montana [Mr. WALSH] has offered this proposition as an amendment instead of as a bill. Why? We never have had any relief here practically except as we could work it in the way of amendments. It is practically impossible to get relief by a bill standing separate and apart, or resting upon its own bottom, as it were; it is practically impossible for us to get relief unless it be associated with those matters in which your people are interested. Why? Nobody is deeply concerned in the proposition except those who represent seven or eight Western States; others do not appreciate it.

I wish the Senator from Alabama could see his way clear to accept this amendment. I presume that he thinks he ought not to do so in the interest of his bill; but I feel he could do so in the interest of justice. I know it is just and fair. It helps the people, but it helps the Government property more. It is spending a few million dollars where many times that amount of property may be destroyed because of inadequate protection—the protection which this amendment would help to give.

Mr. WALSH. Mr. President, I am very glad the Senator from Virginia [Mr. SWANSON] has returned to the Chamber, because I desire to assure him, and to assure the chairman of the Committee on Post Offices and Post Roads, that we do not feel at all that we have been treated badly and that we have not been given proper consideration by the committee. It was a favorable idea that seized the committee to take into consideration the area of the various States, as well as the two other elements considered by them, as a basis for the distribution of this fund among the various States, and in the aggregate the amount that comes to us, as a matter of course, is larger in proportion to our area; but you must bear in mind that if the State is larger the appropriation will spread out and will be a good deal thinner than it is in the small States. Our State is 700 miles from east to west. It takes 24 hours to cross it, riding upon a transcontinental train going at the rate of 25 miles an hour on an average, and crossing the mountain ranges besides. It is nearly 400 miles in width. So we have considerable territory through which to build roads.

Mr. President, area, I think, is a very proper element to be taken into consideration in the distribution of this fund, and we have no fault to find with the committee. The point that we are making here, Mr. President, is that we introduce a consideration which the committee never thought of at all. It never entered into their computations that there were peculiar conditions existing in these States by reason of the fact that the Government holds great reserves within them.

Mr. President, the Senators are all wrong in the assumption that the condition to which we now invite their attention is taken care of by that feature of the bill which makes a distribution of one-third of this fund upon the basis of the area of the respective States. That is a condition that pertains to all the States. For purposes of illustration, the State of Missouri has practically the same area as the State of Idaho. Missouri gets credit for her great area; Idaho gets credit for her area. They stand upon an equal footing with respect to that. The great State of Alabama has an area something like six times that of the State represented by the distinguished statesman [Mr. GALLINGER in the chair] who for the time presides over this body, and in the distribution of one-third the State of Alabama will get six times as much as will the State of New Hampshire. In other words, Mr. President, this distribution upon the basis of area is one which all States get the benefit of or suffer the disadvantage of in proportion to their aggregate area.

But here is another element that enters into the general problem. In certain States, for instance in the State of Missouri, there are no forest reserves. The United States owns no great bodies of timber in that State maturing from day to day, decaying from day to day, dying from day to day, the mast and everything else affording a basis for the scattering of great forest fires. I saw last summer in the Glacier National Park one of the most astounding spectacles that I ever witnessed. It was just nightfall; a storm was coming on; the lightning struck a tree at the summit of a mountain, and at once the whole area was a great blaze. The dead timber caught fire; the flames shot clear to the sky, and lit up the whole area around. Fortunately the rain came and the fire was put out. That is the condition we have in the West, and that is a peril to the homes and the lives of the settlers upon the border of and within these great reserves. They become a peril to the land held in private ownership in the immediate vicinity.

These are great resources. We want them utilized. They are preserved that they may be utilized and be of value to the general community and the people of the country at large, and we say to you that here is an element quite separate and apart from area that you have overlooked, and we invite your attention to it now. We say that those States which have forest reserves within their boundaries that ought to be penetrated by roads for the convenience of the community, as well as for the preservation of the property rights of the Government, ought to be taken care of by appropriate provision in this bill. I have no doubt in the world that the idea was not considered by the committee. I entertain no doubt that if it had been they would have speedily recognized that here is a new and distinct element.

I desire to say a word now with reference to the suggestion made by the Senator from Michigan [Mr. TOWNSEND] that the distribution ought to be based, to some extent at least, on the contribution that each State makes to the General Treasury. Of course that is a consideration quite separate and apart from the one that is addressed to the Senate upon the amendment which has been tendered by me; but it has been a troublesome question ever since the formation of our Government. It was contended very stoutly that representation in some way or other ought to be had in the General Government upon the basis of wealth and of contribution to the national revenues by the States respectively, but that idea was rejected, and I believe it has never had a very honored place in our legislation.

Mr. President, the Senator from Alabama [Mr. BANKHEAD] is, I am very sure, laboring under a very mistaken impression concerning the significance and importance of roads through the forest reserves. He entertains the idea that such roads traverse a wilderness; that there may be here and there, and at distances considerably remote from each other, a homestead claim, or possibly a mining claim or two, but that the remainder of the

country is one of unbroken wilderness, and that these roads will serve no purpose except to afford accommodations to a few scattered people. Why, Mr. President, the situation is quite the contrary of that. I called your attention the other day to two great roads built through the forest reserves in my State last year under the provision of the general act setting apart 10 per cent of the receipts of the forest reserves for road-building purposes, and which we are simply endeavoring to anticipate by this bill—the Libby-Troy Road and the Big Horn-Bitter Root Road. The Libby-Troy Road is a part of a great transcontinental highway, connecting the rich valleys in the State of Washington and Oregon with the equally rich valleys in our State. Why, Mr. President, I wish I had the figures here telling of the automobile travel over that road during the past year. It is but a link between two great, populous sections, separated and segregated by the intervening forests. So it is with the Big Horn-Bitter Root Road. These are two valleys for productiveness and fertility perhaps unsurpassed by anything in the Northwest. In order to reach the adjacent territory it would become necessary to make a circuitous route by rail at least 300 miles in distance, while 30 miles of road constructed between those two great valleys permits an interchange of the products and commodities of each with the other and permits traffic there.

Mr. President, I want to call your attention to another road. My own county of Lewis and Clark last year spent a large amount of money, something like $12,000, in the construction of 5 miles of road through the Helena Forest in my county. Something over $12,000 was spent on 5 miles of it, Mr. President, through a forest reserve, connecting the rich, productive valley of the Prickly Pear, in which I live, with the equally rich and productive Deer Lodge Valley, upon the other side of the main ridge. More than that, Mr. President, this highway affords an easy access now from one side of the range to the other.

It is not an easy task to build a road over the backbone of the continent, across the great Rocky Mountains; and our little county and the adjacent county of Deer Lodge have undertaken and paid for that work, and have built a road to the character of which I desire to invite your attention. I have here a letter which our county commissioners addressed to the forest supervisor asking whether it was not just and right that the Government of the United States should bear one-half of the cost of that road? The letter is as follows:

HELENA, MONT., *December 16, 1915.*

Mr. J. B. SEELEY,
*Superintendent United States Forestry Service,*
*Helena, Mont.*

DEAR SIR: Lewis and Clark County has built a public highway through the Helena Forest Reserve, as shown on map herewith attached. This is a standard roadway 30 feet wide, and all timber has been removed therefrom. The average width of the road is 20 feet, and wider at the turns. Considering the great benefit this highway is to the forest reserve as well as the general public, it would seem only fair that the forest reserve should bear their portion of the cost.

We call your attention to the donation of a thousand dollars made to this county for the upkeep of this highway by Col. A. A. White, of St. Paul, whose engineer pronounced this highway one of the best in the western country and the cost of building very much below the general average for work of a similar character.

We solicit inspection and a full investigation of the work done, and do hereby most respectfully petition the United States Government to reimburse this county in such amount as you may determine would be a fair proportion of the amount expended.

You will note the distance from the Powell County line through the forest reserve is 4.6 miles, which cost the county $2,777 per mile, making a total cost of $12,774.20.

Respectfully submitted.

———— ————, *Chairman.*

To this the forest supervisor was obliged to say that he had no funds with which to make any reimbursement to the county for the expenditure thus made, as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE,
FOREST SERVICE, DISTRICT 1,
*December 22, 1915.*

Mr. C. C. COVINGTON,
*Chairman Board of County Commissioners,*
*Lewis and Clark County, Helena, Mont.*

DEAR SIR: Your letter dated December 16 addressed to Supervisor Seely has been referred to this office for reply.

This office has previously been advised of the excellent piece of road work constructed by Lewis and Clark County during the past season, through Priest Pass, and traversing for a part of the distance the Helena National Forest. The completion of this road is important and a long-needed improvement. It is regretted, however, that under the circumstances this department will be unable to comply with your request and bear a portion of the cost by reimbursing the county. Aside from the legal difficulties which would render such a procedure impossible, administrative policies would prevent our cooperation on such a basis. The small amount of funds available to the Forest Service for road-building purposes is derived from an act of Congress which returns 10 per cent of the national forest receipts to the Forest Service for the construction of roads. The total amount available from this source for the whole State of Montana from the receipts of the fiscal year ending June 30 last was only slightly over $30,000. In expending such funds a program is outlined several years in advance. Complete location surveys and plans must be made under the direction of engineers in this department. These plans are approved at Washington, and the construction work then carried out the following field season under Government supervision. In view of such circumstances you will appreciate that assistance on the Priest Pass road upon the basis you suggest is not practicable.

Very truly, yours,

R. H. RUTLEDGE,
*Acting District Forester.*

That is the situation of affairs.

Mr. President, it is only at rare places, among other considerations, that you can find a pass through which a road can be constructed connecting one side of the mountain with the other. About 11 miles north of where this road is constructed through a very low pass, the Northern Pacific Railroad crosses through another pass; but it is rather high and inaccessible, and, although there is a road through there, it is one that is exceedingly difficult to travel, and heavy loads and rapid transportation are absolutely forbidden. Then, Mr. President, from that point on to the international boundary line, some 200 miles farther—and let me ask you to have it in mind in case military operations should be required in that section of the country—for 200 miles it is utterly impossible to cross that great mountain range by any road at all. There is not any.

So, Mr. President, our little county is entitled to credit and to the gratitude of the Nation, considering nothing further than the public defense, by the construction of this road, that will permit easy access from one side of the mountains to the other. It is that condition of affairs that we ask you to take into consideration in connection with this bill; and there need not be any fear either that these roads will not be well constructed. The good-roads spirit is abroad in all that country. They are anxious to have these roads.

Let me speak of another. For the purpose of illustrating that these roads are not in remote sections where travel would be inconsequential, but that they open up great regions and permit them to have intercourse with each other, I will say that I am asking the Forest Service to take up the construction of a road up the Stillwater River. If constructed it will open up an enormously rich mountain section that is now practically unproductive because it is inaccessible. Not only that but it will give an additional automobile opening into the Yellowstone National Park, and will connect a rich and productive agricultural valley with the mining region to which I have adverted, and give an opportunity for the sale of produce; and at the same time it will open up a great area of timber that will be utilized in the mining operations and in the general development of the country that is going on.

You will observe, as stated here, that the law now provides that 10 per cent of every dollar that comes out of these forest reserves from the sale of timber and from allowing cattle to graze within the ranges is set aside and is used for the construction of these roads. We are simply asking to permit the avails from these forest reserves to be anticipated, so that in the stead of $250,000 a year for the construction of these roads we shall have a million dollars a year, and thus open up these resources, so that the avails will be increased, they to be returned from time to time until these appropriations are reimbursed to the Federal Treasury.

I believe that we are asking nothing but that which the great Congress of the United States ought to do, not for us, but for the preservation of their own property.

Mr. VARDAMAN. Mr. President, I am exceedingly desirous that this bill shall be passed, because I think great good will result from legislation of this character. I believe a dollar judiciously invested in good roads—a road that leads to the happy country home—will bring larger returns to the American people—all the people—than a dollar invested in any other way. It is utterly impossible to develop any part of this Republic without adding to the total wealth of the American people. You can not give prosperity and happiness to others without yourself enjoying a larger measure of happiness and prosperity than you give to others. Every home which is constructed and maintained, every field that is cleared and put under the plow, adds materially to the wealth of the Republic in more ways than one. I believe that the country home is the enduring foundation upon which free American institutions rest.

I think the real strength of this Republic depends more largely upon the character of the men who till the soil than it does upon any other class of our citizens. The products of their hands feed and clothe the world. The purity of their lives, their lofty, moral ideals, and their unselfish patriotism make them the great dynamo which vitalizes, inspires, and impels to proper effort the whole body politic. To me, one of the discouraging signs revealed by the recent census is the fact that 51 per cent of our population to-day live in the urban

districts. I hope that I may never take so narrow a view of the function which I am to perform in this Government as a Member of this body as would lead me to be controlled in casting my vote solely by the pecuniary profits which may flow from my action to my immediate constituency, the men who elect me to serve them here. I can serve Mississippi best when my vote adds to the prosperity and happiness of the people of every other State as well as my own.

In the realm of real patriotism there is no partisanship, and the man who is worthy of the people who elect him to membership in this body will not prostitute the functions of his place to serve partisan ends or promote personal advantage. The amendment proposed by the Senator from Montana [Mr. WALSH] appeals to me. It contains merit, and I have been trying to discover some reason why I should not support it. I do not like to differ from the able and prudent chairman of the Post Offices and Post Roads Committee, the senior Senator from Alabama [Mr. BANKHEAD], who is in charge of the bill. The only excuse I have been able to discover for not voting for the amendment other than the one assigned is that it may cause some Senator to vote against the bill and probably defeat its passage. Now, I do not want to do anything that will hinder or delay its passage through this body. I want it to become law; but I believe it is wise economy for the Congress to conserve, to protect the interests of the United States in these Western States, whose conditions have been so graphically and vividly described by the able Senators from those States. It means the opening up of homes there. It means the increase of population. It means putting under the plow those fertile lands. It means adding to the sum total of American wealth. It means more to eat and more clothes to wear for the American people; and, as I said a moment ago, you can not do anything in this way that will help Montana and Idaho without helping Mississippi and Alabama.

I have no sympathy with the selfish doctrine taught by some Senators that these appropriations ought to be controlled by the amount that the State contributes. Why, Mr. President, New York and some other States do not need any help from the General Government in road building. They are rich "beyond the avaricious dream of the ancient princely plunderer," and therefore sufficient unto themselves for any undertaking. But those States that have grown so fabulously rich in the last few years did not produce all the wealth that they now enjoy. Every acre of land in the United States pays tribute to New York, and that is true of many of the Northeastern States, particularly of this Republic. The fields and the forest have paid tribute, the grazing lands of the West, the mines of unmeasured riches have all added their countless millions to the aggregate wealth of these favored States. It strikes me, Mr. President, that the best investment that New York and the other rich States of the Northeast could make would be to invest some of the increments, some of the enormous wealth which they have amassed, in helping to develop the Western and Southern States that have contributed so materially to the great wealth which those States now enjoy. It would be a good investment on their part it seems to me.

I do not want to do anything that is going to imperil the passage of the bill; but I can not vote against this amendment, and I do not see why its adoption should prevent any Senator from supporting the bill, because to my mind it contains great merit. Its effect will be to have the Government of the United States apply good sound business principles to the management of its own affairs. And good governmental business is the manifestation of the highest order of statesmanship.

Mr. TOWNSEND. Mr. President, it seems to me that the question of forest reservations has been unwisely involved in the discussion of the bill under consideration. I can see where, in the forest reservations, there is need of trails or roads for the purpose of protecting the Government property. I am well aware, however, that the Committee on Agriculture and Forestry has charge of that particular subject and is giving it its attention, and I should like to have a recommendation from that committee before voting on a subject about which we have so little information. I should like to know more of what they are doing and what they require, and if they ask for more money there is not any question but that they will obtain it. But the Senator from Alabama asked a question which has not been answered; that is, How much money are the particular States getting out of the forest reservations within their boundaries for road purposes?

The report of the Secretary of Agriculture for 1915 shows that Arizona this year, for her school roads and for her trails and other public roads, will receive $83,000, California will receive $94,000, Colorado will receive $82,000, Idaho will receive $106,000, Montana will receive $111,300 or more, and that Oregon will receive $69,000. Besides that, Arizona and New Mexico will receive for school funds from the school lands that are in the forest reservation an additional amount, Arizona $29,000 and New Mexico $9,000, for that purpose.

Mr. President, these are moneys which come out of the forest reserves and are appropriated for road purposes, and they ought to be considered when we are making an apportionment of the general fund for road purposes if the reserves are to be considered under this bill. Furthermore, there is a thing that I can not quite understand. Senators who are obtaining the benefit for their States under this law of their wide areas, including always the forest reservations and other reservations in their territory which are not occupied by man, and which in a large part, except for roads and trails needed for forest preservation, do not require roads over which the public can go, and yet these States are nevertheless receiving their pro rata share of the appropriation carried by this bill on account of their area.

I have never had an opportunity to vote since I have been in the Senate in favor of a proposition to segregate the purely agricultural lands from the forest reserves. I should like an opportunity to vote on it, because I can not understand why there should be any purely agricultural lands in a forest reservation; but that is a question which should be dealt with upon its merits and through the proper committee. It is not in order on this measure, however. All of these questions are complicated ones which should be dealt with directly and should be considered; but I do not believe it properly in order by amendment to this bill, without the matter having been considered at all by the committee. I sincerely hope the bill before the Senate can be voted upon according to its merits.

Mr. OVERMAN. Mr. President, I desire to ask the Senator from Montana how he arrives at this sum of a million dollars a year, which, after 10 years, will amount to $10,000,000? Has he had any estimate or any survey or any investigation by a committee to show that it will take that much money to build these roads? Is it just an arbitrary sum that is fixed by the Senator himself?

Mr. WALSH. No; I will say to the Senator from North Carolina that the sum is a sum that is recommended by the Agricultural Department.

Mr. OVERMAN. It has been before the Agricultural Committee, has it?

Mr. WALSH. I put in the RECORD day before yesterday a letter addressed by the Secretary of Agriculture to Mr. LEVER, the chairman of the House Committee on Agriculture, in relation to a bill identical in its terms with the one that I introduced, and substantially like this, recommending the enactment of the measure.

Mr. OVERMAN. And he says it will take this much money to build these roads?

Mr. WALSH. Yes; but the Senator can very well understand that that will nowhere near make the amount that will be necessary to cover this great area of a couple of hundred million acres.

Mr. OVERMAN. I know there is a hundred million acres of mountain land, but I do not know how much money it will take to build the necessary roads for the purposes indicated by the Senator in his speech.

Mr. WALSH. I advise the Senator that the amount is proposed on the recommendation of the Secretary of Agriculture. Indeed, the original draft of the bill came from that office.

Mr. BRANDEGEE. Mr. President, I am very glad to have an opportunity to vote for a provision in this bill that I think has some semblance of being a governmental purpose or some warrant under the Constitution of the United States for the expenditure of the public funds. That part of the bill which provides for rural transportation and the marketing of farm products, and so forth, and the building of rural roads, I do not think is warranted by the Constitution of the United States. That part of the title of the bill which says that these roads may be used in interstate commerce and for the transportation of military supplies or postal matters, I think, is nothing but a sham and a subterfuge.

This amendment, providing for the building of roads in the national parks, I think is a very meritorious measure. I do not know why the Government should not protect its national parks, if it is enabled to do so. If this bill stands any chance of passage, I am willing to use it as a vehicle to float through a little merit. I shall vote for the amendment; but I am afraid, even with that good feature of the bill, that I shall not be able to vote for the bill as a whole. But I will take the chance that the bill will pass this branch of Congress at least, and I am quite satisfied that the more money that is put onto it, the more chance it will have of passing.

I shall vote for the amendment.

Mr. GALLINGER. Mr. President, for a somewhat different reason than that given by the Senator from Connecticut [Mr. BRANDEGEE] I am going to vote for the amendment submitted by the Senator from Montana. In fact, it has become so much a habit of mine, dating back a great many years, to vote for what the men from the West want, that I find it difficult to get away from them on any proposition they submit.

I have listened to this debate with a great deal of interest and with a good deal of care, and I confess that I can not see any good reason why an appropriation should not be made for the purpose indicated in the amendment submitted by the Senator from Montana. Whether it is greater than it ought to be, whether or not it might with propriety be reduced, I shall not venture to say, because I have not looked into that matter.

I do not think attaching this amendment to the bill will imperil the success of the bill. I do not know exactly what action I should take if I believed it would, because I am in favor of the bill advocated by the Senator from Alabama [Mr. BANKHEAD] with so much good nature and so much ability. These great forest reservations are of great consequence to the people of the country if they are conserved; but it does seem to me that they are but a desert unless there are some means of traversing them and protecting them and conserving them.

I think this will be a wise expenditure of money. Believing that to be so, hesitating as I have to cast a vote against the opinion of the distinguished chairman of the committee, I shall give my support to the amendment; and whether or not it is attached to the bill I shall give my vote for the bill upon its final passage.

Mr. PITTMAN. Mr. President, I would not urge this amendment, nor would I support it, if I thought it would imperil or endanger the passage of this bill. I do not believe, either, that we are asking anything additional from the Government. I think we are simply asking that the 10 per cent of the value of the proceeds of these forests shall be advanced, rather than to be expended as it is earned.

I can not conceive for one moment that if the building of a street railway in a city were estimated as profitable, that railroad would be attempted to be built mile by mile from the profits of the road. I believe that when a municipality starts in to build a system of railroad, it issues bonds, anticipating the profits upon the enterprise to pay off the bonds.

In this case the amendment expressly provides that no expenditure can be made until after an estimate of the profits of the forest is obtained, and that then such expenditure shall be limited to 10 per cent of such available profits. That in itself prevents any excessive expenditure. It prevents the expenditure of any greater amount of money than is coming back out of that 10 per cent of the profits which is now appropriated for roads. It is simply a question of whether the Government is going to wait for 10 or 15 years to do the necessary development in the forests or whether it is going to advance the money and start the development now. If we wait until this 10 per cent is earned before building the necessary roads through the forests, the development of those forests and the profit to be derived from them will be delayed just that much. Therefore, as a business proposition, this Government should advance the money that it is estimated will come back from such improvements.

There is just one other question that I want to call to the attention of the Senators, particularly the Senator from Alabama, who has the bill in charge, and it is this: That in the West, particularly in my State, the mountain ranges run north and south. There are 12 of these great ranges running north and south in our State. The timber reserves have been laid out on these mountain ranges, along these great ribs that divide our State. It is impossible for us to build roads connecting the 12 valleys in our State without crossing these mountain ranges, which are laid out in forest reserves. Up until the present time the people of our State have built all of the roads across those great forest reserves. It is unfair, in the first place; and in the second place, by reason of the sparsely settled country, it is impossible to build sufficient roads.

I want to call attention to just one little district. I am only going to take up about four or five minutes of the time of the Senate, because I realize that we want to vote. In the northern part of our State, near the Idaho line, is a settlement of 500 or 600 people. It is growing rapidly. It is separated from Idaho and from Nevada by a great forest reserve. Those people had no means of transportation to and from that large settlement. The people of one little county in Nevada built 60 miles of wagon road, most of it through that reserve, to reach those people. To the north of them the road is practically impassable. The snow is so deep in Nevada that that splendid road, built by the people of one county, is frequently impassable in the winter; and for the lack of a road reaching to the north to Twin Falls, in Idaho, the mails are often prevented during many months of the year from reaching such settlement. Now, then, it is all in charge of the Government. The Government is deriving the proceeds from that forest. If those proceeds are estimated to be sufficient to build that road, why not advance the money as a business proposition, put in the roads, sell the timber, and encourage the development there; encourage the ranging and utilizing of the forests?

That is only one condition that I am illustrating. The settlement referred to is called Jarbidge. It is well known to the Senators from the western country. The conditions are well known. The Post Office Department has complained about the great difficulty of maintaining a postal route to such settlement. Take, for instance, the town of Ely, in our State. It is separated from the great farming area to the west of it that supplies it with produce, and yet the people of the one county of White Pine have to maintain 40 or 50 miles of road across the mountains so that their produce may reach the people of Ely from such farming district. These are the conditions.

We are not asking the Government to appropriate any money at all. We are asking the Government simply to advance the money that the Government itself states it will receive back from the 10 per cent of profits of these forest reserves. That is all we have asked.

Mr. BANKHEAD. Mr. President, just one final word on this amendment.

Mr. WALSH. Mr. President, the Senator from North Caroline [Mr. OVERMAN] asked me a question awhile ago about the amendment, and I have here a letter which I should like to read, if the Senator from Alabama will yield for that purpose.

Mr. BANKHEAD. I will be through in a minute. I am going to take only a minute.

I hope the amendment to the amendment will not be adopted. It is not because, as every Senator here knows, I have not the most friendly feeling to the States that are interested in it, but it is unfair, it is unjust, it is inequitable, and it ought not to be put upon this bill.

I want to call the attention of the Senate to another situation. There is another branch of Congress the gantlet of which this bill has to run. I do not know what difficulties we will have. I want to say further that while I do not mean to imply that every Senator who votes for this amendment is opposed to the bill, I do mean to say that every Senator opposed to the bill will vote for this amendment, doing so with the deliberate purpose of making it as objectionable as possible, and in the final hope that somehow or somewhere they may be able to defeat it.

Mr. SMOOT. Mr. President, I know that the Senator from Alabama has always been, and is to-day, friendly to the development of the Western States, and I want to assure him that in voting for this amendment I do it with no hostility to the pending bill, but I do it because I believe that it is only simple justice to forest-reserve States.

The Senator from Michigan [Mr. TOWNSEND] wanted action upon this great question postponed until the department had reported upon the feasibility and the advisability of legislation of this kind. I take up the annual report of the Secretary of Agriculture, and I find on page 177 of that report the following statement:

> Large areas within the national forests, as well as in adjacent territory, are without adequate means of communication. Such roads as exist are ordinarily imperfectly constructed, undrained, and have excessive grades. In many instances such roads are all that the local community can afford to build. The Forest Service is endeavoring to correct this condition as fast and as far as funds permit. The amount available from the 10 per cent fund of the past year for 28 States (including Alaska) was less than $240,000. While much good can be done with this amount, it is insufficient even to keep pace with the annual increase in demands for roads made urgent by the increase in settlement. Large areas of timberland of potentially great value are standing unused, partly because of lack of demand, partly on account of lack of transportation. Some method should be found by which the community's interest in these potential values may serve as security for funds for road construction now.

The Secretary of Agriculture tells what sort of roads they have at the present time, limited as they are, and frankly admits that in those sparsely settled districts it is absolutely impossible for the people to build roads so as to make them passable. The Secretary of Agriculture also says:

> The upkeep cost due to the destruction of telephone lines, buildings, etc., by fires, the washing out of roads, trails, and other means of communication by winter storms, and the like, to say nothing of ordinary wear and tear by use, now demands and will increasingly demand heavy allotments for maintenance. In National Forest District No. 1 it was necessary during the year to devote $35,000 out of a total allotment for improvement purposes of $86,000, or over 40 per cent, to the maintenance of existing improvements in usable condition.

Or, in other words, Mr. President, from the washouts that come in almost every forest reserve in the United States, and

come every year, it has taken in forestry district No. 1 alone 40 per cent of all the money that was appropriated for all the reserves by Congress for maintaining the roads in a passable condition.

I believe that if this amendment is agreed to it will be a profitable investment for the Government. Until the roads are built to the timber of these forest reserves it will be impossible to utilize it because of the absolute impossibility of transporting it to market under present conditions. That is understood by the department, and in this report it is referred to. But if roads are made, and all are upon Government property, and the Government itself ought to build them, then the timber can be utilized and it can be brought to market and disposed of. I am not going over the ground again as to why it ought to be used now instead of allowing it to rot and become a menace through forest fires.

In relation to the amount of money that goes to each State of the receipts from the forest reserves, referred to by the Senator from Michigan, I want to say that the amounts the Senator has stated were not alone the 10 per cent that was allowed for the building of trails, but it also included the 25 per cent for school purposes that comes from the forest receipts to the counties in which the forests are located.

When the law was first passed it was agreed by all that in a county where nine-tenths of the area is in a forest reserve it was absolutely impossible to maintain schools and maintain order and the public institutions required for the people living in the county. Therefore, the law was passed giving 25 per cent of the receipts from forest reserves within the county to the people of the county as a partial reward for the lack of taxes that the county could have imposed upon the property if it had been in private ownership.

Mr. WARREN. It was only 10 per cent for many years.

Mr. SMOOT. The Senator from Wyoming calls my attention to the fact that it was only 10 per cent for many years, as I well remember. I do not believe that the Senate or the House would think for a minute that that money ought to be used entirely in the construction of roads within a forest reserve. The assessment upon one-tenth of the area of the county could not support the schools of the county; such restriction was a greater burden on the people of the county than they could bear.

The law was passed to partially repay them for the loss of the power of taxation. The 10 per cent of the forest-reserve receipts was intended for the building of roads within the forest reserves. The most of that comes from grazing privileges—the grazing of sheep, cattle, and horses. Every dollar of it is paid by the people of the State, and all that the Government does is to turn over 25 per cent of the amount collected to the counties within which the forest reserve is located. The 65 per cent is retained and goes into the Treasury of the United States.

It seems to me, Mr. President, that this is a most just amendment. I do not believe that it is going to jeopardize the passage of the bill, but, on the other hand, I believe it will assist the bill in its passage. If it could not be defended, and justly defended, then there could be some question as to whether it would be the proper thing to put upon the bill or not, but I do not believe there is a Member of the House or the Senate who will study the conditions existing to-day who will not say that this amendment is just in every particular.

As has been repeated time and again, it is only an advance of money on the part of the Government, to be returned to the Government out of the receipts from the forest reserves, and every dollar of that fund is collected from the people of the State for grazing their cattle, sheep, and horses upon the forest reserves and the sale of timber. The same privilege was granted to the people of the Middle Western States without charge. No charge was ever thought to be imposed upon the people of the East or Middle West for grazing their stock; but we are living in a new age, the age of so-called conservation. We now are asking that only a part of what the people pay shall be taken and used for the development of the roads in the forest reserves.

Mr. President, there is county after county in my State where it is impossible for a person to go from one to the other without passing over miles and miles of forest reserves. The Secretary of Agriculture admits that the people have done the best they can in establishing roads, but with the washouts that annually occur, with the great distance over mountain tops and always in sparsely settled communities, it is impossible for those people to build the necessary roads or even to maintain them.

I hope, Mr. President, the Senate will agree to the amendment offered by the Senator from Montana, for it is just in all its provisions.

Mr. WALSH. Mr. President, I rise simply to give definite information in answer to the inquiry of the Senator from North Carolina [Mr. OVERMAN]. I read from the letter of the Secretary of Agriculture, as follows.

Mr. BANKHEAD. The Senator from North Carolina is not in the Chamber.

Mr. WALSH. I called the attention of the Senator from North Carolina to the fact that I would put it in the RECORD, and I am doing it especially at his request. The Secretary of Agriculture says:

> The provision of $1,000,000 annually for 10 years, or a total of $10,000,000, will not be more than sufficient to provide the main lines of a system of roads which will eventually be required within the national-forest areas. It will, however, assist greatly in the initial stages of development and will make it possible to open up the resources of the national forests, to increase the sales, and to make a larger fund available under the 10 per cent appropriation for a general program of road construction. The proposed legislation would, therefore, be chiefly intended to meet emergency conditions which it would not be possible to meet by existing appropriations.

I read from the letter of the Secretary of Agriculture to Hon. A. F. LEVER, chairman of the Committee on Agriculture of the House of Representatives, relating to House bill 10400.

Mr. OVERMAN. I am glad the Senator from Montana read the letter. I had never seen it. Now it is estimated for by the proper department. The estimate clearly sets forth the amount of money needed.

Mr. JONES. Mr. President, I will take just a moment or two in addition to what I have already said in regard to this bill. I wish to call attention to the fact that we do not disturb the bill at all. We do not interfere with any of the terms of it or any appropriations made under it. We leave those as they are. We simply put on an additional provision for the protection of some of the property of the United States.

I want to say, Mr. President, that I am not one of those who are opposed to this bill. I expect to vote for the bill in its present form when it comes to final passage, and I do not believe that this amendment will interfere with the passage of the bill at all. I can not see how it would lead anyone to vote against the bill.

I wish to emphasize the suggestions that have been brought out in reference to the condition in our State especially. We can not go from one side of our State to the other without passing through forest reserves; it is absolutely out of the question. We have not been neglecting the building of roads in our State. In 1914, the latest year for which I have the figures, we spent in our State for the building of roads $6,221,131. We have constructed State roads across the State. They have had to go through forest reserves. I think I am safe in saying that we spend every year more money in the construction of roads within the limits of forest reserves than we will get under this bill.

Now, that is for the improvement of the property of the Government; and it does seem to me that the Senator from Alabama, who is very fair, who, I know, wants to promote our welfare, is rather in error when he says this amendment is very unjust.

The Senator from Virginia [Mr. SWANSON] called attention to the amount per capita that is paid to one of the States, the amount that they get under this bill, and so on. I do not think there ought to be any reference to the amount contributed by one State, the amount paid to one State, or anything of that sort. It all comes out of the Treasury. But because the Senator from Virginia did call attention to that I am going to call attention also to the amount contributed by the State of Alabama to the internal revenues of the country. For the year ending June 30, 1915, Alabama contributed to the aggregate internal revenue to the country $661,217.64. The State of Washington contributed $2,329,311.84. The State of Alabama spent for good roads in 1914 $3,125,925. The State of Washington, as I just called attention to, contributed over $6,000,000.

But I do not think that those figures amount to anything. I do not think they have any bearing on this matter, but they show that all these contributions do not come in one way.

Mr. President, we urge the passage of this amendment in the interest of the Government itself, for the improvement of its own property, for making available its own property, and simply expect that whatever is advanced will be repaid out of the proceeds from that property as improved.

The VICE PRESIDENT. The question is on the amendment of the Senator from Montana [Mr. WALSH] to the amendment.

Mr. BANKHEAD. Mr. President, I regard this as a most important vote. Therefore, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Harding | Nelson | Smoot |
| Bankhead | Hughes | Newlands | Stone |
| Beckham | Husting | Norris | Sutherland |
| Borah | James | O'Gorman | Swanson |
| Brandegee | Jones | Overman | Taggart |
| Chamberlain | Kenyon | Page | Thomas |
| Clapp | Kern | Pittman | Thompson |
| Culberson | La Follette | Poindexter | Tillman |
| Cummins | Lane | Ransdell | Townsend |
| Curtis | Lea, Tenn. | Shafroth | Vardaman |
| Fall | Lee, Md. | Sheppard | Walsh |
| Fletcher | Lodge | Sherman | Warren |
| Gallinger | Martine, N. J. | Simmons | Williams |
| Gronna | Myers | Smith, Ga. | Works |

Mr. KERN. I desire to announce the unavoidable absence of the junior Senator from Illinois [Mr. LEWIS], on account of illness.

The VICE PRESIDENT. Fifty-six Senators have answered to the roll call. There is a quorum present. The pending question is the amendment proposed by the Senator from Montana [Mr. WALSH] to the amendment reported by the committee.

Mr. BANKHEAD. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CURTIS (when his name was called). I have a general pair with the junior Senator from Georgia [Mr. HARDWICK]. In his absence I withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. FALL (when his name was called). I have a general pair with the senior Senator from West Virginia [Mr. CHILTON]. I transfer that pair to the junior Senator from Idaho [Mr. BRADY] and vote "yea."

Mr. HARDING (when his name was called). On account of the absence of my pair, the junior Senator from Alabama [Mr. UNDERWOOD], I withhold my vote.

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). My colleague [Mr. SMITH of Michigan], who is detained from the Chamber, is paired with the junior Senator from Missouri [Mr. REED]. If my colleague were present, he would vote "nay."

Mr. STONE (when his name was called). I have a general pair with the Senator from Wyoming [Mr. CLARK]. In his absence, I withhold my vote.

Mr. SUTHERLAND (when his name was called). I ask if the Senator from Arkansas [Mr. CLARKE] has voted?

The VICE PRESIDENT. He has not.

Mr. SUTHERLAND. I have a pair with that Senator, which I transfer to the Senator from South Dakota [Mr. STERLING] and vote. I vote "yea."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. In his absence, I withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Arkansas [Mr. ROBINSON] and vote "nay."

Mr. WILLIAMS (when his name was called). I transfer my general pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from Illinois [Mr. LEWIS] and vote "nay."

The roll call was concluded.

Mr. BECKHAM (after having voted in the negative). I have a general pair with the Senator from Delaware [Mr. DU PONT]. I understand he has not voted. So I transfer that pair to the Senator from Tennessee [Mr. SHIELDS] and allow my vote to stand.

Mr. WARREN. I wish to announce the unavoidable absence of my colleague [Mr. CLARK], who is paired with the Senator from Missouri [Mr. STONE]. If my colleague were present, he would vote "yea."

Mr. MYERS. I have a pair with the Senator from Connecticut [Mr. MCLEAN]. I transfer that pair to the Senator from California [Mr. PHELAN] and vote "yea."

Mr. WALSH (after having voted in the affirmative). I voted without noting the absence of my pair, the Senator from Rhode Island [Mr. LIPPITT]. I transfer that pair to the Senator from Arizona [Mr. SMITH] and will let my vote stand.

Mr. LODGE. My colleague [Mr. WEEKS] is unavoidably absent. I desire to announce that he is paired with the Senator from Kentucky [Mr. JAMES].

Mr. CURTIS. I transfer my pair with the Senator from Georgia [Mr. HARDWICK] to the senior Senator from Iowa [Mr. CUMMINS] and vote "yea."

Mr. GALLINGER. I wish to announce that the junior Senator from Maine [Mr. BURLEIGH] is detained from the Chamber on account of serious illness in his family.

Mr. CHAMBERLAIN (after having voted in the affirmative). Since voting I have learned that my pair, the junior Senator from Pennsylvania [Mr. OLIVER], has not voted. That being so, I withdraw my vote.

Mr. LODGE (after having voted in the affirmative). I have been informed that my pair, the Senator from Georgia [Mr. SMITH], has not voted. I heard him answer to his name on the call for a quorum, and supposing he was in the Chamber I voted. I now withdraw my vote.

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Nebraska [Mr. HITCHCOCK];

The Senator from New Mexico [Mr. CATRON] with the Senator from Oklahoma [Mr. OWEN];

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH].

The result was announced—yeas 33, nays 18, as follows:

YEAS—33.

| | | | |
|---|---|---|---|
| Ashurst | Husting | Newlands | Sutherland |
| Borah | Jones | Norris | Thompson |
| Brandegee | La Follette | O'Gorman | Vardaman |
| Clapp | Lane | Page | Walsh |
| Curtis | Lea, Tenn. | Pittman | Warren |
| Fall | Lee, Md. | Poindexter | Works |
| Gallinger | Martine, N. J. | Shafroth | |
| Gronna | Myers | Sherman | |
| Hughes | Nelson | Smoot | |

NAYS—18.

| | | | |
|---|---|---|---|
| Bankhead | Johnson, Me. | Sheppard | Tillman |
| Beckham | Kenyon | Simmons | Townsend |
| Culberson | Kern | Smith, S. C. | Williams |
| Fletcher | Overman | Swanson | |
| Gore | Ransdell | Taggart | |

NOT VOTING—45.

| | | | |
|---|---|---|---|
| Brady | du Pont | McLean | Smith, Ga. |
| Broussard | Goff | Martin, Va. | Smith, Md. |
| Bryan | Harding | Oliver | Smith, Mich. |
| Burleigh | Hardwick | Owen | Sterling |
| Catron | Hitchcock | Penrose | Stone |
| Chamberlain | Hollis | Phelan | Thomas |
| Chilton | James | Pomerene | Underwood |
| Clark, Wyo. | Johnson, S. Dak. | Reed | Wadsworth |
| Clarke, Ark. | Lewis | Robinson | Weeks |
| Colt | Lippitt | Saulsbury | |
| Cummins | Lodge | Shields | |
| Dillingham | McCumber | Smith, Ariz. | |

So Mr. WALSH's amendment to the amendment of the committee was agreed to, which was to add as a new section, after section 7 of the amendment, the following:

SEC. —. That there is hereby appropriated and made available until expended, out of any moneys in the National Treasury not otherwise appropriated, the sum of $1,000,000 for the fiscal year ending June 30, 1917, and each fiscal year thereafter up to and including the fiscal year ending June 30, 1926, in all $10,000,000, to be available until expended under the supervision of the Secretary of Agriculture, upon request from the proper officers of the State, Territory, or county for the survey, construction, and maintenance of roads and trails within or only partly within the national forests, when necessary for the use and development of resources upon which communities within and adjacent to the national forests are dependent: *Provided*, That the State, Territory, or county shall enter into a cooperative agreement with the Secretary of Agriculture for the survey, construction, and maintenance of such roads or trails upon a basis equitable to both the State, Territory, or county and the United States: *And provided also*, That the aggregate expenditures in any State, Territory, or county shall not exceed 10 per cent of the value, as determined by the Secretary of Agriculture, of the timber and forage resources which are or will be available for income upon the national forest lands within the respective county or counties wherein the roads or trails will be constructed; and the Secretary of Agriculture shall make annual report to Congress of the amounts expended hereunder.

That immediately upon the execution of any cooperative agreement hereunder the Secretary of Agriculture shall notify the Secretary of the Treasury of the amount to be expended by the United States within or adjacent to any national forest thereunder, and beginning with the next fiscal year, and each fiscal year thereafter, the Secretary of the Treasury shall apply from any and all revenues from such forest 10 per cent thereof to reimburse the United States for expenditures made under such agreement until the whole amount advanced under such agreement shall have been returned from the receipts from such national forest.

DIRECTORS OF BANKS AND TRUST COMPANIES.

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 4432) to amend section 8 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, which was, on page 2, after line 11, to insert:

The consent of the Federal Reserve Board may be procured before the person applying therefor has been elected as a class A director of a Federal reserve bank or as a director of any member bank.

Mr. SHAFROTH. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

TOMBIGBEE RIVER BRIDGE.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 4603) to authorize the Jackson Highway Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Tom Beckby, commonly called Tombigbee, River at Princes Lower Landing, near Jackson, Ala., which were, on page 1, line 7, to strike out "Tom Beckby, commonly called," and to amend the title so as to read: "An act to authorize the Jackson Highway Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Tombigbee River at Princes Lower Landing, near Jackson, Ala."

Mr. BANKHEAD. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

EXECUTIVE SESSION.

Mr. STONE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 30 minutes spent in executive session the doors were reopened.

RECESS.

Mr. STONE. I move that the Senate take a recess until to-morrow at 12 o'clock noon.

The motion was agreed to; and (at 6 o'clock and 7 minutes p. m.) the Senate took a recess until to-morrow, Saturday, May 6, 1916, at 12 o'clock meridian.

## NOMINATIONS.

*Executive nominations received by the Senate May 5, 1916.*

SECRETARIES OF EMBASSIES OR LEGATIONS.

CLASS 3.

Frederic R. Dolbeare, of New York, now a secretary of embassy or legation of class 4, to be a secretary of embassy or legation of class 3.

Hallett Johnson, of New Jersey, now a secretary of embassy or legation of class 4, to be a secretary of embassy or legation of class 3.

John Latta Ryan, of Pennsylvania, now a secretary of embassy or legation of class 4, to be a secretary of embassy or legation of class 3.

Eugene C. Shoecraft, of Missouri, now a secretary of embassy or legation of class 4, to be a secretary of embassy or legation of class 3.

CLASS 4.

Oliver B. Harriman, of West Virginia, now a secretary of embassy or legation of class 5, to be a secretary of embassy or legation of class 4.

Louis A. Sussdorff, jr., of New York, now a secretary of embassy or legation of class 5, to be a secretary of embassy or legation of class 4.

Sumner Welles, of New York, now a secretary of embassy or legation of class 5, to be a secretary of embassy or legation of class 4.

L. Lanier Winslow, of New York, now a secretary of embassy or legation of class 5, to be a secretary of embassy or legation of class 4.

CLASS 5.

Norman Armour, of Princeton, N. J., to be a secretary of embassy or legation of class 5.

Allen W. Dulles, of Auburn, N. Y., to be a secretary of embassy or legation of class 5.

Robert M. Scotten, of Detroit, Mich., to be a secretary of embassy or legation of class 5.

John C. Wiley, of Indianapolis, Ind., to be a secretary of embassy or legation of class 5.

JUDGE OF UNITED STATES CIRCUIT COURT.

Evan A. Evans, of Baraboo, Wis., to be United States circuit judge, seventh circuit, vice William H. Seaman, deceased.

REGISTER OF LAND OFFICE.

John L. Wiley, of Spokane, Wash., to be register of the land office at Spokane, Wash., vice Hal J. Cole, term expired.

APPOINTMENTS IN THE ARMY.

MEDICAL RESERVE CORPS.

*To be first lieutenants, with rank from April 28, 1916.*

James Earle Ash, of Massachusetts.
Astley Paston Cooper Ashhurst, of Pennsylvania.
James Harold Austin, of Pennsylvania.
Louis de Keyser Belden, of North Carolina.
Bernard Johan Beuker, of Michigan.
John Welch Boyce, of Pennsylvania.
Claude Lee Bradford, of Pennsylvania.
Harry Francis Byrnes, of Massachusetts.
George Fitzpatrick Adair, of New York.
Richard Travis Atkins, of New York.
Julius Benjamin Boehm, of New York.
Walter Whitney Boardman, of California.
Ward Brinton, of Pennsylvania.
Bert Wilmer Caldwell, of Pennsylvania.
Williams Biddle Cadwalader, of Pennsylvania.
Donald William Cameron, of Pennsylvania.
Benjamin Van Campen, of New York.
Brewster Clarke Doust, of New York.
Ambrose Francis Dowd, of New Jersey.
Blake Ferguson Donaldson, of New York.
William Darrach, of New York.
Charles Dudley Eldred, of Illinois.
Thomson Edwards, of Pennsylvania.
Eldridge Lyon Eliason, of Pennsylvania.
Daniel Wadsworth Frye, of Pennsylvania.
Isaac Samuel Gellert, at large.
Curtenius Gillette, of New York.
Thomas E. Gutch, of Iowa.
Edward L. Hanes, of New York.
Walter Coit Hill, of Ohio.
Daniel Mansfield Hoyt, of Pennsylvania.
Reid Hunt, of Massachusetts.
Henry Barr Ingle, of Pennsylvania.
Frank Hussy Jackson, of Maine.
Floyd Elwood Keene, of Pennsylvania.
Elmer Alexander Klein, of Ohio.
Edward Bell Krumbhaar, of Pennsylvania.
Peirce Henry Leavitt, of Massachusetts.
Burton James Lee, of New York.
Hanson Thomas Asbury Lemon, of the District of Columbia.
John Borneman Ludy, of Pennsylvania.
William Sharp McCann, of New York.
Archibald Alexander MacLachlan, of Pennsylvania.
Thomas William Maloney, of New York.
Harrison Standford Martland, of New Jersey.
Alvah Strong Miller, of New York.
Alfred Meyer, of New York.
Alfred James Ostheimer, of Pennsylvania.
William Barclay Parsons, jr., of New York.
George Morris Piersol, of Pennsylvania.
Thomas Christian Peightal, of Pennsylvania.
Edmund Brown Piper, of Pennsylvania.
Martin William Reddan, of New Jersey.
Nathaniel Fulford Rodman, of Virginia.
George Malcolm Laws, of Pennsylvania.
Daniel Augustus Shea, of Vermont.
Andrew Watson Sellards, of Massachusetts.
Henry Larned Keith Shaw, of New York.
Richmond Stephens, of New York.
Henry Joseph Fitz Simmons, of Massachusetts.
John Reid Simpson, of Pennsylvania.
Frederick Jennings Smith, of California.
Joseph Wheeler Smith, jr., of New York.
William Johnson Taylor, of Pennsylvania.
Royden Mandeville Vose, of New York.
John William Warner, of New York.
James Homer Wright, of Massachusetts.
Herbert Maxwell Nash Wynne, of Maryland.
John Edward Williams, of New Jersey.
William Whitridge Williams, of Colorado.
Warren Wooden, of New York.
John Archibald Campbell Colston, of Maryland.
Victor Francis Cullen, of Maryland.
Paul Wiswall Clough, of Maryland.
Arthur Bliss Dayton, of Connecticut.
John Howland, of Maryland.
John Theodore King, jr., of Maryland.
Winford Henry Smith, of Maryland.
Arthur Charles Stokes, of Nebraska.
Thomas Linville, of the District of Columbia.

PROMOTIONS IN THE ARMY.

INFANTRY ARM.

Lieut. Col. William P. Burnham, Infantry, unassigned, to be colonel from May 1, 1916, vice Col. Charles J. Crane, Ninth Infantry, retired from active service April 30, 1916.

Maj. Arthur Johnson, Infantry, unassigned, to be lieutenant colonel from May 1, 1916, vice Lieut. Col. William P. Burnham, unassigned, promoted.

Capt. George H. Jamerson, Second Infantry, to be major from May 1, 1916, vice Maj. Edson A. Lewis, Sixth Infantry, detached from his proper command.

First Lieut. Wallace McNamara, Twelfth Infantry, to be captain from May 1, 1916, vice Capt. George H. Jamerson, Second Infantry, promoted.

Second Lieut. William B. Loughborough, Third Infantry, to be first lieutenant from May 1, 1916, vice First Lieut. Wallace McNamara, Twelfth Infantry, promoted.

POSTMASTER.

NEW JERSEY.

John Y. Bellis to be postmaster at Clinton, N. J., in place of Frank A. Esty. Incumbent's commission expired March 13, 1916.

---

CONFIRMATION.

*Executive nomination confirmed by the Senate May 5, 1916.*

POSTMASTER.

TENNESSEE.

John M. Jones, Newport.

---

REJECTION.

*Executive nomination rejected by the Senate May 5, 1916.*

POSTMASTER.

Henry F. Pembleton to be postmaster at Central Valley, N. Y.

---

## HOUSE OF REPRESENTATIVES.

### FRIDAY, *May 5, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou, who art ever near to us and always ready to help those who seek Thee in spirit and in truth, we draw near to Thee that by the touch of Thy spirit we may be purified, ennobled, and made strong for the duties which wait upon us; that with high ideals, pure motives, and earnest endeavors we may hallow Thy name in thought and purpose, and feel the thrill of an approving conscience when the night shall close upon us and bring quiet and peaceful rest to our souls. In His name. Amen.

The Journal of the proceedings of yesterday was read and approved.

DEPOSIT OF ASSETS OF INSOLVENT NATIONAL BANKS.

Mr. ROGERS rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. ROGERS. Mr. Speaker, I rise to ask that the bill H. R. 3575, which is on the Speaker's table, be laid before the House. It is a House bill with a Senate amendment.

The SPEAKER. The Clerk will report it.

The Clerk read the title of the bill, as follows:

A bill (H. R. 3575) to amend section 5234 of the Revised Statutes of the United States so as to permit the Comptroller of the Currency to deposit upon interest the assets of insolvent national banks in other national banks of the same or of an adjacent city or town.

The SPEAKER. The Clerk will report the Senate amendment.

The Senate amendment was read.

Mr. ROGERS. Mr. Speaker, I called this bill up on Tuesday, I think it was, and the gentleman from Tennessee [Mr. GARRETT] asked that it go over for the present. Since that time I have consulted the chairman of the Committtee on Banking and Currency [Mr. GLASS] and the gentleman from New York [Mr. PLATT], in charge of the bill, and they both authorize me to say they have no objection to the Senate amendment, which is purely a formal one.

I move, Mr. Speaker, that the House concur in the Senate amendment.

The SPEAKER. The gentleman from Massachusetts moves that the House concur in the Senate amendment. Without objection, the Senate amendment is concurred in.

Mr. WINGO. Reserving the right to object, Mr. Speaker, I just came from a meeting of the Committee on Banking and Currency, and I have not a clear idea of what the bill is. As I understand it, it is the Rogers bill, with a Senate amendment?

Mr. ROGERS. That is true.

Mr. WINGO. May I inquire what the Senate amendment is?

The SPEAKER. The Clerk will report it again.

The Senate amendment was again read.

Mr. WINGO. That is simply a formal amendment. I have no objection.

The SPEAKER. The question is on agreeing to the motion to concur in the Senate amendment.

The motion was agreed to.

On motion of Mr. ROGERS, a motion to reconsider the vote whereby the Senate amendment was concurred in was laid on the table.

HOUR OF MEETING TO-MORROW.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

The SPEAKER. The gentleman from North Carolina [Mr. KITCHIN] asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection?

There was no objection.

OREGON AND CALIFORNIA LAND GRANTS.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that the bill H. R. 14864, the Oregon-California land-grant bill, be given a privileged status.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent that the Oregon-California land-grant bill, H. R. 14864, be given a privileged status.

Mr. FITZGERALD. Mr. Speaker, I propose to object to such requests until we have our appropriation bills disposed of. We have been waiting to dispose of them for some time.

The SPEAKER. The gentleman from New York [Mr. FITZGERALD] objects.

Mr. FERRIS. Will the gentleman withhold his objection a moment until I can make a statement?

Mr. FITZGERALD. I will withhold my objection.

Mr. FERRIS. On December 9 the Supreme Court of the United States rendered a decision placing up to Congress a proposition to deal with 2,300,000 acres of land, roughly estimated at about $50,000,000. Your committee has been at work upon it.

The Supreme Court decision gives Congress six months in which to act upon recouping about $50,000,000 worth of railroad land grants in Oregon. Your Committee on Public Lands has been at work on it and has devoted to it as much time as we could, and we secured reports on it from the Department of Justice and the Department of the Interior and the Department of Agriculture.

This six-months' period runs out on June 9, and if I may just read what the Department of Justice says, in a word, about the necessity of Congress acting, I think gentlemen will be convinced that some action must be taken soon. I will read from the Supreme Court decision and also from the official report of the Department of Justice of April 13, 1916. After reciting the six-months' provision in which Congress may act, this paragraph occurs:

The court also decided that:

"If Congress does not make such provision, the defendants may apply to the district court within a reasonable time, not less than six months, from the entry of the decree herein, for a modification of so much of the injunction herein ordered as enjoins any disposition of the land and timber until Congress shall act, and the court, in its discretion, may modify the decree accordingly." (Id., p. 439.)

If, therefore, Congress does not act in the premises, that part of the judgment of the Supreme Court which forbids the railroad company to make any disposition of the land and timber thereon may be set aside by the lower court upon application of the company. The application will undoubtedly be made in due time unless Congress acts, and in all probability the court would grant it and set aside the injunction to that extent. If it did, the railroad company would be free to sell the rest of the lands in accordance with the provisions of the granting acts, at a price not to exceed $2.50 an acre, etc. If sold at this price, the 2,300,000 acres would bring not to exceed $5,750,000, albeit, according to a stipulation of the parties in the suit just referred to, they are worth upward of thirty millions, and many place their value at fifty millions.

If the lands are sold for $5,750,000, the railroad company will take all the proceeds and the Government will lose at least $25,000,000. It is, therefore, of the first importance that Congress should act, and provide for the disposition of these lands and the timber thereon.

The decision of the court contains this extract:

This, then, being the situation resulting from conditions now existing, incident, it may be, to the prolonged disregard of the covenants by the railroad company, the lands invite now more to speculation than to settlement, and we think, therefore, that the railroad company should not only be enjoined from sales in violation of the covenants, but enjoined from any disposition of them whatever or of the timber thereon, and from cutting or authorizing the cutting or removal of any of the timber thereon, until Congress shall have a reasonable opportunity to provide by legislation for their disposition in accordance with such policy as it may deem fitting under the circumstances, and at the same time secure to the defendants all the value the granting acts conferred upon the railroads.

If Congress does not make such provision, the defendants may apply to the district court, within a reasonable time, not less than six months from the entry of the decree herein, for a modification of so much of the injunction herein ordered as enjoins any disposition of the lands

and timber until Congress shall act, and the court, in its discretion, may modify the decree accordingly.

Decree reversed and cause remanded to the district court for further proceedings in accordance with this opinion.

I may add that the committee provides in section 1 of that bill for complete resumption of title to these lands and the disposition of them as well.

Mr. MONDELL. Mr. Speaker, will the gentleman yield?

Mr. FERRIS. Let me conclude in just a word more. I may add that I have taken this matter up with the Speaker and with the majority leader [Mr. KITCHIN] and with the minority leader [Mr. MANN], and I think each one of them understands the necessity of early action. And I may also add to that that the committee has no disposition to interfere with the consideration of appropriation bills or other more important measures.

The SPEAKER. May the Chair ask the gentleman one question?

Mr. FERRIS. Certainly.

The SPEAKER. Was not this bill treated as a privileged bill when it was first brought in here?

Mr. FERRIS. It was; and it was reported from the floor. I rather think it is privileged. The rule provides that such matters coming from the Committee on the Public Lands are privileged. It will not take over two or three hours. There is no opposition to it.

Mr. FITZGERALD. When does this six-months' period expire?

Mr. FERRIS. In June.

Mr. FITZGERALD. I thought it was in July.

Mr. FERRIS. No; in June. The Senate has got to act upon it before the six-months' period is up. The gentleman from Wisconsin [Mr. LENROOT] understands the necessity of it. He is acquainted with it.

Mr. MONDELL. I do not think there is any question about its being a privileged bill.

Mr. FITZGERALD. Mr. Speaker, I will withdraw my objection.

Mr. FERRIS. The gentleman from New York withdraws his objection.

Mr. MANN. Reserving the right to object, Mr. Speaker, when does the gentleman expect to call up the bill?

Mr. FERRIS. That rests with the Speaker. I think we can tuck this in between other legislation and dispose of it in two hours, perhaps, in a lull between appropriation bills. I think the House is equally interested in it with the committee. There is nothing selfish about our wanting to take it up speedily. It seems to us a necessity. The committee is anxious to discharge its full duty in the premises.

Mr. MANN. The gentleman does not expect to call it up this week?

Mr. FERRIS. I hope to do it at the first opportunity.

Mr. MANN. I will say frankly to the gentleman that some of the parties interested in the bill do not wish it to come up this week.

Mr. FERRIS. The committee are not at all headstrong about it. We are merely trying to proceed as rapidly as we can.

Mr. MANN. If the gentleman will say he does not intend to call it up this week, I think I shall not object.

Mr. FERRIS. All right; we will not call it up this week.

Mr. MANN. I will take the gentleman's statement, although on January 29 we gave consent to make privileged the Porto Rico bill, and it was expressly stated then by the gentleman making the request and by the Speaker in putting the request in the first instance, that the bill should not interfere with the consideration of appropriation bills.

The SPEAKER. This will not interfere with that now, even if it is given a privileged status.

Mr. MANN. Yet we find that that bill is interfering with two appropriation bills on the calendar and with another ready to be reported. Instead of proceeding with the consideration of appropriation bills, they have been set aside to go ahead with the Porto Rico bill, in violation of the statement which was made when the Porto Rican bill was made privileged.

The SPEAKER. The Chair will not recognize the gentleman from Oklahoma [Mr. FERRIS] or anybody else with a bill which interferes in any way with the appropriation bills.

Mr. MANN. The Porto Rico bill is expected to interfere.

The SPEAKER. But that was by common consent.

Mr. MANN. Oh, no; not at all. There was no common consent about it. That is the reason I am calling the attention of the House to this. When the Speaker first stated the request on January 29, he stated that it was not to interfere with appropriation bills. Yet with two appropriation bills on the calendar we are interfering with their consideration.

Mr. KITCHIN. Mr. Speaker, I ought to remind the gentleman from Illinois that before we took up the Porto Rican bill the other day I spoke to him about it, and it was decided to take it up after the Agricultural bill was finished.

Mr. MANN. Oh, yes; I have no objection to taking it up at any time when there is no appropriation bill ready to be presented. The other day the gentleman from Virginia [Mr. FLOOD], in charge of the Diplomatic bill, did not happen to be here, and we had an hour or two which could be used in that way. I am perfectly willing at any odd time to run in a thing of this sort; but I consented with the understanding that it would not interfere with the consideration of appropriation bills, which it is now doing.

Mr. KITCHIN. I do not think it is interfering with them.

Mr. FITZGERALD. There should not be any misunderstanding. We were ready to proceed with appropriation bills. We had two bills ready from the Committee on Appropriations, and we could not get in; that is all. We were notified that we could not proceed with them.

Mr. GARRETT. Of course there should not be any misunderstanding.

Mr. FITZGERALD. I do not know what the arrangement is. I am just stating what the facts are.

Mr. GARRETT. The order which was adopted, and which is on the calendar, was that the Porto Rican bill should be made privileged. That is the official order.

Mr. FITZGERALD. That may be the official order——

The SPEAKER. The Chair understands the gentleman from Oklahoma to withdraw his request anyway.

Mr. FERRIS. No; there was no objection to it.

Mr. MANN. I make no objection.

Mr. FITZGERALD. I withdrew the objection because of the peculiar conditions affecting this bill, but I will object to any other request which interferes with the consideration of appropriation bills.

The SPEAKER. Without objection, it is made privileged.

### FOREST HOMESTEADS.

Mr. GANDY. Mr. Speaker, I ask unanimous consent to vacate the proceedings on the passage of the forest homestead bill (H. R. 10668) which passed yesterday, and to return to the amendment stage, for the purpose of making a correction in the bill that was attempted to be made yesterday, but the gentleman from Illinois [Mr. MANN] asked me to wait until a little later time.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read the title of the bill (H. R. 10668) to repeal section 4 of the act of Congress approved June 11, 1906, known as the forest homestead act, and for other purposes.

The SPEAKER. The gentleman from South Dakota [Mr. GANDY] asks unanimous consent to vacate all the proceedings touching this bill back to the amendment stage. Is there objection?

There was no objection.

The SPEAKER. Now, what is the gentleman's request?

Mr. GANDY. I ask unanimous consent that the word "forest," in line 2 of page 2, be changed to the plural "forests." There are two forests involved in this case.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

On page 2, in line 2, change the word "forest" to "forests."

The SPEAKER. Without objection, the amendment will be agreed to, and without objection the bill will be engrossed and read a third time and passed; and without objection, a motion to reconsider and to lay that motion on the table will be agreed to.

There was no objection.

### PRINT OF THE PHILIPPINE BILL.

Mr. JONES. Mr. Speaker, I ask unanimous consent that the Philippine bill, which passed the House on Monday last, be ordered to be printed. There is no print of the bill, and there have been a great many requests for it.

The SPEAKER. The gentleman asks that the Philippine bill be printed. Is there objection?

Mr. TOWNER. As it passed the House?

Mr. JONES. As it passed the House.

The SPEAKER. Of course. Is there objection?

There was no objection.

### CIVIL GOVERNMENT FOR PORTO RICO.

On motion of Mr. JONES, the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 9533) to provide a civil government for Porto Rico, and for other purposes, with Mr. FOSTER in the chair.

Mr. TOWNER. Mr. Chairman, Porto Rico has an area of 3,606 square miles, or about 2,300,000 acres. It is somewhat larger than the State of Delaware, but is not so large as Connecticut. In conformation the island is mountainous, in its central portions reaching elevations of over 3,500 feet. Interspersed are fertile valleys, with low-lying plains along the coasts. It is the most lovely of all the beautiful cluster of islands washed by the waters of the Caribbean Sea. Climatically it is ideal. The Government records, running for more than 10 years, show a mean annual temperature of 76°. During the coolest month of winter the average is 73°, and during the warmest month of summer it is 79°. There is abundant moisture, but there is no wet and dry season, such as is found in other parts of the Tropics. The trade winds which prevail, combined with the high elevation, make it exceptionally healthful and delightful throughout the year.

Porto Rico has a most interesting and romantic history. It was discovered by Columbus in 1493 in his second voyage to America. Columbus was accompanied on this voyage by Ponce de Leon, on his way to Santo Domingo. Charmed by the beauty of the island and drawn by the tales of the natives of stores of gold in the interior, de Leon soon returned to explore the island and effect a settlement. Entering what is now the harbor of San Juan he named it Puerto Rico, or the gate of riches. A permanent Spanish settlement was soon effected. After many adventures Ponce de Leon was superseded by another governor, and started on his famous expedition in quest of the fabled fountain of perpetual youth. He did not find the fountain, but he discovered Florida, and added it to the possessions of the King of Spain.

For more than 400 years the island remained a colony of Spain. During nearly all these years Porto Rico was at peace, for it was the most pacific of all Spain's possessions in the western world. It was cruelly exploited, however, and Spain's corrupt and rapacious governors kept the island poor. Their object was personal gain rather than the betterment of the people. They were despoilers, not rulers. Against this tyranny and injustice the spirit of revolt was slowly rising, and when in 1898 Gen. Miles landed an army upon its shores the Americans were welcomed as friends rather than invaders. No man not in the pay of Spain lifted an arm to oppose the American occupancy.

In Gen. Miles's first proclamation to the islanders he said:

> We have come to bestow upon you the immunities and blessings of the liberal institutions of our Government.

How well that promise has been kept, the history of American control of the island during the last 18 years bears eloquent testimony.

At the commencement of the American occupancy the population of Porto Rico was about 900,000. It now is about 1,250,000; a rate of increase considerably larger than that of the continental United States. Nearly three-fourths of the population are white, mostly of Spanish descent. Two-thirds are engaged in agricultural pursuits. They are a peaceable, tractable, intelligent people, eager for education, enlightenment, and civic betterment. Since their incorporation into our territory they have never given this country the least trouble, nor have they given the governors whom we have sent to them the slightest apprehension or even embarrassment.

The educational development of the island during the American occupancy has been remarkable when it is considered that there was no general public-school system in existence at its commencement, and that now there is a complete system in operation, with over 168,000 pupils enrolled, with 2,500 teachers regularly employed, with 1,500 schoolhouses already built, and an annual expenditure of $2,000,000 in their support. The amount available is inadequate to make the progress desired, but the people willingly tax themselves to their utmost capacity in order to lift the cloud of illiteracy that for centuries has hung over the island. With an anticipated increase of revenue it is reasonable to expect that the time is not distant when every child on the island may receive the blessings of a public-school education as freely and with at least as much appreciation and gratitude as do the children of the United States.

The Spanish language is the ancestral and common language of the people. It is manifest that because of their political relations with the United States a knowledge of English is essential. Instead, however, of trying to force an abandonment of the use of the Spanish language and the substitution of English, from the earliest days of the American occupancy the purpose has been to establish a bilingual system which would insure the conservation of Spanish and the acquisition of English. As Dr. Brumbaugh, the American commissioner, who did so much wisely to build the foundations of their educational system, said:

> We want the children to have and use both languages, Spanish and English. * * * It will be a hindrance and not a help to deprive these people of an opportunity to acquire both languages.

The present commissioner, in his last report, pertinently suggests that the people of Porto Rico, situated midway between English North America and Spanish South America, have an unusual opportunity to acquire the two great American languages and thus be enabled to take an active participation in the interchange of ideas and products between the two American continents.

There is absolute freedom of worship in Porto Rico, and while Catholicism is the prevalent religion, most of the Protestant churches are represented in the island.

There are a large number of newspapers and magazines published in the island which are well patronized by the people.

The courts are well established and hold the confidence of the people. Disorder and crime are well under control, and the lives and property of the people are as well protected in Porto Rico as in the United States.

In nothing else has Porto Rico so rapidly Americanized itself as in its politics. Almost every intelligent Porto Rican is a politician. Parties with complete organizations and definite policies have been formed. Party organs have been established and party leaders are recognized and followed. At the last election, held in 1914, the total number of votes cast was 204,233. Of these the Unionist Party cast 107,519 and the Republican Party cast 82,574. The rest were scattered. As might be expected the issues which divide the parties are largely concerned with the ultimate destiny of the island and its relation to the United States. The Republican Party looks to closer relations with this country, and ultimate statehood. The Unionist Party aspired to independence. However, it can probably be said that now there is very little expectation or desire in the island for independence. The Unionist Party, largely in the majority, and hitherto representing especially the independence idea, on October 24, 1915, held a convention in San Juan, and by a vote of more than 3 to 1 resolved to "postpone all action looking toward the independence of Porto Rico, and to devote our entire efforts toward a steady activity in favor of self-government." This, they declare, involves a new policy, which, withdrawing all systematic opposition to the American sovereignty, may gradually establish the foundation for a better understanding between Americans and Porto Ricans on the island. In this way, they believe, the legislative task of Congress as regards a possible reform in the organic act of Porto Rico will be rendered easier of accomplishment. As nearly all the essential concessions looking to a larger measure of self-government for the island are granted in this bill, which if passed will constitute their new constitution, it is confidently believed that the dream and desire for independence will not be longer indulged or cherished, and that Porto Rico may become a great and prosperous self-governing Commonwealth, which if not independent, will maintain its association with the United States because of its desire to continue such association, and because it will be mutually beneficial to Porto Rico and to the United States to continue it. I venture the prediction that the next constitution of government for Porto Rico that will be formulated will not be drawn in Washington, but it will be formulated in San Juan by the people of Porto Rico and sanctioned and approved by the Congress of the United States. [Applause.] As the present constitution of Canada was formulated at Ottawa, as the present constitution of Australia was drawn at Melbourne, and as the constitutions of these great self-governing Commonwealths were approved without change by the Parliament at London, so will the future constitution of Porto Rico be drawn by her own people and approved without modification by the Congress of the United States.

The external commerce of Porto Rico has increased from $17,000,000 in 1901, the earliest year under American occupancy for which we have reliable statistics, to over $83,000,000 for the fiscal year ending June 30, 1915.

Its exports have increased during that period from $8,000,000 to $49,000,000.

Imports from $8,000,000 to $33,000,000.

It is gratifying and important to note that the greater part of this large increase in her external commerce has been with the United States.

From 1901 to 1915 the total foreign trade of Porto Rico had increased from $5,000,000 to only $10,000,000.

During the same period the trade between Porto Rico and the United States had increased from $12,000,000 in 1907 to $73,000,000 in 1915.

During last year Porto Rico sold to the United States nearly $50,000,000 of her products, and we sold to Porto Rico nearly $34,000,000 of ours.

We sell more goods to Porto Rico than we do to Russia, or Austria-Hungary, or many of the other great nations of the world. Only 11 of the great nations of the world purchased more goods from us than Porto Rico.

Eighty-eight per cent of all the external trade of Porto Rico is carried on with the United States, and 91 per cent of its external purchases were made in the markets of this country.

The principal products of the island are sugar, tobacco, coffee, and fruit.

About 483,000 acres, or less than 25 per cent of the cultivatable area of the island, is devoted to production. The exports, amounting, as we have seen, to nearly $50,000,000, are practically all produced on this limited area. It represents an average of about $103 for each cultivated acre of the island, a truly remarkable surplus production.

On October 18, 1898, the United States assumed formal possession of the island. A military government was at once established. A postal system was organized, freedom of speech and of the press proclaimed, a police force was formed, and strict sanitary measures adopted. Free public schools were opened, constitutional rights guaranteed, courts with jury trial established, and municipal elections were instituted. Considerable progress was made both politically and economically under Gens. Brooke, Henry, and Davis, who were successively appointed military governors of the island.

April 12, 1900, Congress passed the Foraker Act, now known as the organic law. It was entitled, "An act temporarily to provide revenues and a civil government for Porto Rico." Nevertheless it has continued and is now the fundamental law governing the island. For 16 years this "temporary" act has been in force comparatively unchanged.

In December, 1909, the President sent Hon. J. M. Dickenson, Secretary of War, and Gen. Clarence R. Edwards, Chief of the Bureau of Insular Affairs, to visit the island of Porto Rico to study conditions of the administration of the island, political, economic, and hygienic, and report such recommendations of changes in the organic law as conditions required. Upon his return the Secretary prepared a bill to provide a new organic law, which was introduced in the House by Mr. Olmstead, then chairman of the Committee on Insular Affairs. The bill, with certain amendments, passed the House, but failed of consideration by the Senate.

In March, 1914, the Committee on Insular Affairs of the Sixty-third Congress reported favorably the Jones bill, which was substantially the same in its provisions as the bill now pending.

Consideration of the bill was pressed by the chairman of the committee, but no action was taken during the last Congress.

The present bill is introduced to supersede the organic act of 1900 with its amendments, and to furnish for the people of Porto Rico a constitution of government commensurate with their present needs and in conformity, as far as possible, with their desires. It has been unanimously recommended for passage by the Committee on Insular Affairs.

It is a pleasure for me to say that in the consideration of this bill there has not been the slightest party spirit manifested by the members of the committee. The discussions have been upon broad constitutional grounds, with the evident purpose and desire on the part of all to give to the people of Porto Rico the best possible government, based upon principles of liberty guaranteed by law, and administered under such regulations as our own experience has shown most advantageous to secure the future safety and progress of the island. The chairman of the committee [Mr. JONES] is entitled to especial credit and praise, not only for his wisdom and care in the original preparation of the bill, but also for his uniform courtesy and fairness to all while presiding during the consideration of the bill. [Applause.]

The principal changes in the law that would result from the passage of the pending bill are as follows:

First. A bill of rights is established.

Second. Citizens of Porto Rico are made citizens of the United States.

Mr. BENNET. Will the gentleman yield for a question?

Mr. TOWNER. I yield to the gentleman from New York.

Mr. BENNET. What portion of the bill covers this sort of a case, which exists in my city of New York? Prior to 1898 there were many Porto Ricans living in New York City, and they are still living there, engaged in business. Under the decision of the Supreme Court they can not be naturalized, because they can not renounce allegiance to any foreign power. They are not citizens of the United States. Under the case of In re Williams they are not aliens. What part of this bill gives those people any status at all?

Mr. TOWNER. I think the act granting citizenship to the people of Porto Rico would grant them this right.

Mr. BENNET. I do not want to interrupt the gentleman unduly, but if the gentleman will read that part of it I think he will find that the people who are now in Porto Rico are taken care of, but the people who were absent from Porto Rico prior to a certain date and who do not wish to return by a certain date are not taken care of. These natives of Porto Rico who lost their Spanish nationality, and who are now residing in the United States, have no definite status at all.

Mr. TOWNER. I think there is no question that there is no provision in the bill that will give citizenship to those people. They have lost their citizenship in Porto Rico, and we would have no authority to give them citizenship now.

Mr. BENNET. I disagree with the gentleman. We have not done it; and yet, why have we not done something to give these people some sort of a status?

Mr. TOWNER. I think there is no provision in the bill that would give them any status.

3. The control over harbors and navigable streams is transferred from the United States to Porto Rico.

4. The offices of the commissioner of agriculture and labor and commissioner of health are created, and members of the Executive Council are made heads of executive departments.

5. The powers of the auditor are increased.

6. An elective senate is created and the Executive Council deprived of legislative powers.

7. The budget system is established, and power is given the governor to veto items in appropriation bills.

8. A public-service commission is established, with extensive powers of control over franchises and public-service corporations.

Other changes are effected which will be referred to during the consideration of the bill.

It will not be possible adequately to discuss even the principal provisions of the bill, but it is confidently believed they will justify themselves in administration and prove satisfactory to at least a large majority of the people of the island. Great care and patient consideration extending over a period of years has been given to the formation of the bill, with a desire on the part of all those engaged in formulating it to give the people of Porto Rico the guaranty of every right and the protection of every personal and property possession which free men and liberty-loving nations possess and value. [Applause.]

Mr. JONES. Mr. Chairman, I yield 20 minutes to the Commissioner from Porto Rico [Mr. RIVERA].

Mr. RIVERA. Mr. Speaker, I want to state, in the first place, that I have taken great pleasure in the declaration of the gentleman from Virginia [Mr. JONES] the other day, and also in the declaration of the gentleman from Iowa [Mr. TOWNER] this morning. Both gentlemen are doing justice to my country. Both have endeavored to make this bill, which I consider a general proposition, a democratic measure, acceptable to all of my countrymen in Porto Rico.

On the 18th day of October, 1898, when the flag of this great Republic was unfurled over the fortresses of San Juan, if anyone had said to my countrymen that the United States, the land of liberty, was going to deny their right to form a government of the people, by the people, and for the people of Porto Rico, my countrymen would have refused to believe such a prophecy, considering it sheer madness. The Porto Ricans were living at that time under a régime of ample self-government, discussed and voted by the Spanish Cortes, on the basis of the parliamentary system in use among all the nations of Europe. Spain sent to the islands a governor, whose power, strictly limited by law, made him the equivalent of those constitutional sovereigns who reign but do not govern. The members of the cabinet, without whose signature no executive order was valid, were natives of the island; the representatives in the senate and in the house were natives of the island; and the administration in its entirety was in the hands of natives of the island. The Spanish Cortes, it is true, retained the power to make statutory laws for Porto Rico, but in the Cortes were 16 Porto Rican representatives and 3 Porto Rican senators having voice and vote. And all the insular laws were made by the insular parliament.

Two years later, in 1900, after a long period of military rule, the Congress of the United States approved the Foraker Act. Under this act all of the 11 members of the executive council were appointed by the President of the United States; 6 of them

were the heads of departments; 5 exercised legislative functions only. And this executive council, or, in practice, the beaurocratic majority of the council, was, and is in reality, with the governor, the supreme arbiter of the island and of its interests. It represents the most absolute contradiction of republican principles.

For 16 years we have endured this system of government, protesting and struggling against it, with energy and without result. We did not lose hope, because if one national party, the Republican, was forcibly enforcing this system upon us, the other national party, the Democratic, was encouraging us by its declarations in the platforms of Kansas City, St. Louis, and Denver. Porto Rico waited, election after election, for the Democratic Party to triumph at the polls and fulfill its promises. At last the Democratic Party did triumph. It is here. It has a controlling majority at this end of the Capitol and at the other end; it is in possession of the White House. On the Democratic Party rests the sole and undivided responsibility for the progress of events at this juncture. It can, by a legislative act, keep alive the hopes of the people of Porto Rico or it can deal these hopes their death blow.

The Republican Party decreed independence for Cuba and thereby covered itself with glory; the Democratic Party is bound by the principles written into its platforms and by the recorded speeches of its leaders to decree liberty for Porto Rico. The legislation you are about to enact will prove whether the platforms of the Democratic Party are more than useless paper, whether the words of its leaders are more than soap bubbles, dissolved by the breath of triumph. Here is the dilemma with its two unescapable horns: You must proceed in accordance with the fundamental principles of your party or you must be untrue to them. The monarchies of the Old World, envious of American success and the republics of the New World, anxious to see clearly the direction in which the American initiative is tending, are watching and studying the Democratic administration. Something more is at stake than the fate of Porto Rico—poor, isolated, and defenseless as she is—the prestige and the good name of the United States are at stake. England learned the hard lessons of Saratoga and Yorktown in the eighteenth century. And in the nineteenth century she established self-government, complete, sincere, and honorable, in Canada, Australia, and New Zealand. Then in the twentieth century, immediately after the Anglo-Boer War, she established self-government, complete, sincere, and honorable, for the Orange Free State and the Transvaal, her enemies of the day before. She turned over the reins of power to insurgents who were still wearing uniforms stained with British blood.

In Porto Rico no blood will be shed. Such a thing is impossible in an island of 3,600 square miles. Its narrow confines never permitted and never will permit armed resistance. For this very reason Porto Rico is a field of experiment unique on the globe. And if Spain, the reactionary monarchy, gave Porto Rico the home rule which she was enjoying in 1898, what should the United States, the progressive Republic, grant her? This is the mute question which Europe and America are writing today in the solitudes of the Atlantic and on the waters of the Panama Canal. The reply is the bill which is now under discussion. This bill can not meet the earnest aspirations of my country. It is not a measure of self-government ample enough to solve definitely our political problem or to match your national reputation, established by a successful championship for liberty and justice throughout the world since the very beginning of your national life. But, meager and conservative as the bill appears when we look at its provisions from our own point of view, we sincerely recognize its noble purposes and willingly accept it as a step in the right direction and as a reform paving the way for other more acceptable and satisfactory which shall come a little later, provided that my countrymen will be able to demonstrate their capacity, the capacity they possess, to govern themselves. In regard to such capacity it is my duty, no doubt, a pleasant duty, to assure Congress that the Porto Ricans will endeavor to prove their intelligence, their patriotism, and their full preparation to enjoy and to exercise a democratic regimé. [Applause.]

Our behavior during the past is a sufficient guaranty for our behavior in the future. Never a revolution there, in spite of our Latin blood; never an attempt to commercialize our political influence; never an attack against the majesty of law. The ever-reigning peace was not at any time disturbed by the illiterate masses, which bear their suffering with such stoic fortitude and only seek comfort in their bitter servitude, confiding in the supreme protection of God. [Applause.]

There is no reason which justifies American statesmen in denying self-government to my country and erasing from their programs the principles of popular sovereignty. Is illiteracy the reason? Because if in Porto Rico 60 per cent of the electorate can not read, in the United States in the early days of the Republic 80 per cent of the population were unable to read; and even to-day there are 20 Republics and twenty monarchies which acknowledge a higher percentage of illiteracy than Porto Rico. It is not the coexistence of two races on the island, because here in North America more than 10 States show a higher proportion of negro population than Porto Rico, and the District of Columbia has precisely the same proportion, 67 white to 33 per cent colored. It is not our small territorial extent, because two States have a smaller area than Porto Rico. It is not a question of population, for by the last census there were 18 States with a smaller population than Porto Rico. Nor is it a matter of real and personal property, for the taxable property in New Mexico is only one-third that of Porto Rico. There is a reason and only one reason—the same sad reason of war and conquest which let loose over the South after the fall of Richmond thousands and thousands of office seekers, hungry for power and authority, and determined to report to their superiors that the rebels of the South were unprepared for self-government. [Laughter.] We are the southerners of the twentieth century.

The House of Representatives has never been influenced by this class of motives. The House of Representatives has very high motives, and, if they are studied thoroughly, very grave reasons for redeeming my country from bureaucratic greed and confiding to it at once the responsibility for its own destinies and the power to fix and determine them. They are reasons of an international character which affect the policy of the United States in the rest of America. Porto Rico, the only one of the former colonies of Spain in this hemisphere which does not fly its own flag or figure in the family of nations, is being closely observed with assiduous vigilance by the Republics of the Caribbean Sea and the Gulf of Mexico. Cuba, Santo Domingo, Venezuela, Colombia, Costa Rica, Honduras, Nicaragua, Salvador, Guatemala maintain with us a constant interchange of ideas and never lose sight of the experiment in the colonial government which is being carried on in Porto Rico. If they see that the Porto Ricans are living happily, that they are not treated with disdain, that their aspirations are being fulfilled, that their character is respected, that they are not being subjected to an imperialistic tutelage, and that the right to govern their own country is not being usurped, these nations will recognize the superiority of American methods and will feel the influence of the American Government. This will smooth the way to the moral hegemony which you are called by your greatness, by your wealth, by your traditions, and your institutions to exercise in the New World. [Applause.] On the other hand, if these communities, Latin like Porto Rico, speaking the same language as Porto Rico, branches of the same ancestral trunk that produced Porto Rico, bound to Porto Rico by so many roots striking deep in a common past, if these communities observe that your insular experiment is a failure and that you have not been able to keep the affections of a people who awaited from you their redemption and their happiness, they will be convinced that they must look, not to Washington but to London, Paris, or Berlin when they seek markets for their products, sympathy in their misfortunes, and guarantees for their liberty.

What do you gain along with the discontent of my countrymen? You as Members of Congress? Nothing. And the Nation loses a part of its prestige, difficulties are created in the path of its policies, its democratic ideals are violated, and it must abdicate its position as leader in every progressive movement on the planet. Therefore if you undertake a reform do it sincerely. A policy of subterfuge and shadows might be expected in the Italy of the Medicis, in the France of the Valois, in the England of the Stuarts, or the Spain of the Bourbons, but it is hard to explain in the United States of Cleveland, McKinley, Roosevelt, and Wilson. [Applause.]

The bill I am commenting on provides for a full elective legislature. Well, that is a splendid concession you will make to your own principles and to our own rights. But now, after such a magnificent advance, do not permit, gentlemen, do not permit the local powers of the legislature to be diminished in matters so important for us as the education of the children. We are citizens jealous of this dignity; we are fathers anxious to foster our sons toward the future, teaching them how to struggle for life and how to reach the highest standard of honesty, intelligence, and energy. We accept one of your compatriots, a capable American, as head of the department of education, though we have in the island many men capable of filling this high office with distinction. We welcomed his appointment by the President of the United States. In this way the island will have the guaranty to find such a man as Dr. Brumbaugh, the first commissioner of education who went to Porto Rico, or as Dr. Miller, the present commissioner, who deserves all our confidence. But

let the legislature regulate the courses of study, cooperating in that manner with the general development of educational work throughout our native country.

I come now to treat of a problem which is really not a problem for Porto Rico, as my constituents look at it, because it has been solved already in the Foraker Act. The Foraker Act recognizes the Porto Rican citizenship of the inhabitants of Porto Rico. We are satisfied with this citizenship and desire to prolong and maintain it—our natural citizenship, founded not on the conventionalism of law but on the fact that we were born on an island and love that island above all else, and would not exchange our country for any other country, though it were one as great and as free as the United States. If Porto Rico were to disappear in a geological catastrophe and there survived a thousand or ten thousand or a hundred thousand Porto Ricans, and they were given their choice of all the citizenships of the world, they would choose without a moment's hesitation that of the United States. But so long as Porto Rico exists on the surface of the ocean, poor and small as she is, and even if she were poorer and smaller, Porto Ricans will always choose Porto Rican citizenship. And the Congress of the United States will have performed an indefensible act if it tries to destroy so legitimate a sentiment and to annul through a law of its own making a law of the oldest and wisest legislators of all time—a law of nature.

It is true that my countrymen have asked many times, unanimously, for American citizenship. They asked for it when through the promise of Gen. Miles on his disembarkation in Ponce, and through the promises of the Democratic Party when it adopted the Kansas City platform—they believed it not only possible but probable, not only probable but certain, that American citizenship was the door by which to enter, not after a period of 100 years nor of 10, but immediately into the fellowship of the American people as a State of the Union. To-day they no longer believe it. From this floor the most eminent statesmen have made it clear to them that they must not believe it. And my countrymen, who, precisely the same as yours, have their dignity and self-respect to maintain, refuse to accept a citizenship of an inferior order, a citizenship of the second class, which does not permit them to dispose of their own resources nor to live their own lives nor to send to this Capitol their proportional representation. To obtain benefits of such magnitude they were disposed to sacrifice their sentiments of filial love for the motherland. These advantages have vanished, and the people of Porto Rico have decided to continue to be Porto Ricans; to be so each day with increasing enthusiasm, to retain their own name, claiming for it the same consideration, the same respect, which they accord to the names of other countries, above all to the name of the United States. Give us statehood and your glorious citizenship will be welcome to us and to our children. If you deny us statehood, we decline your citizenship, frankly, proudly, as befits a people who can be deprived of their civil liberties but who, although deprived of their civil liberties, will preserve their conception of honor, which none can take from them, because they bear it in their souls, a moral heritage from their forefathers.

This bill which I am speaking of grants American citizenship to all my compatriots on page 5. On page 6 it authorizes those who do not accept American citizenship to so declare before a court of justice, and thus retain their Porto Rican citizenship. On page 28 is provides that—

No person shall be allowed to register as a voter in Porto Rico who is not a citizen of the United States.

My compatriots are generously permitted to be citizens of the only country they possess, but they are eliminated from the body politic; the exercise of political rights is forbidden them and by a single stroke of the pen they are converted into pariahs and there is established in America, on American soil, protected by the Monroe doctrine, a division into casts like the Brahmans and Sudras of India. The Democratic platform of Kansas City declared 14 years ago, "A nation can not long endure half empire and half republic," and "Imperialism abroad will lead rapidly and irreparably to despotism at home." These are not Porto Rican phrases reflecting our Latin impressionability; they are American phrases, reflecting the Anglo-Saxon spirit, calm in its attitude and jealous—very jealous—of its privileges.

We have a profound consideration for your national ideas; you must treat our local ideas with a similar consideration. As the representative of Porto Rico I propose that you convoke the people of the island to express themselves in full plebiscite on the question of citizenship and that you permit the people of Porto Rico to decide by their votes whether they wish the citizenship of the United States or whether they prefer their own natural citizenship. It would be strange if, having refused it so long as the majority of people asked for it, you should decide to impose it by force now that the majority of the people decline it.

Some one recently stated that we desire the benefits but shirk the responsibilities and burdens of citizenship. I affirm in reply that we were never consulted as to our status, and that in the treaty of Paris the people of Porto Rico were disposed of as were the serfs of ancient times, fixtures of the land, who were transferred by force to the service of new masters and subject to new servitudes. The fault is not ours, though ours are the grief and the humiliation; the fault lies with our bitter destiny which made us weak and left us an easy prey between the warring interests of mighty powers. If we had our choice, we would be a free and isolated people in the liberty and the solitude of the seas, without other advantages than those won by our exertions in industry and in peace, without other responsibilities and burdens than those of our own conduct and our duty toward one another and toward the civilization which surrounds us.

The bill under consideration, liberal and generous in some of its sections, as those creating an elective insular senate; a cabinet, the majority of whose members shall be confirmed by the senate; and a public-service commission, two members of which shall be elected by the people, is exceedingly conservative in other sections, most of all in that which restricts the popular vote, enjoining that the right of registering as electors be limited to those who are able to read and write or who pay taxes to the Porto Rican treasury. By means of this restriction 165,000 citizens who vote at present and who have been voting since the Spanish days would be barred from the polls.

Here are the facts: There exist at present 250,000 registered electors. Seventy per cent of the electoral population is illiterate. There will remain, then, 75,000 registered electors. Adding 10,000 illiterate taxpayers, there will be a total of 85,000 citizens within the electoral register and 165,000 outside of it. I can not figure out, hard as I have tried, how those 165,000 Porto Ricans are considered incapable of participating in the elections of their representatives in the legislature and municipalities, while on the other hand they are judged perfectly capable of possessing with dignity American citizenship. This is an inconsistency which I can not explain, unless the principle is upheld that he who incurs the greatest misfortune—not by his own fault—of living in the shadow of ignorance is not worthy of the honor of being an American citizen. In the case of this being the principle on which the clause is based, it would seem necessary to uphold such principle, by depriving 3,000,000 Americans of their citizenship, for this is the number of illiterates in the United States according to the census of 1910. There is no reason that justifies this measure, anyway. Since civil government was established in Porto Rico, supseding military government—that is, 16 years ago—eight general elections have been staged. Eight times the people, with a most ample suffrage law, have elected their legislative bodies, their municipal councils, their municipal courts, and school boards. These various bodies have cooperated to the betterment and progress of the country, which gives evidence that they were prudently chosen.

Perhaps one or a hundred or a thousand electors tried to commercialize their votes, selling them to the highest bidders.

For the sake of argument I will accept that hypothesis, though it was never proved. But even supposing that we had not to do with a presumption, but with an accomplished fact, I ask, Were there not and are there not in the rest of this Nation worthless persons who negotiate their constitutional rights? Did not the courts of a great State—the State of Massachusetts—convict four or five thousand men of that offense? Was there not a case in which the majority of a legislature promised to elect and did elect a high Federal officer for a few dollars? I do not think that these infractions of the law and breaches of honor reflect the least discredit on the clean name of the American people. I do not think that such isolated crimes can lead in any State to the restriction of the vote. They are exceptional cases, which can not be helped. The courts of justice punish the guilty ones and the social organization continues its march. In Porto Rico, if such cases occur, they should have and do have the same consequences. But it would be a sad and unjust condition of affairs if, through the fault of one, 1,000 men were to be deprived of their privileges; or, to speak in proportion, if, through the fault of 160 electors, 160,000 were to be deprived of their privileges.

The aforesaid motives are fundamental ones that require careful attention from the House. But there are deeper motives yet, those that refer to the history of the United States and of the American Congress. Never was there a single law passed under the dome of the Capitol restrictive of the individual

rights, of the rights of humanity. Quite the contrary, Congress even going to the extreme of amending the Constitution, restrained the initiative of the States for the purpose of making them respect the exercise of those rights without marring it with the least drawback. There is the fourteenth amendment. Congress could not hinder States from making their electoral laws, but it could decree and did decree that in the event of any State decreasing its number of electors it would, ipso facto, decrease its number of Representatives in this House. The United States always gave to the world examples of a profound respect for the ideal of a sincere democracy.

I feel at ease when I think of the future of my country. I read a solemn declaration of the five American commissioners that signed, in 1898, the treaty of Paris. When the five Spanish delegates, no less distinguished than the Americans, asked for a guaranty as to the future of Porto Rico, your compatriots answered thus:

The Congress of a country which never enacted laws to oppress or abridge the rights of residents within its domains, and whose laws permit the largest liberty consistent with the preservation of order and the protection of property, may safely be trusted not to depart from its well-settled practice in dealing with the inhabitants of these islands.

Congress needs not be reminded of its sacred obligations, the obligations which those words impose upon it. Porto Rico had nothing to do with the declaration of war. The Cubans were assured of their national independence. The Porto Ricans were acquired for $20,000,000, and my country, innocent and blameless, paid with its territory the expenses of the campaign.

The treaty of Paris says:

As compensation for the losses and expenses occasioned the United States by the war and for the claims of its citizens by reason of the injuries and damages they may have suffered in their persons and property during the last insurrection in Cuba, Her Catholic Majesty, in the name and representation of Spain, and thereunto constitutionally authorized by the Cortes of the Kingdom, cedes to the United States of America, and the latter accept for themselves, the island of Porto Rico and the other islands now under Spanish sovereignty in the West Indies, as also the island of Guam, in the Marianas or Ladrones Archipelago, which island was selected by the United States of America in virtue of the provisions of article 11 of the protocol signed in Washington on August 12 last.

You, citizens of a free fatherland, with its own laws, its own institutions, and its own flag, can appreciate the unhappiness of the small and solitary people that must await its laws from your authority, that lacks institutions created by their will, and who does not feel the pride of having the colors of a national emblem to cover the homes of its families and the tombs of its ancestors.

Give us now the field of experiment which we ask of you, that we may show that it is easy for us to constitute a stable republican government with all possible guaranties for all possible interests. And afterwards, when you acquire the certainty that you can found in Porto Rico a republic like that founded in Cuba and Panama, like the one that you will found at some future day in the Philippines, give us our independence and you will stand before humanity as the greatest of the great; that which neither Greece nor Rome nor England ever were, a great creator of new nationalities and a great liberator of oppressed peoples. [Applause.]

Mr. FESS. Mr. Chairman, I yield 20 minutes to the gentleman from Minnesota [Mr. MILLER].

Mr. MILLER of Minnesota. Mr. Chairman, this is an occasion of rather more than passing significance to my mind. At last a bill to reorganize the government in Porto Rico is actually before Congress for consideration and, I trust, passage. The ways of mankind it is difficult even for saints or the powers of heaven, I suppose, always to understand. Two years ago the Committee on Insular Affairs practically agreed upon this same bill. It was reported to this House a year and a half or more ago, but was allowed to rest and sleep in peace without any effort having been made to bring it up and pass it. This bill has been on the calendar now in this Congress for quite a long time. There has even been an agreement under which the bill could be brought up under a privileged condition, and yet effort to bring it up has been delayed until the present moment.

I have heard it suggested in some quarters that it is not the intention of the majority in Congress to pass this bill so that it shall become a law. I do not share in that opinion. I certainly hope that it is not well founded. I certainly trust that at last the wishes of Porto Rico are to receive some consideration at the hands of this Congress. I shall watch the procedure relative to this bill in the future with a great deal of interest.

Some one naturally might arise to inquire what is the present urgency making it necessary to bring in this bill in place of appropriation bills. I do not know; I leave that for some one else to answer. After all the years of delay the spirit has moved somewhere to bring this in, leaving the many bills providing for the carrying on the Government of the United States, which are on the calendar waiting for action. No one for a moment imagines that the revenue bills and appropriation bills will all become a law by the 30th of June, when they ought. Nobody can foresee how long we shall be held in the House, probably all summer; but let me indulge in the hope that this bill is brought in at this time ahead of the appropriation bills for the express purpose of its passing the House and then passing the Senate and becoming a law. If it is to become a law, it marks an epoch in the affairs of the United States as well as in the affairs of Porto Rico.

I know that we have all listened with great pleasure to the distinguished gentleman who has just addressed the House, Señor LUIS MUÑOZ RIVERA. He is the leading statesman of Porto Rico, and has ably represented that insular possession in the House of Representatives of the Congress of the United States for two or three years. [Applause.] He has not been on the floor of the House making a great many speeches, because he did not have a chance. Congress did not see fit to give consideration to measures for Porto Rico in which he and his people are interested, but he has been active nevertheless. He has been persistent and solicitous with the Committee on Insular Affairs to bring forth this bill and pass it. I do not know of anyone who could have been more insistent that he has been during all these years.

Yet we are now listening or have recently listened to him and realize he is not exactly pleased with the bill that is here, but that is not a matter of extreme surprise. The bill that passes and becomes a law is going to put permanently at rest the unrest in Porto Rico relative to the political status of that island. If this bill is enacted into law, and I think it will be, it means that the Congress of the United States says to the people of Porto Rico, once and for all, that they are a part of the United States domain and will always remain there; that the agitation for independence in Porto Rico must come to a decided and a permanent end. I do not suppose it is particularly congenial to those interested in political propaganda to put to one side such a splendid topic to talk upon as the independence of any place, but if there is anything that you and I must be agreed upon, it is this: That Porto Rico will never go out from under the shadow of the Stars and Strips. [Applause.]

The integrity of the United States requires that no sovereignty other than that of the United States shall exercise power over that domain, and it is not a new conception at all. Back 65 years ago leading Democratic statesmen of that time announced to the world that not only was it desirable that the United States should protect itself, but that the United States should also exercise control or sovereignty over—they did not use the words "Porto Rico," though they had it also in mind, but they did use the word "Cuba," saying that Cuba should be acquired in some form, in order that the integrity of the United States might be protected against foreign aggression. That time has long passed away, and the men who were engaged in that received a lot of opprobrium at the time, and I guess they deserved it. But now that we have dug the Panama Canal, and facilities for transportation and communication from here by land down to the canal are so dubious, doubtful, and difficult, beset with difficulties for man and beast, there must be a clean, straight avenue on the sea from here to Panama, and Porto Rico is in a very strategic position relative thereto. Furthermore Porto Rico is necessary to the United States as a key to the defense of the whole American continent against aggression from Europe.

That is not really what I had in mind to say, however, when I took the floor. There has been a peculiar agitation going on in Porto Rico, as there has been in other insular possessions, asking for independence. Two years ago, when the gentlemen interested in the passage of this bill appeared before our committee they said they did not want to be made citizens of the United States, would not take citizenship if we gave it to them—declined, as they said, any such status as citizenship under the American flag. They wanted to be independent, wanted to be free, wanted to have a government of their own. There has been some change in sentiment in the past two years, but not an entire change. This time the same gentlemen appeared before the committee, as well as some others, and they said that they were willing to take citizenship now, but that they still hoped some time to have independence. I said to them then and I say to them now, "If you accept and receive citizenship under the American flag, you will take it for yourselves and your children's children for all time." It is for their own benefit and welfare that they become citizens of the United States, that the independence propaganda be discontinued, and that our sovereignty remain there permanently. When we took over the island the people there had never had an election but once. They had never had the right to exercise the duties of citizenship but once. That was immediately after a small rebellion

against Spain, and they were permitted to elect certain officials in the early months of 1898.

Mr. RIVERA. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. In a moment, if I have the time. I think I am going to answer the gentleman's inquiry. They did hold an election, and they did elect some officials, but before the officials ever could act, before the machinery of government thereby set in motion could more than start, the Spanish-American War came on, and, of course, that ended everything. Now, however, since then they have learned to know that liberty does not necessarily mean independence, they have learned that personal liberty and freedom require an interdependence of individuals in order that they may be mutually protected, that citizenship under the sovereignty of the United States means full and complete liberty and freedom. They really realize that. I say that to their credit. They even realize that when they ask for independence now. They realize also that the schoolhouse is to be the savior of their people. A system of public schools 16 or 17 years ago was only on paper in Porto Rico, as it was everywhere else under the Spanish flag, while now there are something like 2,000 schools in Porto Rico, and every boy and girl born on the island has a chance for education and industrial opportunity.

Materially speaking, the external commerce of Porto Rico about the time of the American occupation amounted to about fifteen or sixteen millions of dollars, and that has increased until now it is $83,000,000, and the difference between those two spells the measure of prosperity that has come to the people of that island, and augurs wonderfully well for the future that lies before them. But in that increase there is something that Americans should note. Somebody has said, and said rightly, that commerce follows the flag, and it does. The total exports of the United States to Porto Rico in 1901 were about $5,000,000. This last year we sold the 1,200,000 people there over $30,000,000 worth of products. Sixteen years ago the relative proportion of trade, external, in Porto Rico, was about equally divided between the United States and Europe, while to-day 88 per cent of the Porto Rican trade is with the United States, and we have been a wonderful purchaser of the things they have raised.

There has been a tremendous stimulus to the sugar industry and there has been a tremendous stimulus to the coffee industry, the two great industries in the island, and as we are the greatest consumers in the world of both sugar and coffee this relationship between Porto Rico and the United States guarantees an ever-increasing prosperity for the people of the island. One gentleman appeared before the committee, and I liked his appearance and conduct very much, but his logic was peculiar. He said one reason why Porto Rico should not be permanently a part of the United States or permanently under the sovereignty of the United States was because Porto Rico was so miserably poor and the United States so tremendously rich that it would not be proper to hitch together a poor spot and a rich one. I called his attention to the fact that had not the great American Desert, as it was known in our boyhood days, been a part of the great American Nation, so many spots would not have been made to blossom like the rose and become the home and habitation of so many millions of people. I called his attention to the fact that the people of Porto Rico now have free access to our markets, a privilege no doubt every other people in the world would well-nigh lay down their lives to obtain. To have that relationship continued means that Porto Rico will cease to be poor and eventually will become rich; that separated, a lonely, isolated spot on the sea, a prey to insurrection and everything else, her poverty, that we have talked too much about in my opinion, will not only be continued, but will be made greater. We have altruistic ideas toward people, and no nation ever lived that had greater, but there are enough Santo Domingos and Haitis in the world; and there are enough Nicaraguas, enough Guatemalas, enough Costa Ricas, enough Hondurases.

It is not every group of people that can have an independent and isolated sovereignty. Why, I remember that the spot where I was born and where I now live and have lived all my life has been under three great sovereignties—the sovereignty of France, for the lilies of France were once raised above the plains, rivers, and lakes of Minnesota; later under the sovereignty of Spain; her saffron-colored flag was there flung to the breeze; but, thank God, by reason of a Democratic President, in the year 1803 that land came under the sovereignty of the United States, without the consent of anybody living there, but with the eternal approbation and gratitude of every man who has lived there since. We would be a miserable, pitiful spectacle in Minnesota and Iowa and other States out yonder if we were an isolated interior State with a sovereignty of our own. How infinitely superior and grander is our condition, not only respecting material well-being, but respecting freedom and liberty and opportunities of life, that we are a part of the great citizenship of the United States! So I trust my good friend Señor MUÑOZ RIVERA, who is the real leader and statesman of his people, will take this truth to his people, that they will best be serving their own interests if they remain comfortably under the shadow of Uncle Sam's strong right arm [applause]; that their prosperity and their freedom and their liberties that they think dear, and rightfully, will be equally dear to us, and if ever they shall be assailed by a foreign foe they will have the fleet and the Army and the last drop of American blood to protect them. [Applause.]

There are some things we might call attention to specially in reference to this bill. I am afraid somebody will not call attention to them, so I am going to do it. We are going to give them citizenship. Ten years from now they are all going to rise up and call us blessed for so doing. But we are not going to give everyone the right to vote; and they are all going to rise up and bless us for doing that, too. At the present time there is universal suffrage in Porto Rico——

Mr. RIVERA. Yes; there is.

Mr. MILLER of Minnesota. But I am afraid that universal suffrage does not mean the proper exercise of the responsibilities of self-government. The good Governor of Porto Rico, in his testimony before the committee, stated that the motive which moved most of the people to go to the poles was a monetary consideration. Now, that is not peculiar alone to Porto Rico, so I do not want anyone to take any offense at that. There are some spots in the United States where I understand that is the case, but it is not anywhere around where I live. [Laughter.] This bill is going to disfranchise 70 per cent of the citizens of voting age in Porto Rico. In other words, about 30 per cent of the men over 21 years of age in Porto Rico will now be able to vote. I say that not out of a spirit of trying to rub any sore spots, I say that not out of any spirit of trying to make our Democratic brethren uneasy, but I do say that for once the Democrats and Republicans of the House unite in looking facts in the face and acting intelligently in reference to them.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. CANNON. May I just ask one question by unanimous consent?

Mr. TOWNER. Mr. Chairman, I yield five minutes more to the gentleman.

Mr. CANNON. I had hoped that somebody, as we are all busy about many matters of legislation, would tell us about this bill. It seems to me there ought to be time in general debate in which some one would tell us about what this bill does.

Mr. MILLER of Minnesota. The details of the propositions as contained in the bill?

Mr. CANNON. Precisely.

Mr. MILLER of Minnesota. I can do so in a moment. The bill provides for a reorganization of the government of Porto Rico. That government since 1900 has been in essence this: The lower legislative branch has been elected by the people. The upper legislative branch has been appointed by the President of the United States, consisting of 11 men. Prior to the last three years 6 of these were Americans and 5 Porto Ricans. During the last two years 7 of those have been Porto Ricans and 4 Americans. These men, called "the commission," constitute not only the upper legislative branch but serve also as the heads of the executive departments.

This bill reorganizes the government to the extent of creating a full legislature that shall be elected by the citizens of Porto Rico who are qualified to vote; that is, by about 30 per cent of the people. There is a lower house and an upper house; a house of representatives, if you wish to call it that, and a senate. In addition there are six executive officers—heads of departments—that are to be appointed by the President of the United States or by the governor. The auditor of the island is to be appointed by the President and the others by the governor. There is given to the people of Porto Rico a bill of rights, which is the first part of the bill. It is practically a copy of the bill of rights contained in the United States Constitution. Personally I am of the opinion that they have that bill of rights down there now, but anyhow it will do no harm to reenact it here. The chief executive of Porto Rico is to be, as he has been in the past, a governor appointed by the President of the United States. There is continued the Federal court of the island out of deference to the foreign and American business interests, who desire this court to remain, with one Federal judge and one Federal attorney. There is no reorganization made of the other courts, they re-

maining about the same as they have been heretofore, and on the whole they have been satisfactory.

Now, if there is any other question——

Mr. CANNON. Has the governor the veto power?

Mr. MILLER of Minnesota. The governor has the veto power. However, a two-thirds vote on the part of both houses can override the veto, in which event it will go to the President of the United States, who has the absolute veto.

Mr. CANNON. Now, how are the taxes gathered?

Mr. MILLER of Minnesota. There are customs duties which are covered into the treasury of Porto Rico. In addition to that there are taxes from internal-revenue sources, part of which have gone into the United States Treasury and some into the local treasury. There are spent about $7,000,000 a year, and the total receipts are about the same.

Mr. CANNON. Are the internal taxes of the same character as we have in the United States?

Mr. MILLER of Minnesota. I think so.

Mr. CANNON. Excise tax on tobacco, and so forth?

Mr. MILLER of Minnesota. They have some excise taxes. Some of them have gone into the Treasury of the United States, and that is one of the changes made in the bill. Heretofore all the tobacco, mainly cigars that have been consumed in the United States, having been imported from Porto Rico, has paid an internal revenue in the United States, because consumed here. It is proposed in this bill that that sum of money shall go into the treasury of Porto Rico.

Mr. CANNON. There is complete free trade between the United States and the island?

Mr. MILLER of Minnesota. Absolutely.

Mr. CANNON. What is the qualification of a voter? Is it a property qualification?

Mr. MILLER of Minnesota. At the present time; if the bill becomes a law, it will be property or educational.

Mr. CANNON. Property or educational—one or the other. Suppose that this legislative body declines, as it did once before, to agree to appropriations to carry on the government of Porto Rico, what would happen then?

Mr. MILLER of Minnesota. There is a provision in the bill that if the Legislature of Porto Rico refuses to make appropriations for the conduct of the government, the appropriations made in the last preceding year will be reenacted.

The CHAIRMAN. The time of the gentleman from Minnesota has again expired.

Mr. ANTHONY. I would like to ask the gentleman a question.

Mr. CANNON. How much time is there for general debate?

Mr. TOWNER. An hour and a half on a side. I grant two minutes more to the gentleman from Minnesota.

Mr. ANTHONY. I believe the gentleman stated that under this present bill about 70 per cent of the voters would be disfranchised in Porto Rico?

Mr. MILLER of Minnesota. Yes.

Mr. ANTHONY. Is that correct, in view of this paragraph in the report, which says:

No one who had acquired the right to vote before the passage of this bill shall be disturbed in the enjoyment of that right.

Mr. MILLER of Minnesota. I am not responsible for what is in the report. I am simply stating the fact and that it was the statement of Gov. Yager, who said that 70 per cent of the people now in the islands would be disfranchised by the terms of this bill.

Mr. ANTHONY. I am calling the gentleman's attention to the way the report is written. It carries the belief that men who are present voters will not be disturbed in their franchise.

Mr. JONES. What report is that?

Mr. ANTHONY. It is the report handed to me at the Clerk's desk. It is by Mr. JONES, and is dated January 25, 1916.

Mr. JONES. The fact is, as stated by the gentleman from Minnesota [Mr. MILLER], that they have what is called manhood suffrage there now, and the purpose of this bill is to restrict it. That is the fact, anyhow.

Mr. ANTHONY. It is intended to restrict the franchise?

Mr. JONES. Yes.

Mr. HARDY. I would like to ask the gentleman from Virginia what the restrictions are, please?

Mr. JONES. I will say to the gentleman the educational qualification is that they must be able to read or write.

Mr. HARDY. Is there any other qualification?

Mr. JONES. I should have said read and write, and the property qualification is that they must pay some taxes.

Mr. CANNON. Either? Or does it require both?

Mr. JONES. Either.

Mr. JONES. I yield 15 minutes to the gentleman from New York [Mr. LONDON].

Mr. CLARK of Florida. Before doing that, the gentleman has just stated as one of the qualifications for the right to vote that the party must pay some taxes. Are those taxes on realty, or can voters pay taxes on personal property alone?

Mr. JONES. My recollection is that it is on realty, but it has been some time since I had occasion to look it up. I think it is on realty, though. I will look that up.

The CHAIRMAN. The gentleman from New York [Mr. LONDON] is recognized for 15 minutes.

Mr. LONDON. Mr. Chairman and gentlemen, it was a tragedy that we witnessed here a few minutes ago when the Commissioner from Porto Rico addressed this House. I believe that there is no citizenship in the world that is so valuable as the citizenship of the United States. But the idea of a compulsory citizenship is the most absurd thing that has ever been advocated. You can not compel people to love you. You can not compel people who, by their elective representatives, say that they prefer to be citizens of their own island, of their own little country, to accept your citizenship. You can not substitute your attachments and your loves, your affections, your habits, and your mode of thought upon people of another race and of other traditions.

I do not question that American citizenship is the most valuable citizenship. I wish the Porto Ricans were a part of the people of the United States. I hope that some day they will be a part of the United States, an integral part of this Republic; but it should be a matter of choice. It should be accomplished by a vote of the people of Porto Rico, and it should not be forced upon them by a decree of this Congress. There is another thing to which I want to direct your attention, gentlemen, and that is a very serious matter. It is the attempt to disqualify and disfranchise 165,000 voters out of a total of 200,000 voters in Porto Rico.

By what right do you lay your hand on the citizenship or the residents of Porto Rico? It is not a question of conferring the right of franchise. No; it is a question of taking away the right of franchise from three out of every four men in the island of Porto Rico. One hundred and sixty-five thousand people out of two hundred and three thousand voters of Porto Rico will be deprived by your bill of the right to vote.

Is that democracy? It seems that the Democratic Party tries to do everything that is bad in the Republican platform. Whenever the Democrats attempt to do something good they will just find enough bad Democrats to help beat it. You attempted to do something good in the Philippines, and sure enough, there were found enough bad Democrats in their own ranks to make the emancipation of the Filipino impossible. Your Porto Rico bill shows that you are incompetent to govern another nation. For that matter, no nation is competent to govern another nation.

I was amused by the thought expressed by the gentleman from Minnesota [Mr. MILLER] about the right of people to be independent. He tells the Porto Rican people that they have no right to be independent. He is going to decide for them whether liberty is synonymous with independence. He is going to tell what their rights and aspirations are. What sort of democracy is that? What sort of republicanism is that? You talk about $80,000,000 of imports and exports. You talk about $17,000,000 worth of imports and exports having increased to $80,000,000. Who is benefited by it? The people of Porto Rico? Not a bit. The Tobacco Trust has benefited by it. The coffee planters have benefited by it. The external commerce of Porto Rico has increased fourfold. Have wages increased? Do not the workers of Porto Rico rebel to-day against the system of wages that compels them to work 12 hours a day for 45 cents? Why has not the 45 cents wage been quadrupled? Why has not the wage been increased? Not a word has been said about wages here. The commerce is $80,000,000, and Republicans and Democrats seem ready to wipe off the Declaration of Independence and forget every noble word of every statesman of the past when you mention the dollar mark. Eighty million dollars, no more independence, no more rights of nations, but $80,000,000.

I say you assassinate the rights of the Porto Ricans by depriving three-fourths of them of the franchise, and I will tell you what you are accomplishing. You deny to a man the right to express his views through civilized methods, through the medium of the ballot.

[Mr. LONDON here uttered certain words which were subsequently withdrawn.]

Mr. AUSTIN. Mr. Chairman, will the gentleman yield?

Mr. LONDON. One moment.

Mr. AUSTIN. Oh, Mr. Chairman, I call the gentleman to order.

Mr. LONDON. I repeat what I say.

Mr. AUSTIN. Mr. Chairman, I ask that his words be taken down. They are a disgrace to the American Congress.

The CHAIRMAN. The gentleman from New York will suspend speaking.

Mr. AUSTIN. I ask that his words be taken down.

The CHAIRMAN. The stenographer will take his words down.

Mr. AUSTIN. I wish I could make a motion to expel him from this House.

The committee rose; and the Speaker having resumed the chair, Mr. TAYLOR of Colorado, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill (H. R. 9533) to provide a civil government for Porto Rico, and for other purposes, during the course of the debate, in the remarks of the gentleman from New York [Mr. LONDON], the gentleman from Tennessee [Mr. AUSTIN] demanded that the words of the gentleman from New York [Mr. LONDON] be taken down.

The SPEAKER. The Chair will state to the gentleman from New York [Mr. LONDON] that the rule of the House is that in a situation like this the Member who is called to order is required to take his seat. The Clerk will report the words complained of.

The Clerk read the words.

The SPEAKER. It is for the House to determine what to do about this. If any gentleman has a motion to make——

Mr. GARRETT. I move that the gentleman from New York be allowed to proceed in order.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. I do not remember exactly the precedents. Is it in order——

The SPEAKER. The Chair will read the rule for the benefit of the House.

Mr. MANN. Is it in order now to move to postpone consideration of what should be done in this matter?

Mr. TOWNER. May we not have the rule read?

The SPEAKER. The Chair will read the rule:

> If any Member, in speaking or otherwise, transgress the rules of the House, the Speaker shall, or any Member may, call him to order, in which case he shall immediately sit down, unless permitted, on motion of another Member, to explain; and the House shall, if appealed to, decide on the case without debate; if the decision is in favor of the Member called to order, he shall be at liberty to proceed, but not otherwise; and if the case require, he shall be liable to censure or such punishment as the House may deem proper.

The only difference between that and what happens when the supposed offense is in Committee of the Whole is that the decisions provide that the Committee of the Whole shall immediately rise and report to the House what took place. Now, that has been done. The rule that applies to the conduct of the House for its procedure is stated in that rule. The gentleman from Tennessee [Mr. GARRETT] moves that the gentleman from New York [Mr. LONDON] be allowed to proceed in order. In the meantime the gentleman from Illinois [Mr. MANN] asks if this question might not go over for a while.

Mr. MANN. What I asked was whether the right of the House to take action in reference to expressions of that sort may go over under the rule.

The SPEAKER. The Chair thinks that the gentleman could ask unanimous consent that the matter be postponed until a day or an hour certain.

Mr. MANN. I find this in the Manual:

> Or when he has uttered words alleged to be treasonable, the House has proceeded to censure, or other action, although business may have intervened.

Giving a citation to Hinds' Precedents.

The SPEAKER. The Chair does not think there can be any two opinions about that.

Mr. CLARK of Florida. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CLARK of Florida. Will it be in order to move to strike the language from the RECORD?

The SPEAKER. There is one motion pending. If that is defeated, anybody may move to strike the language from the RECORD, or censure the gentleman, or do anything the House pleases.

Mr. CLARK of Florida. I would move to amend the motion of the gentleman from Tennessee by moving that the language be stricken from the RECORD. The motion of the gentleman from Tennessee is that the gentleman from New York be allowed to proceed in order.

The SPEAKER. I know, but it seems to the Chair that the motion the gentleman suggests is not germane to the motion that the gentleman from Tennessee [Mr. GARRETT] makes.

Mr. CLARK of Florida. That could be made later, Mr. Speaker.

The SPEAKER. Why, of course, if the motion of the gentleman from Tennessee [Mr. GARRETT] prevails that is the end of it. If it is defeated, then the other motion is in order.

Mr. SHERLEY. Prior to the vote coming upon the motion of the gentleman from Tennessee, is it not in order to move that the gentleman from New York [Mr. LONDON] be given an opportunity to explain his remarks?

The SPEAKER. It seems to the Chair that if the motion of the gentleman from Tennessee [Mr. GARRETT] prevails, that ends the whole matter.

Mr. SHERLEY. The point is this: In the interest of orderly procedure it might be very desirable, and such a motion as I suggest would afford the opportunity to the person charged with an offense against the rules of the House to explain before the House is required to vote upon the motion as to whether he be permitted to proceed or not.

The SPEAKER. The Chair is inclined to think the gentleman from Kentucky is correct.

Mr. AUSTIN. Mr. Speaker, I wish to move to lay the motion of my colleague from Tennessee [Mr. GARRETT] on the table, in order that I may offer a resolution of censure and to strike from the RECORD the language of the speech.

Mr. MANN. Mr. Speaker, I do not know whether the gentleman from Kentucky [Mr. SHERLEY] had the Manual before him when he made his inquiry of the Chair.

Mr. SHERLEY. I have just found it.

Mr. MANN. But if the Chair will look at the third paragraph of section 444 he will find that the motion to explain takes precedence of the other motion.

Mr. SHERLEY. I have just found it. It occurred to me that that ought to be the rule, and I have found a precedent which holds that it is. I therefore make that motion, that the gentleman from New York [Mr. LONDON] be permitted to explain his remarks.

Mr. GARRETT. I think that is in order, Mr. Speaker.

The SPEAKER. The gentleman from Kentucky [Mr. SHERLEY] moves that the gentleman from New York be permitted to explain his remarks.

Mr. MILLER of Minnesota. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MILLER of Minnesota. Is that motion debatable?

The SPEAKER. It is not. None of these motions is debatable.

Mr. MADDEN. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MADDEN. What has become of the motion of the gentleman from Tennessee [Mr. AUSTIN] to lay on the table?

The SPEAKER. He did make that motion to lay on the table.

Mr. SHERLEY. I make the point of order, Mr. Speaker, that my motion is a preferential motion, and the motion of the gentleman from Tennessee [Mr. AUSTIN] to lay upon the table the motion of the gentleman from Tennessee [Mr. GARRETT] can not come up until after the House has acted upon the motion which I have made.

Mr. GARRETT. The motion to permit the gentleman to explain is a preferential motion.

Mr. MADDEN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MADDEN. The question is whether the motion of the gentleman from Tennessee [Mr. GARRETT] that the gentleman from New York be allowed to proceed in order being followed by a motion of the gentleman from Tennessee [Mr. AUSTIN] to lay the motion on the table, whether another motion can intervene.

Mr. BENNET. If the motion of the gentleman from Tennessee should be entertained and carried it would be futile, because then the motion of the gentleman from Kentucky, being a preferential motion, would be entertained before any motion that the gentleman from Tennessee could make.

The SPEAKER. It seems to the Chair that fair dealing and common sense both would indicate that the motion of the gentleman from Kentucky ought to be voted on first, and the motion of the gentleman from Kentucky is that the gentleman from New York be allowed to explain his remarks.

Mr. AUSTIN. Is the motion debatable?

The SPEAKER. None of these motions is debatable; the rule provides for a summary proceeding.

Mr. DYER. Mr. Speaker, is there any limit to the time of the gentleman from New York if the motion is agreed to?

The SPEAKER. The Chair has heard nothing about any time limit.

Mr. AUSTIN. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. AUSTIN. Will a substitute motion be in order?

The SPEAKER. Not on this proposition.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that the words in question may be again reported as a number of Members were not present.

The SPEAKER. Is there objection to the request of the gentleman from Wyoming? [After a pause.] The Chair hears none, and the Clerk will report the words again.

The Clerk again read the words taken down.

The SPEAKER. The question is on the motion of the gentleman from Kentucky [Mr. SHERLEY].

The question was taken, and the motion was agreed to.

Mr. LONDON. Mr. Speaker and gentlemen, I will be very brief. I am extremely sorry that anything I said is the cause of displeasure on the part of the membership of this House. It is evident that if the remarks as reported contained two or three additional connecting words, that would have removed the objectionable feature of these remarks. As they stand it would seem that I advocated or suggested that when the voters of Porto Rico were deprived of the franchise they would have a right to use violence. The substance of my remarks, the idea that I intended to convey to the House, was this, that in all democratic countries men are given an opportunity to express their ideas, their views, their political convictions by means of the ballot; that in those countries where men are deprived of the opportunity to give expression to their views through the use of the ballot they have to use other means, and they do use other means.

Mr. MILLER of Minnesota. Will the gentleman yield?

Mr. LONDON. I ask the forgiveness of the gentleman, but I do not want to yield at this moment.

Mr. MILLER of Minnesota. I simply wanted to ask, Does the gentleman approve of that course?

Mr. LONDON. One moment, I will yield a little later. Stenographers are my enemies. I talk very fast, I walk up and down so that a stenographer has to be on wheels to follow me so as to understand everything I say. I am not finding fault with the stenographer; for instance, you have an expression here that I am confident I did not use, because it has no meaning at all—the expression, "the right to press his clues through civilized methods." I do not recall, and I am confident I did not use that expression. I probably used the words "express his views." However, the long and short of it is this: I do not advocate the use of violence. I am a Socialist. I believe in political activity. The greater part of my life has been spent in fighting the advocates of the use of violence. You have heard me again and again on the floor denounce the use of violence. I am a great believer in intelligence and love. Love, intelligence, and education are the great powers—the great forces for the improvement of mankind.

Mr. AUSTIN. If that is the gentleman's view, why should he used the words "pistol" and "the knife of the assassin?"

Mr. LONDON. You told—they will be told that they have a right to use it, there will be men who will tell them, and the whole thing will be very clear. I do not want the House to understand for one moment that I advocated the use of violence. I intended to impress on the House the importance of retaining democratic principles.

Mr. HARDY. Will the gentleman yield? Why does not the gentleman ask to cut the thing short—that if anything in his remarks bears that interpretation he desires to withdraw it?

Mr. LONDON. I not only ask for it, but I express my deep sorrow that any Member of the House should have understood me as advocating the use of violence.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. GARNER. Mr. Speaker, will the gentleman yield?

The SPEAKER. To whom does the gentleman from New York yield?

Mr. LONDON. To the gentleman from Illinois.

Mr. MANN. What the gentleman said was perfectly patent to every one. He said what the stenographer reports him to have said, and if he wants to withdraw it, why does he not withdraw the statement and take that to himself instead of putting it upon the stenographer?

Mr. LONDON. I am not putting any blame upon the stenographer. I say that stenographers find it extremely difficult to follow me.

Mr. MANN. But in this case, if the gentleman will permit, we do not have to rely upon the stenographer. Plenty of Members of the House heard the gentleman, and that is the reason his words were taken down. Why does he not disavow the intent?

Mr. LONDON. I said very clearly that if this language conveys that thought, I am extremely sorry that it is a part of the RECORD.

Mr. GARNER. Mr. Speaker, will the gentleman yield now?

Mr. LONDON. In the absence of the words "they will be told."

The SPEAKER. Does the gentleman yield?

Mr. LONDON. I yield to the gentleman from Texas.

Mr. GARNER. I did not happen to be in the Hall and did not hear the gentleman's statement, but the gentleman says now that the basis of his statement as read from the desk was to the effect that people who can not vote in Porto Rico will be told so and so. If he made that statement——

Mr. AUSTIN. But he never made it.

Mr. MANN. That is not what he said.

The SPEAKER. The Chair would like to ask the gentleman from New York a question. Does he desire to withdraw from the CONGRESSIONAL RECORD the words complained of?

Mr. LONDON. I do.

Mr. GARNER. That settles it, then, Mr. Speaker.

The SPEAKER. It would seem so to the Chair.

Mr. AUSTIN. I think the gentleman ought to apologize.

The SPEAKER. He has already apologized.

Mr. LONDON. I think I have apologized.

Mr. AUSTIN. But he has tried to put it off on the official stenographer. He has been attempting to put the responsibility on the stenographer.

Mr. LONDON. Not at all.

The SPEAKER. The truth is that a great many of us put responsibilities on stenographers and newspaper reporters when we have no business to do it. The remarks that the gentleman from Tennessee [Mr. AUSTIN] objected to will be stricken from the CONGRESSIONAL RECORD, and that being the case, the Chair will put the motion of the gentleman from Tennessee [Mr. GARRETT] that the gentleman from New York be permitted to proceed in order. Does the gentleman from Tennessee [Mr. AUSTIN] withdraw his motion to table the motion of the gentleman from Tennessee [Mr. GARRETT]?

Mr. AUSTIN. Mr. Speaker, if the gentleman from New York will sin no more, I am willing to do it. [Laughter.]

The SPEAKER. The Chair can not guarantee that. The gentleman from Tennessee [Mr. AUSTIN] withdraws his motion to table the motion of his colleague, and the question is on the motion of the gentleman from Tennessee [Mr. GARRETT] to permit the gentleman from New York to proceed in order.

Mr. MILLER of Minnesota. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MILLER of Minnesota. Have the words complained of been stricken from the RECORD?

The SPEAKER. They have.

Mr. MILLER of Minnesota. Does it not require unanimous consent?

The SPEAKER. It does not.

Mr. CANNON. Does the apology that the gentleman makes to the House for the use of the words stand in the RECORD?

The SPEAKER. Yes; that stands. What the gentleman said when he was on the floor the last time stands, and what he said when he was up the other time goes out of the RECORD. The question is on the motion of the gentleman from Tennessee [Mr. GARRETT], that the gentleman from New York be permitted to proceed in order.

The question was taken; and on a division (demanded by Mr. MOORES of Indiana) there were—ayes 76, noes 18.

So the motion was agreed to.

The SPEAKER. The committee will resume its session.

The committee resumed its session.

The CHAIRMAN (Mr. TAYLOR of Colorado). The gentleman from New York has six minutes remaining.

Mr. LONDON. Mr. Chairman, by establishing the principle that only one-fourth of the people of Porto Rico shall be entitled to the franchise you reestablish the principle that property is entitled to a vote and not the human being. Instead of each man being entitled to a vote, you will have property recognized as the legal entity, as the political unit of Porto Rico. You know that after the adoption of the Constitution in 1787 many American States were for 50 years struggling with the reactionary elements to remove the property qualifications, and that as late as 1842, in the American State of Rhode Island, there was a rebellion known as the Dorr's rebellion. Do not be terrified by the word "revolution" again, please. In 1848 it was found that in the State of Rhode Island, owing to an old primogeniture law, only landlords and their first-born sons had a right to vote, so that the greater part of the population of the State of Rhode Island did not enjoy the franchise, and a rebellion had to take place before the franchise was conferred upon every citizen of the State of Rhode Island. You are

making a mistake by forcing upon the Porto Ricans citizenship which they do not want. Let us say they are not ripe for it; let us say they are not intelligent enough for it; let us say that they have not learned to love you as much as you deserve. The fact is that all political parties in Porto Rico object to compulsory citizenship. It is a serious error that you are now attempting. Next, you are sowing the seeds of discontent by depriving three-fourths of the population of Porto Rico of the right to give expression to their discontent through the legitimate method of the ballot.

What other methods will they find to translate their views into? What other means will they possess of giving expression to their desires, to their wishes and political convictions? Why force upon Porto Rico reactionary laws against which your own fathers contended for 50 years after the establishment of this Republic? It is a very serious mistake that you are committing, and it is to be regretted that this earnest appeal of mine on behalf of the people of Porto Rico should have been interrupted by an unpleasant incident.

Mr. AUSTIN. Will the gentleman yield for a question?

Mr. LONDON. Yes.

Mr. TRIBBLE. Does the gentleman mean to say by that statement that the House has made a mistake in stopping the gentleman and having those words stricken out?

Mr. LONDON. On the contrary, the House has expressed what was in my own heart.

Mr. AUSTIN. The gentleman favors giving universal franchise to everybody in Porto Rico, whether educated or property holders or not?

Mr. LONDON. I do.

Mr. AUSTIN. Does the gentleman believe in that same thing in Mississippi, Louisiana, and South Carolina?

Mr. LONDON. I believe every human being——

Mr. AUSTIN. Has the gentleman a different rule now——

Mr. LONDON. One moment. This is a problem which I can not go into in the one minute I have. The problem was made clear by the gentleman who represents Porto Rico when he said that in Porto Rico the colored vote is comparatively insignificant and that the relations between the races are more liberal there than in other sections of the country.

Mr. AUSTIN. Does the gentleman believe in that principle?

Mr. LONDON. I believe in the principle that every human being——

Mr. AUSTIN. Should have the right to vote?

Mr. LONDON. Has the right that any other human being has under the same circumstances and under the same conditions.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TOWNER. Mr. Chairman, I yield 20 minutes to the gentleman from Ohio [Mr. FESS]. [Applause.]

Mr. JONES. Mr. Chairman, I will ask the gentleman from Ohio if he will yield just for a moment in order to enable me to make a statement?

Mr. FESS. Certainly.

Mr. JONES. Mr. Chairman, I merely desire to make a statement. The gentleman from Kansas [Mr. ANTHONY] a few moments ago asked the gentleman from Minnesota [Mr. MILLER] as to this language, which he said was to be found in the report of the committee:

*No one who had acquired the right to vote before the passage of this bill will be disturbed in the enjoyment of that right.*

He asked the gentleman from Minnesota if that statement was in cognizance with the provisions of the bill, and the gentleman from Minnesota replied that he was not responsible for what was in the report. I asked the gentleman from Kansas to what report he referred, and he replied it was in the report accompanying this bill. Now, I was very much surprised at that statement, because I had written the report, and upon examination I find that the language he quoted is to be found in a report made two years ago. It is true that a part of that report is incorporated in the report on this bill. The bill of two years ago contained educational and property qualifications, and provided also that those who had exercised the right of suffrage should be permitted to continue to do so. That language of the bill of two years ago is not to be found in this bill.

Mr. MANN. Will the gentleman yield?

Mr. JONES. I will.

Mr. MANN. In the absence of the gentleman from Kansas—because I have a note made of this same matter—I find this language in large type in this report:

*The other changes made in the bill reported by this committee in the Sixty-third Congress are of such minor importance that it is not deemed necessary to specifically call attention to them. The report upon that bill, hereinbefore referred to and which is made a part of this report, taken in connection with the foregoing, sufficiently fully sets forth the changes which this bill, if enacted into law, will effect in the present organic law of Porto Rico.*

Then occurs this language, to which reference has been made:

*No one who had acquired the right to vote before the passage of this bill will be disturbed in the enjoyment of that right.*

Was not the gentleman from Kansas justified in thinking that that was a part of the report on this bill when it stated so and when it stated that there were only minor changes, and now the gentleman says 70 per cent are to be disfranchised? Is that a minor change?

Mr. JONES. Mr. Chairman, I think the gentleman from Kansas was justified in drawing that conclusion, but I wanted to explain to the committee that the reference did not apply to this bill. Possibly if this report had been a little more carefully drawn attention would have been called to that fact, but it is a fact that the language in question was in the report of two years ago which is incorporated in this report, and that the provision of the bill of 1914 to which it referred is not contained in this bill. I think the gentleman is mistaken in saying that under the educational qualifications of this bill 70 per cent of the present voters in Porto Rico will be disfranchised.

Mr. MANN. I did not make the statement. That was the statement which the gentleman from Minnesota [Mr. MILLER] made, and in which I understood the gentleman from Virginia to acquiesce. I do not know.

Mr. JONES. The Delegate from Porto Rico [Mr. RIVERA], I think, said some 30 per cent. I think that is more nearly correct.

Mr. MANN. I spoke of it because I noticed it in the report.

Mr. JONES. I simply wish to add that the gentleman from Florida [Mr. CLARK] asked me what the property qualification was. The property qualification is that the voter must pay at least $3 of taxes. It may be upon personal property, real property, or any other sort of property, but it must amount to $3.

I thank the gentleman from Ohio for permitting me to make this statement in his time.

The CHAIRMAN. The gentleman from Ohio [Mr. FESS] is recognized for 20 minutes.

Mr. FESS. Mr. Chairman, I want to address the committee upon the principles involved in this bill in the light of the history of our own country in this sort of legislation. I was greatly interested in reading a statement years ago of the great English historian Macaulay, in which he stated there was not a single virtue of the American system of government that we had not borrowed from the English House of Commons. Of course, I do not agree with that statement, and any student of our system of government must see its faulty meaning. A separation of the three departments of our Government is one of the things that we did not follow Great Britain upon. And our government of Territories is another one of the things that we did not follow the mother country upon. The truth about the matter is Great Britain has outlined her more recent colonial policies from our plan that is announced in the ordinance of 1787. That ordinance was adopted by the Second Continental Congress before the Federal Constitution was adopted, and is the plan of government that we have universally followed, with one exception, in the government of territory. In the Federal Constitution—I think it is the third section of Article IV—there is specific authority given for the making of needful rules for the disposition and the government of a Territory. Of course, we contemplated the territory that is now known as the Northwest Territory and the Southwest Territory. Out of the former we carved five States. Out of the latter we carved four. In other words, there were nine States carved originally out of the territories specifically in mind of the Federal Constitution makers when they said we had authority to make all needful rules governing Territories.

But in 1803 we added to our territory in the purchase of Louisiana. This is a new phase of government. President Jefferson at that time was really the responsible head for the purchase of that territory. You know he said that he stretched the Constitution until it almost cracked, in order to secure the territory, and the Government was of his order. The first was the appointment of governor and 13 legislators, or councilmen, all appointed by the President, and they governed without any reference whatever to the will of those who were governed. And, secondly, it was substituted for another form of appointment of a governor and three judges—called judges, but who acted as the legislature. And then in 1810, seven years after the purchase, we had the first modern form of Territorial gov-

ernment. And in 1812 the State of Louisiana was admitted. But here was the first trial of the government in our country of a territory purchased or acquired after the Federal Constitution was adopted, and the form of government was not like the government that Great Britain had exercised over us and other colonies prior to our independence.

Then the next move was in 1819, when Florida came. We first gave her a Territorial form of government, very largely modeled over the plan of the ordinance of 1787, and in 1845 admitted her into the Union. In the same year Texas came into the Union. It was the first time in our history where by an act of Congress we made citizens of our country by wholesale, without requiring individuals to meet the conditions that are required by our specific naturalization laws. But Texas was not given by this Nation a Territorial form of government, but at once a State form of government, when she was admitted. We did not say "admitted," but "annexed." This was the second instance of giving statehood without an enabling act. In 1846, the year after the annexation of Texas, we occupied the Oregon Territory and provided a government in which we followed the plan of the ordinance of 1787, which had served us as our model for all Territorial government up to that time. We did exactly the same thing with the Mexican cessions of 1848, out of which we carved California, Nevada, Utah, New Mexico, and parts of Colorado. We followed in the same order our government of Alaska, that came to us in 1867, first the unorganized territory, and the next natural step was the organized Territory.

Now, my friends, when Lord Macaulay stated that there was not an item in our system that we had not borrowed from Great Britain that statement surely is far afield of the fact, because the one thing in which we are more distinguished and differentiated from the mother country is the manner of the government of these outlying possessions. Up to the time I have been speaking—the purchase of Alaska—we had not anything beyond our immediate contiguous territory, except Alaska. The dominant population in all save parts of the Mexican cessions was Anglo-Saxon. In 1878, William E. Gladstone wrote an article which was published in the North American Review under the caption "Our kin beyond the sea," in which he said that the daughter had passed the mother in a canter, referring to the United States and Great Britain. He also declared as the British constitution was the most subtle instrument ever adopted by a people, so the American Constitution was the most wonderful instrument stricken off by the brain or purpose of man at any one time.

That was in 1878, soon after the Civil War closed. And if you read the article you will notice that he favorably comments upon our plan of the government of a Territory as outlined by the ordinance of 1787. It was in 1832, and finally in 1835, I think, Lord Durham recommended and England adopted the form of colonial government for Great Britain as applied in modern years. It was first applied to Canada. In the Lord Durham Act the principles of the ordinance of 1787 are very largely respected with the exception, of course, of delegate representation in vogue in our Territorial plan. And to-day the self-government elements in Canada and Australia and New Zealand and South Africa are very largely copied after the form adopted in our country in 1787. That is, the all-but-complete participation of the people in their own government in the British colonies is the dominant note of the famous ordinance.

Now, what is the Porto Rican act, the one that we are now discussing? It is an attempt to do for Porto Rico, the first people that are not our own in that they are not Anglo-Saxon—and Anglo-Saxon seems to be the people who have distinguished themselves in local government and in some sort of a solution of colonial government—the first time our country has been called upon to do for a people not speaking our language—and are trying to give to the people of that island not only the best form of local self-government that we can outline, but at the same time give them United States citizenship, a thing that I would suppose they would very keenly want, because it carries with it all the dignity and honor and power that go with an American citizen. That ought to amount to a great deal. Our insular possessions, the fruits of the Spanish-American War, involved new questions of territorial government. They brought to us new peoples, unused to the principles and practices of local self-government. The problem was how to apply our constitutional authority over Territories to distant possessions, not similar to our former territorial problems. This problem, so far as Porto Rico is concerned, is not producing a partisan division of our people as does the Philippine problem. We are here attempting to bring the people of this island into the closest possible relation with our own people and Government.

Every step of this bill, so far as I know, building upon the same plan as the Olmsted bill, is an enlargement of the freedom of these people and the participation in their local government of these people who were made free in 1898, when we drove out of the western world the country that had them under subjection.

There have been some questions as to whether we are going too far—an elective house; an elective senate;—true, an appointive governor; true, legislation that might be vetoed by the governor, but overcome by a two-thirds vote of the legislature; and when that is done it finally reverts back to the President of the United States, because we must be responsible for the legislation in a certain degree. The same thing might be said of the manner of revenue and finance. We keep our hands on that. The President appoints the auditor for the islands.

Mr. REAVIS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Nebraska?

Mr. FESS. Yes.

Mr. REAVIS. As I understand the provisions of the bill, the President retained the right of ultimate veto.

Mr. FESS. Yes.

Mr. REAVIS. Does that obtain in the absence of a veto by the local governor?

Mr. FESS. No; it does not.

Mr. REAVIS. So that if the governor approves the legislation, the President has no right of ultimate veto?

Mr. FESS. All laws are reported to Congress, but the proposed act of legislation first comes to the governor, and if the governor signs it that ends it. It becomes a law. If the governor vetoes it and it is overridden in his veto, then it comes to the President, who has an absolute veto. But under no other circumstances does it come to the President.

Mr. REAVIS. What is the power of Congress upon the reference of legislation to the Congress?

Mr. FESS. The legislation by an autonomous government must be reported to Congress for approval or disapproval, if Congress cares to take action upon it. Of course it goes without saying that Congress will not take action unless something is brought up to be acted upon.

I look into the steps of this legislation with a great deal of pleasure from this standpoint, that it is an attempt to extend local self-government, such as we believe here is the ultimate form, to these people in the islands, with no restriction upon them whatever, except the ones that I have named.

As to the details of the bill, I prefer to leave them to be considered under the five-minute rule when they will be fully considered by the committee. As to the possibilities of perfect satisfaction ultimately on the part of the people of the islands, I think that that is very easily within the possibility, and I may say probability. The proposal to extend citizenship to these people is the one significant feature of this bill. I have tried to find whether there has been any serious opposition to extending it to the people of Porto Rico. There is not any serious opposition that I know of, save this one objection that has been offered, that you are trying to force citizenship upon the Porto Ricans. I am sure that is not serious when once understood. This bill does not require the Porto Rican to take an oath of allegiance to make him a citizen. We citizenize him precisely as we citizenize the man from Texas, but if he frets under it and does not want to be a citizen, then it is his privelege to take the step provided in this bill, to say that he does not want to be a citizen; and when he does not, he is not a citizen, not because we forbid it but because it is his option and he chooses to step out of it.

Mr. REILLY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Wisconsin?

Mr. FESS. Yes.

Mr. REILLY. What would be his status as to citizenship if he should follow out the step and refuse to be a citizen?

Mr. FESS. It would be a question whether he would be a citizen of Porto Rico or "a man without a country." My opinion would be—although I find that it is not the opinion of those who were heard in the hearing—that you do not destroy the citizenship of the place where he lives any more than you destroy my citizenship of Ohio. I have a double citizenship. I am a citizen of the United States and I am a citizen of Ohio. The man who is in Alaska in a sense has a double citizenship. He is a citizen of the United States and a citizen of Alaska.

Now, they say that technically that is true, because citizenship is a matter defined by the Constitution, and it says:

All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens.

Now, these people were not born in the United States. They are, however, subject to the jurisdiction of the United States. They to-day are not citizens of the United States because they are not born in the United States; but they will be made citizens by this law unless they decline to be citizens, and if they decline I do not know whether you could say they are citizens of a country that is a part of the United States or not. At any rate, the resident of Porto Rico who is now a citizen of a foreign country would not by this law be denied that citizenship.

Mr. REILLY. Was any parallel case called to the attention of the committee?

Mr. FESS. No; there is no parallel in our history to this particular case.

Mr. REILLY. One more question.

Mr. FESS. Very well.

Mr. REILLY. Does the Porto Rican want this sort of citizenship?

Mr. FESS. I would rather have the Commissioner indicate that.

Mr. REILLY. What has been presented to the committee that would indicate that?

Mr. FESS. It has been indicated to the committee that citizenship is desirable, but it is a question whether they want it in this way. This is wholesale legislation of citizen making, covering the whole people of the island, as we did the people of Texas, making them citizens by an act. If they do not want to be, there is a way open; but some of them most naturally seem to feel that that is not the proper way to proceed, just as has been suggested on the question of voting, that if they have the ballot once we are not justified in taking the ballot away from them by the adoption of new requirements. This question was quite fully gone into by the committee after hearing statements covering the local situation from those now in the island and responsible for good order.

I think that when we realize the responsibility which we are assuming to make that island self-governing we will realize that intelligence in the electorate is one of the essential things, and for that reason that has been required.

Mr. HELGESEN. Does the gentleman think that a man can be a citizen of Porto Rico without being a citizen of the United States?

Mr. FESS. I can be a citizen of the United States and not a citizen of Porto Rico. I do not know that I caught the gentleman's question.

Mr. HELGESEN. Can you be a citizen of Ohio and not be a citizen of the United States?

Mr. FESS. I think not.

Mr. HILL. Not since the fourteenth amendment you can not.

Mr. HELGESEN. Does not the gentleman think that will apply to Porto Rico just as well?

Mr. FESS. What was the question of the gentleman from North Dakota?

Mr. HELGESEN. I asked the gentleman if he contended that a man could be a citizen of Porto Rico without being a citizen of the United States?

Mr. CANNON. If the gentleman will allow me——

Mr. FESS. Just a moment. The gentleman from North Dakota wanted to know whether under this law a man could be a citizen of Porto Rico and not be a citizen of the United States.

Mr. HELGESEN. After the passage of this law.

Mr. FESS. I think he can, although the statement has been made before the committee that he can not. They are now citizens of Porto Rico and not of the United States.

Mr. MANN. Oh, there is no doubt about that. They are not citizens of the United States.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. JONES. I yield to the gentleman from Illinois [Mr. CANNON] 10 minutes.

[Mr. CANNON addressed the committee. See Appendix.]

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had disagreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10385) making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917, further insists upon its amendments, asks a further conference with the House on the disagreeing votes thereon, and had appointed Mr. ASHURST, Mr. MYERS, and Mr. CLAPP as the conferees on the part of the Senate at the further conference.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 2986. An act to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes.

CIVIL GOVERNMENT FOR PORTO RICO.

The committee resumed its session.

Mr. TOWNER. Mr. Chairman, I yield six minutes to the gentleman from North Dakota [Mr. YOUNG].

Mr. YOUNG of North Dakota. Mr. Chairman, legislation for Porto Rico or the Philippines can not be intelligently considered without reading the treaty of Paris. A few days ago the gentleman from Tennessee [Mr. GARRETT] made the statement that there were no specific guaranties made to Spain or to the citizens of Spain in the treaty of Paris, excepting the article respecting copyrights and some other provisions limited to 10 years. That was a most surprising statement. In Article IX there are specific guaranties made to the citizens of Spain, but in a larger sense every guaranty in this treaty is made to the citizens of Spain, because Spain was a party to the treaty, and for that reason every guaranty found in it is a guaranty made specifically to the citizens of Spain. The treaty, as you know, was concluded in Paris on December 10, 1898, and its ratification was advised by the Senate February 6, 1899. It will be remembered, too, that it was necessary to have Democratic votes in the Senate in order to ratify it, and that Hon. W. J. Bryan came to the Capitol to urge its ratification. The treaty was proclaimed by the President on April 11, 1899. Five distinguished citizens represented the United States—Judge William R. Day, Senator Cushman K. Davis, Senator William P. Frye, Judge George Gray, and Ambassador Whitelaw Reid, and there were also five distinguished gentlemen who represented the Kingdom of Spain.

Article I contained this provision:

Spain relinquishes all claim of sovereignty over and title to Cuba. And as the island is, upon its evacuation by Spain, to be occupied by the United States, the United States will, so long as such occupation shall last, assume and discharge the obligations that may under international law result from the fact of its occupation—

I call particular attention to the fact that our guaranties in respect to Cuba were limited to the time of our occupation, and every other guaranty found in the treaty has no limit of time whatsoever.

Article II provides for the ceding of Porto Rico and Guam. Article III provides for the cession of the Philippine Islands. Article IV provides that the United States will for a term of 10 years admit Spanish ships and merchandise to the ports of the Philippine Islands on the same terms as ships and merchandise of the United States. Article V relates to the return of Spanish soldiers.

Mr. MILLER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of North Dakota. Certainly.

Mr. MILLER of Minnesota. Suppose we had listened to the demand of the candidate for President in 1900, Mr. Bryan, had he been elected, and given independence to the Philippine Islands, could we have carried out that guaranty that Spanish ships for 10 years should have free access to the ports of the Philippine Islands?

Mr. YOUNG of North Dakota. Absolutely not. Article VI provides for the exchange of prisoners. Article VII provides for the mutual relinquishment of all claims for indemnity against citizens between our country and their country. Article VIII relates to the relinquishment of public buildings and property in the ceded territory; and here is Article IX, which contains the bill of rights. This is the most important article in the treaty and contains, as will be observed, specific guaranties to the citizens of Spain not only if they become citizens of this country, but if they retain their Spanish citizenship. It reads:

Spanish subjects, natives of the peninsula, residing in the territory over which Spain by the present treaty relinquishes or cedes her sovereignty, may remain in such territory or may remove therefrom, retaining in either event all their rights of property, including the right to sell or dispose of such property or of its proceeds; and they shall have the right to carry on their industry, commerce, and professions, being subject in respect thereof to such laws as are applicable to other foreigners. In case they remain in the territory they may preserve their allegiance to the Crown of Spain by making, before a court of record, within a year from the date of the exchange of rati-

fications of this treaty, a declaration of their decision to preserve such allegiance; in default of which declaration they shall be held to have renounced it and to have adopted the nationality of the territory in which they may reside.

In that connection I wish to say, in addition to the very clear statement made by the gentleman from Ohio, Dr. FESS, that the inhabitants of Porto Rico are not having citizenship forced upon them, that they had the opportunity for one year after the signing of this treaty to retain their Spanish citizenship. I think it is quite important to keep that in mind. They may now renounce their citizenship to the United States if they wish to do so, and there was at least one year within which they might have retained their citizenship in Spain.

Mr. HUDDLESTON. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of North Dakota. Certainly.

Mr. HUDDLESTON. That applies to the Spanish-born persons alone, does it not, and not to Porto Rican born?

Mr. YOUNG of North Dakota. I am not prepared to say that it does.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. YOUNG of North Dakota. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing the entire treaty of Paris and also the protocol which preceded it and the subsequent treaty by which the island of Cagayan Sulu and other small islands were purchased from Spain.

The CHAIRMAN. The gentleman from North Dakota asks unanimous consent to extend his remarks in the RECORD by printing certain documents. Is there objection?

There was no objection.

Mr. MILLER of Minnesota. Mr. Chairman, I ask unanimous consent that the gentleman may have the first five minutes he otherwise would have after the bill is taken up for amendment.

The CHAIRMAN. The Chair thinks that that would be establishing a bad precedent.

Mr. STAFFORD. The Chair can not entertain such a motion.

Mr. MILLER of Minnesota. But the Chair did entertain such a motion.

Mr. MURRAY. Oh, that was for Uncle JOE, and anything goes as to him.

Mr. MILLER of Minnesota. I ask unanimous consent that time for general debate be extended so that the gentleman from North Dakota may have five more minutes.

The CHAIRMAN. The time was fixed by the House, and the committee has no power to extend it.

The treaties referred to are as follows:

1898.

PROTOCOL OF AGREEMENT EMBODYING THE TERMS OF A BASIS FOR THE ESTABLISHMENT OF PEACE BETWEEN THE UNITED STATES AND SPAIN.

*Signed August 12, 1898.*

ARTICLES.

I. Relinquishment of title to Cuba.
II. Cession of Porto Rico, etc.
III. Occupation of Manila.
IV. Evacuation by Spain.
V. Appointment of commissioners.
VI. Hostilities to cease.

PROTOCOL.

William R. Day, Secretary of State of the United States, and His Excellency Jules Cambon, ambassador extraordinary and plenipotentiary of the Republic of France at Washington, respectively possessing for this purpose full authority from the Government of the United States and the Government of Spain, have concluded and signed the following articles, embodying the terms on which the two Governments have agreed in respect to the matters hereinafter set forth, having in view the establishment of peace between the two countries; that is to say:

ARTICLE I.

Spain will relinquish all claim of sovereignty over and title to Cuba.

ARTICLE II.

Spain will cede to the United States the island of Porto Rico and other islands now under Spanish sovereignty in the West Indies, and also an island in the Ladrones to be selected by the United States.

ARTICLE III.

The United States will occupy and hold the city, bay, and harbor of Manila, pending the conclusion of a treaty of peace which shall determine the control, disposition, and government of the Philippines.

ARTICLE IV.

Spain will immediately evacuate Cuba, Porto Rico, and other islands now under Spanish sovereignty in the West Indies; and to this end each Government will, within 10 days after the signing of this protocol, appoint commissioners, and the commissioners so appointed shall, within 30 days after the signing of this protocol, meet at Havana for the purpose of arranging and carrying out the details of the aforesaid evacuation of Cuba and the adjacent Spanish islands; and each Government will, within 10 days after the signing of this protocol, also appoint other commissioners, who shall, within 30 days after the signing of this protocol, meet at San Juan, in Porto Rico, for the purpose of arranging and carrying out the details of the aforesaid evacuation of Porto Rico and other islands now under Spanish sovereignty in the West Indies.

ARTICLE V.

The United States and Spain will each appoint not more than five commissioners to treat of peace, and the commissioners so appointed shall meet at Paris not later than October 1, 1898, and proceed to the negotiation and conclusion of a treaty of peace, which treaty shall be subject to ratification according to the respective constitutional forms of the two countries.

ARTICLE VI.

Upon the conclusion and signing of this protocol, hostilities between the two countries shall be suspended, and notice to that effect shall be given as soon as possible by each Government to the commanders of its military and naval forces.

Done at Washington in duplicate, in English and in French, by the undersigned, who have hereunto set their hands and seals, the 12th day of August, 1898.

[SEAL.] WILLIAM R. DAY.
[SEAL.] JULES CAMBON.

1898.

TREATY OF PEACE.

(Federal cases: Oteiza *v.* Jacobus (136 U. S., 330), Duly *v.* U. S. (182 U. S., 222; 183 U. S., 151), Delima *v.* Bidwell (182 U. S., 1), Goetze *v.* U. S. (182 U. S., 221; 103 Fed. Rep., 72), Armstrong *v.* U. S. (182 U. S., 243), Downes *v.* Bidwell (182 U. S., 244), Hauns *v.* New York and Porto Rico Company (182 U. S., 392), Crossman *v.* U. S. (182 U. Rep., 688), De Canevara *v.* Brooke (135 Fed. Rep., 144).)

*Concluded at Paris December 10, 1898; ratification advised by the Senate February 6, 1899; ratified by the President February 6, 1899; ratifications exchanged April 11, 1899; proclaimed April 11, 1899.*

ARTICLES.

I. Relinquishment of Cuba.
II. Cession of Porto Rico, Guam, etc.
III. Cession of Philippine Islands.
IV. Spanish trade with the Philippines.
V. Return of Spanish soldiers from Manila; evacuation of Philippines and Guam.
VI. Release of prisoners.
VII. Relinquishment of claims.
VIII. Property relinquished and ceded.
IX. Property and civil rights of persons in ceded territory.
X. Religious freedom.
XI. Legal rights in ceded or relinquished territory.
XII. Determination of pending judicial proceedings.
XIII. Privileges of copyrights and patents preserved in ceded territories.
XIV. Consular privileges.
XV. Mutual privileges of shipping charges.
XVI. Obligations of Cuba.
XVII. Ratification.

The United States of America and Her Majesty the Queen Regent of Spain, in the name of her august son Don Alfonso XIII, desiring to end the state of war now existing between the two countries, have for that purpose appointed as plenipotentiaries:

The President of the United States,

William R. Day, Cushman K. Davis, William P. Frye, George Gray, and Whitelaw Reid, citizens of the United States;

And Her Majesty the Queen Regent of Spain,

Don Eugenio Montero Rios, president of the senate, Don Buenaventura de Abarzuza, senator of the Kingdom and ex minister of the Crown; Don José de Garnica, deputy to the Cortes and associate justice of the supreme court; Don Wenceslao Ramirez de Villa-Urrutia, envoy extraordinary and minister plenipotentiary at Brussels; and Don Rafael Cerero, general of division;

Who, having assembled in Paris, and having exchanged their full powers, which were found to be in due and proper form, have, after discussion of the matters before them, agreed upon the following articles:

ARTICLE I.

Spain relinquishes all claim of sovereignty over and title to Cuba.

And as the island is, upon its evacuation by Spain, to be occupied by the United States, the United States will, so long as such occupation shall last, assume and discharge the obligations that may under international law result from the fact of its occupation, for the protection of life and property.

ARTICLE II.

Spain cedes to the United States the island of Porto Rico and other islands now under Spanish sovereignty in the West Indies, and the island of Guam (in the Marianas or Ladrones).

ARTICLE III.

Spain cedes to the United States the archipelago known as the Philippine Islands, and comprehending the islands lying within the following lines:

A line running from west to east along or near the twentieth parallel of north latitude, and through the middle of the navigable channel of Bachi, from the one hundred and eighteenth (118th) to the one hundred and twenty-seventh (127th) degree meridian of longitude east of Greenwich, thence along the one hundred and twenty-seventh (127th) degree meridian of longitude east of Greenwich to the parallel of four degrees and forty-five minutes (4° 45′) north latitude, thence along the parallel of four degrees and forty-five minutes (4° 45′) north latitude to its intersection with the meridian of longitude one hundred and nineteen degrees and thirty-five minutes (119° 35′) east of Greenwich, thence along the meridian of longitude one hundred and nineteen degrees and thirty-five minutes (119° 35′) east of Greenwich to the parallel of latitude seven degrees and forty minutes (7° 40′) north, thence along the parallel of latitude of seven degrees and forty minutes (7° 40′) north to its intersection with the one hundred and sixteenth (116th) degree meridian of longitude east of Greenwich, thence by a direct line to the intersection of the tenth (10th) degree parallel of north latitude with the one hundred and eighteenth (118th) degree meridian of longitude east of Greenwich, and thence along the one hundred and eighteenth (118th) degree meridian of longitude east of Greenwich to the point of beginning.

The United States will pay to Spain the sum of twenty million dollars ($20,000 000) within three months after the exchange of the ratifications of the present treaty.

ARTICLE IV.

The United States will, for the term of 10 years from the date of the exchange of the ratifications of the present treaty, admit Spanish ships and merchandise to the ports of the Philippine Islands on the same terms as ships and merchandise of the United States.

ARTICLE V.

The United States will, upon the signature of the present treaty, send back to Spain, at its own cost, the Spanish soldiers taken as prisoners of war on the capture of Manila by the American forces. The arms of the soldiers in question shall be restored to them.

Spain will, upon the exchange of the ratifications of the present treaty, proceed to evacuate the Philippines, as well as the island of Guam, on terms similar to those agreed upon by the commissioners appointed to arrange for the evacuation of Porto Rico and other islands in the West Indies, under the protocol of August 12, 1898, which is to continue in force till its provisions are completely executed.

The time within which the evacuation of the Philippine Islands and Guam shall be completed shall be fixed by the two Governments. Stands of colors, uncaptured war vessels, small arms, guns of all calibers, with their carriages and accessories, powder, ammunition, live stock, and materials and supplies of all kinds, belonging to the land and naval forces of Spain in the Philippines and Guam, remain the property of Spain. Pieces of heavy ordnance, exclusive of field artillery, in the fortifications and coast defenses, shall remain in their emplacements for the term of six months, to be reckoned from the exchange of ratifications of the treaty; and the United States may, in the meantime, purchase such material from Spain, if a satisfactory agreement between the two Governments on the subject shall be reached.

ARTICLE VI.

Spain will, upon the signature of the present treaty, release all prisoners of war, and all persons detained or imprisoned for political offenses, in connection with the insurrections in Cuba and the Philippines and the war with the United States.

Reciprocally the United States will release all persons made prisoners of war by the American forces, and will undertake to obtain the release of all Spanish prisoners in the hands of the insurgents in Cuba and the Philippines.

The Government of the United States will at its own cost return to Spain and the Government of Spain will at its own cost return to the United States, Cuba, Porto Rico, and the Philippines, according to the situation of their respective homes, prisoners released or caused to be released by them, respectively, under this article.

ARTICLE VII.

The United States and Spain mutually relinquish all claims for indemnity, national and individual, of every kind, of either Government, or of its citizens or subjects, against the other Government that may have arisen since the beginning of the late insurrection in Cuba and prior to the exchange of ratifications of the present treaty, including all claims for indemnity for the cost of the war.

The United States will adjudicate and settle the claims of its citizens against Spain relinquished in this article.

ARTICLE VIII.

In conformity with the provisions of Articles I, II, and III of this treaty, Spain relinquishes in Cuba, and cedes in Porto Rico and other islands of the West Indies, in the island of Guam, and in the Philippine Archipelago, all the buildings, wharves, barracks, forts, structures, public highways, and other immovable property which, in conformity with law, belong to the public domain, and as such belong to the Crown of Spain.

And it is hereby declared that the relinquishment or cession, as the case may be, to which the preceding paragraph refers, can not in any respect impair the property rights which by law belong to the peaceful possession of property of all kinds, of provinces, municipalities, public or private establishments, ecclesiastical or civic bodies, or any other associations having legal capacity to acquire and possess property in the aforesaid territories renounced or ceded, or of private individuals, of whatsoever nationality such individuals may be.

The aforesaid relinquishment or cession, as the case may be, includes all documents exclusively referring to the sovereignty relinquished or ceded that may exist in the archives of the Peninsula. Where any document in such archives only in part relates to said sovereignty, a copy of such part will be furnished whenever it shall be requested. Like rules shall be reciprocally observed in favor of Spain in respect of documents in the archives of the islands above referred to.

In the aforesaid relinquishment or cession, as the case may be, are also included such rights as the Crown of Spain and its authorities possess in respect of the official archives and records, executive as well as judicial, in the islands above referred to, which relate to said islands or the rights and property of their inhabitants. Such archives and records shall be carefully preserved, and private persons shall without distinction have the right to require, in accordance with law, authenticated copies of the contracts, wills, and other instruments forming part of notarial protocols or files, or which may be contained in the executive or judicial archives, be the latter in Spain or in the islands aforesaid.

ARTICLE IX.

Spanish subjects, natives of the Peninsula, residing in the territory over which Spain by the present treaty relinquishes or cedes her sovereignty, may remain in such territory or may remove therefrom, retaining in either event all their rights of property, including the right to sell or dispose of such property or of its proceeds; and they shall also have the right to carry on their industry, commerce, and professions, being subject in respect thereof to such laws as are applicable to other foreigners. In case they remain in the territory they may preserve their allegiance to the Crown of Spain by making, before a court of record, within a year from the date of the exchange of ratifications of this treaty, a declaration of their decision to preserve such allegiance; in default of which declaration they shall be held to have renounced it and to have adopted the nationality of the territory in which they may reside.

The civil rights and political status of the native inhabitants of the territories hereby ceded to the United States shall be determined by the Congress.

ARTICLE X.

The inhabitants of the territories over which Spain relinquishes or cedes her sovereignty shall be secured in the free exercise of their religion.

ARTICLE XI.

The Spaniards residing in the territories over which Spain by this treaty cedes or relinquishes her sovereignty shall be subject in matters civil as well as criminal to the jurisdiction of the courts of the country wherein they reside, pursuant to the ordinary laws governing the same; and they shall have the right to appear before such courts, and to pursue the same course as citizens of the country to which the courts belong.

ARTICLE XII.

Judicial proceedings pending at the time of the exchange of ratifications of this treaty in the territories over which Spain relinquishes or cedes her sovereignty shall be determined according to the following rules:

1. Judgments rendered either in civil suits between private individuals, or in criminal matters, before the date mentioned, and with respect to which there is no recourse or right of review under the Spanish law, shall be deemed to be final, and shall be executed in due form by competent authority in the territory within which such judgments should be carried out.

2. Civil suits between private individuals which may on the date mentioned be undetermined shall be prosecuted to judgment before the court in which they may then be pending or in the court that may be substituted therefor.

3. Criminal actions pending on the date mentioned before the Supreme Court of Spain against citizens of the territory which by this treaty ceases to be Spanish shall continue under its jurisdiction until final judgment; but, such judgment having been rendered, the execution thereof shall be committed to the competent authority of the place in which the case arose.

ARTICLE XIII.

The rights of property secured by copyrights and patents acquired by Spaniards in the Island of Cuba and in Porto Rico, the Philippines, and other ceded territories, at the time of the exchange of the ratifications of this treaty, shall continue to be respected. Spanish scientific, literary, and artistic works, not subversive of public order in the territories in question, shall continue to be admitted free of duty into such territories, for the period of 10 years, to be reckoned from the date of the exchange of the ratifications of this treaty.

ARTICLE XIV.

Spain shall have the power to establish consular officers in the ports and places of the territories, the sovereignty over which has been either relinquished or ceded by the present treaty.

ARTICLE XV.

The Government of each country will, for the term of 10 years, accord to the merchant vessels of the other country the same treatment in respect of all port charges, including entrance and clearance dues, light dues, and tonnage duties, as it accords to its own merchant vessels, not engaged in the coastwise trade.

This article may at any time be terminated on six months' notice given by either Government to the other.

ARTICLE XVI.

It is understood that any obligations assumed in this treaty by the United States with respect to Cuba are limited to the time of its occupancy thereof; but it will upon the termination of such occupancy, advise any Government established in the island to assume the same obligations.

ARTICLE XVII.

The present treaty shall be ratified by the President of the United States, by and with the advice and consent of the Senate thereof, and by Her Majesty the Queen Regent of Spain; and the ratifications shall be exchanged at Washington within six months from the date hereof, or earlier if possible.

In faith whereof, we, the respective plenipotentiaries, have signed this treaty and have hereunto affixed our seals.

Done in duplicate at Paris, the 10th day of December, A. D. 1898.

1900.

PROTOCOL WITH SPAIN EXTENDING THE PERIOD DURING WHICH SPANISH SUBJECTS, NATIVES OF THE PHILIPPINE ISLANDS, MAY DECLARE THEIR INTENTION TO RETAIN THEIR SPANISH NATIONALITY.

*Concluded March 29, 1900; advice and consent of the Senate April 27, 1900; proclaimed April 28, 1900.*

ARTICLE.

Extension.

Whereas by the ninth article of the treaty of peace between the United States of America and the Kingdom of Spain, signed at Paris on December 10, 1898, it was stipulated and agreed that Spanish subjects, natives of the Peninsula, remaining in the territory over which Spain by articles 1 and 2 of the said treaty relinquished or ceded her sovereignty could preserve their allegiance to the Crown of Spain by making before a court of record within a year from the date of the exchange of ratifications of said treaty, a declaration of their decision to preserve such allegiance;

And whereas the two high contracting parties are desirous of extending the time within which such declaration may be made by Spanish subjects, natives of the Peninsula, remaining in the Philippine Islands;

The undersigned plenipotentiaries, in virtue of their full powers, have agreed upon and concluded the following article:

SOLE ARTICLE.

The period fixed in article 9 of the treaty of peace between the United States and Spain, signed at Paris on the 10th day of December, 1898, during which Spanish subjects, natives of the Peninsula, may declare before a court of record their intention to retain their Spanish nationality, is extended as to the Philippine Islands for six months beginning April 11, 1900.

In witness whereof, the respective plenipotentiaries have signed the same and have thereunto affixed their seals.

Done in duplicate at Washington the 29th day of March, A. D. 1900.

JOHN HAY.
ARCOS.

—

1900.

TREATY FOR CESSION OF OUTLYING ISLANDS OF THE PHILIPPINES.

*Concluded November 7, 1900; ratification advised by Senate January 22, 1901; ratified by the President January 30, 1901; ratifications exchanged March 23, 1901; proclaimed March 23, 1901.*

ARTICLE.

Relinquishment of islands to the United States.

The United States of America and Her Majesty the Queen Regent of Spain, in the name of Her August Son, Don Alfonso XIII, desiring to remove any ground of misunderstanding growing out of the interpretation of article 3 of the treaty of peace concluded between them at Paris the 10th day of December, 1898, whereby Spain cedes to the United States the archipelago known as the Philippine Islands and comprehending the islands lying within certain described lines, and having resolved to conclude a treaty to accomplish that end, have for that purpose appointed as their respective plenipotentiaries:

The President of the United States, John Hay, Secretary of State of the United States;

And Her Majesty the Queen Regent of Spain, the Duke de Arcos, envoy extraordinary and minister plenipotentiary of Spain to the United States;

Who, having met in the city of Washington and having exchanged their full powers, which were found to be in due and proper form, have agreed upon the following sole article:

SOLE ARTICLE.

Spain relinquishes to the United States all title and claim of title, which she may have had at the time of the conclusion of the treaty of peace of Paris, to any and all islands belonging to the Philippine Archipelago, lying outside the lines described in article 3 of that treaty, and particularly to the islands of Cagayan Sulu and Sibutu and their dependencies, and agrees that all such islands shall be comprehended in the cession of the Archipelago as fully as if they had been expressly included within those lines.

The United States, in consideration of this relinquishment, will pay to Spain the sum of $100,000 within six months after the exchange of the ratifications of the present treaty.

The present treaty shall be ratified by the President of the United States, by and with the advice and consent of the Senate thereof, and by Her Majesty the Queen Regent of Spain, after approval by the Cortes of the Kingdom, and the ratifications shall be exchanged at Washington as soon as possible.

In faith whereof we, the respective plenipotentiaries, have signed this treaty and have hereunto affixed our seals.

Done in duplicate at the city of Washington the 7th day of November, in the year of our Lord 1900.

JOHN HAY. [SEAL.]
ARCOS. [SEAL.]

Mr. TOWNER. Mr. Chairman, I yield six minutes to the gentleman from Kansas [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Chairman, I am very glad to have an opportunity to support this bill. I congratulate the American people upon finally doing tardy justice to the people of Porto Rico. The people of Porto Rico have been without citizenship since they were denied the right of citizenship in Spain. They owe no allegiance except to Porto Rico, and that island is not a sovereign government. This bill gives them American citizenship. I am glad this bill provides for an elective legislature in both branches. I have seen the Legislature of Porto Rico in session. I have seen the kind of men who with unlimited male enfranchisement the people of Porto Rico elect to their lower house. They are as fine a body of men as you will see anywhere, well educated, well equipped for the business of legislators. I have examined the laws introduced in the lower house of the Porto Rican Legislature and the laws passed by the lower house. Two things challenged my attention to those laws. First, they are willing to tax themselves at a high rate for educational purposes. Second, they are willing to tax themselves to the limit of their ability to pay for the purpose of internal improvements and good roads, two evidences that they are very well qualified to take part in their own government. I am glad they have become citizens of the United States. They are entitled to it and the people of the United States are entitled to have them brought in as members of the American family. They have been in the anomalous position they now occupy ever since the War with Spain. This will give them an opportunity to become American citizens, with the right of electing their own legislature in both branches. My judgment is that within two years after the enactment of this law and after their participation in the government under it there will be little or nothing said about the severance of relations with the United States. They will become satisfied with their relations to this country, having become citizens of the country.

Mr. MEEKER. Will the gentleman yield?

Mr. CAMPBELL. No; I have not the time. It is doubtful if any people ever made improvement in every way in which a people can improve such as the people of Porto Rico have made in the last 16 years. They have improved physically; their health is better; they have improved materially to a marvelous extent. They have improved their education. Facilities are now furnished in every part of the island and the children are expected to attend the public schools. They have improved the general standard of their citizenship. I would be very glad to see Porto Rico a Territory of the United States under the Constitution of the United States. I do not agree with the idea that simply because they are not exactly like us in Kansas or Illinois or Iowa or Alabama that they should be denied a constitutional status under the Constitution of the United States. I have said to Porto Ricans in Porto Rico that, though enjoying a Territorial form of Government, they might have to wait years and years before they could expect statehood. The Territories of Arizona and New Mexico remained Territories for 60 years. Other Territories have waited long for statehood, but a Territory is a constitutional government in the United States, and I should be glad sometime to see the island of Porto Rico come in as a Territory of the United States.

Mr. SLAYDEN. Will the gentleman yield for a question?

The CHAIRMAN. The time of the gentleman has expired.

Mr. JONES. Mr. Chairman, I yield two minutes to the gentleman from Porto Rico [Mr. RIVERA].

Mr. RIVERA. Mr. Chairman, I will not enter into an argument with the gentleman from Illinois [Mr. CANNON]. It would be a very difficult position for me, owing to the high standing of the gentleman from Illinois in this House and throughout the country, and, besides, I have not sufficient time to discuss these matters, because the time allowed for debate on the bill is almost exhausted. However, I want to say that the question appears to some gentlemen here to be only a geographical question, a climatic question. I suppose that, in the judgment of the House of Representatives, the question should be considered as a political question. The House wants and the Congress wants to constitute Porto Rico as a free people, a people under a republican form of government. As regards the Porto Ricans, this is a question of patriotism. They want to be free. They want to be dignified. They do not want to be enslaved by the United States or by any other nation in the world. It is my custom to respect the love of every man for his country and to exact the same respect for my own sentiments of patriotism. I believe that under the dome of this Capitol the Representatives of a great people, undoubtedly the greatest of all, must be just to other people on the earth. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. RIVERA. Can the gentleman from Virginia give me one minute more?

Mr. JONES. I am sorry I can not. The gentleman desired only two minutes, and I did not reserve any more time than that.

Mr. RUSSELL of Missouri. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more, if he wants the time, not to affect the order already made.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that the gentleman from Porto Rico have five minutes——

Mr. MILLER of Minnesota. Mr. Chairman, I am perfectly willing the gentleman should have that if there is coupled with it the request that the gentleman from North Dakota [Mr. YOUNG] have five minutes. A similar request was made on his behalf a moment ago.

Mr. SLAYDEN. Mr. Chairman, regular order.

Mr. MANN. The request can not be granted—but I believe it can be.

Mr. RUSSELL of Missouri. Mr. Chairman, if there is no objection——

Mr. RIVERA. I only want one minute.

Mr. JONES. Mr. Chairman, I yield the gentleman one minute.

Mr. CLARK of Florida. Mr. Chairman, the House has made an order limiting the time for debate; can the committee change that order?

The CHAIRMAN. Without objection, under the circumstances the gentleman will be recognized for five minutes.

Mr. JONES. I yield one minute to the gentleman.

Mr. SLAYDEN. Mr. Chairman, what is the status?

The CHAIRMAN. That the gentleman shall have five minutes.

Mr. SLAYDEN. Can you do that in the Committee of the Whole after an order of the House, Mr. Chairman?

Mr. MANN. Do not raise the question.

Mr. SLAYDEN. The gentlemen can have it later in the debate. I insist upon the rule.

Mr. JONES. Mr. Chairman, the gentleman asks for only one minute, and I yield that to him.

Mr. RIVERA. Mr. Chairman, Porto Rico, deprived of its national sovereignty, depends upon the generosity and chivalry of the American lawmakers. I consider it very unfortunate that a Porto Rican is obliged to hear on this floor remarks offensive to the dignity of his native land. I do not wish to answer such remarks, except to state that it is not our fault that we are compelled to come here and ask for the enactment of legislation, of a constitution, which should be our undeniable right to make, according to American principles, ourselves. I must conclude, declaring emphatically that I am as proud to be a Porto Rican as the gentleman from Illinois [Mr. CANNON] is proud of being an Illinoisan, and as every gentleman on this floor is proud to be an American. [Applause.]

Mr. JONES. How does the time stand, Mr. Chairman?

The CHAIRMAN. The gentleman from Virginia [Mr. JONES] has two minutes remaining.

Mr. JONES. And the gentleman from Iowa?

The CHAIRMAN. And the gentleman from Iowa has none.

Mr. JONES. Mr. Chairman, the gentleman from Illinois [Mr. CANNON] is the only gentleman on this floor who has opposed the citizenship provision of this bill. It is my opinion that should this bill be passed without the section conferring American citizenship upon the Porto Ricans they would nevertheless become citizens of the United States.

Section 1891 of the Revised Statutes of 1878 provides that the Constitution and the laws of the United States not locally inapplicable shall have the same force and effect in the organized Territories of the United States that they have in every other section of the United States; and Porto Rico will certainly become an organized Territory under the provisions of this bill, if it is not now one. I desire to say, further, that both the great political parties of this country have declared in favor of American citizenship for the people of Porto Rico. The Republican platform of 1908 declared:

> We believe that the native inhabitants of Porto Rico should be at once made collectively citizens of the United States, and that all others properly qualified under existing law residing in said island should have the privilege of becoming naturalized.

That is exactly what this bill does.

The CHAIRMAN. The time of the gentleman from Virginia has expired, and the Clerk will read:

The Clerk read as follows:

> *Be it enacted, etc.*, That the provisions of this act shall apply to the island of Porto Rico and to the adjacent islands belonging to the United States and waters of those islands; and the name Porto Rico as used in this act shall be held to include not only the island of that name but all the adjacent islands as aforesaid.

Mr. YOUNG of North Dakota. Mr. Chairman, I move to strike out the last word for the purpose of getting the five minutes additional which I believe the House was willing to grant a few minutes ago if the rules had permitted.

I was making a brief analysis of the treaty of Paris and had reached Article IX. Articles IX, X, and XI furnish what might be called a bill of rights in this treaty. I call your attention again particularly to these words found in Article IX, referring to the Spanish subjects:

> Retaining in either event all their rights of property, including the right to sell or dispose of such property or of its proceeds; and they shall also have the right to carry on their industry, commerce, and professions.

This is a specific guaranty which we gave to the Spanish subjects.

I call your attention to the fact that a speaker during the recent debate a few days ago stated that we made no specific guaranties to Spain. Now, to give this treaty a fair interpretation, every article ought to have read into it or supplied the words that it applies particularly to Spain, because Spain is a contracting party.

Article X says:

> The inhabitants of the territories over which Spain relinquishes or cedes her sovereignty shall be secured in the free exercise of their religion.

Here is used the word "inhabitants." Now, does anyone question that this word does not include the citizens of Spain when Spain was a party to this treaty? Spain would not and did not sign a treaty that did not take care of her citizens, and, I think, in that respect is rather distinguished from the action that was proposed here a few days ago when the majority leaders did not take any pains to protect our own American-born citizens who were residing in and engaged in business in the Philippine Islands.

Article XI provides:
